freedom man that's what it's all about [Music] you have to groove on freedom [Music] welcome you are listening - what on earth is happening this show will discuss the topics of human consciousness mind control natural law the occult and all issues that affect the freedom of the people of Earth what on earth is happening will endeavor to shine light upon the darkness of our world and to offer empowering solutions to the problems we face as humanity approaches it's critical moment of choice and now here is your host Mark Pascoe [Music] welcome one and all you're watching what on earth is happening I'm your host mark passio my website what on earth is happening dot-com ladies and gentlemen government is slavery thanks for tuning in to the show today today is Sunday September 1st 2019 this is episode number 221 of what on earth is happening we have a great show lined up for a year today today's show is all about the first ever an arkadelphia coming up here in Philadelphia September 13th through 15th 2019 looking very much forward to being part of this great conference here in Philadelphia today I am joined live in studio with the conference one of the conference's main organizers Carmen chironji Carmen thanks so much for being on the show today actually having me mark salutely so Carmen I want to just jump right in we're gonna actually have also three other great guests we're gonna be talking to your Co organizer Pat leach via Skype we're gonna be talking to two other speakers including Derek burrows and Etienne de la booth C I believe I'm pronouncing that squarely can correct me if I if that's incorrect but Carmen I want to start off with you and just let the listening audience know a little bit about what's gonna be happening in just a couple weeks right here in Philadelphia as part of an accord elfia well we're really excited it's a three-day event Friday the 13th Saturday the 14th and Sunday the 15th we have an amazing line-up of speakers you obviously Derek it's and a la Bowie Square and Jeff Berwick a lot of other people Clyde to call we got a whole host of people that are bringing a lot of different sort of perspectives into this one melting pot the three main subjects that we're kinda tackling is occultism occulted knowledge cryptocurrency and you know how blockchains are revolutionising economy and finance and then the political theory of anarchy self ownership and so we have all these speakers coming together to do all this but we also are making sure this is a very fun and sort of like memorable event so we have like stuff happening at night every every evening we have sort of like a sort of like two shows at the one night and then the the blowout at the very end we're gonna have a huge skatepark a competition for pro skaters at FDR down the street and then a concert after that so it's going to be very fun and also very enlightening okay so that's what's kind of setting this one apart you're really incorporating some additional social events into this conference as well in addition to just the educational outreach absolutely to the attendees we believe that you know it is about human connection at the end of the day and that's how we're really gonna sell out our key to people like you're not just if somebody's yelling at you on Facebook through a text screen it's not as effective is if somebody looks you in the eye and you know touches your heart a little bit with something that affected them that made them feel this way now tell people a little bit about the venue for the event all right so the venue is actually what's really exciting because it's it's almost like two venues in one so you have the inside of the venue Galdos catering which is a huge catering hall a giant main floor that's gonna have you know all the speakers speaking and stuff like that plenty of vestibules there's bars inside they'll be food to order but then outside is H I can't even bigger parking lot even more square feet and we have a giant sort of like outdoor Agora slike extravaganza if you will we have um we're having this we but we got a giant tent put up to where anyone can come and for like a small fee get a piece of a table and sell their wares whether it's you know don't soap that you make or maybe some glass bowls that you make we're gonna have a bunch of food truck vendors out of there I got a lot of the Philly vegan pop flea type food truck vendors coming through and then part of the we're doing a lot of fundraisers for the free Ross project but my favorite one is the one we're doing outside we have a dunk tank and we bought a bunch of presidential masks and it's gonna be called dunk Trump for Ross so you can like you know pay a couple of money to throw like balls and try to dunk them fake Donald Trump into like a dunk tank I mean I like the idea that you're bringing some food trucks there with vegan food because you know sometimes people when they come to a conference you know they have to make a lot of compromises on like what they're gonna eat especially if they have any dietary restrictions like being vegan so you know I'm glad that you're doing that because that gives people an easy access to get you know some good healthy vegan food while they're actually at the event no I mean I can relate to that personally you know I mean I went to a and other comforts I don't want to I don't want to dime them out but we ordered a vegan entree one of the dinners in it it had um you know like dairy in it you know I mean because the chef wasn't too keen on you know would be it actually means so yeah we want to make sure that that edge is covered from a personal perspective and just in general that's great now I'll tell us a little bit about some of the speakers that are gonna be at the event well I'm really excited for Derek who will be joining us soon he was running for mayor Houston's bond in my opinion I think it's one of the coolest things I was actually me and Pat two hours before this were on Ken bozek's podcast and I was talking about him running for mayor of Houston has inspired me to maybe one day run for mayor Philly on the platform of dismantling the PPA I think I would have enough support if I attack if I took on the parking authority so that's I'm really excited for that of course at Tandy law Bowie c-squared will be joining us in this call as well and I just reread his book again understanding your slavery it's a great book that like it's just a very like straightforward non-emotional way of putting forth the truth that we are under control by what he prefers to his intergenerational organized crime and I feel like that's the most logical least emotionally charged way to like nail that concept and then we have Gina car who's gonna be a beacon speaker I figured I'd throw her in there cuz I want to make sure she's great yeah she's awesome she really has the full body of research too for anybody who's like on the fence about that kind of and I'm max Egan is gonna be part of yes yes max Egan's coming he's also doing a workshop as well and then of course you my friend a keynote speaker preparing my presentation almost to finish my main presentation called the sacred gift of anger I think people are going to be pretty impressed with what I have to share regarding that I think they've seen a lot of it in the last few years here on the show but you know before we go to some other things regarding the conference because I we actually are going to scream you're helping edit the documentary of Mark passio and this and the science of natural law which is my premier documentary first-ever a documentary film that I've ventured into making we're going to actually premiere the rough cut of that it's not gonna be the very finished final version but we have a pretty decent rough cut prepared to screen and we have a little trailer clip of that that I'm going to show the the listening audience on the show here today so let me just go through a couple of things very quickly about at least what I have planned for this event hold on one moment and jump into the slides and we can cut over to the laptop real quick so this is the title card for today's show it looks like we're having a technical issue no no we're not there we go let me just hit play on my slides okay so this is the title card for today's show about an arkadelphia thanks to Brett for making the great graphics of course our guest derek bros Carmen Pat the organizer team and at TN coming up in a couple of moments so this is gonna be my part of my contribution to the event I'm gonna be giving the talk called the sacred gift of anger you can get tickets at an arkadelphia dot-com and if you use promo code passio at checkout for the event then you can get five percent off of your ticket sale and then the Anarch Adelphia organizers will actually match that five percent and donate it directly to what on earth is happening so I'll go to an arc adelphia calm to get tickets and you could use promo code passio a check out for a 5% percent discount this is the title card of my presentation called the sacred gift of anger and I'll be giving this on September 14 that Saturday night September 14th after that we will be screening the first-ever documentary film that I ventured into making and Carman again was one of the editors of the film it's called Mark passio and the science of natural law I'm gonna cut away briefly and cue up the the trailer and we're gonna play that for everyone here today so let me get that queued up and we can cut back over all right we're having audio we're having an audio issue I hear we go not coming through okay here we go apply to human behavior does our knowledge your ignorance of these laws impact our collective freedom as a species this video will explore these questions in our current understanding of universal forces that affect the daily lives of each and every one of us natural law I guess you could say just what almost like first instinct kind of I'm not really sure I'm actually a lawyer by training in education so I'm probably the worst person to ask applies to the whole country [Music] I think it means like how law is interpreted by people everyone was born nice and kind but they are corrupted by society that's natural law to me so what actually is natural law the definition of the word natural is inherent to an having a basis in reality in nature in other words not man-made the definition of the word law is an existing condition that is both binding and amitabh 'el binding means have any effect that cannot be escaped immutable means unable to be changed by anything or anyone [Music] natural law therefore is a set of universal non man-made binding and unchangeable conditions which govern the behavioral consequence of beings with the capacity for holistic intelligence natural law governs the aggregate or collective freewill behavioral choices of entire populations by manifesting the consequences of the behaviors that we choose the consequences which we receive are always dependent upon whether our chosen behaviors are either moral or immoral or in other words right or wrong so that's a very so that's a very small clip of the documentary really happy about the way it is turning out so far I think it's gonna make a big impact when it finally goes public and I want to thank everybody who's been working tirelessly on it so I think well let's jump back into the slides briefly because I just want to finish up with what I'm going to be taking part in so that's the science of natural law documentary coming up so we're going to be showing the rough cut as part of this great event in Arkadelphia and then the Monday after the event September 16th an all-day workshop I'm hosting at Papi's Italian restaurant 31:20 South 20th Street in Philadelphia it's going to be 10 a.m. to 5 p.m. an all-day workshop called teaching natural law with Mark passio this is for potential teachers of natural law I'm going to share some insight about how to go about doing this some of the skill sets that's going to be involved I'll be giving people per specific slides that they can use as part of teaching natural law if they want to do that in their own area this workshop is $120 to attend and again tickets are available at at arkadelphia comm so that's all the the event regarding what I wanted to show and I think now would be a good time to like bring in our other guests for this show and we could start talking to them let's uh let's cut over to Skype everybody if you would unmute please I'll introduce everybody one at a time we have an Arkadelphia co-organizer Pat leach Pat welcome to what on earth is happening but stop mark we have two speakers here with us today Derek Bros Derek welcome thanks very much absolutely and another speaker for Ana an orchid elfia 2019 at Tian de la Bui see now I have I pronounced that correctly it's a pleasure to be with you guys great ok so that is the correct pronunciation there then at Tian de la Bui say we see yes ok square it so uh gentlemen if you want to start us off just let us know what your basic role is going to be in a tan arkadelphia 2019 or how you helped in any way to set up promote the event or how you're gonna be taking part in it just start with Pat yeah my name is Pat leach I'm part partners with Carmen and sunny organizer of in Arkadelphia mark that trailer got me so amped I'm so ready for that premiere you know thanks I hope to helped worked on it shot shot the video I remember we had to do it twice and you're in your room and then Carmen and I went out all over Rittenhouse Square and temple and and shot it wow it's looking really really good yeah I think that's it's gonna be really great when it all comes together and is finished and polished and it's it's got it's off to a really awesome start and I think people are gonna be even impressed just by the rough cut let alone we will refine it even after that to get it into its final form but it's looking awesome already yeah I'm really excited for that I'm really excited for a lot of the parties some well you guys did a great job with explaining what's going on is you can just go to an arc adelphia calm and get a little bit more detail the schedule is there yeah I'm really looking forward to your seven-hour workshop teaching that's law and the documentary I mean this thing is all finally coming together we just have 11 days left I've been working on this thing since since the day we left an arco poco we showed up at an arco poco sort of with a dream and a banner and some cameras and some sound gear and we got the best response that we could have ever gotten you know thank you so much to all of our speakers Derek and at the NA I mean if it wasn't for you guys this thing really wouldn't have happened you know so it's really just the support and everybody coming together and really making this thing happen that's it's just this game is really coming alive it's coming coming to life Pat but I mean you know a lot of people don't really know what goes into conference organization a lot of people have a lot of complaints a lot of things you know that they they you know don't like about how certain things are done but those who haven't really done it don't really understand what it is to organize an event that is this large before we even go to our other speakers I'd like you and Carmen to just talk about like what it's like to organize a conference of this magnitude because our listenership I I don't really think has an appreciation or a really an understanding of it because very very few people have ever done anything like that let's be honest okay so just like you know you guys together like just go back and forth a little bit talking about what it is what is it really like to organize a conference like this the first three months were excruciating it was very little time you know this was redesigning that doing a like a evolution of the brand like redesigning the brand establishing our business our financials just developing and designing the website just getting involved with the network and pushing doing a ton of promotional graphics and just contacting everybody and making it sort of like I don't want to say like fake it till you make it but really get it out there enough to where people see that like we were really trying to do this and we really wanted to get people on board and then you know we've done this with virtually no sponsorship you know we basically put out a bunch of graphics and content and on-boarded everybody and got them to sort of agree and then the ticket sales just started to come in and they steadily grown and allowed us to sort of finance this thing and make it happen yeah this thing is entirely self financed so far we have a couple like small sponsorships but as far as like what everything's been everything that's been paid for it's been booked has come from the support of the people who are coming together to attend this event which i think is really cool that's like the most grassroots thing I've ever been a part of I think when something stays small like that and grassroots it's these more true to its original intent as well so you know it's great that you guys were able to organize it like that with just the the funding and the help of the actual community that wants to see an event like this you know come together and that's that's an encouraging sign because it can be very very difficult to get the resources for something like this people don't understand how much things like this cost it's in the tens of thousands of dollars ladies and gentlemen you know so when people like you know you know talk about like oh it's you know could be done a lot better or this or that it's like you know I I heard criticism when I was in the early days of organizing for your mind you know you hear criticisms of a lot of events but you have to realize people are gonna have to just try to work and do the best that they can with the resources that they have because it literally like trying to find a venue that will even host something like this and do it at any kind of a reasonable price it's like there was an event here in Philadelphia called you know ending racism sexism and authoritarianism that took place I was supposed to happen in in New Jersey in Pittman New Jersey and they moved it last-minute to sugar house casino in Philadelphia yesterday and a couple of people I know attended and they found out just what the price was for one day renting one room one large ballroom at sugarhouse casino was fifteen thousand dollars now that's not including all of the other expenses to bring all the speakers to lodge all the speakers to print all the promotional materials to make the website etc you're looking probably easily a thirty thousand dollars for a one-day event you know so this is a three day event that's you know it's starting off somewhat small like the original for your mind was you know and it's going to be at a nice cater it catered ballroom type venue but it's like you know you're still probably coming close to around that much money for an event like this at least I would imagine I you don't have to share any of that data but I'm just saying like people don't really understand what it is to do something like this and when you do it out of your own pocket or with just with donations contributed it can be very difficult and you often caught it right very by the skin of your teeth literally okay so you know I just want to first you know take that time with the organizers to make people understand you know you guys are putting skin in the game you know it's like this is what I ask people to do this is what makes me happy when I see people doing you know get up do something organize something do some kind of an outreach you know this is what why I get down the reason I get down and the reason I feel like we're not making any any impact is because I see so few people actually doing something real in the real world not just tapping away digitally on a keyboard but trying to make an impact in the real world bringing people together helping people to network with each other and establish connections we need that type of camaraderie and Brotherhood and sisterhood you know it this isn't just about you know digital transfer of information you know we we really do need physical real world events as well in addition to you know just putting information out over the internet I intend to continue with physical real world events I think I'm going to continue them in the form of hosting just my own presentations locally you know someplace in Philadelphia at some point in the near future this way I could work around my own schedule and finish a presentation and then deliver it instead of trying to finish it on a time frame in an in a schedule like you know kind of getting a book report done for you know your high school class or something so that's my vision for the future of live events of what I'm doing and anybody can do things like that you know this is what the teaching natural law workshop is going to be about hosting events in your area to teach people about natural law and what it is why it's so important why we need to understand it as a society so you know I just wanted to take that time with the organizers because it's so important to realize that this is such an important part of breaking through to people is giving a platform for speakers in the form of conferences like this and a lot more of that I think just generally needs to be done with people who are just coming up and you know presenting their information so let's go over to our speakers and I'll get they're taken let's have have you guys talked about what how you guys are going to contribute to an arkadelphia 2019 so let's start out with Derrick bros I guess just introduce yourself tell people like your main website and tell people how you're going to be participating in this year's and arkadelphia yeah thank you Mike I appreciate that and yeah so a Newark Adelphia sounds awesome I think that before I get started on Who I am it does remind me of the early days for your mind what I'm seeing so far which is really cool so my name is Derrick Rose based in Houston Texas I run the website the conscious resistance calm the YouTube channel the conscious resistance Network and it's basically focused on exposing people to the realities of our world helping people understand their own self ownership their own self empowerment on a true spiritual plane as well as confronting the physical institutions of power and exposing government corruption and corporate corruption and all these various systems and and what they're really about so I do that as a youtuber I do that as a journalist both here in Houston and wherever else I can doing articles and reports video reports and interviews and things of that sort and I regularly speak at various events including at arkadelphia so I'm really excited to be a part of this and Eric what is your talk don't be at your mainstage talk at an arkadelphia going to be on I'm you know I'm still kind of working that out actually mark but honestly what you guys just hitting on and what you were your your kind of closing thoughts there as far as having skin in the game and making an effort is it's pretty in line with where I think I'm gonna be headed I'm not sure exactly was a couple of ideas that I'm working with but you know I've really just been putting in a lot more time focusing on Houston where I'm you know where I've been my whole life and my activism that my work is always focused on that how I can affect my local community in addition to going and doing say national protests are coming to conferences in Philadelphia or wherever it may be or an OCO and things like that but I've noticed what I see personally a very huge gap in the marketplace if you will of activists and truth seekers who are actively engaged in their own community there's a lot of people who are active online or have big YouTube channels and have you know good ideas or maybe great work but they also have no connection to their local community in any way which I personally blame is a weak point for anybody who's trying to build long term freedom and build a movement of people who actually question government and question authority around us is you know I think the goal an important goal should be to actually try to have those conversations with the people closest to you so that you don't end up surrounded by a bunch of status neighbors who have no understanding of say natural law or the things that are important to the listeners and you haven't made any efforts to engage them so I really have just put a lot of energy and time and that even more recently so I think that part of my talk is gonna send her around that you know what what are people doing to actively move the their goal you know themselves closer to their goal whether that goal means exposing the deep state or you know spiritual balance or whatever your goal may be and that the reason that brings people to Anika poco and to Anika Delphia and to you know your YouTube channel and my youtube channel I've been really pushing my audience recently to think into question and ask why are you coming to this content you know are you just here because you're obsessed with The Conspirator mint the infotainment the addiction to YouTube and just keeping up with what the Epstein's are up to or what this groups are up to or are you actually trying to achieve change and change yourself and change the world so yeah I think my talk is gonna kind of explore that concept a little deeper and really ask that question of the audience and everybody else there including myself and just thinking about what we are doing in any tangible way what else we could do and of course the answer is going to be different for everybody and there are circumstances but at least to press that question and to put it towards our particular community and towards the community of people online who are looking for solutions and who are looking for answers to ask what are you doing you know what what tangible steps have you taken to spread awareness Derek I love that idea for one overarching reason people really seldom stop to think that the the so-called bad people that are really ultimately doing this okay the people who are brainwashed the people who are you know just not do not understand true objective morality that end up going into the police force to control people end up going into the military and taking orders to go and take natural resources from other areas of the world and their people you know they are made up of people from our community they're not like alien beings you know Orangemen you know they're people that were raised by men and women in our local areas that and and this is what happens they don't they're never engaged on these ideas you know they think there's no other alternative for them and they go into these sick Dupre you know control freak totalitarian institutions and you know offer their body you know as a sacrifice up to you know these people in alleged power that you know and the cycle just continues and continues it's like they're not coming from somewhere else they're coming from our people this is what we have made as a community you know we need to look no further than in the mirror if we want to know what is ultimately creating the experience that we're receiving in the world you know it's we're doing this to ourselves so it's like this is why more people have to speak out they have to be willing to actually engage people where they're at you know the answer isn't running away you know I see this is a big thing everybody wants to leave leave the city go here become an 8x pay go down and move to South America or wherever it's like the answer is to make your community community better where you are at you know and so few people want to engage in that thing because hey they honestly they'll look at people like me and say you want me to become as frustrated as this person is now I I admit it it's frustrating you you you do this for this long and you see this little impact because what it's really about is people have to ultimately at some point stop being an attendee with an ass in the seat and be somebody who's actually doing something and get up off their ass and put skin in the game in this battle for freedom and actually engage other people you know if we're it's yeah the the the days of being just passive observers looking at things like they're taking place on a screen which we're all too familiar with you know with all the black mirrors in our home ok you know how many screens do you have that you stare into on a daily basis I know I stare into a ton of them 1 2 3 4 5 6 7 7 right in front of me right in that room alone ok you know you know so it's it's like you know we have to start making that conversion from just being this passive observer to being an active participant and I think that's what conferences can start to engage people and especially when you talk to people directly there I always get in conversations with people that say I want to start and I came here to hear you and gain some inspiration from you and it's like how do I start and I just say you start from where you're at don't second-guess yourself if you know enough to even come to an event like this you know enough to start talking about this material you know so Derek I want to thank you for that answer and I want to come back to a very interesting dynamic about that that I'm gonna particularly pose to both Carmen and Pat but you guys can jump in on as well about this area where I'm from and I'll come back to that will do a roundtable on that in a moment but let's go to at TN at 10 let people know about yourself your website any projects that you have done in the past and what your role in an arkadelphia 2019 is looking to be absolutely so I am attend a lab we see which is a pin name my background is I'm a technology into entrepreneur I've valsa I used to live until very recently outside of Washington DC I was in Washington's largest CEO networking group I've worked on Wall Street I've run a national third-party political campaign and I've worked at one of the big four think tanks and and my thesis is so I'm an I'm the founder of a start-up public policy organization called the art of Liberty Foundation and I'm the author of a book entitled understanding our slavery and in the book understanding our slavery what I'm trying to do is I'm trying to make my thesis is that government is not something that was designed to protect life liberty and property government was always designed from the beginning to rob and enslave the population and as everyone on the call probably understands if I don't have the ability to take your money and call it taxes if I don't have the ability personally to make up rules for you and call it laws then you can't delegate rules that you do not have yourself to a representative or to a government and so if the ability for the government to do all these things doesn't come from We the People where does it come from and so my thesis is it's been a legitimate from the beginning and what I try and do with the book is not only do I expose the illegitimate of government but I'm exposing the role of the media in in giving the population this false template that it's legitimate that you're all that is legitimate because we have this political ritual called an election something decide to vote for it if it is that you are somehow now responsible for paying its taxes and obeying its laws and so so the the book breaks down the legitimacy of government but it also breaks down the media system and I do it in visualizations I do it in infographics I do it in historical photographs in a way that has been designed to improve the number of people that want any book because it's very fiction rich and also because the majority of people are visual learners when you when you see a visualization you come to kind of a deeper understanding and so you may our name may not believe that there are six companies controlling hundreds and hundreds of subsidiaries to give you the kind of illusion of diversity of choice but if I show you a media ownership chart you're like damn there's six companies controlling hundred the subsidiaries to give me a choice and then you come to this kind of this deeper insight and so that's what I'm trying to do with the book the books been very successful it's now in its third edition for opening and it's been the best-selling book at an ARCA an ARCA an arc poco for the past two years and what I'm really really excited about with an arkadelphia is that you know in our case that's been really like the best-kept secrets of American politics because it's really the only you know it's the only quarter political solution that's fair for everybody nobody gets the ring a pound or nobody gets to use violence or force on anybody else and they've been hiding the fact that the world is this self-organizing placed produces spontaneous order and that absent monopoly government you'd still have everything the good things you want out of government you'd still have police it just wouldn't be monopoly police and they would only be focused on protecting life liberty and property they wouldn't be focused on SWAT team in you for having a plant or for gambling or for some other victimless crime they wouldn't be engaged in road piracy and if their review then you fire them and you go and you get another you know another security company that provides the you know the same level security that the monopoly police are providing now and so so in the book what I'm trying to do is share this message that that that we can have all of the things that people want from government that protect life liberty and property without the violence the war the the for-profit prisons where you know people convicted for victimless crimes or forced to work for slave labor and these you know for-profit prisons and so I'm doing that in this like very very info rich book you can download it for free at understanding our slavery dot-com and in my talk at an ARCA polka will be something along those lines I'm still putting it together myself but it'll be continuing to expose you know not just the legitimacy of government but media's role in showing how this small handful of old-time music these and a couple of dozen new media internet social media and search companies are able to really weave this kind of control of perception by hiding the alternative voices that are bringing this information to light at the same time they're amplifying the voices they're telling you that the system it's legitimate and that you just ought to pay your taxes and vote harder even when we're being robbed wholesale from Washington DC attend I have a copy of your book both physically and digitally and I have to say it's definitely one of the most impressive efforts of our time talking about the legitimacy of government on its face it's right up there with the most dangerous superstition but I think it's done in a way that just um you know everyone can really just understand and it's so visually rich as you said with a lot of great images in it that I think it's very visually appealing to people it doesn't really read like a textbook or a simple philosophy book because it's very visually engaging so I think you did a great job with that I just wanted to say thanks for putting that out there it really reminds me a lot of the science of natural law documentary because I'm talking a lot about that in that documentary where we explore that if you know someone does not possess the right to take a particular action because it causes harm to someone else or holds them in a state of duress that that that a so-called right cannot be delegated or granted to any other individual or group and then magically turned into a right because it's a wrongdoing you can't delegate or wrong to someone else and magically turned it into a right by any process of mankind that this is something that we explore in the science of natural law documentary and we show how much people do not understand these dynamics you have to see the result of the man on the street on interview format that we did men and women on the street you know interview format and I think what it does is it visually highlights where the human work is to do what is the great work well we're we're visually showing it in this documentary we're showing how much people don't understand one thing that we're talking about how much they get the wrong answers when it comes to it being asked questions about objective morality you know I mean I see it every week on social media I try not to even go on social media anymore because for me all it is is a huge state of depression where I just see where people are at you know and I gauge collectively where humanity is at in their understanding of morality and it's horrifying quite frankly and this is something that I want to ask you guys individually before we get to asking about like this particular area because I want to get to talking about where how you guys have engaged the local community regarding this conference particularly to the organizers one of the things I want to pose to everybody including the speakers is you know do you see people in mass or just I you know in your communities gaining any kind of a wider understanding of morality in general do i I don't even see people talking about the concept of morality and when I do I always hear the same thing that it's subjective it's up to us it's different for everybody moral relativism seems to be completely running rampant and no one or not no one I don't want to make that blanket statement very very very few people in the freedom community even grasp or understand that internally in their own mind as the biggest problem that exists on the face of the earth they don't even understand how tied to the destruction of freedom the whole concept of moral relativism actually is and that's not that's like that's the root of the tree of evil as far as I'm concerned and so few researchers speakers activists are even in in talking about that and imbuing it into the discussion you know I want everybody to just speak to that for a moment and give me their taken perspective on that and see how do you see that playing out in your community on your circles in social media etc so Carmen you could jump in and do that first of all we'll go through everybody else in order well I relate to you mark because I mean the most immediate community that I've been trying to teach this to is my family my like nuclear family and you would think they would be the most you know I guess like open to you know maybe hearing something from their son but there seems to be like this mind virus that is very very difficult to get through so my success has been found outside of the nuclear family and Morvan like the contain commuter like for example an interesting thing that I'm excited for about in Arkadelphia how to address this problem is at the at the skate competition after the show it's going to be a lot of in Arkadelphia attendees but that competition has its own crowd and there are a lot of like punk rockers and I grew up in that senior I grew up skateboard and me too yeah that's that's usually a lot of people's first introduction to it but a lot of people get stuck there and don't ever you know kind of transcend into like the spiritual truths and the higher level thinking that you kind of evolved into if you go down that path and I think to have people like like like Etienne and Derek and all of our people kind of like mix and mesh with those people is gonna be a great way to bring like this outside perspective into the local communities a good example somebody who's doing that whom who's gonna be there is Brandon Martin the guy who runs skatopia he's um he's pretty involved in doing that in his community over in Ohio and it's gonna be cool to see like people who might just be interested in you know tagging things with graffiti and you know smoking various plants to maybe consider that hey look maybe this punk thing like maybe there's more to it than just being pissed off maybe there's some sort of healing that needs to take place and I have to be a part sure and like a big thing in that community is nihilism yes you know just not caring about anything just totally shedding care and saying no the world's just doomed and I'm not even going to bother with anything doing one lifting one finger just let it go to hell you know that's huge in the whole punk rock community especially here in Philadelphia I see nihilistic tendencies all the time yeah and then the other side of that is you know the people who don't go that route usually get sucked into the you know sort of like the corporate materialist route you know whatever it is just making a living and you know having a nice house for your family and you know so yeah your your family thinks you look cool and you're like you know you're following along the little like life path it's like the game of life that's t-nut I mean they want to fit into that and what I think we're gonna do at an arkadelphia to draw in those types is the outdoor carnival is gonna attract a lot of eye and foot traffic and that's gonna be free to attend the the ticket holders will have access to the inside area where all the juicy stuffs going down but we're going to be having a lot of people just coming through all these food trucks and stuff have their own audience like I mean even in the vegans there's like vegans don't understand the connection between you know what they promote and anarchist and how it's like essentially the same thing just applied to human I was talking about this last week on the show how could vegans advocate entirely for freedom for the animal kingdom but not extend that freedom to human beings exactly and and throw away the idea of the legitimacy of so-called Authority and how could people in the freedom community who want anarchy not understand that we should extend that to the animal kingdom exist like how could you want just certain beings to be free not all beings to be free it's it's a total act of cognitive dissonance if you ask me but it's like these are the communities that we have to bridge you know we have to act as liaisons and bridges between these communities because they they only have half the picture yeah or even less than half and there's a whole wider world of information that they have to open their minds to exploring and hopefully you know and arkadelphia could help do that in some way or form yeah that's the idea these these trucks that we're bringing out of huge audiences that are from that visit them all the time in all the various locations and usually it's just pop-up flea markets but this is gonna be a little different because they're gonna be waiting in line for like you know a banana ice cream whip behinds gonna start talking about the illegitimate sea of government and then they might get into an interesting conversation it opened some paths you know what I mean yeah it should be an interesting dynamic yeah so Pat I'll let you continue with that discussion you know we're basically talking about like how do you see your community when it comes to or social circle when it comes to understanding the concept of that moral relativism is the main problem and that we have to understand rights you know are our objective you know and and right and wrong is objective and we can't just delegate rights that we don't have you know you know even in the freedom community the idea of moral relativism is huge and I see it constantly i I was on a Liberty oriented page this past week where somebody was saying who was a freedom advocate just saying oh all the vegans are talking about that they're they don't eat animals because they want to have respect for nature and then it had like a you know a bird devouring or lizard devouring or bird or something like you know a bird devouring a worm I I don't even remember exactly what the meme was but it said and yet this is nature and it's like what that's trying to do it's it's trying to plant the mind virus as Carmen said of moral relativism because it's like it's saying that we should somehow have the the moral sensibilities of the lower animal kingdom of animals that just operate purely on instinct and don't have a higher reasoning function of the mind you know it's um this is something that I constantly try to tell people the Satanists in all of the the rituals that I attended in all of the groups that I affiliated with throughout the years that I was involved in Satanism and the dark occult one of the main things that they told me that they wanted to do above all else which was one of the main pillars or tenets contained in the Satanic Bible was to get the human population to think of themselves as nothing but another animal this is open conversation with high-level Satanists at actual events and rituals that I attended when I was a dark ocultist in my past in my youth okay they said spoke openly about that they were going to convince the population that they are nothing but animals and should basically just choose to act like other animals and really I didn't have time to get into a wider conversation about it but what I really should have went into is well I guess that means we should just walk down the street and rape anybody we want because that's what animals do they don't ask if another animal wants to be their mate they just go and have their way with them so I guess we should just be just raping indiscriminately then I guess you know I guess if you just don't like the look of someone and want to take their territory like animals do you go and rip their throat out with your teeth I guess that would be a perfectly acceptable behavior because if you're saying to just devour an animal like that one animal will devour another well then by that rationale I could just boom blow Carmen's brain out here and then carve up his flesh and then just draw away right it would be just perfectly fine and mortal to do so because the animals do it you know all of these would be just existing rationales for just behaving however the fuck we want with absolutely you know no moral constraints whatsoever so you know if that if people think of themselves as animals why not take it out to its logical conclusion and just absolutely be a beast of the field you know this is what Darwinism has done to humanity's brain it is a mind virus this is Darwinism this is social Darwinism this is cultural Marxism and this is ultimately it paves the way for radical totalitarian control freak behavior is really what it does because what it's saying is that the animal kingdom as far as the animals who can't reason and think and don't have the capacity for holistic intelligence like a human being then we should just bind our behavior back to their way of being in the world their instinctive only behavior right that is that is that what we are we shouldn't aspire to be anything else than lower animals right because to see that they've got Darwinism as a religion and it's not a religion it's a theory and a bad one at that you know and social Darwinism is the credo of Satanism you know that's what this ultimately is minoo other way to slice it except it's satanic thinking and as Carmen said I like the idea that this is a virus of the mind it's a virus of thinking it's literally like an infectious disease spreading through the population that's what moral relativism is so Pat I'll let you speak to that for sure so I would say that by the time I started to give back or raise awareness in my community I had already destroyed my reputation with drugs in the legal system so no one was really like willing to listen to me so I turned to the Internet and that's sort of where Luciferian came out of this animation about sacred geometry and spirit and fractal mathematics that essentially proves the opposite of what you were just saying is that we're not just these animals we are these godlike beings that sort of stem from this same source and and then it sort of evolved into and arkadelphia you know what I mean I tried to start some meetups around here in Bitcoin meetups like one person came and nobody came i mean i'm upstate new york and the cats come out and sunnah you know nobody's really willing to listen so you know i just decided to do this on a worldwide scale now and people are looking now people are listening you know and that's why we're bringing people like you you three you know some of the leading researchers in your fields to the cradle of Liberty what better spot for something like this and you know I I through those hard times I'd sort of become a drifter on the little concert scene and there's there's sort of that nihilistic element in the punk scene that you were talking about where we just find ourselves in these drug-induced days is where we find some sort of some sort of spiritual enlightenment but it's like you know everybody is just all about the jammed and the camping and what festival to go to next so we've actually partnered with my buddy from clockwork records and we're throwing an ARCA work and we're bringing in some dubstep some deep house we're bringing and really like well-known music from Philly local and a lot of other big name artists and that's just another way to sort of draw in this on-the-fence type of crowd and expand into this like pop rock skater scene and like the dubstep deep house Grateful Dead head scene because we're all looking for this sort of utopian anarchy you know but there's just there's there's a lot of you know confusion still there's no the lack of direction so I'm good I mean I'm doing in Arkadelphia because you know it's just the next level this is just where it has come to great you know and I think that's great bringing in some musical artistry into it because you know that lends the creative aspect to it and you know that that can help bridge the philosophical understanding cuz a lot of people come at this from the creative aspect of the right brain you know the right brain intelligence and you know that that helps bring it all together you know that that helps you know people who really only do the verbal and the heavy research end of it to be able to you know unwind and get a little bit of creativity into their mind you know and it also helps the people that you know are like that to come over and get some of the philosophy you know from the music scene you know and again we need to bridge with that community these are people that have to get the philosophical aspect that philosophical underpinnings of a true freedom oriented way of life you know because they have the general idea of that but they don't know what the specifics are you know and then a lot of the people in the in the freedom community are extremely left brained I mean it's something that I'm actually going to talk about in my presentation that holds a lot of them back in their understanding and you know they need that that creative you know expression and outlet you know to be able to really integrate a lot of these ideas holistically and you know that's a lot of these type of events don't do that you know I know free mind fest that was hosted by my friend Tim Smith attempted to do that with a lot of musical acts mixing that in with with lectures and things like that and it went pretty well so I know you guys are gonna try to take that to the next level now where are some of these just as a brief aside where some of these music related events going to be they're gonna be held somewhere separate than Galdos catering that's right at Gallaudet those happen to be at the end of the lectures yeah each night like Friday night is like a rap based one to bring in peace so these are like after parties yes exactly okay all right great and then yes our day night it's a bunch of us basically everybody within the community Berwick Derrick might come out and spit some stuff new rapper that we've got gonna be like I'm free on Friday night Friday evening yeah okay but we took a page out of your book Pat why it's home yeah yeah thank compliments to Leah let me just pull up the graphic right now yeah Vinny from what is it power to the people yeah how are through people power through people so stoked to have him my fantastic rapper yep yeah he is excellent so we have a lot of like internal family truth hip hop going on that night yeah Dee Bros might even take the microphone I heard let's go over to Derrick brews regarding like you know your take on what you see as far as your local community your local social circle whether it be you know in person or online regarding getting the idea that moral relativism is the problem that really needs to be tackled and you know where do you see people you know and how do you see them engaging this you know I think there definitely is probably a pretty pretty big dearth of people who are thinking on on those terms in you know in their average day there's so many people who are just trapped in what would you consider the matrix or the rat race and just trying to survive every single day or they're trying to survive and so in any free time they have they're trying to distract themselves from whatever may be stressing them out or pressing on their you know on their on their neck or and so it's a lot of people don't even really go down those rabbit holes to start to question the power systems around them let alone why do these things happen and to look at morality and even those who I think like you were saying might believe that the concept of morality is something that's subjective they might not even be consciously cognizant leox saying morality is subjective they just sort of act in that manner but I do think that there is some hope and it probably comes in smaller forms and in ways that we don't always see that don't make viral videos and things of that because you know over the last pretty much the last 10 or 11 months or I don't know how or whatever long it's been since an arc of poco and since the beginning of this year I've made a specific effort and really kind of in a bigger way the last two years to get out of the bubble that is the truth or community that is the anarchist American anarchist community and that is you know that some of the conspiracy research circles because I do think it is a bubble that we can put ourselves in that many of us put ourselves in especially when you do this on a pretty daily weekly basis of producing content you know doing writing essays or books or you know putting graphics together just being involved in this world in general and then you get to a point I know where I have been for years where nearly everybody you know is somebody who's connected to that world in one way or another and then you each other friends maybe outside of those bubbles that we exist in some people have no friends outside of those bubbles but I realize the importance of spending time outside of the anarchist bubble is that we get to connect with normies with the regular folk who are out there just living and breathing and trying to go about their business and I do try to approach it from some level of a compassionate understanding and from what I consider to be the beast you know the strategy of a bodhisattva that is somebody that is trying to lessen the suffering of all beings you know and going out there and communicate and working with them so on one hand I don't see a lot of people out there just having these conversations about moral relativism or Authority and what that means but I think that's the role that many of us have chosen to be and to be the ones who come out there and have these conversations and to get these ideas out there and to ask people about this and that's definitely something that I've tried dedicate my time and energy to and you know Carmen mentioned earlier that I am running for mayor of Houston it's been a really interesting ways kind of weird thing to do for me but the reason I chose to do it is because of this because I wanted to talk to people who aren't in this bubble you know they being part of this bubble I have a certain a crowd that's gonna pay attention to the ideas my take on moral relativism a natural law and you know digging deep into these rabbit holes that I do on my youtube channel but that's still a part of that but especially more and more censorship happening the algorithms are just keeping people and their own little filter bubbles so we're not necessarily reaching and gaining new people constantly but through entering this bullshit political system not with aspiration to be a politician but to play their game and to talk about why self ownership is important to talk about why force is wrong and then to use that to talk about things like mandatory vaccinations or surveillance or to talk about the control grid they talk about 5g to talk about all these different issues now I get to inject some truth into that world as well as here from everyday regular people who again aren't going to come to these events and conferences as important as they are and find out what they think and as you guys said earlier to meet them where they are so for example this morning I spent two and a bauer's with some people who are supporting what I'm doing trying to wake people up through this and we went and block walked around a neighborhood just going door-to-door and passing out flyers without these ideas you know the campaign stuff it doesn't have my face on it it's not about me it's about these ideas hey we want to talk about this we want to talk about this we're gonna talk about this and going door-to-door and talking to people and hearing their concerns here I think I'm saying okay well these sound interesting and I am also concerned that my house is gonna flood or I'm also concerned that you know this little problem these problems that seems insignificant and the bigger picture the viola crap we got pedophiles run in the world but at the same time these are these these are these small things that keep people from being able to act and you know if they're worried about their house is gonna flood or why is my trash not being picked up or these silly kind of mundane things they can't even get to the point of spending time on YouTube dissecting these conversations and having that so I'm trying to meet these people where they are by talking to the air every day nor me and at the same time say hey by the way here's some bigger picture things going maybe if we started coming together we could question and challenge these things so yeah it's been an interesting strategy to try to hijack their signal for a little bit and to talk about real issues because I think that's where the people are at the people who are already questioning natural law they're watching the show or they're watching the archive they're coming to n arkadelphia they're going to these conferences and festivals and that's still necessary and important but the vast majority of the world is still plugged into the matrix and is Yellin that rat race is doing their everyday normally things and I think it's up to us or those who choose to be to go into that room to get out of our bubbles and to engage them where they are absolutely I mean that's one of my main areas of frustration personally at a personal level is that I think our community hasn't done an effective enough job in engaging the people around us in our community to understand the the the concept of the legitimacy of authority to and understand the concept that moral relativism is the problem you know that this is a mind virus that this is a form of mind control to get people to accept that to get people to believe in it I talked about the the four pillars or the table legs of Satanism upon which the entire platform of the dark occult is base and that's egotism or pure selfishness as being the foundational aspiration for human life whatever I can get you know let everybody else be damned as long as I get ahead that's egotism that's you know putting the self as as the God in in our world for all intents and purposes then moral relativism the idea that there is no such thing as objective right and wrong but human beings based on their perceptions can make up what right and wrong are and then that leads to social Darwinism the idea that the strong should rule the weak and that's perfectly morally acceptable you know for people to just form a ruling class and that just rule violently over others because they can do it because they have the physical prowess to do it or they have the weaponry to do it and then that leads to the final conclusion and the final solution which is you and that means that because their their physical prowess and genes put them in that positions of power according to these elitists that they should decide who lives and who dies that's eugenics and that's what I call diss genex because they're really not making the population gene pool any stronger they're actually weakening it so that it can't ever Ravel against their control you know so these are the pillars of Satanism and yet the average person embodies them the average person believes them in them and accepts them as foundational principles for their own lives and I see this continually in just stepping outside my door I don't wouldn't need to leave and go any further than this street that I live on to find probably almost every human being with the exception of very few believing in all of those tenets de-facto Satanists without even ever having heard the term Satanism because see people don't understand all Satanism is is egotism that's all it is it's just believing your God this is what they want this is what they told me that they openly told me with absolutely total out forthrightness and just being right out in the open said we're going to turn the population into this this is our religion but we're giving it to them at a lower scale so that we can control them very outward and open about it not trying to hide it whatsoever at least amongst their own circles and said these are the things we're going to get people to accept that's true as just the way things are and what I'm trying to get you guys to speak to is I not only see this in the general dumb completely unread unresearched and television watching fluoride water toxic drinking you know fast food eating population that has never cracked open a book one day in their miserable lives but I see this in our community is that's what makes me you know enraged and sick to my stomach is that I see this in the community of so-called freedom advocates I see I see these tenets espoused by freedom advocates thinking that's going to somehow bring them freedom and when you say to them no moral relativism and only looking out for yourself is exactly what has created this problem it's not what could ever lead to the solution of the problem it's what created the problem to begin with and it harkens to you know the quote from Einstein that no problem can ever be solved when you stay at the same level of consciousness that created the problem to begin with but this is what I feel our own community of people in the freedom movement the anarchist movement whatever you want to call it they are still themselves infected by many of these mind viruses especially the moral relativism mind virus and I see it over and over and over and over and over again in speaking with them personally in sin in looking at their online posts they are radical left brain atheists to a very large extent because they've thrown religion out and with the bathwater they've thrown the baby right out of spirituality of true spirituality right out with the bathwater of the of religion I say throw religion out who needs it but you throw spirituality out with it and you're going to get a worse totalitarian regime than we already have and this is what moral relativism is going to bring to the population of the planet so at 10 I'll go to you next what what do you see on in this regard on this front when it comes to moral relativism particularly in our circles of people let's for the moment leave aside the unwashed masses we understand how fucked their minds are I mean all of us understand where they're at there beyond mind virus their mind is literally liquid diarrhea okay okay to just put it in in in you know plain terms that are that just accurately describes okay but you know what do you have to say about my contention that our community is often just as quote/unquote guilty in the creation of the continued shared human experience of slavery through the belief in moral relativism so I mean I gotta go back to where did you know whether it's our community or whether it's you know that kind of average person in the street you know why do they have such poor morals and the reason I believe and you know from my research is that if you're you know like I said if you're an intergenerational crime system and you're using government gubin re-ment a to you know to control the information that people will receive you don't you don't want the population to be moral and upstanding you you want the population to be dumbed down you want the population to be you know drugged up on opiates you want them listening to gangster rap you you don't want them reading you want them focused on the shiny flickering screen where you're able to use a variety of different psychological techniques to keep them you know watching the deception and the distraction and so you know the original at the end a lab we see who I took my pen name from when he wrote in the sixteenth century you know he was pointing out the tools and the techniques that that the Monarchs the organized crime of the time used to create fealty and to create obedience in the population and they oh they openly talked you know this is this is literally in the 1500s and they openly talked about a feminizing the population by giving them you know games to play in taverns and brothels instead of you know garrison garrisoning troops they would just give the population taverns brothels public games bread and circuses and so that technique has continued throughout history and so now children are taken away from their parents they're put into a mandatory government school that is a more completely moral free zone you're never going to encounter real morality because if people had real morality then they would understand that the things that the government is doing is evil and immoral and illegitimate and so you have to control the information that the people get with these mandatory government schools so you can number one ensure that they don't ever receive any reality and number two you can ensure that the template that they're given when they're very very young it lie in life when they're when they're children when they're in middle school before they're old enough to question the morality of the system that is being promoted to them they accept it without ever thinking twice about is it moral is it legitimate is it necessary is it desirable to have a government they're just given this template and they're saying I pledge allegiance thousands and thousands of times before they even know you know what they're pledging their allegiance to and then you're controlling the the information that they receive not just with the mandatory government school but you're controlling the information that they received through the propaganda and so every television show the government is the hero whether it's a CIA FBI ATF that that all the wars that we fought in are legitimate and we're always the hero and it's okay when we murder people around the globe but it's okay when we go you know out there and because they're washing this in the sea of propaganda it really is you know the equivalent of a modern version of Plato's cave where you know it's only a very very few amount of people that can you know can kind of escape the case the cave and have understand you going to train themselves because they realize the importance of understanding natural law because they understand the importance of understanding morality that they understand the importance of getting their own morality uh tight so that they're not harming the universe so that karma has not come back to harm them and so the so I'm but I got to tell you I'm actually seeing more and more people discussing these ideas I'm seeing more and more cut you know these have conferences like an arkadelphia and ARPA Vegas you know popping up around the country it really is kind of the fastest growing political movement on earth and it's only going in one direction and so I feel very very kind of optimistic and so when you ask you know what am I doing in my own local community I just have recently moved I was living outside of Washington DC in Northern Virginia kind of on the tech corner outside of DC and it really was like living outside of Mecca because statism as a religion and and it's very hard to get a man to understand something when his salary depends upon is not understanding it and so what I've done is I've relocated to New Hampshire with something called the Free State Project there are 24,000 plus libertarians volunteers and anarchists that are moving to New Hampshire where we can magnify our impact as activists as community leaders as you know people in the you know in the community - where - where there's 5,000 people on the ground now there's 24,000 that have pledged more people arrive you know kind of every single week to New Hampshire I'm in Florida right now as you can as you can kind of tell visiting some family and and picking them up an RV for an East Coast tour but when I'm in New Hampshire I'm amazed at the impact that I have in New Hampshire just by meeting the people that I do whether it's at my yoga class or whether it's at a salsa class or whatever but but you know being able to kind of have an impact that is disproportionately impactful than what I could have done in Northern Virginia with a much more kind of willing audience and my thesis is is that if we can win one state and we can get one state to either you know have political secession or have widespread Martin Luther King Gandhi esque civil disobedience where we're ten percent of the population says hey we're not paying taxes we're not withholding taxes for our employees when police officers go to try SWAT SWAT team people for you know plants that people gather around them and laugh at them and point out that their heads are shaved and that their order followers and what they're doing is immoral and they're wearing a costume and and and I think that the i think the Achilles heel of statism globally is in New Hampshire and I think we can win everywhere but at first I think we need to win somewhere and right now that somewhere is New Hampshire the Free State Project is a very interesting endeavor and it's good to see that it's kind of growing and that you've gone up there to take part in it so you'll have to keep us up to date as to the progress of that whole endeavor and how you designate unfolding yes so one of the next questions I want to get into for everyone and I'm gonna particularly pose this to Carmen and Pat carmen lives in the city of philadelphia he lives it only about less than two blocks away from me and pat lived here for a while with carmen and one of the things i want to ask is how has the local reception regarding an arkadelphia been like just when tell us like how people reacted me you told people that you were having a conference about anarchy the even maybe the venue you know or people that you've interacted with to do you know any of the other ancillary things setting up the event or have you done like local promotion and reached out to the local community and and were done you know flyering pamphlet in whatever like how have people from the local area of philadelphia reacted to the event and the general philosophy of the event well there was there's basically two reactions I'll tell my favorite one first we had a bunch of people just come out of the woodwork as volunteers like we had people from different universities that were in the area that knew about you know in Acapulco and stuff that may have never gone there and they just like straight reached out to us hey can we help can we do yoga in the park and me can I be like your speaker volunteer we had a woman who just came back from Honduras but was born and raised in South Philly and she had a something she's gonna be like a liaison to all the speakers she's gonna take care of so much we have people even from like the East Coast community coming down some of the people who worked at red pill are coming to help us out too so we have a lot of grassroots help to come in like we have people hitting me up hey do you want didn't even be a driver didn't even do this so that was really cool there are a lot of people helping and then there was the local targeting on Facebook and I don't know what algorithms Facebook's using to target people in Philadelphia who are interested in Anarchy cryptocurrency and occultism which is what we sent out there but all we got were communists commenting on the ad saying about how ridiculous the whole thing was and we actually had to recruit some of our speakers to go to the thread so it was mixed between people silently showing up to help in every ancillary capacity and I mean even you and your community just jumped right in you know we teamed up like it was nothing so that was awesome but then yeah some of the more I guess traditionally educated folks you know was met with much resistance like you know what do you what do you guys do this is crazy buddy a bunch of conspiracy theorists but that's to be expected as far as the venue the guy's a South Philly guy like if he gets his money he don't care he was like oh that sounds cool I want you to tell my listening audience do I exaggerate even a bit when I tell people the Philadelphia is a communist taken city dude it's ridiculous like my street I live up a small street and for about like four decades there's a sidewalk on the street that the only thing on the sidewalk is a fence to a gas station and for four decades people park their cars who lives up the street on the sidewalk and it wasn't a big deal and then one day the communist government just said you can't do that anymore and it's gonna cost you $50 a day to park on the sidewalk and they literally robbed me of thousands of dollars at the threat of taking my car to move it so I mean that's just one example of that and then you had the mind virus I mean I went to Temple and I was in an engineering school so I didn't get a lot of the politics but they make you take you man easy stuff and it's all just straight out of like what at the end talks about about how it's just like socialism and mind control and collectivism and that whole thing to to get people to basically support statism right so yeah I feel he's bad at that I mean I did a show about the socialist attitudes of people especially in the millennial generation which you and Pat are members of yeah and you know there were studies political studies done where people of your generation were asked if they would rather live in a socialist or even an outright communist regime and over sixty percent it was something like it was almost 70 was in the sixty percentile of people that responded we would rather live in socialism or communism than have capitalism continue yet when they were asked to define what socialism was only about 20% of them could accurately define that socialism is a system by which the means of production and goods and resources are in the hands of the state and to be distributed as the state sees fit to the rest of the population they could not actually give the definition that what socialism really is is the state's control over the means of production and the distribution of goods and resources and services so a paddle let you continue like you lived in Philly for how long approximately probably three months maybe three or four months at the end of the summer okay right up right there right right the next to the gas station yeah they'll take it the shit out of you for anything but they won't clean up the fucking trash around the cars or fix the potholes that you have to park over top of so there yeah there are so many potholes in the city from this past winters I actually made a video what's on our channel one of them was on your road to I was skating to your house and it was just a huge huge hole with like a cone and there's like three inches of the cones thick and out of the ground cuz the holes that I know the hole you're talking about I know exactly that's right on 10 Street just before the corner of carpenter Street I know I almost killed myself riding my bike down that Street late not seeing it look thinking just be a some type of a you know a small water pool or you know or a collection of water or some oil from a car and it is a literal like multi foot deep hole that your whole front tire could go into and that could crack the axle of a car it's so deep and yet things like this will stay there for like six months in this city while they're raping people and people are literally begging them to put - our parking because the whole idea is they're appealing to the selfishness right they the technique I've actually spoken to people to pieces of trash their work for the Philadelphia Parking Authority these lowlife scumbags okay I've actually spoken and sent they are open they will tell you if you find the right person how their management does it they send people to appeal to people's selfishness they go door-to-door to find a useful fucking idiot dupe and they appeal to their selfishness and say all kinds of people are coming into your neighborhood that don't live here with their cars to park here to take the Broad Street subway that just ask people you go to people and ask them where you look hit with this idea that there's this whole big influx of people of aliens from outside of your neighborhood coming here and they're all going to park their cars on your streets so they can easily easily access the subway and then go to work in Center City on the subway this is the lie that they literally go door-to-door to sell to people so people will go think and that never thought this thought ever before one day in their lives all these people are coming here that don't belong in this neighborhood and they're all parking their cars here and now that means we have less parking spots for our cars this is what these scumbags do in government come in and plant these ideas in people's heads but here's the thing are the people strong are they resistant to it or are they weakling spiritually and mentally and emotionally and do they just give in to it and immediately jump right into selfishness mode and go go oh where are they they're coming they're coming here and parking their cars here that's how they get their agenda through by appealing to other scumbags selfishness because these people don't even stop to think they don't care about the rest of the community they don't even care about their own family members I've said the people who voted for have all these two-hour parking and have to get a permit what about your family that lives right over the bridge in New Jersey they can't come here and Park in your neighborhood now because you instituted two-hour parking and they go oh think of that because oh you are funny that is your fucking self that's why because you're adhering to the first tenets of Satanism which is pure selfishness and this is what's really in the hearts of people this is what's really deeply embedded in the hearts of human beings they don't give a rat shit about anybody but themselves that's what Satanism is this is what Satanism is and unless we're teaching that that's what Satanism it see the the Satanists did a brilliant thing gentlemen they did a brilliant thing they called their religion Satanism in the modern world and then you know what everybody goes I'm not a Satanist That's not me I don't worship the devil I don't worship Satan I say that I worship the God of creation so that can't possibly be my religion right no because if they called the religion what it really was then other people would know oh it's your religion all right it's nothing but the religion because what the religion should be called is selfish ISM it's the religion of pure selfishness and that's where most of all of our community is okay I understand you don't need to show me that again okay so I understand why they called it Satanism because they want people to believe it's something else when all we really need to do is explain what the real satanic religion is that all the masters of the world adhere to is the same religion than all the slaves at a lower level adhere to and that's the religion of putting yourself first over everybody else and thinking you're the most important and fuck everybody else because that's exactly where most people's minds are at in this world but without ever having done any self assess thing for anybody else okay and that's what all these people in this city are they are just purely embedded in the religion of selfishness and they're they'll listen to anybody trying to tell them oh somebody else is out to get you and take what's yours and then they'll try to close off that resource and or hand it over to the state which is exactly what they've done with all the public things that were once public in this city it's all state controlled and that's called communism ladies and gentlemen that's what communism is that's what communism is okay and that's what we have so you know I when people when I say on the airwaves Philadelphia is a communist taken city and then I get email saying Oh mark that's an exaggeration that's not that's not really what Philadelphia's where's my vomit puppet when you need them you know okay that's that I want to jump in I want sure back you up I want you guys to jump in about what you how you see this dynamic in your communities because that's all I see here I don't see self selfless people here okay yes the people who are already awake and aware they came forward to say yes will will come and contribute in some form to the conference but how many out of a metropolitan population of over four million souls 20 yeah a handful if I'm saying 50 am I going way too far yeah okay that there you have it so go ahead at ten jump in on that dynamic I'm particularly interested in hearing what it was like in DC versus what it's like in your new you know home area of of New Hampshire and then we'll go to Derek and talk about your current city is briefly Houston you're in Houston Texas so that's got to be a pretty socialist stronghold as well but let's start with that TN and then move to Derek regarding your local areas in this dynamic so that so one of the things that I can I cover in the book understanding our slavery is I I point out that you know once the Indians the American Indians were conquered the Indians had a had a magnificent you know good morality they you know they were in tune with their families they were very family structured they lived they were you know they lived free and after intergenerational organized crime the government quote/unquote government after the government conquered the Indians the first thing that the government did was take the Indian children segment them away from their parents so the parents would have a you know limited ability to provide moral instruction and and explain to them what's right they would put them in Indian boarding schools running the Prussian model of Education and within a couple of years they took the once proud and free Native Americans and they turn them into taxpayers and order followers by segmenting them away from their parents and their family in mandatory Indian boarding schools and so this is a program that's been going on for a very very very long time in 1953 Bertrand Russell writing in a book called on science and society said through diet injections and injunctions and injunctions as schooling so we're going to put stuff in the food we're going to put stuff in the vaccines and we're going to school them up in these mandatory government schools we will create a a you know population that will rebelle and you know that was in 1953 and so if you take a look at the diet and the it you know there's where they putting in the food they're putting recombinant bovine growth hormone and the dairy they're putting aspartame in the sodas are using fluoridated water fluoridated water and beverages they're using genetically modified organisms they're using a food coloring they're using refined sugar they're using glyphosate soaked wheat what are they putting in the injections they're using aluminum phosphate aluminum hydroxide mercury in the form of thimerosal a gazillion different additives and jute nuts that have been proven to have neurological issues and then what are they doing in the schools they're giving what moral relativism and they're segmenting the kids away from their parents who would provide instruction and they're withholding the Trivium they're withholding they're not giving the kids the tools to to be able to analyze the information they receive and understand whether it's true or false so they're not giving them the basics of logic they're not giving them grammar they're not giving them rhetoric and so this is you know I look at I look at the population as being you know as being intellectually and morally crippled on purpose to make them more manageable and to make them easier to rob control and enslave and it is a program and it starts with the mandatory government school and then there's a youth program where the kids get Awards Cub Scout adventure loops Boy Scout and hurt bad news for how to pay your taxes and and and how to salute the flag and roll and the flag but I mean we got it we got to be honest that that their running game on the population they're right there they're giving the population these artificial templates that say it's good to be a bad person and until we expose that until we expose it to the population and the population goes oh I didn't understand that there are a handful of companies controlling everything I see on television I didn't understand I never thought about the fact that they forced my kids to go to the government school I never realized that there was a hidden curriculum in the government school system of obedience and statism and then tell you I really think that until we expose the PlayBook exploit expose the techniques the hidden curriculum of the government school system that we're just going to continue to churn out you know generation after generation of these sad pathetic amoral fluoridated vaccinated government school corporate food eating dumbed down muggles yeah I mean it doesn't show any signs of improvement at least in my neck of the woods like it as a matter of fact last decade has been an abject disaster as far as I'm concerned like I would give anything to go back ten years in the past because it was so much better than than it is now that it's I don't think people really can conceive of it if they don't really live in a metropolitan region to understand how fast the morality of the people is just in rapid descent so um Derek I want you to speak to that dynamic and you know do you see it as any different in in your area in Houston what is the the general you know populations thoughts like when it comes to even exploring ideas such as Anarchy and or just you know the concept of objective morality and not being you know violent or trying to impose one's will and be coercive or put people under duress or anything like that like are they open receptive to that are they you know just radically authoritarian there because here it's like just even speaking out against the state or telling people you're anti-government you're looked at as a domestic terrorist practically it's it's that it's getting that bad in Philadelphia yeah there might be some of those here in Houston as well I mean we're definitely promoted as I would it's an accurate representation but we're promoted as like a democratic city that votes Democratic but we're also still in Texas where people love their guns and where people want to be left alone and you know the city of Houston itself has a lot of libertarian --is-- freedom ish sort of traits about it but it's by no means a like you know bastion of freedom like for example there's there's no zoning regulations in the city there's no you know there's no state tax so there's some of these benefits of it right but it's still a place where people generally think that the instrument of government or the state whether federal state or local level is something that should be used as a way to you know enact your vision of reality and so again like as participating in this like local political thing and getting to see how people think I do see it wow there's so many people that their first thought when there's a problem in the world is what can I do to get the government to solve the problem more well the government should do this what the government should do this so it's really exposing me to that mentality and also causing me to be more creative about how can I get these people to think about how can we take care of ourselves and what is morality you know is the government as an institution even ethical is it even practical let alone effective and having those conversations with people because you know our campaign that we're running is basically all about getting the government out of the relationship so again it gives me an opportunity to say well maybe we don't need to use the government to take taxes from people to make that you know to solve this XYZ problem that you have here maybe there's another way we could go about that or maybe that whole institution shouldn't be involved in that way in the first place and have that bigger conversation so you know I do think there's some folks who are open to it but generally just like any other major city the people here in Houston if they're engaged at all they're not just in that rat race trying to survive and try and distract themselves or just get through if they are politically engaged they typically do see and this is right left everything else they seem to think that the government is the the tool to make that happen there are some libertarian minded anarchist minded people here the city but of course they're definitely in the minority of people and then they're also the folks who if they don't recognize the state are they you know they they might understand the state isn't a valuable tool and that we shouldn't use it but then there is a a pretty good chunk of activists in the city of Houston who are left-leaning and our gifts and who are a bit more extreme on there and maybe the kind of people who were protesting or talking online about and arkadelphia why they didn't like it we have some of those crowd some of that crowd here in Houston - some of those same kind of minded people so you know I think it's everywhere but again I'm actually about to have to sign off mark just for today but I just want to reiterate what I said earlier is that you know I think that it's up to us and I will be emphasizing this at an arkadelphia I'm also doing a workshop and you know lots of other fun things I look forward to hearing your presentations mark of course and seeing the documentary but if anything I just want to reiterate that whatever steps you take you know even for myself to take something as what I would consider extreme to run for an office as a mayoral candidate you don't have to do that I understand the aversion of politics I have that same aversion to politics but whatever you do whether it's just passing out flyers to your church community or to your neighborhood community or to whatever it may be or say you have a kid getting involved in the PTA the PTO the sort of statist groups involved in the schools it still gives you a way to interact with somebody that you might not typically come across all of a sudden you're talking to the neighbors and to the parents of you know the the kids that your your child is going to go associate with if you're in the state school system and why not make an effort to communicate with them instead of just staying at home complaining oh all the kids at school or state as my kids got to be exposed to this well there's a lot of people and this is just real-world stuff there are a lot of people that I've met through this particular adventure of mine and here in my community where I live in one of the poorest neighborhoods of Houston because it's just honestly the only place that will take a felon who doesn't have a lot of money I meet people who are just trying to make it through another day you know and these people they might care about the things we talk about but we need to be to meet them where they're at be able to see that you know not everybody's gonna come to annika Delphia per se or not everybody's gonna watch you know our youtube videos but they're worth talking to and those are the people that are in your communities that if you can't afford to home-school or on school or whatever your kids they're gonna be going to the state school system so why not make an effort in some form or another to get to know those people so as I said go to a PTA meeting your PTO meter just go to a neighborhood meeting or just go door-to-door passing out flyers about this YouTube channel or whatever documentary you saw that excites you just anything because we can't rely for one on social media because of censorship that it's just increasing more and more but also there's something different that happens when you talk to somebody face-to-face this is why we go to these conferences because we know that the power of connecting with each other face to face it makes our movements that much stronger so for the people out there who if you can't make an orchid elfia then get involved in your own community you know and if maybe you end up making your own local events like we were talking about earlier you get your own groups going or your own events happening and that can help you where you're at because we can all come together for really beautiful events but at the end of the day we're still going back home to our own communities and I think that's where we should really be putting our efforts and energy yeah but thank you guys for the time today I appreciate absolutely dark thanks so much for being part of this conversation thank you see you later and arkadelphia alright so we're going to go to calls via discord at about 5 p.m. Eastern so if people have any questions for our remaining guests karmak or Angie Pat Leach and Etienne de la boue Luisi you can call in via discord the callin link is on the what on earth is happening calm slash show page on the website we have about 20 minutes before that so I want to get your take on this dynamic gentleman one of the things that I have been trying to do is explain to people how deeply interconnected with the state the the world of the occult is that's been a mission statement of what on earth is happening practically since day one you know I told people on day one of doing this show that I had a background in the occult I didn't really explore it until after I had covered a lot of information about consciousness and spirituality as a foundation for going into some of that darker material and back then when I was first starting I gave people a lot more leeway and taking a lot more time to get this dynamic 12 years later as many people can obviously see my patience has worn thin and I've become rather an irritable human being when it comes to people's ignorance because if other people took 12 years of their lives to explain something at the expense of many other things that they could have done with that time and the way that I've done it has been exceptional and extraordinary if I may toot my own horn for a moment okay I did it in a very specific and meticulous pattern that made perfect sense laid it out very meticulously and methodically with a very enhanced sensibility for aesthetics graphics and people's you know stepwise progression of needing material laid out in a certain fashion okay and I think I did it better than anybody in this entire movement if I may say so not trying to brag just saying that if I compared my work to everybody else's work mine stands out okay now with that being said the frustration that I am feeling is I don't feel that we're any closer to getting the population in any appreciable percentage or number to understand that this goes beyond politics this goes beyond money this goes beyond corporations this goes beyond crooked judges this goes beyond crooked police that this goes to a priest class that is enthroned behind the scenes and they have a religion and part of their religion is giving a lower level of their religion to us to believe in and then live and put into practice in the world now when I have attempted to explain this to particularly the freedom oriented community and particularly the so-called anarchist community or the so-called libertarian community I've gotten more resistance from them than trying to explain it to a fucking bum on the street straight up quite honestly okay there are some of the people that don't want to hear it at all when it comes to the occult you know they want to hear this is all political and financial machination that we could just clean up if we either stop participating in it or create a new system but when you talk about mind control at a deep psychological level that has been practiced for millennia not for decades not for centuries for thousands of years then I'm not just a conspiracy theorist I'm somebody who's radically making up wild stories just because they have no experience in that realm in their own lives they've never spent one day in it and never will they've never been tapped they've never been asked to participate they've never come across an opportunity to get involved in the world of the occult but what if and when you do and when you do talk to the people who have been involved in that world you will realize there is something that sits enthroned behind the ostensible power structure and our community see this is where my really where I want to take this discussion our community does not understand what it needs to understand and when I say our community I really don't even want to include myself in that okay it's the so called anarchists or what I call the my freedom movement I've called this to my freedom movement for about eight years now okay which is is a derogatory name to label the the so-called freedom movement because I don't believe we have a freedom movement and never have I believe we have a community of people that want to believe what they want to believe regarding the world but do not want to accept the world as it really is because they cannot expand their mind enough to understand that there are things that exist in the world that you have never participated in that have never you have never seen into the heart of because you've never been invited or asked to come into that community and you may never you may die in the state of never participating in a community like that so what I want everybody here to speak to is where where do you think this do you see the same resistance that I see regarding this dynamic because I see it everywhere in this so-called community I call it the my freedom community wrap them all in double quotes actually believe my out of the quotes it's the my freedom community okay so do you see that dynamic regarding occultism in general because I see it like they see this as some quaint little nut niche of religious belief that oh some just lunatics believe that or think that that's going on or that's real and it's just part of an extension of religious beliefs and religiosity they don't understand what a cult ISM is they don't understand who the occultists really are and how they work and operate they think mind-control is some you know a non-existent thing or some illusion that people bring up or discuss and don't see actual social engineering mind control is actually taking place in the world you know and every time I try to explain these dynamics it's like button heads with a fucking rhinoceros I mean really it really is and again it it really makes me think why do I do this I think this every day I think of just quitting and shutting the fuck up every day okay to be honest with you guys right cuz I want to make this more real right just let's talk out on the real okay I don't see this community getting it quite frankly I don't think my contributions to this community are valued wanted or listened to even understood at all quite frankly so I want you to talk further I'm not gonna even interrupt you guys talk amongst yourself for the remaining 15 minutes until we go to calls on the dynamic of why is there such a reserve do you see the resistance that I see to the understanding of the world of the occult and why is it present in the so-called freedom community whoever wants to start starting I see it absolutely I know exactly what you mean and just speak up a little bit right into the mic yeah I know exactly what you mean there is an absolute resistance to it anytime it's brought up like you almost feel the energy of the room change and I think it's because I think the biggest reason to be honest is because people are afraid of accepting that because what of what it might mean yeah you know what I mean it there they'd actually rather like you know sit amongst themselves and say oh it's just some you know shitty politicians screwing everything up because that is easier for them to accept and to digest and to sleep at night and I just want to comment on briefly because you you've said this more than once to me in private about how you feel like it doesn't affect people and the only thing that I can truly say is it affected me and it helped me change my life for the better I'm not trying to say it doesn't help individuals I very much understand you can make an impact in an individual's life I feel I've made an impact in many individuals lives I think what I'm getting at is what I'm angry and frustrated by a lot is there's no appreciable difference in the understanding of what's taking place do you think that people really understand that Jeffrey Epstein is a member of the dark occult and that he's working with occult satanic organizations that sit enthroned behind the corridors of power and are allowed to operate with the rape and murder of children with impunity people should watch the upcoming movie called the hunt have you heard about this no do you know what it's gonna be about is it have you ever heard the mote about the most dangerous game the most dangerous game is something that the satanic elitist actually play with people they've card her off they cordon off a huge swath of land that they own that is often thickly forested or maybe an island or an island okay and they release people that they have kidnapped from wherever community they kidnapped them from for whatever reason they've targeted them they put them in that area like game in a forest and then they go and hunt them physically hunt them with rifles okay and obviously no one gets out alive because they may be given some rudimentary weapons in some of the accounts of this happening that have leaked out from you know within the world of the occult but they essentially hunt them down to no one left alive okay and now there's a movie a modern film coming out and I think a month or two maybe even less than that called the hunt that is going to be about the the most dangerous game there's an old movie back from the 1930s this is how long ago that this information came out that these elitists that these satanic elitists do this it and it was called the most dangerous game it's a very old film but people should watch that one and I'm very curious and seeing the new film the hunt and if this is is it our people getting it do they think it's just a science fiction film like a fantasy fiction film I should say do they think it's just people making up things from the realm of their imagination you know this is stuff that art is imitating life that they are trying to tell the story about that this actually goes on and this does actually go on this is Wow Dick Cheney shot that individual that he shot it was a hunting thing what was the guy that had got um they said that they were hunting quail yeah no that happened during the most dangerous game and he accidentally shot one of the participants that was supposed to be one of the hunters because he thought he was one of the that's what happened and he ended up with buckshot in his ass you know so like do you see people understanding what they're seeing about Epstein do you really think they progressed with that level of blackmail though you know I think you have to have some sort of incomprehensible experience to like realize that this type of shit is even possible like have a lifelong indoctrination of Satanism and understand the back the backend side of that or you know I have experienced with DMT or something something that you think do you think that people would have to go into the occult to the extent that someone like myself has gone into it to ever possibly understand it it cannot be explained see that's why I feel like why bother sometimes I feel like that is true so why should I bother because I feel like it can't be communicated that no one will accept it because it hasn't been their experience and they'll never accept it unless it's their experience this is part of the human dynamic of never-ending doubt that you will doubt something until you are actually experiencing it yourself and I don't think that learning has to happen only through gnosis I don't accept that as a principle of the exploration and learning and actual taking into ourselves of fact I don't think fact has to come in only through personal experience you can know that something is true even if it didn't happen to you I can know that there is water in this cup that will wet him if I for no reason without having to do it he can know that without having to have it poured over his head okay you know it's but but but people are just in ego they're stubborn and like you said they're in fear they don't want to accept this as the world and as long as we refuse to accept the world as it is how can we possibly hope to change it from where we're at the first step of changing anything is making a diagnosis and understanding where you're actually at in a place of hell or in a social condition so I'm sorry for jumping in I just wanted to say that I'm gonna go we're gonna go like at least five extra minutes and then we'll go to calls it's like four or fifty three we'll go to like even ten after five before we go to calls I want you guys to explore this dynamic on your own I'm gonna stay out of it go ahead all right I want to jump in here because I think you made a bunch of good points and I want to address some of those I want to start with really defining the word a cult which really just means hidden and so things have been occulted they've been hidden from society and I really think that the main thing that has been hidden from society is that there are technologies and techniques and ways of controlling society and I think that these techniques have been passed down through what I like to Caillou I like to use the word intergenerational organized-crime because I think that that starting with you know free masonry behind you know even even you know going back past free masonry going to you know ancient Babylon there were techniques that were developed that were that allowed the ruling population to whether it's nutritionally crippled the population whether it's intellectually crippled them with mandatory schools some portion of the population figured out that if we can control the information that people receive then we can program the mind like a computer and the way that we control the information that people receive is that we give them religions whether that religion is Catholicism whether that religion is statism whether that religion is Satanism whether that religion is Tom Medic Judaism whatever it is if we can program the population by giving them a template that we are able to influence their decisions and so if you can give somebody if you can slip them the statism as a child they don't even realize that it's a religion even though they're doing it they're using all of the tools and the techniques of an ethically manipulative cult and I think that that dynamic that ability to hide the tools and techniques and the playbook I think that's been you know kind of the the kind of one of the key techniques what I try and do in the book is make what was invisible visible and so you mentioned Jeffrey Epstein Jeffrey Epstein is a member of the Bilderberg Group is a milk member of the Council on Foreign Relations these are two of the organizations that I finger that I finger in the book as controlling the media and in the in the book I've got media ownership charts and I have visualizations showing how those two organizations the Council on Foreign Relations and Bilderberg have over the decades in fluent you know have maneuvered their membership into the key reporter ships editor ships publishers pred the presidency the vice presidency the Joint Chiefs of Staff the CIA the DoD the import-export bank the Federal Reserve going back in time through Republican Democratic administrations it doesn't matter going back decades in every single one of these major centers of power you're going to find somebody in from the Bilderberg Group or the Council on Foreign Relations and so now when you put the pieces together and you see what Jeffrey Epstein was doing so you see you've got a member of the exact same group running a black mantle operation factory factory automated as many people as we can scoop up in our blackmail operation a year politicians prominent individuals and you realize hey the reason that these people are in power is because they're willing to do the things that most people won't do like run a blackmail operation on you know dozens and dozens and dozens of politicians and prominent individuals and some been real quick I know I said I wasn't going to but just to highlight this fact it's like people don't understand that that's how they operate that they are bringing people to this island getting them involved in some type of sexual activity with children or even having children come close enough to them just so they can photograph them with children making it even appear as if they're involved in sexual activity with them both of those things are going on they're actually doing sex acts with them and they bring some people photograph them in compromised positions with children so that they can get total compliance from these people when they're back in the regular world interacting so they'll say hey you're gonna vote the way we want you to vote on this issue no I'm not oh no you're not well then tomorrow's newspaper is going to have the picture of you with the seven year old boy in between your legs that's what's gonna happen you know or you know it's gonna have the picture of you with all of these four year old girls all around you you know that's how these sick fucks operate and people don't understand it they don't get that that's what this is all for and they don't understand the other half of it is they're actually participating in murder rituals torture rituals you know all kinds of sick depraved rituals with these people looking at his islands seeing the types of buildings that are on it you know creepy and people going oh what is this what kind of denomination of church is this it ain't no church dumbass you know it's a satanic temple is what it is where they conduct rituals with children and people still don't grasp they don't seem to be grasping what they're seeing so good I'll let you let you continue I just wanted to interject that no no it's a it's a great mark it's a great point and so what now I think to your point now that what is what was invisible to a certain degree with Epstein has been made visible and what I'm trying to do in the as I'm trying to using the visualizations you know if you never realized that you know that these three organizations have their membership in all of these different key reporter and editor ships at almost every major publication and news network and paper of record and you know new service well once you see a visualization kind of connecting all the dots all of a sudden you've made what was visible what was what was invisible occulted you've made it visible if you didn't realize that they were using religious symbolism and their propaganda in the in and understanding our slavery I've got three dozen examples where you know they've got bush in front of the cross or in front of Jesus or the or Clinton and Trump having halos and they're using all this religious iconography but you never really notice it because they come by one at a time but if I stack three dozen examples in front of you then I've taken what was occulted and I've now made it visible and so what I'm trying to do is I'm trying to make these connections that were previously invisible and occulted I'm trying to make them visible in a way where people come to understanding very very very quickly into kind of a deeper understanding because they can see the connections for themselves they can see see the historical pattern they can see that the United States is running the exact same play book as the Nazis the Soviets and East Germans and because human beings are really really good pattern recognition machines when they see that pattern they're like hey wait a minute that's that's artificial that's a that's a playbook there that's they're not they're doing that on purpose and so that's really I think you know I think that we can that we can expose it the question becomes how do you do it when the population is watching this propaganda system where they think they have that there's hundreds and hundreds of different companies and organizations that are providing them there News and then and surely if if there was organized crime was really running things than it would be on one of these channels and so what you realize that it's not hundreds and hundreds of different it's just this small handful of companies operating as a cartel controlling every screen and deceiving every audience well once you see it for yourself then it's a lot harder for them to fool you again and once you realize there's a man behind the curtain it's a lot it's a lot harder for him to fool you again and so how do you do it in a situation where they're controlling every screen and deceiving every audience in addition to the book I've got a little flash drive it's called a wafer drive as a credit card size eight gig flash drive that has the book and eight gig of evidence of government criminality and I think that we have to go door to door and so one of the projects that I'm working on is we call it the pre state project but but let's take the book are physical copies of the book physical flash drives physical DVDs have acts and let's distribute a hundred thousand in New Hampshire and let's wake up let's really widely expose let's get around the censorship the only we're never gonna you're never gonna be able to cut through the censorship on the DARPA Internet you're never going to be able to cut through the censorship on the mainstream media you're never going to be able to change the algorithmic manipulation that Google is involved in so you have to go door to door you've got to physically distribute you've got to physically get this information into people's hands so that they get around the how to rhythmic censorship of Google and search engines and so I think that that it's got to be door to door it's got to be hand to hand and so in our Liberator flash drive we make it so anybody can download a liberator anybody can can can print out the label and wrap a USB Drive of their own and hand their their neighbor a flash drive that is going to have these media ownership charts that's going to have these visualizations showing how these organizations that produce Jeffrey Epstein are controlling all of the levers of power from the media to the presidency to the vice presidency to the CIA NSA Joint Chiefs of Staff FBI Federal Reserve System but you've really got to see it with your own eyes to believe it and you've got to get around the censorship to be able to put it in front of people so that they can see it with their own eyes it's a good idea to do that digitally with a small flash drive that makes it easily you know shareable you know people can copy it and share it easily so great idea like to do it like that so Pat we have about five minutes before we're going to go to calls I'll let you speak to the dynamic of do you agree with my contention that the so-called freedom movement is very very resistant to the idea of understanding the occult forces that we are up against and if so how why do you think that is and how can you possibly see what do you see that we might be able to do to put a dent in that dynamic see it's just so complex that I think people are almost unwilling to just absorb it all I went and I looked at I'd looked up epstein Island that temple just now and also found this huge sundial and you know that brings to my attention the Stars and the understanding how to harnessed astrology in the precession of the equinoxes and its relation with time and nature and the kingdom of God being within and how to use this energy to your power and I think that's potentially what these sick fucks are doing and as far as like us like we like you said this is a like Howard said this is being this information is being passed down through generations of criminals and so on and so forth and you know it's just so much to wrap your head around I think we all sort of dive into one little specific area and focus on and then everybody's focused on that but it's just so widespread that it's just like almost incomprehensible so it's like saying before you almost need some incomprehensible experience to sort of open your mind up and to realizing that you know this is all a facade it is all made up it is all controlled by some really sick fucks and I don't know that and that's why I'm doing in Arkadelphia I'm just trying to bring people together you can further talk about this shit further expose it you know what I mean I don't know what the fuck is going on but it's definitely something then I'm fucked up shit I'll wrap up this segment before we go to calls with just saying that I feel what the most important topics to get across to the freedom community in the modern world are are the understanding of the realm of the occult what occultism is why they are hiding this information as at 10 was just referring to and understanding that how what the state of mind that they want to keep the population in is this is what people don't yet understand they don't understand who the occultists are they don't understand what their belief system is they don't understand what the whole realm of the occult is the information that it contains why it's important to understand it and they most certainly don't understand natural law as a body of laws that operate within the realm of the occult because they are unseen non-physical laws that ultimately then percolate into the physical domain because they are about the consequences of the behaviors that we choose and people don't understand in the freedom movement to a very large extent how moral relativism is the absolute murdering force within this community it is the dynamic that is completely and utterly annihilating human freedom more than any other and I think that that we really should try to take up the mantle of explaining these things to this community because they're very very reticent and even outright resistant toward accepting that these things are true and we're not gonna make any headway until we get people within this community to grasp these concepts and understand why we need to understand the world of the occult and why we need to understand that to embrace moral relativism is to embrace slavery yeah and that's why we were very deliberate in putting occultism as a tag for an arkadelphia we're I'm sick of it too I'm sick of like people staying just in the political realm or even just in the cryptocurrency realm we want it to be very deliberate so if anyone out there you know thinks this is important and wants to support us I mean like I said we're doing this without sponsors but this is something that like the whole world has to come together to contribute to so if you want to contribute in any way as far as like volunteering getting involved sponsorship shoot an email to TSO a at the state of anarchy calm because we need everybody to come together as one to overcome what is a very powerful and ancient force that holds us in bondage sorry let's put that email up there was TS o a at the state of Anarchy comm so if you want to get involved with helping them with their mission statement of exposing this within the freedom community that's why I decided to take part in this conference because you are including that aspect you know and that my contribution regarding the world of the occult is gonna come in the form of my workshop you know I'm gonna talk about a human social dynamic more than anything else in my main lecture regarding anger and why it's needed and why it's suppressed there's going to be some information about social engineering there which ties in with the occult but largely that's going to be about this the social dynamic and the cultural programming of the suppression of anger why the powers that shouldn't be you know are doing this and trying to repress anger within all of us so what I'm gonna do right now is I'm going to ask our hosts to mute up on skype and then I'm going to unmute you in discord so we can prepare to take calls in discord okay so just mute up on skype and then I'm gonna switch over to discord okay and I'm gonna unmute myself in I'm gonna unmute myself in discord we have some people on the line for calls I'm gonna unmute now my guests on discord so just give me a moment to do that binary alright alright gentlemen just give me some audio to make sure that we do have you on discord by noise rules okay at 10 you have to unmute your mic on discord all right at 10 can't hear me let me let me or maybe you can I'm not sure at the end you have to unmute your mic on discord plus you're unmuted at the server level so just on mute in the app yeah there you go there you go great all right so we're good to go let's go to the phone mutters yes we're hearing you all right so let's go to a pox a pox you're live on what on earth is happening with our guest Karmakar Angie Pat leach and at 10 della boot Luisa how's it going I'm doing ok thank you yeah thank you you know it was nice to get variety of people's on the show - I think you guys brought up some good topics I have some good points that been thinking about and I think it would be good to get you know I'd like your opinion and also everyone else's as well in the call sure go right ahead ok so you know you're talking about what what people have to do to be able to to get back to first principles on on different yeah two people to get back on first principles like the fact that morality is objective that there is you know there's a spiritual realm and there's more than just material yes so along those lines I was thinking of the motivations behind people like what they do in their belief system I find that many people like you know when they they're motivated by like when they do things in life or when they tried to join certain groups or their careers or the relationship I find that they're there a lot of people if they're not mentally strong enough they are they're driven by a sense of belonging rather than this you know then this independent mentality that you need and I feel like you need a certain strength and you need a certain mental toughness to be able to think outside of the system and I was thinking to be able to break through to people how do we how do we reach people like that without them having guilt without them having been through something like you know incomprehensible like Pat was saying or through something really traumatic or going through the occult like yourself what is it that we need to break through to these people so that they can see and they can become strong enough mentally so they can stand on their own and not you know not try to join groups as belonging it does really seem that way doesn't it like that the people who are really going to really go the farthest and their understanding have been toughened they have been tempered almost as if it's like a sort being being forged you know in heat and hammering you know it's like people who haven't suffered and been through a lot of trauma and suffering really don't seem to really get it at a deep level only the people who have experienced that and come through it so who would like to speak to that dynamic like what can we do possibly to reach people on a term other than them having to go through such a negative experience because it seems like that's what we're choosing on a mass scale it's like on a mass scale the whole population of the planet is saying we're not going to learn this lesson until we get beaten and forged in fire like a sword you know then you know we'll come out on the other end a little bit sharper but it's like we're begging for that negative experience we're begging for what I call the way of maximum pain which is not necessary there are spiritualists all over the world to give people the boat the new a bullshit that oh nothing good can ever come without that happening it's a big crock of shit of course you can learn again this is what I want to make a focal point of my work in the future you can fully learn and become fully enlightened without having to go toward the most negative experience it doesn't mean that you don't suffer at all but it doesn't mean that you know what I don't believe that fires hot so let's just burn all the fucking flesh off this hand down to the bone to prove it like I don't need to do that to learn fire is hot you know like we have to stop being so just ridiculous in in in certain forms of extremity you know so like let's let's go to the caller's question and I'll let you guys return you know respond in in turn is there anything that can be done to try to get this understanding to people without them having to go through the way of maximum pain so to speak potentially we're moving motion so I sent two images of Epstein's Island to chat and if you look top at the temple you can clearly see that there are hieroglyphs on the patio and it is clearly like fractal frequency of expansion so mathematics for me was allowed allowed me to look into this stuff deeper and remove emotion because mathematics is objective is morally objective your is no emotions there is no subjective answers tonight Thanks so when you follow this fractal mathematics to the center - at least for myself I realize that I am that source and everyone is that source and they don't teach us about this stuff in public school they don't teach us about Fibonacci or the golden ratio or how facto mathematics is the framework of all or the entire organic realm and it must stem from something spiritual and then we look at all the like you said at the ending there's six corporations that rule everything and all of their symbolism is the epitome of spiritual facto mathematics whether it's a car symbol whether it's on food whether it's a football team no matter what it is so they're just hiding the stuff in plain sight and they're pushing it right in from your face and as long as you see and you accept something else you're like internally digesting and adding that to your sort of like live or but those those are dull arrows you know I'm gonna do anything so I felt like moving the motion starting from the center mathematics helped me and open my mind up a lot of things one of the things I heard the callers say was that a lot of the trouble that he finds is that the people who are you know I guess okay with being in the cult of mediocrity or the cult of the ignorant is that they find a sense of belonging because that's what I feel like a lot of us are looking for in general and I would say the only way to really offer them something to get them to open their mind to something else would be to to essentially give them somewhere else to belong somewhere somewhere else that's more true to the heart and the only way to do that in my opinion is to lead by example like I know the people that I've managed to change or get their minds to be open to these new things it isn't because I've proven anything to them it's because I they felt that like they could trust me they could trust what I was saying because they felt that it came from a place of compassion and that that place of compassion seem more belonging to them than whatever you know rigid social structure they got thrown into so I think we have to offer people something benevolent in the face of all of the stark stuff as far as like hey look this might be a hard thing for us to comprehend and to accept but we're in this together with the by the very nature that you're willing to explore this with me and I'm willing to explore this with you and face it and courage and bravery that might give them a new place to belong that's my two cents I think that's definitely the right approach I the only problem or issue with it is there's so few people that do have any understanding of this that the idea of we're only going to do it by leading by example how many people could we possibly influence it's like we only have a certain reach within within our own communities and lives and it's just I feel like it's such a paltry number compared to the overwhelming hordes of ignorance so out number that the human population the the awake population that it I get discouraged because I see like even if I went out and attempted that what are the odds that I could do it with even three or four people in the course of a week or a month what impact is that going to have unless they're all also become as in fluent in as much of an influencer it's like the the chances of building that and making it become a dynamically expanding exponential pattern seem slim at this point if it hasn't happened already I'm not going not to be discouraging I'm just saying that I just see like like I I thought that that was going to happen over a decade ago in my naivete regarding how moral people were and how they would respond well to truth and then when I saw not only completely be rejected but the dynamic went in 180 degrees in the opposite direction where people quadrupled and ten folded down in their position on government authoritarianism like I'm I'm discouraged to the point where I'm discouraged more than what I told people I told people not to get discouraged and like I went way beyond their former level of discouragement seeing where human beings are at but I think I just looked too deeply into the average human heart and saw how black pitted like coal it was I don't know whether again I think your idea is very well-intentioned and good hard Carmen and I don't want to dissuade you from that course of action I'm just I'm sorry I have to be honest about what I think right so I feel like I did try to do that with people and basically what I found was that they literally do not care about the truth or freedom and that they are that they find the world perfectly acceptable in the slavery that it is don't care to understand why it's wrong don't want to do anything except to selfishly live their lives because I think one Satanism has a person at that level of control they're gotten I don't know whether people in other words maybe they went deeper into Satanism than I ever did that's what I've really come to start to think by having looked at the human condition as deeply as I have I don't think I was ever much of a Satanist as black-hearted and deep into Satanism as I went it was negligible - how satanic my neighbors on this very street art or in on other blocks in this community or in this city or in this nation I I just think they made and past tense present tense and future tense they were are and will be better Satanists than I ever were and than I ever was and that's the problem they don't even know how deeply into the Satanic mindset they have gone and are currently in they don't understand that they think it's just life as normal business as usual and they don't understand any aspect of what Satanism actually is let alone how deeply ensconced in it they are in their own personal mindset and that's what why I'm I have been increasingly more and more discouraged in even attempting to continue this I don't I don't you know the the capacity that I'm going to do this I'm still gonna do the show but I am really going to largely back away from a lot of aspects of this because of where I see people's minds and hearts I don't see them open I see them 100 folding down forget bubbling down their their trip their their hearts are being hardened 100 times over as I see it I don't see any body opening up their minds in this especially in this area like I feel like if I don't I feel like I have to some at some point leave this city or I'm going to go completely mad this city is a like molten lava pit of just absolute sick darkness of the human mind and heart and that's because they know where they have to inject the satanic energy like as Ross Ben who was one of the speakers in the early for your mind days said what is done in Philadelphia is done with the full consent and an approval of the earth the Earth Spirit itself takes the energy that is present in Philadelphia and scatters it throughout the rest of the whole planet it's it's a it's an injection point like if you inject into a vein it'll to carry the the the the thing that you're injecting throughout the body Philadelphia is like an injection point for the earth literally this is this has been discovered and talked about in geo man see it's it's a very well known thing that Philadelphia is one of the power centers of the earth as far as the Thira kenner G is concerned and the wat itself has Phi in it twice FHI which is Fibonacci right cultivation right so and you know this is this is a Center where the occultists knew they had to take it so deeply so completely that all of that black energy would be sent out through the rest of the world you know because that's why the whole mound system is here you know that the ancient mound system of the the ley line systems all converge here in Philadelphia what they called the dragon paths or the ley lines this is a deep energy you know it's it's a conduit Center yeah it's a coming together of conduits of energy and they understood this G oh man see and that's why they had to take this place so completely and boy have they I mean it is it's I mean when people come you'll see I I hope you see when you come for an arc Adelphia I want you to see I I don't want you to just go and you shouldn't come here and just then that's one of the things I'm going to suggest for people who are coming to this conference don't just come here and only interact with the choir please you will be missing the experience you will be missing the totality of what you could have as an experience in coming to the city of Philadelphia if you're not from air if somebody whoever is if we commute the interface sounds I don't know where that's coming from but let's try to do that it's probably in somebody else's this Court I'm sorry for that oversight we didn't go through every single setting so it's just what it is anyway I think my advice to people coming to Philadelphia is attempt to vet what I'm saying and understand I'm not making it up or exaggerating it okay anybody who's really awaken aware and who has been here for any appreciable amount of time will show you I will tell you personally that I'm not exaggerating what I'm saying okay and it's why it's hard to be from here to live here to just be it doesn't matter how strong you are after a certain amount of time it wears upon you it wears upon you and see this is what I have to understand that I ask other people to be as strong as I have been and now yet I absolutely fully 100% admit to everybody out there I'm my armor is weakening my shields are weakening they're taking hits because of how much darkness and blackness and soul-sucking Satanism is here in Philadelphia it's a satanic center of the earth you're not catered man three months three four months was all I could take him and then I mean I I admit I'm one of those guys who flies down south for the winter but you know what I'm doing that the past couple years is it's made me want to get more involved up here in my communities right right I've lived here for the whole 45 years of my life Pat and let me tell you something I would give I would give up my life to have the city returned to how it was 20 years ago even I'd take a decade ago that's how wretched it has become this place it is a sick wretched place of Satanism and communism Mos Eisley has nothing on the city of Philadelphia believe me never find a more wretched hive of scum and villainy you you I think in the caller's diner dynamic I'll go right ahead yeah that's why we got to get you up to New Hampshire because I feel like Philadelphia is is bringing you down wait I feel like like you maybe it's the other way around maybe everybody needs to come here and build the community in the place where the energy is actually scattered to the rest of the world that's what I'm thinking I'm thinking I want to take advantage of this here man see stuff but I also like the idea of the free state project of them all coming together and bringing you know people of a freedom oriented mind set into one place you know it but yeah Philadelphia is definitely it is it is having a negative impact i I I have a the that I very mixed feelings about moving because I consider that running and it's just not in my nature it's like am i I feel like I just have to somehow weather it but I don't feel like other people really appreciate that's why I want to say when people come to the conference interact with the community in the city go into Center City and interact with people go into South Philadelphia and interacting people go into West Philadelphia and interact with people go into North Philadelphia and interact with people okay and you will see the dynamic go into Northeast Philadelphia and interact with people you will see the dynamic that I am talking about here and what the mindset is like and you will see it's far worse than whatever community you're coming from I get the only place that if you're coming from that I would say it's probably worse as New York City yeah and maybe law Los Angeles and Chicago if you're coming from one of those cities I'd say we're either you're either even worse off or we're right at the same level but it's about right at those levels believe me I'm gonna throw Washington DC in oh sure it is it is the neck it is literal watch the status bring their children to Washington DC and take them to the Cathedral of the Capitol and temples along the plan you you know the show them the and it really is you know because if once you understand that these are you know just techniques that are being used on them that's our fish were pledging and the the point I was going to make is if if you if for those of that have heard Plato's allegory of the cave there are people that are trapped in a cave they're there they're tied up in a cave and behind them there is a fire and in between the fire and the prisoners as a walkway and puppeteers go along the walkway and and they cast a shadow play on the wall of the cave and the prisoners grow up and all they ever know is the shadow play and if someone comes you know when if when prisoner escapes and he gets outside and he sees the outside world Sun other people and like what's going on and he goes back and tries to explain the reality of the outside world the prisoners think he's insane because they don't have any frame of reference because they've never been outside of the cave and so that is the dynamic that we're dealing with in that the that our fellow people trapped in the matrix but they're getting they've had all the information but they have received controlled to them their entire lives with that can whole was the mandatory government school whether that control was the media propaganda system whether that is Google manipulating search engine results whether it's the videos that are recommended to you by YouTube whether it's the fact that they're manipulating the stories that pop in reddit whether it's the fact that they're controlling the comments and discuss the con to the comment plug-in that they're using whether they're censoring I just got censored on Meetup so up isn't allowing you need to post discussions to the guru too - one of the groups that I'm in and then they're censoring my emails - BAM even though they're not spam and so the population is having this kind of information warfare waged against them in ways that is imperceptible - 90 plus percent of the population now it's starting to get out now we've got a whistleblower for Google I don't know if the if everybody's up on the latest news but - two weeks ago a senior Google engineer released it did a document dump - project Veritas where where he related information including some of the lists of websites that Google is suppressing and so now people are starting to see hey wait a minute you know Google is lying if you later search results and they're manipulating autocomplete and they're manipulating the videos that are suggested to you by

YouTube they're censoring some they're magnifying others but I got to tell you until the person understands and comes to kind of a sadistic somewhat sophisticated understanding of what that program looked like the companies that are involved and how they do it you're not going to really if they think that it's that they get or legitimate then they're going to remain trapped in clay doze cave the CIA has a handbook one of the Maxim's in the deception handbook is all things being equal the amount of of it's harder to deceive somebody the more channels of information that are available to them however within limits the more of those channels that you're able to control the greater the likely exception will be believed and so if you're stealing trillions of dollars through the tall bailouts military-industrial complex fraud no-bid contracts given to you know to military contractors and Beltway bandits and forcing the population to buy ethanol gas that they don't want or forcing the population five acts as they they they you know it come on as long as your as long as you're able to control as long as they don't understand that that dynamic they're gonna stay trapped in the cage but you know not to be a broken record once they realize that that dynamic is going on it becomes a lot harder to fool them because they understand the game and that's what I'm trying to do that's what I'm trying to do it bosz the fact that and by the way like I said if you're stealing if you're stealing trillions of dollars a year a couple hundred billion that you spend to control the media back on Wall Street we used to call that mice it might as well be free it literally might as free for them to control hundreds of different channels and then the other the other aspect is is that they're using psychological techniques to keep people trapped in watching the TV whether it's constant motion I'm going to tell just a quick real quick story the most interesting thing I learned in 2008 it was a study done by Duke University they took rhesus monkeys they put them in front of video screens and images would go by the video careens and the images would keep kind of going by as a freakin cherry juice e juice was coming out of like a little hamster bottle and they would drink the cherry juice e juice and as long as they kept drinking the images were keep but at anytime they could freeze image and they could have the image stay on the screen just by not drinking the juicy juice which is akin to kind of paying for something it's delay of gratification and they found out the monkeys would would would pay essentially pay to see two different kinds of images and one image it was kind of obvious they would pay to see monkey porn they would they would literally pay as they would they would hindquarters of female monkeys but the other image that they were willing to pay to see and it was it blew me away and today I described it this thing that I learned in 2006 is that they would pay to see pictures of higher status monkeys Wow and so monkeys live in a troop and if and there's a defined pecking order with a monkey number three you'll pay to see image as a monkey to pin one but aren't worried about anybody but you'll pay to see one through seven but human beings are biologically attuned to look at pictures of higher status monkeys and this is the kind of biological psychological mechanism that that they understand that keeps people glued to the screen that once you kind of understand it and you tell that to somebody then all of a sudden when they catch them what I like to call surfing the monkey porn you know then they go oh wait a minute um that's why I'm doing it they understand that there's a dynamic behind it and so by by kind of revealing the tools and the technique that this prime system is using to keep people trapped looking at their tablets their smartphones their their television sets once you reel once you can say hey gain to running you know they're they're there they're keeping you trapped in the system by exploiting their knowledge of human psychology and biology it's a lot it's a lot easier I found age what's they realize you know how what kind of game is being played on just now I think that's a very great point that you brought up regarding you know the types of images that they would quote pay to engage in I would say that human beings that have not developed higher functions in in their spirituality would behave like that it's the same as human beings that haven't developed higher function spiritually regarding the refusal to engage in violent behavior that have not you know developed the spiritual sensibilities to realize the legitimacy of authority have not developed a spiritual sensibilities to realize we shouldn't bring harm to the animal kingdom etc it's this whole experience is about growing into something more than what we have been as a lower form of human into a higher form of human being spiritually and the problem is so few people even in the freedom oriented community that do understand part of it don't understand the spiritual dynamic involved in it because they have thrown out the baby with the bathwater they have thrown out religion and in doing so they've thrown out spirituality with it that you have to put it through a filter where you throw the whole bucket into the filter the spirit stays caught and you you can keep that intact but all the rest of the religious trappings and nonsense and indoctrination go down the drain and the problem is people aren't engaging that spiritual filter they're throwing it all down the drain including legitimate spirituality and that's why they're not growing past the monkey tendency the animalistic instinctive tendency to want the saint to be like their masters most people would trade positions with their masters in a heartbeat you know and except for the people that are engaging in this higher level spiritual dynamic and truly growing as a spiritual individual so let's go to another caller let's hear from Brendon Brendon you're live on what on earth is happening with our guests from Annika polka welcome oh my god gents thank you guys so much for taking my call I want to talk about specific actions that I intend to take towards contributing to the great work okay um there was a book that you read Mendon market was fantastic and I want to reprint copies of it the end of all evil fantastic look this netbook is really a beautiful work and it should be shared and I call was referring to the book the end of all evil by the author Jeremy Locke yeah he's a very rare book that is out of print it was only printed I believe once there was only one printing done so all the books are from the initial printing that exists in the world and if you have a copy of it you'll be pleased to know that that goes for about two thousand dollars right now a physical copy of the end of all evil but thank God there's many digital copies online I believe there are PDFs of it and I think there are a pub versions of it as well for anybody who has not read this book you are missing out on one of the best books ever penned you can download it it down from understanding or slavery com is that we make available in a PDF on the Liberator great but yes um my dream my goal of contributing to the great work though is to print 1000 copies of this book and then go ahead and distribute it in packs of six with instructions on finding Mavericks and communities and having each individual person who receives a pack of six send out the six books to individual members that they identify as Mavericks that is a fantastic idea man III you know think that that's an awesome way to go about reaching people with a fantastic message because too few people yeah and no not that book I mean you really inspired that those thoughts Marc so thank you for that but I mean I I am you know don't know I'm kind of an walking blind with some of the ideas here not really knowing the ropes for collecting it I mean I created a GoFundMe or no it's not a GoFundMe it's a what's it called Kickstarter it'll get funding but I don't know if it's um you know if I'm on the right track with that or what's appropriate or or how I need to you know move forward in a way that I can be legitimate without causing problems for everyone hey man you're already legitimate just by he is speaking out like this you have a good speaking voice you make good communication skills don't wait for orders from headquarters just get involved and do it and do something that is you know unique to yourself and you know a lot like Pat said earlier if you have to fake it til you make it you know even if even if your voice trembles at first just power through it you know just yeah to record yourself you know or turn on your webcam and just record yourself and speak and you know just see how it goes you don't have to send that out to anybody if you don't want to and do it a few times till you get comfortable and then post one you know that that's how you start you know okay make a website you know that you could use simple tools you could use WordPress or Wix you know or get involved with a more comprehensive content management system if you know how there's tons of ways to get involved you know I think that print book printing is a great idea you know you get it out there for people you know people need to read stuff like that you know so um you know just so just do it that's all it's just getting started is the hardest part it's like anything else the initial momentum right objects at rest tend to stay at rest objects in motion tend to stay in motion this is all I want to try to inspires for people to just get up and get skin in the game just get involved you know that's it and guess what what's the worst that can happen you you you don't do that well or get it many people pay attention to you hey well welcome welcome to the world you know who's really paying attention to me you know what I mean there's comparatively in the world there's only a few people listening to what I do here on what on earth is happening it's like you know we need many more voices anybody else doing any aspect of this is contributing to the effort and helping in the great work yes that's it very good hey Brenda not one last thing yes sir devote 10% of those to New Hampshire all right you you broke up there a little bit Howard can you say that one more time yeah I said about 10% of those copied Hampshire there you go yeah if we can free one state those those there's 100 copies having just portion and effect in us in a state that only has 1.3 million people and already has five thousand-plus activists on the ground and so what I'm trying to do is I'm truck matter what you're doing just take some portion some five ten percent of the effort and just target it towards New Hampshire yeah this is a very interesting dynamic and I'd like to see where it goes I've heard about it since it first started and um you know I'm sorry we're having a little bit of audio break up issues I apologize for that but yeah I've followed it since it started and I think it's going in an interesting direction and I'd be just interested in even seeing how many people in the Free State Project have heard of the book the end of all we've all but it's a very small percentage even there so I think that's an interesting experiment that could be done that Howard is proposing there with sending some of those up to the

Free State Project very cool yeah and I would love to just can't get in any contact information from you guys and I have a go get funding for it but I'm not sure how legitimate that is or what I need to be doing to work towards that well I'm not sure if that book is copyright written or not or whether the author even care if it was distributed I guess he wouldn't care if it's down as long as it's not sure as long as you weren't selling it I don't know if you intend on selling you know just just yeah if you're going to just turn it and distribute it I'd he'd probably be happy with you doing that yeah you know print it distribute it I don't want to speak for him but I'm just saying oh yeah I think he obviously wants this philosophy distributed to people yeah I've actually tried to reach out to the author and was unsuccessful I mean I made that kind of press did that search because I did yeah to reach the author and wasn't able to I have not been able to determine who it is either he's done the world a good service by the printing of that book yeah cool really oh okay so my producer told me that there's copies selling for as low as 300 dollars on Amazon the last I checked they were all around 2000 I guess it depends on who has won and what they're willing to part ways with four all right so Brandon thanks so much for your call great you brought up yeah I hope you have the best of luck moving forward in participation in the great work alright let's go to primo primo you're live on what on earth is happening welcome it's my dog started ok ok I want to tell you if we do have thought in your wildest dreams that one of the idiots walking through your city what not your city philadelphia in 2016 fighting for some part of the slave matrix with the DNC the Democratic National Convention was in Philadelphia right yes I was that some of the the gatherings of people just seeing what type of people turned out I was there on the streets down you know by the state in place oh yeah you didn't have a vomit puppet I mean I would have needed a couple of million of them yeah they're come defined so I came on to you my awakening started that year the summer of 2016 ok and I was there went walking through that City and I I had to get hard to get there I was fighting for Bernie Sanders fighting against Hillary Clinton right yeah yeah so but at that moment when I saw you know what unfolded boots what awakened me right and just insane I couldn't believe what I was seeing and and you and I was lucky enough to have two people I followed that were had oh gosh in my mind is stopping him sorry there were fans of Bernie Sanders they were trying to get people motivated to promote Bernie Sanders and they were really amazing women to visit amazing women and they were awake they were paid attention and they woke up during that process and they were helping other people kind of see the behind the veil what was behind the curtain and and I and I totally agreed with them thank God but most of the people they were alienated pretty harsh at that point all the people just couldn't they were too still they didn't it didn't expose the system to them let me ask you a question do you think many people were sort of jostled out of their house I'm sorry do you think many people were jostled out of their sleep by the whole thing that happened with the you know yeah we're we're seeing that we're having a broad eyo problem with discord I apologize for that I was saying do you see that many people were jostled out of their sleep by what happened around that and many of the people so literate what I what I saw with the scam the election process was because that was my next step I said I gotta fight this shit so I would I just happen to have a local ad person fighting our registrar of voters here in San Diego and he was in my tail isn't oh my god I'll jump in and then I saw I really saw how the the ugly sausage is made because I we had a very corrupt official and so this guy who had been fighting for decades like you but he was just really entrenched in that battle he he even though he was one of the people who awakened to be and that next level he's still lost in the matrix years later when I had to walk away all the people who probably were instrumental and my waking up but they're all stuck on ledges down that rabbit hole so I gotta ask what led you to my work well I stayed for years I was I kinda shut it I could only do baseball that could only do a public radio and public radio became oh just so toxic I just couldn't believe it so when I started see yeah and then I was the day after one the debates and then when I turn to NPR on and I was like I wanted to hear what they said what Bernie Sanders did because you know being progressive they must be you know on with it and they were like insanely promoting Hillary is like they never heard the same debate I did so I was just like gobsmacked was like what what oh it's crap it's and I so at some point I would just get you know I was you did I didn't need a vomit puppet I was the vomit puppet if I listened to this stuff and I just tested it I turned on the radio and I said well how long do I go before I smell the lye right the record was 18 seconds yeah 18 seconds I heard the messaging yes it was amazing that how hard the push is to keep the disaster going but so let me ask are you going are you going to be coming to an arkadelphia will you be coming to an arkadelphia oh no I wish I could it took I mean I was lucky I got to Philadelphia then I'm very poor I mean I have to say being poor has helped facilitate my awakening I have never benefited from the system so I I'm not invested I just I didn't get brainwashed and and for whatever reasons I don't know why my one guys who can I hear that dynamic a lot and a cream oh we're getting really low on time and I thank you for your call I want to hear from our guest for the last remainder of this and I want them to respond to this dynamic that you just brought up because I think it's very critically important actually I hear this from a lot of people I hear people say I didn't start to get aware of all of this stuff going on that you're talking about until I had downtime away from my job until I was laid off until I got fired until I was out of work until I wasn't in the rat wheel in the rat maze anymore in the corporate you know running around like crazy competing for you know corporate position you know then they realized hey I got screwed from this you know that I looked up to or that I cared about and I got laid off and then they started looking into how things actually work they started having time to look into things so I want you guys to speak to that dynamic you know that this individual is saying until she really was in a place where she was financially not benefiting and had the time to look into it she didn't do it when she was in that rat wheel race so do you guys see that dynamic or can you speak to that a little bit absolutely I think that the rat race and the jobs and the nine-to-five and the status seeking is part of the distraction I mean like Howard said what was the second thing the monkeys watch seeing people of higher prestige than them and that's that's what that whole thing is it's just a constant like distraction to try and get to that place that you think you want to be to to things that they were willing to even pay or delay gratification for with sex and power exactly you know exactly and yeah i given if you take that away if you almost become think of it as like Sullivant towards those torts of endeavors it gives you a second to rewind and maybe you know have some critical thought of your own and take some time to research these things right right you also have to get you also have to discover self-direct the self-directed internet and so that you you really everything they'd be given to you and all of the information you know that you receive is essentially being directed the revolution is not going to be recommended for you by youtube yeah the only thing that is going to be recommended for you by YouTube is going to be another video that is going that is it has been psychologically picked to distract you that your love you know they already they've already known on your past behavior the things that you're interested in and and what is light what you'd like click on and so they've got you on a wheel can we get him to click on it one of the techniques that I think is fascinating once you understand monkey vision is you know that the Drudge Report which is when I like to what the CIA is selling today if they have a really important story they're gonna link to the Daily Mail in the UK's version of that story and anybody that ever we're running out of hell we're running out of time pad I just want to get your final comments before we we get I just wanted to say I had cut it then at the na off a little while okay finished but I just want to say if you wanted to test this stuff on your own and just pull up DuckDuckGo browser and Google browser and he keeps searching the same thing and you'll see how this is stimulate Google will stimulate you in a negative way and push you down you know this this this this begat you they're putting you in the direction they want you and dr. ko is you know it's actually like I'm a real internet browser ladies and gentlemen I want to thank our guests Carmen Quran G Pat leach at TN dill abuti a and Derek Bros come out to an arkadelphia September 13th 14th and 15th that's coming up in only a couple of weeks we hope to see there an arkadelphia calm ladies and gentlemen you've been watching what on earth is happening and remember government is slavers always wanted to say that slavery thank you guys and Omar for everyone that's watching if you want to go up to the what on earth is happening calm website you can make a donation on the donate page there's many different ways to donate you can also get the Ark drive on the ark tab people have been taking me up on they off that offer I hope that continues thanks so much you'll see probably next week maybe the week after the conference it depends on how things go for me but hopefully we'll be right back here next week take care everyone [Music] [Music] [Applause] [Music]

What On Earth Is Happening Show #222

Topics: *Human Consciousness Checkpoint Late 2019 & The Future Of What On Earth Is Happening, The WOEIH Live Weekly Video Show will be on hiatus (most likely through the remainder of 2019) to complete the documentary "Mark Passio & The Science Of Natural Law," Review of the Anarchadelphia 2019 conference is postponed, Video Editor local to Philadelphia needed to complete the "Mark Passio & The Science Of Natural Law" documentary, Fundraising is needed to pay a Video Editor, Technical Support Expert is needed in-house at WOEIH, Mark will be speaking at the Seed 4 Conference, May 29-30-31st, 2020 in Rutland Ohio, Brandon Martin was the 2019 recipient of the One Great Work Achievement Award, Mark will not speak at other public conferences after Seed 4, Mark's future live speaking events will be formatted as all day events in the Philadelphia area and organized by him, Assessment of changes in Human Consciousness since Mark began his work 12 years ago, WOEIH has always been focused on targeting potential teachers, the main reasons WHY we have failed in changing the Human Condition, most people in the "Truth" and "Freedom" movements still do not understand the true meaning of Anarchy, most people in the "Truth" and "Freedom" movements still do not understand True Freedom, most people in the "Truth" and "Freedom" movements still do not understand The Occult, most people in the "Truth" and "Freedom" movements still do not understand Natural Law, most people in the "Truth" and "Freedom" movements still condone harming animals for "food," most people in the "Truth" and "Freedom" movements are still Moral Relativists, Occult "teachers" that do not teach Natural Law, most people are not literate in modern communications and publishing technologies, most people cannot create and publish media in the modern digital age, Developing the necessary skills and creating work in your own name to get involved in the Great Work, multiple publishing platforms must be utilized to do the Great Work, Archives of personal work are needed for efficient communication of ideas, Reaching people with the message of Natural Law through modern communications technology, Social Experiment Results 2019 from the Natural Law Documentary research, Examination of pie charts demonstrating exactly where the Human Mental Condition is at in our current time, Bad People always believe they are Good People, Human Beings are living their lives based upon completely erroneous and immoral belief systems such as Moral Relativism and the belief in "Authority" and Government*

freedom man that's what it's all about [Music] give that the groove on freedom [Music] welcome you are listening - what on earth is happening this show will discuss the topics of human consciousness mind control natural law the occult and all issues that affect the freedom of the people of Earth what on earth is happening will endeavor to shine light upon the darkness of our world and to offer empowering solutions to the problems we face as humanity approaches it's critical moment of choice and now here is your host Marc Pascoe [Music] welcome one and all you're watching what on earth is happening I'm your host mark passio my website what on earth is happening dot-com welcome to the show ladies and gentlemen government is slavery and here on what on earth is happening we are ending slavery one mind at a time welcome today is Sunday September 29 2009 this issue this is what on earth is happening episode number 222 and we're coming at you live streaming on water on earth is happening dot-com slash show we are also simulcasting on Facebook live and YouTube live as well as Vimeo live so today's show is going to be the last water on earth is happening show before a extended hiatus that I'm taking to complete the water the mark passio and the science of natural law documentary so I felt like I wanted to come back on air and tell people about projects that I have planned for the future why I'm taking this hiatus and also to like kind of take inventory and do a show about where human consciousness is at toward the end of the year 2019 so you know this is how we started the video format of the show the first show in the new video format that we did back in January was where is humanity at and consciousness well I'm calling this show and we could switch over to the to the laptop I'm calling this show human consciousness checkpoint late 2019 and the future of what on earth is happening so that's what the topics gonna be on today and I'm going to really start with you know what I've been doing and what I will be doing things that we have planned for the future and then I'm gonna go into some social experiment results that we did as part of the gathering of data for the documentary for the natural law documentary that we're working on you know first of all I was very busy with other commitments namely for the anarchic via conference which I want to basically state that I am going to deliberately withhold my review of the an arc adelphia 2019 conference for specific reasons and I'm not going to say anything else about that right now at some point I will do a full review of the conference but not right now aside from that you know that took up a lot of my time where I was not able to personally work on the editing and production of the documentary now I want to really dedicate almost all of my time to that because it's so important because first of all seeing how the documentary is coming out for those who did see the sneak preview the little rough cut that we showed a preliminary cut I was so highly impressed with it thus far like I know that this is gonna really help humanity it's gonna help people that don't already understand natural law to get it and I want to really get in there and you know add my some of my aesthetics and really fine-tune things and get it up to the point where we can feel 100% that this is ready for primetime ready for mainstream and get it out there to the public okay it's gonna hit the gifts area of what on earth is happening hopefully by the beginning of the year I mean if I'm being very very optimistic I'd like to get it out by Christmas I don't know whether that will happen but that's you know that's our projected goal you know optimistically I feel a little bit better that maybe by early next year we can get it out and this will you know end my commitment of time to that project but I want to talk about what's going to be required because we're we're not where we need to be as far as in-house here at what on earth is happening and I'm kind of gonna do things in the reverse order you know the topic of the show today is human consciousness checkpoint late 2019 and the future of what on earth is happening I'm gonna talk about the future of what on earth is happening first then the duration of the show is gonna be about where humanity is at and why I think it's still where it's at and then I'm gonna take calls if time permits if not you know it'll just be all information and data for the for this particular show if there's some time left we'll go to your calls toward the third hour of the show in discord so first thing I want to say is we are working with a new camera here today at what on earth is happening I want to thank a wonderful donor - what on earth is happening who dedicated a beautiful 4k camcorder that is just top-notch top-of-the-line has some of the latest technology and features in it and uh you know that donor is so appreciated I'm gonna try to put together a care package for them because they went above and beyond some and did some made a donation that was absolutely from the heart and you know I just want to say also to everybody who has donated - what on earth is happening in any way heartfelt thanks goes out to you whether you donated you know in the form of PayPal or cryptocurrency or patreon if you're a patreon donor or if you donate it in the form of making equipment donations which as I've always said I love the equipment donations because it takes any middleman out of the equation you know exactly what your donation is going toward and we just had a wonderful donor just step forward and make a donation for a brand new camera we're probably going to even add a third view with one of the other older cameras that we started it started the the project with the video project with when we come back so you know we'll set that up in our in our streaming document and have an even third view maybe we'll show you a little bit of what the studio looks like or what our setup looks like like a wider angle view or something to that effect we'll figure it out but if we go back to the to the slides I want to just show people well first of all I want to just tell people yes there what you know this is going to be basically the title card that we're gonna have up in the streaming section of the show we will return soon I'm not going to give an exact date but I'm going to just make a general projection that it will be early next year hopefully early January you know maybe maybe right around the one-year mark that we went to the video format which was January 20th hopefully you know by the beginning of the year if the if things work out with how we're producing the documentary and it comes out exactly as planned or it goes even smoother than planned hopefully earlier than that but we'll see how it goes so that's the first announcement that I want to make is that there will be an extended hiatus of the show until we really hammer down this documentary into its completed form into something that we know we want to get out there to the public and we're super proud of it's coming along wonderfully so far I want to thank all of the editors that work on the project and Leah my assistant Leah for that there are tireless efforts in producing it thus far in getting it up to where it is now and they're in there editing and production so I'm going to now step in as you know producer and executive producer and director of the project and really really move it into its final phase and try to get it into its completed form with assistant from was with assistance from Leah other people and of course whatever editors now here's the problem we really do not have an editor for the project at this point those who are helping to edit it we're at the point where they are either stepping away from that on the volunteer basis that they were on and or the the money that is going to be required for paying an editor is not present it is not in the budget of this project of what on earth is happening so the first thing I want to announce today is we desperately need two things we need an editor to complete the documentary I mean I may have to step forward and do the editing of the project and if that's the case you know it's a new platform I'm gonna have to learn I'm more familiar with Final Cut Pro and premier we're editing this on DaVinci Resolve which is a nice video editing platform but I'm not very familiar with it so I would take a earning curve or least a you know a transitional curve to move from one editing system to another an editing system that I'm familiar with the one that I am NOT if I have to move to that role other work would essentially stop here at what on earth is happening if I have to do that a lot of people don't understand how much work does stop when I have to troubleshoot we're gonna talk about that for a moment so you know a lot of what I'm realizing talking to people who say that they want to do the great work is they do not understand the actual real technical skill set and involvement and an entire skill sets and workflows that have to go into production for any aspect of doing this work they really believe that they're going to just encounter a stranger on the street talk them to them for a little while and their mindset is magically going to be somehow transformed or they're gonna be somehow inspired to look into the truth and I'm sorry to say that it the world doesn't work that way ladies and gentlemen you're extraordinarily naive if you think that it does what you really need to do is put your work out publicly in some form of a decent aesthetic form for people to consider and most people don't even know how to do that they have no part of the technical skill sets on how to do that we're going to talk about this in this episode of the show this was actually the premise of my workshop recently called teaching natural law and I'm going to just talk briefly about you know what the the overarching theme was for that because this fits into what I'm talking about here today as why people more people are not doing the great work but you know people don't really understand what's involved you know they think oh all this just happens magically or you press a button and it happens and folks this is hours upon hours upon hours upon hours of meticulous work it is a regular job I hear a lot of people saying bullshit like well you don't work a regular job I longer hours than a regular job most days okay you have no idea what the work is to do this zero okay most people the few people that do do work like this do know what kind of work this involves but the vast from overwhelming majority of people you've done no part of it and you have no idea what amount of work is involved then you have no idea of the skill sets that are involved just you know whether you take offense to that then get as offended as you like but that's the truth most people have zero clue okay so what I want to explain to people today is how we're short-handed and we need to bring some new members on board the team to help us work on these projects and hopefully there will become competent involved it may very well have to be on a volunteer basis possibly at first we may have some funds at first funds may dry up we don't know what the monetary situation is going to be quite frankly because quite frankly not that many people really truly value this work less than anyone thinks and that's what it really comes down to is people putting their resources where their mouth is at they say they want freedom they don't want to get involved in doing it themselves they want to pay lip service to it but they don't want to really back anything okay and I'm putting the monies that I receive into this project okay so we have some limited amounts of resources and I've been putting those toward paying an editor that we had to bring on in an emergency capacity because of the ways that we were short-handed leading up to the preliminary screening of the natural law documentary and what we want to do is bring in some more donation money to pay for the editing process so let me move forward and explain this is what we're really talking about here that the documentary is called mark passio in the science of natural law and again up where it's at up to this point is wonderful we are making great progress in building the line for this documentary there are still issues that have to be worked out there are some visuals that have to go in some have to come out and be replaced there are audio things that have to be streamlined and worked out okay there is additional content that needs to be put in the timeline there's a lot that still needs to be done I'd say worth about about the 75% mark you know and as a lot of people say when it comes to the video editing process the last 10% is 90% of the work okay so it's getting there but by no means is it near completion it's close okay it's it's almost getting to the point where we could say it's near completion but I'd say we're at like the 75% you know to the home stretch mark so what we need going forward is we need somebody that wants to come here now see first of all when you when you say I need a video editor tens of thousands of people from all over the world will say oh I know these skills I might not even know that program and they want to get involved if you cannot come to Philadelphia you cannot be considered for this project can you clean your ears right now and listen because most people hear what they want to hear and they don't listen to what's being asked for so at the risk of totally insulting people and treating them like they have down syndrome can you clean out your ears and listen to what's being asked in the way of help so that you don't add noise to the signal of who we need to speak to when looking for people with these skill sets and with the criteria that we are asking for and the first and prime prime criteria is before you even have the skill sets we are looking for you have to be here in person do you understand what that means that means you cannot do this from your own home you cannot do this from where you are at you come to our offices in Philadelphia and work here in person you need to sit with us in the same room and sit down at the editing machine while we are sitting behind you looking at the same screen or screens and working in the same room with the nonlinear editing program do you understand okay I'm sorry that I need to say it like that because here's what happens when we say we need someone in person immediately we get a hundred people from all over the world and then we have to weed through the people and say who's actually in Philadelphia if you are not from the Philadelphia area and or cannot travel multiple days a week to the Philadelphia area we this project is going to be a multiple day a week project until we get it finished okay we haven't set up the exact timeframe it will be Monday Wednesday and Thursday will it be Monday through Friday I don't know will it be weekends we'll figure that out with whoever can work with us that has the skill set and is local but one thing that has to be first and foremost understood you must come here in person in Philadelphia ok if you cannot do that do not respond for our call for help when I put the next email address on the screen ok I'm going do not respond to that email address unless you can be here in person so here's what we need okay let's move what so I'm sorry let's move back to the presentation slides thank you here is what we need folks first of all we don't have a budget for this project right now so I am asking we do need donations to come in specifically for the purpose of finishing the science of natural law documentary I do not have a budget to pay a video editor at this point ok the monies that come in for what on earth is happening right now are helping me to survive pay my rent pay my bills my utility bills eat and procure equipment that I require and other services that are required to do this I do not have enough of a budget if I start paying an editor right now out of just the very limited funds that I have for what on earth is happening I will not have money to live at the place where I live right now and produce anything so we have to somehow procure a budget to possibly potentially pay a video editor to finish this project okay so we are asking first and foremost if you can and I don't ask anybody to put themselves out ladies and gentlemen let me first and foremost state that a lot of people think like I'm asking people who are somehow poor to like go and make donations to this cause I am NOT asking that would never ask any such thing if you need your resources for what you need to secure a way of life for yourself and you have no more than that then do not donate to me I would never ask anyone to do that if you have resources in some abundance that you can you are in a position to donate and contribute to this cause to finish this documentary then please do and the website address to do that is what on earth is happening dot-com slash donate we accept donations to this cause in 11 different ways you could donate via PayPal patreon crip many different forms of cryptocurrency check or money order and now in this case equipment donations don't really account for this we have the equipment that we require to finish this editing project okay I have a pretty decent core i7 mini tower that I built it's got solid state drives in it you know we have a great eight gigabyte video card in there you know it's got all the you know it's got like 16 gigabytes of RAM in there we have like all the I don't know whether 16 or 32 might be 32 gigs in that machine I think it's 32 anyway we have all the specs that we need in a modern video editing workstation to like this project done so that's not an equipment's not an issue we need an editor to come and sit with us and say okay we need this footage in here we need to duck down this audio here you know we need to you know put this image in here you know we need somebody in the room that we can work with we can't go back and forth you know rendering things and then you know making comments or sending emails it doesn't work like that folks an editor has to sit in the room with the production team period the end so once again the first criteria is you have to be local to the philadelphia area you need you have to be very experienced I would say at least high level intermediate to expert level with the nonlinear video editing program called da Vinci resolved by Blackmagic studios the production company that makes this software is called black magic studio they're the the developers and the program is called DaVinci Resolve it's a very good nonlinear editing a piece of software that is cross-platform we're running it for this project on a Windows 10 workstation ok yes it can be taken to other you know workstations but we have it all set up in a modern Windows 10 workstation ok so that is what you will be editing on that is the tools that's those are the tool sets you will be using as an editor the editor must be local to Philadelphia and be able to travel to the city of Philadelphia to work with us in person multiple days a week minimum ok multiple days a week minimum this isn't a one day a week or a couple day of week job we want we need somebody to come here multiple days a week and Hammer this out with us this is going to be all I am hopefully going to be doing for the next three months until this is in its completed form and let me tell you something folks when you do see the completed form you're going to be impressed it's it's awesome it's well on its way and it's gonna be even more awesome when it's finished ok and I think really rut I don't think I know I definitively know this is so gonna make an impact when it hits it's gonna make an impact out there in humanity because rather than sit through a nine and a half hour lecture on the topic of natural law people are gonna see a beautifully polished video documentary with great audio great video great transitions great just great a great script great narration okay and it's gonna be a highly polished around one hour maybe a little bit longer than one hour documentary that most people will sit through and watch when we pique their interest on you know what is this all about what is this thing that he's calling natural law you know so I really think this can make a huge impact out there in ways that other you know other media has not especially when it comes to natural law so if you meet these criteria if you have experience with Blackmagic designs program called DaVinci Resolve okay and you are local to Philadelphia and you can come here multiple days a week in person to work on this project with us please contact my assistant Lea Boone who will be fielding these requests okay I and her will be filling them but I want you to send them to her email address which is Lea le IH a at what on earth is happening dot-com once again Lea spelled le IH a at what on earth is happening dot-com send requests if you want to work with us on this project your local to Philadelphia you can be here multiple days a week there will be compensation depending on what we can bring in as far as a budget through donations this whole show and project ladies and gentlemen has always been donation funded and it always will be I will never take sponsors that want to control content the the viewers the listeners have always through their donations funded this project I started it right out of my own pocket I started it with no donations ladies and gentlemen I didn't even accept donations at first and now I know that if I want to take the production qualities further and if I want to reach more people we need donations that come in that we put we put that yes okay everyone hates the monetary system we all understand that we need to move to a level of consciousness that we understand where a human family and not not need a monetary system the consciousness of Earth is not at that point that's the reality of our situation so we need to take in resources for the things that we need this is just common sense this is just normal everyday activity my rent is not free my utility bills are not free the food that I require on a daily basis is not free the cameras that we use the computers that we use you know it'll be wonderful if things move in that direction in consciousness and we could you know have the resources that we need as one family obviously that's the goal and that isn't communism that's called reaching a higher level of consciousness and doing away with control systems of which the entire monetary system is most certainly one of them you know I talked about communism constantly here and how that's a total totalitarian control system that we should not be trying to aspire to or moving toward socialism as well these are evils of the world all of them but the monetary system is just another control system at some level the whole point is is unfortunately we are still living in a world that uses it and things are not free that are required to get this message out that's the goal I don't put this first money never comes first here okay I think people should be honorable and do what they say they're going to do when they make commitments or agreements when it comes to money I think that people should use money to advance the work that should not be the goal that should not be the purpose or the motivating factor it should be to advance the great work of the understanding of natural law and the ending of human slavery that is what I use those lower-level resources to fuel the goal of moving us toward a society that stops embracing and condoning slavery and ultimately toward ending it and that's what this documentary is ultimately all about however most people who have these skill sets are not willing to volunteer them for free this is just this is just a fact of the matter reality of our world that's why we are going to announce this fundraiser okay at what on earth is happening calm slash donate for the completion of the mark passio and the science of natural law documentary film and we need additional editor or editors we might take on one or two okay so this is what we require at this point please whatever you do okay two things don't put yourself out number one listen to what I am saying if you don't have resources to contribute that are above what you require for your living do not volunteer do not put yourself out I have never and will never ask anyone to do that that's number one if you can volunteer and you have additional resources that you can contribute to this project then please go to that address what on earth is happening calm slash donate and volunteer and contribute monetary resources if you have editing skills and you are local to Philadelphia please respond to the email address Leah at what on earth is happening calm please number two if you are not local to Philadelphia do not respond to that call for help you will be hurting us if you are not local to Philadelphia and you respond to us you are hurting the cause of completing the documentary I don't know how else I can put that if you are not local to Philadelphia and you respond to this call for help you are hurting us because you are forcing us to go through all of the noise that will be added to the signal that is the reply for help and we will have to weed through all these emails that say oh I want to help but I'm not local please don't make us have to do that I'm begging you Oh respond if your local to Philadelphia and you really have the skills to do this okay be an adult about it alright so thank you to anyone who can contribute in those two forms to the completion of the documentary the forthcoming documentary called mark passio and the science of natural law we are well on our way folks folks this is looking awesome so far I mean it's gonna be this is gonna be killer that's the only way that I can put it when you do finally sing it okay it is gonna come out in the gifts area first we'll put it up there for a few months to make some resources for the water earth is happening project and then always as with every other video it hits the gift store for a little bit of time and then it goes for free it goes out to the world for free on other platforms always okay so this will eventually be out there for free we will continue to put it out there as one of the gift gift items but it will be exclusively on the gift area of what on earth is happening if you click the gifts tab or go to gift stop one another's happening.com exclusively when it first hits early next year when it first is released okay after that after a few months there we will release it for free so that's mark pacion the science of natural law documentary so let's go back to the slides and let's talk about what's coming next okay with what on earth is happening so here we go let's just put the slides back up so it looks like we might be having an issue there there we go sorry about that so the next thing that I want to talk about is technical help when we experience technical problems here at what on earth is happening almost invariably with very very few exceptions the resolution of technical problems falls to me personally and you know I you know I am the most qualified person that I know to deal with those problems because I used to be a technical support technician I worked at a company in Princeton New Jersey that was one of the leading technical support companies in the central New Jersey area that serviced locations all the way out to New York City and all the way down as far south as Atlantic City New Jersey and into the Philadelphia area so I traveled from New York to Philadelphia to Atlantic City to all around the whole state of New Jersey as this company's lead Macintosh Support Specialist so as such I consider them to be one of the leading the company was called gear 3 technologies I believe they still exist and are still out there doing this type of work and thriving if I'm not mistaken but I used to be their lead Macintosh support technician years ago and as such I considered myself one of the best technicians particularly on the Macintosh platform in the tri-state area of Pennsylvania southeastern Pennsylvania New Jersey from the central New Jersey region into all of South Jersey and into Delaware as well I did a few jobs in Delaware as well but I would travel you know put up by you know been given leads on jobs by this company and then travel to many different locations you know where I was an independent contractor being contracted out by this company and as their lead technician considered that I was one of the best technicians on the Mac platform in the whole tri-state area so you know it's very natural that you know and then following that after I left that company I worked at the University of Pennsylvania in their School of Medicine and I worked in what's called tsoumas som is which is the school of medicine information services that is their technical support division for the School of Medicine inside the University of Pennsylvania I personally worked in the biomedical research facility for a while and left that to do what on earth is happening full-time first of all I took a tremendous hit in any monetary compensation to do what on earth is happening full-time I saw that the number may have been enough just to float me for a little while and that like really not even that let's let's be honest like I had to rely on help from others for a little while until I could get this project off the ground to really just be able to provide the basic living requirements and support for myself it was a tremendous hit on my my wallet tremendous hit to do this full-time okay people think oh I'm being paying or I'm making all this money like you don't know what the fuck you're talking about at all you don't know how little I receive you know like you know I I do a I do a conference or you know a workshop or something to that effect and it like it has to float me for practically you know five six seven eight months sometimes literally and it's not that much money to float for that mount amount of time you know and if I told you like the total I told you like for the last couple of years the totality of my quote salary if you want to even call it that to do this work was like right around thirteen thousand thirteen thousand five hundred dollars let imagine that's pauper that's pauper level that's like it almost you could call that the extreme poor that's the very lowest end of what you could call the middle class that is scraping to have what you need on a daily basis to get by that that is like anything bad goes wrong and you have to put out multiple thousands of dollars for something you're fucked that's basically what what that kind of a salary is so I ask anybody like look at what your salary for your job is is it under that amount most people there's heart there's very few jobs that you're making that little amount of money so I'd say I've done a little bit better than that in the last year and a half to one year but not drastically okay you know around you know I'd say the twenty thousand dollar mark if that and it's like half of that you know like if I make ten thousand dollars in resources that has to float me for half a year you know imagine doing that most people would not be able to live and survive on that and do other things like what this work entails no way it's very little money compared to the amount of money I used to make which was above $50,000 a year okay I'm nowhere near even getting back to that level not even close okay so people like I'm just forthcoming about that I'm just forthcoming that's the amount of resources in the way of donations that come in that is what this work is valued at for the people who actually contribute that the totality of people who contribute have valued this work at around that value monetarily that's just what it is I'm not complaining I'm not complaining I'm saying that's just the actual number and if most people looked at that number and said could I survive on that there is no way that they would be able to do it they would say you want me to get involved in doing that fuck you that's what they would say that's why most people don't get involved in that because their primary motivation is monetary compensation that's their primary goal is how much money am I going to make doing this not is it going to help end human slavery that's what our primary motivating goal needs to be at the same time I'm not some naive wild-eyed you know optimist head in the sky guy that thinks I could survive on absolutely no resources and continue to do this at this at this aesthetic level you know in production value level and still survive and feed myself or or pay for shelter over my head obviously we're living on a world where resources for those things are required you know it isn't about some wild you know a head in the clouds vision of oh I could just do this and not have to worry about any money coming in I don't do another job this is my job right now I want this to be my job you know what I really want to be my job I really want my job to be my hand in a pile of books doing the research for my future presentations with my computer in front of me making slides for those presentations because I would be able to make probably five to ten times the amount of content that I do now if I were actually supported with a team that could offset the workload that I need to do in the way of technical work video work etc okay that's what I would love to have I would love to have you know some type of support in place so that when something goes wrong I don't have to linearly take myself away see it's like linear work it's like I can continue to do this work until wait something just went wrong here well this work now has to stop now I have to go over here in this tangent and I have to fix the problems that that halted that work till they're fixed then I can continue if I have a technician that would be willing to come on board this project I would be able to I'm working okay a technical problem has happened but I can go to a different computer now and I can continue the work while somebody else gets that issue back to where it was and fixes it and then I can go back and work on computer I can't do this at this point basically if anything happens in the whole setup that requires technical know-how and that requires technical attention I am the person who has to go and stop what I am doing to fix that so here's the next part of what we are asking for here at what on earth is happening and once again I'm not asking anybody to totally put themselves out this might be a one day a week thing for a few hours okay one I'm not asking anybody to put themselves out I'm trying to build resources bring in resources through voluntary donations from people that have some extra resources that they can contribute not asking anyone to put themselves out so that we can pay a technical expert to come in and help us troubleshoot when problems occur because let me tell you something folks this is one of the things that has come close to affecting my health okay I'm not of people will say don't ever tell people you know when think things bad happen don't announce bad news don't announce what your potential weakness is I'm being honest with people this is something that I really really desperately desperately need taken off my plate okay because when things like this happen and I have to be the one that fixes it because no one around me knows more than me in these technical areas there are some who help and lend good assistance but in general when something really bad look folks here's what happened I'm gonna just be honest with you and even my producer and assistants do not know this okay I think the only person who knows this is like a couple of my good friends and my assistant Leah my main system went completely down this week and I'm not sure whether it might have been a hack or sabotage okay up from the outside I'm not I'm not sure the computer that you are seeing this stream coming from was completely unbeatable down and out and look folks I am meticulous about maintaining backup I have on-site backups and I have off-site backups you ain't taking shit down okay if this was a deliberate effort you ain't taking shit down okay because I have off-site backups that I can restore from where I'm at like nothing happened okay so first of all I'm not saying it was definitely delivered it could have just been an operating system issue but I had to restore from a backup this week and it's the first time that has happened on this equipment I restore it from a backup and got the machine back up in perfect working condition like nothing ever happened but let me tell you something most people first of all would not know how to do that or not have been prepared for that eventuality I'm prepared for these eventualities because I know that they can happen and when they do happen then I have to put my know-how and expertise into action and I had to do that this week so I there was almost no show this week because my main machine was down but I got it back up within a day so that being said and Bennett it drove me crazy you know it was very stressful what I'm saying is I really need issues like this taken off my plate because I had to sit and basically do that work when I could have been out there making my slides for this that I stayed up until about three o'clock o'clock in the morning doing you know so the whole point is I need a technical person okay I need somebody who is a technical ask expert again listen to what's being asked for local to this area you must come here obviously you can't work on technical problems remotely especially when it comes to plugging in cables unplugging cables plugging power sources in etc routing cables it's someone who needs to be here working with the physical equipment I don't care if you have technical skills and you're from Anchorage Alaska okay you need to be from Philadelphia or the Philadelphia area and be able to come here at least a day a week or when I ask what like on call on an on call basis like if I have a problem okay if you're available that night if you're available the next morning you need to be able to come at your earliest convenience that's what I'm asking for okay and this is so important this is as important as the editing position if not more so you don't understand how much it actually affects my stress and health when I have to when all the technical problems fall to me my staff can tell you I really really really know what I'm talking about and really know my shit when it comes to technical stuff but I would prefer someone else with at least my level of technical knowledge come onboard and really take some of the technical work off of my plate okay I mean you look at some other people do you think who are doing the work and putting information out there do you think they're doing their own technical work okay and again we may be able to pay something right now we're not a big operation we're not a big operation hiring a lot of people we want to bring more resources in and be able to do that but right now this may have to be again with the donations that come in as part of the video editing project for the the natural law documentary and maybe some of those we can turn toward the effort of helping to pay on and on a job maybe a per job basis a technical expert to come in and help and offset these duties from my plate okay so if you are a technical expert with who is very experienced I'm talking about a high level expert now if you're even a novice or an intermediate person just don't bother you you have to know like as much as I do about operating systems and equipment all right so we're talking about a technical expert here in with high level expertise in Mac OS we use the latest Mac OS operating system which right now is Mac OS Mojave 10.14 we're right out up at the most recent version which i think is ten point fourteen point six what we are up-to-date on all of our systems you know this is what we use for our Mac's here and for Windows we're running the latest build of Windows 10 you know with all the security is applied okay so we're on modern os's we're on modern equipment we don't keep ten-year-old computers in here we don't keep you know ancient machines running ancient operating systems these are relatively state-of-the-art equipment here okay so my mic the laptop okay my producer is telling me we're having a issue with the laptop I'm going to replug here momentarily I apologize for that okay let's see if we're back okay let's try this again for some reason it is bugging out periodically I'll look into why that's happening it may be that there's too much tension on that cable right there so we'll we'll have to you know work that out but anyway if you have experience with Mac OS and Windows the latest versions okay we will be when upgrades come out like moving to Catalina which is the next Mac OS operating system coming out very soon and you know future versions of Windows we you know basically stay pretty much up to date and when our Hardware becomes long in the tooth or obsolete we upgrade our hardware we don't keep ancient things going here and float on a wing and a prayer with you know decades old equipment that's not how we do things here we try to maintain relatively state-of-the-art not always the ultimate highest end stuff but at least good to top and mid end equipment to the top of the mid end range at minimum okay and I think that's how you maintain good quality and aesthetics with your stuff okay that you're putting forward so if you have these experienced this experienced troubleshooting these systems and you are local to Philadelphia it cannot be done remotely please contact my assistant Leah buna Leah at what on earth is happening comm once again that is spelled L e IH a at what on earth is happening comm so let's move on to the next order of business about the future of what on earth is happening I have been planning the one great work Network for well over a year maybe even a little bit longer than that I am at the beginning stages of working with a developer to make a modern web-based system for this network where we are going to bring multiple hosts onto the network and it's going to be a network where we put out both free content and some premium content for subscribers to bring in some resources this is probably going to be one of the best networks on the entire Internet once we get it up and running we also need resources for this because again you know the the developers that we are working with are doing so right now on a volunteer basis but at some point I want to get them paid for their efforts and when we do launch it there will be a subscription model but there will be a large amount of content that will be available on this network for free as well so it will be free content and it will be a portion of it will be premium content for subscribers to the network that is how we plan on bringing in some more resources to the water on earth is happening effort and to get the content providers paid for their efforts so that they can expand their reach you know I don't want people who come onto this network just doing it for free I want them to have some compensation for their efforts this is what this is what projects like this are supposed to be about conferences are supposed to be about that you know any events that people host and bring researchers and speakers on board with one of the goals the first and primary goal should be about ending slavery on earth getting the word out about true anarchy getting the word out about natural law and ending human slavery ok that's first and foremost that should be our primary goal second to that should be getting some resources to the content providers to be able to continue their work this was our ultimate goal in the early days of the fur your mind conferences the first two for your mind conferences after that I only assisted with promotion for the fear mine events I think a lot of people still don't know that I totally hosted and was the main organizer of free your mind one and for your mind to those are the only events that I was the actual organizer for as if for your mind three four and five the duties for the organizational tasks of those conferences where he completely handed off to other people and I you know allowed them to continue the use of the name in good faith now the first two are the only ones I can speak to about what the intent and ultimate goals were because I was the one who was the main organizer for that and I ran the organizational team and our goals were first and foremost get the information out to people secondly to get some resources out to the researchers every single researcher and speaker that was a part of the first two for your mind conferences was received some compensation for what they what they took the the role that they took part in the conference some agreed to do it pro bono not to not receive anything and some we had agreements with to pay them what we could route based on what we brought in and we honored those agreements and in my involvement with all of the other for your mind conferences the agreements that I personally made with the organizers were also honored as far as any monetary compensation that being said I think that should be the second goal the first goal being put the information out there and ending the human condition of slavery that should be your primary goal when you're organizing anything and again I'm referring to the one great network here as well that's why I'm talking about this but I'm extending it to extend to any other project that we do in this community I feel the primary goal should be the information and helping others to understand it and ultimately ending the human condition of slavery on earth the secondary goal is putting some resources into the wallets into the pockets of the content providers the speaker's the people who are hosts on the network etc these are the people who people are coming to see or paying for premium content etc okay you have to take care of them you have to honor your agreements with them that's secondary that's the secondary goal the third goal and the one that should be the last one is making resources for yourself as the organizer to be able to not only help to take care of yourself and the things you need on a daily basis to survive but then to also role surplus back into the project okay so that's what I do here at what on earth is happening we take in resources I take what's required for me and then I roll whatever the surplus is back into the project I want to make enough of that surplus to get people paid I want to pay my producer my assistant my you know tech person my you know developers etc right right now most of them do this on a volunteer basis or for very very modest sums that then it's not really acceptable they should receive more so you know but again I can all what I can do is the I can only provide the extent that people value this operation act because it is a viewer funded operation this is a listener and viewer funded operation funded by donations only this is not a business this is not a 501c3 tax-exempt foundation you know we are not any kind of an organization we are not an LLC nothing like that nothing there is nothing like that we do not operate under any business operational rules of any organization corporation LLC nothing okay this is a private educational outreach that's it that's it and it is helped by sovereign beings on a volunteer basis and it is entirely funded by voluntary sovereign donations that come in and that is what people value this project at most people will not operate anything that they do like that because they will not go on the faith of what human beings are willing to contribute okay they will set it up as whatever entity or foundation or corporation under government rules etc and go into the whole tax thing you know this is 100% a sovereign project that is ultimately run by me and people who volunteer to assist in the educational outreach effort completely made possible by supporters individual private sovereign donations and nothing else it never has been anything else okay what on earth is happening is just the name of the website and the show that's it it's just me doing this folks with help from good people and help from people who have a little bit of resources to spare and they are willing to voluntarily contribute that on a one-to-one private personal basis that's it I think more of the freedom and alternative media community should run by that model I absolutely think people should run their whole operation by that model most people don't have the faith in the universe to run their operation on that model okay I'll not even call it faith in humanity but faith in the universe itself to provide what is going to be required to do that that is the model I run what on earth is happening on and always have and always will so we want to get this network launched this is some of the art that South Coast boson made for the network and I think it's great and we want to you know make this network a shining example of what people could do when they come together in a cooperative effort in the name of human freedom can do that's the goal for the one great work network and I think when you see it you're going to be hopefully impressed and I want to support it and want to be a part of it so we're gonna have like probably at least I'm hoping at least ten hosts maybe slightly less than that when we first start but I hope we can expand that even to a greater number and get some of our hosts compensated through your donations to the network when we launch it next year hopefully and get some of them compensated for the great work that they do that's what this is all about that will be our secondary goal for the network is getting hosts of the network compensated the first goal will be putting the word out getting the information out to people that need to see and hear it so that's the one great work network hopefully that will be coming in 2020 again we have a brilliant developer who's helping us to launch this and we're gonna have some form of a subscription model when we launch it okay finally I'm gonna be taking part in the next seed conference now I wasn't sure whether this was seed four or five the poster says for this is going to be taking place in Rutland Ohio this is organized by the people who do skatopia so that's our Brandon Martin who was the recent recipient of this year's one great work award I really should have put that in this slideshow I'll talk about it the next time I come on air well Brandon Martin was the recipient of the 2019 one great work award and he's the main host of skatopia I'm a host of seed the seed conference and the next one is going to be taking place May 29th 30th and 31st 2020 in Rutland Ohio at skatopia seed stands for studying educating enlightening and discerning and I have made a prior commitment to agreeing to make an appearance at the seed conference to actually do a presentation at the seed conference prior to deciding that I'm not going to take part in others conferences anymore and once again I'm not really going to say too much about that except that after seed I will be honoring what I said that I will not be taking part in third party conferences from this from that point forward because I made a commitment to be a part of the next seed conference prior to deciding that I will honor that agreement as I made an agreement with Brennan to take part in the next seed so I will honor that agreement and I will be at the next seed conference however that will be the last conference that I that I will take part in I will be doing my own moving forward with any in person events they will be organized by me and no one else but me with a small ancillary organizational team with members of my own personal choosing and that will be in this way the entirety of the event is me is up to me how it is run organized set up what it will cost any of those details the technical arrangements all of it will fall to me and whatever staff I agreed to work with as part of the event so seed will be the last time I will be taking part in a public conference organized by someone else all other events that I do will more likely than not be here in Philadelphia that I will organize myself and the the the format will be as such I'll describe what I will be doing either it will be me doing an all-day from beginning of the day early in the morning till you know around late dinnertime early evening an entire all-day event caught you know mini conference workshop extended presentations seminar whatever you want to call it okay and or if I have a shorter form presentation maybe like only a two or three hour one or even a four hour one that will not take the entirety of the day we will probably set up an all-day form of a event and I will have an opening speaker like I did at fake ask Christians when Darrell Rowland's open up for me or like I did at demystifying the occult part to Satanism and the dark occult which Jay Parker was the opening speaker so it will take on a form like that either uh it will probably always be some form of an all-day one-day event that people can you know travel from either Philadelphia or outside of the city to here in Philadelphia and it will be an all-day event either just myself if we have a very long seminar one of the first ones I'm probably going to do will be the occult origins of Nazism and communism I've been talking about this one for a long time I've been doing more research in the form of taking buying some books regarding this topic and delving into more research on it both in book form and taking in information from internet-based resources and this is gonna be a extremely in-depth all-day seminar that will be just me it will be as long as probably the natural law seminar okay where I'm gonna go into just about every detail and aspect that both Nazism and communism are still to this very day the religions that own this planet and for anybody to think in any way that I am aligned with or on any side of any of these sick depraved twisted fucked up religious totalitarian control systems of belief of sick religious belief they have to be very seriously mentally ill that's all I'm gonna say on that very serious mental issues if you think a person who has spoken out against both of these depraved religions endlessly and tirelessly trying to get people to understand what these religious beliefs entail they're not political systems they're religious cults that I firmly stand against with every fiber of my spirit and being and I have been trying to get people to understand exactly what these religious cults entail and how they sway people into their fold into their cult belief system for anyone to think I'm aligned with any of them has either not been paying attention and has not really looked into my work and/or they're very seriously mentally askew is all I'll say on that so that being said let's uh so that's going to be the forum that future personal presentations take for me personally instead of taking part in other people's conferences now that being said I think we're pretty much finished with the part of this presentation here today called the future of what on earth is happening so that's what I have planned for the near future ok we will be back soon we will be coming back hopefully by the beginning of 2020 if all goes well with how an editor responds for going forward with the documentary with how donations you know people respond with personal donations for funding the documentary okay so let's uh let's move into the part of this about where is humanity add in consciousness now in late 2019 and folks before we even start jumping into this this hurts my heart to say the things I'm going to say in this section toward the what I'm probably probably not going to do calls if we have some time we will more likely than not I'm going to tap the role with this material till the end of the show because of how much there is okay and it hurts my heart to present this because we should be way beyond this and again folks you know I talked to people and hurt you know listeners viewers personal friends and they say don't give people bad news don't show them your your weakness or how this is affecting you ladies and gentlemen I want to show you that this isn't in my hands it's not I don't got this do you understand what I'm saying this is not entirely up to me I am trying to explain that has it has always been up to all of us and you cannot put all the burden and the weight upon the shoulders of any one individual no one is that strong I do a good job covering up where my wounds are at okay I do a good job persevering and pushing through it because that's part of the great work that's part of what it you need thick skin to do this work but for anyone to think this doesn't affect me stress wise this doesn't affect me in my emotional makeup this doesn't affect me deep in my heart and my spirit you would have to think I'm a robot you would have to think I'm not human and I'm just as human as anyone else I failed just like anyone else I am not perfect I am prone to failure I am prone to getting weak I am prone to feeling like I need a break I'm not good this isn't a break for me I'm going to be working very very very hard and continuously on this documentary that needs to get out to the world so don't think this hiatus from the show is like a complete break of work for me it is not I will be doing other projects but the main thing I will be doing is getting this workshop and it's completed for them and that is practically going to be a full-time job okay so what I want to talk about here is has any appreciable change happened in the 12 years in human consciousness since I've started this effort person and I have to report that not only since I turned this into a video show from an audio podcast nine months ago going on to ten months really next month but in the 12 years since I have been publicly doing the work of what on earth is happening in over 20 since I've really known this material but in the 12 years since people eventually helped the light of fire under my ass and get me into actual action doing this that not only not has anything changed publicly in the aggregate of humanity but things have gotten infinitely infinitely worse infinitely worse and I don't want to have to say that I want to know what I want to come on the air and tell you as viewers of the show as longtime viewers and listeners I want to come and say you guys have done an awesome fucking job thank you you've done so great that the world is changing for the better and I cannot come on the air and say that I can't do it because you know why the overwhelming vast majority of you have failed that you're at your task and do you have a task yes you do this isn't something that it's like oh great I know I understand what marks saying great and you think that's it if you think that's it you don't understand a fucking thing not a one thing from the very Sun Jump Street from the get-go you don't understand one thing about what this is about how many of my viewers have moved effectively into the role of teaching people on a wide scale not stopping someone you know on the street that has a little button with the hammer and sickle and trying to persuade them in a five-minute fucking conversation not that that they're they're misled yeah that's not doing the great work you're you're a fucking joke if you think that's what doing the great work is you don't know the first thing about this work entails or involves and you certainly haven't started doing it if you think personal conversations look I'm not saying don't do that I'm not saying you know forget about engaging anyone personally that's not what I'm saying I'm saying that if you believe that is what the work is that you don't understand what the great work is so my first few slides I decided I don't want any graphics with them I want to just put a statement down and really let you see my statement about where humanity is at but specifically I am referring to you you as the listener not the average Joe Schmo on the street of any major given city I am referring to you the viewers the listeners of my work because that who that is who has failed you have failed a debt is offended about it as you like once again see folks I'm not here to let you feel warm fuzzy and happy in case you haven't gotten that by this point this many years in this isn't about you feeling good this is about you accurately gauging the truth about what the human condition is and then getting involved in a way that is effective in changing the human condition toward the positive outcome meaning ending slavery that's what this is has always been about and I have always been about targeting the potential teachers the potential change agents the potential influencers of others and that's what I'm going to refer to here today so the first thing I want to do is tell you why we have failed this whole first section is going to be about why we have failed the second section is going to be about where the average person is still at which is the proof that we have failed so I'm going to give you the why first about why you yourself and other people who claim that they understand what is happening on earth have failed in changing the human condition you yourself have failed in changing the human condition I'm going to explain the why first and folks let me just tell you this once again it's not a blanket statement if you have contributed in an inactive way to the great work wonderful then I thank you as my brother my sister and most of all my peer my mutual peer in the great work I thank you from the bottom of my heart for assisting in the work do you know how few that is it's a piss in a pot as the old saying goes it's nothing I would say it is point zero one percent and I am probably being extraordinary generous I'm gonna say that again my estimated number and let me tell you something folks I'm very good at estimating figures I'm very good at extrapolation of demographics percentages of how many people are doing something or not doing something it's almost it's so scientifically accurate it's almost scary how well I'm able to gauge things I'm telling you if the percentage of people who claim who make the claim of understanding any part of what I've put forward at what on earth is happening are effectively and efficiently helping in the great work of changing the human condition if it is point zero one percent right now I'm practically shitting my pants enjoy if it's that number do you hear me do you hear what I'm saying we are in abject failure of the mission abject failure of the mission and there's a reason for that and I'm going to tell you the reason today after I display some basic statistics so let's go back to the slides and these are my text statements about part of the reason why and then I'm gonna get into the nitty-gritty of why we failed in this duty in this effort in this mission in this charge to end slavery on earth why we are continuously failing the first is 12 years on since I began what on earth is happening and have done this work tirelessly twelve years later most so-called anarchists most people in what we called the freedom movement there's no such thing it's the my freedom movement at best most people in the so-called freedom movement and most people in the so-called quote truth movement and in whatever area of endeavor they're seeking truth this could be the truth in about vaccines this could be the truth about what's in our food this could be the truth about what's in our water this could be the truth about the geoengineering operations this could be the truth in extraterrestrial intelligence and it's interaction with our planet if you could pick the topic this could be the truth of ancient human origins it doesn't make a difference what area of endeavor that you are seeking truth and seeking to expose truth I'm talking about any area of the quote-unquote truth movement the first thing is all of those people not all I'm sorry no blanket statement most and I'm when I say most the word most here I'm talking about the vast overwhelming majority I'm talking about I would put the number at 98% or greater I'll be generous with you if the number is 95% again and and 5% really do get it I'm shitting my pants in utter joy okay I'm gonna say the numbers closer to about 98% when I talk about the word most the overwhelming vast majority of these groups of individuals who claim that they are doing any part of this work still do not understand what true anarchy or true freedom is they don't get it they don't understand it they don't understand the requirements for it because if they did understand the requirements for it they would become effective in distributing this knowledge by whatever means they had to do that they would do it they wouldn't be talking about doing it 12 years later they'd be actively doing it and most people look in the workshop I recently gave called teaching natural law overwhelmingly the vast majority of people who attended were shocked by what the content was first of all secondly they were the overwhelming majority even of the people who so want to be teachers of natural law the overwhelming majority have little to none of the skill sets required which is what I'm going to talk about okay to even start the effort of teaching it and this is why we haven't done it this is why we are failing at it and that is what part of the understanding of true freedom entails because it entails what are the what is the requirement or the role of knowledge and if you understand that what is the modern way of communicating knowledge and if you understand that what do you need to do to become a purveyor of that knowledge in the modern world you you yourself take that very knowledge into yourself and then you start learning it and doing it anything short of that you it goes back to the old ancient Asian aasif he's saying those who know but do not do do not know it's only a claim of knowledge to know and not to do is not to know saying I know what true anarchy is and I know what true freedom is and yet you do nothing to actually really propagate that message widely in modern technological society then you don't know you don't carry that knowledge because the biggest part of carrying that knowledge means you are communicating in to others in a wide-scale format once again other people believe what the great work is is I'm gonna go out on the street corner or I'm gonna go out in a grocery line or I'm gonna go out in you know some other place in society a tavern a bar whatever right and I'm gonna wait until I hear someone say something of any interest to me or maybe they say something that disagrees completely with what I know you know or again I see them wearing a little Socialist Party of America badge okay and then I'm gonna try to educate them with the 10 15 20 minutes that I might have with them and in a public space in a public forum I'm gonna blurt out some verbal diarrhea to them in public and call that the great work you've formalized zero of your work through even an outline let it let alone a formalized presentation or video project because you don't even understand how much work that involves you don't even understand the skill sets involved in producing media such as that no clue zero clue you think that the great work is I'm gonna meet somebody I've never met before that's totally ensconced and fucking mind control and I'm gonna blurt out some shit to them that is completely the antithesis to every that they've ever believed in their mind controlled fucking lives and then magically that's gonna change their mind and heart overnight or it's gonna plant a seed that's somehow gonna blossom and and combat the mind control that they've received for however long they've been on this planet and then some one day they're gonna wake up fucking enlightened and you're a joke you yourself are a joke you got that get as offended as you fucking won you're a joke you don't understand what is required you're a naive child you're not part of the great work you're a naive child you're not part of doing the great work you're a naive child okay look right in my eyes get fucking as offended as you want to get you're not helping the effort look I'm not saying don't I'm not telling anybody don't speak to anybody in whatever way they want I'm saying just don't think you're actually putting a dent in things you're not you're not putting a dent in shit okay and what this whole thing is supposed to be about ladies and gentlemen is creating more content creators powerful teachers with the tool set required to go out and do what things like I have done you don't have to do the exact same thing some people will go out and write books wonderful go out and write books some people will go out and produce documentary films wonderful go out and produce documentary films some people will go out and they'll do they'll put themselves in a public platform night after night after night where they're reciting poetry about this where they're doing spoken word where they're doing you know music that with a very good lyrical message wonderful if those are your forms of media go out and do that what I'm saying is you have to put your work forward publicly with your name on it not with some pseudonym or fucking mask be proud of your work if it's supporting the end of human slavery don't show fear put your real name on it and yes my real birth given name legal name whatever the hell you want to call it I really could care less about a label but I'm saying my name that and people have known me since I was born is mark passio it is not anything other than that people who are saying that it is something else other than that don't know what the fuck they're talking about or they're liars deliberately I don't hide anything about what I do to anyone I don't really care who agrees or disagrees and I'm not in fear of anybody that wants to try to stop me do your worst you won't stop me in this lifetime or any other again the worst that can happen is you put a bullet in my flesh in this lifetime and I'm coming right back in the moment in the moment and people want to say oh there's no speculation about reincarnation folks I've made the commitment to be here until the mission is accomplished call that whatever you want if I'm given the choice I don't choose escape I'm coming right back here I'll pick another body in the second imma ejected from this one and I will be back here to learn the lessons again if required and do it all over again that's how that's the preternatural willpower you're up against with this one so good luck good luck in whatever you choose to do to try to thwart that that kind of will you will lose okay so that's number one that being said I get to a point where I'm like the effort is futile because that we are up against a species that is almost beyond being able to be taught anything that's how hard and their ego is and I've talked about this on former shows that doesn't mean I'm going to stop but I'm deaf damn well going to express my aggravation over that okay and doing that is my katharsis to keep going and I have to be honest about where people are they are total hard-headed motherfuckers they don't want to learn they don't want to know or see the truth but worse than that are the people who claim to know the truth and have not made any appreciable effort in becoming a teacher of it because I believe at some point of people hear it enough over and over see that's why it's called the great work folks the great work isn't oh I said that to the person wearing the Communist badge at the rally last weekend in Center City my town USA and they told me to go fuck myself so I planted the seed and I'm done with that and I did the great work and yet you know how many people think that's what it is you know how many people give up that easily and that quickly and you think you've done something and you haven't done shit you've done exactly balls squat shit and I calculated that I used a slide rule I used an abacus the whole thing I set it all up I calculated that to the exact figure its squat balls shit is what you've done that's what you've done all the people who think that this is just going to be communicated by word of mouth to people who don't want to hear it you believe that we need to produce so much media that it cannot ever be censored we need to produce it on regular old-fashioned networks regular file-sharing regular video sharing we need to produce it and distribute it sharing sites like BitTorrent we need to produce it on any new media possible they're into it people need to be drowning in this knowledge drowning in it because of how much content has been created about it and we haven't done squat balls shit is the exact figure okay go take your scientific calculator and calculate the number yourself to the exact decimal place because that's it that's where this movement is and then people want to say oh that's offensive to me fuck you if you're offended by that it's because you need to be offended by it how about that those who have done the work need feel no offense knows those who have done it effectively those who have put it out there publicly those who have put your name on it and you could be proud of your work because you're getting it out there in a wide-scale way you're my brothers and sisters in this battle thank you and I'm not speaking to you obviously in in this communique I'm talking to the people who have done practically nothing or nothing you should be ashamed of yourselves one you need to turn that into motivation don't dwell in the shame start now and move forward in your learning of what's required to get it out there and folks the new media requires knowledge of new technology well it's unacceptable that this many years into having this technology at our fingertips that people still don't know how to fucking use it it's unacceptable unacceptable and now it's easier than ever and the tools are more powerful than ever we should be reaching people a thousand times the scale of the traditional media and we're not we're not and the people who think we are you're delusional you are delusional you say it's the dinosaur media it's not reaching it's not reaching people anymore people are going far from it and droves you're delusional people you are delusional you think that people don't bow down to politics and and and they don't are fully ensconced in the cult of politics of left versus right politic you're out of your fucking gourd you're out of your fucking gourd you're delusional you don't see reality for what it is the cult of government is stronger than ever they put people into total political identification more than they ever have in the past people are brainwashed into this cult more than they ever have been so 12 years on people still don't understand what real freedom is and that is because you haven't been doing the job of communicating it through the new form of media which is publicly putting your work online everywhere you can not just on YouTube everywhere that's the other thing counting on just all these big tech platforms to do it so moving forward see if that corrected it yep okay moving forward okay the same people 12 years on later don't understand the occult they don't understand and really in the anarchist movement I mean they are so hard-headed left-brain it's sickening it really is it's really disturbing and they don't they think they're not brainwashed and they're out of the brainwashing just because they don't believe in rulers you don't understand the mindset of your rulers you don't understand the religion of your rulers you don't understand the ancient knowledge of the family lineages of your rulers that led them to be able to rule you because they rule so many other people's minds and get them to condone your rulership and in not knowing that knowledge of the occult you certainly don't know the way to get those people out of that mind control you don't know what to show them you don't know what to explain to them and you think you could do it just by telling them oh you're an occult belief system about authority that's only the very tip of the iceberg in the beginning it exposes nothing about the ancient psychological knowledge that goes hand in hand with the illegitimate of authority and almost everybody in the anarchist movement wants no part of teaching the occult to others because they don't want to be seen as oh that's some hokum religious bullshit when I've explained ad nauseam no it's just ancient psychological knowledge that has the moniker the occult because the word occult simply means hidden it has been hidden from the general population because you don't brainwash the population and then teach them how they were brainwashed because if they have the knowledge about how they were brainwashed they will use it to unbury watch themselves that's the knowledge of the occult yet other people want to insist though there's nothing to that well it's unnecessary to explain or to teach or I don't want to do it because of how it will make me look to my peers who are equally left brain in the anarchist scene I could care less okay about how this is perceived in any particular movement you go into the UFO field and start talking Anarchy and they look at like you like you're crazy because they think disclosure is gonna come through the government next year you know you go in the anarchist scene and you start telling them animals should not be aggressive on just like humans shouldn't and they look at you like you have seven snakes growing out your neck because they don't want to extend the same non-aggression principle to non-human beings that they want to extend to human beings you know you go into the vaccine the anti-vaccine movement you know and you talk about we need the truth about how harmful vaccinations have been to humanity but we also need to get the truth about human origins out and get the truth about the interactions human beings have had in in our past and present with extraterrestrial entities and then the anti-vaxxer crazy because there's no holistic truth and freedom movement there's the my truth and my freedom movement that's all there is and ever has been and their piss in a pot efforts that are going nowhere and will continued to go nowhere because people do not understand what true anarchy is they do not understand what true freedom is they do not understand the true principles of anarchy and freedom they do not understand what the occult is they do not understand the psychological individual shadow material work that must be done as someone who studies the psychological knowledge of the occult most people want no part of that personal work people don't understand the holistic aspects of any of this it's all fragmented and that's why it continues to fail because people don't have the totality of the knowledge they need but most of all they don't have the knowledge on how to propagate the totality of that knowledge to others so let's move forward to the next slide most people in all of these movements 12 years later since I've started the work of teaching this still don't understand natural law and ladies and gentlemen this is the crux of all of it even the people in the so-called freedom movement the so-called anarchist movement that's so called a cult movement even the reason they're not truly effective in changing anything is because they didn't get the memo on the most important occult knowledge there are a cultists out there that claim to be deep level occultus with deep level knowledge of the occult and how it works that talk zero about natural law talk zero about true rights talk zero about what is a right what does actually cause harm what actually doesn't cause harm because it is outside of the few actions that does cause harm initiate harm the true non-aggression principle the true transgressions against other beings against natural law and other beings rights the true Devitt seven deadly sins you have so many people who say that they want to teach the occult and no absolutely part of any of this sorry have we made any progress in really teaching natural law to people I would say again it's a piss in a pot effort people think people think I can just tell people this by word of mouth with no formalized way of explaining it I've even given people my slides so go out and use my own slides if you don't want to make your own I formalized it do can you even make an outline and a goddamn word processor you know can you can you even formalize your thoughts into an outline of I want to explain this this is why this is important here's what I'm gonna talk about here and then put it out a formalized way by a teleprompter put it in front of a video camera and read it if you have to if you don't want to do it off-the-cuff most of my stuff is done off-the-cuff sometimes I put some notes down on a screen next to me if I want to remember a big list of things I want to talk about but I know it so well I could discuss it off-the-cuff first of all you got to get that good at explaining something you know and most people can't explain natural law well most people can't give the definition of a right even the people who watch this show or listen to what I've been saying since the beginning you have to get your rhetoric under you that's why I say start recording your voice start listening back to it start doing this where you eliminate the well hmm you know I try to try to do your best to get to a point where you you make your point in a succinct way most people still are not doing any part of this they're not teaching it most don't understand it deeply enough yet this is the problem go back and listen to the natural law seminar ten times if you have to to get it all incorporated read the books that I've recommended that are in the section on the podcast the podcast section on the website on the water an earth is happening website go to the podcasts on natural law do a find on page in the podcast section find the parts of the podcast where I discussed natural law there lots of books to talk about these dynamics and then you can use them as launching pads that find tons of other material on natural law it's out there get the ark drive ton a lot of stuff on natural laws on the ark drive listen to other researchers who have talked about it Manley P hall has talked about it Richard Wetherill has talked about it more people need to be talking about it okay so this is one of the other main reasons now there's two more okay and some people will you know take offense from one of them but you know I'm gonna put it out there as this thing because first of all people still aren't taking this seriously enough about how much this contributes etheric energy wise to what we are experiencing as human beings in the form of our slavery most people in all of these movements the anarchist movement the freedom movement the truth movement the so called these so-called movements still condone Hornung harming animals for food and when you say that this is something that is still a practice that we should be moving beyond and we shouldn't be engaged in because we should extend the non-aggression principle to all beings not just human animals but to non-human ones as well and that we are condoning and contributing to suffering that is going out into the world in an energetic etheric scale and again I'm not a militant vegan I'm not saying that you need to get this all at once where you need to convert to this all at once I'm saying you need to understand the principle first then you can align your behavior to the principle okay move away from supporting and condoning it just like you move away from supporting and condoning statism no one needs to become an anarchist in one second or one hour one day or one week it's a process the same is true for understanding not harming animals to the extent that we are capable of it's called doing the least harm possible look I want to personally thank Gina car for her fantastic work in this effort the heart to heart thank you you do this beautifully okay and you had me on the verge of tears with your recent presentation it's it's the way it should be done it's it's done very well okay once again because I think she doesn't very effectively I think you should look into the people that she talked about in her presentation Melanie joy and others etc okay that's what I call contributing to an aspect of the great work effectively this is an anarchist who talks about doing our best to cause the least amount of harm possible to our non-human brothers and sisters and putting it out there in a way that shows people the ways we are now contributing to that harm and the ways that we can over a process of time pull back our our involvement with that and our condoning of it and that's all you don't have to be militant about it there was nothing militant in her words explaining it which is why I so appreciated it you know so thank you and I thank you for your contribution to the great work in that regard and there are many others doing great work like that that's why I gave the great work award to Brandon Martin I think he's doing it very effectively and putting out the word very efficiently and effectively he formalizes his thoughts and his words and puts it out there with nice aesthetics publicly with his name on it great job okay so that's that's the next part all right I won't spend too much time on that I just wanted to incorporate it and then next most of these same groups they are still moral relativists they still do not understand that right and wrong are not something that human beings get to decide for themselves get to choose and decide and cherry-pick and then that right and wrong are up to human beings perception okay that has nothing to do with what true right and true wrong are right is an action a right is an action that does not cause harm to other sentient beings that does not initiate harm to other sentient beings wrong doings are behaviors which do initiate harm to other sentient beings they are murder assault rape theft trespass coercion willfully lying this true seven deadly sins the transgressions the seven transgressions against natural law which are violations of the rights of other beings most people in all of these movements are still moral relativists and if you ask them where do rights come from they will say human beings create rights there are human constructs and they are not inherent to nature and that is where they would be wrong they would be incorrect and that is why one of the reasons we are not making progress okay so these are the reasons why what we still don't understand that are contributing to the continuation of human slavery if you really understand the actual causal factors and if you do with the next thing I'm going to tell you is why you have failed in getting the word out why haven't the people who claim that they understand these things actually helped to contribute to change the human condition why has the effort to do that bin so paltry been such a piss-poor effort why has it failed thus far at this point in human history when it should have gone far beyond the point that it's at again I was expecting by this point I would have expected to either have the current human condition solved meaning there would be a solution brought forward and enacted and slavery would already be the end human slavery would be ended that's how naive I was in how good and effective human beings would be once they heard the truth boy what did I get him in beings all wrong I was a naive person who gave way too much credit to other people in what was in their minds in what was in their hearts and ultimately what their willpower would be I completely misjudged way too far toward the positive scale because that's where my hope was when I was younger and I'm not too proud to say I was wrong I was wrong about all those things I was told that I was wrong about all of those things by the Satanists that I work with and when I was told that by them I literally wanted to kill them with my bare hands I made the decision not to do that so I wouldn't end up dead and I could at some point put this information in this knowledge out but I have to come back on the air twelve years well really like 15 to 15 to 17 years or so after those experiences and saying I was wrong and and the Satanists who are the who were the part of the masters of the world the group that could constitutes the masters of our reality were correct in what they told me about where the heart minds and souls of human beings are at they were correct and I was wrong there it is not too proud to admit it see I have that ability when information that is contrary and contradicts my previously held belief is put forward I can say words that most others cannot I was wrong I put way too much faith that upon hearing the truth people would change people would contribute to the work of educating others they did not the vast overwhelming majority of them did not again not a blanket statement most meaning the vast majority meaning ninety-eight percent or greater maybe more than that what they did is continue to live their own lifestyles that they had always lived trying to garner as much personal freedom as possible trying to you know have as much personal comfort as possible in their own lives and did not take on the burden of the great work which makes your life less comfortable which makes your life much more burdensome which you have to do at the same time as all it's a it's a simultaneous work the work that you have to do in your life and the great work you can't separate them in time because what you're gonna be doing is expecting something that will never come I'll have my life to exactly the point that I'm perfectly comfortable then I'll start the great work there is no such thing I did not do that I continued to work with up to a certain point yes you can do that you can't be completely in a state of disarray you have to have some level of organization in your life yes okay but if you're expecting oh I'm gonna get everything exactly where I want it and then I'll start you will never begin and that's why most people have never begun okay so most people are still moral relativists that do not understand the objective difference between right and wrong behavior and the people who do understand the objective difference between right and wrong and understand most people don't and who know that the putting of that out into the world as the knowledge of natural law is what's going to reverse the human condition of slavery you yourselves have not taken the burden of the great work upon yourself and enough numbers and move forward into actually doing it I'm gonna give you now a part of the workshop I recently gave called teaching natural law of cup two slides which was the question that I had to ask myself in what I wanted to really cover in the natural law workshop in teaching natural law and then I'm gonna give you the answer to that none of the other parts are gonna be talked about right now but I'm gonna give you the premise which was why are we in the position we are in you know and answer the question is why we're in the position that we're in and then I'm gonna answer it okay so the next slide this is from teaching natural law obviously what we need is more of the great work to be done to teach natural law into the world most people don't know what natural law means I'm going to show you that in our social media experiment results for the year 2019 but my question that I wanted to go into too which was the premise of the entirety of my teaching natural law workshop it wasn't about what do you need to talk about to teach natural law you can go watch my natural law seminar for that or listen to the what on earth is happening podcast series for that that's out there that material is out there what my workshop on teaching natural law was about was answering this question you say you want to be a teacher of natural law you say you want to do the great work I ask people how many people feel that they are actively out there and really doing it effectively and efficiently and like three people in the whole fucking room raised their hand and I said well that's why you're here right it's unacceptable that three people and then if you include myself four people in a room of over a hundred are even doing this but why is it because you don't know what to say I don't believe that's the case for an instant I don't believe that's the reason for an instant most people know why we're in the position that we're in is it because you don't know natural law at all well why would you come to a workshop about teaching it if you don't know it people who are advanced enough in a topic that they want to become teachers of it usually know a whole lot about it right so it isn't that you don't know it you know I brought people up on the microphone and ask them questions about natural and they practically spit it right out there so we proved you know this stuff right you know it so why haven't you begun the great work of being a teacher of it now at this point why aren't you already in that position and you know you can go and try to answer this in a billion different ways but it all comes back full circle it all revolves back to one overarching answer which was the main premise of all the rest of the data that I gave and put forward at my workshop teaching natural law and here is the answer most human beings including the people that say they know enough about natural law to teach it are not truly literate in modern communications and publishing technology you'll talk to so many people out there and especially some people that are around my age but even a little bit older than my age ok I turned 45 this past summer I think I still pretty damn active in decent shape and good energy you know feeling good energy too with a lot of willpower to continue and do things at that age and you know there are lots of younger people who say that they understand this and want to do it and even them I would include in this group but I would really include the people that are around my age or older in this answer to the underlying causal factor of even those people who do understand this material why are you not actively putting it out there to others and the answer is they don't know how you actually do not know how to effectively reach a large amount of people in the digital domain which is that's where the battlefield is at ladies and gentlemen the battlefield is not in newspapers the battlefield is not even in books anymore the battlefield is not in the nightly news the battlefield is not out on the street the battlefield is on the Internet the battlefield is in the digital space and guess what folks it's not on social media either this was a main premise of my work in this workshop as well the battle is not in social media the battle is in content creation let me say that again the battle for the hearts and minds of the people of this planet is in who is going to create the most content regarding either mind control tactics to tell people total bullshit lies and get them to believe it or the battle is going to be in speaking the truth as to why humanity's in the condition that it's in and how to get it out of that condition and here's the answer folks I want to go back to this slide the answer is most human beings and the I'm talking the bulk of the people who say that they understand natural law and want to teach it they are not truly literate in modern communications technology and modern publishing technology you don't know how to create your own media you don't know how to publish your media even once it is created you don't know how to reach people through modern communications media the mediums of modern communication you don't know how to reach people using that form of media and this is why we're failing this is the main reason we are failing as a movement in addition to the all the communities I talk about not understanding those main things not understanding true Anarchy true freedom natural law the occult even the mind-control techniques that are used against us which I would consider our part of the occult knowledge still being moral relativists and still converting condoning the harm of non-human animals which contributes to our enslavement all of those things combined that's why we're failing why isn't that those met why aren't those messages reaching the people of the earth and it's because the people who do have even a modicum of knowledge in those fields who are specialists in certain parts of that knowledge you are not effectively reaching people and mass on a wide scale in the digital domain which is the new battleground for the hearts and minds of people you cannot go out and just talk to people on a one-to-one level and expect the world to change because you don't know how to do it on a wide scale with technology I'm sorry but that makes you a Luddite a person who loathes the use of technology or fears it and you don't want to use it well you will never be effective enough in reaching people you you will reach a tiny tiny little speck and more likely than not you will not reach anybody who is a main influencer who is important enough to really reach others you're not going to have people like that in your circles unless a miracle happens and like I said miracles are the exception to the rule don't count on them being the rule so the reason that this work is not being done on a grand scale is because it's not because people don't know what needs to be taught it's because they can't become modern teachers because modern teaching isn't done on a blackboard with fucking chalk and most people are still naive enough to think that it is it's not going to be done standing in front of a small group of people or trying to plant a seed with one resistant person you put your ideas in a formulated formal capacity that it are well organized out to the public in a permanent form that is an archive of your thoughts and an archive of your research and your proposed solutions everything I've ever done is on my website even people in this movement who are doing the great work you can't let your stuff be fly by night and not be archived I see a lot of people you can go to their website and there's no archive of their work where is all of the the interviews you've ever done where are all of the the shows that you've done I see a lot of people that are guilty of this and right in this movement who I feel whose work is great and it needs to be archived it needs to be accessible when people go to their website you need to bring it up almost immediately I've archived everything I've done we don't know how to use these technologies efficiently that's why we're getting our asses kicked so I have one hour left to go through the last part of the show which is going to be a challenge so I really don't want to extend this into another show so I'm gonna move a little bit faster in the last part so what two parts I have left first is I want to give a little an analogy an allegory of pictorially like with a little animation okay with a slide animation here and I think this is very effective okay in communicating how this really works try to follow the analogy here okay picture a water tank a tank of water that's a municipal water supply in a small town that has to be distributed to hundreds or thousands of people so we're gonna represent the distribution of the water in that tank okay by that the tank is the centralized location of that water right and that represents somebody with a lot of knowledge your that water tank okay and here's who we have to get it out to we got to fill everybody's cup that represents all the souls out there with hardly any of this knowledge they don't understand it for a second okay they've never heard of it they don't know what natural law is they don't even know what moral relativism is they're still drinking the kool-aid they're still in the cult you know and they have no essential knowledge of the occult of natural law of anarchy of any of this but if we fill their vessels with this knowledge ok represented by the water tank filling these glasses then we will have a society of informed individuals who can then become the water tanks themselves and move on to fill others ok that's the goal so you are this water tank and these are other potential people who can take in all of the knowledge of natural law and the occult that you have come to understand but let's look at it in a little bit of a different way we're not really talking about water we're talking about natural law we have to fill people with the knowledge of natural law so why do so few works in the modern world exists to teach natural law well if you're the water tank with all that knowledge of natural law and there are thousands of glasses that are unfilled around you and you need to get that water to them and the pathway for creating the flow of information between the water tank and the glasses does not exist you will never be able to accomplish that task what is that pathway the pathway between the huge tank of knowledge representing the knowledge of natural law the knowledge of true anarchy the knowledge of the occult that needs to get to all of those unfilled vessels all of those ignorant unfilled vessels the pathway between them is the understanding of how to use modern communications technology and modern publishing technology you need to understand and implement the use of those technologies and that is what will create the pathways now I'm going to extend this little animation and explain how this works visually okay so imagine there's hundreds of thousands of unfilled vessels billions of them in fact which is the case and we have only a few of these tanks that are filled with the knowledge of natural law glowing with that knowledge right we have to take that and we have to distribute it to all of these ignorant vessels that are unfilled okay well again we have to establish pathways and connections and the connections represent being able to use these technologies efficiently in the digital space you're watching this on the digital space you're not watching it for your health folks the goal here is not to know this the goal here is to spread this knowledge that's why in Freemasonry there's three levels it's taking in the knowledge that you need inst in the initiate stage in the entered apprentice stage the second phase is understanding what it means in your mind and in your heart yep and in the third phase and what we've uh so I'm just being told briefly that we're we've set up a third camera we're gonna try to bring in a third camera to show you an extended view of our studio and there it is great job with our producer doing that on the fly okay we've set up a third you know motion cam you know we're showing you here here's our setup in house this is my bedroom folks this is my bedroom this is what we have set up here in my bedroom I'm doing this where I sleep we set up the studio and break it down every Sunday that's how committed we are to doing this work and getting it out there this is a temporary studio that we resurrect each week okay because I don't have the money or space to rent a permanent studio folks there's my fucking shoes okay and hats okay hey my show in my bed show them my bed this is this is where my bed is that while I'm doing the show ladies and gentlemen it's on the other side of the room standing up against the wall there's my or mic ok this is what we do every week you know it's not magic it isn't magic folks it's willpower and technical know-how this is what you don't know how to do these are the skills you don't have these are the connections that need to be made these are the pathways to these vessels so I'm gonna go back to work we're back to the slide thank you and we're you know let's show the first pathways the first pathways is researchers have to make connections between each other we have to have support networks and communication networks set up between us where we can talk to each other and that's what this looks like this is a distributed network between the researchers you know we can't be constantly putting each other down or calling each other names are saying we're all shells because one doesn't agree with one thing one other person says this doesn't look like this right now this is totally broken and fragmented we have no such support network in place because of ego because of ego issues and we have to work on that even the people who claim to be enlightened and knowledgeable we have to work on all of that spend your time doing the work not attacking other researchers you know like are we eight-year-old fucking children or are we adults who are trying to teach a pathway to freedom for Humanity spend energy on your own work and putting it out there rather than attacking others ok that's the bulk of what I do well sometimes I'll attack the people that go on the attack because they think they're doing the work and they're not it's a waste of your time and energy spend it on trying to communicate what's right and good and true and necessary for people to learn and then encourage them to spread it so once we have pathways like this we can get the word out to other people because as strong as we can be and then we'll get the word out to everybody some will reach others some you know may reach others that others can't but see these green pathways these are the first establishments we're creating a core of our community and getting the real pipelines built that are like the totality of this knowledge and getting other people up to speed other potential teachers truly up to speed then once that's really strong and firm we're gonna get this knowledge out to even the lowliest of vessels the average person and yes it is for all it's not just for some it is for all of them it can be understood by all of them I mean barring people with very severe mental you know psychological you know possibly you know retardation issues actual you know syndromes obviously some people like that are going to be affected there it's gonna affect their ability to actually you know physically mechanically learn we're talking about just people with you know general healthy overall mindsets that can receive information and understand something and that's the majority of people that is the the rule rather than the exception the exception is people who are actually incapable of learning because they have some syndrome or something that prevents actual learning that's that's the very infinitesimally small percentage this is for the vast majority overwhelming majority it's for almost all people okay who can comprehend it who can come who have the capacity for an understanding of the objective difference between right behavior and wrong behavior so this is what the network needs to look like but guess what we are back at square one where there are no connections why or there are very very few of them why those connections represent technical no hell those connections represent being able to use communications technology those connections represent being able to put the information out there into the world okay so go back to the slides there it is okay this is where we're at we are practically at this you might be able to put one or two of those connections in there and maybe it's true but largely here's where we are there are many few people with a whole lot of the knowledge many people with none of it and we haven't built this first connection between the people with a lot of the knowledge and we most certainly haven't built the smaller connections and it is because these connections represent the technological know-how in communication and publishing and we as potential teachers have not learned those skill sets and that's what I attempted to explain to people in the teaching natural law workshop and I largely explained to them what skill sets would be required what applications knowledge in actual programs would be required and you know kept it very general because obviously I can't teach those skill sets in a day I couldn't teach them to you probably in five years but I explained what you need to start learning and I explained that the problem is you haven't started learning that and showed it over and over again so I hope you've understood that little allegorical treatment there and I hope it has an impact on on where we need to go so I'm gonna move into the third and final phase of this presentation and that is social experiment results of 2019 that these are the the calculated percentages after we did on another social media with the public here in Philadelphia that was part of the research for the the natural law documentary so this this was part of what we did in doing man on the street interviews for the mark passio and the science of natural law documentary film that we are working on and it is an admittedly our first state that it is an admittedly relatively small data set that we what that we took from and that is not the point folks the point is not how small a total figure of people that the data set was because it was at this time it was under 50 people that's a small data set to work from however I would contend and I feel that my contention would be absolutely backed up by more larger data sets and I will challenge the viewing audience here today with the same challenge that I challenged everyone that I presented these conclusions these results to at the teaching natural law workshop I will give you the same challenge today that I gave the attendees of my teaching natural law workshop and that is repeat this social experiment with as many people as you like in whatever city you like or even to a cross-section of multiple city cities with hundreds or thousands of people it will not matter the results will come back not statistically different not statistically significantly different I should say and I'm talking about when we're talking about this we're not talking about one or two percentage points you will not get a factor of like 10 to 20 percentage points difference it will not sway things beyond what I am going to call in this in this presenting of our results the magic number because the magic number to sway social dynamics such as these is and I've said it many times and will continue to say it because people have been brainwashed by New Age bullshit to believe that you only need to sway numbers like this 1 or 2 percent and it's a crock of shit the magic number is fifth the 1% that is where you will start to see the beginnings of the tide turning you won't see the result you will see the beginnings of the tide turning I will tell you you will see in big ways social upheaval change and betterment toward the positive when we pass 75% of people thinking the correct way that's when I will say you'll see a massive upheaval of social change you will see hardly any until we hit 51% of change no one else will tell you those numbers you know how many people in this whole movement will tell you numbers like that a big fucking goose egg a big nothing burger they'll all stick to this New Age bullshit aphorism that you only need to change one or two percent or three percent of the population that's all you'd need to change it's bullshit folks it's bullshit okay we're a little off-center with that but I get I get the point this may be the rage cam that made we're going to call that the rage cam in the future that's gonna be that's gonna be when I really go off on a rant and get really really angry we'll call that that will zoom in like that and it will be the one on earth is happening rage cam okay I like the idea okay but anyway but back to the social experiment results admittedly small sample set I challenge you to do it with a wider sample set you will not get any statistically significantly different results prove me wrong go out and do it yourself with a wider number a wider dataset and prove me wrong I don't care what City I don't care it wouldn't matter where you do it because people are all brainwashed in the same dark occult way they are brainwashed into the same cult belief systems so from now till the end of the show I'm going to go through these social media social experiment results that were the result of our man on the street interviews as part of the natural law documentary dataset and this is my contention for where is humanity at in consciousness in late 2019 these results all disclose were per this experiment was performed in the spring of 2019 one season was performed in mid to late spring one season full season has passed it will not be statistically different now have we done the same thing here in Philadelphia in late 2019 okay so let's go 95 percent of our interviewees could not correctly define the word occult and here's the pie chart I did a few 3d pie charts for this hopefully they're gonna transition real nicely between them I tried to set that up in my in my keynote document here in my presentation document and I'm showing you the split visually on a pie chart that represents 100 percent of interviewees so the what we're considering the brainwashed answers are in incorrect answers are going to be in red and what we consider answers we would have accepted as correct and you know representing truth are in green on these charts so look at the result and let me tell you something folks this is overwhelmingly beyond what I expected I didn't expect to get 5% it's it's still a terrible result and I would say it's still probably somewhat representative of what we would get globally on any data set but I'm almost even slightly impressed at 5% of the people we asked in Philadelphia here did understand that the word occult means hidden maybe they were occultist themselves but 95% of people thought the occult meant evil who do we G board's spiritual hokum religion or you got a million different answers most were evil were bad or taboo but only 5% out of everyone interviewed knew that the occult the word occult meant hidden so extend this beyond the city of Philadelphia would you say that's probably the percentage you'd get worldwide I'd be I'd almost be shocked if it were that good I'd say we're probably less than 1% or 2% worldwide if people throughout the world knew that the word a call actually meant hidden I'm gonna tell you folks and this is gonna be a shock to some people and some people will vehement Lee vehemently disagree with this I'll get a lot of blowback for saying this okay I'm going to tell you right now that we received in doing this in the city of Philadelphia better results than we would get most other places in the world because I believe and feel and have a pretty good understanding of the consciousness that even with the kind of brainwashing politically that is out there in the world and particularly in America even doing this here in Philadelphia there is at least enough consciousness presence here that we would get better results here in the city where I'm from than most other places in the world so I would say if this if this were these results will be skewed they will be skewed toward the negative if you pull it out further or do it in other places once again prove me wrong do it yourself and then bring the results to me and if your results are very significantly different statistically I'll admit that I was wrong and there are some other places with better consciousness so let's move on to the next question 95% of interviewees could not correctly define the term natural law when we asked them what do you think the term natural law means we only got 5% of people that actually knew that this is the laws of the universe and it's like karma they didn't give a super extended definition they basically said these are God's laws are the laws of the universe they give us the result of what we do and it's similar to Karma what people traditionally think of as karma or karmic law only 5% of people could identify and define that as natural law 95% either had wildly off-base answers or could not define it and said I have no idea what that term means this is where we're at in society folks and once again I think that's a very skewed number toward the positive if we if we extended this worldwide if you got 1% once again I would practically shit my pants with joy in those who could actually define it okay and I'm not saying that to discourage people I'm saying that because I what part of what I'm doing here is showing you what our work is I am showing you where we're at in consciousness and I'm showing you what our work is not my work what our work as people who claim to understand this is to do ok moving forward ok I see that transition looks good 68% of interviewees believe that morality is subjective is a subjective human contract now this is one of the most important results because this tells us why our society is the way that it is and again folks you know people are like I just want to just say before I even get into this you see what I do here to try to make this hit home right I don't just slap whatever together I try to make it somewhat aesthetic I try to make it somewhat visually appealing I try to make you understand what it is that this information represents you know I learned the software enough to do some basic nice things with it right to make it really hit home in the mind so that you understand what it is I'm really saying and what it visually represents in humanity this is part of what the great work is to do you have to learn how to do things like this it isn't that hard it's not as hard as you think it is I don't want to dissuade and discourage people but like this also doesn't happen magically again like I joke about the presentation fairies don't arrive at my house on Saturday morning and go mark we're gonna make your Sunday presentation for you now you know I give up my weekend to do this you know I give up my time to do this work my producers give up my time my you know assistants give up their time we give up of our time freely to do this to get it out there to people that's what it takes it sacrifice it takes a work ethic to do this okay it's not by magic it's not just the pressing of a button you know and and it's done or the presentation fairies arrive and go hey you need that presentation made well we got it for you already prepared it's it's it's a day or often days of work that I have to give up of other things I want to do and by the way that extended shot looks really cool you know I don't even tell my producer to do that today he took the initiative and when he my saw him starting to set it up I gave him the go-ahead to go go go ahead with it I'm just let's see how it looks that was on the fly and that's made possible by the wonderful donation of the new camera that we received by a donor once again thank you from the bottom of our hearts so going back to the data this is probably one of the most important results that we got as part of the entire dataset and folks it's atrocious it's you you should be so appalled you should practically be in tears at how atrocious this result is this means that over two-thirds of people in our society are moral relativists over two-thirds the the last time we did this was part of the natural law extended seminar that I gave in Philadelphia and we were about 66 percent which is 2/3 now we're beyond that it has grown by almost 2 percentage points 68% of our society is moral relativist that's over two out of three people and we want to know why we're enslaved you need only look at this one slide and this is 100% proof of the reason the underlying causal factor for human enslavement right there that's the answer it's atrocious this is horrifying only 32% said actual morality is objective there's an objective difference between right behavior and wrong behavior that exists objectively in nature 68% said morality is subjective it is a human construct that human beings invent the difference between right behavior and wrong behavior and we get to choose the difference between them and we want to know why we're enslaved my god god help us is all I have to say about that result god help us it's sickening the next result there are a full 32% of interviewees do not think human beings have free will and this number is growing were the last time we did that we got I think it was like 80 to 90 percent an 80% a full one in three people now believe there is no such thing as free will folks I mean you know what thankfully luckily you know we're in at least the 68th percentile here with how many people believe that we still do have free will you know that that that's good right but think about the negative result here one in three people now don't think humans have free will this number is growing that the red part of this pie chart is growing more and more people are now believing we don't have free will can you imagine this but we're in so much trouble folks we're in so much trouble this is part of why I do need to take the hiatus from the live show and really belt out this documentary and get it out there to the world the world needs it there's nobody else making a documentary on natural law I will almost certainly be the first I need to focus on that work and get it done because what it is the situation is bad and if you can't see that as people who say you want to put this knowledge out to other people you need to help you need to get involved and help I'm begging you you know I am not so proud that I am beyond begging for help okay I am begging for your assistance in the great work you need to learn the technology to do it so consider that result it's atrocious next 0% of interviewees could correctly define what a right is no one who was asked 100% of people asked could not correctly define the definition of a right no one asked no one who was asked could give back to us a right is a behavior that does not cause harm to others no.10 and if you don't understand that that is the exact reason that we are losing our rights once again I don't know what to tell you you don't understand what's taking place in our midst you don't understand the crux and causal factor of the problem and again if you're not producing media that shows this and that helps to make this better you're not doing the great work you may think you are but you are not again sickening to the pit of my stomach but not unexpected next result 79% of interviewees believe that rights come from human beings this is you know even more than moral relativism then their subjective 21% said rights come from God or nature that's like you know two out of ten two out of ten that so eight really eighty percent believe that they're subjective because if they come from human beings they're based on human perception and opinion they can't come from nature if human beings get to determine what they are so this is actually a better statistical correct statistically correct result of our right subjective set eight out of ten people just think about that number eight out of ten people think that heute that humans are the arbiters of Rights eight out of ten think that we make what rights are and therefore they think we can revoke Rights we can endow them to others you know we can grant them to other people delegate them and if necessary revoke them from others because they come from us imagine this and I would tell you that number is very significant in the anarchist community in the freedom movement as well I would hope it diverges somewhat from that but I wouldn't really put my hopes up on it you know cause every time I put my hopes in people I'm always let down by where we're at you know and I'm not I'm really not afraid to show that it affects me I'm also not afraid that to ask for help I'm not it's it's I'm okay with saying I've done this for a long time now and I'm under stress as a result of not having enough help doing it I need you to step forward and start teaching this stuff the reason we're still here at this place you know the reason that you know we still have this going on here is because not enough people are teaching natural law so let's move on to the next slide 53% of interviewees believe some human beings have rights that others do not so we were closer to a half and half split on this but you'll notice as with all of these slides okay with the exception of only a couple you will notice that we are in the complete read and in the wrong side of thinking with well over 51% the magic number you will notice this please take note of this things will not start to change in any way until we move past 51% in green of being the correct answer okay with all of these experiment questions you won't even start the process let alone get to a point where it's truly tipping and really all of society is embracing it until you hit around 75% three-quarters but that 51 percent the point where it breaks half and half is the magic number that is why it is why them it is the magic number of the occult may 1st 5-1 area 51 made a critical point it's it's their highest occult holiday of the year and it's not by accident that they chose 5-1 they know that's also the tipping point but 53% still believes some human beings have rights that others don't only 47% said yes all human beings have the same rights have the same rights as every other human being and no one has special rights that we can grant to them that others don't have but 53% still said yes some human beings have rights that others don't that are granted to them by other human beings could you believe this so we're still in the significant read on that 74% of interviewees believe governmental authority exists inherently in nature think about that it's like the same breakdown in the wrong way that believe rights come from human beings versus come from nature 74% believe authority is inherent in nature and only 26% or about a quarter one in four believe that authority is a human belief that is a constructional idea of human beings it's the exact opposite of the way it should be think about this for a moment though folks I really want you to consider what this means this means three out of four people believe government is totally natural and exists from the natural world stems from the natural world and is not a human construct or idea that humanity believes exists they believe it's an actual natural thing in nature in the cosmos they believe Authority is something that actually exists in the natural world in the cosmos the level of religious brainwashing is so off the charts how much people are a fucking cult or cult members it's insane only one in four people believe that the bullard there's a belief in authority and that's all it is we want people to abandon the belief in Authority three out of four people fucking believe that it's existing they sure it's not even a belief this is where we're at in consciousness in late 2019 folks do you see how much you have failed in what your work is to do you have failed I have not I have look long-term ok one person if you want to pull all with this on one person can I change the totality of human beings consciousness more likely than not no no one individual is powerful enough so but have I done my portion of the work I haven't failed in my obligation to the work you have once again if I'm talking to a person who has actually done it and really contributed their portion of the work please disregard I'm not speaking to you but I'm probably speaking to 98% of my viewing audience you have failed in your duty and responsibility and that is why this is still the statistic of what people think take a look good long look at these slides ladies and gentlemen take a good long look at them and know what they mean understand deeply in your mind and your heart what they mean next 69% of interviewees believe that governmental authority is morally legitimate so we're at a 7 and 3 breakdown here 7 out of 10 believe government authority is perfectly morally legitimate and only about 3 out of 10 and you would say oh that's that's great it's there over 30% of people who would claim that they're like anarchists that think you know Authority isn't really morally legitimate I can't believe how much this differs psychologically in his cognitive dissonance almost 8 out of 10 said they believe it exists in nature well what is nature immoral you know we have a 10% discrepancy because people are under a lot of cognitive dissonance and one belief contradicts another and they yet they hold them simultaneously so seven out of ten people believe government authority is perfectly morally legitimate and there's no moral issue with it meaning that it is right for government to rule over other people arbitrarily with their arbitrarily defined sets of laws that are based on moral relativism and the belief of human beings and only about three out of ten said no government authority is a claim and it is an immoral claim then it doesn't really have any moral legitimacy to it the next result 64 percent of interviewees believe government is necessary to prevent chaos so we're back at an almost 2/3 to 1/3 ratio two out of every three human beings believe that without government there would be chaos in society and this is growing again this is a figure that is growing since the last time we did these social experiments so more people are brainwashed to believe that without the control system of slavery in place though there would just be human chaos and they don't understand that with a society of slavery in place we have human chaos they don't think slavery is chaos you have imbeciles going on interview saying trying to tell people you know in in the Hong Kong protests that why are you so concerned with freedom safety is more important than freedom no imbecile it is not freedom is and always will be more important than physical safety you're a coward and a know-nothing that's what people who think like that are who think that it's more important to be safe no matter how much control or rights you have to control you need to be under or rights you need to give up rather than be free and potentially be in a very life running dangerous situation you're just fuckin wrong dumbass that's my response to anyone who thinks that way you're factually incorrect and more importantly you're fucking morally wrong because you are one of the imbeciles that would be willing to sacrifice other people's freedoms just so you feel safe even though you'd be enslaving everyone as a result slavery never creates freedom it creates chaos and that's what you have now okay oh so folks - over almost 2/3 about two out of three people think we have to have slavery in order to prevent chaos and only about 1/3 think have enough faith in humanity to say there shouldn't be rulers even if we didn't have rulers we would end up being ok see the people who think the other way think oh people are bad and if you know we didn't have government there'd be chaos well how could you appoint bad people government is comprised of people who you're saying are bad and will create chaos well how will the appointed government create chaos and the answer is not only will they they have you know that's why none are fit to rule you know Humanity is is no group of angels believe me we are not angelic beings folks we are not godlike beings by any stretch of anybody's imagination least of all myself that is why no one is fit to rule anyone else that's why no form of government is legitimate and it's a mistake to implement any of it so we're still in a two-thirds one-third breakdown toward the wrong there 78% of interviewees believe taxation by government is morally legitimate we go even more into the deep red with almost 8 out of 10 saying yes it's perfectly moral for government to institute taxation because I want that stolen money used for things I want it used for as long as it's stolen and put to work in the name of things I want it put toward then it's perfectly moral and the people who think that you're immoral bags of shit that's what you are you're immoral bags of shit and you would say you're we're gonna talk about another statistic you'd claim your moral and your lying sacks of shit on top of being immoral shit and this is where we give people too much of a wide berth man we give them too much of a berth and we want to say oh they're just good they're good people they're just mistaken where they're just misled no they're bad people you know I need to do a whole presentation like streetwise spirituality of what it what is the actual point-by-point characteristics of the definition of being awake I really need to do a whole presentation at some point in the future called what does it mean to actually be a good person because we throw this term around way too flippantly we throw it around willy-nilly like oh he's a good person but he just is mistaken on this no it's not it doesn't mean you're a good person wrong incorrect there are a lot more characteristics that it means to be a good person and that is knowing the difference between right and wrong behavior and willfully choosing the right over the wrong which is the true exercise of conscience conscience is the knowledge that has to come first and then the willful choice of the good over the bad is a freewill decision that comes next that implements it into the physical domain people who think this way aren't morally good people that are just misled they're bad people who have yet to abandon they're wrong and bad thoughts and become good people by abandoning those bad thoughts and choosing correct knowledge and then implementing it that's what makes you a good person you can go from being a bad person to being a good person in a human lifetime but while you think and behave a certain way and condone certain things that is the definition of being a bad person actively and too few understand that but think about what this means folks think about what this actual statistical result means here 8 out of 10 people believe that robbery is perfectly acceptable as long as a perceived authority figure does the robbery and as long as they have quote representatives who use that stolen those stolen resources which amounts to actual slavery take any portion of the result of someone else's labor that they do with their own body so it's really a claim of ownership upon the body of someone else which is slavery as long as they're quote representatives do what they say they are gonna do and and that they condone being done with that money then it's perfectly moral so a wrong can be turned into a right as long as you use the stolen goods or resources what you say you're gonna use it for that they want and you think that those are just good people who are a mislead that's a huge part of the definition of what it means to be a bad person so that's a better statistically significant result of how many people are actually morally good people I'd say it's far less than that but I'd start maybe maybe at a number of around eight eight out of ten or bad people I really wouldn't even give you that I'd say it's closer to nine out of ten next result 78% of interviewees believe taxation is necessary for society to function the same result that said that it was moral said that they believe it is necessary and that and around 22 percent or about two out of ten said our society could function without stolen labor the stolen product of of other people's labor labor only two out of ten think are everything that we do in society could where we could continue and survive and thrive as a society without robbing people eight out of ten basically believe no the robbery of people and the continued theft of the their the the fruits of their labor must continue for society to function at all this is how brainwashed the population is and again these numbers are getting worse and worse folks they're not going into the direction where the green the correct answer is getting larger as time goes on they're going in the opposite direction the green the correct answers are disappearing they're getting smaller and smaller the pie chart the green section is getting smaller as time goes on 63% of interviewees believe drug laws are morally legitimate and necessary both perfectly moral and necessary imagine 63% of slaves believe that the owners of themselves as slaves have the perfect moral right to continue to make the claim of ownership upon the body of themselves as slaves by commanding what may or may not be put into the body of said slaves final report at 11 you know can you believe it - almost two thirds of human beings two out of three human beings say my body belongs to someone else you are someone else may determine what I may put into my own physical vessel my body that my consciousness inhabits two thirds of people physically identify with their slave owners right to turn them into a slave they believe that they have the moral right to do that this is how bad things are and 37% you know but very slightly more than one in three say drug laws are immoral and unnecessary that someone has the right to put in their body that which they choose because they own their body and you know what I'd say out of that sixty-three percent how many people there would you say are feminists who believe in abortion I'd say a good chunk of them you know if you said are you are you a feminist yes if you say or do you believe abortion is or right they say absolutely because women have the right to do with what they want with their own body yet they would say other people have a right to say what I can and can't put into my own body that's the cognitive dissonance and I don't think abortion is a right because it's harming another being it's not the same being it's a different thing you know and I've shown what the result of abortion is you know it's doing something that you have is a life that you are in the the charge of that you are in you are the steward of you know it doesn't mean you can do whatever you want to your own children if it means harming them so you know but that's for another that's for another time we don't the time to get into that we have seven minutes left so I really have to race through these less than that really so let's move on to the next slide 71% of interviewees believe driver's licenses are morally legitimate and necessary so again we have a seven-to-three breakdown seven out of ten say our controllers should have the license our travel and we do not have the actual right to travel in a car a boat or anything else and no their their argument invariably when we ask them was there'd be chaos without this piece of paper people would drive like maniacs well people don't drive like maniacs now you know what like the paper actually proves you won't get out on the road and do something that is both destructive to others and or self-destructive piece of paper proves nothing it proves you knew how to jump through a hoop to some person that says you must have this or will lock you up if you don't that's all the piece of paper proves that's not saying anything about what your subsequent behavior will be you think just because people have a licence that means that they will drive in a in a perfectly on not honorable but trustworthy way on the road or a responsible way that that's that magical documents on how in parts responsible behavior does the ability to drink impart responsible behavior there's a license to go and buy a firearm in part responsible behavior with the firearm does any licensure and part responsible behavior no it does not you're talking about two separate things you're talking about licensure versus responsibility through action which are two separate things so it doesn't make sense on its face and it still shows that seven out of ten people believe that human beings don't actually have the right inherently to travel in nature they think we need to beg permission of a government for that this was only one of the slightly encouraging results which is over the fifty one percent magic number in the right we asked people if people have a moral obligation to obey unjust laws meaning if a law command something that is either wrong or prevents something that you can do that doesn't cause harm are you still morally obligated obligated to follow it unless you could somehow get it changed and 43% which is still a horrifying number said you still have a moral duty to obey it unless you could get a change through a legal process and 57% said no no such Duty o exists to obey water considered unjust or immoral laws so that was a somewhat encouraging result but again it doesn't jibe with all of the results that they gave about government being moral okay so I'm gonna try to finish these and move quickly forward so again just over that magic number 51% okay 52% said following orders is not a virtuous human trait 48% of interviewees believe following orders is a virtuous human trait and you know I would say we're right around that 50 percentile mark so it's not going to swing significantly in either direction but it's horrifying that about 50% of people think following orders isn't virtue and only about 50 and think it's not a virtue 64% believe an order giver is more culpable than an order follower 100% wrong so that's almost two thirds two out of three again you see this number come up over and over about two thirds are in the wrong they think an order giver is more responsible for the resultant harm than someone who actually performed the harmful behavior through their actual actions the order follower 74% of interviewees do not think firearms ownership as a human right I think maybe one of the only places you'll get a statistically different results of that is Texas seven three out of four don't believe it's a natural right to own a firearm and that's getting worse and worse only one in four think that that is a natural right and here's the big one folks all people we asked think that they are a moral individual everyone we asked with all the things that they concluded that they said that weren't completely immoral and backing that the authority of government they actually believe that they are still a good person that's all the time we have folks please go to gifts on the website gifts not what on earth is happening calm please continue to get the ark Drive for yourself and copy it for others you can get that on the ark tab you will not be disappointed please we need donations especially for the documentary to be completed go up to 100 is happening calm slash donate and make a donation if it is within your ability to do so that's all the time we have for this edition of what on earth is happening we'll see you in early 2020 ladies and gentlemen government is slavery thank you for watching [Music] [Applause] [Music]

What On Earth Is Happening Show #223

Topics: *Anarchadelphia 2019 Fallout & Integrity In the Freedom Movement, Mark's return to live broadcasting in 2020, Mark's recent hiatus from live broadcasting and the reasons for it, Mark's upcoming documentary "Mark Passio And The Science Of Natural Law," Donations toward the documentary have been very generous, especially from Europe, Mark will be speaking at the Seed 4 Conference in Athens OH, Mark's presentation "The Sacred Gift Of Anger" has been released in WOEIH Donation Gitfs, The complete Mark Passio One Great Work Collection Drive is a new item available in WOEIH Donation Gifts, a Detailed Timeline Of Events surrounding the bad-faith breach of verbal contract with The State Of Anarchy (organizers of Anarchadelphia), how donations from the attendees of Mark's workshop at Anarchadelphia were not given to Mark after the conference because they were used by the conference organizers to fund the conference's expenses without Mark's permission, how we should act in a society based upon the Principles of Natural Law and True Anarchy, problems regarding a lack of Personal Integrity in the so-called "Freedom Movement," Doing what you say you're going to do, Our Word as Our Bond, the only Law of "Don't Steal," an Honorable Mention of those who DID act with integrity during and after the events surrounding Anarchadelphia 2019*

freedom man that's what it's all about [Music] you've got the groove on freedom like a juice box [Music] welcome you are listening - what on earth is happening this show will discuss the topics of human consciousness mind control natural law the occult and all issues that affect the freedom of the people of Earth what on earth is happening will endeavor to shine light upon the darkness of our world and to offer empowering solutions to the problems we face as humanity approaches it's critical moment of choice and now here is your host Mark Pascoe [Music] welcome one and all you're watching what on earth is happening I'm your host mark passio my website what on earth is happening dot-com we are back ladies and gentlemen streaming live at you here every Sunday from 3 to 6 p.m. East Coast time ladies and gentlemen government is slavery it's really good to be back here on what on earth is happening after a multi month hiatus so today on the program we are going to be clearing up a lot of things a lot of speculation and we are going to be telling exactly what occurred following the 2019 an arkadelphia conference here in Philadelphia I withheld this information for quite a while to give the organizers a chance to remedy the situation and when that wasn't done I went on my website publicly made a statement about what had occurred at the conference and you know gave a little bit of a preliminary report just cursorily went over some of the things that occurred but today we are going to go into the detail of what actually occurred before during and after the Anarch Adelphia conference and I just want to say prior to getting into some other announcements and then going through the timeline of what occurred that this isn't what I want to spend my time doing here on what on earth is happening this show is all about trying to end slavery you know we are trying to end slavery one mind at a time here on what on earth is happening we are here to teach natural law we're here to teach morality ok that's what this show is ultimately all about it's to give people some insights into the occult world that's taking place all around them the world of control that very few people unfortunately in our world can see and ultimately it's about really understanding the definitive difference between right behavior and wrong behaviors so we can make informed decisions regarding the moral implications of our behavior and thus create a better shared experience for everybody here on earth that's what this whole show is all about so I don't want to have to focus on unfortunate events like this that were about quite frankly very shady dealings within the anarchist community that's not what I want to have to spend my very valuable time doing okay and putting together timelines such as this is we're going to go over today but I really have to do this because it's a moral obligation honestly because the people who hosted this conference who did not act honorably or with integrity which is what this show is all about this is about integrity in the so-called freedom movement and if I'm dealing with someone that didn't act with integrity and they showed me a lack of respect and they pulled shading shady business dealings who is to say that that will not continue with friends or colleagues of mine that these people may partner with and that's why I have to tell what actually occurred I have to go through things with detail and tell people because this is how things would work in an anarchic society there would be no authority there would be no people going in taking these people and bringing them into a court and putting them in a cage or whatever okay we're against those things we don't want to see that it states involvement that's why I'm not into contracts folks I'm not into legal contracts I'm going to talk about why we didn't do anything like that and I haven't done anything like that since the inception of what on earth is happening only if P other people demanded for my participation in an event you know I'll agree to sign a contract but you know what in my dealings with people I go by my word that's what my bond is that's my bond of integrity I try to honor everything that I say I'm going to do and that's ultimately what integrity and this movement is all about it's about honoring your word and doing what you say you're going to do and following through and then verbally contractually obligated coming to a fulfillment of your obligations that you agreed to and I did that in every aspect regarding an arkadelphia 2019 and unfortunately the verbal agreements verbal contracts that I made with some of the organizers were not honored or agreed we're not made whole so that's what we're gonna talk about here today but you know what I want to do before we even get into that is I do have several announcements so I want to get people up to date with what's going on with what on earth is happening in myself and then we're gonna get into the timeline of what happened you know prior to an arkadelphia and during the conference and after it so let me go right into my slideshow if you want to switch over to the slides this is the awesome artwork that Brett Hatton made for the show we're having a difficult we're having a little bit difficulty bringing up the slides just give us a moment so my producer is gonna bring that up in a moment let's see do you want me to reboot okay there we go sorry okay alright so this is the title card for today's episode this is episode 223 of what on earth is happening and it's entitled an arkadelphia fallout and integrity in the freedom movement so before we get into this whole you know our timeline rundown I'm actually going to also be bringing two guests onto the show okay I'm gonna be bringing my assistant and associate producer Leah Boone onto the show to discuss some of the things that occurred and we're gonna be bringing a former member of the anak Adelphia organizational team and a former member of the state of anarchy Patrick leach onto the show who over this situation and other things up parted ways with the state of anarchy who hosted an arkadelphia 2019 and Pat did ultimately act honorably an attempt to fulfill his obligations regarding agreements that we made at the conference so that's why I'm gonna be bringing Pat on to also I'll give some of his insights regarding what happened so before we do that I want to give some good news the show isn't all about bad news okay the first-ever documentary that I'm putting together with the help of many other talented individuals is going to be called mark passio and the science of natural law this is the first anywhere full-length feature documentary on natural law to the best of my knowledge certainly it's going to be the most informative and comprehensive documentary on the topic of natural law that's probably ever been made again to the best of my knowledge and it is really going great people are gonna love this when it comes out I think it's coming out really really awesomely so we're very well into the completion of this documentary we have now hired a new video editor as I'll be talking about later to finish the documentary we've gotten great donations in from people who really want to see this project completed and I want to thank them for their generosity in their donations because you're really making it possible for us to have a budget for this film finally okay so the documentary is probably going to be out around May as our Ken conjectured release date but do not hold me definitively to that that is our projection and we're going to try to get the documentary completed and released by May of 2020 again if that release date may slip we will see what happens but we're sort of on track for that as it stands right now if you are of a mind and have some extra resources at your disposal and you would like to donate toward the completion of the natural law documentary that we're making here at what on earth is happening you can go to gifts dot what on earth is happening calm you can go to our gift store I'm gonna actually jump out of the slideshow and I'm going to show you where you can do this at ok so you could go to gifts dot what on earth is happening calm if you want to just put this slice back up momentarily there's five donation tiers for donations to for the documentary completion there's tears of $50 $100 $250 $500 and the thousand dollar donation tier will actually will actually put you in these special thanks in the credits on the documentary for that fifth tier 100% of donations are going to go directly toward the production costs for the documentary namely paying an editor and paying graphics people and all donors will receive a complimentary copy mailed to them of the completed documentary on both flash drive and DVD so that beings said let me jump out of the slideshow if we want to just cut away from that momentarily and I am going to go to the what on earth is happening dot-com website and you can jump back into the these yes the computer I'm gonna make this fullscreen and this is the what on earth is happening website now if you go over to the gifts area so if you click on the gifts tab or you click on the donation gifts button here okay you will jump into the gifts website now I've added a new section in the gifts website what on earth is happening donation gets called documentary now if you click on documentary here are the five donation tiers so you can actually add a donation to the basket for the gift cart okay so let's say you wanted to donate $100 you would click the $100 tier this is tier number two and then you can hit add to basket okay so then when you check out you know add a fee okay and then you will be mailed the documentary when it is completed and released on flash drive and DVD and you'll be contributing to the completion of the film I just want to say this has been extraordinarily successful people have been so generous with their resources and so kind to make donations toward the completion of this documentary film I want to thank them from the bottom of my heart everyone here at what on earth is happening thanks everyone who has donated and I just want to say specifically not to belabor this too long but I really am highly impressed with people from the entire European continent for their generosity in donating toward this film I have to say the donations that we received to complete this project I'd say about 75% of them came from Europe so the people of Europe thank you you know I mean IIIi know I gotta kind of get on your guys case especially over the issue of gun rights and self-defense sometimes but in this instance you guys have been super generous and I have to really you know give you props for really coming for stepping up and coming forward and helping me too have a budget for this the completion of this documentary because it was dead in the water after an arkadelphia because of monetary resources that were unfortunately not there but people's generosity have really turned that around and are gonna make it possible for us to complete this film in a timely fashion so thank you so much especially to the people of your people from all around the world donated don't get me wrong but really the people of Europe were extraordinarily generous in this particular effort and outreach to give us some donations for this documentary effort so thank you so much okay that being said let's show people the official trailer for the documentary entitled mark passio and the science of natural law so I'm gonna go over to this is actually in the news section of the website it's also on the home page okay and we're gonna play right from my YouTube channel the natural law documentary trailer number 1 so here it is for the first time the trailer for the documentary film entitled Mark passio and the science of natural law is humanity truly free are there universal laws in effect that apply to human behavior does our knowledge our ignorance of these laws impact our collective freedom as a species natural law I guess you could say just flip almost like first instinct kind of I think it means like how law is interpreted by people aim actually now I'm thinking about it I don't know what natural law means what is natural law it is the secret of all the so-called secret societies throughout human history natural law is a set of universal unchangeable conditions which governs the collective behavioral choices of entire populations the consequences which we receive are always dependent upon whether our chosen behaviors are either moral or immoral these laws are built into the fabric of reality just like gravity and electromagnetism the understanding of natural law is absolutely not a belief system or a religion natural law actually constitutes a science of morality which requires no belief or faith the workings of natural law can be discovered and understood through its observable measurable and repeatable effects in our world the understanding of natural law is critically important to human beings who seek to live in freedom and peace together the freedom or slavery of an entire society is hinged upon whether that society behaves in the aggregate morally or immorally as morality increases freedom increases and as morality declines freedom declines will we continue down the path of slavery watching our inherent rights stripped from us little by little or will be embraced the more principles of natural law the only solution to the human condition of slavery is to spread the understanding of natural law and make it common sense knowledge for everyone [Music] all right so that is the trailer for my first-ever documentary film offering mark pacion the science of natural law very very happy with how it's coming out I think it's looking great visually and I think it's gonna really make a very powerful educational outreach tool for people to understand what natural law is and how it actually works so that's the documentary let's cut back over to let me just bring my slideshow back up and let's cut back over to that alright so again if you want to donate that's up there in the gifts area in the gifts tab of the what on earth is happening calm website I will be speaking at the conference called seed this is the fourth seed conference coming up in Athens Ohio on May 29th through 31st 2020 this conference is being hosted by Brandon and Douglas Martin I'm very honored to be a part of it seed for the subtitle of the conference is ending slavery one heart and mind at a time these speakers they're going to be featured so far as part of this conference in Ohio is myself mark Devlin Douglas Martin Brandon Martin Nate Capp Logan Hart Sean McCann and many more speakers to be added for tickets please visit the seed for website you could get that through skatetopia dot org skatetopia dot org and the tickets are going to be on sale at eventbrite.com under seed for conference so really looking forward to taking part in the seed conference this will be my last public conference that I'm going to be participating in of conferences that are hosted by others unfortunately I'm making that decision because I just want to host my own events if I'm going to be speaking publicly it has worked out much better for me rather than you know the travel associated with going to other conferences and honestly dealing with problems that occur regarding conferences that I just don't basically handle myself and just take care of all the logistics myself and host the event locally so I'm gonna be moving you know to a model of just hosting events locally and hopefully people will be willing to come and travel to Philadelphia to see me speak in person if they're inclined to do so so um you know in the future I'll be having like all-day events of myself speaking here in the Philadelphia area and there's some other surprise announcements that we're going to be getting to in the next few weeks here on what on earth is happening regarding public events but I'll leave that as a teaser and you know we'll we'll see when we could make some public announcements regarding that so that being said out of an arkadelphia one good thing that came about it was my presentation that I gave as part of the event called the sacred gift of anger this is now publicly available in the donation gifts area of my website you can get that on DVD pictured here in the slideshow this is how the cover of the DVD and disc came out and you could also get that on flash drive now I always recommend the flash drives personally I think things are moving more in that direction and more less people are going for DVDs these days because of the flash drive we'll have the video in Full HD whereas the DVD you're going to get a little bit of a diminished quality because it's on in DVD format which is you know kind of mpeg-2 stream and it's not as high definition as you know the full mpeg-4 video that we put onto the flash drive so you know in the if you're up to speed in the modern technological area I recommend going with the flash drive this is what the flash drive basically comes what it looks like it's a nice modern blue swivel flash drive 16 gigabyte and then you have the little keychain tag tacked on to it with the cover of the documentary and there's a little description on the back so those items are available in the what on earth is happening donation gets area at gifts top what on earth is happening calm another great thing that we added to the gifts area and I really want to let people know that this is a really great value and I'm telling you like a lot of people have taken me up on on this and are picking this up in the gift shop because we decided you know what if people don't want to get the documentaries or the I'm sorry the presentations that I've done the in a piece mail what piecemeal way okay what if they don't want to like get one flash drive at a time as presentations come out well this is the opportunity to basically get all of my publicly released works in one place we call it the complete mark passio one great work collection okay and it's everything that I basically ever put out publicly okay so here's what this Drive includes this is the cover art okay and then on the back of this on the keychain that's attached to the drive as I'll be explaining this is what's actually on the Great War Collection Drive all publicly released presentations that I've done with all of the associated presentation slides and high quality JPEG format all archived interviews that I've done over the years from 2009 to the present along with some ancillary videos and the entire one on earth is happening podcast series and show series the video show series with associated images for each podcast and associated reading materials that I've talked about in the podcast and then of course you have my band the founders are my anarchic anarchy hardcore punk Anarchy related hardcore punk band called the founders we released an EP a couple years back called no masters no slaves you get that music with all the ancillary materials that come on the flash drive for no masters no slaves EP all of that is on one 500 gigabyte solid state drive and this is what the drive looks like so this is the tag that comes on the keychain that's the back of it this is what the drive actually looks like and this isn't doing it justice for how actually cool it looks and how small it is you can't believe how small this thing is you just look at how large the keychain is that's a little keychain tag okay basically this thing is fast too I mean it's a USBC drive and it has an adapter for USB 3 but um this thing is an extremely fast solid-state drive and the aesthetics of it are great now that the cost the donation that we're asking for this is 333 dollars on the store I'm gonna take you to the store and show you where you can order this on the store but people would think well that's a lot actually this drive like retails for about $100 a little less than that but then it's like if you bought all of the if you donated for all of the other presentations alone it would cost like over $500 I calculated if you got all the things that are available on the donation gifts area that are on this Drive you you would be donating five hundred seventy dollars so I'm plus there's much more than that on this drive that aren't is not up there you know with is as far as interviews go in ancillary videos and audio so really the value is even beyond just what's up there in the form of individual presentations that if you bought them alone would be about five hundred seventy dollars so we're basically offering this drive plus a whole lot more material and you get the drive you know in a nice case that the drive comes in as well and that's about a 40% discount I think it's like a forty two percent discount something like that so I think that's a tremendous value let me step out of the presentation momentarily and I want to just show you this right on the water on earth is happening calm gifts area so let's cut over to this this is an article about the sacred gift of anger okay showing that it has been released on DVD and flash drive but if you click into gifts here and you look at the new another new section that I added over the holiday season there is the passio collection okay so the passio collection drive has just one item in it and if you click on this here the complete mark past year one Great War Collection that will take you to the product page and this is where you can check out the information about the what is on the drive and you can get the drive dimensions here and the weight of it it's very very small and thin and weighs hardly anything it's it's it's an amazing product so I just wanted to let people be aware that we are offering that and that is up on the gifts area as we speak so let's go back to the presentation slides and continue all right so we're going to get into the main topic of discussion and now it looks like we're having a technical problem if people can just give us a moment I'll have my producer check that out what is what is the issue yes we're having a problem with a mic audio sound a little bit of a distortion coming through so he wanted to reposition or mic stand is that sounding better okay great all right so let's let's get involved in the actual timeline description of what happened in the an arc adelphia debacle because this really hurt us here at what on earth is happening and kind of put us out of commission for a few months honestly and I got to tell people some other things that were going on personally at the time as well that I had to take care of that really set me back financially quite a bit and again thank God for the generous people who donated toward the documentary and helped us get back up to operational speed here at what on earth is happening we couldn't have done it without your generosity so it's great to be back on the airwaves and and doing this work again and again unfortunately this is what I want to be doing I want to be giving people philosophical discussions and information I want to be talking more about natural law I want to be talking more about health and nutrition etc okay building ourselves up and building our our minds up and those that we care about in our communities that's what we really should be working on okay this is an unfortunate thing that I have to do to basically out people who have not dealt and presented themselves with integrity in this movement and this movement should be all about integrity and it should be all honouring our word as human beings okay we don't want to see a police state we don't want to see a government at all okay but if we're going to arrive at that condition of humanity we have to elevate our consciousness and we need to really honestly behave with right intent and with right behavior okay and it's very sad to me that that was not done by people who I considered actual friends and people who I considered were we're anarchists and all of that got brought into question we're gonna explain I'm not gonna give my side of the story here folks people will say well I'm waiting to hear mark side of the story you're not gonna get my side of the story here today you're gonna get exact facts that constitute the truth of what happened not my perspective of what happened but exactly what did occur okay so let's jump in here with a timeline of events okay and again after this I want this topic dropped to be honest I don't want this belabor I don't want it going on anymore I am giving this to people to make them aware of what occurred so if they decide to deal with individuals who have not acted in a trustworthy capacity in dealing with me they can take a very cautious approach in doing so because I'm giving them the information about how they dealt with me personally in this series of events so that they can be forewarned that perhaps they're not operating with the best of intentions okay so in February of 2018 that's where my dealings with Carmen chironji and Sonny Mazzone of the state of anarchy which is what they call their group and their YouTube channel and their website began so I met Carmen and Sonny from the state of anarchy at the Anarch apoco 2018 conference in mid-february of 2018 okay I met them about a couple of days before I was delivering my presentation so it was around right in the middle of the month February 15th it might have been the 14th not quite sure the exact date but it was right in that area so pat leach who became the third member of the state of Anarchy team and organ organizer of the a dark adelphia conference along with Carmen and Sonny also met Carmen and Sonny at the same event and he also met Mike Martin who was who would become an early donor for the natural law documentary project pat met all of these people at this event we were going to have Mike Martin also on the show and I will get to what his role was in a couple of moments but he was sort of uncomfortable and I didn't really want to press the issue and make someone come on and publicly do a show without you know really feeling comfortable about it so I kind of like dropped that idea but will tell you what his involvement was and what happened and how he kind of became a individual who became like the center of a little bit of controversy over a very controversial thing that the state of Anarchy tried to say happened regarding my quote payment for the event my compensation for the event so I presented anarchy in the occult what anarchist is nor what anarchists ignore is killing them this was my original presentation at that event and there is the title card for that presentation so this is where it all began at an arc apoco this is where I met the involved individuals so let's move on in the time line and uh you know what as a matter of fact let me just jump back there because this is a good time let's bring on both Pat Leach and Leah Boone now I'm going to have to put my headset on now and I'm gonna go into the discord room because that's where I'm bringing them in through so we'll also hopefully be getting the calls if I can get through all of this material in a timely fashion so if you want to call into the show you could do that through the discord room and you could get that link through my website what on earth is happening dot-com slash show so let me jump into discord and I'm gonna bring in Leah and Pat so here we go okay so Leah are you there yes good you're sounding good thank you and let's bring in Pat are you there Pat I believe your mic is muted so just unmute yourself please hold on Pat are you there yeah there you go you did great thank you all right so uh Leah and Pat are both in and I think that's coming through pretty clearly over the airwaves okay so I want to continue with the timeline and then I'll be going to you guys asking questions and if you really feel the need to jump in you could also jump in okay okay so let's go back to the slides for the next part of the timeline sorry I have to hit play there okay all right you could jump back to it there we go all right so April to July of 2019 is when work on my natural law documentary began in earnest okay so how the documentary began was conceptualized was like this Craig d'Ovidio who is my longtime friend of about 24 years or so and a teacher he was a former teacher now unfortunately at the Art Institute of Philadelphia which has since now closed due to our funding problems I believe he proposed to me to come to the Art Institute because he's a video teacher there he's a video production teacher or he was to work with his students in his video class where they would be doing a project as part of their assignments for the semester of helping a client to build some sort of a video project of you know a small short form documentary you know a commercial something of that effect but whatever the client wanted it would be the students would be tasked to making a video and bringing that video to completion so that the client was happy with it and then they would receive their part of their grade based on that assignment I thought this was an awesome idea because not only would I get like a short form video out of it but would give this students some experience in dealing with a client and you know maybe I could even you know teach them a little bit of natural law in the process to you know teach some young people okay so I agreed to do this and Lia and I went into the Art Institute and started basically working with Craig's students in his video production class so at that point it was probably around April of 2018 the natural law documentary was conceptualized and I myself and Leah Boone started writing the narration script for the film okay so a preliminary round of person on the street interviews was filmed by the students as part of the project and then visual storyboarding and image and video selection was begun for the natural law documentary around this time then preliminary recording of my monologue was filmed at the Art Institute of Philadelphia we ended up not going with that because I really wasn't happy with it aesthetically and then you know the project grew and morphed and became something even bigger at the late at a later time but this is where it was basically in its infancy and began and this was largely due to Craig's offer to come in and take part in this video production class okay so let's move on and I'll just go to Leah real quick do you want to add anything to that a very brief introduction to how the natural wall documentary began or is that a fair assessment I think it's a great assessment and I just want to point out all that this was at least four months of work just getting it off the ground okay yeah you have that up there yes but I want to point that out absolutely so we put a lot of work into just the beginning of what this documentary was going to be about what was going to be included in it and started getting the images and video together to include in the documentary timeline okay so that is the early stages of the natural law film project July through December of 2018 the work on the documentary continued and you're gonna see why this is important okay because it involves Carmen of the state of anarchy and also Pat okay so July through September Leah completed the images storyboard folders we were putting basically storyboarding out the whole script and then selecting imagery for different paragraphs of the script for the timeline and then organizing those into project folders and Leah was working on that as my assistant organizing all of that media in July 2018 Pat leach met me for the first time in Philadelphia after I watched his vegan activism video and I wanted to meet him okay so I believe it was my you know former partner barb who arranged that meeting through our mutual friend Steve and I met Pat here in Philadelphia that was July that was summer 2018 in August Pat was beginning shooting small promotional videos of me doing daily work here at what on earth is happening and just you know brief interviews so I'll promote my website and also you know getting that into the state of Anarchy x' youtube channel he published that footage on their youtube channel and that helped their viewer subscription and subscribe their viewers and subscription rate etc so it was a mutually beneficial you know little projects that Pat was helping to do so that was going on for about a month and then in late August August 21st Pat decided to bring up that I was doing the documentary to his friend Mike Martin who he had met at an arcade Poco 2018 and he asked him about the potential for Mike to fund the natural law documentary and Mike agreed to start funding the project and he was going to start paying Pat and Carmen for shooting and editing the documentary so shooting whatever you know video needed to be shot in high quality and also to actually be laying the film and images and an audio into a video editing program and I was creating a timeline and editing that you know until the documentary was in good form and completed so Mike Martin became the donor for the film in the early stages of the documentary in early September of 2018 I'm sorry about a 90 a week after that Mike in a conversation with me told me that he would be funding the film so Pat originally set that up and later you know less than a week Mike and I had a conversation and he actually told me he would be the donor working with Carmen and Pat and I said fine that's awesome and thanked him and we moved on so in early September of 2018 me and Pat started structuring an actual layout in the editing timeline like an idea of what how we would put together a timeline for the film and we were going to reshoot the the actual script I would read the script and uh you know we would shoot it here at my place with a better camera and a teleprompter so on September 12th Pat reshot my personal monologue my part of the script but the shooting had an undesirable an undesirable outcome I didn't really like the background or the the harshness of of the way the film looked so we really wanted you know I wanted to shoot it again after that because I really wanted to have it visually look a particular way and you know plus I believe one of the reasons I eventually has to reshoot it yet again was the the teleprompter that I had wasn't great quality at least to me it wasn't good enough and I was still looking into it sort of sideways and I couldn't really look at the camera and just like read the script and not you know just seemingly just focus on my words so I looked distracted and you could see my eyes moving as I was reading it I got a higher quality teleprompter at some point there with very generous donation from an individual and we reshot with that teleprompter as I'll explain but in October October 23rd Pat shot the new person on the street interviews that are in the film assisted by Carmen November 20th Pat reshot my monologue yet again using a new teleprompter and that's the footage that's ending up in the actual documentary because it finally came out aesthetically how I liked it okay so that being said December 2nd Pat relocated to Costa Rica he was living in the

Philadelphia area for a while and he eventually moved and left and went to Costa Rica okay so let's move on to the next slide all right yes just to point out funding of the documentary was exclusively paying Pat and Carmen at this time that is correct Mike was not giving me funds for the film he was not confirm me I was on a hiatus at this time due to my death in my family is right so no one was giving any money to what on earth is happening for this Mike had arranged with both Carmen and Pat to pay them directly for their contribution and they would basically invoice him for hours worked upon the documentary at that point at some point Mike realized that that was not a good way to operate and decided to change his mind but we will get to that okay so this is the proofs these are the proofs of the payments made by Mike Martin that he agreed to allow to be shown without any personal data being shown regarding his accounts but these are bank statements regarding how much money was actually paid to Carmen and Pat in the early editing stages of the natural law documentary so in August of 2018 400 dollars was paid to Carmen 400 to Pat in September 400 to Carmen 400 to Pat in October so this is the August and September a bank statement here shown in this first slide okay the later September into October statements are here so you have October $800 went to Pat which he gave $400 to Carmen in cash and then in December was so this one is for September and October this statement here shown below okay then in apparently there was no November payment because they didn't get nobody got paid for reshooting Pat you decided that that wasn't going to be something you charged for great no also when I had to talk to Mike generally I had never you know it wasn't me and Carmen doing this I was doing it by myself but I was living with Carmen was with him for two months so I wanted to involve him because of the state of energy month not and what we were doing and he you know he's gonna Mike he knows Philly so it was it was good to bring him out and you know he did assist me it was it was helpful but yeah the first thing that was directly to me for $800 and i paged carmen half of that for his participation and then Mike I asked Mike to separate the payments from there on out and I was paid another $400 for the next month Carmen just paid 400 and then I feel terribly guilty for turning the editing over to Carmen but I just wanted people to know that I'm not a Philadelphia native I actually lived four hours north and I was only relocated to Philadelphia to help Carmen and sunny with a documentary they wanted to create called the state of anarchy which never got around happening so he's ironic that I met you and then this all came about and I'd like to say that I'm actually degree in film and video production so I know what I'm doing when it comes to this stuff and I'm not just some guy trying to like take money or whatever I don't take myself for my skills to produce great quality stuff and mike is actually expressed that the 800 well the 1600 original payments while I was still involved financially I suppose was money well spent okay and then uh Carmen I would agree with that I actually had to cut this funding up because three months went by I was actually in Costa Rica and I talked to Mike and I was like oh I just paid him nice so let's let's get let's let's get to that in a progression in the timeline so let's let's talk about that now so in early December of 2018 Carmen actually took over the actual editing of the timeline project in the editing program called DaVinci Resolve okay so here this is when he actually became the main editor of the project okay and that means can we just say what that means that means he was going to take the footage of the interviews the footage of the monologue and all of the images and you know video that we had up to that point and put it into the timeline arrange it and you know create the actual documentary that's what the editors job and as the executive producer I oversee that process as my associate producer on the whole documentary Leah's job is to implement my vision by working with the editor and then showing me cuts and then I make changes based on what I want to see happen on the screen and then she helps to implement that with the editor that's how the process works okay I was not micromanaging this project at this time I was just saying what I basically wanted it to generally look like and giving some images that I wanted to see and allowing Leah to you know pick some images as well and arrange them into storyboard folders etc okay so this is how we were working at the time and basically the editor just you know with the software you know works the software to bring the vision that we're trying to bring onto the screen that's that's their job okay so Carmen took over the main editing at this point and he asked for now to be given nine hundred dollars a month by Mike Martin who agreed to that fee so Mike paid Carmen nine hundred dollars each month December January and February it's December 2018 January 2019 February 2019 are the PayPal statements shown by Mike Martin's PayPal account okay so the this is the money sent from Mike Martin to carmen chironji February 4th January 7th and December 17th so December of 2018 January of 2019 and February of 2019 those are the three payments again we're we're glad to have these screen shots we don't want to compromise anybody's accounts or anything like that we didn't want to show any confidential or personal information here we're just showing proof that this money was indeed paid to Carmen as it was agreed okay so he was working independently for those three months yes and we're going to talk about the results of this in a moment to show you what you know ended up being the fallout of this and what Mike thought about you know the money that he had spent okay so the totals here are Carmen received for editing the project from Mike Martin $3,900 and Pat leech received $1,200 from Mike Martin so that's the payment and and the way that it worked out monetarily from Mike Martin our early donor for the early documentary shooting and editing okay so let's move on to the next slide in the timeline yes technically 40 40 200 the Carmen 800 to me okay so why would you say him I gave him $400 of the first initial payment I say okay under dollars per got 4200 so Pat say technically Tori's an additional right because we don't have that that statement there was an additional 400 okay okay 400 you have on there 3200 1200 for me 400 and that that's accounts oh you're saying out of the 1200 that that you collected you gave 400 of that to Carmen yes okay all right okay so then that the total should be 4200 and 800 okay all right so in February of 2019 here some of the events that transpired February 4th 2019 to this point only 15 minutes of the documentary timeline had been completed Mike Martin expressed to Pat that he is disappointed with Carmen's performance as the main editor on the project which he took over and considering the amount of money well he's disappointed in his performance considering the amount of money that was spent versus the actual amount of work that had been completed on the dock up to that point so Mike was not happy about how much money he had given to Carmen versus how much Carmen had actually completed of the documentary timeline when when he saw that the timeline had only been worked about 15 minutes into the film he was like I've paid you this much money and this is the amount of work that you've done and you know he wasn't happy with that but I don't think he expressed that directly to Carmen I think he expressed that to Pat and then eventually Mike expressed that to me I wish he would have done it a little bit sooner but you know he was I think giving Carmen the benefit of the doubt and seeing how this would progress this work would progress and um you know at that point I think Carmen was starting to just basically you know kind of drag things out a little bit okay so Mike was basically saying he wasn't happy with the money that he spent toward Carmen February 15th 2019 I met up with Carmen Sonny and Pat again at Anika Anika poco 20:19 okay so this is the slide title card of the presentation I did there in Acapulco Mexico this was a anarchy in the occult part to religion versus an initiation I also gave a workshop at this conference okay and at the conference right after I came out of the main arena you know of the main hall where presenters were speaking after I had delivered this presentation anarchy in the occult part two I did an interview on film with Carmen for the state of Anarchy website and we talked about what was going on at Erika poco and we talked about general things in the freedom movement and Carmen at the end of that interview near the end of that interview asked me if I would be willing to come and speak into a presentation at an arkadelphia which was going to be his inaugural presentation here in Philadelphia so he asked me to participate and I agreed to take part in the conference and do a presentation at the conference so then February 16th which was the next day after I spoke I was going to lunch at Attica poco at a little place that they had set up in the retreat there in the not the retreat like the hotel area the you know the the villa it was called vegan Verde Verde vegan actually and a good vegan food so I was sitting down there with a few friends talking and Mike Martin came in he came over to my table at lunch and we started talking and he was telling me how dissatisfied he was with Carmen's progress on the documentary and this was kind of really just the first time I'm hearing about this in full and the details of how much he had given him and because again no money came through me at this point I was not given money to fund the documentary the money was being given by Mike to other people as long as they continued to put in working the documentary and log their hours etc and he was paying them so Mike told me that he really should have given the money directly to me at that point at this lunch discussion okay so Mike decided then and there at the table he said that he's going to temporarily hold off on giving any more money toward the project but he said if he decided at some future point to contribute any additional funds toward the documentary he would only give funds directly to me and no one else and then I could allocate the funds at my discretion telling me about that yes as opposed to giving me funds directly to any other people who happen to be working on the project he said Marc I'm only gonna give it to you because you'll control you know what's being done and what's gonna be done with this money and you'll put it toward where it really needs to go whereas if I'm giving it directly to other people I don't really know whether they're really serious about what they're doing and doing the right thing and actually you know doing the amount of work that you know they should be doing for what I'm giving them so he said I'm only gonna give it to you and I know you'll do the right thing with the money so that's what was agreed at the lunch table the day after my presentation Anika poco 2019 so he said if he had given them to you it would have been done already the editing would have been done I think that's a very generous statement on his part I think you know this takes a lot longer than most people think okay but you know I I think what he was trying to express was he knows I would handle the money honorably and things would not be stretched out for to a ridiculous extent okay workwise okay so let's move on in the timeline April of 2019 Carmen asked me this took place right in the room where I am at now which is my bedroom slash home studio okay Carmen asked me in this room when he was continuing to work on the documentary timeline on his laptop in the program DaVinci Resolve he said can we debut this documentary at the conference that I'm hosting at Attica Delphia 2019 in September and I was just I almost like fell over honestly okay I was like that's five months from now right it's five months so it was April this was like probably early April May June July August September that's less and it was in mid-september the conference so that's like five months okay less than five total months I said there is no possibility that this documentary will be in any kind of condition to show at the conference in September that's it it is so overly ridiculously ambitious to expect this to be a some sort of a Polish documentary project by that in that timeframe that like I didn't know whether to like fall over laughing or like be like you know really are you nuts like that's crazy to expect that that's how fast we would be able to complete this to me because I know how long these things go I know how meticulous editing is I mean I'm no stranger to video editing and audio editing myself right so I just thought that was way overly ambitious of a time frame to set okay especially since you know things go wrong you know things come up in people's life you know and it's it's 2020 and it's still not out officially okay yeah we still have at least a few more work months of work on this as far as I'm concerned for me to get it to where I'm proud of it and I and I think it's polished and I wanted out at least a few more months of work okay so at that point I really knew that we were nowhere near finishing it and I said no I'm not gonna allow you to screen this at the at the conference it's not gonna be ready in time so he's like like oh not insisting but he's like practically like begging me please let let us let me do this he said his words I didn't put it here on the slide but his words were it would be a great selling point for the conference he said that right here in this room to me okay he said this will be a great selling point for the conference okay people want to come to see the debut of your documentary will premiere it there and I said look I appreciate you wanting to do that but I don't think it'll be ready in time I think it's way ambitious of a time frame to set and what Carmen did at that point is and I also told him we have no funding for this now the main funder is not contributing any more funds who was doing that so it's like I can't really afford to continue to pay you you know you're wrapping up work that he already paid you to do essentially and I don't have the kind of money to pay a video editor at this point at that point I did not have the funds okay eventually more donations came in and I had some more funding for this project but you have to realize like you know I don't make a whole lot of money to you know just hire people to do work that's why I ask for volunteers here this I you know the few you know things that people order through the gift store you know if I showed you the numbers and you said could you live on that most people would be horrified okay and they'd be like hey that's what you're living on you know yeah that some PayPal donations crypto donations and donations come in for the Ark Drive offer okay so you know when people see what I actually pull in and what I have to use to live on and you know basically make rent utilities eating etc and fun what on earth is happening you know most people are like I don't know how you could live like that so at this point I really had no funds for this okay to pay an editor thankfully now we do we have a bit of a budget a bit of a surplus and a budget to fund an editor and get this finished but at this point we had no funds coming in for this project okay so what Carmen said is you don't have to pay me anymore okay so he he got money from Mike and he's like you don't have to give me anymore he's like I will complete the documentary on a volunteer basis he said that to me right in this room in April of 2019 okay he said I know the conference is five months away but he's like I will complete this project on a volunteer basis for you and if I do so then will you allow me to screen it at and arkadelphia and I said you're gonna volunteer to finish this and get it in good shape that I'll be proud of it to show at the conference and you're gonna do that on a volunteer basis not expecting any payment from me for the completion of that work and he said absolutely if you agree that I can you know promote that we will be screening the premiere of the documentary at an arkadelphia so under those conditions I agreed to allow him to promote that as a selling point for Anika Delphia and we then eventually at some you know future point a couple of weeks from then made it public we went public with the fact that we would be premiering the documentary at an arkadelphia 2019 so I agreed under those particular conditions so at this point Carmen then became the main editor for the project under purely voluntary circumstances he did not expect payment he taught he asked me to in exchange for volunteering to complete the work on the editing of the film to allow him to screen it as part of an arc adelphia and I agreed to that okay so after that occurred pat then offered to take over the editing of the documentary also on a volunteer basis but Carmen didn't want to do that and he wanted to continue to be the editor of the so we you know decided we'll stick with Carmen and Carmen continued editing the film with Leah as the Associate Producer with myself as the executive producer looking at you know incrementally time frame changes timeline changes that they had made and then making suggestions on what to change or improve telling Leah implement that and then Leah working with Carmen to implement my changes okay so me myself and Leah then had several meetings with Carmen and Pat discussing logistics for the upcoming an arkadelphia conference I acted as an adviser to Carmen impact based upon my prior experience in organizing conferences I was the main organizer of for your mind conference one and for your mind conference too I then handed that over to other organizers and I acted in an advisory capacity in for your mind three and four but I was the main organizer and for your mind one and two Sonny unfortunately never took part in any of these advisory meetings for the conference and I'm not gonna get into a whole lot of you know what was discussed there but I just wanted to try to give them some pointers to help them to avoid pitfalls that I had seen come up in for your mind one and two while I was organizing those conferences and some things they took my advice on uh some things they did not and that's fine that's okay they wanted to do certain things their way and I said I'm not trying to tell you what what to do I'm just trying to offer you some friendly advice because I've done this before and I you know tried to suggest some ways that they perhaps could better budget and save money and also things regarding a hotel which there was sort of a problem with the first hotel they were going to recommend it was very subpar and I tried to dissuade you know continuing down that course and eventually they you know just recommend that a different hotel and continue to do the conference at galdós catering hall the galdós entertainment center it's called okay so these were advisory meetings we only we had a few of them a couple of them here in my in my place some of them are even by Skype and just to you know help them move the conference to in a successful direction that's all okay so let's move on in the timeline and go back to the slides please so in June through August of 2019 I propose the Carmen and Pat that that I would like to host a teaching natural law workshop at an arkadelphia so I said there's gonna be a lot of people coming in for this conference it's in Philly I'm from Philly it would be very easy for me to bring my equipment and host the workshop at the conference so everybody thought that was a good idea nobody complained or said no we don't want to allow you to do a workshop so I did say well I'm gonna make this sort of a you know really hell hands on how to do things what you know software you're gonna need to know what equipment you're gonna need to know it's gonna take me a day to go through a lot of this stuff I'm like I needed several hours ok so I said I want to give it in like two three hour sections we'll do a lunch break in between ok so I needed six hours for the workshop whereas you know I did my you know main speech my main presentation at a Newark Adelphia the sacred gift of anger I believe it was around an hour and a half okay so when they heard that it was gonna be six hours or like well we don't want to do that during the conference because it'll you know overlap other things I'm like I agree I'm like why don't we do it the day before or the day after so Carmen said it would be probably be better to do it the day after the conference and that they were gonna get Papi's Italian restaurant which is down the street from Gauchos catering and rent that and that would be where I'd host the workshop and we agree that they would sell the tickets on their website so let's continue on in the timeline so June of 2019 Carmen Marc and Leah participate in a phone call during which it has agreed that Marc will forego a speaker's stipend for the conference and will only keep the proceeds for his workshop as his compensation for participating in the entire event now let me say this one more time okay me and Leah got on the phone it was actually on Liz cell phone and she we didn't do this via Skype Leah called Carmen on her phone and put him on speakerphone okay and we discussed what was going to be the financial arrangements for me okay so this was a verbal agreement by phone okay now we're gonna talk about not having a contract because I don't really believe in legal contracts personally okay I don't believe in the right of the state to exist from a moral perspective so why would I believe in the legality of legal contracts so all a written contract would do for this whole situation was we would just have written proof and signed proof in writing that okay this is what we agreed to as far as I'm concerned that's no different than a verbal agreement made via phone via Skype in person doesn't matter okay there are people who will you know have this legal disagreement with that but quite frankly I don't care because the whole idea is again if you're gonna live in a state of anarchy then your word needs to be your bond and you need to act honorably with your agreements with other people okay that's all it comes down to folks then this is the crux of the matter okay so this is a very important part of the timeline right here okay so me and Leah write in my office in the room right down the hall from where I'm at right now okay sat in my office ah I believe this was on a Tuesday that's when we usually get a lot of our logistical dealings done in the office okay it's the day we prefer to work and we called Carmen and we said well we have to talk about what's gonna be marks compensation for taking part in the conference so what do you want to do you know do you want to get you want to do a speaker stipend I apologize I just bought my mic do you want to do a speaker stipend you know and maybe a breakdown on the workshop and this is what we learned that he was offering other speakers okay and well I I said you know well we don't know how many people are coming to the world will be coming to the works I mean it might the workshop might be a bust it might be successful I might get hardly anybody okay because when you know they're already coming for the conference or you know paying to see other people's workshops etc I didn't know how many people were gonna be attending my workshop I figured maybe 30 or 40 people would come to my workshop okay and we'll get to those numbers in in a little while but basically we were talking about how are we going to arrange what monies that I would get for participation so Carmen gave us two choices he said well some other people are doing some other speakers are doing a workshop and we're gonna do a split on the workshop but we're gonna give them a stipend for speaking so I said well you know what would be my other option and he said well you could just not take a stipend and we won't pay you at all for your involvement in the conference so you would speak you would take part in the panel discussion and you would screen the documentary and you don't get anything for that from us from the organizers but you could keep your workshop and this was sort of what happened at one of the Anika poco conferences and then another one we did a split on the workshop the I think it was the first year I kept my whole workshop or the second year I did I can't remember exactly which way it was but one year it was a stipend and a split and the other year there was no stipend and I kept the workshop so I said why don't we just do that like don't give me a stipend I'm not really concerned about being paid to speak you know just I'll go and speak do my presentation for free we'll screen the documentary on you know beyond the panel discussion so all of my conference proper participation in the three days for the conference the 13th 14th and 15th I'll just you know there'll be no stipend for any of that and I'll just do that for free and then we just host the workshop at Poppy's and I'll just take the tickets that sell for that that's it that'll be my compensation will just be my workshop sails and Carmen said that's fine that's gonna be your deal for the conference and we agreed at that that day okay I don't have an exact date but it was a Tuesday in

June okay of 2019 where that happened so yeah my producers trying to get my attention again is there another problem okay so um so now here's a big point of contention and a problem regarding this okay the problem turns out that Carmen did not make his other organizers aware at this point that this conversation took place with Leah and myself and they were under an assumption that I had made a similar arrangement as other speakers as we're gonna get to okay so I wanted to ask Pat right now at this point Pat Carmen did not tell you that we spoke with him in early June and made this arrangement for no speaker stipend but that all that I would receive would be my workshop ticket sales is that correct right right and I want to step back where you said Carmen told you that we were offering because there was a universal deal with made within the three of us that all shout all workshops would be split 75 25 75 to the speaker okay and then he told you that we were giving all the speakers of stipends because that's that that's not true okay well he basically said your options are and similar to other speakers a stipend for speaking plus a split on the workshop no figures were discussed for the split or the stipend okay so he say we give you a $500 stipend or $1,000 or $2,000 stipend you know like I've gotten stipends to speak that were you know a couple hundred dollars and I've gotten three thousand dollar stipends to speak okay so he gave me no figure on a stipend nor did he tell me any percentage breakdown for a workshop breakdown he just said the options are similar to what we're doing with other speakers a stipend plus a workshop breakdown or a no stipend and you get to keep your workshop so I chose the latter alternative and I said I would rather forgo a stipend and only keep my workshops in ticket sales and he said okay that's fine then that will be your arrangement and look if there was no agreement I would not have agreed to even continue to take part in the conference because I would be walking in blind to a conference regarding what my compensation was going to be for my participation like it would be like you know I didn't even bother to have that discussion well it likes first of all it would if me Leigha any of the other people who were helping with organize my role in water as water if it's happening in the conference in the anak adelphia conference i mean do you think we would have went into a conference with a totally open-ended non known agreement so Leah are you in agreement with what I'm saying here that we knew that day this was our agreement for participation in the event Leah are you there yeah you know that agreement was something that you know we we built all of these other projects on top of you know we were just going forward at that point we were trying to get all this content created for this conference based upon that agreement and I had another conversation with Carmen in the summertime where we discussed that again I had a separate conversation personally with him that mark was taking the money from the workshop and Yoshi was encouraging a speaker and he never objected or disagreed to that during your private conversations no okay so we are in agreement that we were all in agreement that this was the arrangement that was made verbally through that phone call in the office on a Tuesday of early June it was either the first or second Tuesday as I recall if you don't remember the day but also splitting hairs the venue wasn't decided yet popular came in very late into the game right the venue we didn't know where we knew it wouldn't be at the conference proper at

Galdos but we knew it would be another day outside of the conference proper okay but we agreed that I would be taking no stipend to speak and I would be participating in the conference proper for free and then I would be doing my workshop as an ancillary addendum to the conference okay billed as part of the conference but it would be at a different venue somewhere else we all agreed to that is that correct yes okay so I was Carmen was solely in charge in terms of negotiations with you I'm under the assumption he's editing with you guys lived three blocks away other he's taking the lead on everything regarding new even albeit a very huge position but I was in handling terms in negotiations with every other speaker which was a 25/75 split any of them as a reference can you talk to anybody then they'll go bad for what was going on so that's a good point you're in charge of dealing with everybody else and Carmen is in charge of dealing with us and we're working with Carmen at marks house on a weekly basis at this point he sees us every week right so this particular day he was not there editing and so Leah and I were working in the office on other logistics for what on earth is happening and we decided let's call Carmen and see if we can work out what the financial agreements are going to be for an orchid elfia that's what we did and that's when Leah said okay I'll get him on the phone and she called him and put him on speakerphone and that's when we hashed out all of these details conditions for every other speaker well no one was paid for anything okay you know they were flown out and accommodated and in a workshop they were given 75% of the workshops okay you told me that a few days ago and I had no idea none of the speakers copied this court goes in and out a little bit is that normal I'm hearing you fine it might be on your end with how you're setting them that's why I was saying before I thought it was our that Carmen told you that was giving buddy a percentage plus a stipend because that was inaccurate that was not what happened okay everybody was just being brought to the paid to get here and you know fed and accommodated and taken care of like that all right well thank you for adding that detail to that all right so let's continue on in the timeline later in June 2019 it has agreed that the tickets for marks workshop would be priced at 120 dollars and would be sold through the Anarch Adelphia conference website with an understanding that those funds would be held in trust for mark by the state of anarchy so the state of Anarchy would sell the tickets on their website to not split tickets over two locations or websites okay they would sell the workshop tickets through the state of anarchy website and that money would be held in trust for me as my payment for compensation for my participation in the whole conference and allowing you know the documentary be screened and taking part in the panel discussion etc okay my whole compensation for the conference would only be whoever attended my workshop that's what I would get okay also mark I I don't know if this is timeline but I asked Carmen I said Carmen do people who want to buy workshop tickets have to buy concert tickets I remember this conversation that's correct so Leah specifically asked because we wanted to put it on our copy our arm you know description of my workshop we wanted to let people know whether or not they would have to buy conference tickets at that time Carmen said no they don't they can buy workshop two tickets separate from conference tickets we said okay we're going to promote that fact on the copy that we put out regarding the workshop and we did we wrote it's still probably up on my website maybe I can't even find it hold on a minute it was always it was always like that - I don't know if he said something said something to you otherwise we didn't know out of courtesy we wanted to make sure that we were you know going along with everything everybody was on the same date I want my producer to switch over to my website real quick because I want to show people there is the preliminary statement that I made which doesn't have all these details in it in the news section of what on earth is happening so I actually still up on the homepage as well okay so if you scroll down on the homepage right underneath sacred gift of anger is statement by mark Bastille regarding an arkadelphia 2019 conference mismanagement that's the preliminary statement but I want to go back to the website into the news section and just show people where the workshop details were at just to make this one point I'm going to scroll down here to where the workshop is at okay here it is when we were promoting the workshop this is the article on the news section where we were promoting the teaching natural law workshop at an arkadelphia the day after and here's the graphic that Pat made okay and then under here it has you know the details and where it would be in the in the amount and said click here for tickets that would take you to as you see in the URL there at the bottom left the state of Anarchy website to buy the tickets for the workshop and then under there we put note you do not require a ticket to the main conference to attend marks workshop this was absolutely verbally agreed to by Carmen okay so they're not because that graphic actually is not the graphic that I made that remember the one that Carmen changed the font and overlapped your picture there oh yes right okay but you did most of these graphics originally did you not but that's my job right I mean it so he actually you're saying with the powers listen there was a power struggle between us okay me and Carmen don't like each other we haven't liked each other for a long time and Sonny took a back seat you're saying let's hope at this graphic which you were supposed to basically know in charge right yeah it was your job but he basically came in and and okay okay all right so what garbage so in general what were the point we're making by showing this here is that you didn't need a ticket to the conference proper just to come to my workshop okay and we asked Carmen if they did not want it like that if they wanted to make it so that you could only attend my workshop you have to have a conference ticket and he said no we're letting people come Alucard you could buy that ticket ala carte from the conference you do not have to buy a conference ticket in order to attend the workshop okay so I'm glad you brought that point up Lia cuz it's technically not in my timeline so I want to switch back over to the slide show I'm switching back okay let's continue in the timeline so it was agreed that they would sell the tickets priced at 120 dollars each and that they would collect that money through their website and we had an understanding that those funds would be held in trust for me and given to me after my obligations were fulfilled taking part in the conference and that I would be given my workshop as compensation that funds that came in for ticket sales from the workshop as compensation to me from my participation in the entirety of the event okay later that month Carmen and Leah were now meeting at my house once a week editing the documentary so this was still like you know three months before the conference and Leah and Carmen were basically just putting in one day a week on the editing part of the project well I wasn't putting in one day a week I was putting in four or five days a week because I was preparing all of the material that was going into it figuring out where it goes and trying to get this together so the prep work with media was was your responsibility and you were doing that more than a day a week I'm simply talking about actual editing work on the timeline in the video editor was taking place in the video editing program was taking place one day a week at this point okay so then the next month Carmen and Leah attempted to ramp up work on the documentary project by setting a three times a week editing schedule okay in July of 2019 and this became a problem for me as well because Leah was calling me frantic telling me how many times Carmen was canceling and she's like we're never gonna get this done you have to do something okay but we'll get to that so July of 2019 and into August of 2019 Carmen continuously cancels editing work with Leah in order to train for two mixed martial arts fights over the summer Carmen canceled editing work with Leah by text message these are the documented cancels that we are able that we know about for sure that we can prove okay he cancelled with Leah to work on the documentary project via text message to her phone on July 19 26th and 31st and then again on August 2nd 9th 14th and 16th that's seven cancellations just in a approximately one month period a little bit less than one month okay Carmen also canceled on other dates verbally or in person for which there was no record kept so we can't actually prove that but Leah has text message proofs of cancellations on at least seven days okay so that's the work ethic that was being displayed at this point in July of 2019 only like two months before the conference and then the documentary had to be screened okay so let's move on in the timeline by the way Leah was calling me I mean Leah really puts a lot of effort into the work she does here at what on earth is happening okay she takes it very seriously and you know she's very dedicated to doing the things that she says she's going to do okay so she was calling me frantically going mark you got to do something about this he's canceling with me again what are we gonna do we're nice they're never gonna get done in time we're never gonna be able to show this it's gonna be a mess by the time the conference rolls around you got to do something okay so here's what we did do August of 2019 a little bit later in the month since carmen has canceled work on the documentary editing so frequently I had to announce publicly that only a rough cut of documentary would be shown at the Anarch Adelphia conference in September and that killed me to have to do that but if I didn't do that and I said oh we're gonna have the finished Polish documentary out or beat have it for sale at the conference I'd be lying to people and there would be false advertisement okay so I went on this show you can go back into the records of this show and I said the progress isn't going as we expected I didn't give any details because I don't air out personal things like that and now I am because of what happened subsequently that we'll be getting to okay and you know I said we're unfortunately folks were only going to be able to show a rough cut it will not be the finished documentary we won't be able to release it at the event okay so big disappointment I was very disappointed I'm sure people who heard that were I think people really still got a lot of value out of the rough cut being screened but you know you'll see what we had to do to actually get that in an acceptable you know screening form okay so the next point here is do to Carmen's constant cancellations me and Leah agreed that the documentary cannot amongst each other we agree that the documentary could not possibly be in an acceptable condition to screen at the conference the following month and that someone else must be brought in to actually work on the editing of the film okay and I'm in panic mode now because I had hardly any money to spend on this like donations for this project we're not coming in and any significant rate at this point most people didn't even know about it we had no duress no active campaign to get donations for the documentary has no campaign to collect documentary we were just pushing it forward because we wanted to do it for this conference right exactly okay so Leah is saying to me in private conversations you have to hire somebody to finish this editing because Carmen's not getting the job done and it's not going to be ready for the conference even to show a rough cut so now I'm like shit now I need to pay somebody just to honor my word then rough cuts gonna be shown so now that started hurting my finances because I had to go out and try to find a video editor and pay them out of my own pocket to get the documentary done so I'm losing money participating in the conference now okay so uh I we reached out to my friend and colleague Craig to video great guy always willing to help in a capacity if he knows about it this guy is a very generous willing to help you out okay so we said Craig our editors not working out he's sort of flaking out on us and canceling a lot we need somebody who's very dedicated and is good and will really you know take instruction well is technically very good at what they do and will not break our bank either you know because I can only afford to pay them you know a somewhat modest rate I mean video editing can be like you know two hundred dollars an hour all right it can go up to that high alright so I said it's got to be a reasonable rate somebody that understands this is a low-budget production and they'll be willing to help us out with a decent rate and Craig came back and said I have someone for you she's very talented she's very dedicated she will take it very seriously and I have full confidence she could be the person to help you out with this and she'll give you a reasonable rate so I at that point hired the woman that he recommended named Nia Bullock to ensure that the documentary ruffcut would be ready in time for the conference see these are all the things behind the scenes people don't see folks you know in order to honor my word that's what I did to go into this conference prepared okay Carmen who did not honor his word to edit the documentary into an acceptable condition in time for the showing the the screening at the conference you know that's that's how he behaved and then I actually went out and hired somebody because he didn't fulfill his obligation as a volunteer you know if you're not gonna do that don't agree to do it don't say you're going to do it then complain that you're not being paid okay well would things have changed if I said Carmen now I'm gonna pay you see that's the whole point folks you know you don't get upset about things that aren't done you honor your agreement this is what you said you were going to do then you should go out and do that so if you say I want a hundred dollars an hour then that'll be your agreement if you say I'll do this for free for you that's our agreement you honor your word it's very simple it's not hard to do either you know people think odds say one thing and you know do another no it's very easy to say one thing and do that thing it's not that difficult you just stick to your word you make your behaviors aligned to what you say you're going to do but that didn't happen with Carmen okay so I paid out of my own pocket Nia's rate which I won't disclose but it was very reasonable and she was very good at what she did okay cause it's not really anybody's business what I paid her okay and I'm telling you I would just want to thank her personally because um she is a very talented woman she's very good at what she does she takes her craft very seriously she shows up and she works the whole time from I only sat in an actual couple of editing sessions with her but I was highly impressed okay no mess around and no no-nonsense approach okay Leah would you agree with that assessment of me I thought she was excellent I mean when she started you know moving the the timeline around it was like she was so adept at it and it was started just coming together her skill was unbelievable she was very good I'm in total agreement also too we had a couple of other people that contributed to the documentary that summer you know we had a kneecap and their amazing graphics that he did and we had Mitch Thompson who was doing amazing work as well and we would have loved to have funding for them as well at that time yes we you know and that's hopefully something we can do with what we know yes well we're gonna need more graphics help to refine some graphics and we have a budget now so you know we can have appropriate oh there you go Pat Thank You Man because I mean we could pay people now since generous donations have come in for this project specifically you know and I'll tell you what if anything's left over folks you know what we're gonna do we're gonna we're gonna do some sort of an outreach with pressing a lot of these presentations and figuring out a way to get them the groups of people that wouldn't ordinarily receive them okay I don't know how that's gonna work but we're gonna figure something out like with getting some free documentaries out there on DVDs to people okay that more of that later but I'm telling you like all of the money that comes in for this documentary we're gonna budget toward either producing the documentary or distributing it somehow in ways that we would not have been able to do so that's you know every dollar that comes in from this is going to be spent toward this effort of educational outreach which this documentary project is all about and also I'm I'd like to mention that you know we've never done this before we were kind of stumbling our way through it pulling this amazing project together you know it was very magical in some areas and it was you know a trial and error or another absolutely yes it's a big project a full-length documentary you know this documentary is probably gonna clock in around you know when it's all said and done around an hour and 20 minutes or so that's a huge project you know for a first-time documentary undertaking so in the beginning originally it was this hard drive with pictures and so on it's more that now I just want everybody know that I originally quoted Mike Martin at $2,400 three months from what favors one concept that it would have been able to get it done but it evolved into something so much larger there was a there was a learning curve there was this incredible learning curve started putting it together and we came across using all of the stock video sites we suddenly you know it just it came alive so we had to do a lot of changing up with a lot of the still images to video images you know and we had that beautiful narration by Jana Jana ESP as well she's another person that contributed yeah and I remember anybody as we go along I'm gonna make sure I give them sure thank you without a doubt it's a it's a group effort and I'm telling you a lot of people contributed talent and resources and just having said that I want to say Carmen's competent as a video editor you know his skills are good okay I didn't have any technical problem with him as an editor but it was his work ethic that was problematic he was good as an editor and he was good as a sound person absolutely all right so that being said I was now paying Nia as a video editor using my own private money not donations coming in through what on earth is happening just whatever I could contribute and I it totaled into thousands of dollars okay I'm not gonna get into the exact figure but it was you know it was a significant amount and I had to do this since Carmen's agreement to volunteer to complete the project was not honored by him okay that's what necessitated that so then at a very future point in August of 2019 we don't have the exact date that this happened my video editing computer my video editing PC which is a core i7 PC that I custom-built was moved into Carmen's house for anytime access by Leah Carmen and Nia okay Carmen was still working on the project when he found the time neo became basically the lead editor at this point and Carmen was still supposed to work on sound editing and mastering for the documentary audio track okay so at this point I wasn't either yes Logan Hart thank you for reminding me of that Logan Hart did this beautiful incredible sound truth of the speak it's the score and it had to be placed into the tie had to be mastered and placed into the timeline and that it was one of the tasks that Carmen agreed to do right and as we'll see that was also neglected but we'll get to that in a moment but basically what we did is we moved my computer that was being used to edit the project at this point to Carmen's home because people were in and out of here at all different times of the day and wanting to show up at different times and I really needed to focus on my presentation and my workshop at this time this is when I was building those things for the the the conference you know the main part of the conference when I would deliver my presentation sacred gift of anger and when and the day after the conference when I would deliver the workshop teaching natural law so I couldn't I I tried to deal with it and it was really disrupting my personal workflow I have to get into like a headspace before a conference to say okay here's what I want to lay out this is what I want people to understand this is what I'm gonna be talking about and I have to then go into focus mode with you know looking at my outline saying oh how am I going to arrange this what are the slides gonna look like what images am I gonna pick and ultimately put in into the final result and then build all those slides you know and talk about think about how the my discussion is gonna flow as I go through the slides so you know I couldn't have a million people running around in my house and showing up at all different times of the day while I'm trying to get this work done it was very distracting so I said look somebody needs to take the computer you know and just then you could edit round the clock if you want any time but you know I just I need focus and quiet here you know and I was very on edge because thinking we were this was gonna be a debacle okay luckily it all really got pulled off very well at the conference okay you know through people's hard work actually okay but at this point I was very nervous I had a lot of work to do on my personal slides and lectures for the event and I just couldn't have a lot of people in my in my private living space and where I'm working you know all hours of the day and night so at this point we decided someone's gonna take the computer okay and Leah originally agreed to take the computer but Carmen did not want to travel to Leah's house which was just outside the city limits of Philadelphia in Balcon wood at the time and he's like no what I'll take it and we'll bring it to my house in South Philly and Leah you'll have to come to my house because Carmen didn't want to do the traveling to you know continue to work on it Nia was fine with that but not Carmen okay so let's move on August through September of 2019 Leah asked Carmen and multiple times I should add in this slide how many people have purchased tickets to attend marks workshop Carmen says he does not know what that figure is to Lee tells me he's got to look it up I've asked him numerous times we wanted to know how's the workshop selling how is it doing you know and then Mark was eventually was getting all the materials prepared to create the folders for the material that he was handing out to people that came so we needed to know but I could never get an answer from Carmen we were completely blind going into the workshop how many people were gonna show up there and he promised I'll check I'll get back to you but never gave us those statistics okay so and you know I can speculate as to why maybe he knew the workshop was selling at a very good rate by that point I think he's actually said that okay and you know he told me multiple times I don't I don't know I'll have to get back to you on that well I'll look it up and get back to you we were asking him you know can you even give us a list so we know he asked for a list of the people's name right and nothing he would he would never turn over to me I gave her all the information to finish it she asked well that was after that was after the conference right all the emails because we tried to get an email list of everybody that had attended and somebody else passed around an email list and it got all convoluted so we just decided to get all the females fishing the actual ticket sales right you see Pat since since carmen was our liaison we didn't really you know go to you to take you off of other aspects of the conference you were working along because we knew you were like the technical guy mostly and graphics and the website so we didn't go to you because we had been dealing with Carmen as a liaison you know we saw I saw him you know at least right we work not quite in his physical presence and you were in another state you know so that's why we just kept feeling a little a little lifted off my shoulders you know it was nice to have to taking care of that right but also I'd like to UM you know just explain what happened the day of the workshop when we went into the workshop room there was a divider put up on the wall there were a number of tables up and people started pouring in the door and we were saying to the staff we took our photocopies how many folders did you end up making for that mark 60 60 folders total folders because I thought the maximum that would possibly show up would be 50 people yeah because of a caste Christians we got you know 70 people if the entire fake as Christians we only got about 70 people so we thought it would probably be around that and that was a major presentation that I delivered this is the workshop that's an add-on to a conference I thought I honestly really expected about 40 people coming in the door so when when like people started just pouring and as we're going to get to I was shocked and it felt really good that that many people wanted to come and attend my workshop it was it was they were very generous to give their hard-earned money to pay that added ticket to come and see the workshop and I was just so thrilled that that many people came out yes it was a big surprise to me we were running over to the staff going do you have a photocopy machine can you photo these they photocopied I don't know ten or twenty and people kept pouring in the door and the staff had to open up the wall in the room and bring literally in these jets needed like I don't know 15 people they had to put like three more tables in and it was insane we couldn't believe it but unfortunately that we couldn't prepare for that we couldn't prepare for that because we weren't given the data of how many people had purchased workshop tickets and I and I think I know why Carmen did that he didn't want to give us those numbers because then I would have known how much compensation to expect for my workshop after the conference and he didn't want me to have that figure until right up to the point where we saw how many people were showing up that's my speculation regarding and I asked Carmen I said Carmen where's the list so we can check people in and he said he didn't bring it so we literally had no idea people coming in the door we couldn't we had no way to say did you pay did you not pay we just assumed that people you know mark made an announcement for anyone that didn't pay you know when on the honor system and we told Pete you people came up pay for a ticket on the website please see Leah at the table and pay for the conference you know but guess what you know if they didn't have it I would have you know let them attender pay a partial donation whatever they thought was appropriate you know I don't I wouldn't throw people out who really wanted to come and see something I've done that before it many events of mine where people have come and said I don't have the money to attend but I really want to see this I'm like you know what if you can give a donation go ahead if not go ahead and go in I can vouch for that because I was I worked the front door at one of the three-year mines and it was right before I became your assistant mark and people were let in people they didn't have money or always led into this they asked all they had to do was ask if they said I really want the knowledge I really want to participate in this and get this knowledge and asked would you allow me to come in for a lesser donation or for free we allowed it every every event we've ever had people who can't pay or let in right they're allowed to volunteer cuz right exactly we might have said you know could you help us set up chairs or could you help us break down afterward you know so you know people were you know willing to do things like that and we were willing to accept that okay so continuing with the timeline Nia then took over editing of the documentary on a four day per week schedule with Leah Carmen was sitting in on the editing a few times during the first week but then he moved on to organizational work for the conference after that point he neglected to complete the editing and mastering of the audio soundtrack for the documentary which he originally agreed to do in time for the conference premier so people who attended and were at the ruffcut premiere of this documentary probably noticed that there was a lot of audio work that was left undone and there were things that were not mastered properly we're not in proper Sam levels even and sound kind of went was too loud in certain places was too low in others and this was unfortunately because you know Nia was scrambling to get other work done to finish it she couldn't do it all in the timeframe and carmen was supposed to share duties and do some of these things at night after they had broken after lea and Nia had broken doing work in the main timeline during the day Carmen was supposed to do work with the audio and did not complete that work either so it was a continued neglect of his agreement to volunteer to finish the documentary and getting in get it into respectable shape to premiere at the conference okay now here's a big crux of the whole thing that happened coming up and carmen has made this a big point he's made this a big aspect of telling his side of the story okay so pay attention to this part here okay August 27th 2019 mark is given a one thousand dollar donation by Mike Martin facilitated by Patrick leach mark is not told why Mike is sending these funds and simply assumes it is a donation which Mike told mark previously that he may send at some future point to help mark continue his work with the documentary and with other things at what on earth is happening Mike had told me I all contribute to you at some future point or give you more money to work on the documentary didn't say when but left that open-ended so I'm going to show you the actual screenshot from my Skype program of the conversation that took place between me and Pat and then this is a big content point of contention of what Carmen says this thousand dollars was for but I want everyone who's in the viewing and listening audience to just think if this is the conversation that took place between you and another individual what would you think would you think that this was given for some other reason other than the facilitation of a donation I'm going to show you the actual words the actual screenshot that took place in that conversation so here it is August 27th 2019 this is a Skype screenshot ok of a conversation between myself and Patrick leech Tuesday August 27th 2019 2:49 p.m. Pat writes mark what's your paypal going to send you $1,000 I wrote that look at folks people will learn this about me you see how I'm frugal with words like on the air I'm a blabbermouth right if I'm writing and typing something I get right to the point and I answer very simply and succinctly and I don't write and drawn-out paragraphs okay I am you know just get right to what we're talking about so I didn't go on asking tons and tons of questions it's like I'm working on other stuff you know I don't like sitting at the keyboard typing you know I don't like email I hate email email is like my most dreaded part of the day to go through my email and answer what I need to okay and even on skype I am very efficient let's say okay so Pat asked me what is my paypal email address and I just gave it to him it's Mark at what on earth is happening dot-com which I got back to him a couple of you know what is it three minutes later okay in that same minute Pat says great that will and he forgot the word be here but I get the point of what he's saying that will be coming through from Mike Martin would love to get an interview with you sometime this week to help promo okay and then I wrote back the next minute I want to know if you and Carmen want to come on what on earth is happening this week for a conference promo right because I figured that well that'll reach more people if we're gonna promo the conference let's do it big come on the show and we'll promo it and Pat in that minute says yes def definitely next Sunday question mark and I wrote back this Sunday you see a man a few words when it comes to like you know getting things done with people okay and Pat goes perfect I'll I just let Carmen know and then that show happened it's a matter of record okay that's it there's nothing else followed that on Tuesday August 27 2019 and actually nothing else was said about that I believe it was that later that day the donation came through from Mike Martin's PayPal to my PayPal and that was it nothing was ever told to me before during this conversation or after this conversation what that money was for it was said a thousand dollars will be coming to me from Mike Martin it was not this is for the conference this is toward paying you this is you know your compensation so Carmen has tried to make this a big point of contention in his argument that this was like my payment for the conference this was my compensation we're going to show screenshots of Carmen saying this was supposed to be my entire compensation for the conference and I agreed to that because he told Pat to go take that money to me and make that arrangement with me that I would not be receiving my workshop funds that I would be allowing the state of Anarchy to hold those workshop funds for them and their expenses in return for taking this one thousand dollar donation from Mike Martin which was never ever spoken to me never left someone else's lips and arrived at my ears under any circumstances or never was communicated by text to me ever once no order to reduce those those records no proof of that I can never be produced because it did not happen this is a story that Carmen is now putting out on his podcast and on social media he's come up with this story that he tried to buy out the workshop with $1000 we're going to show the screen advance we will be showing those ranges if the workshop was selling so much it was overshadowing the conference we had no idea how the ticket sales were going and this is like crazy even in the she Asians afterwards this was never even brought up this is his spin to the world to try to make everyone think that he didn't do anything wrong and it was all just well they were gonna keep all the money for the workshop and they incorporated it as the fourth day of the conference and Pat who lives in another state suddenly became the liaison between you and the conference when all along Carmen is the only one dealing with you and me so Pat do you want to add to that what were you ever told offer mark this as compensation for his involvement in the conference no listen Carmen never told me to do anything it wasn't like that Carmen's not my boss all right you know before this conference before my I can't came up with you know I had been I had become good friends with Mike you know he's a bit of a mentor to me he's very successful intelligent gives me good my what Mike's a great guy very generous ki know we've had my back knowledgeable guy yeah absolutely yeah so I had asked him if he was willing to contribute to you to your participation back in November okay and well you were never at any time under any impression that this was quote like quote buying me out of the the compensation that was coming in from my workshop or I was agreeing not to take the workshop sales in return for this donation oh no hell no okay well because that is what Carmen has said now and we'll be showing screenshots of that that were taken from social media so let's continue in the timeline okay so let's keep in mind that thousand dollars because you'll be seeing more about it later okay so September 7th 2019 only five days before the Anarch Adelphia 2019 conference would begin this was Saturday September 19th and the conference was going to begin on Friday of that week so six days or yes six days before the conference five or six days I can't can't quite recall but Carmen called me on that weekend before the event and asked to borrow just about all my personal equipment might Nicolle equipment in lieu of renting any equipment for the conference five or six days before the event was to begin could you imagine this okay imagine you're hosting a conference and you read in no technical equipment no no projectors screens you know podiums lighting rigs all of this okay cameras here's what he borrowed from me so I agreed to allow the state of Anarchy to borrow all these equipment ok the following items that I'm gonna list here free of charge no rental fee all belonging to me for use to host the anak adelphia conference and I didn't even tell most people this until now okay I lent them my whole video editing rig to livestream the event which is a powerful enough computer to get that job done okay so I lent them my Windows 10 custom-built desktop computer and by the way we're gonna as we're going to say it a little bit my producer Mike seaman also ran that computer to livestream the event because they didn't have someone you know who was actually tasked with that either and he did that on a voluntary basis for free for this conference lend his expertise toward that shout out to Mike what a guy Mike's incredible what he does so I also lent them my 11-foot projection screen and actually gave it to them after the event and said I don't want it back you can keep that you know cuz I really don't have a need for one that big you know if I give one here I usually bring my you know eight footer that I have so I gave them a it was like a 350 dollar 11-foot projection screen and I donated that to state of anarchy I lent them my Epson 5500 lumen projector with my projector stand I lent them two of my panasonic 4k cameras with tripods I lent them my PA podium my podium the actual elect lectern okay it should really instead of a pony it's actually called a lectern I lent them two softbox lighting rigs with bulbs and tripods and I lent them various cables and adapters that they would require for all this equipment all free of charge no rental fee at all because I considered on bailing them out of a jam of not actually securing any of that equipment that close to the event I was again I almost fell off my chair in my kitchen when I get a call from Carmen I'm sitting there you know making a smoothie and and and he says to me mark I got a question to ask him like Wako ahead and he's like can we borrow some equipment and I'm like yeah what do you need and he's like he starts to run down of the equipment and I'm like you didn't rent any of this stuff like you don't have already have this and he's like no no you know we so he was telling me like he kind of thought they were coming in under budget and they were going to ask me to lend them this so that they wouldn't have to rent it and I'm like it's a week before you're going live with this event and you're calling me the weekend before the event asking me to lend you all this stuff it's like first of all that's just it's it's a highly unprofessional and just not done so I thought that that was very weird that this was being asked of me so close to the event but I of course I'm not gonna deny him I'm not gonna say no I'm not gonna do that for you go rent it I said okay yeah sure come and borrow whatever you want but make a list of what you're taking from here and make sure everything gets back to me you know because this is a you know a lot of this is not only from my own pocket and my equipment that cost a lot of money but a lot of this was donated to me as well from listeners and I want to continue to keep it as an investment in what on earth is happening so I continue to do this work and so I'm like please you've got to promise me you're gonna take very good responsible care of it you're gonna return it to me in a timely fashion and to Carmen's credit and the other organizers they did they nothing was broken everything was very well respectfully treated and everything was returned to me well most of it was brand-new the projector was brand-new speakers were pretty much brand-new right okay so the technical production of the an arc Adelphia livestream and video and audio recording was done by water on earth is happening producer Mike seaman and Mike I'm sorry well I got your name spelled wrong I'm gonna correct that right now no that's being corrected right now okay I'm sorry about that hold on okay that's probably my fault yeah was done by what on earth is happening producer Mike seaman for the duration of the entire and arkadelphia event for free on a totally volunteer basis and he was assisted in that technical capacity by Pat Leach to do the live stream and recording so those guys did a fantastic job their work ethic ethic is beyond reproach okay so then I spent several months promoting Annika Delphia on my weekly radio show right here on what on earth is happening and I calculated approximately how many ticket sales I helped facilitate directly through the water on earth is happening website through click-throughs through the banner click through that I put on my website I was able to somewhat track that amount and calculate an approximation this might not be the exact figure but this is an approximation of how much money flowed into the state of Anarchy the their conference directly as a result of my promoting the event and putting a banner on my website for an arkadelphia 2019 I hope to sell approximately twenty thousand eight hundred dollars just shy of twenty-one thousand dollars worth of tickets for Anika poco 2019 through banner click-throughs on my website were it not for me promoting this event the event certainly I'm not and I'm not bragging here I'm just saying what the truth is of the matter if I didn't promote this event and take part in it the conference would certainly not have been as successful as it was certainly not as many people would have even known about it it would not have you know reached their eyes and ears had I not done the months of promotion toward this conference and I'm not bitter about that I'm just saying that that's the case I was willing to do that motion that's part of my a word to help promote the event and to take part in the event of course I'm gonna promote help promote an event that I'm a part of I think that's I don't see that enough with other speakers quite frankly I just have to say that I other speakers do a poor job perhaps it's not really they're not technical enough to really run their own websites and get advertisement out in a in a timely fashion but other speakers I see them they're speaking at events they're listed on the on the event web page and that they don't have many banner on their homepage I'm gonna be speaking here you know or they don't put a poster up and say hey check this out download this or go to this website and check I'm gonna be speaking here it's like they just let the event promote it and it does it's never as successful it's always more successful if the speaker's helped to promote the event so I try to take part in that process and this is my estimation of about how many ticket sales myself I was responsible for through what on earth is happening and admittedly that's an estimate but I'll get I'll bet you it's pretty close okay continuing with the timeline from September 2019 September 12 2019 Leah again asks Carmen how many people bought tickets to Marc's teaching natural law workshops so that Marc can make enough folders containing outlines and notes for the attendees Carmen again does not give her any data regarding the number of people who bought workshop tickets and so I made sixty folders for the workshop attendees which was clearly not enough it was the last day of preparation before the conference started right and we could not get that information so September 13th through 15th this was the N arkadelphia 2019 conference proper is held at galled OHS entertainment in Philadelphia Marc presents an original presentation entitled the sacred gift of anger and participates in a special panel discussion on the occult and I should put we screen thee up rough cut of the natural law documentary I'll have to add that into this slide okay so the I fulfilled all of my verbal obligations for this conference I spoke I gave my original presentation Carmen even asked me to present sacred of anger which was one of my proposed presentations I kind of talked about I'm going to talk about this topic at some future point I'm gonna formalize it as a presentation he wanted me to present this one he asked me can you do sacred gift of anger that's one that you're planning on doing right and I said if you want that one at the conference that's the one I'll deliver at the conference and I did okay so I fulfilled all of my verbal contractual obligations for this event okay I spoke at the event delivered the original presentation that I said I would deliver I participated in the three persons three speaker panel discussion with Carmen and Sonny okay the day the next day Sunday of the event with Derrick Rose and Max Egan we did an occult panel discussion and the Saturday night after my lecture the sacred gift of anger we screened the ruffcut we premiered the rough cut of mark passio and the science of natural law documentary film which was very well received people gave a lot of comments also gave a lot of good constructive criticism on how it could be improved we're working on making those improvements now that we have another editor helping in a small budget for the film okay through donations continuing with the timeline September 16th 2019 Mark's workshop this was the Monday after the event at galdós so this was my workshop at Poppy's my workshop entitled teaching natural law with Mark passio was held at Poppy's Italian restaurant in Philadelphia just down the street from galdós where the prop the conference proper took place I provided all of my own equipment for this workshop didn't didn't ask any of you know equipment from state of anarchy oh I'm sorry they did bring the screen that I had told him that they could keep and we used that screen that was used for the conference for my workshop yes so the state of Anarchy rented this restaurant Poppy's Italian restaurant for the day and an approximate fee of $2,000 okay that was the rental fee for the workshop venue 104 paid attendees turned out at my workshop teaching natural and again I almost fell over seeing people come in I could not believe it okay this number completely surprised me as I thought about 60 would be the maximum amount with somewhere between 30 and 50 being actually expected like pragmatically I figured if I made 60 folders I have way more than enough okay and I needed 44 and more and some people never got notes because we were never given the data of what to expect they never got you know outlines notes and you know blank sheets of paper to make personal notes on that were part of the folders that we made up for others because we weren't given the figures on how many people to expect at this event and I think that was done deliberately September 19th so now the conference is over this is this is a couple days after the workshop three days after the workshop Thursday September 19th I call this an offer to mark at lunch okay Carmen sunny and Pat invite me to go to lunch with them in South Philadelphia after the meal Carmen told me that the state of Anarchy ended up in the red on the conference and the number that he shot to me he said were somewhere between twelve and fourteen thousand in the red on this whole thing okay and Pat later informed me that the state of Anarchy had approximately fifty five hundred in their accounts at that very time so it's unclear whether the above numbers were accurate or not as told to me at the luncheon it is assumed that the above number included a $4,400 PayPal loan and the cop it should say compensation not composition let me just correct that and the compensation owed to mark that were collected by state of anarchy for Mark's workshop sales the money that was collected I should say was collected here you know getting OCD about my presentation you know spelling mistakes here or grammar mistakes okay so we don't know exactly how much they came out in the read and quite frankly you know what it's not really anybody's business with but there's okay what I'm the point I'm making here is did Carmen really tell us to tell me the truth at that luncheon that they did in fact end up that much in the read a pat I could let you jump in on that point if you would like to oh yeah sure we had about fifty five hundred dollars in the bank still okay I was going into that lunch under the assumption maybe we owed you have two thousand dollars more you know okay you have to come up with it let you know that we were in the red that was appointed it because you still didn't know that Carmen promised me my whole workshop you thought I had a speaker split a workshop split arranged yeah when I was I was sitting in your in the workshop and I'm looking around my holy shit 75 on a bucks you know I think hey plus your referral fees also right conversation were you were you having conversations with with Sonny and Carmen at that time about any of that did that did you guys mention that or talk about that at all and you know that it was another party afterwards before the luncheon no I just met them I remember Pat I saw you guys coming down on 10th Street because that's how I approached the triangle where we had lunch and um you know I I was behind you guys walking about two blocks down and I saw you come out from Carmen Street and go down a tenth Street or triangle so that's a you know and then I kind of like yelled to you guys you know before we went into the to the okay so I just want to say yeah that was another part of my compensation was affiliate sales remember when we were promoting people may recall it was like people who bought tickets through the passio code the promotional code passio on state of anarchy x' website they would get 5% taken off and 5% of the ticket sale would go to me okay so affiliate ticket sales were part of my compensation as well when we calculated all of that through email emails regarding the referrals that had been collected with the passio promo code with the software on the back end of the state of anarchy x' website we collected all those emails and tallied them and that was 1040 dollars worth of affiliate ticket sales okay which was part of my conversation but we'll get to that Carmen then proceeded to ask me at this luncheon if I would be willing to accept a total of $1,000 and presumably this would be the payment that Mike Martin had already given me on August 27th 2019 as a total payment for my participation in the Anarch Adelphia 2019 conference and that I would be willing to call it even on my workshop ticket sales since the state of Anarchy ended up so far in the red for the whole event he publicly said this allowed he ant made this offer to me allowed in front of sonny and pat at the table when we were just about finishing up lunch outside we actually ate at a table outside of triangle tavern and we that's when he made this offer to me he said we ended up bad in the red would you be willing to you know basically take the thousand we already helped facilitate donating to you he didn't really use that word he said that Mike Martin gave you and he always says wheat for a lot of things that I did but Pat you didn't even know he was gonna say that yeah you know he was gonna make this all out to me for a take a thousand dollars I don't compensation for Mike's money just like the money for documentary and he would have kept milking that right and folks I just want to say at this point I just want to just say at this point okay regardless of whether Harmon was you know telling the truth to his other organizers regarding you know arrangements that he made this has nothing to do with the money nothing whatsoever okay all this has to do with his integrity and honoring your word I have spoken to places completely for free expecting no compensation I have driven the places to speak where I had to spend my money to get there okay where I where I not only not got any money I had to pay money to even go and deliver the message okay so it's not about the money I'm not being greedy regarding this all I'm saying is if you are a person promoting the principles of anarchy and natural law part of that is honoring your word and your agreements that's it okay it's about personal integrity so what I'm going to explain to you what actually happened here's the whole crux of the whole matter and you're gonna realize how much I was actually damaged by what happened okay so so he made this thousand dollars offer for me to take that for the whole event and just basically let the workshop money go to say hey sorry you guys ended up in the red you know let's call it even okay so this offer which Carmen proposed was not discussed with Pat and Sonny prior to their lunch meeting with mark prior to the state of anarchy lunch meeting with mark Carmen did not tell them he was going to do this at the lunch table okay I immediately refused to accept the offer I said it outright so that everyone could hear when he said would you be willing to do that I said no I'm not willing to do that because that was not our arrangement that was not our agreement but I said let me see what I could do to help you guys out okay if you ended up in the red I I do feel bad about that you know I know the conference's don't always end up you know in the black and it you people often lose money I know people have lost over ten thousand or more dollars on hosting a conference smaller than this one so I could actually imagine okay I hosted two conferences folks the first year we made $2,000 profit on free or mine one and the second year we lost $1,500 total and guess what that means we budgeted beautifully okay that means we were so accurate in our budgeting that we came within a $2,000 flex line of you know figuring out expenses versus what we actually brought in that's damn good if I may say so okay but if you total all of that up right in between two conferences Ted and plus organizers I can't recall the exact number made a total of

$500 profit think about that how many hundreds of hours of free work and personal expenses and driving and all you know promoting and everything we put out not everything exactly was meticulously tightly budget a lot of people put money out of their own pocket okay to events with over ten people helping to organize both events when you've averaged when you you'll figure it all out between expenses and an amounts made we made a total profit of $500 between about 10 people in what amounted to like years of work preparing and and organizing those events hundreds and hundreds and hundreds of hours of free work basically yeah but yeah you know to expect conferences that like make a lot of money and you end up super in the black and make a huge profit is a very naive perspective it doesn't work out that way folks it's very very difficult to do and the people that don't understand that are people who have never even attempted it and they're talking out their ass I'm not gonna even get angry about it I'm just gonna say they don't know what they're talking about and they don't know how it works because they've never actually done it all they can do is flap their gums and say something that they know nothing about and make a jackass out of themselves okay I take it from somebody that has done it twice and then advised on many other conferences I've actually hosted more than two because I've helped host some of the Tesla energy independence conferences that we're hosted here in Philadelphia as well okay so I've helped host more than two conferences actually and I've gotten early decent being a conference organizer although you know it's very difficult and challenging work and very frustrating work at time so I get what goes into it okay but you know a lot of people want to talk and then they have no personal experience and think that they know what they're talking about and I'm telling you people have no idea what goes into conference hosting an organization so I'm very much in sympathy with the state of Anarchy organizers regarding this because I know what I know what it's about okay so I said okay I'm disappointed you guys lost money on this you know I didn't think that was actually a drastic amount of money to lose okay I know people have hosted smaller things and lost over ten thousand dollars okay I mean a friend of mine hosted a 9/11 truth conference in Valley Forge Convention Center and lost like way over 20 possibly even $30,000 on the hosting of the event okay I mean you got to realize a lot of risk goes into conference hosting an organization so I'm in sympathy with them here so I said let me come back with a counteroffer no I'm not agreeing to take only $1,000 from my participation because that is not what we agreed but I will come back with a counteroffer and I will try to help lighten the you know total you know burden by taking something off the total than I'm out okay so remember you said you were willing to consider a percentage right right and then we were waiting for an email right and as you're going to see what I actually offered was somewhere around I believe it ended up being totaled 17 or 18 percent that I was willing to take off okay but we'll get to that I don't know if that's the exact figure but it's something like that maybe 14 percent I'm not quite sure but we'll get to that so I immediately refuse the offer and I said I would let them know what I could do and that I would email them a counteroffer okay to help them out because they ended up in the red okay that was how we left the lunch meeting where I definitely said I don't agree to take the thousand dollars is my full compensation because we agreed give me my workshop a hundred percent of it okay that's the agreement I made verbally with Carmen by phone with Leah on the line okay so I said right off the bat no I don't accept that and the other thing I should bring up at this point and you know maybe go into it a little bit later is no payment plan was ever discussed with me it was never said and conferences don't work that way folks you know you know we didn't do we didn't do for your mind one and two and then say to the people we said okay we're gonna give you this much stipend okay we didn't like after the event we didn't go to them and go you know can we pay you $20 a week or $100 a week or whatever you know it's like if we agreed to pay you $500 you've got the $500 the day you've completed speaking you know my buddy Michael would go up to them with an envelope and say there you go this is what we promised you and there it is we were meticulous to our word okay because we held that money and Trust we didn't spend it and then say it's not there when the time came to pay the person for what they had contractually fulfilled you know that that's you don't do business like that and we'll get to what that we'll get to what happened okay so the first thing I wanted to ask at the luncheon was why are you offering me $1,000 what if you you say you ended up that much in the red well what about ticket sales that came in from my workshop where's that money I never actually got to that because I was almost in shock that I'm expecting well over that figure for my workshop ticket sales and he's telling me they don't have any money well I take the thousand dollar donation that Mike gave me as my payment as my total compensation for the event so I was just thinking like wait a minute like something happened here what happened with all the money they collected on entrust for me on my behalf that came in from workshop ticket sales so I was very confused okay so let's continue with the timeline and you'll understand what happened so September 19th 2019 I asked Lea because I was look I knew it was gonna start to be a run around at this point when when you you know you're a significant amount of money that came in from unexpected proliferates workshop sales from very generous people who spent their hard-earned money to come and see my talk and I'm gonna say I'm gonna get to in a moment how I considered that workshop a tremendous success and guess what I'll tell you what I consider it was worth way more than even the ticket sales that came in as a result of what happened following that workshop okay there was very good positive fallout as well it's not it's just all negative okay but we got to talk about the negative right now but let me tell you something folks the value that people came away from that they emailed me and told me and some people were like oh I knew a lot about this stuff because you know I'm younger I could follow computing and technology and they knew what this involved but a lot of people said you showed me things in this workshop I never knew it was involved in what you do and now I do so but we'll get to that in a moment okay so I asked Leah to act as a liaison between myself and the state of Anarchy organizers to work out this monetary compensation issue because I said something that I do on a regular basis I liaison if I want to work with other things or even if I don't want to deal with it emotionally maybe I don't quite get along or we butt heads with I butt heads with people in a certain way our personalities might rub up against each other I'll say to Liat please deal with this for me please that's what her job is this is what Leah does here at what on earth is happening as the volunteer she helps me to facilitate my work so that it becomes easier for me to do so this is normal okay I will often say this is I'm delegating this responsibility to you okay so can you deal with this I'll be working on this okay some other tasks okay and she'll do this for me okay and that's normal operating procedure here and one or is happening and if people don't like it tough quite frankly nobody's really entitled to my time you can't say too else you must give me your time I love people who email me I don't want to get sidetracked but people EMU like mark you have to talk to me I must talk with you no I don't need to talk to anybody I can choose through my free will of association who I speak with who I spend my time with who I interact with who I deal with period the end that's called freedom of association okay so it's the same thing here if I want to say Leah's gonna handle this for me she's my you know act it she's acting on my behalf because I've allowed her I've asked her to act in that capacity then you got to deal with the PERT the liaison that I set up to deal with this problem I don't have to interact directly with people but apparently they thought that that was like a slight to them but so in a in a text message leah informed Carmen that mark has asked her to act in this liaison capacity hey the next day Carmen returned all of my technical equipment and on in his defense or just you know saying something good about him every piece of equipment was in perfect condition nothing was missing nothing was damaged and he returned to me in a very timely fashion only like four days after my workshop had been completed okay so I have no problem with that the the state of Anarchy took very good care of the equipment they borrowed and returned it to me all intact September 20th Lea sent an email to the state of anarchy on behalf of me declining the state of matter he's offered to mark to accept $1000 as total compensation for my conference participation this letter state stated that the actual total owed to mark by the state of Anarchy was thirteen thousand five hundred twenty dollars now I'm going to give you the breakdown of this now people all say oh such a huge number first of all that's not a lot of money folks okay when you realize how much expense a lot of things go into go into things and especially to pay people to do technical work and an editing work that's not that much money okay so this total included here's the breakdown okay my workshop sales which were agreed verbally by Carmen to be given to me after the event after I hosted the workshop 104 tickets sold as Carmen's own numbers which I finally demanded after the workshop and he went and got the records and told me we had 104 ticket sales through state of Anarchy website so we finally got the number of 104 paid attendees through the state of anarchy okay the tickets were sold at 120 dollars per ticket that total is twelve thousand four hundred eighty dollars for my workshop alone okay and Mark's affiliate ticket sales totaled one thousand forty dollars these were the sales that I received the five percent of through the click-throughs from the banner on my website which each click through that was followed by an actual purchase generated an email on the back end of the server that state of Anarchy used sent an email to me saying this is your affiliate sale and this is how much it totals you will be receiving this much for this ticket sale we took all of those emails we put them into a folder we tabulated and checked the total of how many affiliate sales I got from state of Anarchy and it totaled one thousand forty dollars in affiliate sales so my agreed verbal contract conversation with Carmen that would be my compensation for the participation in the event was my workshop one hundred percent of my workshop in lieu of a speaker stipend and/or workshop split which was twelve thousand four hundred eighty dollars plus my affiliate ticket sales which was one thousand forty dollars okay so that is thirteen thousand five hundred twenty dollars total compensation that I was owed in this same email in which I broke all of this down I said that I would agree to cover the cost of the restaurant rental for my workshop and deduct that from the state of Anarchy x' total figure that they owed me and accept a lump sum of eleven thousand five hundred and twenty dollars so if somebody can do the math okay what is what percent of thirteen thousand five hundred and twenty dollars is two thousand dollars okay it's somewhere around I think eighteen percent could be wrong it might be less than that I don't know if anybody can do that math real quick and give me the figure but you know it's not insignificant to take $2,000 off of a bill of 13 okay that's a significant amount okay so the I agreed to take that off the total figure and accept eleven thousand five hundred and twenty dollars I did not agree to nor was I willing to accept a monthly weekly or any other payment plan I don't want this in you know chunks overtime where I'm gonna probably have to be hounding and beating down someone's door to say hey you still owe me eight thousand do you have another thousand you know this month that wasn't my agreement I never made such an agreement okay you know if you somebody agreed to sell something that was very expensive for you like an old heirloom diamond ring or something like that and they took in you know ten thousand dollars for the ring and you said well where's my money that you agreed to help solve for the ring you you agree I agreed to give you a thousand on the sale so where's my nine and they go you know what I don't have it and I'm gonna pay it to you in small increments over nine months I'll give you a thousand dollars a month for nine months and you know like that wasn't our agreement you said you'd sell it and you'd give me you know you take 10% you'd give me the nine thousand we never made any agreement about a payment plan I'm under no obligation to accept the payment plan from someone who collected money on my behalf to be held in trust for me now here's what happened folks see here's the crux of the whole thing okay and we're gonna get to the crux of the whole thing okay and in the in a call in the conference call that happened because they finally admitted what happened okay so I said that I'd take off $2,000 and accept eleven thousand five hundred twenty dollars in a lump sum payment that weekend Carmen called Leah by phone and blew up at her and saying about my workshop accusing us that what on earth is happening of holding a quote separate event which competed with the conference and accusing my work attendees of being too cheap to pay for conference tickets quote-unquote being too cheap to pay for conference tickets that's what he said about people who attended my workshop okay Harmon launched many ad hominem attacks toward Leah and me actually screaming at her and verbally berating her and blaming what on earth is happening for the financial failure quote-unquote of the Anarch adelphia 2019 conference okay absolutely we had nothing to do with the financial failure of this event we had everything to do with the success of this event by my participation and promotion of the event and I verbally contractually fulfilled every obligation that I made by my word and then some giving equipment that I was under no obligation to do so for free without a rental fee okay paying for an editor when Carmen told me he was going to complete the documentary in time for the event or in a timely fashion and then didn't and then reneged on that agreement and did not complete that work in a timely fashion and I had to hire an editor out of my own pocket so you could say I lost money there by agreeing to that because I didn't want to be a false advertiser and go against my word to the people I said we're gonna be showing my film at this event I had to somewhat back down from that agreement and say folks I'm sorry but we can't honor that we have to only show a rough cut that hurt me to have to do that and we worked really hard even just to get that ready we worked four months ago Leah you were like like were obsessed it was a successful on this okay I was without her what happened period the end that's it okay anybody who says otherwise doesn't know what they're talking about or they're lying because you worked meticulously and in an obsessive way to get that documentary in the shape that it was in for the rough cut okay all right so let's continue with the timeline September 25th 2019 this is where we really found out what really happened and they did admit verbally to me what and okay this was a Skype conference call and this is a big crux of the timeline here so everybody pay attention September 25th 2019 mark Lea Carmen sunny and Pat hold a Skype conference call for approximately one and a half hours to discuss the financial situation following the conference it is confirmed to mark during this conference call now listen up everybody listen up here okay that the reason the state of Anarchy offered mark such a low figure for his conference compensation was due to the fact that instead of holding mark's workshop ticket sales in trust for mark that had been paid by attendees of my workshop that they had actually spent that money that they collected for my workshop sales to fund the expenses for the an arc adelphia 2019 conference itself okay you understand the implications of this Pat and I were both on that call they agreed to this so I want to say to Leah and Pat I want to ask you both was this not disclosed during this conference call finally to me verbal yes okay Pat okay thank you okay so Pat you told me at this point that Carmen and Sonny and you when you were a member of this you did not allocate that money toward holding it in trust to be paid to me after the event you actually took ticket sale money in and did not delineate that or put it in any separate accounts or just hold it and set an amount that had to be held okay and you use whatever monies came in for the funding of the event as they came in is that true yeah okay so to me that is a terrible business practice and it borders on fraudulent business practice okay most people would call that embezzlement now that the legal term for that would be embezzling funds that are that are supposed to be held in trust for something other than you are using them for so if I collect money for the documentary and I don't use it toward the documentary then that's fraudulent like I'm saying here's what I want to do with the money that you're donating to the documentary and if I don't pay an editor higher and pay an editor I'm I'm collecting that for a fraudulent purpose okay so in this sense that money was supposed to be held to be given to me as my compensation for participation in the event but instead the organizational team specifically Carmen and Sonny and pat was repulsed by this upon understanding what had a card because he wasn't aware that Carmen made the verbal agreement to pay me 100 percent of the workshop sales he thought we were under a split and thought that that money could be covered but what it was was a gamble yes you know I had never been informed that you Carmen agreed to put something in escrow that was never how things were being done the way that came in was used to finance the well I didn't I didn't I didn't tell him he had to do that Pat okay so that would have been a wise business practice to do but there was no I never commanded or demanded I should say that he'd do that I just assumed he would handle it responsibly and then pay me what I was owed after that's all okay cuz that's how I don't five swilling I was willing to move forward in that respect because I am able to pay my debts or was willing to pay any debt that might have occurred which I did right well and and Pat that's why I'm considering you honorable in this whole thing regardless of that particular aspect of the business practice that was conducted and was mismanaged and was gambled upon okay that nice Mayhew honors and he said I'm willing to pay what you're owed to me you said we've made a mistake here okay there was a lack of communication and whatever regard but guess what this money was spent it shouldn't have been spent that was the wrong thing to do and you said I'm willing to make it right now Carmen and Sonny have also said they are willing to make it right but they didn't put their money where their mouth is because they haven't made it heroin right okay all right all right so I just wanted to get that perspective we're running out of time so I want to continue with the time line okay so that's what happened folks they funded the conference with my workshop money and guess what take that as the whole crux of this entire show and what happened okay you don't really need to know anything beyond that I word it like this the people imagine if you put again shirts on consignment you go to the store to say you sold a hundred of my shirts okay at $10 a shirt okay so that's $1,000 that you have to give me right if there was a breakdown okay it's it's it's a $900 and a hundred godus goes to the store whatever right and then you bring your consignment receipt you say here's the proof that we made this agreement I want my $900 and the store says oh we did in fact sell all of your t-shirts but guess what we don't have that money we spent it on our electric and water and gas bill because we were running low on cash this month and we spent it on our expenses that's what it's the equivalent to so I want people to put themselves in that position most people never try to put themselves in my position you know they want to demand and demand and demand things of me but they don't actually put themselves in the position that I am occupying okay and dealing with people from all kinds of backgrounds and walks of life and different types of moral persuasions and just imagine if that happened to you after you you put up expenses you work to make something happen you fulfill your obligation and then somebody goes you know what we collected that money on your behalf but we spent it on our expenses how would you feel about that you wouldn't feel too good about it you'd be kind of angry about it if you're being honest with yourself okay so that's all I'm saying I'm not even gonna get angry folks I move through all of that okay I'm just gonna ask you to put the shoe on the other foot okay to walk a mile in their shoes and say how would I feel if this was done unto me and that's all I'm saying is don't act like that toward other people you don't want that done to you so don't do that to other people that's it that's the apophatic variant of the non-aggression principle or of the Golden Rule okay do unto others that which you don't want done unto yourself very simple that's the whole principle of what we teach her on what on earth is happening okay and I didn't get a contract because I thought I was dealing with people that could act honorably according to a principle like that but what unfortunately was not the case okay so both Pat Sonny and Pat tell mark during this conference call that they were both under the impression that Mark had negotiated with the state of anarchy an agreement similar to most other if not all the other speakers of an arkadelphia and a speaker stipend plus a 7525 split on the workshop and Pat says they didn't necessarily even include a speaker sleep and it was just a 7525 split with speakers who actually did a workshop no such deal was ever made with mark not verbally by email by text nothing that was never made we made an agreement by phone meet Carmen and Leah as for a 100% of my workshop and nothing else that's and my affiliate ticket sales that's it mark proceeded to ask the state of Anarchy now here's another big crux of the matter during this conference call I asked the state of Anarchy organizers which one of them made the stipend and workshop split agreement with me that was a very poignant moment mark said who made that agreement with me which one of you said that to me and who did I agree to that with dead silence and I said and what numbers did we agree upon what numbers did you say you would give me for the stipend for speaking and what number would be the split percentage on the workshop who made that agreement with me and what numbers were agreed upon and there were crickets chirping no one said a word no one spoke a word after I asked that question because that conversation was had with no one from the organizational team of the state of Anarchy never okay so by the end of the conference call the state of Anarchy agreed to give me a single payment not a payment plan which was never agreed to by me as I've previously said of eleven thousand five hundred twenty dollars as per the verbal agreement that marked me with Carmen for 100% of marks workshop plus affiliate sales through what on earth is happening calm - the $2,000 rental fee for the workshop venue which I agreed to pick up to help the state of Anarchy that was the agreement that we finalized on this skype call okay moving on also on that Skype call I let you guys know that I was leaving the state of anarchy yes you told me you were displeased with how things had worked out and that you would be leaving and dissolving your partnership in the LLC that's correct okay September 30th Pat leach begins his resignation from the state of anarchy by filing paperwork to dissolve his affiliation with the state of Anarchy LLC October 2nd another Skype conference call was held between mark Lea Carmen Sonny and Pat about the financial situation mark suggests to the state of Anarchy organizers to pay off their existing PayPal loan and to attempt to get another a second loan in order to pay me in full that was my suggestion because I said you guys don't have the money you're gonna have to get it from somewhere you're gonna have to take out a loan or borrow it from someplace a financial institution PayPal a family member or members I said so why don't you pay off the loan they'll see that you paid it off in good faith and in a quick timeframe and then perhaps they will give you another larger loan for the state of Anarchy LLC well that was something I also heard being discussed while I was editing at Carmen's house the fact that they were eligible for an they were right exactly so paying off the loan was something that would be it would allow them to get more money they were going to actually get more money to reinvest in their own digit to make this whole okay and pay me off so that this would be behind us and I said you could do that get the loan and then transfer that to me via PayPal and one lump sum and that that would I would be okay with that even though it came in much later after my obligations were fulfilled in the conference was long over okay so October 9th Pat reconciled his disparity for the amount that was owned to me owed to me by trans during $2,500 to Carmen and sunny via PayPal to fully cover his portion of the debt that they agreed was owed to mark so Pat was trying to get out of the company by this point which is an actual limited liability corporation in the state of anarchy and he wanted to dissolve his affiliations with them but give them money that would be his chunk of what they would pay to me in one lump sum instead of giving it directly to me because I said they could even help pay their loan with that don't give it directly to me actually said to Pat don't give it directly to me I want them to try to make this whole by with a full amount okay so don't give me that and then leave them with another chunk give that to them I want to wanted to give it to you because we had $5,500 in the bank folks if I was greedy right if I was a greedy person I would have taken any of the chunks offered to me at any time by any of these people involved okay it was not about the money it's not I don't care whether I'm never paid for this I don't care does it affect me does it hurt me absolutely okay but I long ago resolved I'm not going to be compensated for my involvement in an arkadelphia 2019 it's a it's a assured thing in my mind okay so yes so um yeah what we are of limited time I want to try to blow through the rest of this timeline okay so the point is I didn't take money from Pat I said help them pay off give that to them they could pay off the existing loan and then you could try to pull in another loan and get me paid in full then this way you guys can honor your agreement and you know this doesn't have to be publicly aired to any the problem was they never even called PayPal to negotiate they would have found out because they don't have any sales coming and they weren't eligible for a they didn't call PayPal and discuss it with them they just literally paid the loan and you know threw it into the wind and then to my knowledge no other attempt that alone from any financial institution was attempted nor were any personal borrowing of money was was any personal borrowing of money at to my knowledge okay they didn't need my they didn't need my money pay back there's enough money in the count okay you took my money and then they financed their trip to Mexico where they are so now technically you were also slowing from a disregard because they took that money which was all I was really put towards and paying me the lump sum during my gear Wow they refuse to return my gear and it would I wouldn't be surprised if they brought it down to Mexico with them Wow every single person that went to the conference and used the affiliate code was ripped off because they expected that - that's right oh no mom that's the real victims beyond me are the people who paid their hard-earned money to attend my workshop but I'm gonna get to that in a moment okay because I want to say why the workshop was a success so this money was to be used to negotiate the payment of the state of

Anarchy s original PayPal loan in order to apply for a new loan to pay me in full it didn't work out that way because apparently they were rejected for that second loan October 10th Pat leach officially resigns from the state of Anarchy Media LLC November 9th after numerous attempts to contact the state of Anarchy by phone Lea finally got a hold of them via Skype and did a call with a Skype call with Carmen and Sonny Lea requested that they email mark with an update on their plan for his compensation for his pay knows how many times I tried to get ahold of them and they were just totally ditching me constantly as do I did not want to do it right they didn't want to deal with the Lea because Lea you're pretty meticulous about getting things in in writing - at least by email and they know I'll just talk to them on the phone because I hate typing you know I hate sitting at a keyboard and typing things okay yeah well I kept telling them you know just type out what your plans are and send it over because we just over and over and made them do in writing right okay so November 10th Sonny sent an email proposing that mark participate in a website referral program now I originally in my statement said that this was some multi-level marketing okay it's not multi-level marketing that is a inaccurate way that I described this program but it is a website referral program and they basically asked me to do the same thing that I had just done with the conference okay in the conference I put their banner on my website sold a lot of tickets through their website by directing people from my website to theirs that's called an affiliate program that's how an Arkadelphia 20-19 became successful and it was a very successful conference and this speakers were great and it was a great event okay ruined by all these shady you know things that happen monetarily after the event but a very successful conference as far as speakers and information and attendees were wonderful okay so basically what they were proposing to me is put another banner up on your website and allow click throughs because you have a bigger audience than we do we'll make the money in our affiliate program and then we'll give will pay you through that imagine asking me to do the very same thing that they had just completely reneged on their verbal contractual negotiations - and asking me to do it again and what's stopping you from becoming an affiliate there you haven't I mean if I wanted to start an affiliate program I could put a banner on my website myself and collect the money what what how is that them paying me for what they agreed to pay me when they took the money and funded their own event with it that's not making anything whole and so it's seen the other thing is folks I was never apologized to for any of this it's like there was no remorse for this they were they were they were they were hostile they were belligerent they were insulting they were calling you the great mark Pesce oh they were calling me names they were they were just aggressively quarrelsome the entire negotiation and you know what we would sit down before the meeting ago let's make sure that we keep them close in our arms like literally we said we had this you know meeting before a few times we spoke with them let's not push them away let's give them a chance let's hold them close embrace them I want to give them every opportunity to make this right we did that for three months in the entire time they just ripped at us they Sonny told me the balls in our Court there's nothing you can do about it so at that point okay we're we're very limited on time we have 10 minutes left in the show so at that point I considered the affiliate program offer very insulting to be quite honest and I really didn't want to speak with the man for that because I felt like that's what you offered me after basically stealing you know twelve thousand four hundred dollars a workshop ticket sales okay so I concluded that Carmen and sunny from the state of anarchy at that point were acting in bad faith regarding their agreed upon compensation that I was owed for the an occur at arkadelphia 2019 conference so in order to help out the conference organizers I originally agreed to take two thousand dollars off the total owed to me if that compensation was fully paid in a reasonable timeframe okay after a period of over seventy days okay without telling anybody that this was going on at all okay I finally considered that the this offer is retracted there in bad faith and I retract I retract personally my offer to take that two thousand dollars off the bill that they are Odin owed me okay so based upon their total default of payment to me I consider that the official total owed to me by the state of Anarchy to this day based on their verbal agreements to me to make their agreements whole and settled is thirteen thousand five hundred twenty dollars November 26th I finally went public and released the public statement regarding the situation between myself in the state of anarchy on the what on earth is happening calm website and my social media accounts as of December 2019 Carmen Koran she is claiming that he asked Pat Leach to offer mark the $1000 as payment in full in advance of the conference because Mark's workshop was quote competing with the conference but why would the state of Anarchy even have to do this if they thought that they were getting 25% of marks workshop sales and why was this not brought up at the lunch meeting on September 19th because he knew he never took Hartmann knew he never told his other partners that he had made that verbal agreement with me for 100% of my workshop and he also knew that they had taken that money that was supposed to be held in trust and spent it on their expenses now here's the screenshots of what Carmen has been saying okay car mark agreed to speak well in advance of any mention of his workshop no stipend was discussed when Mark proposed the workshop we agreed then he said he needed six hours which meant there would be no way to have it run concurrent with the conference I've already said this we agreed to let him do it the day after on Monday agreed when we started we started promoting a lot of people started buying only the workshop and not the conference ticket that was this was never told to us until after all of this debacle happened okay when it started to get out of hand we had Pat leach to offer him a flat rate of $1000 to consolidate the workshop as a fourth day of the conference in other words this means I would forgo give taking any money from the workshop I would take the thousand dollar donation and that the the for the the workshop would be the fourth day of an orchid elfia this is what Carmen is claiming here that he charged Pat leach to do which was not what he asked him to do and never happened yeah this is the spin that we're hearing now never mentioned to us in a conversation whatsoever right what Pat gives him the thousand dollars without really explaining any of this to mark so he's trying to pin that on Pat and we found out mark was under the impression that Pat was facilitating a donation to mark you saw the Skype message screenshot yourself ladies and gentlemen I showed it on this show and I asked you what would you think okay Pat say as he gave the thousand dollars and that we were good from that point on we were under the impression the workshop sales became day passes for the fourth day of anak adelphia total bullshit and in the same thread Sonny himself says that they thought the thousand toward what they owed you they cannot even get their story straight in the same thing in their you know their podcast well then he's going on to say we offered them partial him partial payment I never agreed to take a payment plan as I said it's not about the money it's about being integral being had being an integral and a person with integrity and doing what you say you were going to do in honoring your word okay then he goes off calling my you know people who follow my work cult members who got free admission ten people got into the conference for free on my guest list that's all folks and you know what folks uh we might have to continue this at another show but I want to try to wrap this up November to the present the fallout put up a halt to almost all projects at water on Earth is happening for several months because of how bad it financially hurt me I had the city came and tried to condemn my home I'm almost had to move out of here because a small crack in the shin the facade on my home about a foot long crack actually it's only uh not even structural they deemed oh that's a structural on something that makes the structure unsafe and I had to shell out ten thousand dollars to uh from my own pocket to get the outside of my home redone with a masonry contractor okay so that killed me financially during this time okay and you know we we put shelved projects for a while that the documentary was on a hold obviously the show went into hiatus interviews and research all of it pretty much I have not really done much what on earth is happening work in this downtime getting back to it now finally I was an extreme emotional distress over what I considered betrayal and blatant disrespect toward myself but most of all my entire body of work and I spelled the trail wrong there it was heartbreaking it was heartbreaking to to go through this with them I know these guys are down there promoting a new event with footage that I shot from last year even worse they're posturing upon the thermal whirl of so-called moral high ground and they're turning this into an advertisement for their piggyback event onto an arc apoco I'm going to blow through these last points real quick because we were almost out of time people will ask why didn't I insist on a legal contract okay my answer is the same thing I said to the state of Anarchy is regarding this whole thing actually in the conference call we had I don't think anything like that should be necessary between people who claim to understand the principles of anarchy and natural law namely don't steal quite frankly I didn't think it would be necessary and I don't like operating that way I like operating according to my word which I'm capable of honoring late December donations for the completion of the natural law documentary are now being accepted through what on earth is happening donation gifts at gift stop water on earth is happening calm we've brought on a new video editor this month Sabrina vicino is now hired to work on the completion of the natural law documentary which is currently in progress and is going great we have about one minute left ok honorable mentions those who did act with integrity in their work with what on earth is hell is happening and at the anok adelphia conference Pat leach Mike seaman Nate cap Mitch Thompson Logan Hart Nia Bullock Mackenzie Wolf flowy Josh Long's ara John Penn well all of the speakers who participated in the event all the volunteers who helped out the Anarchy Adelphia attendees who were wonderful and especially my workshop attendees because let me tell you something folks a couple of people who have already said they're out there teaching natural law and let me tell you something folks that's not that's worth a hell of a lot more than thirteen thousand five hundred twenty dollars that new teachers of natural law are out there doing the great work ok that to me no price can be set that is of infinite value if you ask me so I consider that workshop tremendous value and tremendous success and I want to thank the people who actually participated in that and gave of their hard-earned resources to help make that workshop a success and guess what those were the real victims in this whole debacle not mark passio so final thoughts guys because we're out of time Brett Hatton and Jana ESP were not on that list they should be we were rushing to put it together thank you to everyone that supports my finis work you know it it's really an amazing thing to watch you know all of these incredible people learning from Mark and applying this in their lives and I I think you're the most incredible people that I've ever come across in my life and it's totally aggressing it's a blessing for me to be able to help and do what I do to help and I do it with my whole heart and I just think every who's involved Pat thank you for acting with integrity in the fallout of all this you really attempted to make things right I want to commend you for that thank you for inviting me on the show and I look forward to working with you in the future without a doubt without a doubt all right folks if you find the work that we do here at what on earth is happening valuable please go up to what on earth is happening you could go to the donation gift site and pick up all hard copies you could go get the Ark Drive you could make donations at the donate page that's all the time we have for this edition of what on earth is happening ladies and gentlemen government is slavery and we will see you right here next Sunday at 3:00 p.m. Eastern thanks for watching have a great [Music] [Music] [Applause] [Music]

What On Earth Is Happening Show #224

Topics: *A Freedom Odyssey - Will Humanity Become A Type 1 Civilization?, Potential release date for "Mark Passio & The Science Of Natural Law" documentary at SEED 4 Conference, Moving past the Anarchadelphia 2019 drama, How the "Court of Public Opinion" would work in a society based in true Anarchy, Fundraising effort to complete the Natural Law documentary, the Kardashev Scale of Civilizations, Type I/Planetary Civilizations, Type II/Stellar Civilizations, Type III/Galactic Civilizations, Humanity's progress in Consciousness, Where humanity rates on the Kardashev Scale, the Human condition of the Slavery of Humanity, False Love vs. Agape, Nothing has Real Value in the condition of Slavery, Freedom as Total Possibility, Slavery as the Destruction of Possibility, Apophasis, Stanley Kubrick's 2001: A Space Odyssey, Kubrick's decision regarding the "2,000,000 Year Cut," Earth has been turned into a Prison Planet, Government IS Slavery, Most people still don't know that Government is Slavery, the breakdown of Ego to be able to see Truth, there are only Two Solutions to all Human Problems: Philosophy and Technology, Philosophy solves Spiritual/Mental/Emotional/Inter-Personal problems, Technology solves Physical/Pragmatic Problems, Most people still don't understand Occultism and Natural Law, for humanity to advance to a Type I technological civilization it must advance Spiritually, ALL forms of Religion are holding Humanity back from becoming a Type I Civilization, Polarization Dialectics, Slaves fighting against other Slaves, Memory as Humanity's "Sixth Sense," Understanding past mistakes of Humanity or repeating them endlessly, Most people have no Memory for History, True Scientific Methodology vs. Scientism, the Trivium Process of Truth Discovery, the critical difference between Having Knowledge vs. Understanding Knowledge vs. Doing The Right Thing With Knowledge, Teaching Natural Law, there are not enough modern teachers of Natural Law, Armchair Quarterbacks, Most people are Doing Nothing while complaining about others' Work, Getting Involved and being part of the Solution, the prevalence of Atheism and a total Lack of Spirituality in Human Civilization, Logical Anti-Religionism vs. Reactionary Anti-Religionism, the so-called Freedom Movement's lack of acknowledgement and understanding of Natural Law, Karma and Free Will, Right and Wrong are not decided by Human Beings, the dominance of Atheists in the so-called Freedom Movement, how Atheism is the Great Destroyer Of Freedom, No Atheist can ever be a True Anarchist, Moral Relativism in "Freedom Movement," the completely out-of-control Human Ego, the ME-ME-ME Society, Most people are De-facto Satanists, Most people are completely Spiritually Sick and don't know they are Sick or how to become Well, what True Wellness is, the Multiple Dimensions of Wellness, Shadow Work and how to do it, why most people would rather die than do shadow work, Gratitude as the Currency Of The Future*

freedom man that's what it's all about you've got to groove on freedom like the good book says welcome you are listening to what on earth is happening this show will discuss the topics of human consciousness mind control natural law the occult and all issues that affect the freedom of the people of earth what on earth is happening will endeavor to shine light upon the darkness of our world and to offer empowering solutions to the problems we face as humanity approaches it's critical moment of choice and now here is your host mark pascio welcome one and all you're watching what on earth is happening i'm your host mark pascio my website what on earth is happening.com thank you for tuning in today ladies and gentlemen government is slavery and here on what on earth is happening we are ending slavery one mind at a time today is february 16th 2020 this is episode number 224 of what on earth is happening thank you for tuning in today's show is going to be about is it possible for humanity to become a type 1 civilization we're going to be talking about what that means talking about what it entails and also explaining some of the barriers to crossing that evolutionary threshold of becoming a type one civilization before we get into the show today i do have a couple of quick event announcements so if we uh switch over to my laptop i'll get those taken care of this is the episode art for the show today uh it's great as always thank you to brett for putting that together for us and i will be speaking at the seed for conference in athens ohio this will be taking place may 29th through 31st of 2020 i'm featured along with a lot of other great speakers including mark devlin douglas martin brandon martin nate capp logan hart sean mccann and more you want to check out skatopia.org and go to the conference section of the website for more information on the seed conference really looking forward to participating there and more likely than not i'm going to make this as a as a um a potential early announcement that we may be screening the final version of the natural law documentary at the seed conference it looks like we are on track to being able to do that so i've spoken with brandon about that and it looks like we are going to uh host the premiere of the documentary at the seed conference which won't be the rough cut it would be the final cut or at least something very very very close to the final cut because we're making a lot of progress with the uh mark pacio and the science of natural law documentary my first ever documentary film so very happy about the progress that's being made there it looks like it's well on track i want to thank everyone for making very generous donations to the cause of completing that documentary film because without your support we would not have been able to do that we were dead in the water for a little while after the anarch adelphia conference and uh your generous donations have really allowed us to budget for this film to pay a video editor and to get that film completed so thank you so much to all the donors so many very kind and generous donations have come in for this film that it's it's overwhelming so uh that being said um i just want to say just as a brief addendum to that that um last week's show uh some some people said thank you for doing that that that was very much needed and very much explained the situation about what happened in the aftermath of that conference and i just want to say that uh nothing was done in any vindictive sense if you watch it i gave the facts exactly as they were i did not embellish anything i did not take any pot shots against anybody or or do uh you know any kind of ad hominem attacks i just told people exactly what happened and i want to put that all behind me i don't want the drama of that i don't want to go back and forth with it i told the truth about what occurred and people can make up their minds as to who they will believe see that's how it would work in an anarchic society ladies and gentlemen there would be no uh courts or police or cages for people to be thrown into what would decide what how people interact with people who don't honor agreements would be the court of public opinion where both sides tell their uh you know side of what happened and people would make up their minds based on the facts and evidence presented regarding what occurred and you know it's part of why i the the seed is really going to be the last official conference hosted by someone else that i'm participating in and i think that they're going to run this event with uh total integrity uh i i you know know that brandon and douglas have that kind of integrity and i know that they'll do a fantastic job it's why i agreed first to take part in it and i'm gonna honor my agreement because uh so far they have shown me to be trustworthy i see no indication that that will ever change and i think this is going to be a really great event to attend and i think they're going to do a great job at organizing it so i want to thank them for doing that i'm looking forward to taking part in seed four uh that being said uh i am still accepting donations for the um completion of the mark pacio and the science of natural law documentary film um there's five donation tiers if you go up to gifts dot water on earth is happening dot com and click documentary the five tiers uh range from fifty dollars to a thousand dollars and a hundred percent of donations go directly to production costs if we have anything left over after production costs we are going to put that into the printing of these flash drives and dvds as well as maybe possibly if if we can do it making some of these things available in our local area for free like printing dvds and just leaving them in certain places so we're going to see if there's enough of a budget to just print and do that at some point but again that will that will be based on you know if people do support the film and you know when it is released in the gifts area for a donation you know make a donation to uh to support what on earth is happening all donors uh that donate to the documentary cause will receive a free complimentary copy of the completed documentary on flash drive and dvd we are holding everybody's order okay that that puts in an order for a donation for the documentary completion and then we are going to be sending out uh those to people uh one flash drive one dvd to everybody who donated um when the film is completed so please do be patient because when it is completed probably sometime in maybe early may we're just speculating it could be a little later than that we're going to have many many orders pre-orders and regular orders to send out so it may take us a little bit to get every one of those out to people but rest assured everyone will get the documentary that they donated for or order on the gifts website also as i said last week we have made available a special flash drive a special solid state flash drive i shouldn't even say flash drive it's a full solid state drive it's a usb 3 and c connection so if your computer has usb 3 or usbc this drive will attach to either type of connection and it's called the complete mark pacio one great work collection here's what's on this drive all publicly released marc pacio presentations and presentation slides all archived marc pacio interviews and ancillary videos from 2009 to the present the entire wall on earth is happening podcast series the audio podcast and the entire world on earth is happening video show series up to date with associated images and reading materials that have been uh made available with each podcast we're putting my band the founders no masters no slaves ep on this disc as well and it all comes on a very nice sandisk 500 gigabyte solid state drive that as i said has usb c and usb 3 connections you can um make a donation for this drive at gifts.what on earth is happening.com thank you to everyone who has donated for items on this store and again voluntary donations is how we continue our work here i never tell anyone to put themselves out if you don't have the money to donate for anything we make everything available for free eventually that i put out uh the only thing we hold for a short amount of time is the most recent presentation and usually we only hold that for a couple of months and then it goes out for free on youtube so all my work is for free online however if you want a hard copy you can donate for that at the gifts website so thank you for everyone who has voluntarily made donations at that site it helps us to continue our work here at what on earth is happening thank you so uh that's really all the event announcements that i have for today so we're going to jump right into the presentation material and we will be taking calls i am going to allow time for calls this week definitely in some form or another okay i'm going to try to knock this presentation material out in less than an hour and a half i'm going to try to get to at the halfway point to calls so to join us you could go to what on earth is happening dot com slash show and click at the bottom of that page the call-in link that will allow you to open up discord if you have the app installed uh i highly suggest using the app on a desktop or laptop computer with head with a headset okay that's the best way you're gonna get call quality okay you can use your web browser but i don't really recommend that path i recommend actually installing the discord app it will have better sound quality and it will connect to your headset better you'll just have a better experience so what on earth is happening.com show and click the discord uh call-in link on that page that says call into the show using this link and that will enable you to um go into the calling room uh on the discord server that we run so calls in hopefully the uh second half of the show so the topic for today episode number 224 is 2020 a freedom odyssey this is obviously a take on 2001 a space odyssey and this is about will humanity actually break its chains and become a type one civilization and continue its evolutionary uh development in both consciousness and uh physically uh and uh socially and technologically and you know basically move out beyond the confines of our planet into the stars beyond and our solar system and beyond so there are many prerequisites for something like this taking place um it really does have to do with the true evolutionary development of a species and um i want to first explain what a type 1 civilization means because many people may not have heard about this term a type 1 civilization you know so then are there other types and yes there are so for those who may not be familiar with the types of civilizations that exist throughout the universe or that are postulated to exist throughout the universe this is known as the kardashev scale of civilizations it's a very interesting topic i first heard about it many years ago listening to talk radio and um the scientist who proposed this scale of the types of civilizations in our universe was named nikolai kardashev where the term kardashev scale comes from he was a soviet uh cosmologist and uh he proposed this idea that there are different types of uh civilizations of you know beings that have a higher order intelligence and that it is essentially based on the type of energy that they sustain themselves upon because all life in the universe requires energy and uh he proposed a scale of civilizations that um really had to do with what type of energy that they use and on what scale so a type one or a planetary civilization on the kardashev scale can use and store all energy that is available on that civilization's host planet okay so in other words if we were a type one civilization we would be able to use uh the energy coming to the earth from the sun we would be able to use geothermal energy etc or possibly even uh you know energy that we tap into that is known as radiant energy or free energy from potential other sources and we would not need to burn hydrocarbons for a source of fuel what people laughingly call fossil fuels uh these things are not from fossils that have decayed and become into oil uh they're abiotic sources of fuel that come from our planet and are renewed just like we renew our blood in our body you know uh if a pint of blood is taken out it is then regenerated and renewed with the hemoglobin uh oil is the same way on on the earth it is like the lifeblood of the earth and it is regenerated from the earth the idea that there's a thing called peak oil we're going to quote run out of oil you know certain areas of the earth could be you know my drilled dry yes but it doesn't mean that it won't eventually be replenished and you know i've said many times this is basically raping and pillaging the earth for its resources because it's like tapping into the veins of a human being and pulling its blood out uh it's like a vampiric vampiric system okay so um a true type one civilization would not do this to its host planet because it would realize you're in danger of actually killing your host planet and there they would be more intelligent than to you know continue to extract hydrocarbon fuels like this and burn them in a polluting way and in an unsustainable way so um they would move on to solar and geothermal forms of energy and other forms of energy like i said free energy radiant energy so um we are not even a type one civilization i'll talk about in a moment what earth uh and it you know human civilization constitutes on the kardashev scale uh the estimate by most scientists but that's a type one or planetary civilization a type two civilization is called a stellar or uh perhaps a solar civilization in some ways of explaining this but in general they call it a stellar civilization and that means that that civilization can use and control energy at the scale of its entire solar system meaning that it can harness the energy of its host star okay so if we harness the energy of the sun truly you know the full potential energy of the sun we would be considered a type 2 stellar civilization clearly a stellar civilization would have begun the process of space travel and visiting other uh planetary systems in its local galactic neighborhood when you move up the scale of civilizations to a higher order of uh you know energy capability and obviously a higher order of intelligence and technology and i would suggest a higher order of spirituality you get to what is known as a galactic civilization which we can scarcely conceive of we first of all we would be able to scarcely conceive of a type 2 civilization the the technology of a type 2 civilization would begin to outstrip even human imagination where it is right now and we would perceive anything of a type 2 or higher as supernatural or magic it would seem to us we would barely be able to conceive of their technological advancements and and feats and uh they would seem like almost supernatural beings to us okay i likened it to taking a piece of high technology developed in the modern world today uh back in the bronze age or or the stone age and showing it to an early human and they would not even be able to conceive of what you were showing them okay so it's similar to that except take that extrapolate that to way out to advanced technology we would not even be able to conceive of what their technology was doing in any form okay or what it even was uh but a type three would be well beyond even a type two because they got to the point where not only can they they harness the energy of stars individually they can harness the energy of all the stars of a galaxy or at least a a local galactic neighborhood okay some people say that this could be semi-galactic and or eventually becoming a full type 3 would mean they can harness the energy of an entire galaxy it's almost inconceivable to us as human beings considering the scale that we're operating on here on earth and we have not moved beyond our planet most people can't even conceive of the scale of the earth first of all okay this is why you have so many misconceptions of the size shape of the earth etc people can't even conceive of the size of how large our planet is it is almost unfathomably large to a human being and uh people really can't even conceptualize things at a planetary scale much less at a scale of a solar system much less than a scale of interstellar distances between stars or how large a galaxy is or then how large the intergalactic space between galaxies is it's almost inconceivable to most human beings they their mind cannot even think in terms of distances like that or sizes like that so a type three or galactic civilization would be something akin to the borg or beyond the borg's capabilities of star trek uh lure okay uh they can use and control energy at this the scale of its entire host galaxy now there's also a postulated type 4 civilization on the kardashev scale and a type 4 civilization would truly be able to do things that we would consider supernatural so we're talking about literally bending space-time manipulating space-time traveling in time you know traveling between galaxies in almost instantaneously incredible feats of thought mental prowess um literally leaving this type of space-time continuing continuum and inhabiting others possible other membranes of space-time that are proposed that exist so we're talking about a universal civilization at that point that they would be not only intergalactic but universal and they would theoretically harness the energy of the entire universe obviously there probably is not a civilization anywhere in the universe that that is that advanced but there are probably some civilizations in the universe at this point that have uh evolved to the point of being at least in at least semi-galactic or galactic civilizations it's proposed it's been proposed by many people that earth may be being controlled or manipulated by a type 2 civilization if a civilization was so advanced to be a type 2 or stellar civilization again their technology would be almost invisible or inconceivable to us uh they would be so far technologically advanced and if they were prone to use us as a resource or a farm of some type it may theoretically be possible that that is already occurring here on earth but we can speculate about that from now until the end of time the solution is still the same the solution is growing in consciousness and truly growing in spirituality so that we're not manipulable in certain ways that being said um let's uh let's jump back to the slides and let's take a look at where earth at earth is at in this whole process so what is earth on the kardashev scale what is humanity on the kardashev scale not just our planet but like what is uh what are human beings our whole you know civilization globally what would it rate on the kardashev scale of civilization types well as i said we are not even a type one uh we are considered in the type zero civilization which also wasn't on that chart four wasn't on it neither was zero zero means that you are below the type one civilization and that's what humanity is right now we are considered by most scientists who take a look at the kardashev scale to be a .7 a 0.7 on the kardashev scale of civilizations and this means that we're making our way toward being a type one but it's still probably several hundred years away at least a few hundred years away and i would say that if we got rid of the barriers and problems and worked on the problems to attaining that status that i've said many times that we would probably be able to do it i think human beings are have such ingenuity and creativity that i would speculate that it would take less than 200 years maybe 100 years maybe a little more than 100 years but i think if we abolished the actual barriers that we're encountering to really advancing as a species which we're going to talk about a lot here today that we would break the type 1 barrier within 100 years if i had to speculate but that's a big if okay and as we're going to see we're not really close to doing that because of so many a beliefs that are contradictory to reality that humanity is still you know insisting on clinging on to so let's move on to the next slide where i kind of uh took the idea of uh you know 2020 a a freedom odyssey 2001 a space odyssey was really about human progress and evolution uh it's a fantastic movie from the uh uh absolute alchemical producer stanley kubrick and i think that people really need to check out this guy's films and even re-examine them and look at some of the messages that he was putting in these films so i want to talk about this for a little bit before we jump into more material there's a scene in kubrick's uh 2001 a space odyssey where early hominids uh that are you know obviously postulated according to darwinian theory as would eventually become human beings whether we accept that theory or not the whole idea is humanity's on an evolutionary development uh pathway and at some point a technol technological object from space comes to earth and it changes the thought processes of these early hominid creatures and what it actually instills in them is the idea of a dominator ideology or a dominator culture it puts into them the idea that they have the right to take what they claim or believe that they need from others of their species and from the animal kingdom whereas before they were living in a natural homeostasis and equilibrium with their environment and their uh you know fellow beings at this point what happens is one of the leaders of the pack of hominids uh kills an animal and um you know teaches the rest of them how to eat the animal uh strip it and eat it and then he is uh beating the skeleton at one point obviously to show his male dominator hierarchical mastery over this creature and you know uh domination of his pack with a bone that he uses as a club that he also learned how to murder his own species with who were uh basically uh getting in the way of resources that he wanted in the form of a watering hole okay so um which was never something that they killed each other over in the past until this object this monolithic black stone object which is a big thing in the dark occult that is referred to as the black stone a big thing in sumerian lore ancient sumerian occultism but uh getting back to the storyline he's beating this uh um perhaps a wild boar with a with a bone and he tosses it up into the air to be at the end of this scene and it's twirling and as it twirls uh kubrick um the director of this film decides to cut away to uh completely ignore over two million years of the development of human beings and all of their civilizations and societies and cut to the point where human beings are now in space on uh space stations and have uh basically established uh two-way transport to earth's moon and a lot of people see this as very puzzling why would he do this okay so what i'm going to tell you is my take on why this is done um this total totally ignoring like 2 million years of a species development of a human being's development and cutting from the point where these beings have basically uh started to murder that not only themselves but other species and then cutting away to the point where they're in space okay and have space stations and advanced technology and he's doing this for a specific reason okay what that time period represents is the age of slavery okay he is actually putting the idea into people's minds in a form of what people considered hubris and daring okay to say nothing mattered in between that point and this point nothing mattered from the point human beings started acting like this and establishing systems of domination to the point where they finally begin to emerge to the point in consciousness where they are breaking free of that and becoming a true type one civilization okay now that's not to say that every being in this film is it advanced spiritually they're not actually they still have a lot of these tendencies and he highlights that throughout the film the film is about the protagonist dave who needs to look at all of those shadow elements of the self to realize how he's being held back from his evolutionary development and how humanity is still being held back from theirs okay so but the whole idea of this cutaway the two million year cut that they call it or even more years whatever it is okay this idea of this cutaway is basically saying that life and civilizations and whatever progress people think that they're making are meaningless only in they're only meaningful in the fact that they could get you to the point sustain life to the point where it finally breaks the mind control of believing that this is the way we must continue to live okay so it's an idea that nothing is really worthwhile in the state of slavery and this is an idea i share and have really tried to communicate with people in my work that it doesn't make a difference whether you have all these wonderful things wonderful technologies wonderful relationships okay you know you could have all the love in the world and if you're enslaved really is it truly love see it's a it's a simulacra of the real thing because beings don't really express love when they're continued to be enslaved and others of their species are enslaved or other species around them are enslaved this is a false notion of love this isn't higher love this is an agape as it was called in the greek mystery traditions of love for all love for truth and ultimately love for what is right this is a false version of i want to have my little situation where it's tolerable and or pleasurable but in the big situation there is violence taking place there is slavery taking place there's coercion taking place and ultimately we're not really doing anything to end that condition of slavery and duress and coercion and kubrick is basically saying at the beginning of this film that everything you think you have everything you think you've done everything you think you've accomplished is ultimately meaningless until human beings break the bondage of slavery that it's it's nothing that we should even concern ourselves with what we should concern ourselves with is actually accomplishing that goal and then moving past it where potential and possibility exist that's what freedom is and slavery is the destruction of possibility it's the extinction of possibility and where we're at now is in that extinction of possibility that constitutes the stagnation of human evolutionary development that's where we are at as a species we are stagnated we are stuck okay and people don't know why we're stuck we're going to talk about understanding that but we're going to talk about we're going to talk about understanding causal factors of why that is and these are all barriers to emerging breaking that eggshell and becoming the star child as kubrick very brilliantly put forward that is being reborn this is the spiritual rebirth coming out of that mindset that's what dave finally emerges out of that mindset recognizing it's holding him back it's causing his own death he has to confront his own death all the things that he thinks are real there are actually illusions and things that are constitute a holding back from truth and holding back from evolutionary progress to be reborn this is spiritual rebirth and i regret to tell people we're nowhere near this we're probably hundreds of years away from this if that because of the things that we continue to believe that aren't real that aren't true that have no basis in reality but we continue to accept and believe with religious conviction because things that aren't true that hold us back from truth that we insist upon believing in is the definition of religion that's what a religion is religion is something that is not in keeping with actual point of fact reality in nature inherent reality okay and that we insist on believing as true see the big part of my work folks is the distinction between the real and the artificial the distinction between reality and fantasy it's i go back to it over and over and over and i'll continue to repeat it because there's nothing new under the sun the idea that all the things that you do in the state of slavery are just repetition every day is the same day in a state of slavery it doesn't matter what advances you make technologically or even culturally etc it's still done in a state of slavery which is a hamster wheel which is a cage that humanity is not getting out of because of things they believe and we have to realize there's nothing new to teach there's nothing new to learn you know i hear a lot of people saying i i liked what on earth was happening better when i was just introduced to it learning all this stuff yeah exactly you want to know why a lot of people have that that effect because it was new to them at the time and when you eventually realize there's nothing new that's going to be added on to like that some thing that is a magical new thing that we didn't know before it's all about morality it's all about understanding objective morality it's all about understanding that rights don't come from human beings it's which is a big part of growing and evolving and getting rid of the ego that's holding us back thinking that we're god thinking that human beings are god and we can author law we can write law down and bind people to it this is all the religious thought process that is holding us back from really becoming that star child and being born again as a as a species okay that's what the awakening process or the rebirth process is all about and then truly becoming a planetary civilization where we can move on to the stars but we're not we're not anywhere near that because of the barriers to becoming a type one civilization which is what i want to talk about right what on earth is happening is always champion the apophatic process apophis means saying what something is by saying what it is not and when you say all the things that it is not then that which remains is that which it is is a big big thing in the mystery tradition schools to define something in the negative you will know what it is is by knowing that which it is certainly most not okay and this is what we have to do we have to say becoming a type one civilization becoming free attaining true freedom as a species and being then enabled to utilize human potential and possibility to then go beyond our host planet is something that is not predicated upon what we must do let me say that again so to really hammer it into people truly becoming a type one civilization and moving on beyond our host planetary system to any other place in the universe is not predicated upon what we must do it is predicated upon what we must stop doing okay and people don't like to hear that the ego is in the way of hearing that see even the new age movement has so much ego in their residual systems in their in their shadow selves that they want to insist don't talk about the negative this is the one of the first this is the first uh tenet of new age bullshit as i call it okay no we have to point out the negatives we have to point out that which is holding us back otherwise we're never going to understand what we have to stop doing collectively as a species you know progress is more about what you stop doing than what you undertake and do as a project those things can take on infinite possibilities and infinite pathways and you know methods okay but stopping doing that which we are addicted to doing that is harmful that's one of the things most people don't want to hear because what does that directly involve that directly involves them changing their own behavior not pointing fingers at others okay and i'm going to talk about a lot of people aren't willing to do that work still and especially in the freedom movement you know again this is kind of more of an addendum to last week's show about the lack of integrity that it often presents itself in the freedom movement this is really hurting the movement very badly and people who have very erroneous ideas about what constitutes integrity in the freedom movement okay both not holding people's feet to the fire where it should be and then being way too hard on people who are actually doing something and trying okay so it cuts both ways that sword let's move on to uh the next slide this is the state of earth right now earth is a prison planet okay earth is a spiritual prison right now as it exists right now now that's not what earth is inherently it has become this through what we have done mostly through what we have believed what we have accepted as true and what we refuse to accept that is true both ways the old saying from the philosopher schopenhauer there are two ways for human beings to be fooled the first is to accept that which is true and the second is to refuse to accept i'm sorry the first is to accept that which is not true and the second is to refuse to accept that which is true ultimately these are the only two ways that we fall prey to manipulation and deceit by the controlling class the controlling ruling class earth is a prison because of our inability to recognize truth from falsehood and our ego is in the way of that development and people don't know how to do the work to break the ego down most people haven't done that work okay and the reason that i will butt heads with some people like that is because they believe they can make progress to removing this this cage from humanity getting us out of the prison that we're in still being in the mental state of mind that they are in not understanding that they have to do more shadow work upon themselves and we could talk about what that entails because a lot of people are confused about that they ask me oh what is the actual process and when you tell them they're like oh it can't be that simple you know and they don't want to do that because it horrifies them one of the things i can't remember the philosopher but he said the thing that is holding humanity back more than anything else is their inability to sit quietly with themselves in an empty room you know that's one of the things that people are loath to do that are they're the most afraid of doing that because they're out alone with themselves and if they really really go deep within and think about it they don't like who they are that's what it really comes down to that's why we see so much outward projection psychologically of constantly putting it on the other person instead of focusing on the self see this is the work that i had to do for years to come out of the satanic mindset and to come to an understanding of all of these principles and an understanding of what really we must do as a species and what we must stop doing as a species and people don't want to hear it because nobody wants to hear your minds messed up you're psychologically messed up you really do need to work on and change yourself i didn't want to hear that when people told that to me when i was a satanist okay i was like you don't know what you're talking about no i didn't know what i was talking about i was wrong my ego was in the way hardcore in the way okay and most people are still in that state where their ego is in the way and they can't recognize it because the spiritually ill the emotionally ill the mentally ill don't know that they're spiritually emotionally and mentally ill they think they're okay it's when you could do enough shadow work upon yourself to get yourself to the point where you acknowledge i'm not okay i have a problem there are problems that i need to work out internally in my own self before i could point the finger at anyone else now i would claim that i have done that work but no one is perfect there is always room for improvement and to do more of it and to continuously refine that process and attain toward getting better and better moving toward a state of perfection but realizing in the 3d world that's an impossibility you're never going to reach perfection okay this is like you know even in the borg in star trek this idea that that's what they're trying to achieve and they're becoming more and more controlling you know to achieve perfection with themselves in assimilating other beings okay it's because they've got latched onto this notion that you can achieve perfection in the physical domain that's where their imbalance went uh when completely awry and got out of control and ran amok okay so perfection the notion that we can attain perfection is why most people never even try to work on themselves we're going to get more into self-improvement and development later in the presentation this is the state of earth is my point and there's one overarching thing that more than anything else has to be recognized and realized in the minds of human beings that is holding us back as a species it is the the religion that is ultimately holding humanity back more than any other religion and it's the tagline for the show ladies and gentlemen let's spell it out one word at a time government is slavery whether you fully understand that or realize it or not it is the case it is the truth it is the eternal truth nothing will ever make that untrue if you don't understand that or accept it your ego is in the way your ego is in the way if you do not understand that eternal truth there is no authority vested in 3d physical beings on any planet in any solar system in any galaxy in the entire universe or any other potential universe that may or may not exist there is no other authority except the laws of nature which many people will call god i have no problem with that term some people have a problem with it because they have an atheistic mindset and have a problem with the term god because of what religion has twisted and morphed that term into which is also a big croc of crap okay i'm as anti-religious as any atheist but i'm also going to talk about how atheism is another religion that is completely destroying the freedom movement and is destroying the understanding of what is true in the universe particularly when it comes to natural law so this is the principle that people have to understand fully government has no moral legitimacy to exist it is slavery based on coercion and violence it always was slavery based on coercion and violence and it always will be slavery based on coercion and violence the end for all eternity okay and the people who cannot understand or accept that have a calcification of the ego problem because they have latched on to an erroneous axiom of belief which is a foundational core belief mind virus okay and they have their ego has refused to allow them to acknowledge this isn't true this is in keeping with reality this is stunting spiritual mental and emotional development on this planet and it's keeping us a type zero civilization okay so that's number one now let's look at why this is the case okay the the people believe that government somehow is necessary because they believe for some strange not for strange reasons for known reasons because they're self-loathing they don't want to take personal responsibility unto themselves for their own lives and things that they truly need to be self-responsible for and they erroneously believe the government can solve any problem the the first thing that people have to understand is government cannot solve any problem it is incapable of solving problems so if i said to you ladies and gentlemen problems of humanity can be solved with violence coercion and slavery you would tell me i'm out of my goddamn mind that's what most people would tell me and rightly so if i said you all the problems of humanity can be solved with slavery okay you would tell me go check yourself into a mental asylum you lunatic nut case and i would almost expect worse things to happen or be done to me if i started advocating for that the slavery of human beings is really what we need to solve our problems imagine if a human being said that and actually believed it yet this is what 99 percent of the human species says and believes is necessary to solve any human problem this is how crazy we are this is how mentally ill most of humanity is because of their belief in religion of religious systems of thought like government and authority and they don't even consider that religion when i tell people religion's the only problem i'm not just talking about the cultural world religions of you know traditional organized religious belief systems i'm talking about the belief in authority in government those are religions that are holding us back from attaining the states of consciousness and the evolutionary advancement that we say we want to there are only two things in all of creation that solve problems i'm gonna say this again and everybody needs to really listen up to this fundamental principle and axiom that is true this is a true axiomatic understanding or principle okay there are only two things in all of creation that can solve any problems for beings that are incarnated into the 3d physical realm only two things ever solve problems philosophy and technology that's it does government participate in the creation and or um uh advancement and or dissemination of philosophy no it doesn't government is violence government is decrees backed by force their commands backed by force that's what human-made laws are okay it's coercion it has it's the initiation of force which is violence all right and it's slavery that's not philosophical there's no philosophy in that oh it's an ideology but don't confuse an ideology which may or may not be true based in truth with philosophy which is based in truth because it is the love of wisdom theolos meaning love in ancient greek and sophos meaning wisdom in ancient greek so philosophy solves internal problems it solves problems within the individual and it solves problems that are interpersonal dynamics between people and between civilizations okay there is no other thing that solves internal problems so philosophy solves mental emotional and spiritual problems that's the only thing that can ultimately solve any of those problems is the understanding and incorporation into one's mindset and into one's self into the psyche the soul ultimately of philosophical principles that are true so philosophy is the internal problem solver okay conversely to philosophy which solves mental emotional and spiritual problems there is technology technology solves externalized problems what we perceive as external to the self meaning technology is the solver of pragmatic problems in the world okay so you want something to more easily place food in your mouth while you are eating your food and or cut up things that need cutting instead of using your teeth to bite everything uh down to size to easily chew it and swallow it that's what a fork and a knife are for these are pieces of technology you know you uh don't want to uh use your hands to wipe your face napkins have been invented it's a piece of technology we don't even think about things like this as technology the camera i'm broadcasting over is technology okay the computer that's sending out the stream is technology these are all problem solvers okay technology solves pragmatic problems in the physical world whether they be problems dealing with moving energy from one place to another organizing things processing data um communication etc health type technologies you can go on and on with the different types of technologies but that's what pragmatically solves physical world problems philosophy solves the internal problems that take place in the mind the emotional states and ultimately in the spirit and technology solves pragmatic problems now see where we're at in our world is that not only do people not understand that these are the only things that solve problems they think government can solve any problem and they think that it has a moral right to exist government not only is totally illegitimate morally it cannot solve problems only philosophy and technology can never solve human problems period the end okay so moving on to the next slide i'm not sure why i'm getting a blank slide it looks like oh okay i accidentally did not put the uh build in after the transition so what i highly recommend for people to check out as far as uh presentations that i've done in the past that they need to understand and that most people still do not understand in our world is the occult and the most hidden part of all occultism which is natural law now not only don't people understand these things they actually think there's nothing to be learned and i hear this over and over and over and over again okay even in the freedom movement the so-called freedom movement anarchist movement freedom movement whatever you want to call it i hear over and over again the the occult isn't real it doesn't exist or there's no reason in studying it because it's hokum religion and that is because they have accepted the hollywoodized and the social engineering propagated version of what occultism is see the social engineers who practice occult practices who actually engage in occult practices do not want people to understand what those manipulatory practices are because what real occultism is is ancient psychological knowledge it's the understanding of actually how to solve problems internally using philosophy but then if you have that knowledge but and you took it in in an egoic state and you didn't really work on yourself to truly get rid of your ego bound issues and you want to control others with that knowledge and you recognize guess what they don't have this understanding of themselves yet i have at least enough to do a total number on someone else that's called dark occultism or the abuse of that knowledge of hidden knowledge of how the human psyche and the laws of nature work so then you could sequester people from knowledge you could dissuade them from looking into it it's like saying one person does not know arithmetic yet one person has is basically a master mathematician if that person who's the master mathematician hates the person who um knows nothing doesn't even know how to add or subtract numbers because of something that may have occurred to them socially in the past okay what how much could that person manipulate the other individual you know let's say they walked into a store this person's the clerk in the store and they say hey they don't even know how to add money is 20 enough is 50 enough is is 100 you know oh yeah there's no change even though the thing was a dollar that they wanted to buy see it would be like literally taking candy from a baby it would literally be like manipulating someone that can't add or subtract numbers and yet you do know that how to do that well these people know everything there is to know psychologically about how the human mind works and yet i still hear people in the freedom movement even when it's explained like that oh no there's nothing to that because they don't want to acknowledge that master psychologists have formed a cult and taken over the world they refuse to acknowledge that even possibility and it's total hubris and ego i'm going to keep returning to the idea that this is all we need the breakdown of the calcified ego because what the ego is is the force that cannot acknowledge that one is wrong ultimately you could make all different definitions for the ego but i'm talking about ego with a capital e not just like my sense of self and i know that you know my body ends here and i'm not going to try to put food into someone's someone else's mouth to feed myself obviously we have to have that small ego self okay i'm talking about like problematic ego of selfishness of refusal to admit when one is believing in things that aren't real or true or refusing to acknowledge that you've done something that's wrong okay again people in this even in the freedom movement they do things that are clearly wrong that are clearly based in some form of theft and they won't even acknowledge it they won't even apologize and say they're sorry for it because the ego is in the way they haven't done the shadow work to eliminate the calcified runaway ego so the next part that people have to understand the next key to understanding is natural law these are the laws of creation that ultimately govern behavioral choices that basically put consequences into effect for our behavioral choices so if we go back to the slide my two presentations on here demystifying the occult and natural law if we could bring those back up yep um that people really have to understand these presentations that i've done and study them further these are just cursory beginnings to the understanding of these things really you can make a lifetime study of them okay so demystifying the occult is a primer on what occultism is and why it's important to understand it and uh and natural law is the most occulted knowledge coming out of these old occult traditions about how our behavior is ultimately bound by laws that exist in nature that bring to us the consequences of the behaviors we've chosen to enact and i hear over and over again from people in the freedom movement this is religious thought this is believing in something that isn't real and doesn't exist okay and they can not ever achieve freedom with that mindset because as long as you refuse to accept that natural law is put in place by something higher than human beings you refuse to accept that rights are put into place by something higher than human beings and therefore if human beings are the all-powerful entity in the universe well they can make up what rights are and they could take rights away from people so people in the freedom movement are really saying this folks in their moral relativistic state they are saying since human beings are the epitome of creation and there's no power that can supersede a human being okay therefore rights ultimately come from human beings themselves so we did this experiment in philadelphia we asked people do human beings have rights self-existing rights and they say yes they do and then we said well where did they come from and 95 of human beings said that they come from human beings in some form or another as soon as you accept the axiomatic premise that rights come from human beings you must by definition accept that rights can be abolished by human beings the end period it's an inescapable inescapable logical conclusion just from the rules of logic if we brought something into existence we can remove it from existence rights do not come into existence through human beings we are not the creator of rights we are not the bestower of rights in any form whether it's from an individual or a society or a government and when we ask people where rights come from only a handful of people actually really got the correct answer and said rights come from creation nature god whatever you want to call it the laws of nature doesn't matter how you verbalize it the word or label is meaningless it comes from a higher power than man the end that's it okay that's not religious thought that's actually thought that is actually borne out by an understanding of how natural law works in society through observation and testing which constitutes a science and it is a scientific principle it's not a belief or a religion i am for the destruction of religion in all forms natural law is not a religion moral law is not a religion there are laws in effect in the universe that bring negative consequence to bad behavior period to immoral behavior behavior which initiates violence initiates coercion initiates harm against other sentient beings and if you don't believe that exists you have not done enough study observation and testing of what has happened throughout all of human history see because what i'm going to talk about is the development in evolutionary progress in consciousness of the sixth sense we're going to be getting to that in this lecture here today and people think of the sixth sense as esp some extra sensory perception something that goes beyond the normal human mental capacities that's not what the sixth sense is ladies and gentlemen you could look at that as the seventh or eighth or ninth sense or whatever you want to call it or something that just beyond the census period entirely but there is a sixth sense and it's not even intuition it's something that is not local it can't be found in our physiology and scientists have tried to find it in the physiology but this is a capacity that constitutes a sixth sense in humanity and we're gonna get to what that is because that is how you corroborate and quantify how natural law functions and most people don't have it they don't have this sixth sense developed it is stunted in them all right so we're going to get to that in a moment i want to just talk about a technological advancement in a civilization first technological advancement would not necessarily drive advancement in consciousness but we are also nowhere near the technological savvy and advancement that we would need to become we would need to get to to become a type one civilization meaning we would have to implement technologies that don't burn hydrocarbon fuels and pollute our environment the way that we do now thinking that that's something that we must do so people even use technology in some cases as a religion and i call when they have too much faith in established science established scientific institutions i should say as scientism and this is also not a religious term it means don't place too much faith in established scientific institutions that are ultimately run by government grant money that's not real science i'm all for real science real science has the trivium as its truth discovery methodology which we're going to talk about the trivium okay and it is not just believing what the scientific institutions tell you because oh they said it and they're the arbiters of truth that's what i'm talking about as scientism real science is repeatable it's testable it's something that we can conduct experiments to corroborate and verify i am all for the real true scientific method through the trivium process and quadrivium as the quantification of the of that method unfortunately that's not what modern science really constitutes it has gotten it has become dogmatic religious in its thinking hardened in its thinking egoic in its thinking and it has been largely based on money and what people will pay to fund and what people will pay to suppress and if you don't think so you're a naive person you're just a knight it's like childish naive thinking to put your faith in scientific institutions as the arbiters of all truth now people who do that are religious they have a religious mindset they don't really understand what real science is or how it's conducted probably because they've never really engaged in a science the scientific method themselves i keep telling i keep telling people in my personal life and i'll just say it here on the air all these people who believe the earth is flat religious believers all total religious believers you need two little tiny pieces of scientific equipment to totally prove to yourself that the flat earth model cannot be true you need a pair of solar observation glasses or otherwise called eclipse glasses and you need a digital caliper that's it two little devices and you could track the path of the sun in the sky harmlessly without harming your eyes and take a measurement with the caliper of how much it occupies in the sky and realize that doesn't change so the sun cannot be getting closer or farther away to you it's that simple and guess how much that costs it'll it'll take you uh basically from sun up to sun down in time to do it okay and it will cost you twenty dollars on amazon or ebay to get a cheap digital caliper that's at least the decent one and to get a decent pair of solar observation or eclipse glasses and that's it twenty dollars and a better part of the day that's it and people will not do that scientific experiment or will insist that that's not a refutation of the model that has been suggested as truth by this ridiculous community of religious believers the cia made a religion and got a bunch of jackasses to believe in it within a short period of time okay because they're trying to exercise their power as a cultic gods saying look what we can get all of the riffraff out in the world to believe and they're laughing their asses off at people like that that have no scientific understanding whatsoever and can't even conduct a simple experiment with simple equipment that they could buy for twenty dollars on ebay okay that's how that's how much these occult masters are laughing in humanity's face and how dumb they are so let's move to the next slide i am for the destruction of all forms of religion let me make no bones about that or no mistake about it in anybody's mind i have been been anti-religious from day one and here's the problem folks because other people are anti-religious but they're reactionarily anti-religious they're not logically anti-religious they have a reaction against religion this is what i was in my lack of knowledge and in my lack of the understanding of the scientific methodology when i was young okay i turned reactionarily anti-religious there's a difference between being logically anti-religious and being reactionarily anti-religious so my reactionary state of of rejection of religious dogma led me into a a mindset of hatred and a mindset of incorrect form of rebellion to move into the belief in the dark occult and satanism that's my life path that's what happened to me and i didn't wake up until i realized that this was a system of slavery being directed by social engineers and the most powerful people in human civilization as far as what resources they had at their command and how much they actually held sway and thrall over the human mind culturally they were the culture creators they were the social engineers and ultimately they were the master psychologists that had dark occult knowledge they were had the knowledge of the occult and they were using it for totally uh abusive dark purposes namely to enslave and ultimately really to call which is one of their agendas so when you are reactionarily anti-religious you will be led away from the truth it won't get you to the truth because you're just reacting against one thing that's not true the social engineers always have prepared something ready and ready and and they're able to go with it they're well you're you're reacting towards something that isn't true and they have this other dialectic prepared this is the dialectical manipulation that they practice it's called the hegelian dialectic okay i call it polarization dialectics okay you have one false extreme that isn't true and when people recognize it isn't true and react against it instead of logically coming to the conclusion of how and why it isn't true through scientific process through truth discovery process you could easily sway them into a totally polar opposite also untrue dialectic and that is the difference between all religions and atheism all cultural religions and atheism now here when i say i'm against all forms of religion i'm not just talking about the world slash cultural organized religious traditions like christianity judaism hinduism islam etc those are what i call the world and cultural organized traditions whether they're world religions or just cult locally cultural trade or organized religious traditions it's irrelevant those are the known religious traditions that have names then we have religions like government politics money the belief in authority these are also religious belief systems i'd put carnism up there as a religious belief system okay i would put the belief that we can be free without understand accepting the existence of natural law and understanding how it works how about that as a religion what's your religion well my religion is i think that humanity can be free yet natural law is hokum and it's bunk and we don't need to know anything about it or how it works and yet we can be free that's religion that's religious thought how about this one you know um i believe that we can be free but we don't need to actually develop any kind of sustainable technology we could just continue to burn hydrocarbons which we're totally controlled by and pollute our environment and create an unsustainable planet and yet we could just be free we can somehow attain freedom in that in that mindset that's a religion you know um what about atheism which we're going to talk about that's not a religious belief that's a religious belief holding us back from the truth because not to acknowledge the existence of some form of ordering force or intelligence in the universe that sets laws into being whether it sets them into being or sustains laws that are self-existing any way you want to look at that that is a higher order force a higher order intelligence a higher order power in creation again you don't need to believe in a personal deity that like interferes in human affairs i don't accept a personal god i believe god is law in creation and it allows total free will because to interfere in free will would be to enslave and the creation creator slash creation does not do that it allows choice it allows free will it allows but it sets laws it has laws that are in effect that it put into effect or sustains that it allows one to make decisions and learn how those decisions interoperate with the law that is in effect in creation to learn and to grow and to understand how things really work and those laws do not constitute a prison this is what the dark occultists think they think because there are laws binding behavior and we can't do whatever we want without consequence that that's a prison that's their mindset that's their mentality that's their worldview so again i'm for the destruction of all religion i think religion is the one and only problem that humanity ultimately faces you can look at all of the things i'm saying in this presentation and it all comes back to religious belief which is believing something that isn't true that holds back our progress in consciousness from the latin religare meaning to hold back to tie by binding and to thwart from forward progress in consciousness that's literally what the word religion means where it comes from so i don't know how i can make it any more clearer i've said before maybe i just need to make a whole presentation about what i why i think religion is the whole problem because people still don't understand what i mean by the word religion they hear religion and you think your definition you hear the term natural law you think your definition you hear the word evolution you think your definition i am not using the definition of words in the same way that people traditionally think of the definition of words it's unfortunate but we have limited language and inventing words usually doesn't go a long way toward really helping people to understand a new meaning like voluntarism okay more people are trying to use that word but it's like pushing an invented word onto people and it does make sense but like you know just going out of your way to try and invent a word we could use language and we could say here's what the culturally accepted definition of this is but let's look at what it really means at a deeper fundamental level religion doesn't just mean christianity judaism islam it means that which holds us back from an understanding of truth because we are accepting dogma and belief instead of actual facts and knowledge and i'm for the elimination of that erroneous thought process i want a scientific rigorous investigation of how nature actually functions and the laws of nature function and if we really did that as a species we would discover natural law is real it is operating at all times and places and there are consequences for our chosen behaviors regarding whether they are moral or immoral meaning right or wrong meaning whether they do not call initiate harm to other sentient beings or whether they do initiate harm to other sentient beings and that dynamic exists naturally in the 3d world of nature it's not invented by man we don't govern that process meaning we don't invent what is right and wrong we are to discover what is right and wrong and align our behavior to it through an act of our will which most people aren't doing which is why we're not becoming a type one civilization instead we have slaves fighting each other that's what we have you know this meme says it all perfectly slaves versus slaves coming to your street soon coming to your city soon because people have bought the polarization dialectics and they will not let go of their erroneous belief systems based on calcification of ego this is where humanity is at i don't say these things to put people in a totally depressed mood i am pragmatic i'm not neither a optimist nor a pessimist i am a pragmatic realist i've said i said this on the vinnie eastwood show a couple weeks ago i'm a pragmatic realist i gage dynamics based on actual observation of what is occurring in society and then attempt to extrapolate based on the pattern based on pattern recognition what may occur that's called trends forecasting is what gerald solente calls it which he does that in finance and politics etc i do that in consciousness you could consider myself a consciousness trends forecaster okay because you could extrapolate patterns based on existing dynamics that have already occurred and say if this dynamic doesn't sway or change in an amount this way it's going to continue on the same trajectory and then you could actually sort of predict what will happen barring any kind of a miracle okay yes occasionally miracles do happen but don't count on them they are not the rule they are the exception to the rule and i don't mean miracle in a religious sense i mean like some real super wild card thing that wasn't calculated for does occur you know like a meteor strike or something like that you know occasionally things monkey wrenches get thrown into the works and things change as a result you know that weren't accounted on okay but we we don't want to count on those things we want to say hey maybe they happen maybe they don't but don't like let it not direct let it not let us actually exert our will to change things because that's what this is all about developing the will to create change because we're lower case creators small c lowercase god small g meaning we have a say over what we will live how we will live what will happen in our environment what will happen to ourselves we are collectively the controllers of our destiny as human beings you know there's there is no no one doing this ultimately to us externally we are doing this to ourselves in the long term okay you could talk about manipulation you could talk about things trying to be pushed one way or another but ultimately our will ultimately directs it what will we do it's not about speculation and just thinking it's not about intention it's about behavior you know we're going to be judged not on what we thought what we intended okay what how we emoted what our emotions were we will judge ourselves and our own progress in evolutionary development based on what we did what our actions were that's what that uh ultimate value was going to come down to what we did or did not do and right now we're falling into the divide and conquer strategy of the social engineers and we have to get out of that mindset of us versus them yeah there is people who believe in order following you know and they have to get out of that mindset the order followers the moral relativists their the problem of them not understanding morality absolutely lies in their mind it lies with them they are religious believers but what i'm what i'm trying to say is we can't keep taking this idea of we're just going to be fighting each other that's what the social engineers want they don't want us uniting and understanding the occult principles they're operating on and ultimately over turning their mind control not falling forward anymore that's the last thing they want is it possible yes it's still possible is it likely not based on how humanity's going we're not exerting our will to understand what we need to understand to learn what we need to learn and ultimately to stop buying into dialectics because that's exactly what they want they want slaves fighting each other instead of understanding how the slaves are being manipulated to stay in slavery by what they are conditioned to believe is necessary is somehow moral when in fact it's violent coercive and creating more slavery and now we're in an era of censorship of information and words and the communication of ideas that's how crazy the slaves have gone believing that their their masters have a right to rule them that they actually want to take information like this away from people so that it can never reach their eyes and ears and they can never understand that they're slaves you know that's how bad things have gotten now the dynamic that people actually have to learn how to evolve within themselves and to activate within themselves which constitutes the sixth sense is memory memory now i bet you most people weren't expecting it to be that that is the ultimate human sixth sense okay so the other five senses help us to make sense of our immediate environment but then there's a sense that goes beyond locality in time it goes beyond the local space time that we're occupying okay and it goes back into the past the ability for human beings to remember and to carry on that memory from by the through the preservation and dissemination of information of truth that is what we have to activate in ourselves as individuals and as a species because the failure to activate the sixth sense of memory that operates outside of time okay means that we are condemned to repeat the mistakes of people from the past that the the mistakes people made in the past and the mistakes that ultimately our ancestors made in the past is that they accepted and believed with religious fervor the idea of authority and government that's the main thing they believe that they can give away their personal responsibility to someone else to protect them ever that it can be done in nature they believe that they can delegate rights that don't exist in themselves i explain this to i went to the liberty on the rocks meeting in philadelphia this past week and helped explain to a new attendee you can't pour something out of empty glasses it doesn't matter how many empty glasses you put on a table you cannot fill uh another glass over here from all glasses that have already been drained and are empty it's not possible to do you have to have something in them so in order to give somebody a right first of all human beings can't do that anyway but if we were saying i'm going to allow allow you to take the responsibility of doing this you first have to have the ability to do that morally and then you could say i'll delegate that responsibility to you okay so let's say in a in a um you know a business operation a ceo might delegate responsibility and does delegate responsibility to handle certain things well it's their business they're allowed to do that as long as it's a moral thing and it's not taking away anybody's rights so delegation can happen in in things like that but when it comes to saying you have a right to do something that i don't have a right to do okay i can't tell someone that they're allowed to steal from someone else i can't tell someone they can coercively control the behavior of someone else that is not harming any other sentient being you cannot delegate a right that doesn't exist for an individual that completely annihilates the idea of government altogether the person i was explaining this to agreed and i said well then you're really already an anarchist you just don't know what anarchy really is and you don't know that you already agree with the basic tenets and principles of anarchy because they believed in non-aggression principle and they believed you can't delegate a right that you don't have you know again i recommend to people i recommended this in my interview with vinnie eastwood listen to the philosopher uh john hellfeld okay jan or john hellfeld okay uh he's been doing videos for years where he goes into politicians offices and he asks them if they believe that rights that don't exist for an individual can be delegated to another individual or group and he just shows them making complete asses out of themselves because they either have to admit that they believe rights that don't exist can be given that i don't have it and no one has it but we can come together and grant something that we don't have for ourselves to someone else which is logically impossible and makes no damn sense they either have to admit that or they have to admit that they cannot be done so you just that that cannot be done and that obviates the moral legitimacy of government it destroys any idea that government can be morally legitimate ever so you just watch these little worms squirm he makes them dance this guy highly recommend his stuff okay and he makes these people squirm because they're liars and they're immoral trash and they want to tell you they believe in principles of self-ownership and principles of uh of morality when in fact they are actually completely condoning coercion violence and slavery and then blowing smoke up people's asses trying to tell them that their ideas are somehow consistent when they're constantly contradicting themselves and they won't answer the question directly because they know they either have to show themselves to be a complete liar or in complete contradiction with their own uh previous statements okay so um john hellfeld check him out but this is the sixth sense folks memory and this is what's not developed we have no long view of human history we have no short view of human history i mean we can't remember what happened yesterday let alone what happened hundreds or thousands of years ago this is what we have to develop and hone our sixth sense of memory because if we don't we're gonna continue to make the same mistakes and continue to believe in the same erroneous things believe in the same religions that our ancestors did that put us into this situation as a species of slavery how we do that how we get out of this whole erroneous thinking is by employing the true truth discovery methodology or the true scientific principles of the trivium method i've done a whole show on the trivium and quadrivium and what people have to understand about it is it is a three-step process it means the three methods that's what the word trivium literally means from tres tria in latin which means three and via which means road or way and then that also means uh by means of or by method of so when we say i did that via this method that's what it really means it means that you've taken a certain method so it's the three-fold method for truth discovery the first is input or grammar assembling data from an eclectic array of resources without prejudging it and you have to have enough grammar you have to have enough raw data before you process it and you can't judge it first you have to take it in this is what people always make the mistake of emotionally judging something based on how it makes them feel when in fact it should just be amassed and taken in as raw data to process at a later time and this answers the questions who what when and where the raw data the second step of the trivium is the processing this is also called the logic phase or the understanding phase it's comprised of three basic sub steps filtration correlation and analysis the quadrivium method is largely utilized here which is the quantification method of the trivium it's basically you know the crunching of numbers part but you have to filter out logical inconsistencies you have to correlate data to understand how there are cross connections between the data and what it means the analysis coming to a conclusion of what it means and this enables us to learn why why is this so why is this in place why does it work like this what is the reason meaning or purpose and then the third step of the trivium is output rhetoric or wisdom and here's we're falling horribly in all of these the freedom movement is failing horribly in all of these uh steps we don't have any one of these steps where they need to be in the freedom movement that's why the freedom movement is failing and less and less people are being attracted to it and less and less people are even staying involved in it okay it's falling apart it's falling apart because we're not exercising real scientific methodology it's falling apart because we don't have enough grammar we haven't collected enough data about how natural law works or even that it is in operation we haven't understood how it works over time through our choices and we haven't taught that understanding through rhetoric through output through conveying it to others which is what wisdom really is it's what we do with what we know okay so output or rhetoric or wisdom is speech and action based upon the knowledge that one has gathered and understands correctly this is how knowledge and understanding are propagated so that real and positive change can be created and realized so what we're really talking about here is different things that we are actually doing with knowledge okay the trivium is actually how you structure knowledge and ultimately down the line how you co-create reality as a species all right so the first step of the trivium the input phase it constitutes having knowledge it's the assembly and actual putting together of all the data that you require to go into the next steps of processing understanding and then doing something with it the second stage processing constitutes understanding the knowledge that you have gathered that's phase two of the trivium first is just getting the knowledge taking it out of the realm of the occult and accessing it having access to it and putting it all in place together in one place a data storage okay this is what i call aggregation i call myself an aggregator of knowledge this is knowledge the step one is knowledge aggregation okay step two is processing it so you come to a correct understanding of what it all means and then step three the output of rhetoric stage means you're taking right action with that knowledge that you now correctly properly understand the freedom movement isn't doing any of these three things they don't have the knowledge of natural law they don't understand the knowledge of natural law or what it means and how it works and they are not taking the right action of that with that knowledge by teaching it to others they are continuing to go in circles of telling people that political and financial machinations are all we need to become aware of and then we need to rearrange the deck chairs on the titanic by rearranging the political system and somehow we will magically come out of human slavery without addressing deep seated issues of dealing with human consciousness and spirituality because they think those are meaningless terms most people in this movement and they insist almost repeatedly that we need to know nothing about how consciousness works we need to know nothing about how the psyche works and we know how to know nothing about occultism we need to know nothing about natural law because all those things are meaningless terms and don't exist more people in the freedom movement are like that that are not and guess what i challenge people to tell me other show me otherwise most people are atheists in this movement there's more atheists than there are not there's more total scientismic minded people who believe science is the full arbiter of truth that there's nothing beyond the physical they believe in the materialistic realm only they don't believe in spirit or consciousness i've been told it over and over and over and over they completely lack any sense of spirituality and that's why they're getting their asses handed to them on a platter by the social engineers of the world and the satanists of the world and it will never change until we come out of the ego holding us back thinking that we're the highest power in creation and there's nothing beyond human beings and there's no law in creation that ultimately governs behavior that's why the ancient occult traditions would not accept anybody into the teaching schools of the mystery traditions that that were atheists and did not accept a higher power than man and here's what we're not doing folks we're not becoming teachers of natural law as a whole as a people as people who say that they're activists say that they're agents of change say that they want the world to change say that they want slavery to go away say that they want true freedom to manifest it's a big crock of lip service that's all it is that's all it is because here's my challenge to people i'm going to give you two challenges as um to either prove me wrong or to do things that you think i that could be improved upon okay i'm gonna i'm gonna talk about this in relation to something else maybe the second one i'll talk about in relation to another part of this lecture but here's what i want you to do you find people who are very effectively and on a good scale publicly teaching the principles of natural law to other people i could maybe name five or six people if that in the world in the world that are doing that publicly not going out on your at a party with some of your friends and saying oh do you know what natural law is and then trying to explain it to them at a party okay or going to a dinner with a family member and going oh do you really understand the difference between right and wrong as if they're going gonna sit there and listen to your whole spiel at a dinner that they want to go out and just have some food and enjoy themselves that's not what i'm talking about i'm talking about publicly and formally putting knowledge out there to other people in whatever form of public communication that is available on to you to do through technology that means through the internet through blogs through websites through audio through music through podcasting through writing books which is also a form of technology of course books are technology the communication of ideas on printed pages of course the type setting was a technology the types of printing that we have today for the printing mass production of books as a technology technology makes that possible and solves problems of communicating knowledge over vast distances and in large numbers so this slide represents how many people are actually really becoming teachers of natural law in the world the numbers are horrible horrible horrific pathetic and again this is my challenge and people will say oh i'm not ready or oh i'm afraid to speak publicly or oh i don't know how to do it or oh there's you know i don't know the technology how to do it well guess what maybe you need to take the time and learn all of those things i didn't know how to do it when i first started doing it either i started and got better at it as i went which has evolved into what i'm doing now and i'll get better at it as i go doing this we try to constantly improve get some better technology so we increase production value learn from our mistakes get get faster at doing these things get better at doing them put them out to a wider audience that's what it's all about is learning and growing why shouldn't i want to grow my operation and reach more people i think i'm the best at what i do you know i i don't say i don't leave it to other people you know i don't go oh well they have that in hand this is what this is the whole stand down movement you know leave it to somebody else mark mark's got it he does a great job of no i don't got it no i don't right now i do it better than anybody else is doing it as far as i'm concerned and you could say that's ego but guess what i'm just saying what is i'm just saying the truth nobody teaches natural law like i do and has taught it like i do okay it's just a fact it's not done there's several other people doing it now and they're getting very good at it okay but what i'm just saying is just true like don't leave it up to somebody else say i could do that even better and then go do it i didn't leave this up to jordan maxwell or michael tosarion or uh david ike or graham hancock or anybody else that i had respect for i say okay great i have respect for people like that they're out there they're teaching some stuff to people and that's wonderful that they're doing that but guess what i think i could do things even better than them i said i'm not going to leave it up to them they don't got this i have something to contribute and i could probably knock it out of the park if i get good at communicating that and i did i didn't wait for somebody else to do it i just started doing it you know most people they want to leave it up to somebody else it's the savior complex i don't want to be anybody's leader i don't want to be anybody's savior i'm not your leader and i'm not your friend okay am i a teacher yeah i'm a teacher okay i want to set an example and let people learn by that as well have i set an example and what i am doing and how i'm communicating things yes okay i want to try to tread a line between being hard on people for what they're not doing and encouraging them to actually get involved because that's the principle we're not going to become a type 1 civilization or go beyond where we're at now unless more people get involved in helping to progress humanity in consciousness not going to happen on its own it's not a automatic process folks biological evolution was an automatic progress to get us up to this point now it's up to our will it's up to our mental capacity it's up to our spiritual growth and it's ultimately up to our will of what we will do and what we will force ourselves to stop doing by an act of our will stop believing in and stop doing the immoral things that we have to stop doing like following orders and believing in slavery and coercion and violence toward our own species and others but what do we have what do we have largely in the movement we don't have people who are true activists and doing the work themselves we do have some people like that don't get me wrong i'm not it's not a blanket statement but if you compare the real agents of change to the people kicking back and saying he could do this better oh he made this call and i think that that was a bad call right it's the same as the armchair the classic armchair quarterback it's the same as the armchair quarterback sitting in the chair with his beer his football gear on but he ain't on the field okay the ball's down at the side of the chair he's got his remote control he's watching the game and he's complaining about what the other players who actually are on the field are doing and it doesn't make a difference get as offended as you like i'm talking about some of my actual viewing audience at the risk of offending my own viewership most of you aren't doing anything your armchair quarterbacks i i say i tell people stop listening and watching me right now learn how natural law works and go and teach it to other others yourself you will bring something to the table that i won't some people will listen to you who won't listen to me invariably inevitably here's my challenge to people who are these armchair quarterback types one get on the playing field and actually teach natural law instead of actually complaining about what other people do or don't do actually teach natural law to people how about that how about see imagine me making my show okay what david ike hal david ike fails at teaching people what he teaches them through his books and lectures imagine if that's that's what my show was about focusing on another man okay first of all that's a little creepy and weird right secondly i shouldn't be the focus on anything the laws of morality are the focus that we're talking about here folks and people not understanding them is why we're held back as a species do you think your time is well spent attacking anybody you can go and attack people who are really doing evil in the world but will i make my show all about how henry kissinger is an evil bastard i'll let people know i think he's one of the globalist agents out there of course but i'm not going to make my whole show an attack on one individual the show is not about attacking anybody the show is about the understanding of principles the show last week wasn't an attack the show last week was an explanation of an experience i went through so that if other people say i'm going to work with these individuals be aware this may happen that's called holding a court of public opinion of saying what occurred and letting people make up their mind so do you believe the people who did this these things that i outlined or are you going to believe me as to that this is how it happened you make your own decision and then go and do what you're going to do but i will also tell people not to expect me to work with people who necessarily trust people who i know are untrustworthy you know you could say that's guilt by extension but it's like i have to also kind of cover my ass and play self-defensively sometimes you know i i can't just open you know things that that i do to other people who i may not be able to fully trust because they may be working with people who aren't trustworthy you know you have to be careful about that when you're doing things like this okay so you know my point is is instead of just talking about what other people don't do right that you think they should be doing or how they're failing actually get on the playing field and do it yourself i didn't i didn't go there there were lots of people i was like oh well he's doing this right but he completely misses this you know i never saw anybody actually talk about natural law even though i knew about it when i was watching a lot of these other teachers and i didn't go let me just totally rip into somebody like michael tosarion for not actually using the phrase natural lore teaching the morality of natural law and not teaching anarchy you know he was doing his work i'm doing mine it's sort of you know a little bit disappointing that someone like that has chosen to attack me you know and i've never said an unkind word about someone like that i don't go and attack other people for doing part of the work i appreciate them doing part of the work you know i'll fill in the gaps in places that i think are important some people say mark you don't talk enough about um uh you know this aspect of shadow work or this aspect of meditation or whatever hey if you think you could do it better than me wonderful maybe somebody else could teach uh you know how to like move people along like less harshly or a little bit more compassionately or like try to uncover their personal traumas i'm not here to be a personal guru for anybody or work you through your issues i could show you the tools for doing that but i'm not i'm not somebody that says go and sit down in the chair and i'll be your psychologist for the day you got to put the big boy pants on and the big boy big girl pants on like i did and solve your own issues your own internal issues that's not what i do you know hey maybe people go oh well since you don't do that i'll do it and i'll do it better i'll do it more effectively wonderful go out and do that show me how that's done right but get involved getting involved solves the problem talking about what other people are doing wrong or not doing doesn't solve the problem you're not part of the solution when you do that okay okay if somebody's doing something overtly immoral expose that right especially if they're asking other people for their trust but don't just get like start attacking people who are actually doing something that's not a a good use of your time it wouldn't it doesn't matter who it is it's not a good use of your time the time should be spent teaching objective morality teaching natural law to people and explaining them how it works and why it's important to know about it teach occultism to people explain to them how it works and why it's important to know about it you know teach them the underlying causal factors the why okay get them to that level of understanding how many people are doing that in the world not many they're all looking at the daily events the happenings i could be sitting here talking about coronavirus i could be sitting here talking about trump i could be sitting here talking about you know whatever is going on in the in the leftist communist circles of politics it's all the symptoms getting to the causal factors is solving the symptoms and people who point fingers at other people they're not doing that work of exposing the causal factors they're getting involved in interpersonal drama you know i'm trying to analyze what is the psychological factor that's making people behave that way you know what it is it's trauma in their life that is unresolved it's them not doing the shadow work upon themselves deep internal shadow work alchemical shadow work deeply done upon their own psyche because they still have unresolved traumas it's deflection it's you know um you know uh putting their uh projection it's saying that their psychological problems are actually other people's when they're not really doing the work to resolve those psychological problems and traumas in their own life see i only look at it from their perspective not to point fingers and obsess on anybody in particular i'm talking about what what is this psychological dynamic a lot of people take the approach never even mention it right and guess what folks i don't pay attention to anybody individually personally i don't have time for that i'm not going to feed into that drama right but i'm talking about the psychological dynamic of all the people in the world who behave like this that's who i'm talking about a lot of people get egotistical and want to say he's talking about me i ain't talking about you okay trust me i won't waste my time for a moment i have way bigger and better things that i'm doing with my life i'm actually doing things that take up my time that take time to do okay like build presentations and deliver presentations and and attend places where people want to hear me speak because they think i have something valuable to say and to teach them so my point is we have to look at the psychological dynamic because this armchair quarterback syndrome is one of the things that's holding humanity back from becoming a type one civilization and getting out of human slavery so analyzing the psychology of this the diseased psychology is very important not focusing on the individuals and then you know through putting that knowledge about how they can heal their traumas we're helping them get up off that chair and get onto the playing field and really do the work see again there's a big difference between having knowledge and understanding what it means and then there's a world of difference a huge gap and divide between coming to a level of even rudimentary understanding of what all that knowledge means versus really doing the great work truly versus doing the right thing with that understanding of that knowledge that you have accrued there's a world of difference between all those things having it versus understanding it versus doing the right thing with it and most people have all of those things either flipped upside down or they're part way and they're failing in a lot of those elements and not even understanding how or why because they haven't done enough introspective knowledge of self and here's the thing that is absolutely murdering the freedom movement i mean annihilating murdering it brutally putting freedom to death okay the atheist movement and atheism in the freedom movement is one of the most destructive ideologies that has ever existed in humanity i am going to start referring to atheism as the great freedom destroyer that's what it is the great freedom destroyer because true freedom can never be obtained in a state of moral relativism and because natural law can never be understood without understanding where the laws of behavior come from and because right and wrong can never be created by human beings or granted or taken away from human beings rights can never be granted or taken away human beings don't get to decide what right behavior and wrong behavior is human beings are charged with the task of learning and understanding and discovering of what right behavior and wrong behavior is because all of those things are hinged upon right and wrong being existing in nature and the consequential laws that right and wrong are have everything to do with and that govern human behavior are existing in nature and were put there by or sustained there by some form of intelligence or creator or nature itself however you want to look at that it's a higher power than man and it's not done by man atheism by definition an atheist is incapable of truly understanding natural law therefore an atheist almost always rejects the existence of natural law okay and says that it's a belief system when in fact it is not it constitutes a science of morality meaning a knowing definitively of the difference between right and wrong behavior and how the consequences of taking wrong action negatively impacts society where the consequence for actually living morally and taking moral behavior and right action enhances society as a whole in the aggregate and works toward greater levels of freedom consciousness expression um of a human being's potential and a whole society's potential okay atheism by definition obviates all that and makes it impossible no atheist can ever truly understand real freedom or how it is created and sustained they can only flail about wildly and possibly come to a rudimentary understanding accidentally of some of the principles of how freedom operates but i've never met an atheist that didn't have a hardened ego and wasn't completely opposed to an act actually looking at natural law and how it works and attempting to understand it because the first thing as soon as they hear the natural law comes from a higher power than man and that the laws of consequence are in effect due to a higher power than man they're out that's it they're shut down they shut off because their system of mentality is a religious belief system based on emotion not based on rigorous investigation based on observation and facts they have a totally emotional reactionary dynamic in their minds i've seen it over and over and over and over and over and over again okay you will ask them how certain complexity has arrived that and they'll say accidentally which means they believe in chance that is far beyond any conceivable um probability and statistics you know though some of them will even say i've heard of atheists that say they believe in karma and then when you say where did it come from they're like scratching their head because what is the answer we invented karma because let's face it folks that's what natural law is right i could use the term karma and natural law practically interchangeably real karma is what natural law is not the you know cartoon variant of karma that you do something wrong and immediately an anvil falls on your head you know it's it's separated by time distance circumstance culture aggregate behavior the laws of real karma are very complex you know and it doesn't always manifest just in the physical world while you're alive it's propagated through memory over time down to future generations and has an effect longs in long-standing stretches of time this is why people can't readily see it it is why is of occult laws karma or natural law is of an occult nature meaning it is not readily seen with our eyes our normal five senses which we perceive the physical world with and it is not measured with traditional scientific instrumentation like a digital caliper or a pair of eclipse glasses you're not going to detect natural law with those things it involves a sixth sense of memory and observation over long periods of time and that's what most people don't want to do and they have no sense of and they have no long-standing understanding or view of history and that's why they fall into these things like the atheistic belief system that there is no higher power than man it's like a fish denying the existence of water that's sustaining them and giving them life it's the religious belief in a spontaneous causeless sourceless purposeless meaningless existence and guess what if you don't think that's what atheism is folks talk to some hardcore atheist i'm not talking about agnostics here i'm talking about people who say absolutely there's no power higher than man and creation that we're the epitome of existence that there's no uh creative force or intelligence in nature that nature is a mechanistic dead thing that exists for no purpose or reason i'm talking about hardcore atheists here they are scientific materialists i can call them scientismic materialists all right and you know what it gets you totalitarianism and slavery because every totalitarian regime was backed by a total materialistic worldview that has ever existed and that man is god there's no power higher than man so man is the lawmaker man is the authority there is no natural law there's only man's law and we get to decide what's right and wrong and we get to enforce it through brutality that's what's gotten you atheism is what's gotten you every totalitarian regime on the face of the earth folks and again i'm not advocating for religious belief see this is where people are in a totally rudimentary childish understanding and trapped in a dialectic because people vacillate between religious fervor and atheism when both of them are completely wrong religious thought needs to be destroyed and atheism needs to be destroyed because it is religious thought it's all religion folks it all holds us back from truth it all holds us back from an understanding so when i tell people i don't believe in any religion and i'm not an atheist either i want the destruction of all of those things they don't know what to think because their minds are so unidimensional and unevolved that they cannot perceive that there is something that goes beyond those two extreme false dialectics and yet there is it is the position that a higher power exists puts natural law into effect but also gives sentient beings free will to choose their behaviors and it doesn't interfere in the process from that point that means that the universe is governed by law both physical and behavioral law physical and spiritual law all exists in the universe and the randomized component that cannot be fully predicted is free will this has been called the free will theory or the free will hypothesis but if you really understand how this works it's an actual science it's not a hypothesis or a belief okay the problem is most people don't have the grammar assembled to understand how it works and then to teach it they don't have the trivium in hand and atheists are one of the core problematic figures of this okay they're the people who are destroying the freedom movement daily there are anarchists people who consider themselves anarchists that are atheists and in my presentation at seed called fake ass anarchists i am going to explain that there is no such thing as a true anarchist who is an atheist there is no such thing you are only a atheist uh you are only an anarchist in name only if you claim to be an atheist there is no true anarchy in atheism it is impossible it cannot be anarchy can never exist in a society that embraces atheism any more than anarchy can exist in a society that embraces moral relativism freedom cannot exist in an atheistic society and freedom cannot exist in a morally relativistic society impossible according to cosmic law and nothing will ever make it so you can beat your head and fists on the table till the end of time it will never be true it can never be true those things can never exist simultaneously get as offended as you like but yet that's where most people are at in the freedom movement and they believe that you're going to create freedom with the exact same underlying ideology that has created every totalitarian regime in the history of humanity yep we're going to pour more gasoline and throw more matches on an existing home that's burned down and it's going to magically rebuild itself that's how it works don't you know yeah jackasses jackasses okay people who never learned how to think is really what it is and i i will of blatantly offend every one of my listenership if you take that position i don't really care get offended shut the show the fuck off no i don't it doesn't matter to me because i'm not here to stroke your delicate sensibilities i'm here to tell hardcore truth about how reality works and how the laws of reality work so that we can free ourselves from the tyranny we're under and atheism ain't ever going to get it done because this is what it's rooted in and then i'm going to show you what it eventually becomes it's rooted in the hardcore ego that we cannot detach from that is a weight dragging us down that we cannot acknowledge i am wrong i am not god i am not the highest power in creation see that's what i had to do from my former belief system of atheism and satanism okay to acknowledge my little puny human consciousness is not the arbiter of right and wrong nature is the arbiter of right and wrong god is the arbiter of right and wrong a higher power is the arbiter of right and wrong and a higher power allows us to perform rights and then it exerts consequence when we perform wrongs that isn't done by human beings that's done by nature and or a higher power that people call god i don't believe in the personal god that religious nut cases believe in and i think all religions are utter nonsense but do i believe in creation and intelligence that underlies creation and either creates and or sustains laws that are affect regarding not only the physical things in our in our universe but also behavioral choice yes i don't think that that exists or believe that it exists i know that it does and that knowledge is what most people lack who are have a calcified human ego that has gone completely out of control and is holding them down like a shackle on their neck and a huge steel ball that that's they're they're taking themselves and throwing it into a a deep water system to drown because that's what it's doing it's killing us the attachment to ego and the refusal to admit that we are not the be all and end all of of creation and nature and we do not make laws that nature makes laws only and only natural law is the only set of laws that exist for physical laws in uh that governs matter and behavioral laws that governs behavioral choice until we acknowledge that we get out of that satanic ego there is freedom is impossible it cannot be achieved and certainly a type one civilization cannot be achieved in that set of ego not a true type one civilization anyway that is truly directing its own destiny evolutionarily because this is where the out of control ego leads the out of control ego leads to the me me me society that i am the master of everything not a truce not true sovereignty it leads to this false notion that i can command or i am god or i am the arbiter of truth or i am the arbiter of right and wrong that's what it meant to eat of the tree of eid of of eden of of the tree of the knowledge of good and evil see it's a mistranslation to eat of the tree of the knowledge of good and evil meant to be to claim that you are the arbiter of good and evil it doesn't mean to physically consume like eating a piece of fruit or eating a piece of food okay the term connotatively and spiritually translated in in like you know uh you can say all kinds of terms that like really me have a deeper esoteric meaning that you don't translate literally so the idea of to eat of the tree of the knowledge of good and evil meant to say human beings we as human beings are just i myself in my runaway ego i can arbitrate or decide for myself what good and evil are what right and wrong are that's what the creator in this allegory was warning human beings never to do never make the claim through man's law through the decrees of man's law that human beings can decide and set what right and wrong are right and wrong are there for you to learn they are there for you to discover what they are and then align your behavior to them so that you can perform right action and reap positive consequence collectively as a species namely true freedom and not perform wrong behavior which will give you the consequence in the aggregate of enslaving you of putting you deeper and deeper into bondage as a species and what the out of control ego that doesn't want to acknowledge it's wrong doesn't want to admit a higher power exists and doesn't want to acknowledge natural law is is a satanic mindset from the hebrew shatan which means the adversary or the opposer well what is it adversarial against what is it opposing it's adversarial against humanity progressing in consciousness and eventually becoming a type one civilization because it's the force of entropy that wants to hold everything down that wants to hold forward progress in consciousness and evolute and true evolution down and not allow it to expand and grow it's the force that will not allow us to acknowledge that we are wrong and eventually it turns into the satanic mindset of i am god i will control everything i will dictate what right and wrong are and that's where we're at we're again go back to the shows that i did called our society as one big satanic ritual talking about what real satanism is and how our society fully embraces the tenets of satanism and all of our institutions embrace them and are geared toward the continuance of the satanic ego out of control mindset because real satanism could write should rightly be called out-of-control egoism that's really all it is the belief that human beings are god and we invent what is right and what is wrong for ourselves not not the right way of discovering what those things are and aligning our behaviors to them ultimately this is what we're doing when we take that mindset folks we're we're watering a tree that we have a noose tied around our neck to one of its branches and you know how that ends up that tree we're continuing to feed that tree of evil and it grows and grows and grows until it pulls us right up you know off of our feet and hangs us and that's where we're at we're not toward becoming a type one civilization anything but we are far toward committing collective suicide aggregate suicide as a species far closer to that than we are to emerging out of our chrysalis or a cocoon and becoming a type one civilization and going to the stars not on our current trajectory can it be done so here's the thing folks i want to leave you with some semblance of the possibility for this to happen can and will are two different things i've repeated this over and over again can it be done yes absolutely it can be done i wouldn't even bother to talk about it if it was impossible it's like yeah you know can a human being with no technology whatsoever just step off the edge of a building right now and float in midair impossible i'm not going to sit there and talk about the feasibility of doing that because it doesn't matter who you are you're not doing it it's impossible in our current condition so is it possible for us to become a type 1 civilization well not in our current condition we would have to change and stop doing things we'd have to stop believing in the religious nonsense we believe in the belief in authority the the technologies that we're using that are totally controlling and polluting we would have to reevaluate those and come up with something better we would have to stop doing and condoning coercion violence and slavery a society can never become a true type one civilization while continuing to do and condone those things order following would have to go away a true development of conscience would have to be born we'd have to become the true star child at a higher level of consciousness our understanding in the universe would have to be developed and atheism would ultimately have to go away okay and most of all we need to get out of the satanic mindset and the out-of-control ego so what are we talking about here we're talking about getting out of this self-loathing suicidal way of life and that is done by really understanding how wellness is manifest or fitness you could call it wellness fitness strength of the individual okay and then strength of the whole society because this does extend beyond the individual and it goes to the aggregate of society because the individuals comprise the aggregate there's so many different dimensions to wellness we don't need only mental wellness we need emotional wellness physical wellness in intellectual wellness financial wellness social wellness uh you know secureness and what we do what we choose to do occupationally environmental wellness and most of all the thing that underlies them all spiritual wellness why are we i want to step back a slide why are we in this position this suicidal killing ourselves positioned by what we believe and what we are attached to and refuse to let go of and we are we are watering that thing and making it grow and grow and grow instead of cutting it off and saying no i'm not going to do this anymore where does that come from it comes from ultimately deep seated self-loathing psychologically but ultimately where does that come from folks it comes from being cut off from true spirituality and being cut off from true spirituality comes from a mindset that spirit either doesn't exist or is meaningless or that we have no true connection to it or no method of connecting to it and so many people have told me repeatedly within the freedom movement i'm not talking about your average schmuck on the street that is a no-nothing nonsense television watcher god only knows how those people think i'm not even talking about talking to them i'm talking about talking to people who are active in the freedom community claiming to be activists and or change agents and people like showing up at meetings and meetups saying i want to do something about this state of our loss of freedom and then the next thing out of their mouth is i'm a hardcore atheist believer in only newtonian mechanics and the physical world is all there is there's no such thing as spirit there's no such thing as consciousness and we just gotta put new leadership in there we just gotta take down this political system and stop the financial uh dilution of our currency and stop you know uh the change the political system and we'll be free yeah yeah keep telling yourself that lie buddy and missy it's never gonna happen that way it cannot happen that way and i'm the bad guy i'm the bad guy for saying that because i'm hearing a slave yap away that whoa there's no spirit there's no spirituality this isn't a spiritual crisis or problem now now it's all just physical there's nothing beyond the physical matter is everything just popped into creation for no reason no purpose at some point in the past for utterly no reason from nothing and that's not a belief that's science yeah sure like first of all we're going to understand the total processes of creation i'm not talking about knowing the totality of the mind of god i'm talking about the simple knowing of if you behave like this in the aggregate as a species you get this result and if it's against the laws of right and wrong you're getting slavery every time and if it's according to the laws of right and wrong and you're doing the right thing you're going to get freedom every time but no that's too complex for these jackasses to understand because they want to cling to their religion of atheism and not understand there's a higher power and then say there's no such thing as consciousness it's a meaningless term you're a fool a fool a true fool if that's how you think and guess what i'm talking to most people in the freedom movement and that's why you are killing it it's dying it's failing it's not growing the people who think it's growing are delusional it's dying and failing censorship and totalitarianism are taking over more people think that those are good ideas than don't just like they did in nazi germany and soviet russia and maoist china okay and it's because of atheism it's one of the main reasons it's because of lack of spirituality in one's life lack of understanding the self from a spiritual perspective and then working to heal the past traumas of the self that's not being done we're not working toward holistic wellness that starts with a wellness and spirit you know you don't start with wellness of the external environment without starting with wellness of the spirit internally in man in mankind in humankind okay it doesn't work like that you're not going to get the external result until you get positive internal results and that comes from doing the work on yourself in any of these dynamics you could forget any of the other dynamics happening first if you have spiritual imbalance that's where you have to start the healing process of healing past traumas that's what creates fitness in every other area of life and most people have no connection to spirit because they've been told it doesn't exist and they've bought that fucking lie and their newtonian scientist materialists scientist materialist atheists with a total lack of spirituality in their lives and guess what i've been around them i've worked with some of them and i'm telling you they're all over the freedom movement and they're poison they're fucking poison they're murdering this movement and in their calcified ego they are destroying freedom while simultaneously claiming that they're going to be those who usher in freedom and guess what that's exactly what every totalitarian regime has done that embraced the principles of atheism because it eventually becomes satanism and guess what you can call that by any other name communism is just the form of satanism nazism is just the form of satanism chinese communism maoism it's just a form of satanism every other totalitarian form it's a form of satanism that's all it is it's out of control ego eventually turning into the belief that humans are god we make up right and wrong and therefore will control other people that's it that's all it is okay so we have to learn the dimensions of wellness and then pathways to wellness now i'm not going to cover pathways to wellness in this show that'll be possibly for another show then there's many techniques but the one thing that it has to start with is the self folks it's got to start with the self the shadow work and this is what i envision how i envision people in their refusal to do the shadow work one they don't even know what it is they don't even first of all let me just clarify this before we go to calls for the rest of the show okay i get this question a lot it's one of the biggest questions that i get like put the slide up momentarily then you cut back to me okay so see this slide this is like a hazy shadowy figure that isn't fully formed that it's nebulous people don't know what it's real what it really is what it's about was that male or female you know is it is it something that is you know a parasite is it really human form or is it taking the guys it's nebulous and unknown this is what the deep inner work is ultimately about right now there's a million techniques to do it there's a million techniques to work your way into doing it that i would say maybe aren't actually the shadow work themselves but kind of almost condition and fool yourself into going within and doing it but you know i'm going to explain what the shadow work because i get this question almost all the time and no one's ever satisfied with the answer of what does to actually do internal shadow work really mean right do you have to learn all these complicated techniques do you have to go into all these mystery traditions and become an initiate go into this school or that school no none of that's necessary do you know what's really the shadow work what all that's involved is you set aside external distractions okay sit with yourself and as soon as that's said most people they're out i'm out that done that's the last thing i'll ever do sit quietly with yourself and be honest with yourself in your own internal mental dialogue the ways that you fall short of being the best and most moral human that you can be right okay i i look at say i can be way super harsh on people because i have a very low tolerance for stupidity and and willful ignorance do i recognize i'm like that i don't lie to myself i'm like that that's part of doing the shadow work i could start doing shadow work right here okay i could just calm down set out all other distractions i have a problem with other people's extreme willful ignorance and it makes me like a crazy madman in anger yeah is it something i should just tolerate and accept no but maybe there are other ways to reach people i want to try to do that strike a balance between saying that's not this isn't okay and you can get out of that state right maybe other people say oh he doesn't do that well and i admit maybe i don't do that well but that's part of shadow work you say here's my shortcoming this is what i have to improve upon this is what sorry folks i dropped my headset let me just get that because people generally listen in through uh discord that way i keep the mic from that there and cord pulled it off you say here's the ways that i'm falling short in what i know i could do better so guess what here's my other challenge from earlier instead of being an armchair quarterback pick the things you think i don't do that well and do them yourself show me how it's done show me set an example for me about how i could improve aspects of what i teach that's it wonderful i would love people saying that send me a video hey mark i noticed you you tend to fall short at doing it doing this maybe i could pick up the slack and do it better than you in this respect or in this aspect that's a challenge out there to people do it don't talk about it go out and do it put it out there you'll probably surprise yourself and me at how well you do right i'm not saying i'm perfect at everything or i'm the best at every aspect of it i said in general holistically i'm the person i think is putting out the teaching of natural law more and better than anybody else doing it but i never said i'm perfect in all the aspects never would okay so that's part of the shadow work it's just sitting with yourself you don't even have to look in a mirror close your eyes you know just say hey i sometimes don't treat people with uh as much respect as they should be given and i i'm i'm maybe uh kurt abrupt uh not as kind as i could be whatever the element may be i tend to ignore things that i don't agree with and react emotionally there's a million ways you can do this shadow work but the first place it starts is with the first tenet of awakening and the first tenet of initiation stop lying especially to yourself all the ways that we're falling short of becoming a type one civilization ladies and gentlemen starts with lying to ourselves lying to ourselves about what's true lying to ourselves about what's real lying to ourselves about what we must do lying to ourselves about what we really should stop doing that we don't want to admit we should stop doing and most of all lying to ourselves about our immoral and bad behavior and or are condoning of it for others this is what the shadow work is to do folks it's deep introspection with the self and acknowledging the shortcomings of the self it isn't anything more or less complicated than that now there are techniques that can open that up for people tapping meditation rhythmic drumming psychedelics emotional freedom technique you know you could go on and on with the multi-faceted methods but they will all open up some aspect of your psyche and personality to the same thing to acknowledge those dark aspects of your persona your personality your psyche that are nested deep in the subconscious bring them forth so that you work with them at a conscious level and acknowledge their presence it doesn't even mean you have to eradicate them forever permanently which would constitute a form of perfection it means you know that those things are there that you have to battle with on a daily basis continuously and consciously in the moment make the decision to choose to do better than you your former self your previous self that's who you're competing with it's nothing external to the self it's within that's the true alchemical shadow work and i'm telling people most people will run away from that faster that they would rather go into a situation of blazing warfare where they are almost assuredly going to die then do that type of internal work almost assuredly they would choose certain death in battle rather than face the courage of going within rather than develop the courage of going within and deal with their own internal spiritual psychological and emotional issues without any doubt in my mind and that is what we have to do above all else if we're going to turn the tide truly start making our way toward real evolutionary progress and a true type one civilization so i think that covers what i wanted to talk about here today uh in the at least the formal part of uh the presentation if we cut back to the slides i just have a couple of quick things at the end and then we're gonna go to your calls on discord all right so if you have found value in what i have said here today and what i've taught in the whole series of what on earth is happening and i'm i always preface that folks notice it's not a command it's not me telling you you must do it it's saying if you have found value in it right it's a provisional statement it's saying if you think that this has been valuable to you and you've learned something that is capable of adding value to your life or helping to change your life in a positive way then we do accept voluntary donations here at water and earth is happening for hard copies of the material that we otherwise make available for free online you can get that those at gifts.waltonerthishappening.com we have t-shirts we have flash drives we have dvds we have um key chains buttons stickers and then we have some really special items namely we have the complete pacio collection and then you could also make donations for the completion of the natural law documentary that we are very uh successfully working on and getting ready to bring to its completion there uh five tiers of donation available uh on the um gifts.what on earth is happening dot com site if you want to make a straight donation voluntarily because you find value in the work uh we'll get to that in a moment but i also make available a a data hard drive with all of the study materials and all of the things that i personally studied to come to the understanding that i have come to in other words i'm aggregating the grammar on this drive called the ark okay i'm putting all the knowledge collected from an eclectic variety of sources aggregated onto a one terabyte hard drive if you're interested in that research knowledge you can go to what on earth is happening dot com slash ark and read the instructions for uh receiving that okay it is a also a free offer of the data and i ask for a voluntary donation for the work in the assembly and dissemination of that and the work that i do and actually copying that data and putting it all together and shipping it back to you so you can read about what it is at that page or click the arc tab or button on the site and uh there's a form at the bottom of that page you could fill out for shipping instructions i i do have very stringent shipping instructions for it to protect your property namely the drive you're sending me so that's the arc drive and finally if you want to make a straight donation for nothing in return except appreciation see that's what a real anarchic society folks that's another thing very briefly okay a real anarchic society you know what its currency would be its currency would be thankfulness it would be gratitude gratitude will be the currency in a true anarchic society not based in coercion control and haves and have nots see and it's okay to ask you know there's nothing wrong with asking the whole idea of the law of allowing uh that's put forward in the new testament and put forward in the the true law of attraction actually is ask and you will receive if i didn't ask people for donations for the documentary which i didn't at first that's why we were almost out of commission for four months because monies that i was going to a lot for document documentary um you know uh budget had to be spent on something that the city hit me with namely fixing some uh just uh cosmetic cracks in a wall and then they were saying it was structural damage you know they just don't want the property value going down by a house on the block having a couple cracks in the facade you know in facade block bricks that are you know not even structural or foundational you know supports so you know i got hit with that you know i was going to use that money toward this documentary and i wasn't able to okay and then the stuff with you know the conference happened i took another hit so i just tell people it's a voluntary thing if you don't can't afford it if you don't want to do it if you feel you haven't gotten value and you don't or you just don't want to don't do it it's been purely voluntary if you want to help me you want to help me continue to you know produce the show on a daily basis live have food pay my bills you know i do this full-time and this is what funds it and this is hard work folks this is continual work i'm not asking for anything for free i'm saying if you find value in the work that i have produced and you want to see it continue you can make a voluntary donation what on earth is happening dot com slash donate and anybody who's doing the great work i say you should ask and you should receive as a matter of fact it's a lot better than anybody else doing some of the nonsense that's done in society like stupid sporting games and you know all kinds of other fruitless endeavors okay yeah they entertain and amuse people but guess what are they really teaching people what they truly need to know to become truly free no and they're making millions you know so i'm i don't apologize for asking for donations and i think anybody who is doing the true great work should receive abundance in their life okay a lot of people have to move past that idea that oh we can't use resources to grow our work and to help extend it to more people look at the production values of what we do here you know my staff is doing great work and they're even operating on a volunteer basis i still unfortunately can't really just pay them on a continual basis but i would love to make enough resources to say hey you get this for what you do i really want to try to start doing that sooner than later i thank them all the time for being willing to help this operation help the cause of what on earth is happening out of the kindness of their heart but you know equipment isn't free you know bills that have to be paid are not for free there's living expenses and there's operational expenses and anybody who's actually doing things knows that you know and and they will understand this is a voluntarily uh run operation and if people find value in the work that's produced and what we're teaching here if you want to make a donation it's purely voluntary there's how to do it so thank you to everyone who has you guys keep this going okay you keep us continuously being able to teach this put it out there to new people who are learning about it every day it's a slow process admittedly but you know the whole old saying is it does have to start somewhere i'd like to see it pick up a lot faster and reach a lot more people but we got to go with where we're at and start somewhere so thank you to everyone who's contributed in any form that they have contributed it means a lot to us and it is appreciated from the bottom of our hearts so thank you and that concludes the whole presentation part we have about a half an hour left for calls i ran a little over time i'll generally always do that maybe next week we'll do a whole a whole call-in show or something on this topic but let's see where what people want to talk about i'd particularly like to hear questions regarding things that i talked about today and or in any part of my work and um you know i'm just going to randomly go to some callers in the discord room i always you know put this headset on to talk to people so they can hear me in clearly in the discord room so let's see uh let's go to um anthony from australia you're live on what on earth is happening welcome to the show what do you have for us here today okay mark how are you can you hear me yes i can you're coming in loud and clear yeah yeah i'm great man um look uh first of all i just really want to thank you for everything you've done um so you know thanks to you like i've put so many things into my life i've gone vegan um i've come off my um ssris which i was on for about 10 years wonderful um i stopped drinking fluoride i left a career in marketing because you know it was morally wrong and um and i can just attest to the fact that even just putting those things in my life i've had i can just think clearly i can look at a news article and connect the dots with people around me um they're just completely confused yeah that's what this is all about is clearing up that confusion in people's minds to help them to understand accurately what's really going on not only around them in our society but within them internally um yeah and um you know like one of the things i wanted to mention to you was that um yeah i'm not ashamed to say that i'm a uh i'm a recovered alcoholic and i'm um in um alcoholics anonymous okay and um when you look at the the way that alcoholics anonymous operates as an organization it actually teaches morality and spirituality but not in a dogmatic way they allowed you to you basically just have a high power in your life right and also the way that the organization is structured it is anarchistic it's an anarchy organization um you know there's no hierarchy every group is autonomous um you know one of the third the traditions is that there is no authority in aaa except for a higher power right that someone has to make a personal one-to-one connection to to get some guidance in what they need to do to solve the problem themselves it doesn't do it for you yeah but you get some guidance by connecting to that higher aspect of self and nature and creation to get uh the the spiritual strength and well-being or fitness enough to say i'm worth it i'm not going to be self-loathing anymore i'm not going to hurt myself in this way anymore and i'm going to do that for myself because that higher power as the saying goes helps those who help themselves yeah and and and you know when you talk about shadow work i mean what what what happens in aaa is you have to sit down with a with your sponsor and with a piece of paper and write every wrong thing you've ever done in your life there you go and then you have to go you have to go back and make amends for that and now you know why you are now you know why people don't want to do it this is why we're falling short in there yeah and they died people died you know people come into i've seen people coming to aa that they see that that's what they have to do and they go fuck it they leave and they end up and they end up dying that's right they drink themselves to death that's what we're doing as a society yeah yeah i never said i never said that the shadow work was easy i said it was simple when i tell people how simple it is to do they don't want to accept that as the explanation they think i'm going to give some extreme you know all kinds of crazy procedures and rituals and you know it's not that's not what it is folks this is what it is but yeah i'll tell you what though that when you actually you know when you shine a light on the darkness and you actually sit down and do it it's not as bad as you think and the rewards for doing it are just astronomical like people's lives change and it's moral it's just morality as well there's other way you know as with any other task right the hardest part is beginning because you're in a state of inertia objects at rest and tend to stay at rest objects in motion tend to stay in motion right unless a force is actively applied so when you're at rest and you're not doing something the hardest part is applying that force to say i'm going to start and most people don't want to start okay but once you start what happens another dynamic of motion goes into effect called momentum meaning that you've applied a force now if you continuously apply that same amount of force you you reach acceleration things go faster okay and that's what we're talking about we're talking about just start the process and then you will see it will go become easier and easier as you do it but if you don't do it it's going to remain hard to do it's in the same goes for doing the great work of teaching natural law and learning the technology look i got people who told me i didn't even know what i didn't know i attended your teaching natural law seminar you gave me the unknowns that i was completely unaware of involved in doing this and i had this knowledge that they were like they were at the step where they had the knowledge of natural law and they understood it but then they're like well how do i teach it what do i do i don't even know what where to start so they yeah and i'm having that problem myself right they took the seminar i showed them some software and they were like i can do this and then they went home and they started doing it i'm going to teach people how to build presentations on the air one day that's going to come soon actually maybe you know within a month or so i'm going to just we're going to build a presentation from scratch on the air and you're going to see actually what's involved and people are going to be like okay that's fairly easy to do it's nothing super complicated with with uh technology but it's it there's involvement with it and it takes time you have to craft it and and it's not an instantaneous process like i said the the presentation gnomes don't come and visit me and say here's your presentation for the week i gotta build it and i gotta try to make it look decent for people because i want good production values in my work and see the whole part of it is you start it you get better at doing it as you go you know that's all it's just continuous effort and work and improvement that's what all evolution is about you know i've got a question for you um it seemed i'm not sure really but it seems to me from my experience um you know i've lived in new zealand and australia and i feel like this is these societies mean they're fucked you you try to you try to talk about um australia is one of the most atheistic societies in the world the whole world is and then in that way and then and then the religious communities i mean they've got their head up their ass as well i'm in full agreement with that you know and see that's why my work generally offends everybody nobody knows what to make of it because i tell people atheists have their head up their ass and religionists have their head up their ass we need to understand there's simply a higher power we don't need to fight each other over what the characteristics of that are but it puts right and wrong into effect it it it sustains that it gives us the consequences for what we choose to do behaviorally and as long as long as we have agreement about what is right and what is wrong it doesn't matter what if it's jesus if it's allah whatever as long as you're not doing wrong to other people then you're living morally and that's easy to agree on because there's only seven quote sins or transgressions against natural law murder assault rape left trespass coercion willfully lying every one of those things is a form of every wrong and every one of those things is a form of theft all rights are property rights all wrongs are transgressions against some form of property invariably inevitably and people just don't understand that general principle and just just one last thing um mark have you heard of the um the the researcher he talks a lot about um false flags and crisis and stuff um yes i actually met him last year anarchopoco well you know he said in one of his presentations that um he he's able to predict where the next event is going to be because somebody an insider called him and said they leave clues and the reason that they leave clues is because they're trying to escape karma because they want to tell the public in a cryptic way what's going on yeah so that the karma comes back on us and i don't think they will escape karma but you know it is up to us to i mean if we're gonna if we're just gonna watch sport and drink beer and eat chips all day and not see these things then the karma does come back on us and it comes back on our children i fully agree and couldn't agree more and i do believe in a sick perverted way they believe they're somehow alleviating their karmic debt or burden and telling people in these cryptic covert ways what they are actually doing it i it doesn't it would not surprise me a bit if that is what is actually occurring and i saw i think olleh has done a lot of great work regarding false flags and even that aspect i think should really be looked into and seriously considered because it very very well may be exactly what's happening so yeah anthony i want to thank you for your great points and thank you for the call i'm really glad that some people are tuning in from australia and uh really getting the message so thanks so much all right thanks mark awesome see like the message is going out there slowly but surely and it's getting out to different areas of the world i'll tell you i've said it before and i'll say it again i've been very hard on our european brothers and sisters super tough on them okay it's because the tyranny is even more advanced there okay but they've really been picking up the pace and paying attention and people in australia new zealand definitely and unfortunately i think it's because like things are so bad getting so bad in those areas because they uh that you know the whole authoritarianism has gotten worse and uh you know their the propaganda in those countries has gotten even worse the united states is a slight in a slight bit of a better position namely because we haven't given up our firearms and because there's a lot more alternative media going on in the united states but i see a lot more people from europe coming online and waking up and really being hungry for this knowledge a lot of the arc drives them or orders i'm getting are from australia and a lot of the store uh the gifts orders i'm getting are from australia so i i mean are from europe europe australia new zealand look folks i want to tell you something i got the first ever gifts request for for items for hard copy of items in my gifts area from china this past week that's something that is something okay if even people from china and it was a a woman in hong kong that's all i'll say okay but a woman from hong kong requested some things from the donation gifts area of my website the first ever request from china that's significant that's powerful and something there is something happening there so uh let's move on to another caller and let's uh go to um let's see let's go to josh josh you are live on what on earth is happening welcome hey mark can you hear me yes i can coming through hey i just want to say how grateful i am and thankful for your work uh you really inspired me to do better i got a better job i'm now a truck driver and uh i want to be making more money so that i can be more creative in music and things of that nature and start teaching myself about natural law awesome awesome i mean that's really what this is about is improving yourself in the way that you can build up your own wellness and fitness and then you can help to reach other people who might not be as fortunate or might not be in the same position as you and you could help bring them up in their understanding it's about becoming a student and then becoming a teacher and you know i'm always a student still you know their learning process should never stop should never end but we should also make an effort to teach what we have come to understand to people who have not yet come to understand it as well yeah amen man well uh coincidence today i wanted to share with you an experience which leads up to my next question if that's okay sure go right ahead that i actually had today so you've mentioned uh nicholas shrek on your show before yes i actually was very fortunate enough to talk to him just this morning his website was doing a uh contest thing where you know you're the first person to message the page you know you get about like an hour or two with him and i did and i did get to talk to him just today from berlin germany and it was very interesting and we talked a lot of things about uh you know the old satanism temple upset sure things like that and uh then we started talking about consciousness and this reality being more of an illusion and i wanted to ask you i saw that you were live today uh what do you think about this domain and this reality and its ties into being an illusion well i've often described it as a um as a consciousness holodeck you know uh the ultimately everything comes from what is referred to as the all nature the all force doesn't matter what you call it and it's it's having an expression for learning and growth and i think there are expansions and contractions of that like uh the ebb and flow of waves or tides and ultimately it is a construct it's a it's a construct that exists in mind that whole thing is mind this is what the first principle of natural law in hermeticism they called it the first hermetic principle that the whole universe is a mental construct everything is ultimately comprised of mind and then in an illusory sense almost like a technological holographic way it takes on realness because it's basically vibration this is one of the other hermetic or natural law principles the principle vibration that everything is moving nothing is ultimately at rest and that motion creates the differentiation from the one thing and it creates what we consider space and time and matter and that allows that consciousness to have learning experiences that we call events that take place in the 3d world in the physical domain and you know if you really look at what matter is it's quantum fluctuations in the vacuum that's really all it is that's all atoms are they're not really comprised of any solidity and that's a difficult concept for most people to even conceptualize that really there's no true matter of of solid objects if you bro went into a a thing that you consider uh hard or solid like let's say this table you would go down to the level where you would look at individual atoms and then subatomic particles and then ultimately you would look at those and those are just vibratory uh uh really literally vibrations that are like uh things in a vacuum creating a vibe vibration that seems like a particle but really it would be like you know blowing air and it like you know taking on some form or shape but there's really not anything solid there you know it's just a a vacuum fluctuation of vibration that is vibrating so quickly that it appears that you know it's actual solidity so you know if i uh you know made air vibrate in a certain way you might think you were being hit by a solid object if i pushed it toward you quickly enough you know you could actually put a hole in somebody by blowing air toward them you know and yes it's obviously gas there is something there but it's the general idea that a vibration and force can create something that really there's not anything truly solid there but yet it would take the form of you know seeming like solid matter and even having an effect on other solid matter ultimately that's what everything is it's a construct of mind and you know people never really do those mental experiments and look into things at that deep of a level or look into cosmological theories or tenets and you know get to that level of uh even conjecture uh they're so attached to the physical and then you think like well if consciousness is not physical and memory isn't local you know what makes us think that it actually stops just because the physical body stops and disintegrates at some point this is the whole idea that everybody is allowing themselves to be enslaved because they fear death but slavery is worse than death this is where the idea of freedom freedom or death liberty liberty or death comes from you know it's not a matter of you know should we just survive as i said just physical survival without freedom is a prison it's torture it's worse than dying it's worse than ceasing to physically exist because the spirit is what's being killed and tortured and that's where we're at as a species where we're at a point where our species is that spiritual torture because we're not free okay and the beginning of that process of allowing ourselves to be enslaved in that way is the fear of death because we've bought into the notion that the physical is all there is that there is no such thing as spiritual and we're in existential crisis of believing that physical death is the cessation of all consciousness and spirit and it's just not true and you have to lose that existential fear to actually gain the courage to really do what's necessary to become free and most people don't have that courage unfortunately i'm not saying none do but way more don't have it than do have that level of courage you know that's why only three percent of the inhabitants living here in the colonies actually fought in the revolutionary war most other people are just too cowardly to say i'll put my physical life on the line because living as a slave is far worse than dying and that's how i feel about the whole construct that we're living in the lit the experience you know the whole idea is the experience is what is important it's to be learned from you know not to be attached to most people have attachment to physical life instead of looking at the experience as something to learn and grow from but in order to do that we have to have the possibilities available unto us that freedom allows and that's why i think it is more important to be free than it is to just maintain physical uh you know continuation of life life being sustained could turn into ultra ugly things that are far worse than death biblical prophecy often states that there will come a time where people are so evil and freedom is so destroyed that life will be sustained in artificial ways where people will not be able to die and will be so enslaved that they will want to die with every single second and every breath and will not be able to i believe that's where we're headed as a society i think with i think that's where this whole society human beings will live in that hell at some point in the future unless we get our head out from up our ass and really do something to turn the tide now because the possibility is going away folks because of censorship right now you search the internet you cannot find a massive amount of the things that are on the arc drive right now online you can't do it you would not be able to do it because of how censored the internet has become that's why when i found something worthwhile i don't go oh that'll be there next week or next month or next year i download that shit you know i download it and i archive it in my personal archives you know i don't trust anything that it's not going to get taken down censored the author's going to die and then take it down their website's going to close down yeah anything can happen you don't trust that things are going to be online that are valuable people should be downloading things that they think are valuable learn how to download things from online and create data archives that's what i did that's what the arc is and i'm telling you right now if you search for like two-thirds of that stuff online today you'd be hard-pressed finding it all right so thank you josh let's go to another caller let's uh hear from uh let's go to luke luke you're live on what on earth is happening welcome luco handy are you there how do i sound hey there you go coming in loud and clear i just like to start off by like everyone else saying thank you for doing the actual like holistic true work that it's impossible to find thank you i appreciate that gratitude and my response as always is the best way you can thank me is to eventually activate become a teacher of natural law yourself that's with everyone who thanks me for doing this you know i want to thank you as a peer for at least learning this but then you know really become a peer in teaching it that's how you could thank me the most that that's the most thanks i could ever get okay when people tell me because i've learned this because you've put knowledge out okay i've become a teacher of it not just a listener to you i don't want followers i don't care about followers okay you know people accuse me of trying to be a cult cults creep me out i don't want psychopathic worshipers i never wanted that i tell people i'm not your master your leader your guru i don't want that okay i want you to teach natural law to other people that's all you know so i appreciate the gratitude and i think that is like the the real currency that we will operate on but since we have limited time i'll let you go ahead and get to what you wanted to ask or comment on oh i've uh i've done a little bit um my local city uses uh sodium fluoride in the entire water so i usually go talk to them about that and i've talked to them about uh putting up 5g towers and stuff and then uh i live out over in oregon okay so i lived pretty close to a quick list of portland and uh i went to a gun rally it was about gun rights and uh it's just listing people argue about it's just you know division and this victim mentality yeah and then i try to talk about like freedom and truth and then you know it's just so ingrained how do people who are drinking fluoride and that's big part of it like how do we escape you know it's affecting their ability to really truly think critically and apply the trivium process and come to accurate understanding filter filtration of water folks it's very important here's another thing and uh um i'm sorry uh the caller's name i got luke luke um i really appreciate you bringing that up okay and here's why i need to revisit some of the things that i talk about regarding health holistic health holistic nutrition because there is so much disinformation going on about different things there are so many people trying to gain you know followers and and money and selling books and videos just because they're putting out the latest fad or the latest thing that oh this is now off limits for consumption or you should eat all of this or you know different things i've heard people online saying don't get a reverse osmosis system you know it's like reverse osmosis system is the best thing you could do other than distilling water if you don't want to buy a tabletop distiller or a larger distillation unit which is more expensive like that's probably the best water you can drink you could drinking distilled water if it's unpolluted you could test it with a total dissolved solid tester that you could buy for like 10 15 okay obviously yeah you leave distilled water in any kind of a polluted or dirty environment it's going to soak up the toxins but if it's clean and it's distilled into a good clean glass container that's the best water to drink folks your cells need pure h2o they need pure water no they don't need mineral infused water incorrect i've said this over and over and there's still this lack of understanding that your cells need pure water pure water is a carrier system for nutrition okay it's also a carrier away of toxins it carries nutritions to your cells it carries toxins away very simple concept yet people still don't understand it and are saying oh i would go with a gravity fed filter over ro system or a tabletop distiller it's the exact reverse the best thing to do is to distill water the second best thing is reverse osmosis the third best thing is gravity filtration and or filtration through some type of ion exchange resin and then the last thing you want to do is just carbon filtration which helps with taste but not much else folks guess what that's all the time we have for this edition of what on earth is happening boy did that go fast thank you for watching everyone we'll see you right here next week government is slavery don't you ever wonder why you

What On Earth Is Happening Show #225

Topics: *Remaining Loyal To First Principles In An Age Of Psyops & Disinformation, Mark's hiatus from live broadcasting due to the untimely passing of his former life-partner Barbara Marinelli, this show is dedicated to the memory of Barbara Marinelli, Barb's contribution to the great Work and helping WOEIH become what it is, Mark getting back to work slowly, Mark has ZERO tolerance for nonsense that saps his energy or attempts to take WOEIH off focus going forward, Self-ownership, Remaining loyal to First Principles regardless of danger or trauma, New social media and content platforms, WOEIH content now hosted on LBRY.tv and Minds.com, Big Tech censors are traitors to Humanity, Other Perspective Of Reality TeleConference June 13 Barcelona Spain, Mark's presentation World-View Violence & The REAL Pandemics, Mark's recent interviews on the Alex Jones Show, and Keith Knight's Don't Tread On Anyone, Mark's presentation Sacred Gift Of Anger now free on YouTube, New t-shirt designs coming to WOEIH Donation Gifts, the Complete Mark Passio One Great Work Collection solid state drive, Mark Passio & The Science Of Natural Law Documentary, Video editing for the documentary is still in progress, ARK 2.0 coming soon, Mark announces his new online 23-week technology skill-set sharing seminar "How To Become The True Media," Enrollment in the 2020 class ends July 4th 12:00 AM Eastern Time, learning the skills and publishing tools necessary to create media, basic and intermediate skill sets that will be covered in the True Media seminar, Content creation on computers vs. cell phones and tablets, Profound thanks to all donors and volunteers, WOEIH is 100% donation supported, WOEIH still needs volunteers to do the Great Work, Help Needed in Graphic Design, Video Editing, Web Development, and Tech Support so Mark can focus on research and content creation, One Great Work Network planning and development, Possible donation-wall for WOEIH Show due to lack of volunteers, CoVID 19 is a Socially-Engineered Perceived Crisis, Fear-based and trauma-based response to Mainstream Media hype, Researching virology and epidemiology to gain knowledge and dispel fear, Bolstering personal health and immune system to overcome fear, Mark's view of his social media, People still believe the Mainstream Media liars, Being surrounded by idiots, Improving your local community instead of running away, Mark's mother's awakening process initiated by seeing through the CoVID-19 Psyop, World-view Violence, the "Slave" Class is NOT to questioning the "official" narrative of the "Master" Class, the World-wide state of Duress over CoVID-19 regulations, the Illusion of Race, Violent Actions of Police and decrees of Politicians are completely morally illegitimate, yet people still believe they are their "authorities," Summary executions by Police in America, At least 5 groups of people are involved in George Floyd protests/riots, Protesters with legitimate grievances, 3 types of Agent Provocateurs (Police, Radical Leftists/Communists like Antifa, and White Supremacists) and Common thugs and thieves, EVERYONE involved in the protests/riots believe in the legitimacy of Government and want it to continue* freedom man that's what it's all about [Music] give that the groove on freedom [Music] welcome you are listening - what on earth is happening this show will discuss the topics of human consciousness mind control natural law the occult and all issues that affect the freedom of the people of Earth what on earth is happening will endeavor to shine light upon the darkness of our world and to offer empowering solutions to the problems we face as humanity approaches it's critical moment of choice and now here is your host Mark Pascoe [Music] welcome one and all you're watching what on earth is happening I'm your host mark passio my website what on earth is happening dot-com ladies and gentlemen government is slavery and here on what on earth is happening we are ending slavery one mind at a time welcome everyone and thank you for tuning in this is episode number 225 of what on earth is happening today is June 7th 2020 and we have a great show lined up for you here today if we switch over to our slides today's topic is and we're switching to the slides right now we're having a technical problem already folks there we go okay today's topic is remaining loyal to first principles in an age of psyops and disinformation and we're going to be getting to this topic in a little while but I have many announcements to go through before we do this because as many of my viewers ship knows I have been on another hiatus away from doing live broadcasting for approximately three months and I want to let everyone know who is not aware of why that is so back in February of this year of 2020 my longtime friend and former life partner Barbara marinelli passed away and if we could go over to the slides I would like to dedicate this show to the memory of Barbara marinelli this is going to be really hard for me and just want to take the time and get through this so barb was my partner for a long time and she she struggled with pressure she struggled with addiction and on February 22nd she passed away from what was an accidental drug overdose and it was an accident that's I want that cleared up before any other speculation takes place it was definitely accidental and not deliberate we know this from phone records of you know her ordering food and the food literally showing up to our house we spoke with delivery people that said that the doorbell wasn't answered so this was clearly not intended you know barb helped me so much in every way with the early days of what on earth is happening and even as we grew apart as life partners we stayed tremendously good friends and Barb was willing to do anything to help with anything that I needed here at what on earth is happening and there what as I've said many many times there would be no water on earth is happening without Barb's assistance and help and support and you know she wrestled with problems of her own as we all do and I just want to say that this show is all about remaining loyal to principles you know barb did the great work barb assisted with the great work she did a lot of conference organization helping other people to organize things she you know did anything that really was asked of her to help and I hear today a lot of people talk about some version of spirituality that I highly disagree with and that is that people who are truly awaken spiritually should be happy and shouldn't be depressed and you know I've literally blocked people from my social media who talk like this because it shows me how much how little people really understand about what real spirituality is and what a war it is and what a struggle it is you know if you're not depressed about the current events that are taking place in the world I'd check your pulse okay you know I would really check III might you know go have yourself checked out by a psychiatrist because there'd be something wrong with you if you weren't somewhat at least depressed for people who say oh when you're when you're quote/unquote awake spiritually somehow depression goes away no you're incorrect you're wrong you don't know what being awake really is you have some bullshit version of spirituality in your mind that some asshole false spiritual teacher told you it was and that's not what it is at all that doesn't mean you wallow in it or let it get you so down you know barb struggled with depression and struggled with addiction for many years even while we were you know together and I would try to help her through things like you know kratom which helped with the physical withdrawal of addiction particularly opioid addiction and you know for people that say somehow if you're awake that means you're totally happy and not depressed no you don't understand what the real awakening process is it's volatile it takes its toll on you physically mentally emotionally because you realize just how deep and bad the world situation really is you know being spiritually awake does not mean depression goes away folks as a matter of fact sometimes it exacerbates the condition of depression and you know I tried to be there for barb as much as humanly possible and I tried so many times to help her conquer the the demons that she was battling internally that's everyone's own internal work and it has to be done one on one you know so and then another thing people always talk about is oh you know taking substance you know we've talked about this forever on what on earth is happening this is a right our body is our own property we own our body you know it may not be a wise thing to do but it doesn't mean that anybody has the right to stop us I mean what kind of not really sure why we stepped out of the slides there I'm sorry we didn't that was a an error taking place in software here if we could just clear that up because I'm not able to monitor what I'm seeing here thank you you know we've talked about our self ownership of our body our body is our property that means we we can put into it what we wish it doesn't mean that our decisions that do that will always be good ones but that doesn't nullify the right what cut and what kind of a hypocrite would I be if I said as traumatic as this has been folks and it's been a trauma for me and others who love barb you know for for me to go back and relive finding her is horribly traumatic I told myself I was gonna hold myself together during this you know what kind of a hypocrite would I be if I said I want all drugs outlawed because this happened to my best friend we can't abandon our principles just because something traumatic happens the principles are still there they're eternal life is going to be filled with pain and traumatic situations that are going to happen no matter what accidents occur acts of nature occur we live in a dangerous world and that doesn't mean as soon as danger or trauma rears its head that we throw our principles away barb was an adult who made her choices about herself and her body and I wish I could have helped more with informing those decisions but again that has to come from a place of internal work and barb was a sensitive soul who they was affected by things greatly as am i you know I don't necessarily show those types of emotions all the time but they're there and for me to say I'm not depressed over the world situation would be a lie because when you look at where people are at it's disgusting horrifying traumatic and depressing and for people not to feel that means that they're not quite human that they're not complete as a human being so I just wanted to start the show saying that without barb there would be no what on earth is happening so this show is dedicated to her memory and I'm going to also dedicate the natural law documentary mark pacion the science of natural law to the memory of my former life partner Barbara marinelli I love you barb I always will thank you for everything you did for me and for the cause of what on earth is happening and for the cause of human freedom so with that being said I just want to have a brief moment of silence for the memory of Barbara Marinelli okay everyone thank you again without barb this show and everything I've done here would not have really occurred that's how instrumental she wasn't helping get this project off the ground she helped host my very first lecture ever in a friend's home helped with all my early presentations and I want to talk a little bit about the future of what on earth is happening now in projects that we have planned things we have done in the interim and things we're going to do and let me just say this folks this from last year the end of last year and at the beginning of this year has been a continuous trauma for me personally I am coming back now and I am going to take things slowly and just go at you know a pace that I'm able to deal with and that means you know if certain weeks you know I don't have as many slides as others because I'm working on other projects you know so be it what I'm gonna do here today is go through things and make announcements and talk about things that are in the works just at whatever pace I feel like doing it then I'm gonna go into my slides for this show and then we'll take calls if there's time so I'm not gonna take do anything in a rushed way and I'm gonna ease back into things here on what on earth is happening because again I am still psychologically and emotionally in recovery myself regarding everything that has taken place over the last several months in my life and another thing that that has really done it has really knocked a lot of tolerance out of me for bullshit from other people and I already wasn't a bullshit taker to begin with but I'm gonna talk about how I'm really at a zero point of even being somewhat understanding of nonsense and idiocy I'm not doing it I'm not tolerating it I don't have the time or energy mentally or emotionally for it and if the people try to interact with me who bother me or upset me or annoy me you are going to be very very quickly punted out of my life like a football through the uprights it's not even going to be a question or any kind of a thought process involved it's just gonna be a quick cutting off so I don't have the energy for it and I don't have the tolerance for it quite frankly and you know what I I consider people who say that spirits real spirituality is just the infinite building of more and more tolerance for idiots you're also incorrect you're wrong it's the cutting off of things that SAP your energy and understanding that your energy needs to go toward more important things and you shouldn't dedicate even one second of it to nonsense and bullshit so I am going to be even infinitely harder about that than I ever have been in the past and I was pretty damn hard about it in the past but now it's just gonna get really brutal okay so that's number one and I want to talk about that regarding social media in a moment let's talk about some of the future present and future things going on here at what on earth is happening I will be participating in a teleconference a live video conference called other perspectives other perspective of reality it's um in Spanish otra perspectiva de la realidad this is a conference taking place out of Madrid Spain organized by my friend Nuria who is hosting this all day on June 13th so that is next Saturday this coming Saturday I should say and the other speakers are Felix Rodrigo Mora Theresa Moreira josep pàmies and myself mark passio there were some other speakers but unfortunately they were not able to be present during this so I'm going to do not only a presentation but I'm going to do there's a pre-recorded presentation I've already recorded the video and giving it to them I'm also going to do a extended question and answer session for about an hour and a half following the presentation of my conference of my live video pre-recorded video presentation so the all of the presentations will be subtitled in English and Spanish so if you are either English or Spanish speaking you know don't worry all of the presentations will have both English and Spanish here is the webpage that showed my personal presentation again the conference is other perspective of reality June 13 2029 - 7 p.m. Madrid local time and my presentation at this conference is called worldview violence and the real pandemics if you're interested in attending this virtual conference please visit the official conference website where you can take a look at the schedule and you can look at speakers and speaker BIOS the website for other perspective of reality conference is OPD our 2020 dot-com that's o p dr - 0 - 0 . calm check it out it's going to be a great event I'm excited about it and I'm really glad to be participating in it and I think not only my presentation is going to be very impactful but my question and answer session should be very enlightening and I'm really looking forward to taking part in that extended hour-and-a-half question-and-answer session with the audience so go over to the website Oh PDR 20/20 and check out this conference coming up now in relation to this I was also going to be oh by the way there's my title card of my presentation at this event again it's called worldview violence we're going to be talking about what worldview violence is on today's show and the real pandemics I cover the actual pandemics that are taking place instead of the perceive the ones in this presentation this presentation is going to be going into the water on earth is happening donation gifts area of my website this week probably tomorrow so that will be going live as an item that you could order in donation gifts this week and it will be a pre-order for it because I'll be actually releasing it right after the conference is over so it won't ship out until after the conference but I'll probably put the item up for pre-order in the store this week related to this I was also going to be taking part in seed 4 which was scheduled for May 29th through 31st in Athens Ohio this conference unfortunately was postponed due to the coronavirus quote/unquote pandemic so it is being rescheduled but I do not have the rescheduling information as of yet when uh Brennan and Martin has that information I am hoping that I will have that very soon and I could tell people the rescheduling date and time for the seed for conference I'm still going to be a part of it I gave my word that I would take part in this event and it would be my last public conference because I'm not going to be doing conferences anymore I'm just gonna stick with my doing my own events but I agreed to take part and seed four before I made that decision so I'm gonna honor you know my commitment to this event and I will be giving a presentation when the conference is rescheduled called fake-ass anarchists and believe me there's a lot of them and we could see them out operating and people calling them anarchists when they're nothing of the kind and you know we need to talk a little bit about that today as well so you know let's saw continue I've done a few recent interviews that I think went really great I was recently interviewed on the Alex Jones Show on infowars.com you can check that out it's in the top of my news section right now what on earth is happening calm slash news I was also interviewed by Keith Knight with Larkin rose we did a you know dual interview with Keith Keith night of don't tread on anyone that interview went really great and it is posted to my news section as well so check out the what on earth is happening comm news section for all of my recent interviews and happenings the sacred gift of anger which was my last formal presentation which I gave back in late 2019 is now free on YouTube again I put my most recent work on the donation gifts area of my website for a short amount of time usually a couple of months maybe about three months and then it goes out for free on YouTube and my other you know media channels such as bitch shoot Vimeo etc I'm going to talk about some new social media and new content delivery platforms that I'm on because it's very important getting the word out there to non censored places as we know we're fighting big tech internet censorship it's horrifying it's a total contravention of the First Amendment the people that are conducting it are traitors to the people of the world forget being even traitors to America you are traitors to the people of Earth I don't know how much stronger I could even say that the big tech giants that are censoring people from giving anything other than the quote-unquote official narratives you are traitors to the people of Earth I'd say that right to your face and most of all you know whose face it needs to be said to your dirty rotten lousy failure of parents that's whose face it needs to be said directly to you are traitors to humanity okay and you know we need to get things out on the different platforms so to to that end I am now hosting what on earth is happening content on library and minds this is critically important because we all need to learn about and start using alternatives to YouTube and Facebook and I'm just want to briefly take a second to yeah my producers just having a bit of a technical issue if you could just hit the zoom button up up there because that's you know I'd like to have that full screen if possible thank you thank you library is a phenomenal content delivery platform that is blockchain based that means it's impossible to censor okay so if you're having problems with YouTube censoring your videos here's my challenge to the so-called freedom community okay number one start using other platforms other than YouTube in literally one day I could switch everything on my website from YouTube to another platform and embed all the videos from a different place if I want to while they're hosting that for free I'll use their delivery content system but as soon as they start censoring me I could switch to another platform with the click of a few buttons okay everybody first and foremost needs to have a backup option like that and don't just host your videos there host them in multiple places and please for the love of God make local backups I hear people say oh my youtube channel got taken down I don't have any backups you're out of your goddamn mind if you don't maintain local backups of your material why in the hell would you even put your content online if and trust it to another platform that isn't yours if you did not have a local backup you are out of your mind if you do that okay so make local backups nightly at the very least and host your content multiple platforms online I highly recommend library and here's why library cannot be censored once you upload a video it goes on a blockchain and that's it you're not that's not being censored or taken down by anyone okay it's a public ledger that is distributed li maintained just like BitTorrent like like Bitcoin etc okay the the network is built upon the strength of the network is built upon the usage of the network by its users so it's a phenomenal content delivery platform it's getting a lot better with its interface and I think it is ready for primetime use I've been using it and enjoying it and I highly recommend people who are concerned about big tech internet censorship to join library comm you could join right from a link that I posted on my Facebook page or you could just go to my site library TV slash at mark passio and then mines is a social media platform that is similar to Facebook but a good alternative to Facebook that doesn't censor that is a free speech platform I have created a page there I'll be you know posting there as well mine's com slash mark passio we have to look into delivering the live stream to mines I'm gonna look into that and if possible we'll be sending a live stream out to that platform as well so that's really good news I'm really happy to be part of these networks I know a lot of other alternative media hosts have made the transition over to these networks for a while I think it's smart and I think it's high time that I have done it I'll still be on traditional social media and should a traditional content delivery platforms as well but I'm going to be utilizing library and minds all the more as time goes on so let's move on to the next thing the documentary mark passio and the science of natural law is being actively worked on Joel Torres has taken the lead editing role and is doing a fantastic job we're making good progress on this it is not ready for release yet we have gotten so many phenomenal donations in for this documentary I thank everyone who donated folks because of you I can pay my video editor and not worry about not having a budget before I had to literally beg for volunteers and it wasn't working out so well where money had to come directly from my pocket now we have a budget to pay a video editor so this project is absolutely moving forward as planned we are taking our time with it I want it to come out just so I want to be very proud of it everyone please be patient it is absolutely going to be out by the end of this year okay I know that's a long time to wait we are projecting hopefully that it gets out even sooner than that I don't want to make any promises but we're working hard toward it like you know we're basically working about three days a week on this right now okay full-time days okay so there is still an option to make a donation to pay for the cost of the documentary there's five donation tiers ranging from $50 to $1000 there's a $50 tier a $100 tier a $250 tier a $500 tier and $1,000 here one hundred percent of all donations go directly to production costs whether it be to pay for video editing or to actually press the documentaries themselves all donors receive a complimentary copy of the completed documentary on flash drive and DVD and folks there's been questions about this from some people that is what the shipping cost that is going to be added into your donation you're making a donation on the gifts area so you could make this donation at gifts dot what on earth has happened happening calm the gifts area of my website when you make the donation a shipping fee will be added depending on where you are in the world there is a flat-rate shipping fee that will be added if you are in the United States in Canada or in the rest of the world anywhere other than the United States or Canada you will be charged a flat rate shipping that is to cover the shipping costs because when you make a donation you will receive a copy of the documentary when it is completed on flash drive and DVD you'll get a full HD version on flash drive and you will get a DVD copy on DVD disc which it will be DVD resolution okay so you'll get a DVD resolution on disc and you'll get a HD version on flash drive and the shipping cost is to cover shipping the disc and flash drive to your home you know when the documentary is complete just want to clear that up for people because more than a few people have emailed me to ask why am i getting billed shipping when I'm just making a donation that's why you're gonna get a physical copy of this when it ships ok as part of your donation we are debuting a new t-shirt we're debuting a whole new order of t-shirts that's going to be being done in a couple of weeks these aren't ready yet if you look on gifts dot what on earth is happening calm I'm out of most t-shirts I only have a couple of women's designs left we'll be placing a new order probably very early this week as a matter of fact we're just finalizing artwork and things like that and going to get the order in this week this is the new design for a Marc passio and the science of natural law t-shirt this is the t-shirt for the documentary the design on the front has the logo of the documentary and the design on the back has a design with the Flower of Life and then under that it says as morality increases freedom increases as morality declines freedom declines and then the what on earth is happening calm website URL we are going to be releasing this in short sleeve and long sleeve designs will be pressing long sleeve t-shirts for the first time here at what on earth is happening coming up in a couple of weeks so beyond the look out for new shirts at the at what on earth is happening donation gifts that's gifts not one on earth is happening calm coming soon okay long-sleeve shirt designs will be included for most of the t-shirt designs so please be on the lookout for all of that really excited about the new shirts think these stimulate conversation they get people interested you know they're a good conversation starter so and they help support the effort here at what on earth is happening because there's a lot of fees associated with doing this you know and I want to get this to a point where I could really you know give stipends to all the volunteers because there's many volunteers that still aren't being paid an item that we introduced last month or a couple months back that's really going well and now people been gaining getting a lot of value out of this it's called the complete mark passio one great work collection so what's on this little flash drive this flash drive is tiny it's only a few inches okay it's like a little bit bigger than a flash drive and it contains all of my work that I've really ever done publicly it contains all my presentations and all my presentation slides for every presentation I've done it contains all archived interviews and ancillary videos from 2009 to the present it contains the whole what on earth is happening podcast series audio and video all the way up through podcast 224 and when this one is done it will be put on there and it all has the founders no masters no slaves EP that's my punk rock band that we've released one EP we're been on a hiatus I don't know if we're going to get into the studio and release a full-length album we'll see if that happens I hope it does so I'd like to see those songs you know get give their be given justice by being recorded professionally and this is all on a really nice on disc external 500-gigabyte solid state drives no moving parts solid-state NAND flash electrical storage very ruggedly built comes in a nice little carrying case with a wrist strap comes with a nice little tag you know put on there with a little chain really nice presentation these are available in gifts thought what on earth is happening calm and a lot of people have taken me up on this offer and a lot of people are telling me they really like how we did this complete one great work collection of all of my work so check that out at gifts another offer I've been doing really for many years here at what on earth is happening is the Ark drive and the art drive is a one terabyte external USB 3 Drive that you send to me and I send it back to you filled with all of the research data that led me to the understanding and conclusions that I present here on what on earth is happening and the drive is actually comprised of about 1,800 video files 8,000 digital books in the form of PDF or ePub files and over 20,000 audio files in the form generally of mp3 audio files lectures presentations etc it would take a lifetime to go through that much data literally and it has for me and I am now today announcing that soon I don't have an exact date on this but shortly I am going to be offering for the first time and if we can go back to the slide I want to show people this it is going to be called Ark 2.0 Ark 2.0 is coming soon do not let that dissuade you from getting Ark one because that is still being made available while I am building Ark 2.0 but Ark 2.0 is going to be coming soon I don't have a publicly available release date yet I'm hoping it's going to be within a month or so we'll see how it goes because I'm still actively building it and let me tell you something folks the second Ark is going to be too terrible of data and let me tell you something when you see the quality and quantity of information that is going to be on r2 you're not going to believe it I can barely believe it it is just some of the best material ever amassed in one location so that's coming shortly so be on the lookout for our 2.0 I'm very excited about that as well next up this is some of the biggest news that I have ever released here on what on earth is happening I told people on Facebook I'll have a big announcement this is it I told people before on this show that I would eventually be doing this seminar and I've slightly tweaked it a little bit and it's even bigger than I thought it was going to be after understanding what it's going to cover and I'm gonna tell people what its gonna cover and if I could just ask my producer could you just make that full screen please thank you this is a live webinar it is a seminar a multi week seminar that is going to be taking place over twenty three weeks hosted via zoom teleconferencing software zoom webinar it's going that's the form that this skill set sharing class of technology skills is going to be presented through it's going to be a zoom based webinar so you'll need to zoom software if you choose to enroll and participate so let's describe this it's called how to become the true media folks I talked about in the last show that I did back in January I'm sorry back in February that the main reason people aren't doing the great work of teaching people natural law in a public way is because people do not have the technical publishing skill set to be able to deliver online content in any cohesive way in any structured way in any organized way in any formalized way and this is the problem this is the underlying problem you could have all the knowledge in the world many people out there who I speak with who know my work have an extraordinary handle of the knowledge that I teach here at what on earth is happening and then when I ask them what are you doing with it silence comes back a look of confusion comes back what do you mean what am I doing with it well how are you putting it out there publicly you have a website oh I'm sorry I don't even know how to build a website what know where to start do you have videos oh I don't know how to run equipment like that I don't know how to work you know a content platform here's the problem folks you could have all the knowledge in your head and it makes no difference if you don't know how to distribute it out to other people publicly and doing that work publicly in today's world is not picking up a telephone and calling your friends it's not handing out flyers on the street it's not talking to your family when you get together for a family function or get-together it's going out online and putting that material out in as public and as free of a way as possible and you need to know publishing tools in the modern era technologically to know how to do that and the percentage of people who know the actual content who know the principles that I teach here at what on earth is happening that also know how to do that publishing work is a tiny tiny tiny few if any you know there's some people who who know how to do that technical work but it is all too few now this seminar is designed to help people get some of the basic and intermediate skill sets under their belt that they will need to actually deliver the type of content of talking about what natural law is and how it works what rights are what true morality true objective morality is etc out there to the public so this is a seminar where I am teaching people not the information but I am teaching them how to distribute the information effectively in in essence how to do the things that I know how to do with content delivery I mean take a look at what we do here with this show take a look at what I do with my website take a look at what I do with the physical items that I put out there through gifts okay this is going to be an intensive seminar it's going to be three hours a week for 23 weeks that's 69 hours of instruction 69 hours of instruction so people are going to look at the price I can go oh that's a lot of money to ask for instruction it comes down to about seven dollars and fifty cents an hour for my time you know what most instructors pay private instructors pay for their ask for their time to do private tutoring an instruction for skills like this upwards of a hundred dollars an hour if you're lucky if you're lucky okay I'm going to take seven dollars and fifty cents an hour approximately for teaching this seminar so it's 23 weeks that's a long commitment this isn't for your average person this is for people who are ready to make a dedication in their lives to learning how to teach natural law so I fully understand what I'm asking folks I'm asking for three hours of one of your nights every week for 23 weeks we're starting July it's going to begin July 7th that's one month from today okay we are taking enrollment for approximately one month a little less than a month I'm stopping enrollment on the 4th of July midnight July 4th ends enrollment for this seminar so you have from today which the item is live on gifts until midnight July 4th promptly at midnight on July 4th that item is going away from this store you will not be able to enroll from that point forward I will accept no new enrollments ok it will be hosted via zoom software so you probably suggest downloading zoom meeting zoom client for meetings if you intend to take part in this I do not suggest taking part in this seminar via your web browser I highly recommend using the client software on a desktop computer I don't recommend taking it via a tablet because I'm going to be talking about skills that you should have a desktop or a powerful laptop a semi powerful at least laptop computer see this is part of the problem is everybody thinks you could be a content creation and delivery person with a tablet or cell phone you need to get out of that mindset folks it's really a garbage mindset quite frankly and there are people who will debate endlessly about this but you know I'm just gonna say my entire mentality on this is set down the mobile devices for when you're having fun we're just reading you know or just absorbing content they're not content creation tools they're not effective content creation tools can you do it oh you can do it it's not impossible it's just going to be a lot harder for most tasks this is what the powers-that-be one they want to stuck on the mobile black mirror you know they don't want to setting up a powerful desktop machine anymore that's so 90s folks don't you know that's so nineties of you to have a powerful desktop computer it's so 90s of you to even have a powerful laptop computer you know you know I won't be able to do half the things that I do with water earth is happening if I didn't have the equipment that I have tried to use mobile devices or like chintzy laptops doesn't really work like that folks you have to have at least good mid-range equipment up to at least low-end high range equipment you know using low-end stuff for mobile stuff that's not going to get you there I'm sorry it's just the sad fact of the matter truth and that means it takes a little bit of money you have to have a little bit of a budget to do this stuff you know if you're a total pauper and have absolutely no resources at your disposal you're gonna find it very difficult I'm not gonna lie to you you know unless people are very generous and just give you equipment for free and guess what I've had the great fortune of having people give me expensive equipment for free because of what I've previously done you know starting this on a total shoestring budget and then you build when you can you know yeah that's that's another way of doing it well let me go back to the details of this very very important and powerful seminar that I really hope we have you know a lot of enrollees into this seminar because we have an opportunity here to really teach people how to do this not just teach them what to teach you know you you can make that determination of what you're gonna cover on your own I'm not to tell you exactly what you need to talk about okay but what you do need to understand is how to actually get it out there so there is limited space available we're only going to have so many spaces in this seminar so you know if the seminar fills up I have to pull the item from the gifts area as well because we only have a limited amount of space you know that I'm gonna be able to pump out my desktop to to you know show people in real time things that I do and I also have a you know camera that I can show people Hardware things like that so it's a distance-learning seminar okay it's the next best thing to being right beside me and me showing you hands-on it's going to be Tuesday evenings from 8 p.m. Eastern Time to 11 p.m. Eastern Time so it's a three hour session every week once a week on Tuesday evening for 23 weeks it will conclude on December 15th the week before Christmas approximately a week before Christmas ten days before Christmas now I chose eight to eleven because I don't want to alienate people on the west coast of the United States now obviously I have to have it at a time I'm going to be up and active okay so people in other countries unfortunately yes it is going to be geared toward us time us time zones and you know I'm you know I apologize in advance for people in other countries but you would have to work your schedule around that if you want to attend because I do have to first and foremost cater to english-speaking people in the United States I mean let's just face it that's just the way it is that's my target audience and you know I am going to have to basically put it out there so we have the maximum amount of people in the United States attending as possible and I'm not gonna mince words about that or pretend that that's not why I chose this time to do it I did that because I want all time zones in the United States to be able to participate so if you're on the west coast you just subtract three hours this will be taking place 5 p.m. to 8 p.m. if you're in mountain time it'll be 6 to 9 if you're in central time it will be 7 to 10 and East Coast time it will be 8 to 11 we're starting Tuesday July 7 2020 we're ending Tuesday December 15 2020 the cost for all 23 weeks of attendance will be five hundred and twenty three dollars and ninety three cents personal donation to the water on Earth is happening cause this is not this seminar is not for sale I am giving you a it is a private closed seminar let me say that again the seminar is not for sale it's a private seminar that I will be giving in return for a donation of value that I feel is appropriate I will be giving a private invitation to attend as a gift to you if you choose to make a donation to what on earth is happening of five hundred twenty three dollars and ninety three cents enrollment is open as of now right now you can enroll at gifts dot what on earth is happening calm my gifts area of my website which is a exchange of donation for gifts for gift items that's how we work things here on what on earth is happening we don't sell you anything there is a private donation from you to me as one human being to another because you find value in the work that I do as a human being to try to get the word out to others and do the great work and if you find value in that then you can make a donation to our efforts here in return which you will receive a free complimentary gift sent to you and in this case that's how we are working the seminar there is no merchant exchange here it is just a private donation and then I will invite you into the seminar which is a private closed seminar I think this is a really really really important and big thing here at what on earth is happening ladies and gentlemen I think this is this I'm gonna just make a statement here this seminar is as important as the work I do on air here on what on earth is happening that's how important it is this is teaching how to do and distribute the great work nothing could be more important so I'm very very excited about announcing the how to become the true median online seminar so if you go to gifts now I'm going to show you where to go okay right now then we're gonna jump back into the presentation because I'm gonna give some bullet points about what we're going to be covering in this great online seminar I'm gonna jump out I'm gonna jump over to my web browser I just want to show you real time where you go for this okay here's what on earth is happening dot-coms homepage and by the way I want to just mention you can watch the natural law documentary trailer we released trailer number one okay and it's there right underneath the link that you can click to make a donation all right so if you click gifts right here it'll give you a little caveat warning okay to say you have to have these a you know payment method set up or donation method set up we're going to click on the green box that'll take us into the gift cart okay and then right here at the top of the cart underneath the link to go back to the homepage you'll see online tech seminar and there's the slider I'll just pause that slider there let me go back and show you that the slider shows random items when you click in it'll be different each time you click in but there it is right there you could click that to go right to the page or you can go right here and click online tech seminar it's right at the top okay if you click that you'll see this page that shows you the item in this in the gifts area you click that it'll take you to the item page and then there's a description so here's the product description we're going to be covering all of this in a moment okay and then you could click Add to basket and then you can click view basket and when you hit check out here you could then fill in your information and choose a donation method you could donate via PayPal me you could donate via I believe six different crypto currencies if not I'm not mistaken okay and that's how you will complete your donation okay so that is how to enroll in the how to become the new media online technology seminar let's jump back into the slides and let's move on the skill sets that are going to be taught as part of this seminar are beginner and intermediary so I want to stress that ladies and gentlemen they beginner and intermediate skillsets if you are already a technology expert if you are already a content creation or content delivery expert it's probably better not to take this class because you will probably it will probably be beneath your skill level okay at some point I may make an expert class or advanced class but right now this is beginner and intermediary skill sets and here are the skill sets that are going to be taught as part of this seminar for people to learn how to do the great work we are going to I'm going to be teaching basic operating system skills so I run a Mac I'll largely be showing people how to do that on Mac but I could also run Windows in virtualization so I have a Windows 10 setup in virtualization if people want to learn correspondences on the Windows system I can also switch over to a virtualized Windows operating system and show them basic skill sets they're my main computer that I will be hosting the seminar on is going to be a Mac I will be showing people file systems and disk formatting so we'll be covering different file systems for hard drives and how to format hard drives and or solid-state drives I'll be covering how to manage and organize files and folders locally on a computer especially if you have a large amount of data that you need to organize well and efficiently that's called the hierarchical file system or HFS of a computer file system the folder and file management so we'll be going into that in detail I'll be showing workflow and what is called best practices how to go about efficiently carrying out a workflow on a daily basis and what I consider best practices to be meaning that there are tons and tons of different ways to do something but I will be showing people what I consider the best and most efficient way of doing those things we will be getting into basic word processing and publishing of print material or just words you know simple flyers with a word processing program how to make outlines with word processing programs that's very important almost everything that we do here on what on earth is happening starts in a word processor I can't just write there I want to emphasize a lot of people don't know that or understand that almost everything we do here starts writing text into a word processor to build an outline to structure thoughts and ideas so important people have to have those skills the next skill set will be internet and networking basics you know the basics about how web pages work the basics about how a basic a simple high-speed internet connection work good choices to make about internet connections routers networking cables etc networking basics how to set up a basic home network and other things you know regarding networking web browsing how to set up your web browser browser extensions you know there's so much to this you know we'll talk about ergonomics as well that's that's workflow and best practices how to set up your work environment in the 3d physical world searching the web and searching the dark web to different things especially nowadays you know I look back at the way I used to do things and almost just about every practice that I did with a computer has changed over the even the last five years adaptability is something I'll be talking about in teaching you know keeping up with new technologies as they're released not not getting hung up on one way of doing things when new systems and software and equipment comes out you do migrate and move you don't just stay you know a person who is fearful of upgrading you look at what things are new and things that can make your workflow more efficient and you slowly transition into those new things instead of staying you know in antic antiquated systems but searching the web and dark web boy has that changed dramatically so I'm gonna be showing people how to search err you know one of the things I said in a recent interview with my producer is um that most people don't even understand that the bulk of the Internet is unindexed what does that mean it means that the search engines that most human beings use on a daily basis are not indexed they're not indexing content of the vast majority of the Internet it's and people have done the calculation it's like 96 percent and that might even be a high figure folks ninety-six percent of what is actually available online you cannot reach or find from a traditional search engine let me just say that again folks and I'm gonna say at least let's qualify it with at least 96 percent of the content that is actually available on the Internet is not indexed by traditional search engines that means you cannot find over 96 percent of the content online with a search engine such as Google where DuckDuckGo or yippee or whatever else anybody uses ok Yahoo etc I'm gonna show people how to search not only the regular internet search engines but how to search the dark web the areas of the internet that are not indexed by traditional search engines I'm going to be teaching basic graphic design we'll be getting into Photoshop we'll be getting into some page layout tools ok basic print publishing and page layout we'll be getting into how to build presentations teaching presentations such as this you know these slides didn't make themselves folks you know I got to make my slides for my show every week I'm going to show you software to use on how to make presentations will be doing basic audio editing and publishing you know how do you edit audio for the web how do you then embed it into a website will be doing basic video editing and publishing and publishing it video on different content delivery platforms such as YouTube bit shoot library and then how to embed on the web whether you're doing that through a content delivery platform or through basic html5 web publishing how to make a website you know I'll probably cover very simple things like how to make a blog how to make a simple site maybe through Google Sites and then up through introducing basic content management systems you know maybe I'll show people a word how to make a wordpress site or maybe I'll show people the Joomla content management system okay video conferencing tools how to use things like Skype to a conference with others or zoom we'll get into a little bit of sharing content via cloud sharing services because if you're going to collaborate with others sometimes you have to post things on the cloud and share people into that unless you know how to set up a server yourself which is more advanced skill sets which I'm not really going to cover in this seminar so we'll get into the basics of sharing documents and media via cloud services and then finally we'll look at hardware and equipment and talk about best practices there these are all of the skill sets and more to be taught as part of the how to become the true media 23 week intensive seminar hosted by me and I really hope people take this seriously and seriously consider this great opportunity and come and that is who it is intended for people who are looking at making teaching natural law a fundamental focus in their lives and want to really learn how to do it effectively so that's how to become the new media folks I hope people will take advantage of it so let's move on to a couple other brief things before we move into our content for today's show a lot of people don't even know I have a patreon a lot of people have emailed me and asked me if I have one I've had one for quite a while I just wanted to share this great graphic that Brett Hatton made and um tell people I've had a patreon for quite some time you know I don't every every week on the show announce it and tell people it's up there I just tell people if you want to make a straight donation go to the donations page of what on earth is happening calm hit the donate button and you'll go to that page and there's all the different donation methods listed but if you want to go directly to my patreon you can go to patreon.com/scishow and if you want to become a patron there for a monthly recurring donation you could do it at that URL to everyone who has donated to the one on earth is happening cause and to all of the volunteers here on the staff at what on earth is happening I want to say from the bottom of my heart thank you so much I could not do this without you you make this happen that is how everything is funded here at what on earth is happening it is done through voluntary effort we are voluntary us we believe in voluntary interaction so I want to say thank you to everyone who has voluntarily contributed in the form of donations or voluntarily contributed in the form of their very valuable and valued skill sets thank you from the bottom of my heart what on earth is happening would not be happening without you and you know I just really want to say thank you to the the crew here everybody involved you know from my associate producer Lea boon to my producer he on the show Mike seaman to everyone on the setup crew everyone on the sub crew does phenomenal work every week we do a live show thank you your effort is absolutely valued absolutely needed so I really hope people hear the sincerity in my voice because it is humbling the generosity that people have shown and I mean people during this dark time have made incredibly generous donations through their efforts to this cause it's overwhelming that's all I can say is it's overwhelming okay I thought people were gonna be I just want to like take some time with this thank you because I really thought it was going to be people were gonna be buckling down and like really watching everything like monetarily like I have received such generosity during this time I can't I can scarcely believe it I can scarcely believe it thank you guys thank you okay so that being said I do have to get into a slightly unfortunate aspect of work here ladies and gentlemen what I really want to do is be a presenter I want to be what I really am good at and I'm really good at being a researcher and a presenter I'm really good aggregating information and presenting information I am an aggregator of knowledge and a communicator of knowledge I want to be able to focus on that I would say the bulk of my time goes into technical work and always has from day one from the beginning of doing this and I've tried my hardest to communicate this I'm going to try to do this calmly and without anger today okay I have tried from the Bata of my heart to communicate how difficult what I do is because I am continuously sidetracked from my work to have to do technical tasks when all I want to do is find and create content for everyone out there so that they can learn I am blocked from doing that on a daily basis because of technical issues that I myself have to deal with folks to just this week I had to delay making my slides and stay up for into the wee hours of the morning literally some days until 5:30 a.m. totally groggy and tired working on slides and working on technical things because I had no technical help and if I didn't solve it it was not going to get solved and I would not be able to make the announcements that I've made today because I've had no technical help that what happens is my slide content gets pushed back my research gets gets pushed back and I have to work on the technical work instead of the actual content and content delivery I would now at this day you look at everything I've done since day one with what on earth is happening and I want to emphasize this as part of the show this is gonna be the last thing I talk about before I jump in to my actual slides for today okay if you look at how much content I have created in the history of what on earth is happening multiply it by ten times at least ten times that is the amount of content I would have had out if I did not have to be the technical person for this work I want to say that again I really want to hammer it into people's brains and I need you to listen and hear what I'm saying I could have had ten times the amount of work and probably even greater quality than it is even put out there in if I were able to just focus on doing my work if I had a tech person see this is what that's why I want more people to learn this because guess what if you learn these skill sets that I'm gonna be giving in the seminar you could go and help any content creator in any part of the freedom movement not just me you can go and help anybody become part of anybody's team and help them you want to volunteer your work to somebody who's local to your area go and do that and learn the skill sets go and do it I need local volunteers and with one exception I can take a remote volunteer I still have some people that I are volunteering to help in one of these positions which I'm going to talk about but folks unfortunately if I do not really have a response to my call I've been asking for this for years I've been asking for this help here in Philadelphia for years and specifically the last show I practically begged for this help and gave the email address to respond to and in the interim of all this time really only a couple of people even answered the email for help that's not good enough that's sad when I ask for donations people have been very generous when I've asked for even technology equipment donations people been more than generous people will throw money at a problem but when you ask please get involved and help I need your skill sets here I need to be able to turn to a living human being while I'm here in my studio and go I need help with this can you please take me off of this can you take this off my plate and help me with this while I make some slides or why research what I want to talk about next week I can't do that folks I have to sit and deal with the technical problem first in a linear fashion because if it's not running smoothly I can't do what I do that's why I need people in-house everybody says you you always get back now I want people to really listen to what I'm asking for please listen don't just assume that you know what I'm asking for okay so I'm gonna show you what the details of this are on my website in a moment this slide is called the great work get involved put your talent where your mouth is people say they want freedom and then when you say can you get involved and actually help they're like no good luck finding somebody though and then they pat you on the back sorry bud you're out of luck because I don't know how to do that I don't know how to do that shit it's a good luck with it that's what I get constantly 24/7 almost okay that's why

I'm hosting the seminar people need to learn how to do this shit and not make excuses you need yeah it's like a long commitment of time guess what folks if I taught you for 23 years you might get as good as I am at it maybe 23 weeks is nothing you're gonna get the very basics but it's a start and it'll inspire you to go further and it takes some more of your time to sit and learn this is a sacrifice of time I'm not gonna lie you can't do it in 23 hours you know that's a 69 our seminars nothing 69 hundred hours would probably be more like likely okay it's a commitment you have to understand that and be prepared for it it's a sacrifice of things that you might have wanted to do and you have to make time for this and you can't do other things that you wanted to do in your life you know you got to put down those selfish you know instincts to say oh I can't spend this much time doing this yeah you need to that's what I what do you think I've done for the last 12 years 13 years of my life I put down the selfish instincts to say I just want to kick back with some friends this week I got a towaway I can't go out I'm working on something I'm building a presentation how many days beautiful summer days I stay cooped up in in the house to do this work it's sacrifice that's the meaning of sacrifice so going back to this slide I really want to tell people what I need okay I have some graphic design help Bret Hatton has been wonderful brother you've been absolutely phenomenal in the help you've given what on earth is happening and Brett is having some family issues and it's a hard time for him and I wish you well I'm not gonna reveal that because you know that's private but we're there with you brother okay and he's been doing great and he's have been helping remotely and it's good help I really do still need a graphic design artist sitting in a chair at one of the computer workstations that I have set up here in my home studio I will still obviously have Brett involved on the team but we need another graphic designer in-house for things that come up quickly that while I'm sitting here saying all you know what this has to go on on the show this week I just say boom can you create that please you know and I don't think that's asking too much from one human being one or two days a week honestly I'm gonna just you know at the risk of sounding that I'm in some level of pride or hubris I'm gonna say I deserve that I deserve to have that type of volunteer effort I'm not ashamed of saying that we're asking for it I've put out work to creation such that creation should bless me with a little bit of volunteer effort like that I'm not that's not that's not shameful to ask for or to say and anybody who thinks that it is you don't understand what real spirituality is it's not having some false humility I've done a tremendous amount of work and sacrificed a tremendous amount of my life to do it I deserve this help that's called the law of allowing in true spirituality I have to open up ask for the help and say I as a human being and worthy of receiving this help and I am and I look anyone's square in the eyes and say I am worthy of receiving this light of help on a volunteer basis without and having to completely devastate all of my resources for to just pay for it if there is resources from the class and from the donations that come in yes there could be some sort of a stipend involved but it is not promised or guaranteed we will see you know I do not make look folks I'm just gonna be honest with you okay only in this year after 13 years of doing this practically full-time full-time 13 years I stopped my corporate job 13 years ago almost to the month okay I this year 2020 13 years later I just finally ramped up over a 13 year period to making half in a year of what I used to make at my corporate job that I quit to do this and just went on a wing and a prayer that the universe would barely provide for me to do what I need to do I want you guys to think about that I'm not just trying to like you know sit here playing the violin folks I just really want you to think about it that's the type of sacrifice I did and said I'm gonna let the universe sort it out and if it puts me on the street I end up on the street and that's where it wants me to be and if it puts the resources in my hands then it wants it to come in because I've done the right thing and so be that as well that's the kind of quote-unquote faith I put out there to the universe to provide and I'm doing it again but think about that folks right that that's what made me to be able to happen to be able to do this full-time okay just think about this this is a full-time job okay that I do a tour every day and in 13 years I've only this year gotten to the point where I make 50% of my former salary on a yearly basis you tried doing that half yours first of all don't half your salary cut it to almost nothing the first year and then slowly ramp it up over a 13 year period we're at year 13 you're making 50% you try it try living like that that's how I've been living so you know the people say oh mark you make a lot of money you don't know what the fuck you're talking about quite frankly and I said I was gonna remain calm I'm gonna try to remain calm today folks for Barb's memory on this show I'm gonna try to remain calm cuz I dedicated the show to her okay just imagine doing that and now you know what I've been doing over the last 13 years doing this work so what I am asking for is an in-house graphic designer no not a remote graphic designer don't wish me well don't email my assistant saying I'm from somewhere else and I want the graphic design position not what I'm asking for I will need an in-house graphic designer next we have a wonderful video editor in the form of Joel Torres he's doing just knockout work with the documentary unfortunately that is all Joel can do Joel cannot take on another project and my producer is just telling me right now that I should mention something that I left out of my slides when I get out of this slide I'm going to mention that thank you we need another in-house video producer for ancillary video production work that I have in the works and I want someone here not remote because I can't I can't get involved in sending everybody this stuff back and forth back and forth back and forth working remotely with video files is cumbersome if you've ever done it I need somebody to work in-house from art my local server that I could throw all the material on there it is here's your username and password login there's the video editor premier or final cut go to work that's it I don't want to work remotely with that we can do some ancillary video projects remotely right now this isn't it I need somebody in-house I had a generous donor donate three computers to me they are they are being used but not to their full potential I should have people Manning those workstations doing this work in-house and they are used but not to their fullest potential quite frankly and that is sad to me because my donor did not have to generously donate that equipment for free to me and those machines are helping tremendously in the work we do here but I have to in full disclosure be honest they're not utilized to the full extent that they could be because we still do not have asses to sit in those chairs okay and that's what I need I need a in-house graphic designer an in-house video editor I need an in-house web developer I'm sorry I need an in-house or remote web developer I'm going to compromise on the programming because I realize how rare this is okay so here's what I need the web developer for folks I want to start a network I want to start a live streaming network that will eventually become a 24/7 streaming network look folks I'm paying right now this show to do the live stream I pay a yearly fee of between one and two thousand dollars yearly okay and guess what that's actually not a bad deal right now we don't how we're not pumping out such tremendous bandwidth that I have to up that to a higher level for bandwidth purposes it suits my needs right now with the way we stream but out of my pocket I pay between I'm not going to give the exact figure but it's between one and two thousand dollars yearly that's pretty cheap actually okay before that money that I'm paying that account that streaming account I stream 3 hours weekly I want to turn that into a 24/7 stream of a network with tons of different hosts that's going to be called the one great work network it's one of the plans that I had that I wanted to roll out before the end of last year now I'm saying I want to roll it out before the end of this year and the reason it's delayed and it's going to sit on the back burner in indefinitely possibly we have hosts who want to participate in this network probably max Egan will participate probably if he's still on board derek bros if he's still on board land and honor Jay Parker we have tons of people many of many others who are going to participate in this network you know probably Brandon Martin I'm gonna put the offer out there to several individuals to start out they can all leverage my streaming account ok they could all use that streaming account and we'll set up a schedule where one person takes it one hour a week another takes it two hours a week I'll take in my three hours a week etc and we could keep filling up hosts on a network until we have a 24 hour live stream going how phenomenal will this be how great will that be I can't do this folks I don't have a webmaster I can't webmaster all of this myself I can't do it I can't I can't webmaster my own site right now and that's what I'm doing you got to see I'm gonna show people one day the whole podcast is probably I might do a complete pre-recorded podcast of my Monday day during the day you're gonna see what I get up and do on Monday to put the podcast of the show online the next day the video podcast I'm gonna show everybody that I'm going to show you how long it how painstaking it is how much detail-oriented work it is and I'm not even a programmer and I'm just muddle through it folks I trudged through it like plodding through a tar pit just shrugging painstakingly to get it done I'm gonna pre-record one time to show people what that what is involved the work that's involved I need someone to help take that burden off my plate so I need a web developer folks I need somebody who wants to webmaster the one great work Network website which is that one great there's a template that is just in place there it says like a domain that's parked it's gonna be one great work network.com one great work Network com is the site there's nothing up there please you know don't try to sign up we're gonna and it's we're also taking away the former subscription model so that's not accurate do not try to sign up for it that's just something we've had in place as a placeholder we are probably going to try to make the one great network network absolutely free how about that as an announcement I want to do a free 24 hour streaming channel build up the network to that but I need a webmaster for it folks I need a good webmaster who knows his way around content management systems who knows programming languages like PHP who knows how to work with my sequel databases who knows video you know streaming like the back of his hand and who can really manage really well a content management system and schedule things that's what I need no one has really worked out and come forward for this task we are are talking with some people so we have some people who are interested in this and our remote my absolute dream would be to have somebody on site that could do that here in-house right here in Philadelphia I'm not holding my breath for that graphic design video editing that should be no problem first getting somebody ass in chair here in my studio okay we should not be having the problem we are having with that the web development work and web mastering okay I have to compromise and accept remote help for that and I need tech support in-house you know so much of what I do look we almost didn't go on air today just just tell you a little anecdote I almost canceled the show literally six minutes before we went on the air I almost had to cancel the show and there may still be some technical issues that might happen I don't know I don't want to definitely say that's gonna happen but you know we ran into a big tech snafu six minutes at what was it 254 p.m. something happened technologically that almost made me have to say cancel the show for the week or maybe you know we'd have to delay the show by at least an hour while we fixed it luckily that didn't happen we had a quick workaround and it worked out that's the kind of stuff we encounter here and guess who has to fix it every time you know my producer knows his way around tech issues as well in general though there is never any one here that knows as much as I do about technical issues that's what I did for living folks I was a technical troubleshooter on the information services team at the University of Pennsylvania School of Medicine division I worked tech support at an Ivy League university so and I also worked for one of the biggest tech support companies in central New Jersey gear 3 technologies for a long time I was their lead macintosh Support Specialist so I know high-end technical troubleshooting myself it's what I did professionally for years it's the job I left to do this ok I cannot be the tech troubleshooter for what on earth is happening forever I need help with this in-house when problems happen I need a competent tech person to say will you please handle that for me so I could focus on delivering my show for the day you know I think I deserve that for how much I've done and they have to be in-house the tech support is not remote it's in-house you know I need somebody here every Sunday that's the tech guy you know and you know right now that's me now think about that folks just think about the burden of that before I go on-air a tech problem happens I got to jump into the role of being tech troubleshooter I can't sit and think calm myself and compose myself and get ready to deliver what I want to deliver and say and and step through my slides and emotionally and mentally prepare myself I got to be troubleshooting a tech problem that's what it is to do this to be me in this position and do this look folks that's because I don't have the money that other people have I have a little bit of donations put aside toward going toward the projects that we're working on but if you think I have the kind of operation that some people have or just that just maybe even came from money who can just hire people at the going rate people who don't give a damn about what we're really doing here they would just come here and do anything we asked them to do just because yeah well you you want to pay me $200 an hour that's how much a a going rate technical support person's gonna gonna ask for I mean if you get a real half-ass person who you know barely knows his skill set they're gonna say seventy-five dollars an hour you know you get a good real good competent person you know I mean my company charges over $100 an hour and I made like you know 70 or you know fifth between 50 and 70 depending on where the job was when I was doing this professionally an hour you know sometimes I stayed there a whole day sometimes I got the job done quickly but you know you look at going rates for this stuff it can be upwards of 200 an hour depending on what's being asked for right now we are asking for an in-house volunteer to do technical troubleshooting when it arises so that's what I need and I want to step out of the presentation briefly because I want to go back to the website and I want to show people the new page that I set up it is right next to gifts if we go over to the computer again please we're still having an issue there we go okay and um we if we look at this help tab right next to Gibson between gifts and donate you click help and then it says help us accomplish the great work we make it a little bigger for the screen here there we go so we have in-house graphic designer if you have this skill set please contact my assistant Lea Boone at lea at what on earth is happening calm it is spelled le IH a at what on earth is happening calm okay we need a in-house video editor same email address we need an a web developer that is either in-house or remote okay so you see that there are folks in house or remote that's the only one that if you are remote I will consider you know bringing you on to the team we need help people who know content management systems html5 CSS which is cascading style sheets PHP which is a scripting language for the web my sequel database which is generally what we use here for our web stuff at what on earth is happening and if you know JavaScript J s node things like that that's a huge plus okay a node J s I'm sorry you know things like that and then the technical troubleshooter position we need a high level experience on both Mac OS and Windows we use a couple of Windows 10 computers here as well a troubleshooting on those platforms for both desktop computers and laptop computers again the email is the same Lea at water on earth is happening com all right so that's that I'm gonna jump back into the slides and just say put your talent where your mouth is ladies and gentlemen because very unfortunately what may need to happen if I do not receive this help and I have to pay for it which is going to create a huge financial burden here because until I get some things straightened out with my home and with the former home that I owned jointly with barb I have to have that place sold at some point and I have to go and clean it up which is going to be a really horrific task you know not only being clean it up I mean literally like remove items so that when I sell it it will be prepared to be sold it's you know if I don't have this help in house I'm gonna have a have to spend that money out of out of what I have put away it's gonna be a real tremendous financial burden for me to that end if I do not receive I don't want to I never want to have to make ultimatums here at what on earth is happening and I know this is a lot of stuff about what's going on here and what I'm doing and what I need help with but it needs to be said if I don't receive the help that I'm asking for on a volunteer basis for the very first time ever since the beginning of water on earth is happening I will have to start utilizing some sort of a paywall slash donation system for the water earth is happening show itself and I don't want to have to do that I really don't want to have to do that but unfortunately I'm going to have to if I don't get the help I need so what I ask of my viewership is if you want to see the show stay completely free and it should stay completely free helped me to get the help that I need and that means become part of a search team for me if you don't have the skills yourself and can't be here in Philadelphia yourself please stop wishing me well please stop saying I hope you get the help you need actively help me search for the people I need the skill sets are listed you can point people right to that page be a liaison at least help put the word out help get people here in the chair don't wish me well I don't want you wish saying I hope you get it I'm even gonna send say you know I value trying to get me help more than I do the money to pay somebody I don't want to have to pay somebody I want somebody to get involved and volunteer their damn time I don't think that's a lot to ask for I think the people who think that's a lot to ask for have their head up their ass quite frankly this is not asking much one to two days a week to volunteer some of your day to help do this work and I've been practically on my hands and knees begging for it for years to no avail and that is unacceptable so what's going to happen is and this isn't an ultimatum this is a sad fact of the matter if I have to pay people to do this work it will be funded by making the stream each week not free and put behind some sort of a donation wall so that will be up to you whether that happens there will be a deadline for that happening the next few shows will remain free and if I get the help I need the show will remain indefinitely for free if I do not get the help I need within the next 30 days the time frame is from this June 7th today to July 7th way the class seminar called how to become the true media begins if I do not have these positions filled in those 30 days what on earth is happening will cease to be a free live stream and it will go behind a donation wall and the money the donations that are taken in from that will will go to funding the help that I require so we were having another technical problem here trying to solve it on the spot looks like we're okay I want to jump back into my slides we're good let's go back to the slides please so you can go to that position page and share it at what on earth is happening comm slash help and I think I've explained that to the best of my ability as calmly as I can without getting angry I'm very happy with myself that I did not go off the handle during that so that's all what the great work is about folks it's about getting involved now just before we start I am going to take my producers advice and say I did not mention that unsustainable the recent film that I was in which James Yeager the local film producer here who has done tremendous work including things like Fiat Empire original intent mole on lab a good guys with guns he's one of the greatest filmmakers of our time as far as I'm concerned documentary filmmakers of our time and just a great guy all around by the way who I consider not just a associate in the great work but I actually consider a friend he made the documentary unsustainable both parts are out and they are released on DVD and they are out on the internet as well on his YouTube channel his website is MC films.com MCC films that's matrix entertainment collective films calm and you can go to you could search for original intent doc is YouTube channel all one word original intent doc do see is his YouTube channel his name is James Jaeger he made the film unsustainable which I appear in very happy with the way the documentary came out people can visit his website or YouTube channel please get ahold of unsustainable it came out fantastic so that's my brief announcement that I left out of my slides thank you to my producer for reminding me let's jump into the actual content of my slides for today and again this show is called remaining loyal to first principles in an age of psyops and disinformation again I will take this at my own pace I'm moving pretty relatively slow pace here today if we get two calls we get two calls if we don't get two calls we don't get two calls if you want to listen in via the call room or you want to wait in queue for calls there's the discord Channel that's what on earth is happening calm slash discord I spelled D is cor D that's what we take calls on on the program will usually do it in the third hour of the show from 5:00 p.m. to 6:00 p.m. East Coast time more likely than not I'm not going to get two calls today but if we do that's the URL maybe next week we'll do it all call-in show okay everybody is gonna want to know what I think about the coronavirus fingers please switch back to the slides given my produce for a moment there we go everybody is gonna want to know what I think about the coronavirus so-called pandemic because everybody's in a state of confusion about this no one knows really what to think that it is or what's going on and again I said we're in a dark time and it's not for the reasons that some people will speculate it's not because of the virus folks it's because the people's reaction to this so-called pandemic and I am NOT going to say that the illness is not real because I know people who have gotten it the illness is real what we are being told about it however by so-called official sources is what constitutes the SIOP our people getting sick yes they are is this a genuine illness of some type or form yes it is it does exist is it what the mainstream media and the government are telling us almost assuredly it is not so what my take on the whole coronavirus pandemic is is this it is what I refer to as a socially engineered perceived crisis now don't get it twisted into thinking that because I use the word perceived then it doesn't mean something actual in the 3d world is occurring there is something happening in the 3d world regarding people's sickness which is very extreme in some cases but the hype about the deadliness and danger represented by this illness is not deserved and accurate if you're familiar with the researcher and presenter Larkin rose freedom advocate anarchist from a true anarchist perspective I think you should take a look at the videos he's been doing recently during this crisis perceived crisis because I think it's made a lot of sense and it's very similar to my take he did one where he compared it to mountain lion attacks explaining that if the government were hyping mountain lion attacks and saying you shouldn't go outside and mountain lions don't live in the city look at the you know ancillary problems that would create be created in society from essentially shutting society down when people aren't in danger going out in the cities of mountain lion attacks when you know if people go into their environment and they're you know you know domains for people I'm sorry one person every four years are fatally killed in mountain lion attacks in the United States one person every four years you know ridiculously small statistics it's very similar to the danger represented by kovat 19 so the Cova 19 pandemic is an orchestrated and managed large-scale event that this is not to say that there isn't a real illness making the rounds in the human population but this event is designed to steer the public's mental perceptions in a specific direction which is dedicated by the social engineers of our world because what they want to do is they want to take the perceptions from being in addition to sicknesses that are actually occurring and death that is occurring and worldwide economic devastation that absolutely is occurring in response in the created response to this pandemic what this socially engineered crisis is designed to actually do is to create fear trauma cowardice inaction distrust division and Submission in the human population now you look at all of those things those are the real pandemics that are happening the illness is not the pandemic the illness is what it is it's an illness that's occurring for certain reasons and I may not even get into speculating at all today about what those reasons are quite frankly the reasons that this illness presents itself are not that important what is important is our reaction to the presence of on any given L nough sin our society so the reaction that has been specifically socially engineered by the social engineers and their henchmen the mainstream media is one that is elicited and designed to create fear which is the one of the biggest pandemics in our society the reaction of fear going into the r-complex of the brain and then not thinking clearly about what's really happening things that we talked about here since day one on what on earth is happening things that people quite frankly should know a lot better regarding how they have viscerally emotionally reacted in emotional mind control to this mind control socially engineered event they have fallen for the hype and fallen into a consciousness of fear which is where they want people because if they're in fear they're easier to control that's what the social engineers and controllers of our society want everyone in that consciousness you know you look at me from day one since this is started absolutely zero fear what dispels fear knowledge I've had the knowledge of how a lot of this stuff works since before I ever started on what on earth is happening ladies and gentlemen quite frankly having thought that health works the way it does having thought that the transmission of disease works the way it does understanding things about human diet that most people don't understand I've tried to communicate all of that endlessly to people tried to explain people the dangers of the meat diet tried to explain to people to bolster your immune system through supplementation adaptogens etc juicing and that doesn't mean taking steroids I've had actual people when I've used the term juicing actually think that I meant taking steroids I mean this is where some of us are at folks like you know it means juicing fruits and vegetables in a juicer you know turning it into liquid and drinking it fruits and vegetables please folks you know I mean would you think as much as I am into health and that's what I would have think like injecting steroids really I mean really should I have ever had to field an email about that once ever you know it means get a juicer from a health store department store and run some fruits and vegetables through and drink the juice that's what I mean by the word juicing please you know you know we could get into speculation from now until the end of time as to the causes of this illness or how serious it is quite frankly the point is falling for the media hype and then calling for other people's rights to be restricted you don't know how many people I've had to literally block unfriend on social media mute them you know and just unfortunately have to look at in a way that totally diminishes my respect for them as a human being and guess what it can be mutual so be it I could really give a damn couldn't give a damn couldn't give any less of a damn because friendship doesn't matter to me as much as sticking to principles does and that's what it's all about this is another thing I think Larkin Rose did an excellent job recently talking about you can get his videos on his YouTube channel or on his library I I recommend people going to his library you know that's what I'm gonna start sending people more to there's much more of my youtube than library but I'm gonna be you know uploading content that's another thing I need I need people get involved you know just helping me manage these things you know I do it all myself you know I can't do it all day every day you know I need a break from this sometimes I need people to take over some responsibilities of just even helping to upload content I want to get all my stuff uploaded to library that's a Herculean effort in and of itself but Larkin was talking about he stands you know with legitimate protesters if they're protesting against police brutality he stands with people defending their homes and businesses if they have attackers coming out them at them were condemning people who are doing violence and on the side of people who are defending against violence that's called staying the principles sticking to principles and you know when you look at the actual danger posed by this people with compromised immune systems and the elderly sequester themselves if you're concerned about that and about it affecting you in a negative way you can sequester yourself you don't sequester other people and demand that they be in the type of fear that you are you take precautions because you cannot stop other people from exercising their rights and going about their business in public that's the fact of the matter that's called understanding self ownership and understanding rights you know and you know it's not like a leper going up to people and trying to spit all over them and then you can even get into the argument well that transmitted leprosy you know first of all we have to look into actual transmission vectors this is part of what again I'm not gonna really get all into today but this is what people have to understand they need to research and they need to look at do things like this actually get communicated by coughing or sneezing on somebody or breathing the same air in close-quarters I would suggest that is not the vector of transmission but again we could speculate on things like that until the end of time and you could find medical and scientific experts that will argue both sides of the equation I tend to lean on that virology and epidemiology is not what we have been told that it has been what not we have been told that it is by traditional methods of science by traditional medical establishments and scientific establishments that is my position and I have every right to hold that position and to explore it so another aspect of what they're trying to put us through in this socially engineered crisis is trauma the trauma of not being able to conduct our daily lives the trauma of having our rights stripped away the trauma of the fear if we bought into it of getting sick or our loved ones getting sick cowardice is another part of the real pandemic you know and how many people has this turned into cowards who won't stand up for their rights who are doing everything the media and government have told them to do because they don't want flack and they don't want any more hardship in their lives for going against the grain how many people are wearing a mask just because they were told they have to cowardice leads to inaction in the world all of this has been designed to get us to distrust each other you know this city that believes the mainstream media Philadelphia I mean you know these people I mean walk down the street like if you're coming at them and you don't aren't wearing a mask because you don't believe the mainstream media and the government like you are a bomb that is going to explode they'll walk to the other side of the street all distrustful and and and cowardly it's unbelievable it's like they're on their digital devices or on their TV saying master what do I have to be afraid of next whatever you tell me I'll be afraid of it it's really pathetic it's pathetic folks it's pathetic it's pathetic and people should know better by now they should know better by now and they don't the division that it is created amongst human beings the people who did this they know what they're doing they're chess masters and the division that they have sewn guess what folks I'll go right into the division aspect of it myself I think an aspect of it is healthy and an aspect is unhealthy and that is if you're going to say I'm gonna compromise my values I'm divided against you but the other aspect of the division that the social engineers have fomented is division between people who accept everything the mainstream media says versus the people who are skeptical of that worldview it's a big part of the division that's being sown I'll always take the side of division when it comes to I'm going to people who say I'll abandon my principles at the first sign of danger or trouble you never had any principles about that let me say that again you're the kind of person who says I'll drop my principles at the first sign of trouble or danger you never had any boy you never had any little girl you're not a man or a woman that's called the attitude of a punk-ass child you never had principles I'll say it really hard to people write to them you don't abandon your principles in the face of any danger real or perceived the principle is eternal and changeless it's immutable and we're going to get to that and finally what this pen pandemic socially engineered pandemic crisis has created is total submission in many people where people are just saying I'll do whatever is asked of me and that's called submission regardless of what the truth is they're willing to submit because government and media told them to nothing could be more dangerous that puts humanity in an extremely dangerous position and you know who are the people out there saying yes sir anything you say sir ma'am the military and the police the order followers are the biggest danger in this time the biggest danger they've always been the biggest danger so what I've been saying since day one nothing has changed nothing has changed folks these are all the people that are going to say I will do my bidding I will do the bidding of my masters now more than ever because there's a perceived danger and that's the biggest danger in all of it and submitting to that is an even bigger danger than the danger that the police and military and National Guard the order followers represent themselves saying I'll go along with it is an even bigger danger this these are the characteristics of this engineered crisis that we are in the middle of regarding the coronavirus Cove in nineteen the novel coronavirus one of the characteristics is that the nature see the government and media are saying the nature of the illness is exactly what we say it is the nature of the illness is exactly what government and mainstream media say it is that is one of the characteristics of this socially engineered event so what I would say to people is you must research and look into what the nature of such an illness is to begin with accepting current virology and epidemiology me ology Sciences on their face when they are government-funded grant government grant money funded quote Sciences okay on their face is a problem in and of itself that constitutes a belief system first of all I can show you a report from the National Institutes of Health that says that they tried to expose people directly to this virus 455 people and could not transmit it even though they were in extremely close quarters they put 455 people in extremely close quarters with each other some who had been confirmed to be infected with this novel kovat 19 virus and they could not transmit it to 455 people so what does that tell you about the nature of what we're talking about it should say the nature of it is not what many people believe it to be so again I'm not going to go into all of the aspects of what the nature of even a virus in and of itself may be is the illness real clearly the illness is taking place what is its nature what is its origin I should really write here nature and origin see people just assume viruses work the way traditional sciences tell them that they work and they assume the origin is oh it just broke out of this wet meat market in China could have come out of a laboratory could have come from injection into animals could have come from injection into human beings ladies and gentlemen I look at other vectors possible vectors of spraying it upon populations what about putting it in certain water supplies probably lots of ways that things like this because it could possibly not be a traditional virus as we think of see this is all speculation and what if or this is possible I'm not saying it is this much more research would have to be done I'm not going to jump in a specific camp and say it absolutely is this thing it could be lots of things it could be an environmental toxin released as a gas or in liquid form it could be injections that perhaps release themselves into our immune system over a specified period of time that could be very well engineered to do that there's many things I could imagine that it may be and work through or as a vector of contagion so-called contagion but to just say I accept what the government says it is or I accept what the media says it is absolutely not you will not force that worldview down my throat and say I must accept it because it came from those institutions no one will make me accept that ever nor should anyone accept it just became just because that worldview came from those institutions the next characteristic of this crisis is the cause and transmission of this illness is exactly what the government and mainstream media say it is again we could speculate a whole lot regarding what the actual cause and vector of transmission is and again I don't accept classical sciences definition for these things or explanation for these things I highly recommend that people read a book called the invisible rainbow by Arthur Furstenberg and understand that traditional vectors of Contagion do not work the way people have traditionally believed through virology that they work and there are many doctors who take this model because they've seen that it doesn't work the way people have traditionally thought that vectors of contagion worked and then that throws the entire perception of this so-called crisis into question mark territory I'm telling you don't immediately accept the explanation and don't think that you already have the knowledge of what it is what its origin is what its causes what its nature is how it is transmitted you don't and probably no one really does because more open-minded true science needs to be done to those ends and you won't you'll very rarely hear this perspective from anyone folks very rarely but no one is going to tell me I must accept the nature of this illness or I must accept how it was caused or I must accept how it is transmitted the next next characteristic is the threat of the illness is exactly what the government and mainstream media say that it is well first of all the numbers can prove that that is a study in epidemiology or disease transmission which is essentially statistics and I'm telling you yes they can lie about that and they are lying about that but you could gauge simply by an understanding common-sense understanding of just looking around you and how many people are sick or how many know people who have gotten sick the the comorbidity factors that they have other health issues that they have every person that I know that got this illness regardless of what you think the nature of it the origin of it the cause of it or the transmission vector of it every person that I know who got this was older meaning at least above 45 years of age I wouldn't say I won't call them old you know most of them sick frequently older than 45 but at all of them older than 45 45 is my current age all of them with pre-existing health conditions almost all of them with some type of diabetes almost all of them with very bad diets or borderline bad diets almost all of them with compromised immune systems in some form or fashion and not helping their immune systems with right diet and right supplementation almost a blanket statement almost 100% I would say upwards in all of those scenarios upwards of 98% less than 2% of people who I know who succumbed to this you know particular illness of kovat 19 having been truly you know you know it shown that they had this form of coronavirus less than 2 percent did not meet those criteria that I just talked about age comorbidity factors bad diet little to no exercise compromise the immune system not supplementing properly certainly not juicing or blending it on a daily basis you know certainly not taking adaptogens nascent iodine you know other good herbal supplementation's on a daily basis not taking care of their health essentially the next aspect of this is to just totally foment the fear fan the flames of fear at every opportunity these people in the media and government are just telling everybody to be very afraid and succumb to their fear not telling them how they could boost their immune system not telling them to look at other possible nature origins causes transmissions or look at the actual ratio of what the actual threat to younger or healthier people really is no they want everybody to be afraid equally and so many people are falling into this trap and thinking oh this is the end of the world in its you know strength in its virility in its you know Trent transmissibility it's not folks it's not at all that I can say with certainty okay but what with certainty they want you to be afraid of it because people in fear are easier to control easier to get them thinking in a clouded way in a clouded capacity succumb to their fear go into the r-complex of the brain and start thinking because I'm wearing a mask and protective equipment I'm saving the day and at anybody who's not is endangering other people I mean it's it's very sad that many people look folks I tried to really take it easy on people actually until they really upset me and I just I took the easy approach of just turning off people on social media by saying unfollow when people got more annoying and pressed the issue more and more and I just I didn't even say things the most people unless they even said something to me when they said something to me I was very direct and almost blatant and said you're incorrect and you're in fear right now and you'll see it differently at some point and you'll thank me for saying it to you directly many people not just some I took that approach with other people I took a harder approach because I didn't like the way they approached me about it and I probably should have done this with more people we're out right unfriended them on social media stop talking to them in person I've had to do that with very little people because pretty much if you know me in person you pretty much know what I'm about and you kind of think similarly I keep my social circle pretty tight in that capacity and most people that I hang out with hang around with aren't idiots quite frankly that are easily scammed so you know I didn't have to do too much in the way of saying hey I'm not talking to you in person anymore but what really came down I came down the hardest on people is when I didn't like their attitude or approach to me personally I either unfriended or blocked them outright from social media people who were at least somewhat respectful and trying to present their viewpoint of it I simply unfollowed them and I did that with a lot a lot of people okay I unfollowed way more but I blocked a ton too so I want to take the time briefly to talk about my approach and attitude regarding social media for a brief time here a lot of people think the same thing about my social media outreach as they do about what I do here on what on earth is happening that I'm trying to reach the maximum amount amount of numbers let me say emphatically I am NOT trying to reach the maximum amount of numbers of people on social media just like I'm not trying to reach the maximum amount of numbers here on what on earth is happening I am trying to reach the highest quality people to those ends I do want my social media to be more of an echo chamber than a debate forum a forum for debate I'm not looking for a form of debate if I want a form of debate I will go personally on some shit show like Reddit and try to debate imbeciles there and convert them to my point of view which I wouldn't waste one sliver of a second of my time doing because my time is way more valuable than that crap okay for my social media I am NOT trying to make it a diversified sounding board of tons and tons of different ideas that everybody endlessly debates I'm sorry if you think that's not open-minded I could not give less of a shit do you understand I want my social media specifically Facebook to pretty much be a 5,000 person sounding board for natural law and I'm not afraid or ashamed to say it I'm saying it openly what I'm doing here today folks regarding this is I'm being totally and completely honest with you about what I'm trying to do with no hidden agenda and I'm looking directly in your eyes through the camera and telling to you if you disagree with me about the really big stuff like sticking to your principles or about natural law just get off my social media it's not for you I don't want it gummed up and gunked up with dross because that's what you are if that's what you're on my facebook page or any other of my social media for you are dross look it up look up the word it means a bunch of extraneous garbage that isn't needed okay it's stuff that doesn't matter that is in the way dross okay that's basically what it is it's trash that is they're gumming up the works that is all it's doing is making things harder to do I want 5,000 people who do who have been through my work and do understand what I'm trying to do which is to teach natural law and who do want to be teachers of natural law and who agree with me on the basic first principles and aren't going to get hung up on all the other little minutia that they don't agree on you don't want to agree on you know a particular vegetable that I think is healthy and then I say yo throw it in your juice that you drink on a daily basis then just don't fucking drink that or juice it or eat it or do whatever you want with it I'm not talking about my new shell like that my social medias should essentially be a sounding board an echo chamber if you will I'm fine with using that word that term I want my social media to be a 5,000 person echo chamber of people who totally hardcore agree with the basic first principles of what I lay out and want to go out there and teach natural law to others and I'm not afraid to say it just like that I want it to be a sounding board and an echo chamber that's what it's there for if you're a wishy-washy person who doesn't really agree with what I teach get off my social media if you don't agree with first principles of what I am teaching get off my social media and open up that position for someone who does because that's who I want all 5,000 of my so-called digital friends to be and I want the dross eliminated and when I find that you are dross I'm gonna unfriend you at the very minimum I'm gonna unfollow you if I find out your true draw someone friending you and if you really say shit to try to harm the cause of what on earth is happening then you get blocked when I see people directly teaching moral relativism you are blocked because you are the enemy you're the enemy if you teach that satanic religion so if you're a moral relativists not only should you not be my friend on social media I want to know who is so I could block them from my social media all right so I want to make that very clear so this whole fear mechanism is what's driving people to call for the government to limit or remove the rights of others this is the last characteristic of this what I am calling a socially engineered perceived crisis which is much more hype than it is actual harm they want you to express your fear by begging the government to limit or remove the rights of others which is a violation of natural law and who is the one hyping this crisis as oh it's so extraordinarily dangerous that you know we have to basically live in a bubble it's the mainstream media and this is just one example you could throw any mainstream media up there this is one of the worst but these are the same people not just talking about CNN it just happens to be the graphic I chose I'm talking about all of the mainstream media the dinosaur media the paid lying sack of shit yellow journalists media you're paid whore Liars as gerald Celente so rightfully calls them the prostitutes because that's all you are you're not journalists you're prostitutes posing as journalists you're paid whores paid lying whores I don't know how much like how much clearer I could say what I think of these pieces of dirt your pieces of dirt and your parents were were and our pieces of dirt whether they're alive or dead son girl the vast majority of the imbeciles out here on the street actually believe the same lying sacks of shit that told us that there were weapons of mass destruction in Iraq I mean can you even believe it unfathomable is it as unfathomable to most of you out there as it is to me that you have jackasses there's jackasses in the freedom movement that believe these fucking jackasses that believe these lying paid horse axis shit they'll take their word for it that it's as dangerous as it is and they need all this protective equipment and it transmitted exactly as they say it's transmitted I mean imagine how fucking dumb you have to be or willfully ignorant there is the the big crisis there's the big pandemic willful ignorance dropping your principles at the first sign of trouble boy nothing could be more willfully ignorant at the first sign of your perceived problem that that these paid Horrors told you to be afraid of folks that the amount of time that I've been doing this and putting this work out and the amount of time all of the information that has been out has been publicly available we should well beyond this we should be well this is unacceptable and it is painfully sad I mean the the peep the amount of people who have fallen for this nonsense they're ignorant is blatantly physically painful to me physically painful and physically traumatic to my body and soul because we should be well beyond this point in our understanding of how things in this world work and we're not because we all have our little biases we want to see things from this perspective the left has their little biases that oh we want to have the nanny state and everybody taking care and being afraid of everything taking care of us from cradle to grave providing for us and they don't want the responsibility of growing up and putting the big boy and big girl pants on and having our own responsibility for our lives and that includes our immune systems and whether we get sick or don't then you have the right so you know when other types of crisis is breakout and we're in some sort of physical danger we want Big Daddy government coming to the rescue with the police and National Guard they drop their principles at the drop of a hat - it's pathetic it's pathetic it's painful willful ignorance and it's everywhere and the amount of people that have actually stayed true to their principles is our piss in a pot and we should be way beyond this point and we should know way better by this point and I'm unimaginably disappointed and sad in the freedom community above all else let alone the fucking idiots out there in the world I mean you forget the other side of this window Jesus Christ the dunces the willful ignorance is it's colossal and let me tell you something folks the so-called freedom movement hasn't done much better they've been just as bad it pains me to have to say because many of them are believing these jackasses in the mainstream media the best meme I saw through the whole coronavirus crisis was this some days you feel like you're surrounded by fucking idiots and in other days you realize it's not just some days yeah it's it's pretty funny it's pretty funny but guess what it's even more sad than it is funny because it's true that's the problem that's the problem that's how I feel every day especially in this city I mean this sees fallen Philadelphia the place where the Declaration of Independence was written and signed is fallen that's the only way that I could say it it's the only way that I can say it it's run by garbage crash and it has become garbage trash it's one of the reasons I can't get any help here even though I've begged for it endlessly there's there are a tiny handful of good people left in this city and guess what the the good people actually believe that the solution is to leave this city and let it be fallen and overtaken all anybody talks about who has any morals left is I need to get the fuck out of here as if that's the solution and I understand the desire for that I understand the desire for some sort of a safe haven but guess what there's nowhere in the world that's a safe haven these days folks you've got to stay where you're at and make your community better where you are at and very little understand that dynamic either it's not the coronavirus that's scary it's how brainwashed and easily manipulated the masses of people can become boy truer words were ever spoken the person who made that meme is point right on point that's the real pandemic right there it's one of the real pandemics the brainwashing and manipulation of the masses that's a pandemic if there ever was one and it's worldwide its worldwide but it's especially prevalent in leftist take in cities in the United States of America cause boy oh boy are they cult members I mean the right are bad enough cult members you know the political right-wingers are bad enough cult members but I mean they look like holy guardian angels next to the leftist these days it's sad to say you know because the left has become a total demonic cult especially in major populated centers of major cities but this is a teaching it's a learning opportunity and it's a teaching opportunity the very understanding that the overwhelmingly vast majority of the human population has accepted the mainstream media hype about this pandemic is the exact dynamic that should show those who consider themselves awake what their own work is to do and I know that's a mouthful and sort of a run-on sentence but just listen to what I've said there folks because so many people are completely brainwashed by the mainstream media and believe the official narrative about this so-called pandemic that's the very dynamic that should be waking you up to what you need to be doing if you understand what the truth of the matter is and how badly brainwashed people are you need to move out of the realm of just saying I'm taking in information and learning about what's going on and get to the point where you are teaching other people in a formalized way not just mentioning it to them when you go to the damn grocery store that's not teaching I'm sorry the people who think the armchair quarterbacks who think that you're help you're doing something fine I'm not saying don't do that folks don't get it twisted and say be silent when you go in public I'm not saying that I'm saying that's not formalized teaching you're not going to sit there for hours upon hours upon hours and teach people anything if anything they're gonna be a little bit receptive to what you have to say and then you move on you might plant a seed if that but that's not formal teaching saying something your family member isn't formal teaching let me say something about this folks I want to talk about doing the great work in this capacity from a personal perspective and a couple of friends and mine actually asked me to mention this okay and it's the the state of consciousness that my own mother has gone into as a result of the kovat 19 crisis it's amazing it's amazing all of the seeds that I planted hammering information in how many days I went to her house I would go from my house over to my mother's house with a DVD walk-in I go in with the key okay she'd be sitting there watching something like Dancing with the Stars I kid you not literally I walk up to the TV put the disc in the DVD player close the tray switch the input and say this is what we're watching tonight call the police if you don't like it an actual like direct violation of her free will that's how much I hammered this information into her I said call the police I'm armed if they come they your son and them some of them will die today that's what you'll have to do to get me out of this house I've done it I'm serious I'm not even kidding I've done this ask her ask her if you ever meet her in person finally after the kovat 19 crisis breaks the planting of the seeds pays off and my own mother is calling me I've had the blinders taken off of me that have been on my over my eyes my whole life I can't believe I didn't see it before this is all about them controlling people and lying to people through the media my own mother and then she hits me with I'm so angry that we're being lied to in control like this controlled like this and then she hits me with I can't believe you knew what you knew for this long and you've been trying to tell people for this long and how it didn't drive you crazy because it's only been less than a month and I already feel like I'm going crazy and people when I tell them it's not what you think it is they're saying to me you must be crazy now do you know how much I did I just have to smile but there's a part of me that is thoth my heart is completely warm that I'm like ready to jump up out of my seat and cheer and then there's a part of me that's like Jesus God that took almost 20 years of hammering knowledge into somebody and it was one person doing that to one other human being and it took that many damn years see that's what people who think they're doing the great work by just talking to a family member is now what if I just left it there and I'm just I'm just gonna convert this person one to one in person no technology no outreach no global platform no putting out formalized media presentations week after week after week month after month no I'm just gonna talk to one person you know the progress that you'd make or even a handful of people you might even have four or five people that are awake to her extent which is not a great level of awakening it's not it's good she sees it now she's not arguing it's about control this is about enslaving the populace this is about taking our rights away and I can see it now that's a spiritual awakening that is at its very budding and beginning and that's very very very encouraging news but look at the Herculean effort that in addition to all the time I took to do all of this I was doing that in person for that many damn years and now it's just starting to break up through the surface and she's now at the point where she's at least not afraid to tell other people this is all bullshit you look at the perspective that that was truly done out of and you look at how harshly it was done it was done nonetheless out of love and then she'll say I could only imagine a chick she's humbly acknowledging to me finally after all of these years it's breaking up my voice I'm gonna try to hold it together because folks in the past when I started doing this she said some very unpleasant things to me about me doing this work and now she's saying I'm glad you're doing this and I can't believe I didn't see it before and she's like I can only imagine what you know because she knows the amount of information I've taken in she's seen me doing it but worrying about me worrying about that I was going crazy because of how much how incessantly like a pit bull I was just studying and reading non-stop and not having a social life for many years you know that's how much 1 to 1 work pays dividends over that long a period of time what we're really talking about is doing it in a bigger way folks and that's great do it one on one too in addition I'll get it out there in the digital space that's where the war is folks the battlefield is not just in person it's a piece a small part of it the battlefield is in the digital domain I'm sorry if you're not a techie or you don't like that that's the reality that's the fact of the matter so this should show us where our work what our work is to do how are we going to reach all these people ask yourself the question is the voice of the truth winning or is the voice of the lie and the deception winning what's reaching more people what's reaching more numbers of people the voice of the mainstream media and the the deception that that voice represents or the voice of reason logic truth I think if you're being honest with yourself you understand the propaganda of the media is working way better and you know we need to put our own propaganda out there that's what speaking the truth is it's a form of propaganda it's it is saying I am attempting to influence your mind toward the right way of thinking and there is a right way of thinking in a wrong way of thinking about all of this stuff absolutely and the right way is stick to your principles stick not to your principles stick to the principles because they're the same principles for everyone they don't change then as part of this whole pandemic agenda we have people saying we have to listen to the so called s experts and the so called official narrative isn't to be questioned you know this is coming from this is coming from actual and de facto Satanists folks I very rarely have ever talked about actual names of people inside the Satanic community because guess what you don't really have to understand their names it's not as important it's what everybody think also important name all these names you know if I said James Comerford what the hell is that to you you don't know this name you don't know anybody you wouldn't know who that is you wouldn't know nothing you know if I said it's just uh out of the top of my head Vincent Allen you have no idea who that is what would it mean to you if I told you any of these Satanists that I worked with worked in as a manager of any particular store or bank or were a teacher at an Ivy League university or were a judge in a particular district or even were for example a police chief of a town what would be the difference if a name was named you could name people like Michael Aquino Michael Aquino was a general in the Armed Forces in the Army's psychological warfare division who was a practicing and renowned Satanist ascetic the high priest of the temple of set experimenting and conducting experimentation in electronic torture techniques while he is a professed Satanist and while he is actively in the United States military and then was brought up on trial charges for child trafficking for involvement in child trafficking rings and you know what happened to his military career oh it was intended he was promoted to a four-star general even after those allegations and they weren't just allegations folks and then people want to say you're not naming names as if naming names is gonna do anything you need to understand their mindset and strategies because you know what these Satanists are doing they're giving you their mindset and you never understand that that becomes your mindset and that's why they can beat you that's why they can own you that's why they can enslave you because they can enslave anybody that's outside their mindset fully entirely wholly outside of it oh but they can enslave the minimi Satanists that they give a watered-down variant of their ideology and it becomes they become a de facto Satanist so whether you're talking about actual Satanists involved in some sort of a actual network of Satanists worldwide and/or they are de facto Satanists that agree with the ideology of Satanism and the politics of it in many cases of the the high-level politics of it which is globalism we're already seeing many of them out in the public an external ization of the satanic hierarchical network if you will they are the control freak governors of the states with the hardest clamp down in lockdowns during this so-called pandemic they are the so-called medical experts that are pushing a particular narrative and there then the NGO non-government organisation foundations like the Gates Foundation's Bill and Melinda Gates etc and folks there floating it there floating it out in the open in our faces on I believe it was that Today Show not certain about it I'd actually downloaded the video this is a frame of that video taken from that appearance Melinda Gates went on with an actual inverted cross necklace a small inverted cross medallion which is absolutely a symbol of organized Satanism it is not a symbol of the Church of Satan it is not a symbol of the temple of set these are low-level satanic network organizations that interface with the public it is however a symbol of worldwide Satanism and the worldwide satanic network because it is a symbol of the inversion principle the inversion of the Trinity the inversion of Christ consciousness in general I've talked about it I didn't fight him the inverted cross talked about it a lot in my presentation called demystifying the occult part to Satanism and the dark occult and I listed the inverted cross and the inversion principle as one of the major pieces of symbology of worldwide Satanism doesn't matter whether the Church of Satan or the temple of set or any other particular organization does not embrace it as one of their particular symbols the Church of Satan embraces the Baphomet design that Anton LaVey created the temple of set embraces the simple inverted pentagram that was favoured by Michael Aquino the Whitehall Church of Satan here in Whitehall Pennsylvania always favored a variation of the Baphomet known as the hearth h e a rth so you could look up any of these things they all have their preferences for symbology and organization they don't all organize one way you have to look at them as sex just like there are sects of Christianity it does not mean that the inverted cross is not a chosen and agreed-upon symbol of the worldwide satanic network because it absolutely is and has been for since Christianity has embraced that symbol they've inverted it these are Satanists ladies and gentlemen this is the missing piece of the puzzle these are control freaks there are people who think they're God there are people who think there are kings our rulers are masters that their worldview and that their absolute decrees are not to be questioned or challenged that's the definition of what it means to be a Satanist the very definition and we have to understand their mindset if we're going to defeat them we have to first understand that the world is run by sickness this is the missing piece of the puzzle that many many many people who are waking up because of this crisis and starting to ask questions still as yet do not comprehend or understand that what lies behind the ostensible rulers the ostensible politicians the extensible structures of power are satanic dark occult social engineering mind controllers and it doesn't matter if you know their names personally folks the former governor of Pennsylvania was involved in Satanism one of the directors of the Federal Reserve was involved in it people in intelligence agencies are champions of Satanism people of major banks corporations champions of Satanism teachers politicians judges police actors people in music in the music industry people in technology you could go on and on and on and on they're in every position of power and influence in our world and you need to understand their mindset which I'm not going to go all into today you can look it up in my former work understand their belief and their mindset because they are the ultimate enemy behind the scenes and the secondary enemy is the people that they have brainwashed into their worldwide satanic cult and now their cult members that are out there including the police the military the National Guard the general public the big tech companies people who want to censor people people who want to socially shame people the radical left the radical right it doesn't make a difference they have all of these people in a state of what I now call worldview violence the cult this is the new cult technique and this is the new propagation aspect of the worldwide cult of Satanism it's called worldview violence and here's its main tenant the official quote/unquote official narrative of the master class is not to be questioned by the members of the slave class that's it the slave class average population is to listen to and accept the official narrative put forward by the Satanic ruling class and that is it and that's called worldview violence if you don't agree with our narrative you become a pariah you become persona non grata you become someone who we will conduct violence upon you by saying you cannot do any of the rites you may not perform any of the rights that you used to be able to perform unchallenged and unhindered we are going to hinder you in the performance of those rights because now the world is different and this is the new quote normal jackass is saying this saying this term there's nothing normal about it it is absolutely abnormal and it is absolutely based in violence and I stand against all forms of violence I stand for the right of self-defense against all forms of violence if someone is taking away someone's rights harming their physical body taking away or harming their property you have the physical right to use whatever amount of force is required to stop that non rightful behavior up to an including deadly force and that's what I stand on the side of I stand on the side of people who have had their rights violated if you've had your rights violated that means it is actionable it is actionable it's actionable whether through words or actions and in most cases it's actionable when you are physically prevented from conducting a right that is yours to conduct you have the right to take physical action against the person attempting to thwart that right now I'm not saying that you at that moment choose to exercise it because most people don't understand that that is a right I'm saying it is a right we have to teach more people that that is a right sometimes you'll want to try to exercise that right and unfortunately more people will show up to try to stop you from the exercise of your right of self-defense they want to try to tell you that you don't have a right to defend yourself and your property against violence and duress is we're in a state of duress and that's what world view violence propagates even more we are in a state of duress worldwide not only the duress of the state telling you you must obey its dictates called laws we are in a state of duress with now the average golem the average zombie telling people you must accept and propagate the narrative of the ruling class and you may not challenge it and if you do we're going to shut down your acts your access to the media content delivery platforms and you'll be d platformed and that's the taking away of our First Amendment protected natural law right to freedom of speech and that's a very dangerous proposition folks to tell people you must agree with my cult belief system and if you don't we're going to de platform your freedom of speech and then take physical rights away from you because you're begging for a physical war you're begging you're begging for not for physical violence you're begging for a dramatic and extremely bloody physical response to duress if you think this civil unrest is somehow putting people in danger you have no idea what is possibly potentially coming you haven't seen real civil unrest you haven't seen the last word resorted to you haven't even seen people start to say the lost word know you've seen people viscerally react in the arc complex to a bunch of fucking nonsense and the overwhelmingly vast majority of them doing so completely unarmed you haven't seen anything that constitutes something to truly worry about when it comes to kinetic action at all and let me tell you something folks most of the people out there including most people listening to me you're not physically ready you're not mentally ready in knowledge for how to handle a situation like that you're certainly not psychologically and emotionally ready and most of you are not spiritually ready you know so all I have to do is say keep pushing the world view violence folks and eventually it's not going to turn it's not going to turn into it won't be a protest and it won't be even riots it'll be something that most people will have liquid diarrhea running down the inside of their pant leg when they actually see what will really happen and that is what I have been trying to avert since day one on what on earth is happening however I am very ready in all of the ways that I just touched upon from the physical to the spiritual here is my final word on the coronavirus so-called pandemic the best meme made about what it really is all about this is the media hype at the top and that's what it represents as far as actual death potential and actual true transmissibility for anyone with any kind of a healthy immune system we're not extremely old and infirm and that describes it as best as I could put it without words so let's move on to the next aspect in the time remaining we won't get to calls hopefully I could finish this aspect is the the civil unrest as a results as a result of the you know nationwide as a result of the George

Flinn murder now regardless people have asked me what do you think about this as well now regardless of what you think is what the actual event of what this group of cops did to this gentleman again that's the ancillary issue you could debate that from now until the end of time again we could go into the who what when and where we have to look at the why you got to get down to the causal factors and the understanding of what is really taking place beneath the surface and the only thing I really want to truly mention about this is that the protests that erupted as a result of this event regardless of whether you want to see it as some type of a PSYOP or an actual murder first of all the first aspect of the joy George Floyd situation is police have been summarily executing people on the streets of the United States for decades and decades and decades it does not matter whether it is a white black Asian Hispanic police officer doing it to a white black Asian Hispanic Native American human being the agent of the ruling satanic master class doing it to the person who should have their rights respected in whatever way that people should be respecting rights and not conducting violence upon them is not happening we are seeing police violence against all kinds of people it is not a matter of race it is a matter of the state and the violence of the state versus the people and their rights first and foremost that is the principle that is what I've been saying since day one race is essentially an illusion there is one quote race the human race you know what the real race is the race against time to morally educate the human race that's the only race there is okay before this planet becomes a real true shit show you haven't seen the real shit show break out yet folks but you're going to see it in your lifetime of things if things continue along this trajectory this very dark timeline trajectory that we are on there are at least the next aspect of this event that took place regarding George George Floyd is there are now as a result of what occurred at least five separate groups of people involved in the civil unrest that has broken out throughout the country stop look lumping them all together it is not one group of quote protesters this is what I hear everybody doing no matter what side of the flip of the coin left or right they come down on the ones who lean left oh it's all legitimate protesters and they could do anything they want the ones who lean right oh these protesters are disgraced the police and National Guard should shut them down it's not one group of people stop calling it them the protesters or the rioters it's five groups of people at the minimum and I'm being generous saying and I say it's at least five is my qualifier here are the groups of people protesters with legitimate grievances about the murder of someone and again if you even want to look at other alternative conspiracy theories about the nature of this situation fine go right ahead it takes nothing away that the police have have been murdering human beings forever and we're to over close to 20,000 people have been summarily executed on the street since 9/11 above 15,000 15,000 is probably around like 17 5 or 18,000 have been summarily executed without trial by their peers which is said even in their own political system that they have a right to summarily executed without trial by a people peers on the streets of America since 9/11 that's the police state we've become we were already a bad police state before that it's just gotten infinitely worse the second group police and government agent provocateurs ate an agent provocateur is a French term meaning a person who conducts conducts violence in an otherwise peaceful and legitimate political protest to try to give the people who are peacefully and legitimately protesting a bad name so the police are going out they have groups that are going out onto the streets and doing violence to people and businesses just to give the legitimate protestors a bad name that's group number two group number three are radical leftists and outright communists agent provocateurs like Ann Tifa who are not freedom advocates or truly anti-fascist groups you know we stand for anti-communism and anti-fascism here on what on earth is happening because we are anti Authority we are anti all authority we are anti all authoritarianism we are anti all totalitarianism we are for the building of a voluntary society without coercion and violence these are not people like that they are not anarchists stop saying that these people are anarchists they are fake-ass anarchists they are taking the label and name of Anarchy and using it to an agenda that suits their own ends which is a communist takeover or a radical leftist takeover a socialist takeover at the very least stop lumping them in with legitimate protesters and/or anarchists they are neither of the kind the next group of protesters which are out there are white supremists agent provocateurs going around there these Asian provocateurs no matter what persuasion police and government radical leftist communist ante feh or white supremacists they're all actually out there doing violence some people and property to make the protest look bad and to make anarchists look bad that's it that is what the goal and agenda of all of these people are to do the white supremacist factions want to make people who are non-white look bad and look violent so that other white people will go run to their cause and say oh look at these other races doing such violent things and rioting it's largely started all the protesting and some of it is fallen into by people who are very angry and have a lot of misplaced angst okay but you have to stay out of that and keep it on focus about the principles of the state versus the people that's the main principle and we're running out of time I may have to continue this next week let's see how it goes the fifth group is opportunist Krim criminals otherwise cotton otherwise known as common thugs and common thieves and they're out there taking advantage of this at a very horrific time so that they can just take what they want or hurt who they want because of totally wrong mindset that they have and then they want to carry out wrong behavior but I want to let people know these three groups in the middle folks that I've just put in red you have to understand one thing about them they're all essentially the same people they're funded by all the same people they are funded from behind the scenes by the social engineer ruling class whether it comes from the radical left aspect of the satanic network or the radical right aspect it doesn't matter they're just two hands that are all looking to put the human population in Chains and getting a clamp down and martial law instituted because they run the show from behind the scenes and they control all of the provocateurs from behind the scenes they own the police they own the radical left-wing aspect of the provocateur and they own the radical right-wing aspect of The provocateur II and if you don't understand that you a naive Punk little bitch that hasn't done your homework you're a naive Punk little bitch that hasn't done your fucking homework yet as offended as you like it we'll never make what I just said untrue it's all those groups are controlled by the same groups of people and we need to stop lumping all these people together as the protesters here's the main principle to understand everyone involved in the protests and or riots believe in the legitimacy of government and want it to continue and folks unfortunately I'm gonna have to leave it right there at that slide and we're gonna have to pick this something next time and then we'll do I'll finish my last few slides and we will do.a all Colin show after I finish my slides next week because we have run out of time here on this 225th edition of what on earth is happening ladies and gentlemen thank you so much for watching I'm your host mark passio my website what on earth is happening calm and remember the fundamental principle to understand in this time has has not changed and never will change ladies and gentlemen government is slavery we'll see you right here next week [Music] [Music] [Music] [Applause] [Music]

What On Earth Is Happening Show #226

Topics: *Remaining Loyal To First Principles In An Age Of Psyops & Disinformation: Part 2, Seed 4 Conference has been rescheduled for May 14-15, 2021, Mark's new presentation "World-View Violence & The REAL Pandemics" which was presented At Congreso Otra Perspectiva De La Realidad is coming to WOEIH Donation Gifts this week, Mark answers questions about his upcoming online seminar "How To Become The TRUE Media," WOEIH Help Needed: Graphic Design, Video Editing, Technical Support, Web Development, Socially-Engineered Perceived Crisis, Masks are a Mind-Control technique to put people into a mindset of Submission and acceptance of Government and Mainstream Media world-view, Free people should not allow anyone to dictate what world-view they may have, At least five separate groups of protesters with different agendas are involved in the George Floyd protests and civil unrest, Agent Provocateurs and their agendas, Police Agent Provocateurs, Communist Agent Provocateurs, White-Supremacist Agent Provocateurs, Almost ALL protesters and rioters still believe in governmental "authority" want government to continue and want to be the ones who direct it's violence, Everyone who wants Government to continue to exist condones and supports Human SLAVERY, Race/skin-tone is a Divide-And-Conquer technique that every human being should be able to see through at this point in time, Mark is seeking a previous associate from Truth-Freedom-Prosperity to testify about police actions during raids, Future shows about Police and their psychopathic mindset, No Lives Matter to the CULT called "Government," There is no law so trivial that the State will not KILL you to enforce it, Police have no MORAL Right or Legitimacy to exist AT ALL, People who want policing of any kind want the continuation of Violence, Murder, Coercion, and SLAVERY, the current political and social climate in the United States is extremely similar to Germany just prior to its takeover by the Third Reich, the Dark Occult Origins of Nazism and Communism, How the Police of the Weimar Republic (German Republic) became the S.A. (Sturmabteilung) and eventually the S.S. (Schutzstaffel), Staying loyal to First Principles by knowing what Rights are, Mark's personal disappointment with people in the so-called "Truth Community" who have abandoned First Principles at the first sign of perceived danger to themselves, How the State wants to engineer a Race War so people will continue to fight each other instead of identifying the State itself as the True Enemy, Ego-Identification of Race, Politics, Gender, Age, Class, etc., are Divide-And-Conquer strategies that most people still fall for, the One True Divide in Humanity is between those who understand that Government is SLAVERY and those who do not understand that Eternal Truth, NO LIVES MATTER to Government and its CULT henchmen, the Lives of Human Beings "matter" to the CULT called "Government" in the exact same way that the lives of animals "matter" to Meat Farmers, The Murder of George Floyd was an example of a House Slave Thug murdering a Field Slave, Government is a Straight-Line Vector for Psychopaths, Control-Freaks, Bullies and Racists, As soon as most "freedom advocates" become afraid they call for Police and*

> *Military to protect them because most of them are COWARDS, ALL Police and Military are Oppressors and Enslavers because they enforce the dictates of these Freedom-destroying institutions, Natural Law IS First Principles and we must CONSISTENTLY stay TRUE and LOYAL to it, even above LIFE itself, the Justice and Strength cards of the Tarot and their significant inter-connection to each other, the Development of inner Courage as a pathway to the establishment of True Freedom*

freedom mat that's what it's all about [Music] you've got the groove on freedom [Music] welcome you are listening - what on earth is happening this show will discuss the topics of human consciousness mind control natural law the occult and all issues that affect the freedom of the people of Earth what on earth is happening will endeavor to shine light upon the darkness of our world and to offer empowering solutions to the problems we face as humanity approaches it's critical moment of choice and now here is your host Mark Pascoe [Music] welcome one and all you're watching what on earth is happening I'm your host mark passio my website what on earth is happening dot-com ladies and gentlemen government is slavery and here on what on earth is happening we are ending slavery one mind at a time thanks for tuning in today everyone this is episode number 226 of what on earth is happening and today is Sunday June 14th 2020 we have a great show lined up for you here today we are going to be going into part two a continuation of last week's show called remaining loyal to first principles in an age of psyops and disinformation and as with all what on earth is happening shows this is built on prerequisite information and prerequisite knowledge show number 226 is built upon all of the previous 225 shows so if you're a new viewer a new listener this is not where you want to start you want to go back to the beginning you want to go on my podcast archive of my website what on earth is happening calm and go back to show number one and listen in order at your own pace and then an entirely new worldview will emerge for you as a listener and viewer of what on earth is happening so please keep that in mind we have a lot to cover before we get into the main topics for today hopefully there'll be time for call ins we take call ins through discord you can go - what on earth is happening calm slash discord or on the show page what on earth is happening calm slash show for the discord invite now let's switch over to the slides because I do have several event announcements for today this is the artwork for today's show always looking great great job Brett and we'll be getting into this topic in a moment the seed for conference which was originally scheduled for this year has been postponed we have the postponement dates we have the rescheduling dates seed for conference has been rescheduled for May 14th and 15th 2021 now barring anything changing those are the scheduled dates for it to uh you know be held on and I am still taking part in that conference in a physical capacity I will be there in person in Athens Ohio so it's been rescheduled I'm glad to hear that and the rescheduled dates are May 14th and 15th 2021 I delivered my presentation this Saturday at the other perspective of reality conference out of Madrid Spain thank you - Nuria - Misha WA and all the other organizers it went really great and I participated in an hour and a half question-and-answer session as well after the presentation was shown I will have the flash drive and the DVD of this presentation available in donation gifts which is gifts not what on earth is happening calm the gifts sub-domain of my website that'll be available this week hopefully I'm gonna try to get it up by sometime tomorrow we'll see if that if that can happen you know since I do most of most of these things myself I am you know going to have to see how things go with my schedule tomorrow but certainly by the end of this week certainly by probably the middle of this week for sure that presentation will be available in gifts also available in gifts you can make a donation to help support the effort to produce my first ever long-form documentary it is called mark passio and the science of natural law there are five donation tiers on the website ranging from $50 all the way up to a thousand dollar donation 100% of all donations toward the documentary project go directly to production costs namely paying a video editor and producing the actual physical items all donors will receive a complimentary copy of the completed documentary on flash drive and DVD and that is why we'll be added to the dock the donation price so that is what that shipping is for we are going to send out physical copies of the documentary to all donors toward the documentary and you will get that on DVD and flash drive you'll get a standard definition DVD and then you'll get an HD version on flash drive a 1080p version that is all those donations can be made via gifts that water on earth is happening comm also we're going to have new t-shirt designs soon we are finalizing it we had to slightly modify the artwork because certain color on the front could not be printed so we're going with a two color design a beautiful two color design of gold and dark purple and when you see this shirt in person I think you're gonna be very impressed with it this is the new documentary t-shirt from mark passio and the science of natural law we're going to be having this we're gonna have new long-sleeve designs in the gifts area as well coming hopefully in a couple of weeks we are just finalizing the artwork and the order and gonna get that in and the t-shirt company will turn that around soon so we've been out of most t-shirts for a while we're gonna be repressing them very soon look for those in the gifts area of the website also in gifts this is something I'm gonna cover for another couple of weeks this is a relatively new item people have really been taking advantage of this and I'm very happy to see that it's called the complete mark passio one Great War Collection it's a beautiful solid-state drive by SanDisk and we have loaded this up with every thing that I've ever done publicly all my presentations are on it all interviews that I've ever done since 2009 are on it the whole what on earth is happening podcast show whether it be in the audio form or the video form is on it my punk rock band's first EP no masters no slaves from my band the founders and this is all on a nice and ruggedly built solid-state drive it's very small very lightweight we put a nice keychain tag on it and it comes nice carrying case this is available at gifts not what on earth is happening calm and I think people have been really liking this item so I wanted to mention it once again the Ark Drive is also available from what on earth is happening calm slash Ark you fill in the information you'll get the shipping details it's a one terabyte drive filled with all of my research data that helped me to understand and come to the current worldview that I am at and to make sense of what is actually taking place in our world this Drive contains about 1,800 videos over 8,000 digital books and over 20,000 digital audio files this is a free offer I only asked a donation from my time and effort in putting in assembling this and shipping them and we are very soon going to be releasing Ark 2.0 which is a 2 terabyte version of the one terabyte hard drive with a whole nother terabyte of data added and it's very impressive I don't have a finalized date on one that's going to be available I would say that I'm probably about 75 to 80% complete in adding new data to this drive so you know it will go as my schedule permits but that will be being available soon I will be giving new instructions for that obviously because at all you'll it will necessitate shipping me a two terabyte drive instead of a one so I'll be upping updating that you know on the site but you know when it when this is available you'll hear it first here on what on earth is happening last week I introduced something that is probably the most exciting project to come down the pike and what on earth is happening in many years it is called the how to become the true media online technology seminar this is an intensive 23 week technology skill set sharing class hosted by myself and it will be done through the zoom meeting software which is free software and people have had a lot of questions about this seminar I'm going to attempt to answer them all today on the show there is limited space available in this semin our spaces are going quickly I'm very happy that there are so much interest in this seminar folks it's actually very humbling that people are signing up to this and looking very excitedly forward to taking this seminar I think people are gonna get a lot out of it so this will be taking place every Tuesday evening from 8 p.m. to 11 p.m. I specifically chose that timeframe due to my schedule and also because I want to respect people on the west coast ability to take this so it will be you know in the evening on the East Coast 8:00 to 11:00 that means out on the West Coast this is 5 to 8 p.m. per specific time ok 8 to 11 Eastern the beginning class will be Tuesday July 7th 2020 ok it is $523 93 cents too as a personal donation toward what on earth is happening is cause in order to receive a private invitation to attend this online seminar this is a private closed seminar nothing is being sold it is being offered as a free gift in return for a donation toward the what on earth is happening cause of that amount ok so you can enroll at gift stop what on earth is happening calm I'm going to show you that enrollment let me step out of my slides briefly and switch over to my web browser I'm going to do that okay we can switch over to the web browser alright so right at the top of the page when you come to what on earth is happening there's a link right there that you can click that'll take you right to the item to enroll ok so I'm gonna click that and I'm sorry for some reason that went to the homepage let me click it again there it goes ok now I'm at the item where you can enroll it shows you the artwork ok and you can click on add to basket okay now this is also a link here online tech seminar right underneath the home link on the left hand side and the navigation ok you can click that to get to this item as well but if you click Add to basket it will add it to the gift basket if you hit view basket I'm signed in to the site it will allow me to go to secure checkout okay and then you could pick from all of these donation methods PayPal Bitcoin Bitcoin cash Bitcoin SV like coin - and aetherium so there's PayPal and there are six different cryptocurrency options I'll leave it on PayPal for the time being and hit continue okay that will show you this summary page no shipping is added for this item since it is a online seminar and nothing is actually shipped to you if you click the donation link okay then you'll go to my PayPal dot me where you can continue and make the donation and then you will be enrolled in the class people have had a lot of questions about how enrollment works what you will receive as proof of enrollment I'm going to show you that now okay because there's no sensitive material in there so I'm just gonna go ahead and show you that so if we switch back over enrollees we'll get this link okay and it will say thank you for enrolling so when you sign up and I confirm your donation you will receive a link that will take you to a section of the backend of my website which will show you this webpage - how to become the true media seminar it says thank you for enrolling in our 23 week seminar for 2020 it gives you the dates where the seminar is going to be held every Tuesday to attend the weekly classes you will need to create a free zoom account at zoom dot us and it is highly recommended to install and use the program called zoom client for meetings this is the zoom client application it is available on Windows Macintosh and Linux operating systems so that link will take you to that software where you can download and install it it is free software use the zoom mobile app on a tablet or smartphone only if you have no other option to join the class this is highly not recommended to to take this class via a mobile device I want to say that again I highly recommend not taking the class via a mobile device I highly recommend taking the class via the zoom client for meetings on a desktop or laptop personal computer not a mobile tablet or mobile phone okay you will be emailed an invite to June join the zoom meeting the week preceding each class you will get an invite each class if you enroll okay because it's a private closed session closed meeting by invite only ok the invitation will be mailed to you via the email address that you enter when enrolling in the seminar on gifts on the gifts area of my website you will need this weekly invitation to join the class meeting each week so please do not misplace or lose these emails if you do not receive an invitation to any of the weekly classes please let us know by sending an email to true media atwater on earth is happening comm classes will begin promptly at 8 p.m. Eastern time every Tuesday starting July 7th the zoom meeting itself will be started at 7:45 p.m. each Tuesday to allow 15 minutes for all students to join the meeting please be on time so you do not miss important parts of the class classes will conclude promptly at 11:00 p.m. Eastern time the zoom meeting each week will work like a virtual classroom mark will be sharing his screen similar to using a projector in a real classroom zoom has a feature where people can raise their hand virtually via the software to indicate that they want to ask a question mark can then enable your voice so that he can take your question for all students to hear text chat will be disabled during class due to its potential for distraction while class topics are being discussed we'll look into an option of maybe making either a discord room or something like that for people who are students to talk to each other I haven't really decided on whether we're going to be doing that or not but you know we can I'm sorry we cannot look into that option I'll switch back over ok so if you have any other questions regarding class enrollment or schedule please email true media at what on earth is happening comm and that's that's the end of that now I do want to go over other questions that people have had regarding this seminar so bear with me because there's quite a few of them okay so and I think this is important to address on the air to allay some people's concerns regarding how this is going to work okay so I'm going to take questions one at a time as they've come in to us regarding the seminar and hopefully if people are watching this they'll get a better idea of what this seminar is really going to be about so question number one will the goal for each of the candidates or students be to build their own true media news website to get it up and running by the end of the course my answer to that is while yes this is a potential goal okay that will not be definitively expected from every single person who enrolls in this seminar okay I would like people to develop those skill sets however this is admittedly an introductory course and I personally would not expect everyone who enrolls to necessarily master those skill sets in a 23 week time frame even okay this is giving people building blocks of knowledge that they can build upon themselves okay so nobody's going to come out of this seminar total expert folks okay you're going to work at your own pace you're gonna work with your own drive your own internal sense of Drive okay so you're gonna go as far as you want to take it that's the ultimate answer to this question okay so the course however is designed to start students on the path to becoming able to do something like that certainly alright but no one is going to be expected to have your own website up and running by the end of the seminar I think that would be a little bit ambitious okay some people may have the internal drive and they are very if those are certain students are very autodidactic meaning they're good self learners then yes they'll take the skills that I am going to impart to them and they'll run with them okay and maybe they will do that in that timeframe who knows but that is a very optimistic goal I'm saying it's a potential goal but I don't expect out of every person who attends I expect people to learn a lot and then start to apply that in their own timeframe so there are no set timeframe goals for students you will learn at your pace obviously I'm going to cover material at my pace but you could then explore these topics further on your own and go as far as your driving skills take you so that's my answer to that too will we have weekly tasks to complete outside of the course time based on what we learn each week and my answer to that is no there will not be homework for the course okay I am NOT going to give homework and certainly students will not be graded this is not going to work like a traditional you know school course in that regard students will be expected to learn at their own pace and apply the skillsets in the way ways that they choose okay so the next question how much time should we dedicate to completing tasks each week and again that's not applicable you could see my former you could hear my formal response that you there will be not be homeworks for this course or grading what equipment materials or programs or software are required to complete this course I am sure this will all be explained in the first week or throughout the length of the course and that's true I'll be getting into that but you know nothing is really required except a desktop or laptop computer is the suggested equipment and the only software required is the zoom client for meetings if people do not have a desktop or laptop computer yes you will still be able to attend the course via a tablet or a mobile smartphone I don't recommend that though and there is a zoom app for mobile devices but again that's a last resort okay will it be useful to have two computers one to take part in the live seminar and the other to practice using software in real time and I am answering that that that is not required but you may do that if you wish to okay so I don't expect anybody to have two devices but if you want to have one device to watch what I'm teaching and another device to you know do some things in software for yourself you are more than welcome to do that you know as long as that doesn't detract from your attention span in the class will students be able to receive each weekly lesson as a video file so that they can refer back to the information for future reference we are not currently planning to offer that as an option because it defeats the purpose of a live online seminar and a personal seminar environment I may look into the option of doing that we will see but right now you want to not expect that and we want to treat this as a live in-person seminar with me as an interactive teacher okay so that's my answer to that let me go to the next question okay will it be possible to record the lessons myself well I will not be enabling that feature in the Xoom client but if people you know know how to do that in their own software I can't prevent anybody from doing that so you know again I'm offering this as a live online seminar to help sort of fund what on earth is happening in the projects that we have in the works here and potentially even pay for people in you know positions of help that I'm going to be asking for that I have asked for so um you know people you know have software that and they know how to do that I can't stop anyone from doing that so that's my answer to that how many spots are left for enrollment I don't have an exact figure on that right now but enrollment is limited and there are still spots left but they're filling up so try to get in with your enrollment as soon as you can if for some reason I miss a class can we download it or make it up so I have already addressed that I said that is most likely not going to be the case so don't expect that I am expecting commitment to attendance each week otherwise why you know put forward you know your hard-earned money and take the class if you're not going to be able to do that I am looking for people who are committed the same kind of people who are going to be committed and taking this class for 23 weeks are the same kind of people that are going to be committed to doing the great work of teaching natural law so do not expect any classes to be gone over afterward it will be a live event each week Tuesday evening are there any specifications or programs that are a must have I'm truly a beginner to this know for this class the only must have again is a device the zoom client for meetings and a focused attention span those are the prerequisites for attendance okay next question I'm curious about preference for laptops Apple Windows etc I was about to order a laptop because I need a new one I was wondering what you could recommend and I'm answering that that's a personal preference I can't tell anybody what platform or what specs to get on a device I recommend at least good mid-range equipment I don't recommend super cheap equipment that usually is not really worth the cost anyway and it usually breaks down much sooner so mid-range to high-end equipment you get your money's worth and it lasts a lot longer but that's a personal preference of what each student feels most comfortable working on if you're comfortable on Windows or Linux or Mac that's a personal choice and I can't tell anybody what to use you will be able to attend no matter what platform you are on okay I'm interested in the seminar but paying the whole amount upfront is a bit complicated I would prefer to pay for every week separately as the course goes along and I I'm answering that that I will not be offering that option again the timeframe and the donation is part of the commitment to the seminar I want to see people who are fully committed to doing this and that means you are putting for some value from your life into this so it's not ever going to be offered on a week-to-week basis that's my answer to that I wasn't able to access the tech seminar enrollment link before it expired I had a technical problem we're on the back end of the server the enrollment link to get the information about what's going on with the class that I just showed everyone was expiring and I have fixed that and the link is made permanent for all enrollees in the seminar so if you enroll you'll get that link digitally it will be emailed to you and that will not expire if you are an enrollee of the class so that technical issue has been fixed on the backend of the server do I need to do anything to get the link when for when the class starts yes you will need to check your email account that you signed up for the seminar using in gifts not one earth is happening comm you will need to check the email that you put in with your account at gifts ok for the class invitation each week prior to Tuesday we will probably be sending out the invitations either Friday or Saturday before each Tuesday class to make sure all students have the invitation link ok you will click that invitation link and that will open your zoom client software to enter each class ok so you will have to check your email preceding each class and do not lose that invitation link that link is your entry to each week's class I will be working all the time that these classes will be broadcast and was wondering if those who sign up have access to these classes after the live session again this is a popular question and most likely will not be doing that so please do not expect recorded classes this is an online live personal interactive seminar that is the whole point of the class is that you will receive private tutoring lessons live and in-person from mark passio that's the point of the class folks so I think I want to keep it in that spirit and in that regard keep it live ok so do not expect that is the zoom client free software how do I get it okay for my computer all right yes zoom client for meetings is absolutely free you do not need to join up to any services that zoom offers to take the class the only enrollment is my enrollment fee on gifts okay of my gifts area of my website there is no do not sign up for any additional services in zoom that is not required to enter each week's class okay you could download the zoom software at zoom not us slash download and you are going to click on when you go to that link zoom client for meetings okay zoom dot us slash download and then you're going to click the link that says zoom client for meetings that is the only software required it is available on Mac OS Windows and Linux operating systems I have a Toshiba laptop with a core i7 processor Windows 10 operating system eight gigabytes of RAM 64-bit based processor is my laptop computer advanced enough to take your online class definitely absolutely you'd probably be able to take it with much less specs much lower specs than that ok that's that's a decently configured laptop system ok the system requirements for zoom can be found at support zoom dot us so if you're concerned about system requirements you can go to that page and click on desktop or laptop system requirements ok so support zoomed at us and click on the system requirements link that will give you all the requirements necessary to run the zoom client for meeting software I was wondering if the free version of zoom would be sufficient yes absolutely I'm not use in before I downloaded it installed it looks like the free version is somewhat limited regarding hey the the zoom client for meetings free versions all you need okay that's all that is required to connect to the class each week as I've said will sessions be interactive to where participants can ask questions from the instructor and/or interact with other participants participants will not be able to cross talk or chat with each other in these sessions students can however raise their hand virtually while in the class to indicate that they have a question that they want me to address I will then be able to enable their microphone to take their questions so that the whole class can hear both the question and my response to their question that's how questions are going to work during the online seminar so we've also had some issues with at least one individual enrolled with more than one enrollment they purchased more than one enrollment during their checkout process which is fine people can do that okay for example if you and a friend want to attend or you and your spouse want to attend separately or you just want to give gifts of attendance to this seminar you can certainly you know on gifts donate for more than one enrollments however please in the note what you are given an opportunity to when checking out to type in some comments in a note okay before actually checking out I am asking people who want to donate for more than one enrollment to please provide whatever additional emails are going to be required for me to send enrollments to so if you sign up and you have will want to send an enrollment to a friend that means your email is going to be used for enrollment number one for the second enrollment please put the additional email that you want that enrollment sent to in the notes area before checking out okay so provide the email link in the notes area before checking out if you have a second or third enrollment etc last question I believe I'm wondering if the skill set that is acquired through your training course will be something I could apply to a range of subject materials such as my own product line ecommerce site etc so my answer to that is I cannot stop someone from taking the class for such purposes however that is not the intent of the spirit of this class the intent of the spirit of this class is to try to inspire new teachers of natural law to apply these skill sets to go out and do the one great work of teaching natural law so that's my answer to that I can't stop anyone from just taking this because they want to take a tech class but that's not the spirit of what this seminar is for the spirit of the seminar is for potential teachers of natural law to learn skillsets to go out and teach natural law publicly on the Internet ok so I think that answers all the questions if anybody has any additional questions you could send that to true media at what on earth is happening calm and I'll endeavor to answer your questions about this seminar to the best of my ability ok I think let's jump back into the slides I might have another couple of quick event announcements I'm hold on let me get out of here all right go ahead we could jump into there ok so that covers everything I wanted to cover for how to become the true media except the skill sets these are the skill sets they are beginner and intermediate skill sets that will be taught in the class ok so I will be teaching basic operating system skills that will translate to any operating system platform ok I will be showing my screen on Mac OS platform because that is the computer that I will be sitting at to host the seminar I will more likely than not have a Windows disk image virtualized through virtualization software that means that I can switch between Mac and Windows basically I will be only showing some basic things through the Windows operating system interface to show how things translate over I will be doing every single thing twice or three times I want to emphasize that I think it's important people have also had that question okay so I am NOT going to be with every single task I am showing people I'm not going to be jumping from Mac to Windows to Linux and showing them on every platform I'd say over 95% of things I'm going to be showing on my computer which is a Mac that I'll be hosting from and then some things that I think are critically important as far as operating system skills like for instance how to format a hard drive I will be jumping over into Windows and showing people the difference between certain programs like apples Disk Utility program and Windows disk management feature okay I will be doing that for certain operating system things but do not expect me to do every single task in the seminar three times on Mac Windows and Linux that won't be happening I will be showing tasks from the operating system that I personally use and explaining do not memorize individual steps what you are doing is trying to get the conceptual idea I'll be covering this stuff in like the first class you get the conceptual idea of what you are trying to carry out and you learn the method for carrying that out and then it translates slightly differently on different software and different operating system platforms that is called conceptual learning versus memorization of steps or individual tasks okay so that will be part of the skill set operating system skills file systems and disk formatting will be another skill set I'll be teaching and not only well and then file and folder management is the third one this is called HFS or the hierarchical file system how to organize large data sets of downloaded data or created data okay this is also going to cover backup I'm going to show people how to make you know timely backups of their data so that they never lose anything workflow and best practices best practices is highly important when it comes to computers this means that there is a ton of different ways to get the same job done but I'm going to be attempting to showing you I'm going to be attempting to show you the best ways or the best practices of getting certain tasks done word processing and publishing internet and networking basics searching the web and the dark web because guess what folks there's a lot of censorship and you have to know how to search the dark area of the internet that search engines don't index because things are being taken down rapidly so we'll be getting into deep searching of the internet graphic design skills print publishing skills building presentations audio editing and publishing video editing and publishing and again don't expect to come out of this a professional video editor just letting you know that right now don't expect to come out of this a professional audio editor you're going to learn introductory skills so you'll know how to do things how to crop a podcast an audio podcast and or if you want to edit something and take take it out and save the file in video editing I'll show you how to do very simple things like cropping video like adding you know two parts nonlinearly together like maybe doing very simple layering very simple compositing nothing dramatically enhanced folks you got to start with baby steps and the building block so if you're already an expert and stuff like this this isn't the course for you this is the course for people who have the drive to be a teacher of natural law and don't know where to begin technologically I am going to be showing you basic beginner and up to some what intermediary don't even be intimidated by the word intermediate somewhat intermediary skillsets in computing okay so please keep that in mind this is an introductory course I said at some point maybe I'll do an advanced course okay for for people who have a lot of these basic skill sets under their belt and want to know more how to do more advanced things okay so web publishing basic web publishing video conferencing how to like bring a guest into your you Podcast or something like that or host a zoom meeting basic sharing via cloud services and the only reason I'm putting that on there I know most people want to avoid cloud services and I think that's generally a good idea in some instances people want might want to collaborate with others remotely and do not know how to set up an independent server for that purpose so I'm going to show very basic cloud sharing services only for the situation where you may have a remote helper and you do not know how to set up sharing on your personal computer or setting up a customized web server for that purpose and you may just want to use something like Dropbox or Google Drive in order to collaborate with another individuals so we're going to be doing the very basics regarding that and then discussion and showing of some hardware and equipment physical hardware and physical equipment those are the skill sets that are going to be taught in this class ok so I think that covers everything I wanted to talk about regarding the how to become the true media seminar thank you to all enrollees and thank you to potential enrollees I think it's really going to be a huge success and I'm really looking forward to it last week I told people we are still looking to fill 4 positions these positions are still open we have been B we have begun the process of interviewing people and we're going to be continuing that this week we need people in graphic design video editing and tech support here in person in the area of web development people need to be a full-stack developer I'm not looking for people who you know are like a bootstrap developer please keep that in mind with the web development position I'm looking for a full stack developer ok not someone who you know takes shortcuts you need to know how to code for real okay so web development is the one that I will accept the remote positions if we can find somebody who can come here and do it in-house that would be magnificent but that is the only position out of these four that I'm even accepting a potential person who is not local to Philadelphia the other positions please keep in mind and don't add signal to the noise that we are looking for people in house to sit at a workstation here in my home studio for graphic design video editing and like by the love of God if someone is a good technical support person who wants to come in and take some of the technical support duties off of my plate please respond to this one this is the one that's killing me dead okay is having to be the tech guy for everything here if there's a good mac and Windows technical support specialist that can come to my home studio here in Philadelphia we need that help more than anything else okay the graphic design video editing and technical support positions are local to Philadelphia if you are remote please do not respond the only remote position we are even considering is the web development developer position one out of four the other ones only if your local please respond the email address to respond is Leah at what on earth is happening calm that is Ellie I H a at what on earth is happening calm that is my assistant and she will be fielding requests and scheduling potential interviews for people that want to come here in my home studio and help us do the great work so let's jump into the topic for today which is remaining loyal to first principles in the age of psyops and disinformation part two last week we covered the corona virus so-called pandemic which I called a socially engineered perceived crisis it's a crisis of managed perception not a real event that needs to be feared as mainstream media is telling us to fear it that is not to say as I said last week that there isn't a real illness making the rounds but the infectivity and the morbidity of that illness is not what the media is making it out to be nor is the cause and the vector of that illness what the media government and even mainstream science says that it is and that that's my position on this so-called pandemic and my position is backed up with a tremendous amount of knowledge it is not speculation okay it is borne out from deep study of these dynamics now what we have out in society is not people who are engaged in the Trivium process of truth discovery we have what is the equivalent of cult member true believers and here's what they look like folks the masks speak if we switch back over to the slides please you know they speak volumes I live in fear I believe the mainstream media I'll snitch on you I believe in agenda 21 I want safety not freedom that's a big one there in the middle row on the left I want medical tyranny my parents are yeah I guess it says my parents right are hurt hurting my immune system the masks are hurting the immune system more than anything else I love Bill Gates I do what I'm told I want mandatory vaccines I enjoy virtru signaling it's all Trump's fault this is the new normal and let me tell you something folks this city where I live is rife with them I even apologized for even using the term and insulting royal Raymond rife who people should look into the work of and then they wouldn't be so stupid as the fall in you know to this SIOP mind control and be wearing masks everywhere first of all the masks ain't keeping anybody safe you or anyone else okay secondly it's a mind control tactic that's it it's it's too put people in a mindset of submission that's what the mask does okay I have not worn one since day one I don't intend on wearing one I will not wear one because you know what the mask really does folks and is the last thing I'm gonna say about the coronavirus issue the kovat 19 scared em ik okay because that's what it really is you know uh the mask says I accept the world view of Big Daddy government that's it that's all it says and you know what else it says I want to push the acceptance of that worldview on other people and you know what folks no one's pushing their worldview on me because I quite frankly and more intelligent than that to by a bullshit worldview and I'll look in any bought any human beings face I'll look at a straight into a stranger's face I'll look into an idiot on the streets face I'll look into a cop's face I'll look into a politician's face I'll look into a judge's face I'll look into any clowns face and say I have more knowledge than you you don't know what you're talking about and know nothing isn't gonna tell someone with my level of knowledge what my worldview must be forced to do be fuck you you got it get it okay nobody's telling me what I must believe or think quite frankly you don't know what I know at all you haven't studied what I've studied you haven't eclectically gathered the unimaginable volume of data that I have and poured through endlessly that's a huge bulk of what I do with my time and have done with the time of my life so and know nothing clown that listens to the mainstream narrative isn't telling me what I must believe fuck you okay just straight out there in street language so that's really all I want to say I want to conclude that section I'm gonna reiterate some of the things I talked about about the protests and rioting regarding the George Floyd situation but ladies and gentlemen no one is going to tell me what my worldview must be and what conclusions I must come to especially parroting the bullshit mainstream media and government narrative about this nonsense you will not violently impose your worldview upon me so continuing again these are some questions we attempted to start to ask last week let's continue it this week what is the whole protesting and rioting really all about because people have a lot of unanswered questions about this type of stuff you know what's driving the violent aspect of it what do some of these groups want etc so last week I talked about that there are at least conservatively five separate groups involved in the civil unrest that has been taking place in America and throughout the world regarding the George Floyd situation regardless of what you believe that situation to be I'm not going to get into is this a false flag is it a hoax all of that okay I'm not even taking it at face value that it happened as what people say it was that being said I still don't support the police and never have I'm not not going to go back on that position because that position is based upon first principles that's what this whole show is about first principles regardless of what situationally may be occurring so the five groups of protesters which we should stop trying to loop loop yes lump altogether and saying the protesters were the rioters no there is no thought and one group following that there's no such thing there's many groups of people going out into the street for different agendas for vastly different agendas and people have to understand that and understand how this is a nuanced and complex aspect of this and not trying to oversimplify what is a complex situation there are protesters with legitimate grievances about police brutality and violence absolutely I have legitimate grievances with police in general with their existence number one with the powers they are given with the violence they conduct with the brutality that they conduct absolutely I stand in solidarity solidarity regarding those things I personally don't believe in protesting because I believe protesting is just begging the government you know to beat you a little bit less each week you know that's that's a slave class saying big daddy government plantation owner please don't beat me as much as you beat me last week beat me a little less this week that's all it is I don't accept that I don't believe in saying to the government please give us a little bit more rights government has no moral legitimacy to exist that's why I don't believe in protesting i ladies and gentlemen use your imagination for what my next statement means I believe in saying no to government with teeth let me say it again I believe in saying no to government with teeth interpret that as you will and use your imagination okay and you'll get the idea if you have a little bit of intelligence by what I mean by that all right I think people have to come together and say we're not accepting slavery anymore because is what government is and if you don't know it's slavery by now you're a fucking retard all right that's all comes down to that's what you are if you don't understand the government is slavery by this point you haven't gotten the message from day one go back and start the podcasts all over again from podcast number one if you don't understand that and listen in the mall about ten times each maybe it'll hammer into your fucking thick skull then all right so I stand in solidarity with anyone saying we don't agree with the police's behavior I don't believe I don't agree with police's behavior regarding anything I don't think they have the right to exist quite frankly because it's part of slavery called government and it's based on violence intimidation and duress and I stand against those things I believe in voluntary human interaction and all human activity that's what a true anarchist or a true voluntary astiz and anybody saying all because of riots we need police and we need protection and all this you're a fucking coward and you don't stay loyal to first principles just like people when a so called disease rears its head then you want to take away people's rights force them to wear masks or another they're not allowed goods or services fuck you you never had principles to begin with jackass you don't know what principles are cuz principles don't change with respect to circumstance or situation they're eternal immutable unchangeable truths that can never be changed altered or abolished ever so there's three other groups in the middle here and then one group at the end okay the three groups in the middle which I'm going to eventually explain our basically one group are police and government agent provocateurs agent provocateurs are people that conduct violence during a protest to try to give otherwise peaceful protests a bad name in the eyes of the media in the eyes of government and in the eyes of the public of the dumb manipulated public so police hire their own membership in the thin blue line cult secret society to go out and smash windows and beat people as a way of drumming up sympathy for the police and saying oh look at this violence that's being done we have to put a stop to this because these protests are no longer peaceful police are doing that violence ladies and gentlemen it's proven they've been caught doing it they're called agent provocateurs and they are on the police payroll or actual police members with a badge that just go out on the street without their official police costumes and badges this the next group in this middle section here are radical leftists or communists agent provocateurs with an agenda who are paid by radical leftists or communist organizations an example of these would be an Tifa they go out on the street they damage property and they conduct violence to people again to give legitimate protestors and peaceful protesters a bad name then you do have some white supremacists agent provocateurs who just hate people of color and want to go out and try to give them a bad name and say that they are violent but the white supremacists agent provocateurs are conducting the violence themselves to make it look like that all of these groups in the middle ladies and gentlemen are funded by the same people these are all people hired by government police and NGO groups that are aligned with leftist and communist elements of the police okay and you could also say the police and government agents are aligned with extreme right-wing aspects of the government so you have both sides of the political spectrum involved in agent provocateur for their own reasons that want to turn what would ordinarily be peaceful protest violent what happens is I don't want to let the public entirely off the hook because people of all races often are easily led it has nothing to do with race there are opportunists krema criminals common thugs and thieves of all races who are easily led okay and when people start busting windows people start hitting people with bricks people start hitting people with baseball bats etc okay people just start to follow and think oh I could just do this and get away with it here's an opportunity for me to conduct thuggery and thievery this happens in all so-called races of people the whole idea of race is bullshit there's only one race the human race okay if you haven't figured that out by yet you're a fucking retard okay you know you're falling for the divide-and-conquer strategy of race as I'm going to talk about a little bit later in this presentation so please folks stop lumping all the so-called protesters together as the protesters there is no the protesters there are multiple groups of people with multiple agendas that they want to see carry out carried out there are people with legitimate grievances about what is taking place in this country and throughout the world there are agent provocateurs of at least three different persuasions that are funded by the government and funded by nongovernmental organizations and then there are just opportunists people from the you know average members of human society that are unfortunately not moral individuals and are taking advantage in a time of uncertainty and in a time of chaos and they're adding to the chaos by conducting violent behavior and by destroying other people's property and taking other people's property I stand against all of those things the only thing I stand in solidarity with is raising your voice not necessarily the government put it out publicly and explain to people there's no right for these people to do any of these things they the police themselves are violent thugs and criminals they are stealing they are thieves they are stealing freedom they are stealing rights they are putting people in duress which is coercion and violence which they have no right to do they are the agents of slavery of human slavery which is government it's not the slavery of any particular race of people based on the tone of their skin it is human slavery ladies and gentlemen that's what government is but here's the thing most of these so-called protesters and you put the provocateurs and even the common street thugs in the same group if they are all the same in many respects just about everyone I brought were de to everyone here I won't say a 100 percent total blanket statement but I'm gonna say overwhelmingly almost every single person involved in the protests with an infinitesimally small percentage involved in the protests and or riots believe in the legitimacy of government and wanted to continue they are not true anarchists they are not true voluntary us almost all of them believe that government has moral legitimacy to exist and they don't want to abolish government they want to take the reins of government and have it do what they want it to do and there's nothing more than that even the legitimate protesters most of them don't have it correct what people should be raising their voice to inform the whole world about publicly is this is a problem of statist Authority belief that's all it is it's not even a matter of police you know beating and or killing black people more than they do any other race of people which it is true that you have a much greater chance if you're black of being having violence done unto you by police okay now that's an uncomfortable statistic but it is a true statistic nonetheless and it is true look folks I could go into whole shows about how racist people are up how racist police are in general in there as an institutionalized organization and fanned the flames of race division okay you know what I do want to do one day I'll tell you what I'm not gonna do that because I think that fans the flames of race division and we should all be coming together as I'm gonna conclude in this section all sensible races of people we need to come together as the human race and stop identifying with tone of skin the identification with tone of skin is so ridiculous that I can't even express how ridiculous it is it is a method of divide and conquer and unfortunately a lot of people fall into that divide and conquer strategy but do you know what I do want to do and I'm gonna publicly today ask for someone who I once knew and associated with and I'm not gonna mention their name because I don't know whether they want me to mention their name but I'm going to say there is an individual there's a male individual out there who may be watching or listening or some people may know who I'm talking about who used to take part in the group here in Philadelphia called truth freedom prosperity he worked as a dispatcher for the Philadelphia Police Department or it may be it may have been a surrounding area Police Department in a suburb okay you know who you are we spoke many times at truth freedom prosperity events when that group was a very active activist group here in the city of Philadelphia I was one of the organizers for that group and this acquaintance of mine who used to be a dispatcher sat down with me several times and informed me about at some of these truth freedom prosperity meetings about how police would behave especially on no-knock rates and the things that this person told me was so horrifying and maddening and made me so violently angry mainly because of what police would do to animals deliberately and as a dispatcher he spoke with police when they would back in to the station and they would tell him that they were doing these things to animals very deliberately it was not something that they felt they were scared and needed protection from these animals they loved what they were doing to dogs in particular if the individual out there is listening I would like to bring you on in future show maybe as early as next week because I have many things that I want to cover about police in general on future shows on what on earth is happening I'm going to be reading something called confessions of a former cop a former bastard cop okay I'm gonna be reading an entire article on this and I want to bring someone on who had direct involvement with the police department as a dispatcher if they're willing to do it I can't make anybody have that level of courage to come and publicly talk okay but I from firsthand experience I would like to have you on as a guest if you would please email us here email my assistant and she will book you on the show Leah at what on earth is happening comm send an email to my assistant l e IH a at what on earth is happening comm if this individual who I am referring to is watching the show where if anyone out there knows what I'm talking about I have since fell out of touch with this individual and I do not believe that I have their contact information anymore I can look for that and search for it but to my knowledge I unfortunately have misplaced their contact info and I would like to bring them on the air publicly if they have the courage to do so again I cannot force their hand and doing that I can only ask and tell them that I'm interested in hearing their first-hand testimony and sharing that with my audience so the point here is folks everyone involved believes in the legitimacy of government in these so-called protests okay and they want it to continue they are not standing against the protests they're not standing against government they're not singing against statism they are not stinging standing against the very idea of authority being vested in humanity they're not teaching natural law they're not teaching true objective morality they believe government has the right to exist morally which it actually does not and they want government authority to continue and that is entirely based on violence which means that they ultimately want violence to continue and don't want it to stop and that is ultimately based that is ultimately the expression of slavery in the 3d world and that means that every person involved who still wants government to continue no matter what element they are in human society is an advocate and a condone er of slavery so let me say that again because that's a very intense harsh statement listen to what I'm saying folks every person no matter how much they may be standing up against the police involved in these protests who does not believe that government itself should be abolished who does not accept that government itself is slavery who does not accept the government itself is based upon violence and is morally illegitimate on its face is akin donor and supporter of human slavery that is an unwavering eternal truth dead as offended as you like it will never make that statement untrue and that is what you have to understand if you are going to consider yourself politically awake or spiritually awake if you do not understand that you are neither you are not politically awake and you are not spiritually awake and here on water look I may take it easy on other things okay and like invited to someone's conference I may not say it viciously like that right invited onto someone's radio program via audio I might not say it as viciously as that invited on someone's video show I may not say it as viciously as that for spec of their platform and for respect of their viewership who might not have been already privy to all 225 what on earth is happening episodes but here on my platform and here on my show I'm gonna say it that viciously because this is for people who have gone through all 225 previous episodes and if you still think that there's something broken in your fucking brain boy or girl if you haven't gotten that message yet if you haven't gotten that understanding yet you're beyond brainwashed you're you've got a broken soul a broken soul okay so do your own internal self work and get your head together and get your soul together okay bring those together and integrate those alright so there's my perspective on the protests from a perspective of who's involved now let's look at some other dynamics of it okay this is what these people have to understand about government in general okay there's no law that is so trivial and again it doesn't matter what you believe about the George Floyd situation it makes no difference okay makes no difference what you think that situation is this is still true there is no law so trivial that the state will not kill you to enforce it no law and cops will say oh we don't do that yes they do they absolutely do it may be up to the discretion of the cop in on that particular day based on how he feels whether he wants to do that but guess what any little minor statute that is passed by government in any area can result in your death for not complying to it and not complying with the police they think they're your owners and masters and they think you are their slaves that is what they believe that is what they think and if it suits them on that particular day they will murder you they are more potential murder and many of them are murderers and when you hear what I'm going to read in confessions of a former bastard cop many of them are proud murderers and want to go out and murder some more and I'm gonna ask my producer please ask someone to take care of the dog barking and try to calm her okay she must have heard something outside it's coming through I'm distracted and I'm sure my listening my viewing audience can hear as well and it's you know it's part of I am now full-time living with my chihuahuas and occasionally that's gonna happen ladies and gentlemen so I apologize for the background noise but it's sometimes I'm not gonna be able to prevent that there are people here just monitoring the show and so I'm asking anyone who is down there please try to come my my smallest dog so I apologize for the distraction let me get back on point this is what people who want policing of any kind to continue are asking to continue that is slavery and murder okay and it's a true statement it's not a statement that is based on opinion it's a statement that is based on fact that's what all laws are commands of compliance instituted by the ruling class and backed up by their henchmen class that's it enforced by the henchmen class that sits between the average pub members of the public and the ruling class as strong armed men the problem is many of these protesters in their misguided state want to replace the existing police force with some sort of a policing force of their own ladies and gentlemen there it's that's like saying what am I going to when I cut this cancer out of my body that's going to kill me if I don't cut it out of my body what am I going to replace that cancer with certainly we need to replace the cancer that we're cutting out of our body with something of a similar aspect right well if we're cutting one tumor out shouldn't we be putting another two back in the body I mean that's how retarded people sound who say we need to cut this police force out and replace it with another form of policing I mean that's just this jack ass headedness as saying i want to replace the councillor I just cut out of my body with the another cancer where's my vomit puppet right yeah need need to add that in at that point another time let me just say one thing folks the things that could potentially occur in this situation are very very similar to what occurred just prior to the takeover of the German society by the Third Reich of the Nazis very similar it's very similar to how the Bolsheviks eventually took over what is now Russia and instituted communism in Russia and what eventually became the Soviet Union the USSR the Union of Soviet Socialist Republics okay but I want to go to the Third Reich as an example a lot of people don't understand the political situation that led up to the takeover by the NSDAP the National social Socialist German Workers Party National ista National socialista Deutsche arbeiterpartei and I probably butchered the German but you know I don't speak fluent German so blue and German so I did the best I could but it stands for National Socialist German Workers Party which became the Nazi Party for short that's the the English you know pronunciation of the first part of national so Silesia okay which means National Socialist okay so that got truncated because of how it sounds to Nazi okay so before the rise of the Nazi Party in the German Third Reich there was the Weimar Republic in Germany so the Weimar Republic is what the country of Germany basically had as its form of government before the NSDAP took over and they had their own police forcing okay now what happened was the Nazi Party as it was gaining vast political influence needed to strong-arm the people into supporting that as the only party and enshrining their dictates as unquestioned law okay in the new Reich the Third Reich in order to do that the leadership of the Nazis which was occult leadership it was dark occult leadership that came out of other dark secret societies such as the Thule Society the German and orden and other older secret societies out of Germany that were based on some German dark occultus ideas such as Theo Zoology rate the Germans and and/or Aryans being the master race class a lot of other dark occult ideologies which we'll talk about here on 100 at some future point I again have had to push back I have a extensive seminar I'm probably going to just give it record it and release it publicly not even at a public location and put it on the gifts area it's going to be called the dark occult origins of Nazism and communism and show their dark occult origins and show how they are pretty much identical in what they will create in the world and how they have identical agendas and how they really are just two aspects of the same religion called Satanism many people do not understand that they do not understand what dark occultism or Satanism is if you want to look more into that I recommend my work called demystifying the occult particularly part two Satanism and the dark occult well going back to this what people what they did in prior to the Third Reich is the German Workers Party which became the NS or National Socialist German Workers Party knew that they had to reduce the power of the traditional police forces of the Weimar Republic so what they did is they start started conducting a lot of street violence through their agents their agent provocateurs that were called the Sturmabteilung the Sturmabteilung or the SA are what are known as the brown shirts of the German Workers Party and eventually the National Socialist German Workers Party so the essay or Sturmabteilung would create a lot of a Gen provocateur on the streets of Germany and there would be an outcry that we need a strong police force so they eventually replaced the police forcing of the Weimar Republic with the SA the Sturmabteilung okay so these were you know the German stormtroopers okay and they became the police of the Nazi Reich of the German Workers Party and subsequently the Third Reich what happened was these useful idiots were then assassinated physically assassinated their leadership and many of their ranks were thrown under the bus and assassinated all on one day which was referred to eventually as the night of the Long Knives so people who are not familiar with this part of history should research on whatever search engine they want to use the night of the Long Knives and I recommend looking up a documentary by the same name the night of the Long Knives watch that documentary and you will understand how the SA which became the essential barbaric German police force when they replaced their police force because a lot of agent provocateur had been done and then it's they said we need to get rid of the traditional police and replace it with a more citizen oriented police force that's the they replaced their first of cancer with the second form of cancer the SI then when the real occultists knew that they had society where they wanted it which was the SS which was headed by an inner order of the SS the SS stood for the Schutzstaffel or the storm detachment which meant the it was the I'm sorry not the storm detachment that is the SA this the Schutzstaffel is the protection squadron the protection squadron was literally Hitler's inner secret police force so the SA high-ranking membership or who set the night of law Long Knives into motion to assassinate the high-ranking members and some of the lower ranking members of the SS on one day so that the SS could come over and basically take over policing in the Third Reich that is how it went down chronologically and who really ran that operation was an inner order of the Schutzstaffel where the SS called - wart son which means the Black Sun order it was D short son jeschill chef I don't know if I'm saying that correctly but it means the order of the Black Sun that was the inner occult order of the Schutzstaffel run by hon Heinrich Himmler who himself was a prominent dark occultist of the Third Reich he was really the one who was really one of the high priests of the dish warts on order and was you know conducting the real occult activities of the Third Reich and this is what people do not understand is a very significant danger of what's happening right now the call look I am for abolishing all police forces and replacing them with nothing you know what you need to replace them with an armed citizenry that knows their rights and will defend violence in any form against human rights period that's called first principles and do you know what that force is called it's called the militia of the people period which is a natural right to self-organize with our that can never be taken away by man or his government or his government agents organizing individuals into a militia of the people has absolutely nothing to do with government it means an organized fighting force that is regimented by the people and the tactics are studied and the equipment is kept in order by the people themselves and they protect their own communities because they have the right to do so from criminal thugs agents of the state etc anyone who will conduct violence against their natural rights that's called first principles ladies and gentlemen and I have never advocated anything other than that oh I will not advocate anything other than that because first principles don't change therefore we should not change our positions once something different situationally comes along you have to stay loyal to the principle of the matter by knowing what rights are most people are not doing this and they're sad disappointments and there are many many people who you know who I'm talking to there's not a few there's many many I'm horrific ly disappointed in you as a human being forget as marked from what on earth is happening forget as a teacher of natural law all of that I'm horrific ly disappointed in you heart to heart as a human soul those who have not remained loyal to first principles in this dark time you disappoint me sir you disappoint me ma'am I'm horribly disappointed at a soul level and I shouldn't have to say that because I've been very clear I've been meticulously clear in the principles that I have shown and taught here on what on earth is happening and there is no rhyme or reason why the volume of people who have betrayed their principles should have done so at this point in time it's tragically sad tragically sad and my heart mourns for it that's all I have to say to you personally so let's move on in the presentation everybody wants to make this about race instead of statism most people and that's also tragically sad and very unfortunate because there's idiots out there that are preaching power of an individual skin color and it's utterly fucking ridiculous and utterly fucking retarded I don't care what side of the equation you're coming down on it's utterly ridiculous and it's utterly retarded if we're not at the point as a species where we can't see past skin tone you are literally fucking broken at a soul level so cut the shit out making it about race this is about the state and it's minions of violence who believe in authority over other human beings which is slavery against everyone and that's all it ever has been so they don't give a shit about talking about any power or superiority of any given race the state does not give a shit about that folks as a matter of fact the state wants that they want that because that's how they know people will be significantly divided against each other and seeing each other as the enemy instead of the state as the true enemy and you got too few fucking people talking about this dynamic and explaining it just like that too few we're running out of time people we're already out of time this is eleven fifty nine fifty nine and point you know you know half a second you know later into the split second to midnight that's where we're at the only power that's going to scare the establishment is that power of human beings of every so called a sensible race and persuasion coming together male and female and every tonne of skin stop seeing some identifying yourself that's all this is all again what I talked about as ego identification go back to the earliest podcasts and listen to them again nothing has changed first principles have not changed the dynamic has not changed I spoke out against all kinds of identity equate equation political identity race identity age identity sexual identity class identity X cetera I didn't fit him you can go on and on forever how people will will identify themselves it's all ego it's all ego identification and you know what it is a divide and conquer strategy I've covered this extensively in former episodes go back and listen to them or watch them again the only thing that the state is going to be concerned about is everybody coming together to challenge the legitimacy of the state itself not any particular things that they're doing they're gonna be worried the state's gonna get worried when people all come together every human being no matter what their so-called race or will no matter what any other aspect that they egoic ly identify themselves as all come together and say you know something government has no right to exist on its face this is morally illegitimate because it's based on violence coercion duress and it is ultimately slavery then the states going to be concerned they're not concerned about anything happening now they know they have people balkanized polarized divided and conquered and fighting against each other because they're too fucking stupid to understand the divide and conquer strategies in meth it's and they're too identified in their little own corner of the world of what I am I'm this I'm a Democrat I'm a Republican I'm white I'm black you're a fucking retard is what you are who egoic lee identifies with some bullshit that can divide everybody so the state can fucking enslave you dumb ass got it get it understand it get as offended as you fucking like it's never gonna make it untrue you dumb dunce and I'll say it right just like that to your fucking face on the street you don't know what you're fucking talking about and you're played son you're played played like a fucking fiddle played like a little bitch your Playboy you're played by masters who you will never see who forgot more about your dumb fucking mind and you'll ever know about yourself moron alright so there's some righteous indignation at idiots who don't know themselves that's what the word idiot means somebody who has no idea what they're really about has no idea anything going on in the psychological and spiritual processes inside of them because they're cut off from those things by their own ignorance and their own fear and your owners your masters know you're a fucking idiot and they're pissing their pants down their leg laughing at you boy laughing at you girl you're a naive moron who doesn't know how the fucking world works and I'm not the one going to sugarcoat it to you and treat you like a dumb little child that you are I'm gonna just tell you have your head up your ass you need to get it out and you need to work on yourself and no one can do that for you you got to grow up put your big-boy pants don't put your big-girl pants on buck the fuck up and do the work uh I'm out of patience folks I'm out of patience okay I don't have I do not have the patience to take a little baby baby's food spoon and baby and highchair here take a little take a look no we're done with that those were episodes like maybe one through a hundred if that we're done we're long done with that on this show and the problem is most people don't want to rock the boat and then we don't want to say anything to anybody else they don't want to say nothing to anybody else because they're afraid of creating any kind of tension or conflict and you know what folks everybody goes oh that's a divide and conquer strategy no it isn't because there's one true divide go back and watch my presentations over and over again I talk about this concept over and over again there is one true thing that divides humanity into two groups those who believe in the moral legitimacy of Authority and those who know that that can never be morally legitimate because it is based in coercion violence and duress and is ultimately slavery there's only one criterion that divides people into two groups truly in nature whether you believe in the moral legitimacy of Authority or whether you know that that is an illusion that can never be true nothing else divides humanity except that one thing that is a true criteria for a true criterion for a divide in humanity and what we are doing here on what on earth is happening is trying to explain to the people that condone Authority and slavery that you are morally illegitimate and that that concept is morally illegitimate condoning it is morally illegitimate your moral immoral for condoning that very concept because you are saying to other people you legitimately have masters and other people are legitimately your masters and your owners and that means you believe in slavery it doesn't matter what the color of your skin is doesn't matter what your political persuasion is if you believe that government authority is morally legitimate you aarika donor of slavery those folks the whole debate about which lives matter is a moot point to government no lives matter I was looking for it couldn't find it right before the show but there's a there's a meme with Cthulhu coming out of the sea you know from HP Lovecraft horror fiction that says no lives matter maybe that would have been even more appropriate for this slide no lives matter to government cult members and this is the cult members of the political class this is the actual true darka cultists who sit behind the ostensible throne of power in the political class this is the enforcer class in the military the police the National Guard etc this is the bureaucrat bureaucrat class the lawyers all the people in government agencies and you know intelligence agencies people in government offices offices doing office work and paper-pushing licensees etc all of them right right down to the average cult member on the street who votes for this slavery you want to really know which lives matter none of them but you know what that's it's really kind of not true it's not true that no lives matter to them lives do matter to them but only in a certain way oh it's that I would say that human life matters to government in a qualified way so what is that qualified way that I'm talking about well here's what it is human lives do matter to government but not in the way people think of lives mattering the lives of human beings matter quote unquote to the Koch called government in the exact same way that the lives of animals quote unquote matter to meet farmers that's how human lives matter to government officials I'll read that again the lives of human beings quote matter to the cult called government in the exact same way that the lives of animals quote unquote matter to meet farmers that's how much the lives of animals matter to farmers who sell them to slaughter factories to be carved up for eating and that is the exact same dynamic and way that any government government agencies members of government agencies or their henchmen the police the military the National Guard etc that is exactly how human lives matter to all of those individuals to the extent that they can can control farm and butcher them and if you don't think so once again you're an extraordinarily dumb naive Punk fucking child that's how we're rolling on what on earth is happening these days again other platforms altona tone it a bit out of respect for their platform and listenership but this is my platform this is my area of free speech and I ain't toning down shit here now because we're beyond that point going back to the slides so you see a black man murdered by a white cop and I see an innocent man murdered by a corrupt cop we're not the same we've seen this slide going around this meme going around in social media and another person who does understand the dynamic very well posted and said actually I see a house slave minion thug funded by theft murdering a field slave that is highly accurate folks that's accurate that's accurate so let me read that again you'll see people saying that do understand that the corruption in the police force is being carried out and taken out on people of color and people have posted well you see a quote black man murdered by a white cop and I see quote an innocent man murdered by a corrupt cop we're not the same you're damn right we're not the same because I don't see anything here's what I see I see what this other person sees that has the truth in and actually I see a house slave minion thug funded by theft murdering a field slave that's what's happening in America with the police brutality and violence and murder let's make it very clear and not mince words the police are house slave minion thugs they're murdering people summarily murdering people in the street and that's because garbage attracts garbage when you have garbage as set up in your society it attracts garbage so what do I mean by that see this is a law of attraction like attracts like like does not attract opposite like attracts like the more you're in a higher level of awareness and consciousness the more higher consciousness and other people in higher consciousness are going to gravitate toward to you the more you're in a state of garbage mentality and low vibratory consciousness the more you're going to attract garbage well government is the lowest vibratory state of consciousness that there can ever be because it's based in violence coercion duress and slavery so going back to the slide I want to make this point very clear with the paragraph right on it government itself is a straight line vector for people who are Psychopaths control freaks bullies racists etc to be allowed to carry out their desired form of violence upon others and I mean be allowed to carry it out folks this is something in police forces which is known as qualified immunity look it up qualified immunity I did not place those words on the slide I'm just saying them while putting the slide up here but please look up that term in policing known as qualified immunity it means that police members as individuals cannot be sued and held personally liable or responsible in almost all police departments in the United States and at a federal level for actions which they take which violate human rights they are immune from that and then people can only sue a department that is then going to launch an investigation of themselves and we know what happens then murderers get off you know with either a paycheck still intact or at the very worst maybe get fired and no other action is taken against them government is a straight line vector for this garbage in our society psychopaths control freaks bullies and racists and believe me the police forces are full of every single type of this trash trash vermin human fucking vermin and if you don't think so you're a fucking naive punk bitch child who knows nothing about what goes on on earth right to your face I don't give a shit who you are I'll say it right to you you have no idea what goes on in the police forces over the next couple of weeks probably I'm going to be covering first-hand accounts of what actually goes on inside police forces hopefully I'll have a dispatcher from a former police force on the show if we can locate him to tell you how fucking sick these fuck heads are they're sick sick diseased mentally ill people they want to carry out their fucking hatred on on the whole human race or whoever they can get their hands on that's the majority of them it's not a few bad apples that's the majority because this is what government that conceptual idea of authority over other people this is what like a magnet gravitates other people toward okay and the brainwash public believe these thugs have the right to conduct such violence to others you'll hear brainwashed asininity spout and out of there shit spewing pie holes like this well well government very intrude gun can pick over I got a pie where is my puppet just step out of the slides for a minute I'm Devon that puppet is coming out see if I have him on this machine if I could find him here he goes let's step back into the slice well well little government I mean what violent street gangs will take over you know we got to have government we need police otherwise you know who would beat people to head to death on the street and smashed her head into a bloody a red bloody pulp all over the pavement you know we got a lot of police forces you know don't sir know that fucking imbeciles just clown fucking imbeciles you know it said it's really really really sad we're at as a society how fucking dumb people are and Pete you know people ask me the question what ministers take this as I go just take it at my pace I was asked a question on the question and answer session from the other perspective of reality teleconference in Spain yesterday mark how do you deal with the idiocy of these people how do you deal with their willful ignorance and how stupid they are and you know my answer was to the woman who asked the question I deal with it very badly unfortunately I deal with it terribly I don't deal with it well I try not to let it consume me but no you couldn't say I deal with it - well I think you could hear that I think if you're if you have a little bit of intelligence left in your in your brain I think you could hear I'm not dealing with it - wealth you know I don't think it should be dealt with too well quite frankly you know I think it should make you angry I don't think that you should dwell and just stay in that anger at all times and places I think you should express that anger I think you should express it by channeling it into public work to explain to people that this is unacceptable and that it is slavery and that is teaching natural law and take teaching the great work and staying loyal to first principles regarding rights okay so let's move on in the slides sorry we have a phone ringing we'll take care of that all right we stopped it already so the next slide is called cowards attract garbage so now not only is garbage attracted to other garbage but cowards actually attract garbage into our environment and that's part of why we have police forces and don't really truly have a militia of the people as soon as most quote unquote freedom advocates they're nothing of the kind their freedom advocates in word only okay in name only as soon as these so-called freedom advocates become afraid that their life might be in danger then suddenly they want the police force and the National Guard to come and run to there's there are you know saving and handle the problem for them I mean imagine this this is what people go oh well why should we take personal responsibility for our safety that's the first and primary personal responsibility you have to take is for your life and safety if you don't you don't value your life very much secondly no one else can protect you these people aren't protecting you they're protecting the state they're protecting the dictates of the state that's what they're protecting they're not protecting you or your life or your rights they don't give a shit you're right these people don't give a fuck about your rights you naive shit-for-brains person they don't care about you I don't care about your rights I mean just imagine how fucking dumb people have to be to believe that these are mainstream media the television heads their television watchers you that's how dumb you have to be to believe that that the police the military of their National Guard care about you or your fucking rights that's how much of a moron naive little child you need to beat it to accept that as being true and even in the freedom community I'm telling you it's been not just one not just some many many people in the so-called freedom community saying alright all this violence happening all around us I need the National Guard to come in and handle this no nobody needs to come in and handle it you know what created this you created it you created it by not teaching morality parents created it in their midst in the midst of society bad parents and other people who don't want to pick up the slack of bad parents by teaching morality created this fucking situation and that's the dynamic you need to understand and no amount of force or violence will ever undo it you know how it's truly undone it's truly undone by teaching morality in a widespread way throughout all of society all throughout the world true morality true objective morality in other words teaching natural law you do that you won't have to deal with problems like that it'll be so infant infinitesimal that it'll be cleaned up in seconds minutes maybe hours but it won't degenerate into the madness that we see and certainly you won't need enslavers coming in imposing as protectors which is what all the police forces all the military and all the National Guard of any country ever have been and are and ever will be in slavers posing as protectors and liberators you don't protect shit boy your no nothing punk boy that doesn't protect fuck all okay nothing your your mommy and daddy never sat you down and told you like it is so I'll play that role and I'll tell you how it really is you don't know shit you got liquid shit for a brain you never learn how the world works and you're in a fucking cult as a result and you think you're the good guy when you're the fucking bad guy don't get me wrong I think common thugs and criminals are the bad guys too but you're right in there among them you're a different kind of common thug in criminal you're one that people actually believe have the right to do your thuggery your criminality your violence your theft they actually believe that you are a morally legitimate thief and criminal imagine how much more dangerous that is having police is infinitely more dangerous than having a society with violent criminals running around because no one believes violent criminals have the right to do the violence they're doing and therefore they would step up to them with physical force to defend themselves without thinking there's gonna be repercussions for this because oh what's going to happen if I should you know pop pop possibly take physical deadly force against someone who has the right to do these things no one believes that common thug criminals or mafia members have the quote right to do the things that they're doing so they'll swiftly deal with them but how many idiots out in the population believe the police have the quote right to do the things that they're doing and so they won't physically stop them with possibly deadly force from doing the things that they have no right to do almost everyone you know and almost everyone out there saying that they're a freedom advocate are abandoning their first principles at the first sign of trouble or a first sign of danger and you know what you are you're a fucking phony you're fucking phonies your fakes your fake-ass little bitches you always have been a fucking fake you're a phony fake motherfucker alright to say it in South Philly Street language you're a fake-ass phony punk-ass bitch cuz that's what you are you are never real or genuine you never had principles you pretended to have principles and then you threw the fuck in the garbage can soon as a situation that presented a danger to your physical being came along and that means you're a punk-ass bitch pussy how about that get his offend that as you like punk bitch here's a little slide I made to see how extreme we could get with this okay there's me lying on the ground this is us still from the Walking Dead series there's me there's Mark passio lying on the ground being eaten by zombies and I am saying with my final breath yes even now don't call the police I don't want their help ever for any reason now have we gotten extreme enough yet have I gotten to the point where I'm explaining how extreme I am loyal to my principles do you understand so if you don't understand we can make a more graphic slide if need be you get it yet that's what it means to remain loyal to first principles it does not matter what happens to me I don't accept the moral legitimacy of police and I don't want a fucking cults help I don't want help from a cult you're a cult and I don't want your fucking help ever no matter what happens physically to my body or even my property anything I don't want your help I don't need your help and I don't want it so all you fucking idiots out there saying oh the first sign of danger you're gonna be begging for the police know some fucking pussy fakes are gonna be out there begging for the police but don't attribute that to this one ever don't tell me who I am inside and then I'll throw my fucking principles in a garbage can at the fur sign of trouble don't tell that to me Punk you don't know me you don't know the first fucking thing about me at all so don't tell me what I'll do when trouble and danger presents itself you don't know fucking anything about what I'll do or who I'll ask for for help from the friend wants to help if an associate and the great work wants to help that's different that's fine I totally support people coming together and helping each other I'm not calling for agents of the state for any fucking for their assistance or help you're not on anybody's side just because all you come to assistance because Oh private properties being damaged or corporate properties being damaged where you just want people to stop protesting because it got violent I really could care less you're not on my side any more than any people doing violence or on my side because you're a person doing violence I'm not going to group you in and count you as my friend just because you may be against some people that are conducting violence you're doing violence I stand against all people conducting violence and taking away other people's rights and property that's called staying loyal to first principles because you understand what principles are and you understand what rights are so you get as offended about everything as I've said in this section as you want anybody no matter what side of the equation you come down on I couldn't give a fuck I'm not here not to offend you I'm here to speak hard core truth and that's the eternal truth and nothing will ever make it untrue it's not my opinion it's the eternal truth of the matter and nothing will make it untrue because that's what you have you have flip-floppers going back and forth with no principles your fake-ass phony bitches with no principles punk bitches conservatives for the last three months and liberals for the last three days this is when the riots just broke out freedom you know they're all about oh how dare you tell us to lock down it or how dare you tell us not to protestor or even riot but then during that whole time of lockdown liberals for the last three months were saying obey the law and conservatives when riots broke broke out we're saying obey the law well which is it the point is remain loyal to your principles and don't flip-flop people saying you're potentially putting people in danger and you should have your freedom of movement restricted during this pandemic well you don't know nothing about what viruses really are and you have no right to tell anybody that their rights are suspended no matter what the health situation is that means you don't have first principles that means as soon as a danger is perceived in the mind to you let me say that again show my image for a moment as soon as as soon as a dangerous perceived mentally in your mind then suddenly you flip-flop on your principles and you you drop first principles at the drop of a hat and then you had people saying oh because these protests got you know violent and agent provocateurs came in where's the police to protect me flip-flopping on your principles one day you were saying no the police are part of the state they shouldn't exist because the state shouldn't exist and then the next thing we need the police like a crybaby bastard crybaby bastards begging for other bastards to come and save them because they don't want the personal responsibility to save themselves one week ago stay inside all the Democrats here Hill we have the donkey Colt and the elephant Colt back at it again with each other one week ago stay inside the donkey cult says and the elephant says fuck you I'm not staying inside we're gonna protest this lockdown and now all of a sudden today the elephant cult says stay inside don't come out and join these protests and the donkey cult says fuck you and as a Molotov cocktail in hand flip-floppers no principles nobody ever should have been listening to people to stay stay inside and close down your businesses and people have the right to speak up against violence and barbarism taking place in their communities and shouldn't be doing violence to other people or property to do so I don't need to do violence other people or their property to tell you the government is morally illegitimate I'm philosophically explaining to you that those are eternally true principles on a video show so the point here is stop flip-flopping and stop joining cults you know this is what identity politics gets you this is what identifying with either a Democrat agenda or a Republican agenda gets you stopped joining cults they're both cults the Democrats are the donkey cult of authority and violence and the Republicans are the elephant cult of authority and violence stop joining cults anybody that identifies like this politically you're not awake you're not spiritually awake you don't know what true spirituality is because you still believe in authority being vested in men and women and political parties and you haven't spiritually moved past the point where you understand the true spirituality must as a first tenant and first principle negate any moral legitimacy to the concept of authority at all that's what it means at the very foundations ladies and gentlemen to remain loyal to first principles see this is the tarot card that I use to represent natural law it is the natural law tarot card it is the justice tarot card do you know what the universe always gives us it's a big mirror and it's always giving us what we deserve as a species on an individual level things obviously don't immediately work karmically so they could go that could go over wide stretches of time but on a on an agar societal level we have total justice always being done to us by creation itself there is no imbalance in the universe folks the imbalances in humanity for not understanding natural law the term Lex Rex means that the law is king no human being is king this is a symbolic representation of a king that is enthroned upon a throne that means that on the universal throne law is king natural law is king the actual cosmic law that governs the consequences that are actually presented to humanity in the aggregate sense as a species regarding the aggregate moral behaviors that were conducted by the species as a whole that's how natural law functions natural law is a set of universal inherent objective non man-made meaning naturally occurring eternal and immutable conditions which govern the consequences of behaviors of beings with the capacity for understanding the difference between harmful and non harmful behavior really between the initiation of harmful behavior and non harmful behavior so the initiation of violence versus actions that are rights because they do not initiate harm the difference between moral behavior and immoral behavior now i've highlighted two terms in this definition these principles this set of laws that governs all of nature and all of the universe in all human beings no matter where in the entire universe anyone happens to be in any society are eternal and immutable that means they don't they cannot come on and be shut off they exist at all times and places and they cannot be changed they are immutable unchangeable is what the word immutable means they are forever and they are unchangeable conditions law natural law moral law does not change this is different than what people have term situational ethics which means you can look at a behavior that looks similar to another behavior like throwing a fist to initiate violence to someone else and take their belongings which is called a mugging versus throwing a fist to protect yourself from violence being conducted upon you by another these are two completely different behaviors situationally circumstantially they are different behaviors that's why those conditions are called situational ethics I could throw a strong left hook at someone's jaw if I did it in one particular instance namely to try to mug someone and take their belongings through that violent action it would be violence it would be immoral if I did that very same action it's a kinetic action but it's not the same behavior if I did that kinetic action toward someone who was trying to rape a woman and stop them from doing so that would be a right to conduct see that's how natural law really works and what people have to understand regarding it you could have behaviors that look similar in kinetic action but are not the same behavior at all and we need to stop conflating things like that I hope that explains it clearly well folks so so these things should never change they're eternal and they're unchanging that means our principles as soon as we discover them should never change as long as we're in our bodies in this incarnation until the day we die they should remain the same and unchanging principles do not change we are only capable of discovering principles and then putting them into effect in our lives through our behavior namely taking right action but we cannot change them based on circumstantial things that happen no matter how much those things may put us in a state of fear the state of fear is what gets us to abandon our principles and not remain loyal to them and you know I want to put this card in relationship to the courage card or in most decks it is called the strength card of the Tarot there is a significant and intimate connection between the strength card and the Justice card and that is because more so than any dynamic in nature courage gets us to justice more so than knowledge more so than even heart or love courage gets us there more than anything because courage means we are taking right action in spite of our fear that is why you have the illuminated woman who is holding open the jaws of a potentially deadly lion and the lion represents the courage she is taking into her hands internally as a feminine dynamic that we then put out into the world externally through the masculine dynamic of right action which on the tarot card is the chariot card or the card that represents will to act in the world physically act in the world so folks what we have to remember first and foremost about remaining loyal to first principles is that principles have to come first and stay first and the next thing we have to understand about principles is that more so than any other dynamic interpersonally inside of ourselves and in nature the dynamic that is going to get us there is courage courage will take us to the place will where natural law and true cosmic justice is enthroned as the ultimate quote-unquote ruler of our society if we want to see our society ruled by true justice and true objective morality under natural law the development of internal courage is the very most important dynamic that has to be fostered and nurtured and it is the dynamic that will take us to the place that we all say we want to go which is to a society based upon true freedom so ladies and gentlemen that's the end of my formal part of this presentation for the duration of the show we are going to take your calls on discord as a wrap-up to this I just want to say if you want to make a donation to the cause here at what on earth is happening through making a donation in return for physical items such as t-shirts flash drives DVDs stickers keychains buttons etc you can visit gifts not what on earth is happening calm that is called what on earth is happening donation gifts it's a little gift shopping cart that you can go to place items in the basket make a donation for those items in return you'll receive those gift items in return for a voluntary donation personal donation if you want to take me up on the ark Drive offer which is a hard drive that you send to me and I fill it up with one terabyte of all of my very deep and very good research material material that I've taken in over the course of my life to learn some of these things some of these principles and apply them here on what on earth is happening you can visit what on earth is happening calm slash Ark and fill in the form there for the details about how to go about receiving the ark Drive offer finally if you want to make a straight to the what on earth is happening cause you can visit what on earth is happening calm / donate or click the donate tab and there's something like eleven methods of donation on there including paypal cryptocurrency patreon you know venmo etc another way you can make a donation is by visiting that button there on the mid lower right called donation donate supplies from our Amazon wishlist if you click that that'll show you technological items that we require to keep the operation here at water on Earth is happening running right now as we speak as of today there's nothing on that list and I thank everyone from the bottom of my heart for picking up items on that list it's very humbling that people if I've asked for physical donations in the form of technological supplies people have taken care of our needs here at what on earth is happening and I mean I thank you from the bottom of our hearts here everyone at what on earth is happening does our entire operation here is entirely viewer donation funded we are not funded by any end NGOs this isn't a you know 501c3 there's no incorporation of any kind in any form it is just me and what on earth is happening is the name of my website and I have volunteer helpers and that's it nothing else so no one controls what we say or do here it is simply an out an educational outreach effort that is funded entirely by your voluntary personal donations so we thank you for continuing to help us do all that we do here on a weekly basis at what on earth is happening so that being said I think I need to reset briefly my computer let me step out of this for a moment and okay I'm gonna reset okay my producer saying he needs a reset the stream before the calls what if I cut out of discord and go back in you're not seeing anything that your using even on the live screen so has MIMO crashed if we restart the stream people are going to be cut off from the live stream and then have to go back into it so uh that might even I don't know if it'll take a new streaming claim all right so what we're going to do here folks it looks like we're having a technological problem and the streaming software on our end looks like it has crashed so my producer cannot live produced the show to switch views so we're going to stop the live stream and reboot the live stream so please reconnect to the live stream momentarily for the question and answer session so let's reboot the stream go ahead you if you okay and then take that off I we're back everyone we're going to just take down the intro just stop the intro about alright we're back hopefully that clears up the issue I apologize for that but you know we're live here and sometimes issues happen you know we don't have a huge technology budget we are doing things ourselves in my home studio we don't have a huge staff and sometimes tech problems do a car and now we need to reset things so thank you for your patience in that regard so let's jump over to discord and let's start to go to live calls let me let me see I'm gonna put my headset on and hopefully I'm coming through loud and clear in discord so remember make sure your mic is unmuted and I'm gonna read I'm gonna unmute you on the server end if you want to join the calls you can go into what on earth is happening comm slash discord or on the show page on the website you could simply click click here to join the call in okay you okay folks my producer was just telling me something so here we go we're live with your calls for the duration of the show let's go to Cory Cory you are live on what on earth is happening welcome to the show hello could you hear me yes I can coming through loud and clear as a matter of fact I'm just gonna take your volume down a bit because you're coming through hot that sounds better here we go all right sounds good welcome to the show Cory what do you have for us here today well first of all thank you to producer Mike and they if I'm saying that correctly sorry it's just Lea it's it's pronounced Lea Gadget all right thank you for this opportunity I really want to thank that and I like this whole community by the way if you're familiar with high-impact slick she's another content creator you guys have amazing communities you guys are very open to speaking to the fellow people that you produce content to and I think that's very good as a content creator and I actually produce content myself but that's regardless of the point so I have a lot of information to share a lot of information I believe is actually transformative rather than informative and I can probably go on for an hour just on disclaimers itself but I'll make the very clear a big disclaimer that the fact I expect questions to be made of what I'm about to introduce I expect you to be very curious about what I'm about to offer here not really offer but really just show you what I'm up to working on at least okay um yeah so I'm involved in like the health field in particular just a little background on me I I produce video content on bit shoot as well YouTube although is youtube got me censored obviously a couple times not a surprise but you know I'm making my way through all that I've been a researcher for a while too and I just want to say you're my favorite researcher okay getting to the point thank you I appreciate so yes the getting to the point I'm also from Pennsylvania by the way okay so I will be talking to all my neighbors and I've already talked to certain individuals that are rather close to me because I'm waiting a little bit because of all the protests and everything going on I don't want people to think of me as if I'm part of them for example yes a lot of people are too scared about the virus going around like Oh some people already as it is don't want to answer their house store it's crazy how laborers don't oh you're gonna talk to each other yep there's signs everywhere in this world that we're in quite a bit of trouble I would say but what I have to offer here is a movement now okay right off the bat okay we don't want to start Colts right we don't want to be on this side or that side we want to simply live our lives and do the right thing objective right thing and it's important to understand perhaps all the different aspects some people will look into it more than others some are more inclined to look into it more than others and I expect that I expect certain individuals to just jump on board if they don't even know much about the underlying foundation to say the building that that's getting that then gets created I'm sorry if I sometimes speak a little different I'm a poet as well oh no problem it's kind of a Tennessee of mine but so you you'reyou're getting at that you have some sort of a project or a movement to launch now how would this operate or work and what is the nature of it yes actually you said it right there it's a blueprint I would consider so a lot of people in the truth community I have a lot to criticize of the independent media community actually a lot of people in the truth community they generally know what has to be done and like you say why is a very important question it gets to the root cause it's how we get to the root cause but I just said it there I also said how how is a very big question in my opinion because we don't typically have a blueprint or one unifying blueprint between all the independent media is that can bring people together at least in one counter agenda against the main agenda of course by the elites so what I'm offering here is generally a unifying one counter agenda you can say it's pro-freedom Pro truth Pro humanity these are things that hopefully the whole world can agree upon I know Alex Jones even said to you aren't when you were on his show that natural law is more of a unifying field theory and that's exactly what the natural law often is my view of it at least and I even have on six-step speculation on the website of this movement I created Nita dot one and ITA dot o ne in case you want to pull it up or look at it the front page is all you need to know this is the one underlying printed premises which I call it the foundation to which everything can stand you don't change that through time because that will cause problems this is the underlying foundation now of course I expect you to criticize I know that there's words that perhaps could be changed I like I always liked how you're very particular with their word usage because it's very it's very important to be on point especially especially since I'm in the health field I see the scientific point of view often little more left-brain I tend to over complexify things sometimes I also eat them I also like the spoken word because it allows you to refine concepts over time by speaking to someone oh right I have not preferred myself the printed word as a medium only because traditionally this knowledge was taught from mouth to ear and the written word is very static whereas the spoken word is living and once you put it in the printed form it has to be so precise and exact okay so one of the things I find is texting is imprecise text messages for example if I you know want a task done I often have to send multiple multiple text messages to refine exactly what I am asking for in a task whereas if I just pick up the phone and call someone I can explain to them relatively click quickly what I need and we can go back and forth until we refine the idea and get it down to its essence and then it's understood better so you don't have to say to me that don't you know don't take it the wording as you know definitive it is exact because I already write I fully understand that and I understand that that is the challenge with printed word which is why I've made video and audio the medium for expression here at what on earth is happening because I think that people learn well I'm not discounting the power of books or printed word and in many cases when you don't have digital technology available you have to go back to the printed word and paper and that's very important to keep those mediums going but I think it is a much more powerful learning methodology to teach online via video and audio rather than having people have to interpret things via the written word there are many people who learn good with reading learn very well with reading I should say but to me for me the actual vibratory energy of the spoken word is where the real communication of first principles occurs in a deep fundamental way it's not through printed word exactly and that's what I'm doing with people too one on one is talking to them directly and I encourage other people do the same I don't call that people who do this either as leaders I call them guides you know part is part of being a quote unquote health coach is sort of here with this movement is kind of bringing everybody to be their own coach because I believe everybody should be coaches of one another right everybody has a social life so it's part of a crucial part of their health sure but we can all guide each other in the right direction we don't tell people what to do right and we see all the repercussions of that on all the reasons why we don't don't want to go into detail with that exactly but you you mentioned so many good points there and then you also mention nature right you mentioned looking at the nature as to why somebody does this and why somebody is that or nature as in some people like to refer to it as their God it's a universal religion if you will so this movement is called nature is the answer and so I do have labels behind this sort of underlying ideas right and generally speaking I have a process to this I even have diagrams that I could always share with people and I wouldn't mind showing my face in person also since I've also done that my videos I feel like it is more personable and what its gonna be the most guiding force here is actually using a human nature I'm sorry if I'm using up too much time no it's okay I'll try to make it Cory what I what I want you to do is give your site to people again and here's what I'm gonna do I'm gonna check it out myself and again we are building an active network that is going to be coming up if we can get the right programmer webmaster coordinator we're interviewing for that right now if we can start to build out this operation you know called the one great work network you're the kind of person that I want to come on the network and you know who has projects like this too you know either maybe you know highlight this maybe do presentations or or vidcaster or even just audio podcast we're going to give content creators a part of the platform of the one great work network to stream things that they want to stream in you know their segments weekly and then also be content contributors to the website and we're going to try to endeavor to keep it free we're gonna try to just do this and have everybody contribute and build a community that way that's part of what on earth is happening you know ways that we are going about building bridges between people and and spreading the word so um let me take the give your website publicly again and then let all take a look at it and we could talk about you know the potential for you having you know you know being on the one great work network this is the kind of stuff that I'm looking for folks people who are doing their own aspect of the great work putting it out there publicly and then you know we could all make a huge you know effort of a conglomeration you know a federation if you will of people who are doing this and you know put it all in one huge repository of knowledge and you know stream at all 24/7 you know where everybody would have a little bit of time each week to contribute and make it a 24/7 streaming network that's my vision for it anyway in the near future so go ahead and do that and then I will go to some other calls but I want to thank you for you know taking time to put an effort like that together and explain it to people so tell where they can find your site thank you that sounds beautiful the site is an ITA dot oh and II need a dot one and that's for nature is the answer it's the one unifying blueprint I believe by the way this is the most universal most unifying way we can bring together humanity and transition them from the state they are now to the perfect state of freedom or the closest thing to a quote unquote utopia which is simply living in accordance to nature that being the natural law natural medicine and all things of such well said I mean that's really what it's all about that's the ultimate goal Cori thank you so so much for you know all of that in your insights and your efforts you know that's what doing the great work is all about so yeah thank you - absolutely have a great one see that that's that's it folks you know it's it's about getting involved it's not about sitting on the sidelines in watching other people and just patting them on the back and going great job man great job you know that's not gonna get us there you know not gonna get us they're getting involved with courage and right action and putting it out there publicly is what's gonna get us there so let's continue with your calls for the duration of the show let's go to Sean McCann Sean you're live on what on earth is happening welcome my friend another mark thanks for having me on again I appreciate you being on the on the air these days it's critical to have a voice like yours thank you so much huh I was calling I'm glad you mentioned the Nazis earlier because I had kind of a history question well if I know the answer I'll do the best to my ability to answer it if and then if I don't know I'll just tell you that I don't know and we'd have to research it further so if you want to go ahead and ask anything yeah that's that's fine well with the chaos and loss of economy you know the the powers are collapsing on purpose I you know I've been looking into other things and someone from the what on earth is happening discussion group Facebook mentioned to me a term called the black awakening and it relates to satanic ritual II abused trauma victims that are in the cult and still intact with their programming people like sirhan sirhan or like Dylan roof or the other individuals that seem to all of a sudden they just go nuts you're talking about like potential Manchurian Candidate type people that could be acted in a given moment exactly like a super soldier type program where they use trauma to enhance the abilities to give multiple personalities and this there's a the term came from a gentleman called russ dizdar who is a it's kind of famous in the christian world research he's formerly a police chaplain and he does exorcisms and he's discovered this cult of programmed SRA victims that believe that they are they're programmed and they're demonized they invite demons in with Richard so you're not talking about demonized with other people you're talking about infected with potential demonic noncorporeal entities right like they create a personality that and then they invite in with with SEC you know like with ritual magic basically and that you know and this personality is hidden under the layers and can be called up like a Manchurian Candidate you know so you have supernatural abilities and the the cults name is the cult of the black flame well the black flame lacks it very well could yes I certainly know about the Black Sun ordered that black flame was actually the name of the Church of Satan's magazine which they put out on a monthly or bimonthly basis and I don't know if that's even still around but you know had several issues out back in the 90s and maybe early 2000s but um you know they definitely use black fire and black light as part of the symbolism of Satanism and that is because light and fire have been traditionally used symbolically throughout pretty much all esoteric schools of thought and cultures to represent knowledge carrying the fire of knowledge as you know depicted in the the Statue of Liberty for example the Sun as being a symbol of light you know which the bringer or bearer of light refer is referred to as Lucifer which is a dual aspect of light one could mean simply bringing the light of the Creator and one could mean trying to take that knowledge into oneself but then wielded for nefarious purposes of control and manipulation which is again why they call that aspect of the Black Sun or the the dark light etc so these are certainly hints symbolically that these are members of the dark occult regarding demonic possession slash inhabitation that is not my forte in work of exposing the occult or even really studying it I know I've looked into it a bit however go a shit magic Solomonic magic demonic and or spiritual summoning is not what I specialize in or focus on in my work I would pretty much suggest that if you wanted to ask more or any in depth things from a personal experience the person who might have some experience with more knowledge about that would be Jay Parker who hosted public shows on the revolution Broadcasting Network yeah Jay host two shows a week so he may be a little bit busy but I could try to put you in touch with him or you could call into a show if he takes calls so um you know that's yeah or just even just as I - Russ that because Russ believes that this only goes back four generations so like 1930 and I'm convinced may be that particular method might but I'm telling you that's yeah it's different right in a different form this is all part of the ancient cult that has been running the world since time immemorial exactly yeah for sure I believe so as well and that like it's good to hear your confirmation that because I tried to bring it up to Russ and he's like you need to prove that and like I told him about how I heard Jay Parker personally say saying to pre-fit his dad was saying the proof from the ancient world is like trying to say I I want you to immediately prove how the pyramids were built well you know you're not going to they're not going to prove that because much of it is much of that knowledge is lost to these stretches of time and or hidden deliberately by secret societies right so it's going to be very difficult to quote-unquote prove that fact what you have to do is research whether there is evidence to support that and then apply the Trivium method to all of that research and guess how long that takes it takes many many years of dedicated research to do that all I do here on what on earth is happening is basically present my findings I've barely shown people my research see that's the whole thing I'm an aggregator of knowledge and then I pour through it and present my findings regarding all of that data if I sat here and went through everything that I studied as data to support my conclusion we would be here for the 20 years that it took me to reach those conclusions see that's what the whole show would be so you know I'm just encouraging people to start that that field of study on their own and then you will be able to prove it to yourself you'll be able to prove it in a way that is at least removes reasonable doubt will you prove it unequivocally where there is absolutely zero room that it happened any other way probably not I'm not going I'm not going to say you're going to reach clinical proof like that I'm going to say you will reach a reasonable conclusion based upon reasonable collection of evidence like I believe Jay when he speaks oh yeah I put Jay is he's really good Jay has told me and in the past has told me and barbed things that he I mean there is no way that it's not the case just you know just just say I you know when somebody's telling you something that they experienced based on their emotional state and I'm telling you he knows what he's talking about regarding what these people do they're sick and they're sick Jay describes seeing his father turn into a demon is she changed you know what I mean so I believe based on that that his father was probably demonized by his you know traumatize errs and they definitely do traumatization through torture techniques to their own children now again you can look at it from a perspective of is that actually happening in the 3d space Jay could have been objected to substance during that or it could have been no substance and they really can call forward certain types of energies and if you look into David Ickes work everybody like busts on David Icke for you know saying oh there's a reptilian aliens that could inhabit people it doesn't necessarily mean that there are 3d physical reptilians they could be noncorporeal entities that people have talked about as subtle beings in some cultures they have talked about as jinn in other cultures and in our culture we look at them as alien beings and they could inhabit the consciousness and then control behavior from inside the consciousness of a human being that's absolutely possible because consciousness is a frequency it would be like taking over the communications band on some type of a communications device taking over consciousness and then controlling behavior where our body is somewhat like a computer you know good have you heard of Jerry Mars in ski I have not he was on he was on Freeman's show like twice he is a psychologist who worked in mental hospitals and he believes that people that are schizophrenic and hear voices are actually I don't put a panic date I don't put things like that outside the realm of possibility because who knows how the mind and frequencies that we can pick up really truly work you know psychology physiology you know biochemistry these aren't total exact Sciences you know they're what we study as much about them as we can and we learn and we add to that body of knowledge but we don't really truly understand how consciousness works you know this is an ongoing study of human beings in our experience here in this dimension of existence so this dimension is like the key thing that if they are in another dimension they want to come in play but they don't have a body right so they have to right take us oh sure and then they could be happy who knows they could be hacking the space somehow you know exactly there's a lot of possibilities that I do not eat disease energy they drain energy out of schizophrenic like like flute like food yeah that fear and and chaotic and you know the type of energy where people are confused and displaced mentally emotionally psychologically you know like a like a a drug that is not a psychedelic but it is a dissociative putting people into that type of a dissociated fearful state could be an aspect of nourishment for them who knows I mean a lot of researchers have speculated on that and I would not again discount that as being outside the realm of possibility but you know again actual demonic possession / entity in habitation is not my area of forte it's not my area of expertise I'd suggest you talk to Jay

Parker about that and see what he has to say on it although I'll tell you that I don't dismiss it or think that it's impossible and I know a lot of a cultist certainly believe that that is the case and true and certainly try to leverage things like that and incorporate them into their quote unquote skill set or you know you know ability agility agendas and ability set yes they believe so just just to just a cap off with the black awakening is so these people are in society ready to be triggered and suddenly they get triggered on purpose by this cult of the black flame and then they they cause chaos and violence and right this is gonna tear down the old drum up a call for more control and get this under order get this under control yeah well this is it sounds like the extension of MKULTRA projects where they want to you know use the mind-control techniques that were you know garnered and learned during the MKULTRA project which is really still ongoing and then put that to work in civil society to strike more fear put create more death it would be a ritual of death and it's certainly a possibility I'm not telling people to totally be afraid of that potentiality and work yourself up into a frenzy expecting it but certainly that could be a possibility I mean you have to psychologically prepare yourself for a lot of different possibilities I look at the purely electronic agenda how do we know they're not going to turn on certain frequencies that are going to actually be able to physically control the behavior of certain people not just influence it but control it that's part of what researchers in MKULTRA were working on like his Jose Delgado etc you know you ain't doing cameras right they were trying to physically control behavior through electronic means what if they figured out how to do that wirelessly that people will say oh that's fear poor or fear mongering no that's a very real possible technology that is being worked on and or they already have waiting in the wings am i telling people go nuts being afraid of that no giving in to fear is never the answer folks knowledge about this stuff and its potential is the answer and then you prepare yourself psychologically and physically for whatever may come it's knowledge is the answer in all given situations because knowledge is ultimately what dispels fear and and builds up courage within the individual most people who are in a state of cowardice are not in a state of knowledge that's why they're in so much fear and then they don't act rightly you have to get the knowledge which dispels the fear and instills the courage and then we'll get to natural law that's really the process internally that has to take place and guess what most people don't have the knowledge or they have bits and pieces of it you know Shawn I want to talk about just a brief aspect of that before I take another call so great points I'm gonna let you go and I just want to talk about this not this aspect of knowledge and courage because this is it folks there's so many people who are half where's and it's sad there's people who just don't have all of the information that they need and they think they have all the information that they need this is the problem again drink deeply or don't drink from the period spring the fount of knowledge in ancient lore if you're going to bend over and drink from that spring drink deeply take it in to the extent that you are capable of taking it in don't stop until you have an enormous amount of data at your disposal that you are going to pour through weed out the logical inconsistencies from and come to an accurate conclusion about most people have not done that and are rejecting knowledge that conflicts with their pre-existing belief system no one can accuse me of not knowing that and folks look I think next week what I might do I'm gonna I want to do a show about how evil police are okay that's that's coming on a future show another future show is I'm going to show people the database of knowledge that I have amassed and pored through I'm gonna actually try to show you the amount of data that I've downloaded from the internet over the years I'm gonna actually open my digital catalog I'm not just going to show you you know the case is that some of the discs that I backed up the data on ophthal optical discs are in I may show you that as an example but I want to show you the actual files digitally because I have them catalogued in a digital database whereas all the files could never fit on one hard drive clearly but I have them digitally at least catalog title and what disk they are on and I want to show you that catalog file so you could see what I'm talking about of what I've collected and I want to also I'm going to qualify that that's not everything I have because I have other hard drives where things are backed up because I have not been making optical discs backups for the last several years I've been storing it on either good quality magnetic hard drives or solid-state drives which I really shouldn't be doing I shouldn't be trusting the data to that I should be continuing to do you know decent blu-ray optical drive backups or something to that effect or even possibly at some point tape backups but the whole point is I basically have them as optical discs an optical disc catalog they're cataloging and then I have another hard drive that's you know pretty much loaded with more stuff that I have in catalog since I sort of stopped cataloging optical discs so I'm going to show that to somebody in a future edition to show you how much knowledge I've amassed and gone through a good portion of it the majority of it I would say and um you know that's the thing is people just think that this is a part-time thing and you could just quickly get the sound bytes and get everything you need and I'm telling you that's not how research works so you know for the people that want to not you know say that I'm not some kind of a deep researcher I'm going to show you how deep of a researcher I am and it's to me it's actually almost frightening I've used that term before because it makes me almost think of myself as some sort of a machine how absolutely brutally unwaveringly dedicated to knowledge information and truth I have been and how much time of my life I have taken to do that you know and I'm not bragging by saying that I'm just some saying what's true most people don't do that they get a little bit they say I got to figure it out and then they like don't don't bother me with any more because I'm done with looking in a new knowledge okay and I'm telling you that's one of the most dangerous things that can be done and this or any other community is thinking that you know enough see when I have conversations with people who absolutely have not studied some of the things I've studied and they start talking it's literate let me tell you what it sounds like and I know other people will relate to this and some people you know can't really relate because they have not really taken in the volume of knowledge that I'm talking about but it's like hearing somebody it's like you being a total mathematics professor and somebody's saying you know two plus two is six mark and since I've applied the method and the learning of two plus two equals six I mean I see the world in a completely different way and you're looking at them like this is this person is completely off and they think they know and they think they've gathered the knowledge that they need to understand and they're building things upon a totally erroneous incomplete foundation you know that's what incomplete knowledge will get you and I'm telling you there's tons and tons and tons of people who are doing this right now because they don't want to take the time of full knowledge that's gonna be required as a sacrifice of your life probably your money probably other things you want to do probably relationships and nobody wants to do that they want to say nope sorry I'm good I know enough and I'm telling you no you fucking don't you hardly fucking know a thing and you think you know and that's a dangerous place to be so let's go over to Brandon Brandon you are live on what on earth is happening welcome to the show thank you Mark and I just want to say that it's so great to have you back and I think that the news that your mother as the wake now is great because synchronistically my mother also awakened to all this and she said basically the same things to me you know everything you've been trying to tell me I see it now well I'm gonna just qualify right I'm saying that my own mother is awakening it's I would not say it's at a full level of being fully awakened embodying those 20 things that I talked about in streetwise spirituality which I consider someone being awake but guess what it's great thing it means that process has begun and she is no longer you know rejecting truth and sees the control system and wants to sort of understand what is happening and is asking questions and is you know beginning the process of looking into things for herself that does not mean by any stretch of the imagination that she's gone into that level of deep knowledge which I'm referring to but at least she's not cutting herself off from that through a process of willful ignorance so that's where it all has to start and I'll take I'll take I you know she doesn't need to be a master add depth in in to two months you know I'll take that because before that process of awakening wasn't occurring and now it finally is so that's a very good thing Capital G capital T good thing yeah I agree it's a stepwise process it's and a good thing she's on that path and that's what I want to talk about was more good news since the last time we spoke I spoke to you at the teaching natural law seminar since then I've taken my website which is more laws more problems calm and have added much more to it I've added a video section and I've been doing a lot of different videos and I was actually in the middle of doing a video in regards to it was kind of like I was looking at the end of the world prophecies and different religions and I was saying are we in those times and and then the pandemic happened so I'm like hey I think I was that's pretty close to my predictions everybody but since then I've done some interviews and I'm working on some more work and I just wanted to thank you for all the stuff that I learned in that class because it was it helped me a lot especially with making the videos and just putting out the content that's fantastic I mean and again that's great to hear that's what we need more of you know this is what it's about folks this is what this show is all about we got the best callers we got people who are already teaching natural law this is what the great work is to do it is not to sit on the sidelines and watch other people do it and Pat them on the back and say great work carrying all that weight help us get involved be brave be bold be courageous use your own name you know we have to get out there and just say I'm not afraid of this system whatever happens to me happens I'm gonna speak the truth I'm gonna speak it loudly boldly proudly because it is the truth and put it out there for other people to understand that's it you know so you know I thank you for doing work like that and again we need more people doing this just like that and you know hey stay in touch and contact me regarding you know a spot on the one great work network we want to expand this again I'm telling you look this network could be a great thing if it if it happens okay we want people like Cory we want people like Brandon okay we want people who you know put their material out there for others to see and are actively doing the great work we have a list of people that we're going to invite onto the show okay but we can't make that network happen without help we need a great web developer to say I'll be the webmaster of the site I'll be the coordinator for the site you know who knows his skills inside and out and you know can take on that responsibility and contribute as a a person involved in the boots on the ground war for our freedom that's what this is you know so when we get that we're gonna take off with this network build this operation out and make it something truly special and unique and you know there'll be problems there'll be technology issues you know that's how everything is when it first starts starts out hopefully maybe we can build it into something even better and better and you know get get smoother with the technology you know again you're gonna see issues come up and people have to deal with them and that's what the struggle for doing this is all about you know it's um it's uh you know you have to struggle to improve you know and that's all that's part of the job so let's continue on and let's talk to Ethan Ethan you are live on what on earth is happening welcome to the show hey Mark can you hear me yes I can I don't know where my earbuds went they were right here and now they're gone um but you can hear me okay yes I can you're coming through loud and clear okay excellent so yeah it's good to hear you back on the airwaves here I'm sure you needed the break that you know I'm glad that you took it for yourself really looking forward to the documentary I just put down the low tier $50 contribution to that a couple weeks ago thank you yeah absolutely and you know I'm gonna throw some more money your way eventually because these are tough times and you deserve it so I buy sheet that thank you yeah so I don't have any questions right now but I just wanted to say a couple things one as a result of what's kind of been going on in the world in the u.s. been feeling a lot more inspired to you know take some action stuff went out yesterday handed out some fliers for the exposed Bill Gates day of action talked to some people nice that was even let me ask you something briefly do you have more people being open to talking about these types of issues and sort of slowly opening their eyes to it or do you see them doubling down and going into deeper willful ignorance I actually believe a little bit of positivity that more people aren't at least talking about these things and being willing to listen what do you say Oh from what I observed yesterday and then just kind of being active in sharing stuff on Facebook honestly I've been surprised at how many people that I didn't expect mainly pertaining Facebook would be of the mindset to you know consider these things particularly about Bill Gates and write his agenda it does not what it doesn't seem like people are at least willing to hear people out and listen it's like that that you could tell there's something in the back of their mind that is going to them saying to them now this isn't right something's off and we're not being told the truth about this situation and we need to take in some more information to understand what's really taking place seems like people are at the very very very forefront of that it's not going in any kind of a deep way yet but they're at the very surface level of just getting that and things aren't as they seem mm-hmm yeah just as an example that was just a good surprise to me you know I had shared some content yesterday on Facebook and of course I had a couple people one of them was a family member of mine a cousin that you know came in and kind of on a subtle level where attempting to shame me and dissuade me from sharing the information and claiming that it was fake news and this kind of thing and the good surprise that I had in in that was that for every one person per se that was had resistance to it I'd have two or three people come in that I didn't even expect would be supportive of the information and they'd you know comment back and say oh yeah whatever like you know this guy clearly doesn't have a broad perspective what's going on and they were supportive of me and my stance on it so that was really good to see and then when I was out on the street handing out fliers and stuff I'd in the small town in Washington where I'm currently located there was maybe a 50 to 50 ratio of people that were receptive to it and people that weren't so well Ethan what I'm happy to see is again we're seeing people who are actively engaged right he's going out there putting the word out talking to other people publicly handing out flyers etc this is all part of it every step to move this forward it makes a difference okay so again that's what I love to see I like to see active engagement not just sitting back and say you know you know let me learn and all I care about is whether I know or not he's making in our educational outreach to other people so Ethan thank you for doing that and continue that effort and uh you know hopefully that even you know expands out and you know this is what I want to see this is what I think everybody in this movement should desire to see that we should be seeing people who are getting actively involved sitting on the sidelines not talking you know just what other people should do or what the the state or its agents should do or not do we should be talking about what are you gonna do what am I gonna do you know that's it turn the finger out from this to this and say what am I gonna do that's it that's what you guys have to ask yourself so I think we have just a very little bit of time Ivan from Phoenix you could take us out man how you been is Ivan there you're unmuted on the server end no all right let's go - lets go - paddy lager paddy you take us out how you doing I'm doing great mark can you hear me okay yes I can we are very limited time so what do you have for the end of it for the end of the show well I just wanted to thank you for coming back and I want to give you my heartfelt sympathy for your loss but thank you you know I love the message have having everybody go out and come up with an idea of what they can do and share that because we need options on this planet because too many people are stuck in this just stupid duality and they're killing themselves so yeah we need to get out there and do the good work without a doubt I mean it is all about what we are going to do as individuals to forward the great work of true sovereignty and true freedom and we're going to do that most effectively if we become teachers of natural law ourselves ladies and gentlemen that is all the time that we have for this edition of what on earth is happening thank you so much for watching my website what on earth is happening calm and remember government is slavery we'll see you right here next week [Music] [Music] [Applause] [Music]

What On Earth Is Happening Show #227

Topics: *The Psychological State Of Police & Their Supporters, WOEIH is 100% donation sponsored, How To Become The True Media Online Technology Seminar review of sign up process and class material, "World-View Violence & The REAL Pandemics" now available in WOEIH Donation Gifts, New WOEIH t-shirts on the way, Mark Passio Complete One Great Work Collection, Mark Passio & The Science Of Natural Law Documentary, Help needed at WOEIH, No Lives Matter to the CULT called Government, Human lives "matter" to Government in the same way animal lives "matter " to meat farmers, Government attracts Psychopaths, control-Freaks, Bullies and Racists, Fake "freedom advocates" who want Police to intervene in a crisis are Cowards who abandon First Principles at the first sign of danger, Psychological Polarization Dialectics to create a world of Masters and Slaves, Psychological characteristics of Police, ALL Police are either Order-Followers or Psychopaths, Psychological characteristics of Police-Supporters, the Chronic Brain-Hemisphere Imbalance of Police and their supporters, Lack of Holistic Intelligence of Police, Police abdication of Personal Responsibility to discover the Knowledge of Objective Morality, Police do not truly "provide protection" for anyone, Personal Responsibility for security and Self-Defense, Qualified Immunity legislation for Police officers, All Police-Supporters are either Boot-Lickers or Cowards, Ceasing and Desisting immoral behaviors IS the Solution, The Great Work of removing false belief systems, the Absolute IMPOSSIBILITY for a Cop to be a TRULY Moral Person, There are NO "Good" Cops, Review of Gang Dynamics from Mark's presentation "Duress Dissidents & Deadly Force," the definition of Duress, No difference between Police and Mafia enforcers, Police are Complicit Gang Members, Police are HOUSE SLAVES, the Moral Culpability of Order-Followers is greater than that of Order-Givers, Order-Followers are responsible for ALL Totalitarian regimes, the Inescapable Moral Logic of Why ALL Police SHOULD and MUST be ABOLISHED*

freedom man that's what it's all about [Music] [Music] welcome you are listening to what on earth is happening this show will discuss the topics of human consciousness mind control natural law the occult and all issues that affect the freedom of the people of Earth what on earth is happening will endeavor to shine light upon the darkness of our world and to offer empowering solutions to the problems we face as humanity approaches its critical moment of choice and now here is your host Marc Pascoe [Music] welcome one and all you're watching what on earth is happening I'm your host mark passio my website what on earth is happening dot-com ladies and gentlemen government is slavery and here on what on earth is happening we are ending slavery one mind at a time welcome to the show everyone thank you for tuning in today is Sunday June 21st 2020 and this is episode number 227 of what on earth is happening today's show is going to be called the psychological state of police and their supporters and we'll be getting to that in a moment first want to reiterate a few things I want to let everybody know that what on earth is happening is a show of cumulative information this means that if you're a new viewer or listening listener to the show you should not start here you should go back to the podcast archive on what on earth is happening calm in the podcast tab or section and you should listen to the show in order starting at show number one because this show is show 227 and that means it's built upon the previous 226 episodes so it's cumulative information and everybody should know that this is a tapestry of information so if you are new to it you should start with show number one that being said we could in a moment switch over to the slides for today's show I'm getting them ready and you could switch over okay this is the artwork for today's show again entitled the psychological state of police and their supporters and this is going to be the actual topic material for today but as with the last couple of shows sorry I have a little bit of an itch there and I apologize for that as with the last couple of shows folks I have a couple of housekeeping announcements because there's important things going on here at what on earth is happening and I also want to say that people have to understand that this show is entirely donate supported and therefore I am going to tell you and keep people abreast of what we have available for your generous donations now we have a site set up called gifts thought what on earth is happening calm where in return for a donation to support the cause of what on earth is happening you can choose through a shopping basket a host of different gift physical gift items so new in gifts in the gifts area of the website is my most recent presentation called worldview violence and the real pandemics we are now making that available exclusively in gifts on flash drive and DVD so this is what the flash drive and DVD look like I originally gave this presentation at the other perspective of reality conference that was hosted out of Madrid Spain a couple of weeks back actually last week and it went really successfully and I think a couple hundred people digitally attended the conference so very good success for a first conference effort I want to thank Nuria for hosting it and inviting me to speak and I think people will find my worldview violence and the real pandemics presentation very hard-hitting that being said let's move on to the next item of course still we are still accepting donations for my premiere documentary effort called mark passio and the science of natural law this will be my first full-length documentary film that we're going to be releasing toward the end of the year it is coming along fine it is progressing at the pace that I am expecting it to progress out which is we will release it when it is completely finished and polished to my satisfaction and that is all anybody really needs to know about the release date right now you know it will not be rushed it will not be released half half-baked okay that's what people should know about this film but let's go back to the slide regarding the donations help support the documentary we have five donation tiers on gifts 100% of all donations go directly to production costs whatever is left over and not used for production costs at the end of you know the actual production of the documentary is going to be put toward creation and distribution of flash drives and DVDs for the documentary all donors toward the documentary who make a donation will receive a complimentary copy of the completed documentary on flash drive and DVD you can make a donation at gifts thought what on earth is happening calm new t-shirts are coming to gifts we have finalized all art and put the order through with our silkscreen company that we use here in Philadelphia and they are working on the order so they should be coming in very shortly I don't have an exact date when the order will be fulfilled but it will be soon and we have long sleeve designs coming as well a lot of people have been asking for those the complete mark passio one great work collection is available this is a relatively new item I'll probably at least be advertising this until maybe my tech seminar begins in early July so this is all of my publicly released work all of my presentations all interviews that I have done whether audio or video all of my audio and video podcast series of what on earth is happening my punk bands the founders no masters no slaves EP and this is all on a very small ruggedly built SanDisk 500 gigabyte solid state drive that has both USB C and USB three connectors I'm actually going to ask my producer to go ahead in to my office and get this Drive I really like to show a physical copy of it to people while on the air so we could just switch back to the slides and leave it there I'll continue forward it's in the blue drawer underneath the DVD duplicator thank you with that being said the Ark Drive is something that I've been offering here on what on earth is happening pretty much you know for the past at least five or six years and the arc Drive is an offer where you ship a one terabyte hard drive to me and I ship it back to you filled with all of my research data okay there's on the ark drive it consists of right now about 1,800 video files 8,000 digital books in the form of PDF and epub documents and about 20,000 digital audio files in the form of mp3 and mp4 audio files all the details for this are available at what on earth is happening comm / arc and as I've been mentioning over the last couple of weeks arc 2.0 is coming soon which is eventually going to be a 2 terabyte hard drive offer so I'm still working on that I tell people I have about 80% of it complete I am working on that when I find the time to fill that drive a 2 terabyte drive up and I'm almost completing that task probably another a couple of weeks hopefully we'll see how that goes but I will be announcing here on what on earth is happening when Ark 2.0 is available to the public now let me just come out of the slides and let me just show people this really quick this is um if we move to the front camera yeah this is the case for the mark passio one Great War Collection Drive okay it comes in a nice little hard carrying case okay and I'm gonna open this up and show this to everyone zipper was already open okay we have the USB cable in there and here is the actual drive so if you take a look at this this is how small this drive actually is I'll show it to you in my hand beautiful little solid-state drive we have a little key chain that we attached to it with a description of what's on it okay as you can see there alright and then there's a little cable that plugs into the bottom of the drive like that for attachment and this is a USB c3 can they're there but if you have the more modern Thunderbolt or USBC connector you can hook it up with that new standard which is USB C so this is what you will be receiving if you donate for the Marke passio one Great War Collection will show that a little bit even closer in this camera here there it is and this is the SanDisk drive you can see how tiny that really is look at the the thinness of that okay and these have no moving these are no moving parts these solid-state drives this is electrical solid-state storage with no moving parts so there's no magnetic platters in there so it's very rugged you know this would survive any type of a fall or jarring much more rugged than a standard magnetic platter based a hard drive so I just wanted to show people that physical item so they see what they will be getting for their donation in the gifts area if they do decide to go ahead and get the mark passio one great work complete collection there it is No thank you for that Mike alright let's move on I have announced over the last couple of weeks that we are accepting enrollments in a online technology seminar that I will be hosting it is called how to become the true media this is the full extension of my teaching natural law workshop that I gave back in the fall of 2019 and it is an intensive 23 week long 23 classes 3 hours per class of an online technology seminar I'm going to be hosting that on the zoom video conferencing platform and there's limited space and let me tell you something folks the the spaces are filling up and we're going to have to close enrollment relatively soon it might go all the way through for the month that I planned it but I'm thinking we're gonna close it before July 4th so if you haven't enrolled yet you don't want to wait until the last minute that's all I'll say about that this will be hot happening Tuesdays from 8 o'clock p.m. to 11 o'clock p.m. Eastern Time that is to allow for all the time zones particularly in the United States to be able to attend and we are starting Tuesday July 7th classes will run for 23 weeks on each Tuesday for three hours until Tuesday December 8th I announced incorrectly that it would end on the 15th last week the last class will be Tuesday December 8th that's a total of 23 classes enrollment is $523 93 cents personal donation you can enroll at gifts thought what on earth is happening calm and I want to go through the skill sets but before I even do that I'm gonna jump out and go into my my web browser because I want to show people you know the actual enrollment process so if you so we can cut back to my web browser and if you uh this is what on earth is happening calm I'll make it slightly bigger okay if you go to the gifts area of my site if you click the gifts tab and then of course you know I'm just letting you know how we handle donations and you say yes I have that donation available let me just go to the front page okay and on the front page you see online tech seminar if you click that this will take you to the item if you click the item this will take you to the description page where you can add it to your basket okay and I just want to show people the description I can read this this skill sets they're gonna be taught here okay we're going to be teaching basic operating system skills we're going to be teaching file systems and disk formatting and that's also gonna be about you know how to prepare hard drives if you want to copy data for other people to them file and folder management or the hierarchical file system the HFS i'll also be teaching disk backup how to backup your data that'll be part and file and folder management and HFS skills workflow and best practices word processing and publishing internet and networking basics how to search the web and dark web we'll be talking about how to get data via what you could call the dark web so things like BitTorrent and other methods of downloading peer-to-peer graphic design and publishing print design and publishing how to build presentations dynamic presentations like we give here every week on what on earth is happening audio editing and publishing video editing and publishing web publishing possibly getting into how to build static pages some dynamic pages maybe some content management system if we even get into advanced areas of web publishing like that video conferencing sharing via cloud services and media hardware and equipment so I want to just read these caveats here please note this seminar is private by invitation only so this is not a publicly available seminar you are receiving an invite to the presentation for your private personal donation so this isn't a business or anything like that we are giving a private invitation to attend if you give us a private donation to help us advance our efforts here each personal donation is for one student invitation to the seminar each student must enroll separately okay now that means that you know if two people want to take the class there they should give an individual donation I can't stop anyone from you know bringing a bunch of people in into your home and sharing the seminar on your your personal computer and putting it through public no public speakers in the room if people want to do that they can do that but I'm just saying here that you know we're basically making it available for each person making a donation in return for your personal donation you'll receive a personal invitation to attend the online seminar these classes are hosted live and will not be recorded for later playback if you cannot attend in live time please do not enroll people have been asking that question we are going to offer this as a live personal class that I am giving to you I am your personal tutor in all of these skills so it is not intended for playback at a later time it is intended that you take see what we're trying to weed people out honestly if I may be honest with people I want to see the people who have the commitment to do this with their time it's not about what's more convenient for you and I'm sorry just to say it that way you know but actually sorry not sorry okay I am looking for people to make a personal commitment to this work you have to understand if you're going to do this work it is going to be a sacrifice of your time and effort and what you want to do in other areas of your life and that's just the way it is okay so we're looking for people to make the commitment with their time and resources and that's so that's deliberate okay why we're not going to be offering it as a download okay if you want to attend you have to attend live so if you can't make the live attendance do not enroll okay the only computer a lot of people asking about what requirements do I need for my computer it's very simple there's only one computer system requirement to attend this seminar your system must meet the minimum requirements for the zoom the zoom client software and that you can click that link there and get all of those minimum requirements pretty much I'm trying to reassure people by saying if you have a relatively recent laptop or desktop computer you'll be fine don't worry about it if you're if you're running Windows XP on an ancient ancient ancient Windows system it's time to upgrade anyway folks you don't want to keep honestly I know I hear a lot of technological Luddites out there that are like oh never upgrade anything stick with exactly what we're what works at a given time it's bad practices it that it's terrible in the form of security you're asking for an exploit to be you know to get hit with a security exploit and get your shit stolen you're just asking for that okay and I know guess what in this community it's not a popular opinion okay I happen to be a tech expert and know what I'm talking about okay terrible practice to run with ancient ancient hardware and software not a good practice okay if you have an ancient computer and you know your computers ancient it's time to upgrade okay what if you can do that monetarily but if you have a relatively decent you know computer that isn't some sluggish paperweight okay running an ancient version of Windows or ancient version of Mac OS you're going to be fine and you don't need to worry about system requirements okay all you need is an high-speed internet connection okay no dial-up connections obviously okay you get a high-speed internet connection and you get the zoom client and that's all you need to attend okay I hope that answers that question permanently I can't see that yeah yeah I think actually the zoom client if you click that link it runs on systems back to XP so you know they're really supporting ancient systems okay yeah so if you want to get my attention like that write it in a big marker there's a marker in the drawer in the other room because I can't see pen that's too far away okay a short time after you have completed your donation to enroll in the seminar you will receive by email a link explaining how the class invitations and virtual classroom environment will work along with a link to download the zoom video conferencing client software if you have any questions about this enrollment process you can send an email to true media at what on earth is happening comm that is the email where we are fielding questions or concerns about how to become the true media seminar true media at what on earth is happening calm alright so that's pretty much it I'm gonna step back to my presentation slides and we're good there or you can switch back over to the slides thank you alright let's move on we are still looking for help here at what on earth is happening and you know you know what again we I'm getting a lot of not a lot but from certain places you know blowback for going over this these housekeeping things and I just want to say folks I'll move in my own pace with these shows I'll talk about what I want to talk about and if I want to go over help in donations I'll do it this isn't your show you're not going to dictate what I do on the show I don't care who you are what you've contributed okay the bottom line is I determine what will be shown in what time it will be shown on water on earth is happening and if don't like it shut the fucking show off how about that at the risk of losing my audience quite frankly I don't give a damn what anybody thinks about the pace that I go over things I'll get some of the content when I get to it and I'll talk about my housekeeping for as long as I want to talk about it so if you don't like that toughest fucking nails okay let's just say it just like that to people so you put your big boy and big girl fucking pants on and you understand this is my show and I'll talk about what I want here okay you know I'm tired of the entitlement and making demands you don't know what we do here you don't know how we suffer here to do this okay and I thank the crew for their persistence and tenacity in getting things done I know I'm not always the easiest person to deal with and guess what we we force our way through it by an act of our wills here and I appreciate every bit of it okay people may you know I may express it differently than some but know that I feel the appreciation that being said we definitely need more help here we are busting our ass to do what we do okay so we need help in the fields of graphic design video editing web development and certainly technical support folks I could barely prepare for the show today I'm sitting in the studio trying to get my mind mentally prepared and my slides already in transition make sure they're all ready to go with my presentation and we encounter a tech problem where there's an Ethernet cable that's frayed or damaged and the end isn't crimped properly in the cables falling apart and therefore one of my cameras isn't working because we use NDI for network camera support and you know I know that's Tech Talk and most people won't understand it but I had to sit here and don't make an Ethernet cable myself because you know I know how to do that and I know how to make and crimp the cable I have to do that in in the time I should be preparing for my show and sitting here and getting mentally prepared you know instead I'm wrestling with tech problems that's not what a content creator is supposed to do okay so we still don't have that in house help because people want to sit back and watch instead of actually do something and it's sad it's sad and I'm gonna keep hammering on it and if you don't want to listen to it help me get the help that we need in here and then we'll have the help that we need and I won't have to advertise that we need help and I'm gonna keep asking for it and I don't give a shit who doesn't like that this is what I take time to do I'll take whatever amount of time I feel is fucking required the end okay so we need help and these are the fields we need help in preferably here and the only one that really can be done remotely is the web development the other ones you've got to be local in Philadelphia if you can help send an email to Leah that's my assistant Leah Boone Ellie iha at what on earth is happening calm you could also go to what on earth is happening calm slash help it's a whole new tab that we put in the website the help tab and you will see these positions you know are still there and you can click the email to send an email to be considered all right let's jump into the material for today I'm gonna review a little bit from last week and then jump into some new stuff so as I said last week we had a whole section called no lives mattered matter to the cult called government this whole debate about which lives matter you know all lives these lives these other lives folks it's all a moot point if you haven't figured it out by this point in time yet the government doesn't care about you your life your safety your concerns it won't it's only there to control and eventually devour you and people still haven't figured this out idiot retards on the streets still haven't figured out that they don't give a fuck about you at all not even a little bit no lie that your life doesn't matter to them nobody's life matters to them except to the extent that they can use you as a resource and a battery to continue to drive their system in their agendas that's it so I mentioned last week to almost tongue-in-cheek I wish I could find that you know Cthulhu slide of no lives matter so I made my own with some great imagery from you know the whole Lovecraftian mythos you know if people aren't familiar with HP Lovecraft you should be ok because it's tremendous horror fiction that is really an allegory about what's really going on in our world ok so you know no lives matter and this is what government is government is the hulking monster you know emerging from the darkest places of you know the etheric regions to devour humanity and the people it's getting ready to devour represent everyone on earth you know the the Cthulhu beast monster of Lovecraftian lore is government and what it's coming for what its emerging from the occult shadows to do is to devour human beings all human beings ok it doesn't discriminate the way brainwashed human beings discriminate and have all different you know race-baiting and nonsense divide and conquer going on in their mindset government doesn't discriminate like that it just sees everybody as their slave and eventually it sees everybody as their food and if you don't get that yet you're not paying attention to a goddamn thing I've said from day one on this show and I know there's still a lot of people stuck in left versus right mindset and politics even those who listen to this show still haven't gotten it fully the lives of human beings as I mentioned over the last week on this show or a really last couple of weeks only matter to the cult called government in the exact same way or to the exact same extent that the lives of animals matter quote unquote matter to meet farmers so this is a government agent this is some sick twisted lunatic from Virginia who is the tyrant that he's standing behind the seal saying 6:m Tyrannis are always this way with tyrants this is a guy who really needs to be at the end of a fucking rope okay who is a tyrant himself you know and there's hell government and it's agency human beings in the same way that a meat farmer sees cattle and human beings haven't figured it out yet they haven't figured out that this trash that calls itself government and says that it's our authorities are no more than human farmers and they don't give a shit about the people that they you know round up and heard in the human form of cattle all they care about is the extent that they can control dominate enslave and eventually murder people because that's what they are in slavers and murderers and if you haven't figured that out yet you're a naive fucking child I'm not gonna mince any words I'm not even care I don't care whether I offend you I'm not here not to offend you I'm here to tell the truth and I'm gonna tell the truth harshly and plainly I told the truth nicely through a couple hundred episodes that's long over not interested in pussyfooting around other people's sensibilities quite frankly I don't care what your feelings are I care what the truth is and the truth doesn't care about your feelings never has and never will it's independent of your feelings it's independent of your consciousness it's independent of your perceptions what our goal and work as a human being to do is to bring our perceptions and consciousness into alignment with the objective truth that is independent of any of us and it's a brainwashing technique that we have to dance and pussyfoot around other people's feelings I'm never doing that let other people do that it's fine if they want to do it I'm never doing it as a matter of fact I already have done that past tense you can look up the way I presented myself on air through the first hundred or so episodes of this show or longer and I held back my true personality I wore the mask I put on the persona like a suit and I'm not doing it anymore ever look I promised myself I'm not gonna get even as fired up as I did last week I'm gonna try to tone it back a little bit to present this information well folks we're long past the time that we should be concerned about hurting someone else's feelings or you know dancing around their delicate sensibilities because they have no backbone or spine you know let's go back to the slides so last week I explained that garbage which is all government attracts human garbage like attracts like according to the laws of attraction it's not that opposites attract that's a misnomer and it's a misunderstanding of the real laws of attraction the real laws of attraction brings similar consciousness together and often unfortunately firewall off dissimilar forms of consciousness which is the divide that we seem to find ourselves in in reaching people with this information but like attracts like in the real law of attraction that's why I'm saying here that garbage in the form of government attracts garbage in the form of human beings that are individual garbage in their psychological makeup government itself is a straight line vector for people who are Psychopaths control freaks bullies racists etc and every other lowbrow form of consciousness every other just piece of dirt trash human beings lowbrow low-rent consciousness that's what government attracts all you got to do is go in any government building a look at the type of people that are in it they're lowbrow trash it doesn't matter what color they are it doesn't matter what educational background they have it doesn't matter how much money they have in their bank account they're low consciousness pieces of shit all of them all of them even the ones who think they're so intelligent and smart you're not intelligent you're pretty fucking dumb people from a holistic intelligence point of view you don't have holistic intelligence you're dumb is a bag of fucking hammers if truth be told and you think you know something and you're a little fucking punk boy punk-ass bitch little girl who knows absolutely nothing when it comes to real spirituality and real understanding about how this world works and I'll tell it right to all your faces because no one else seems to want to be able to do that so I'll pick up the slack for the other cowards out there and I'll do it and what they want to do what these lowbrow low-rent pieces of dirt want to do is just carry out their desired forms of violence upon others because they hate themselves and their lowlife pieces of shit that in that psychology of total lack of true self-worth and true self-respect they want to carry out violence on others because deep down inside they fucking hate themselves and that's what we're going to get into it in a deep way dissecting that psychology here today so idiots out there who believe in government always ask the question vote without government how'd we do loose you know they're there so they can barely even get their words out because there's such you know mouth-breathing pieces of garbage that they're choking on their own tongue and here's what they sound like boom we're all going home loose that's what you sound like you know without government violent street gangs would take over because that's not what government is they're not just a violent street gang who has taken over no they're here to protect us you know this is what idiots think that's what the brainwashed imbecilic public believed that this thug criminal street gang have the right to conduct such violence that they conduct on a daily basis in this country and throughout the world still don't get it still don't get that it's just a gang imposing someone's will that's all it is so whatever has been and last week I explained that cowards attract more garbage in the form of garbage people and garbage government cowards do this when people are in a state of cowardice and don't want to deal with any type of infringement of their rights by themselves on their own through an act of their own will and their own engagement of the self-defense principle which is their right duty and responsibility what do they attract more human garbage and more government garbage like attracts like that's how the law of attraction works garbage attracts garbage and cowards attract garbage so as soon as most so-called freedom advocates and they're nothing of the kind become afraid that their life might actually be in danger suddenly they want to call the police and National Guard to handle the problem for them they don't want to take any action themselves because they're chickenshit little pieces of cowardly garbage and in in that state of consciousness called cowardice they're exacerbating the problem worldwide they abandon their principles at the first sign of trouble and really that's a lack of a true way that it should be put they're not abandoning their principles they never had any cowards never had any principles a coward who wants somebody else they want to abdicate personal responsibility and duty on to someone else you never had any principles you never understood principles to begin with coward moving on to the next slide I sort of wrapped up my whole position on police last week with this slide and tried to make it as extreme and brutal as possible and I also reiterated yes I actually really mean that no it's not a joke no I'm not kidding if I ever find myself in this situation literally being eaten by zombie cannibals do not call the police toward my assistance I don't want your fucking help house slave I don't want it ever for any reason I'll deal with this problem should it present itself it's just a flesh wound anyway okay I'll deal with it in my own way all right first of all I'm ready for any eventuality because I've done what I've come here to do so I'm ready to go at any time no matter what what situation takes me into another realm of consciousness with no fear with zero fear because I know I've done my work while here and I am prepared for whatever comes next how many can say the same and I'll look you're right in your face and tell you that so I'm not in fear I'm not a fucking coward and I don't want your so-called services because you can't protect anyone and you don't protect anyone it's a bullshit lie and a bullshit false belief that police ever protect anyone anyway no one can protect you my alignment to the natural laws of creation and the will of the creator or provide protection for me first and foremost and then the 45 would hollow points in it on my hip does the rest boy let's get that straight okay so you don't protect me boy you don't protect me girl what I just said protects me creation and then my right and duty and personal responsibility to my own self defense and the defense of other free people that are not harming anyone that's it nothing else so people want to say uh you're a blowhard oh you're saying this and then let's see what happens no don't fucking tell me who I am or how I'll behave you know nothing about Who I am or how I'll behave when trouble presents itself so that's true and serious sentiment and it will not change because my principles don't change because first principles are eternal and immutable and they do not change and if you've brought your mindset and consciousness and to align with them your mindset and consciousness and principles don't change either and this is what too few people understand are in the consciousness to grasp and understand I see we have the rage cam online yeah so let's move on to some new material for today I want to talk a lot about the psychological polarization going on our world to create a world of masters and slaves now this is the idea that there should be a master or enforcement class called the police politicians etc that have so-called Authority and then other people who have to obey their commands who have some sort of a moral obligation to obey their commands called laws and jurisdiction but what we're really talking about is a race of masters and a race of slaves if we stop mincing fuckin words and stop using bullshit euphemisms dispense with the euphemisms children that's what little children who don't want their little delicate bullshit pussy sensibilities dealt with they don't want that that disturbed oh I'm sorry sorry but not sorry you know they don't they don't want to hear it like that stop you from izing language and trying to cut out whole segments of language you're not going to tell me what my language must be or what my worldview must be I'm not gonna listen to infantile psychological infant children tell an awakened being how to think talk and act I'll engage in those modalities of consciousness as I see fit because it is my right to do so you're not gonna force your worldview on me and that should be the whole attitude of everybody in this movement stop taking shit from little shit diaper children because that's what these people are little children who have never grown up they're not psychological adults and I'm not taking shit from psychological infants so let's look at the actual polarization dynamics or polarization dialectics as I like to call it this is the psychological sorcery that goes on to create a world of masters and slaves so let's go full screen with this very proud of this next transition I thought I did a good job with that one okay worked a little bit on that so um there's really two types of people in the world there are the people who believe that government should exist and there's people who know that government is a euphemism for slavery that's the one true divide in humanity but there's another subdivision in the supporters the police and their types of mindset and then then the supporters of them and there are two kinds of mindsets so the police themselves I put over here in the left category in red which are the order followers and the Psychopaths and again I'm putting the slide from last week on there that garbage attracts garbage how government draws people into policing that are the worst kind of human beings they are the Psychopaths the control freaks the bullies the racists and anybody else who is just a self-loathing piece of dirt who wants to bring their brand and their form of violence upon others that is what government attracts government is garbage so it attracts garbage what these people all have in common is they that they have chronic left brain dominance or chronic left brain imbalance and the characteristics of this imbalance are they have a misanthropic worldview meaning they generally hate people and they hate people for the wrong reasons they don't hate people because they're ignorant they hate people for their own selfish reasons oh there's too many people I don't like the way this culture behaves I hate these kind of people because they look different from me or have different customs from me they don't hate people because they're actually committing violence they don't hate people because they're actually doing immoral behaviors because this is what the order followers in Psychopaths and the police force do they commit immoral acts and behaviors and violence and put people under coercion and duress so if they hated those things they wouldn't go into a into a field into a job into a position where they are actively doing these things they seek out a position where they can be allowed with immunity to do these things that's how it works that's the kind of psychology government itself is drawing is attracting into it and people do not understand how this psychological dynamic works they naively believe that oh these people are all well-intentioned and they just hate you know violence and coercion of other people and they're there to help stop believing nonsense bullshit justifications these are fairy tales this is what violent coercive people who have a ton of self-loathing and are just control freaks psychopaths bullies and fucking racists want you to believe their intentions are and it is not true it's bullshit it's a bullshit lie that Psychopaths used to cover up their true intentions and we have to become psychologically guarded and psychologically mature against their manipulation tactics to tell us that they're in is to help and protect innocence you're full of fucking shit and I'll say it to your face you're full fucking shit and this is what no one else will say no one else will just come out and say it like that because they're coward chicken shit people who won't just come out and say the fucking truth the way it is so I'll do that for all of humanity if I have to cause don't nobody saying anything like this on podcast that I've ever watched not a one person the next psychological characteristic and their sick twisted psychopathic left brain worldview of these order followers and Psychopaths is that they have a strong belief in the authority vested in certain human beings in other words they condone and believe in slavery if we're not even mincing words or using nonsense euphemisms to try to spare people's feelings their supporters and condone errs and believers in human slavery the next characteristic is they generally lack empathy and if you've ever dealt with police this is true either they never had it to begin with and their primary Psychopaths or they've essentially been turned into cold callous fucking psychopath because of the nature of the work that they've done and it's put them in a position of constant adrenaline which go right to the brain and destroy the fucking brain and look particularly adrenal rushes absolutely annihilate the electrical impulses and all of the neuro pathways of the limbic system look it up look it up in neuroscience it's very well known at least in in more advanced neuroscience if you live in a constant adrenal state in a constant state of adrenal engagement okay of being an adrenaline follower and junkie that's what violence puts us into violent state of mind puts us into the adrenaline state and that routes us into our complex of the brain and if you look up biochemically what it does in neuro science terms is it absolutely annihilates the electrical impulses and the synaptic pathways of the midbrain the mammalian brain which is responsible for the feeling of emotions in the body it's called them the mammalian brain or the limbic system the limbic brain I covered this extensively in earlier episodes of what on earth is happening go back to square one podcast number one and listen and you'll get those episodes about how the brain works and that is what police have had done to their brain most of them are completely annihilated have completely annihilated limbic systems of the brain and therefore they lack in general terms lack empathy they have an inborn desire to control others because of their own inadequacies we're going to talk a lot about their psychological state of either real inadequacy complexes or perceived inadequacy complexes and they of course justify constantly and justify comes from the Latin yes meaning right and fetch are a meaning to make or to create or to fabricate so when we put those words together to justify literally makes to invent a right to create a right where at one did not exist and never existed so they justify their own violence as a means to an end they are just the fires which means they believe that they can create rights for themselves that do not exist and we so we have the two categories that we're going to look out of order followers and Psychopaths and we're going to look at the psychological characteristics of both sets of police so on the left hand side you have police on the right hand side or in other words what I'm calling the garbage that is attracted to institutionalized garbage they're already garbage and they are attracted to the garbage called government they're already mental psychological emotional and spiritual garbage and they are attracted to the institutional garbage slavery called government then on the other side you have their supporters which I'm breaking down into two categories also I call them the bootlickers and the cowards and again this is the idea that ours attract more garbage into our entire human experience and they throw their principles down the drain and in the garbage can at the first sign of any physical danger these people have chronic right brain dominance or imbalance they also share the same false misanthropic worldview that the dominators on the left hand side of this chart have they generally hate people for all the wrong reasons not because of their ignorance but because of selfish reasons or because they're not like them enough either and I see it every day I hear every day from people again a couple of weeks ago I was looking at a Facebook post and these people in these protests don't share my worldview and political ideology and I think police should just shut them all down II whether they're peaceful or not not just the the you know ones who are actually destroying property and committing violence on people they're saying even the ones who are there for legitimate gripes because they don't like their political worldview and they say quite frankly I don't really care about anyone else except my myself and my own and my worldview and the worldview of others who are like me and guess what that's called Satanism that's what that's called Satanism that's the very ideology of Satanism and I know all about it because I was a priest of that religion for many years and that's the problem is Hollywood has sold people a false version of what Satanism is in the worship of the Christian devil it is what Satanism really is is not given a rat shit about anybody but yourself and those who are like you that's it that's all you care about that's called Satanism you don't want justice for any for everybody you want justice for only the people you with and who are like you and share your cultural and culture and cultural values and now that's not the same that say that there aren't differences in cultures and things that are better or worse than in certain ones not everything is the same but what I'm saying is these people these bootlickers lickers and cowards and supporters of the police generally are in a satanic mindset and only give a shit about themselves and their own and their property and they don't care about the injustice that has done to others through the police as an institution these people who are bootlickers lickers and cowards have no sense of true personal responsibility they want other people to come up and clean up messes for them and I'm going to explain how they try to abdicate that responsibility and I'm going to explain what taking on that true responsibility would look like in a society that really was based voluntarily and we understood both the non-aggression and self-defense principles in their fullness they desire to be kept safe or protected and this is a myth this can never occur police forces don't do that even there are sensible duty is not to do that it is to simply catch people who have done violence to other people or what we say is violence to other what they say is violence other people and then punish them through a court system or even summarily on the street as they're mostly doing they're not there to try to protect anybody they even state this themselves and the Supreme Court has even stated that they have no duty to keep anyone safer to protect them they show up after violence has been committed and then go and try to find the one who did the violence unless they're the ones doing the violence then they have qualified immunity and get away with it wholesale so the belief that police can or are there to protect or keep anybody safe is a total fucking myth bullshit false belief system that was never true to begin with and if you only just open your eyes and use your own powers of observation you will understand police have never done that and never will do that they don't keep anyone safe they don't protect anybody they're not tarrant for anything anybody wants to do because they are never able to actually stop them from the act of doing it they can only show up and do some form of punishment to people after they have done it so they never obviate or remove the free will of anyone that wants to conduct violence that free will is always there and somebody just has to be willing to trade anything bad happening to their person physically or possibly their freedom of movement if they want to conduct that form of violence nothing is stopping anybody from committing violence unto you except you and your ability to defend yourself and your body and your property with whatever means of self-defense you have at your disposal that's the truth of the fact of the fucking matter whether you like it or not whether you understand it or not and nothing will ever make that untrue and these people these bootlickers and cowards want to justify the violence of other people they don't try to justify their own violence because they're condoning and supporting violence but they justify all of the other people who are doing the violence they justify their behavior they're violent and immoral behavior as a means to an end as well so you could see the ways that these two mindsets differ but you could also see they're very similar in some regards so moving on let's look at the psychological profile of all police blanket statement all of them every single one of them fall into two categories unless and until they quit their cult let me say that again all active police all blanket statement get as offended as you want nothing will ever make it untrue it's a true blanket statement every single police officer in the history of humanity for all time these are their psychological characteristics they can be broken down into two simple categories I would say most of them are actually really all of them fit into the first category and then you have that special brand that is in the second category the psychopaths the real either born or secondary condition psychopaths it doesn't really matter they behave the same way but we have that special brand that is a small percentage that then influences the whole and makes the whole batch rotten to the core the saying is not it's just a couple of bad apples the saying is one bad apple spoils the bunch get that through your fucking skulls dumb people who don't even understand how to relate a little you know saying to make a moral point it's not it's just some bad apples wrong incorrect the saying is one Apple one rotten apple spoils the bunch okay look it up and understand what it really is before drooling diarrhea out your mouth and saying well just remember apples because you sound like some dumb you know caveman who a boulder followers cerebral cortex and key you can't even speak that's what you sound like dumb dunces okay and I'm tired of hearing it from people Psychopaths gravitate toward the institution of policing toward the institution of control over others regardless of what it may be this happens in the medical field this happens in banking it happens in any institution that has any control over people's lives because these people have God complexes psychological God complexes the psychopaths are what I'm really talking about here but true blanket statement whether you like it or agree with it or not eternally true all police psychology can be broken into two categories with no exception ever order followers and Psychopaths every cop that is active duty is one form or another in psychology in psychological makeup and characteristics get is offended by that blanket statement as you like your offense to it will never make it untrue so let's look at the psychological characteristics of both of these groups of human trash order followers have an extreme lack of holistic intelligence regarding regardless of their intelligence quotient as measuring as measuring pure intellect most order followers on the police force have low IQ some of them like detectives might have a higher IQ but all of them blanket statement lack holistic intelligence extreme lack of holistic intelligence that means that they do not have heart based intelligence they do not have true emotional intelligence they do not have true moral intelligence because if they did they would not gravitate toward the profession of control over others and they would not have the low holistic intelligence of not understanding why the very institution of police is immoral from its foundations on its face if they had drew holistic intelligence they would understand that this is not a way to solve the problem of immoral behavior in our society to begin with they are people who have such low true intelligence factors that they cannot logically and morally come to the accurate conclusion of what causes immoral behavior and how to deal with and solve the problem of immoral behavior that is their childish psychological mindset first and foremost in other words to put it very simply they're dumb people no matter how smart they think they are no matter how clever they think they are they're dumb holistically they're holistically dumb once again bring any police officer in front of me I will tell them to their face you can think you're intelligent all you want you can have a high IQ as measures in today's IQ testing intellect i IQ as measured by intellect quotient tests is 147 that's considered a genius and that is considered less then far less actually about one-half of one percent of the whole human population has an IQ of that value or higher about point zero five percent of the whole human population has an IQ of 147 or greater which is the last time my IQ was measured years ago measured 147 I'm not bragging about that I'm just telling you I don't consider that a measure of my holistic intelligence that's just my intellect quotient it shouldn't be called intelligence quotient it should be called intellect quotient my intellect for pure logic mathematics science etc is about 147 that's not my holistic intelligence because holistic intelligence does not just measure left brain intellect it would mat measure heart based intelligence and you really can't measure that with a test natural law is written on the heart morality is written on the heart it's not written in left rein verbage it's not measured through words or testing or instruments it's measured in the heart and what we know to be true regarding objective morality so these people don't have that form of intelligence they're not philosophers they're not people who want to study morality in depth they bought the bullshit illusion of morality as put forward to them by the institution called government which is a huge crock of shit lie and it's a cult belief system so holistically they're dumb people they attempt to abdicate their own personal responsibility to discover what objective morality is or in other words which actions are moral and which actions are immoral they don't want to do that for themselves they want to be told by government and by politicians what that is and then they want to enforce those dictates those man-made dictates not the actual law of the universe that true spiritual laws of morality of creation they're very little concerned with what those spiritual laws of creation in fact are all they care about is the dictates of mankind who think that they're God of the subset of mankind called government that thinks it's God here oh and they'll enforce and obey their dictates but will they look into what real objective morality is not a fucking moment not for a fucking moment and they think their moral human beings your scumbag fucking trash there's nothing moral about you if you quit your cult you're on the path to becoming moral they want to be told what to do they don't want to discover how to behave they want to be told what to do by perceived quote-unquote superiors because again these are psychological little infants who never grew up they don't want the responsibility of truly growing up as a true holistically intelligent spiritually awakened human being they want to be told what to do by their perceived superiors like a little fucking child in diapers it wants direction from their parents and that's what the government and the parties of government arts daddy and mommy left brain and right brain you know controller and nurturer that's all it is psychological proxy parents and that's who they want to give over their behavior to they want abdicate their personal responsibility to choose moral behavior based on knowledge which is conscience and they just want to advocate that to someone else who they think they just know better and they made the law and we just enforce it no you're just an order follower who doesn't give a shit about what's truly right or wrong and you want to be told what to do because you're a fucking little child inside your psychology you're Chuck you're you have a total childish psychological makeup and you never grew up into a true adult human being in consciousness and in your internal psychological makeup regardless of your physical age and no one's ever told you that because you never had any real parenting or mentoring and you've been deceived your whole fucking life and you've run with the fucking deception because you don't want to acknowledge that you were duped and you were too stupid to figure it out they have a internal psychological desire to please their superiors because their superiors are seen as their psychological proxy parents as I've just explained that's why there's only ever two political parties one political party usually the right wing one represents daddy that is the protector and father figure and then the left-wing party is usually the mother figure which is the nurturer and provider from cradle to grave the nanny you know that's all it is then people still can't see it they can't see how they are proxy parents psychologically for people who never grew up and outgrew the need for psychological parenting because they never did any internal work upon themselves psychologically and spiritually this is why people think people need to be controlled and think that they have to jump into the position of controlling them that's not an adult psychological point of view that's the point of view of a fucking child who never grew up inside of themselves and nobody will just say it plainly and truly just like that because they're afraid of hurting other people's feelings fuck your feelings we're not it we don't have time left to worry about how your feelings go child children aren't gonna dictate what my rights and freedom are they're not going to dictate what other free peoples and true psychologically advanced and grown-up and spiritually awakened people's rights and freedoms are not without physical consequence you'll find out what a child you are and what it's going to lead to boy and girl don't worry about it you'll find out it's getting there it's getting there and trust me when it comes everybody's not going to like it it's not gonna like the result you get I've been trying to avert it for 227 fucking episodes of doing this shit I've been trying to avert that eventuality and the the reality that's going to manifest itself in our world I think we're long past the ability to even hold it back quite frankly and I think it's going to emerge into Brandis horrific bloodshed the likes of which this planet has never before seen and is likely to never see again and you know what you know whose fault and responsibility it is because blame is real blame is true too few people look at moral culpability true few people acknowledge and engage in the dynamic of blame of moral culpability it's people who give away the responsibility like this that's first and foremost who's blame and fault it is and secondary you know whose fault it is people who won't step up into the role of teaching true morality to other people it's your fault as well and that's most of my listenership most of my viewership still has not come forward to do the great work you're absorbing and absorbing and absorbing and absorbing and absorbing and you're doing absolutely no fucking right action with it you're doing no right action with it and that's the problem this isn't about absorbing data or knowledge or watching me every week this is about putting information out to the public and reaching other people I talked about years ago we need a campaign getting people to quit the cult quit your cult campaign quit your cult or be cut off how about that as a name for it quit your cult or be cut off and this is family members have to reach out to people in the positions of or following and say I'm going to give you this information over the period of six months to a year and after that time I will have nothing to do with you as a human being whether I am your daughter your father your mother your cousin your aunt uncle sister brother wife husband anything child that's it I reckon I recommended this a couple of years back and I think that should be the name of it quick you're a cult or be cut off that's it quit your cult dot-com for words - what on earth is happening I just briefly as an aside I just registered mark passio dot-com finally after all these years that redirects - what on earth is happening you don't want to type the whole name wo eih redirects - what on earth is Hopkin are all com quit your coke com mark passio com wo e IH com are redirects - what on earth is happening but we should do a campaign somewhere whether on the one great work network on social media we're here on what on earth is happening called quit your cult or be cut off okay where we have family members and associates and friends and you know all kinds of connections to order followers tell them I recognize the immorality of what you are doing and if you don't stop within a certain amount of time I'm going to continue to give you information in the form of links videos book books documents etc to get you awaken to the immorality of what you do in the immoral institution that you are a member of a cult member of and if you do not cease and desist in your complicity with this cult I will have nothing to do with you as a human being and I think that should mean full divorce and full custody of children I think that should mean cutting people out of wills and saying nothing in monetary resources or physical resources will be left to you if you are my descendant or heir we need to take it even into those realms hurt them financially if you can this is a war and we need to pull out all the stops in this war that's what I campaigned I think so somebody should start it or you know we should start it here as an ancillary project and see who picks up the ball and runs with it because I talked about it enough and we really haven't done much with it I talked about this all the way back from free your mind for when I gave my presentation called the cult of ultimate evil were followers and a destruction of the Sacred Feminine so that's the campaign name that's what I decided on quit your cult or be cut off and I think it's a great name and it expresses the entire dynamic in a few words so let's see what we can do to get that started they this order following class in the police has no connection whatsoever to any true personal power or creativity in their lives they have no internal sense of personal power or personal creativity in their lives that's why they want to control this is what bullies and controllers and racists all have in their lives they have no true internal sense of self-worth and true internal sense of power and creativity they've never engaged in that dynamic for a second in their lives they're not creators they have no connection to the Creator through the dynamic of creativity in their lives that they've never made any project on their own they've never engaged in artwork or music all they have because they have no imagination and they have very low intelligence levels is physical strength and so they try to put that to work toward controlling other people and think that fulfills some role in society no it doesn't that role is not really needed in society in the way you think it is even if you think society would fall into collapse and violence and chaos it's already there you just don't see it it's there in a different form as you imagine it wouldn't and guess what the way you imagine it would fall into chaos would be preferable that to the chaos that we're in now far preferable which I'm going to explain as part of this psychological breakdown in this presentation so these people don't have any connection to what gives you a true sense of internal power which is creativity in your life they don't engage in that dynamic in their life that's why their brains are burnt and destroyed because all they do is chase adrenaline and that's what destroys the limbic brain and that's a big connection to holistic intelligence and creativity because it's very connected the right brain the right brain hemisphere which truly governs all those human dynamics of creativity and imagination and intuition and that's why these people are so terrible at those human dynamics folks I know what I'm talking about when it comes to this I've studied it the bulk of my life and I'm not gonna be told how it works by know-nothings see this whole thing that I know nothing that's a bullshit crock of shit New Age crock of shit I know a considerable amount and I'm not afraid to say that I know what I know because I know it you want to say that's egotistical you go right the fuck ahead and say it's egotistical I'm not going to say that I'm ignorant or I don't know anything because there's an infinite amount of knowledge to be had who gives a fuck it's a non sequitur logical inaccurate logical argument it's a logical fallacy just because there's an infinite amount of knowledge that you know nothing no there's an infinite amount of knowledge and I didn't make a statement regarding how much percentage-wise I know I still know a considerable amount for a human being and what I know is true that's why it's called knowledge and not an opinion or a perception of it I have quite an amount of considerable true knowledge that I've taken into myself and I'm not going to apologize for it and I'm not gonna have false hubris and say that I know nothing fuck that that's New Age garbage I know quite a bit and I'm not gonna be told what I know or don't know by someone else and I know how these dynamics work because I've studied it endlessly I've studied it with such total commitment like a hermit that it is all again I've said in the past it's almost frightening the level of tenacity and completeness with which I've studied it you don't know the amount of work I've done to study these dynamics and how completely I understand them I'm not going to apologize for what I know and say that I know nothing fuck that false you bull New Age bullshit Hubert a false humility I should say it's New Age bullshit false humility I know quite a bit and nobody should be afraid to say that they know something if it's true that they know it so these sick order following police have multiple deep-seated psychological inferiority complexes both real inferiority complexes and perceived ones that means that they know that they're inferior in ways that are actually real and measurable and they have other perceived inferiority complexes in which they just don't have any real true self confidence and they think that they are unworthy in certain aspects that maybe even an imagination and invention of their own internal psychological framework and mentality when in fact they're not really truly inferior in those ways but they are just they just don't have any real self confidence because they're such self-loathing self haters deep down inside themselves that's why they gravitate toward a position of controlling others and getting approval from the proxy mommy and proxy daddy so we're going to look at ways that they have inferiority complexes you know first of all they know how dumb they are deep down inside that's why most people who are cups did terribly in school even in just general left brain intellect ways they're usually horrific at math horrific at science again you could say some detectives etc who are higher up in the police forces have a little bit more left brain intelligence from an intellect point of view with math and science but the average rank and follow follower rank and you know file order follower is extremely unintelligent in even just IQ measure of intelligence let alone holistic intelligence and they know this deep down inside they know that they're not very smart people that's why they gravitated toward an institution based in control and physical violence because they feel like that's all that they would ever be good at how about trying to play an instrument how about trying to work on some artwork go did you know download Adobe Creative Suite or Photoshop you know and pay the subscription fee and just try to work on your art skills maybe you're good with a pen or a brush draw our paint do some pottery pick up a guitar learn piano learn the keyboard play some drums if you want to beat on something instead of beating on somebody's head with a billy club you know there's tons of other creative options that you could explore you know internal psychological frameworks through rather than have to try to be a controller of others which is never going to work to transform society for the better anyway as we're going to talk about a lot of them feel like they're they don't have any connection to other people through their personality their sexuality etc so they feel inferior in simple personality traits and connections to other people a lot of them know that they're psychopaths either secondarily or deep down inside because of some type of trauma that they experienced psychologically in their life and so they just want to continue the trauma victim cycle and take it out on other people and become the trauma creator you know that's this these are all the internal dynamics psychologically that's going on with it within police that's why they gravitate toward an institution based in violence and coercion and that's what they do they attempt to compensate for their inferiority complexes by controlling others it's the perpetuation of the trauma victim cycle which we talked about on what on earth is happening in the past trauma gets created in someone's life by a abuser and then they either identify with the abuser or with the victim role and then they either become the next abuser or they continue the cycle as the next victim and allow themselves to be abused the only way of breaking that cycle is with true self-respect and a higher level of consciousness by working through the trauma not burying it down inside facing it and working through it you think I haven't been through my share of trauma in my life and it's an ongoing battle you deal with it every day I feel like I'm traumatized every week putting this show together quite frankly you know but do I deal with it I force myself to look at it and deal with it and power through it because it's moral obligation to do the work do I like it no but do I deal with it and and persist and power through it yes I think dealing with the ignorance of this society is a trauma people asked me in the question-and-answer session of the conference from Spain recently how do you deal with all the ignorance doesn't that create anger and trauma inside of you and I said I deal with it very badly yes it does and do I think that I should be in a state of you know total forgiveness and total ignorance and like have I think I can't remember how some Buddhists false Buddhists worded they say you know dealing with the ignorance of others is eternal tolerance for someone else's cognitive dissonance we should never be in that mind state folks the emotion of anger is there to be felt it's there to be felt so you realize how wrong the fucking thing that we're dealing with is and to do something to change it and make it right that's the adult way of dealing with it the problem is we have a society where so few people or psychological adults and they bought into so much bullshit New Age nonsense that we're not actually dealing with it we're given paying lip-service that we're dealing with it we're not actually changing anybody else's mentality because people think oh it's only internal work wrong it's not just internal work internal work comes first but it's about influencing other its internal and external alchemy not just internally because if you're not an influencer of someone else's internal work you're not doing your job as an influencer in teacher of the great work what do you think I'm not still doing internal and external work both of those processes have to continue indefinitely you don't just say I'm done my internal work and you certainly don't say I it's only internal work no incorrect New Age bullshit belief system so let's look at the second side of these characteristics of all police the second category psychologically a police officers are the the Psychopaths oh these are just lovely people and they're all over they're all over every department in the world don't try to say it's just some it's a good percentage in the police I'd say you probably have about fifty percent if not more are psychopaths to one degree or another or on their way to becoming Psychopaths right and I might be being generous it might be far more than that percentage-wise but I'm gonna put it in at least fifty percent and we talked we did whole shows on the this lovely breed of people the Psychopaths of our world we've done whole shows on this on the psychological dynamics so go back and listen to them in depth with slides there's ton there's whole shows on this in the water earth is happening podcast archive the characteristics of psychopaths aggressive and callous behavior now just listen to all of this when it comes to the police see how much it's describing complete absence of conscience and empathy or in other words an internal death of emotion in their own psychological makeup that's why they have no cycle they have no true holistic intelligence because most of them have dead into motion and by the way forty percent of all police it's proven in peer-reviewed studies are domestic abusers and that's probably a load low figure proven over and over again in Psychological studies that over 40% of all police officers worldwide abuse their spouses whether they are male or female just think about that dynamic by itself without even going into all the rest of their characteristics psychologically 40% of them are spouse beaters okay husband beaters or wife beaters obviously mostly wife beaters but it works the other way too they are willing to engage in immoral criminal conduct to intentionally violate the inherent rights of other human beings sound familiar all Psychopaths are willing to do this willing to use intimidation and violence to dominate and control others that's the police's job on their on its face complete absence of any sense of guilt or remorse for the harm their actions caused to others I can vouch for this personally from secondhand experience of talking to someone who was a ditched dispatcher for the Philadelphia or it might have been a Philadelphia area surrounding Police Department once again I'm still looking for that person I have lost their contact details I'm gonna just say it again probably be the last week maybe next week I'll ask for him one more time it is a male person I don't know if they want their name sent on the air so I won't do that and we talked several times at meetings of truth freedom prosperity here in Philadelphia when they were hosted by Mike myself Fernando and other people Scott others he was a colleague and acquaintance I wouldn't say that we developed any kind of a deep friendship but we spoke a few times and at one luncheon of truth freedom prosperity or it might have been a dinner he told me about his work as a police dispatcher and told me about the violence that police did to people gleefully did with zero remorse knowingly harming people and knowingly spreading all over their rights and usurping their rights and mostly what he got into telling me were the horrific and incredibly profound saddening and maddening acts that these police wordy cycle psychopathic police were doing to animals particularly dogs deliberately murdering animals in people's homes when they knew they posed no threat to them and could not wait to get on the next no knock raid so that they can go and kill more innocent life so if the person is listening I can't make you come on the show obviously I can only put the my intent I would like you to courageously come out and tell people what you personally heard as a dispatch officer from police's lips to your ears if you'd be willing to do that once again that is your choice and you would have to develop that internal courage to do so but if you're listening or anybody else who knows who I'm talking about is listening please get in touch with my assistant Leah and she'll bring you onto the show okay we'll bring you onto the show for a full interview you could have as much time as you need to lay it all out I'll give you the floor okay so I've said my piece on that let's go back to the slides and these people are guiltless and remorseless and more so you know what's making it more like that that they're not being held accountable individually for the crimes that they commit that's called qualified immunity in policing here in the United States and in other countries look it up it's called qualified immunity this means that police are no longer being able to be held legally or personally or morally accountable for their behavior we are creating a whole class of people that can commit crimes with impunity let me say that again we have created an entire class of human beings that can commit crimes with legal immunity and impunity meaning that they will go unpunished according to any legal system do you know how dangerous of a precedent that is it's called qualified immunity and it exists in almost every state if not every state in the United States and at a federal level it is criminal on its face to have ever even proposed such quote legislation or to voted it in every person whoever did that is a criminal and a violent criminal themselves and they should be held physically accountable for even trying to dare do such a thing Psychopaths will deny abdicate and rationalize their own immoral behavior in other words they accept no repop responsibility and in condoning that behavior their supporters have accepted no responsibility either no ability to respond to their immoral behavior most Psychopaths if not all psychopaths are very well practiced pathological liars and police lie continuously to people as a matter of fact it's part of their job description to lie to people and it is told that they are allowed to lie to people outright and openly and people think that that's fine and they have total immunity for doing that as well psychopaths are very skilled at faking normal human emotions they are very skilled at feigning or faking a normal range of human emotions because they have to put on that mask and pretend that they have emotions like everybody else even though they don't feel like everybody else they have no emotions for empathy or the the any kind of feeling toward what their behavior is the harm that their behaviors and suffering and trauma that their behaviors caused and initiate Psychopaths have become very adept and skilled at manipulating other people they practice manipulation skillsets literally practice them to appear normal in the eyes of other people even though they're really internally monsters psychologically and they believe in their own internal psychological dynamic and framework that they will never be brought to justice that they can continue to conduct their crimes forever unpunished that their immoral criminal actions will never be punished they will never be punished for them that's what a psychopath thinks now every single one of these characteristics meets the ecological dynamics and characteristics of almost every cop and if you don't think so look I don't want to hear I honestly don't even want to hear it you're a very dumb and naive person if you don't agree with that statement you are a panderer and a boot licker to police and I don't care whether you know him personally I don't I'll look you in the face and tell you I don't give a shit whether your father's a cop I don't give a shit whether your mother's a cop I don't give a shit whether your cousin your sister your daughter your aunt your uncle your niece or nephew I don't give a fuck what relation you have to them you're a know nothing naive person if you don't understand that these are the psychological characteristics of all police in one form or another on one side of that column or another whether their order followers or Psychopaths we're a combination of both put the slide back up look at this chart police are wondering or the other or a mixture of these psychological characteristics in their internal psychological makeup the end for all time get is offended as you like this is the garbage that is attracted to this institution if you don't like it it doesn't make a difference it's true and you're wrong let me just say that once again - just just let's make it very confrontational if you don't like that statement you're wrong and it's still true you got to work through your in correctness because you're in correctness is preventing you from understanding rights because being wrong makes you behave wrongly see correct behavior correct understanding leads to moral behavior incorrect understanding leads to immoral behavior that's why it's called right and wrong in both respects you have to be right to behave rightly and if you're wrong you're going to behave wrongly or and morally and this is what people have to understand being correct when it comes to rights and what's going on in the world leads to right action or in other words moral behavior being wrong or incorrect in what you understand about psychology and philosophy and what's going on in our world leads one and leads eventually all society to be wrong in their assessment of what behavior is what r.i.p and wrong behavior is and it leads eventually to wrong or immoral behavior so it is all people say oh don't worry about being right it's all about being right it's all about whether you're correct or not we've been taught this bullshit for far too long that it isn't about what you know to be right as incorrect yes it is entirely about whether you are correct or not the really I don't fight other people and try to be right no the only dynamic that matters is whether you are correct whether you are right it's the same bullshit when people so it doesn't matter who started a physical altercation yes it does that's all that matters all that matters is who initiated the violence because the response to physical violence is defensive use of force it's not more violence if someone punches me on the street when I've done nothing to harm anybody else and I punched them back to acts of violence did not occur only one did the one that initiated the harm which was the person throwing the punch at me and too few people understand that because they don't understand self-defense and that's a big part of what we're gonna continue to talk about so let's move on that those are the psychological dynamics of of police whether they happen to be order followers or Psychopaths and these are the two kinds of people who are police the only kind of people that have moved on toward not being in these two groups of people psychologically or are those who have quit this cult and let's stop calling it any other euphemisms okay let's call it what it is it's a fucking cult and these are the two types of cult members that join the police forces anywhere in the world no matter what country no matter what municipality it's all a cult that's what it is it's a satanic cult believe it or not whether you understand that or not it's actually irrelevant that is the truth as well police are all members of a worldwide satanic cult it doesn't matter whether you don't understand that whether you're hearing it for the first time and you think it's over the top it is true nonetheless regardless of what you think of that statement and if you don't acknowledge it I'm just telling you you are incorrect and wrong that is the eternal unwavering truth that woman can never be made on so I am correct about it I don't believe that I'm correct about it I actually am correct about it and you could say that's ego all you fucking won and it will never make the statement I have made regarding that untrue if you don't understand it or agree with it you're just fucking wrong get his offend that as you like I'm here to create disharmony and that discord emotionally and vibrationally between the people who double down in their ego and insist that they're right when they're wrong that's what bringing the sword to the world means that's what it means like the allegory of Christ in the New Testament I have not come here to bring peace to the earth I've come to bring a sword and that's what it means it's not about talking nicely to people it's not about infecting them with sweet tones like the bullshit lying fake whore fucking media does truth doesn't need to be deceptive and sneak itself in through the backdoor I'm telling you right to your face there's a way things actually are and there's alignment to that through your own perception and if you don't do it you're wrong and you're going to behave wrongly as a result so that is the psychological dynamic of all police whether you like it or don't like it tough fucking shit and again I get very emotional about it folks said I'm gonna try to tone it back and I've been as you know into the emotional aspect of it as much as I was last week so I'll try to pull it back a little and like really just get these concepts into people's mind because there's a lot more to go through all right let's look at the psychological profile of all police supporters once again blanket statement because there's only two kinds of police supporters ultimately for whatever reasons that they have been worked psychologically into these two mindsets there are only two kinds of people who say that they support the police there are people who are bootlickers and want their authority to continue and be present and love it and revel in it and that there are cowards who whether they know that their behavior is immoral or not they will not act and do anything about it or even say anything about it because they have no courage and ultimately their self lo there's just like the sick order followers and Psychopaths who joined the police only it manifests in a different form let me make no mistake let me make no bones about it or mistake about it all cops are cowards as well all blanket statement you don't have any real courage you have perceived courage it isn't it isn't true courage just because you say I'll go and deal with a potentially violent situation that's not real courage that's your perception of courage real courage is doing what is actually morally right you would be more courageous not to run into some burning building or into some situation where a bunch of people are being violent you try to stop and arrest you somebody you would be actually more courageous rather than do something like that to quit your fucking job that would take more courage and now some police are quitting their job but not for the right reasons not because they've recognized that as an immoral institutional on its face because it's built on coercion violence and slavery but because they feel like they're disrespected by people wanting to do fun them and saying oh you'll see what what'll happen without police yeah maybe we will and guess what I know what I'm asking for I know potentially what might happen and the chaos that might result and that form of chaos is in preferable to what we have now infinitely preferable to what we have now so quit your fucking job I don't need you and neither does anybody else who is thinking sanely and if anybody else doesn't understand that dynamic you haven't gotten what I'm teaching here on what on earth is happening because you're either a fucking boot licker or a coward get as offended as you like and I'm gonna teach that underlying core philosophy today of why there is no justification ever for having policing in society so let's look at the psychological characteristics of these two groups of fucking lowlife type of people cuz that that's all you guys are - you're just fuckin low-rent lowlife consciousness people and nobody else said it to you like that because they're to a friend afraid of offending you we don't have the time to go and say these people shouldn't be offended let's talk you we tried talking to you rationally philosophically and nicely it didn't work cuz you're rooted in fucking ego and you don't want to give up your wrong positions and beliefs you don't want to bend the knee to truth and morality and true philosophy because your ego has you and owns you so what the people of real holistic intelligence real morality real and real philosophy are going to say to you is you as a fucking non grown-up emotional infant and philosophical infant child are not gonna own and rule an awakened being you're not ruling us you know it own us we're not your fucking slaves and there's going to be physical consequence to continued efforts to enslave play the fucking game and watch what prizes you win trust me motherfuckers on my plane and neither a lot of people here's their psychological characteristics the truth of their psychological characteristics that people don't want to look at they don't want to identify they don't want to understand they certainly don't want to teach them to others because they're afraid of rocking the boat and have somebody not liking them let me tell you something folks what I do here on what on earth is happening I do at the level of no other human being on earth I'm not afraid to say it I've never heard any show where anybody lays things out the way I do unapologetically and with the kind of courage I do it and that's fuckin sad it's sad my heart is saddened by that and that's the problem with the world is that there aren't enough people at my level of consciousness and courage it's the whole problem with the fucking world and I'm talking to my viewers now I'm talking to your lack of fucking getting involved and what you've not done to make this a burden upon the few people who are actually actively carrying this weight and then other people want to complain that I'm asking for help fuck all you you don't know what I do on a daily basis quite frankly motherfucker and I won't apologize for it so half of this police supporter category is the bootlickers they revel in the completely erroneous religious cult belief that authority is morally legitimate when it is in fact based entirely upon coercion and violence and has absolutely no morality in it whatsoever there is no morality to the concept of Authority anybody who listens to what on earth is happening that still believes there is any such thing as authority vested in human beings you're a dumb motherfucker and you haven't gotten one thing I've ever tried to teach morally or philosophically and you're more likely than not so entrenched in satanic ego that you're actually the enemy you're actually the enemy and I don't care what you say you are you don't understand it if you haven't gotten that they are possessed and I mean that in the true sense of the word as in possession as in the takeover of their soul they are possessed by the ego hardened religious cult belief that some people can magically obtain rights that others do not possess through some political magical ritual of delegation of rights creating rights that others don't have individually they believe that some super class of human beings can magically be granted rights that others don't have they possess a completely distorted and incorrect sense of quote-unquote justice you don't know what justice truly is justice has nothing to do with punishment by a control class justice is a cosmic dynamic is related directly to natural law of the Creator so they have this distorted sense of justice and punishment but of evildoers that is conducted by human decree and I'm not saying you never take physical action Reaper Kosovo on people who have done harm to others without right but that doesn't mean you create a control system a prison system etc you know it's just people individually have to act on what is right and I'm sorry if you don't agree with that or think that that's good enough of an explanation the answer lies and not what we have to continue to make or create or make new things or learn new things it's what we have to unlearn and stop believing that we have the right to do I've said this many times feels like you don't give any solutions the whole fucking show since show number one is a solution of explaining we don't have the right to do behaviors that we think we have a right to do that's the entire problem and the entirety of the solution is to cease and desist in the immoral behaviors that we are doing that we believe we have the right but in actual point of fact nature we do not have the right to conduct and that means government and policing there is no right to do such things because they are based in coercion violence and slavery and the solution to the problem of diminishing and disappearing human freedom is to desist in those behaviors it is not to create any new systems when the behavior is desist ax din and no one is continuing to do it the problem will disappear from the world on its own how you get people to do that is you explain true objective morality to them and you continue to hammer that into their brain and tell them you either get this or I will not support any endeavor of your life as an individual and more people have to do that than not do it that's the work and it doesn't matter whether you don't like that explanation that's still what it is and that's still the solution it doesn't matter whether you haven't understood that that's the solution and it doesn't matter whether you don't agree that's the solution that's the solution and I'm gonna keep saying it and I'm gonna keep saying it's true because it is doesn't matter how many people don't like it you don't like it tough fucking shit that's the answer and the solution to get people to actually do it is hard work that's why it's not called the big party to come to and socialize it's called the one great work that's why it's called that because it's the greatest effort that humanity can ever undertake to rid someone of a false cult belief system that is hardened into their ego into their satanic Li heart and ego and I'll tell you what folks people are doubling and tripling down in refusing to understand objective morality doubling tripling quadrupling down Quinn trooping down thousand times doubling up on their ego we have to do a better job of putting this into people in front of people's consciousness and we're not doing it our group of people and the people who listened and view this show are not doing the work that you need to be doing you're not doing it I'm sorry I'm gonna keep hammering on it I don't care how many listeners I lose I don't care how many viewers I lose I don't care I am NOT here to placate your sensibilities you are failing in the work I've explained to people endlessly ad infinitum ad nauseam what the work is and you're not doing it not enough of you are doing it they child childishly these bootlickers attempt to abdicate to others their own personal responsibility for self defense ladies and gentlemen no one else can ever protect you no one else has ever protected you no one else ever will protect you only you and your behavior can create protection or insulation against any form of harm let me say that again only you as an individual and only us as a community can ever prevent us from having any harm or you know any kind of theft done to us by what we choose to do by how we think how we behave and ultimately how we act in the aggregate that is how we are given our Karma the consequential result of what we have done in the world which is our Dharma our work if we're not doing our work we're gonna receive negative karma if we're doing our work will receive positive Karma it's not always instant and it works over the aggregate level of humanity it's not always just at a purely individualistic scale and this is what people don't understand about karmic debt and consequence which is how natural law operates because they've been taught a false cartoonish bullshit New Age bullshit version of karma that is totally individualistic and totally and totally instant and it doesn't work that way never has and never will karma works over the aggregates scale and over a long period of time that is why we will lose our rights and freedom over thousands of years on an aggregate level as a species that is why if you do one wrong thing an instant wrong thing isn't going to happen to you in the next 30 seconds or over the next day or even weaker year karma works over the aggregate it's what we are building here as a collective as a species and we have to undo that false belief system then it works like a cartoon where you do something wrong and you walk outside the building and an anvil falls on your head that's not how karma works that's not is not how natural law works and it never has worked that way there is no such thing as Instant Karma in the instances that that happens it's exceedingly rare and you could say okay that Pope type of poetic justice happens sometimes but it is the extreme exception to the rule no one can protect you protection is first and foremost created by behaving rightly and then therefore receiving support and insulation from harm from the universal forces themselves of natural law the secondary way that defense against harm is created is personally through personal self-defense learning personal self-defense through combat tactics and tools that's it and no other way and then you could extend that to your community of free sovereign individuals and that is called creating a militia that's called the militia of the people that is a right that can also never be dissolved which I've explained not nauseum in the true meaning and purpose of the second amendment parts one and two the people who are bootlickers in our society who think that policing should continue are not at a true spiritually awakened level of consciousness because they still do not understand any and all government is slavery and government includes by definition policing a strong-armed class of dominating yes men who are actually a gang of street thugs carrying out the political dominant will of the ruling class called the politicians and the dark ocultist that's it and thrown behind that a sensible realm of power and that's called slavery if you stop euphemized it like a little child it's not just government it's slavery and policing is all part of slavery as a matter of fact folks most people still are so damn ignorant of human history and hit on United States history that they don't even know that the original police forces came into effect as runaway slave patrols that is the racist origin of the police forces of the United States of America we had no organized police forces officially chartered until about the Year 1948 I'm sorry 1848 in the Civil War era period for a little bit prior to the Civil War era and though those forces that formed were for the collection of runaway slaves runaway black slaves in America the police originally banded together as runaway slave patrols to go out and hunt black slaves and bring them back to the plantations they escaped if you don't like it tough fucking shit that's the true history of the origin of us police forces it's that's not cultural Marxism that is not any kind of a perception to try to bring up any hate toward the police that's the actual historical origin of police forces and they did not were not chartered in the United States until the year as official police forces until the year 1848 historical fact the other psychological group that the supporters of police all supporters of police fall into in one of these two categories are cowards and as I've said before many times on this show in all you to reiterate and repeat the creation itself the universe itself hates cowards or very simply and concisely put God hates cowards yes I will speak to that dynamic and place that as something that God actually loathes despises and yes in fact hates the force the creation loves above all else is true courage let me stay say that again the internal force and characteristic and dynamic that creation comes to the assistance of human beings first and foremost and for the most reason the overarching reason that creation sends its blessing its grace its support down upon humanity for is internal true courage meaning in spite of any fear being present acting rightly for the right reasons that's what true courage is and then conversely on the other side of that equation the thing that the universe that creation that God will put up the most roadblocks in your path to happiness fulfillment any type of you know flow of your life the thing that it will put a roadblock after roadblock after roadblock after roadblock after roadblock in your way is if you are a coward inside yourself and you say I want to do that but I'm afraid of this or I'm worried about this happening if I do that if you're that kind of person God hates you so you want to think that's a religious statement you don't even understand what I'm saying it has nothing to do with religion it has nothing to do with what any religious person thinks God is the laws of the universe come to the assistance of true moral courage for the right reasons in the world and put endless roadblocks in and frustration in the path of people without true courage that is why it is so hard to find people with true courage acting rightly and doing the right things to put this information and help put it out into the world because most people are cowards and people gotta really hear what I'm saying here listen close play it over and over again if you have to the ultimate forces of creation and the will of that create or come to the assistance of those with true internal courage for moral reasons that are doing the work for them right moral reasons and it stifles the life goals and puts everything in the every roadblock in the path of those who want to serve their own selfish agendas and don't have any true courage to do the higher level will this is what is meant by in the thalamic occult philosophy of Thelema do the will and no other shall say nay and capital W will do anything other than that and every roadblock is placed in the initiatives path that is what is meant by that in the thalamic philosophy which I happen to be a very serious student of and understand it at a fundamentally deep level not at some bullshit level of some Crowley ID who thinks he knows what is meant by in the Philemon filosophy and they're following Crowley instead of actual thalamic principles but that's another presentation altogether these people who are cowards ultimately first and foremost are self-loathing individuals without a true shred of true self-respect deep down inside there's something broken with them at some sort of a traumatic level that they did not work through and heal and they still hate themselves at some fundamental level which is why it prevents them from doing the work they are absent or they have an absent or distorted sense of true self-worth and guess what no one can make you a self-respecting person but you that is all internal shadow work that's called sitting down in front of a mirror looking into it and going why am i behaving this way when I know I should behaving better than this that's it and you know what folks you want to say that I'm sucks bad because I'm asking for help where I'm taking too long with emotional outbursts or you know you don't even know what the fuck real self-respect is okay you don't even know what it is you don't know what the shadow work is I'm doing what I'm supposed to be doing to elicit an emotional response out there from people and guess what the vast overwhelming majority of people are telling me thank you for doing good because you're lighting a fire under my ass mark a handful of people still don't fucking get it because they're thick hard heads most people get it who are at least listening to this this far in cowards are taught from a very early age in life to be afraid of everything that they don't understand this is called learned helplessness as a psychological dynamic the media does this the government does it schools do it parents teachers everything everybody we're teaching our children to be helpless slaves only ever asking us somebody else for help but never do anything themselves especially their own defense and a defense of their freedom and rights these are often not always but often physically weak people in addition to being mentally weak emotionally weak and spiritually weak they're often people who will blow away in a strong wind they couldn't punch their way out of a wet paper bag as the old saying goes and you know what if you are that physically weak get a firearm and learn how to use it to defend yourself or learn some overwhelming martial arts strategies like at least learn how to Uyghur throw a nice strong you know straight stomp kick to the knee joint or straight you know snap kick to the balls you know where you could do overwhelming damage in a very short order not even having possessing that much physical strength no people don't want to take that personal responsibility for their own defence though they'd rather call a fucking dirty cop who's taking their freedom away they always want someone else to keep them safe and or protect them from a dangerous or threatening situation and as I've already explained that is a actual impossibility in the natural world it cannot be done ever can not be done in addition to that it is actually physically impossible for anyone to prevent harm to you because they can't get there faster than you are because you're already there physically in person they've already told people that's not their job it's not their responsibility it's not their duty and they are not duty-bound to do that they are only there to clean up the mess when you allow yourself to be traumatized or victimized that's it they're there to clean up the mess and unfortunately they're there to actually even prevent people from exercising their right of self-defense and that's the problem is that people think that they have the right to stop someone else from exercising their right to self-defense cowards always almost always psychologically suffer from parental abandonment issues and guess what so two police so did the bootlickers they all do and this is the whole root of everything folks the psychological root of all these people's trauma and behaviors is that mommy and daddy failed in some form or fashion they weren't there physically they weren't there emotionally they didn't provide knowledge they didn't provide support they didn't teach morality true objective morality correctly they failed in their mission as parents in some form or fashion doesn't matter which way you know parental abandonment abandonment does not mean that the father or mother wasn't physically present it means they weren't present either physically mentally emotionally psychologically spiritually many ways that a child can be psychologically that can be parentally abandoned so don't just think it's physical abandonment and again that's why the government is all too happy to step in as the proxy parents using the two parties to represent mother and father and once again people still don't understand this this far into 2020 they still don't understand how that psychological game works it's sorcery it's psychological sorcery that's what dark occultism is it's not going out and burning ritual sacrifices of animals in the woods to Satan or Lucifer you in hard-headed lis insist people hard-headed lis insists I still get emails of people telling me I don't know what Satanism is as a fucking priest in the religion but I don't know what it is and they're telling me when they haven't had no direct first-hand experience in what the fuck it is that I'm wrong in there right fuck you you don't know what the fuck you're talking about and you're not gonna tell me who is directly involved that I don't know what I'm talking about motherfucker and I'm not gonna be nice about it or take your shit it's you who doesn't know what the fuck you're talking about who insists on that I'm telling you what Satanism really is because I know and you fucking don't you want to know what Satanism really is it's deep psychological ancient sorcery that it is about psychological knowledge when other people don't have it and that opens the door to manipulation by way of knowledge differential about how the human psychology works because 99.99999 people on this planet don't know what i'm talking about in this presentation and have never studied any dynamic of it one second of their fucking worthless lives even people who were in psychology I've had a professional child psychologist tell me you taught me and laid out more about human psychology in a three-hour conversation with you that in all the years of school ever had and I do this professionally and am paid to do it just like Freemasons who have been in in Freemasonry for decades of their life have told me you I've sat down and have a conversation with you for an hour on what Freemasonry really is and you've taught me more about the symbology and allegory of true Freemasonry than in the 20 years I've been involved in the lodge system yeah it's very easy it's because I know what the fuck I'm talking about and I'm right and I'm not gonna apologize for it and this is the problem folks we want to accept the world view violence of other people and we don't want to say no you're just incorrect and you're just a child who hasn't grown up and seen this from an adult psychological standpoint you're not correct and you're not gonna force your fucking worldview on us this is the spirit of true America that's not a political statement that's not a nationalistic statement America is an idea whose fulfillment hasn't come about yet it was the seed of an idea that started through the Declaration of Independence and is gone downhill ever since the problem is they didn't stop there and say we're just independently free sovereign individuals the end try to stop us from engaging in those natural rights and you'll find out what fucking happens and they instituted a government the Federalists as we'll see you I'm gonna end with a slide about a Federalists who was incorrect and didn't go far enough in consciousness James Madison even though he was one of the authors of the Second Amendment along with Monroe no I'm sorry yeah Monroe I believe but James Madison was one of the Federalists who was instituted the Constitution and federalized the United States government I switch back over to the slides so these people almost always are suffering from parental abandonment issues and even if they are knowledgeable I'll wait until we get back to the slides if you have to do it with the physical layer just turn on the physical layer sorry folks we're having a technological issue here oh just gonna have to give us a moment folks cuz I want to talk about this last issue with the slides up even if these people are knowledgeable on the second side of this column that I'm talking about who are the supporters of the police they will never act upon it that's what cowardice is cowardice means that even if you have the knowledge you're not doing anything with it yet can you please get the slides back up thank you so there at the bottom of the bullet points there on the right side even if these people are knowledgeable a coward could have a whole lot of knowledge but they're not acting on it and that's what converts knowledge into wisdom knowledge by itself is meaningless ultimately it's great to have it but if you're not doing anything with it why bother having amassed it in the first place to begin with what converts knowledge into power is right action what converts knowledge into wisdom is right action and you know what folks the dark occultists of our world are neither bootlickers or cowards they're actually creative people who are bringing things into the world that they want to create even though they can really only do that by proxy by distorting and changing something that's already there they do create something different in the in the ultimate end which is dark sick twisted pathological psychopathic control based slavery based but they're making something they're bearing something into existence they're giving birth to something it's dark it's evil it's satanic and guess what they have the will to do it and they have the courage to do it this is called dark care as I've talked about a lot that people don't want to hear about and that's why the universe will actually assist in the creation of hell I'm gonna say that again folks people think God is just all merciful and all caring from a lovey-dovey perspective God is law let me just say that again God is law creation is law period it's law law capital L capital a capital W God is law this is what religionists and new-age bullshitters have to get into their mind that that's what really the Creator the forces of creation are they are laws man didn't put them into effect man can't take them out of effect humankind humanity it's not a sex statement or a gender statement humankind did not put law of creation into effect it cannot take law of creation out of effect so creation respects people with courage even if they're evil it says that they put the will behind putting that into effect that they have the courage to put that into effect yes they did did their opponents have the will or the courage to stop them no they did not that's what then manifests the end that's how law works in creation and then we're all going to share in the aggregate consequence no matter how uncomfortable painful or even traumatic it is the universe says yes that is what we allowed to be created and it says yes you may have it even though it's the worst thing possible for your own evolutionary development you asked for what you got and that's why what we've been doing collectively as a as a race of beings as creating our own prison so going back to the slides this has been the psychological profile and characteristics of bootlickers who are the supporters of police and cowards who are the supporters of police and or those who will do nothing about their immoral behaviors and let me say one more thing before we move on from this folks I'm not this is not from any political side of the spectrum anybody who's interpreting this as I'm a leftist when I talked about how bad communism and socialism are and that all forms of government are really a form of socialism I had people from the left-wing saying you've gone full on a conservative retard mark no not a political statement I talk equally out against fascism and and right radical right-wing fascism and Nazism as I do radical left-wing socialism and communism because they both are arms wings of the same bird that are gonna carry us that bird of prey is going to Arius it's talents to the same place slavery they're just two models of slavery where the control a cult ruling class sits behind the scenes of both of them and says which one can we more successfully sell to the fucking dumb ignorant public and the one that sells best is the model they go with and here in America the left-wing aspect sell soul of slavery sold the best of the people and that's the model they're going with pretty much worldwide they tested out the right wing model and Nazi Germany and it didn't work out so well so they went with the left wing model of international socialism which is communism and that's what they're how they're trying to get us into worldwide slavery now I don't pick political sides politics is a bullshit illusion mind control technique to get people divided on an illusion that never existed there's only freedom and slavery there's no such thing as political parties the dark occult Luciferians control the highest levels of all politics all banking all military all policing all the food production all so-called drugs and medicine and people don't understand that yet because they're seeing things from the level of the media playing it out like a movie on a screen you're seeing the shadows and Plato's cave there's a great shirt designed maybe I'll make it politics is the belief in the shadows on the wall of Plato's cave the only reason that wouldn't be a great sure is the population so fuckin dumb they don't know what that means they've never read that philosophy so they don't even know what it means and they look at you like who you think me oh you're talking about that's how they'll respond to that shirt which is probably why I won't make it so this is not a left-wing political thing okay because it is true left-wing politics wants to dissolve police forces for an entirely different reason so they could bring in their equivalent of the Nazi brown shirts okay they want to dissolve existing policing because they want to bring in a police force that they could even more tighter control to carry out the leftist political agenda the radical leftist political agenda which will be extreme worldview violence turning into extreme physical violence caused a antifa and other institutions like them and even BLM are models for that type of violence now that's what they've unfortunately been co-opted and turned into they're not taking stances against just fascism and police brutality that's maybe how they the intent that they may have started with but that those organizations are co-opted and it's it's a shame but it's the truth that's why I don't join organizations I represent myself as a sovereign individual and that's it don't join organizations and cults it's unnecessary it always devolves into groupthink and eventually immoral behavior because individuals only have morality and a true sense of true objective morality once you're getting involved into a collective that collective takes on a mind and a morality of its own and that's almost always untrue and immoral that mindset sorry to break that to joiners but that's the truth so don't join anything even what on earth is happening is not an organization folks this is a sovereign effort what on earth is happening is nothing more than the name of my website it's not a group it's not a party it's not an organization there's no LLC there's no tax exempt status there is no incorporation whatsoever for people to think that it is other than that I see jackasses on YouTube we don't all fucking thing about me never met me in their life telling me I have 501 C tax-exempt status never happened never will happen I don't play ball with fucking terrorists and fucking pedophiles which are what government is this isn't an organization it's not even a sole proprietorship and it's actually that's none of anybody's fucking business how I conduct my business quite frankly but I'll even tell you it's just me mark passio and no one else as a sovereign free individual and that's it and that's all it will ever be what on earth is happening is nothing than the moniker for a website I built that's it so this is one of the best memes of the last year as far as I'm concerned when you're so confused that you put a come and take it sticker on your truck and then put a thin blue line sticker honoring the very people who will come and take it when the politicians command them to yeah these are the bootlickers and the cowards of our society you don't know what the fuck you're talking about little boy you don't know what the fuck you're talking about little girl you haven't studied the dynamic deeply enough you're a fuckin halfway or at best and a know-nothing at worst and nobody will tell you that you're a fucking fake patriot you're a fake fucking militia person you don't know what the fuck you're talking about cuz you're dumb and you haven't acquired enough knowledge and you think erroneously that you have it figured out you haven't figured out your fucking ass and nobody has told it to you like that you don't know natural law you don't know true spirituality you don't know the difference between freedom and slavery you're a dumb fucking dunce and I'll tell it right to you little fucking boy right to your face so put that slide back up because I think this is this really encapsulate the true mentality and psychological dynamic of these type of people the bootlickers you know this is how dumb they are this is how low true IQ they are that they can't see holistic patterns you know and they think they're standing for some type of justice you're standing for your own fucking enslavement you dumb dunce so let's move on to a reiteration of something that I did back in 2018 I am going to represent for a lot of people out there that I'm horrific ly disappointed in in the truth community and freedom movement in particular and I want you to really hear my words and the Spirit coming out of my voice and out of my body right now who think there's any such thing as a good cop I hear it over and over again on social media on YouTube on interviews that people do on podcast that people do and I'm fucking sick of it to the core of my essence that a cop can actually be a truly good person capital G good capital P person there is no such thing as a cop that is a truly objectively morally good human being that is an oxymoron in terms and can never actually occur simultaneously in nature it does not matter how good you are to individual people to your own family members how nice your disposition is as you as a human being if you are active duty police or active duty military you cannot be a moral human being from a true objective moral perspective for one who understands true objective morality anyone who understands that true logic and true philosophy from a moral standpoint knows that that is an absolute impossibility so this section is called the sheer ridiculousness an absurdity of believing that there is such a thing as a good cop it cannot occur and the truth and freedom community who believes this you have your head up your ass still you have your head up your ass still I will be re giving a section now of a presentation I originally gave in outside of Phoenix Arizona the truth mine reality conference this took place March 10 2018 my presentation was called duress dissidents and deadly force this is available in its entirety on gifts thought what on earth is happening calm in flash drive and DVD forms and it is available for free in its entirely on youtube on my website on my other some of my other media platforms so let's jump into this section this is called what is duress every police officer in the history of humanity has participated in the process of the public holding every individual of the public no matter who they are under the psychological state called duress let me say that one more time definitively every cop who has ever lived has participated in the process of holding the entirety of the public under the psychological state known as duress what is duress duress is a continuous condition of correct coercion coercion of the free will of a being or a group of beings by another being or group of beings through threats of violence and/or actual acts of violence if those being coerced do not comply with the decrees or commands they are given so that means one class of human beings decrees you must do my will and my bidding if you do not do my will in my bidding you will be punished there will be coercion to get you to comply and if you do not comply violence will be conducted against you that is what duress is and it is saying I am threatening you with violence if you do not comply and if you do not comply I will then conduct violence or have my goons my thugs conduct violence against you that is not what I think duress is that is what duress actually is when people are held in the condition of duress they are unlawfully prevented from exercising their free will to engage in rites which they actually possess and or they are coerced through threats of violence to perform behaviors against their free will so duress forces people to desist in actions which they do have a right to do and it forces them to engage in acts that they do not in their free will wish to conduct that is called duress that is coercion that is violence and ultimately if we're not mincing we're are using language euphemisms that is slavery that is slavery this is what the rest looks like it's giving your money or your life it's I will choke you out if you violate the slightest law that politicians have decreed you will be choked to it into unconsciousness and death or beaten into unconsciousness and death no law is too small or too so trivial that the state will not summarily execute you for breaking it what it is folks it's mafia rule its mob rulership that's it it's we're going to rule you because we have the physical power and ability to do it and we're going to do it because we want to and we can and we're going to exert our sick satanic will upon you because we have the force to do it now do you think any member of any institutional organization that takes part in the implementing of that duress can be a good moral person just think of it from a pure standpoint of moral logic no matter what degree they're involved in that system makes them a bad person by definition and this is the problem is that we have people who say I'm a truther say I'm a person that stands for freedom and you don't fucking understand this yet and I'm embarrassed for you because you're too dumb to be embarrassed for your fucking self next slide what's the difference between a police officer and a strong-arm mafia enforcer absolutely nothing they're both members of gangs who don't question orders or think for themselves they both initiate violence to enforce policy both have a code of secrecy a lack of transparency both cite the institution's policies for the violence they manifest in reality beautiful meme Thank You Freeth police the police great meme absolutely true get his offended as you like nothing will make it not true that is an eternal truth look at from a perspective of a mafia or gang point of view very few people do this the Mafia has many different layers of involvement right you can look at an organization like La Cosa Nostra the Italian mafia they have hitmen that go out and perform executions they have gambling people number runners you know who take bets excellent horses fighting etc okay then they have people all the way down to runners as they're called I'm just gonna take bets from one person to another and run run down the this this you know this bookkeeping thing inners take it on in a car or on a bike and take it to another or physical place whether they're bent runners drug runners money runners all they're doing is really carrying physical things from one place to another so let me ask you a question is any member for whatever reason they take part in a violent institution like this a good person all the way down to their wives who just support their efforts because they receive the benefits no no one individual member of a mafia like this is a good person no matter what how small their involvement saying all there's some good people in the mob and some bad people in mob you sound like you're a fucking retard because you are and guess what I hope this loses me friends and loses me Facebook friends I don't give a fuck I'm not here to be your friend I'm here to tell you the truth about objective morality I don't give a fuck whether you don't like me or don't talk to me all I care about is whether you're correct about what's moral or not and you're still not most of you there is no such thing as a good complicit gang member it's a violent gang a mafia is a violent gang it doesn't matter if you just ran some tickets from one place to another you're helping them get their agenda done you're a complicit gang member at any level by definition you cannot be considered a truly good moral human being by definition of what it means to be good because you are helping violence and slavery take place I don't understand why this is so hard for people to get cuz you've never heard it like this because everybody wants to dance around the topic and say say it in super nice terms instead of saying how it really fucking is and I'm sick of people thinking you have it figured out and you don't have anything figured out and you're teaching wrong things you're hurting the effort to educate morally not helping it violent street gangs let's look at the Crips and the Bloods for example or any other violent street gang these are just stock images you know don't read too much into them folks I just look for images that try to go along with the concept violent street gangs of whatever persuasion they have happened to be white skinhead gangs Latino you know drug cartels in Mexico black street gangs in LA Mich street gangs in America it doesn't make a difference they have membership all the way up at the highest levels of people who command hits to people who conduct hits and executions down to people who run drugs and or and again that's even the people's right to put into their body what they will down to people who just you know do the smallest ancillary tasks even people who look to try to make peace between gangs there's still gang members you know this is all about territorial control over a region to operate the black market which is made possible by government which is actually made quote-unquote necessary by government these are just lower-level thugs does any member of a violent street gang no matter how small their involvement is or even what they're trying to do to promote peace between neighboring gangs are they morally good people let's just take the example on the upper left which is the least ostensibly violent image and in the picture the other ones insinuate maybe that they'll go and enforce coercion upon others or actually conduct an execution of someone else but imagine even to get you know neighboring gangs saying oh we don't need to be killing each other let's just try to you know work in our own territories and promote peace between ourselves does that make them good people no there's still complicit gang members there's still people who are violently helping get the agendas of violent street gangs accomplished so it doesn't matter how low-level their involvement is that doesn't make them a good person it's just so hard for me to believe that people still fucking think that violent members members of violent gangs no matter how low-level their involvement is can actually be morally good people it doesn't matter if these go people go home and treat their wives well or treat their children well or provide for their family they're doing that at the expense of other people's rights and freedom through coercion and violence how can we not understand this how can we not understand this is the exact same situation as the police in this country or anywhere else in the world for that matter so you look at all the violent things that police do that they have no right to conduct against people kicking a handcuffed woman in the back of the fucking head you're a real man pussy you're a real man you fucking pussy you need to get clapped the fuck out is what needs to happen to you boy doing that to a woman you're a pussy fucking coward Sartain and nobody ever told you that to your face fuckhead beaten people to death dumped and fucking people in wheelchairs down on the ground hitting their head on the fucking floor dumping schoolchildren out of their seat on the back of their fucking head spray paint spraying people with mace in the face of them nothing violent you're fucking trash your whole organization's fucking trash it's sick what you do and it's sick that people support you any supporter in my sphere of influence and what on earth is happening if you support this you're fucking my enemy and you've always been my fucking enemy and if you think anyone who is involved in this organization is a good person you're basically my fucking enemy you haven't understood it from a deep enough moral perspective and you haven't understood the moral philosophy deep enough you're confused and or at the very worst you're deliberately ignoring it which makes you the fucking enemy and I'm tired of mincing my words and I don't care how many friends supporters viewers or anything I lose I'm not i don't have allegiance to you i have allegiance to truth and god and that is it and they are one in the same understand that I don't need your allegiance I don't need loyalty to you quite frankly as in as individuals I want a sovereign level we only need to forge allegiance to the same truth law morality goodness and creative force then is one in the same for all beings because that is what natural law is so look at the clown in the middle with his stormtrooper doll then he thinks is somehow cute and even they even hinting this is who we are we know this is who we are you know it's not funny prick you're gonna find out how not funny it is if you already haven't and guess what I'm not supporting you know I'm not supporting the type of violent you know so-called protests that are really have devolved into riots either because I know who they're really being conducted and done by and again we talked about that a gen provocateur II they're just trying to call for stronger levels of control for these fucking idiot enslavers but guess what at some point the cannot be allowed to continue to do the immoral violence that they are doing see what I'm talking about is what we do need to abolish the police but we need to replace it with nothing these leftist want to abolish the policing replace it with their version of policing because they want the political control that goes along with that when you replace what when you eliminate cancer of a body what do you replace the cancer with you replace it with a different type of cancer well it's really great that we got that you know cancer of the lungs out of the body let's replace it with some pancreatic cancer you know because you have to replace cancer with some other form of cancer you can't just take cancer out of the body and replace it with nothing don't you know this is what arguing with different with reforming the police's you can't reform cancer cancer is cancer garbage is garbage you don't leave cancer in the body or replace it with nothing you get it out and keep it out well that's what these people are so my question on this slide the person in the middle who's just a paper pusher sitting at a desk is he any less compliant with the agenda of the street gang thugs called the police does he bear any less moral culpability no why because he is a complicit gang member just like the other members who were going out on the street conducting physical violence he is helping them get that agenda accomplished and therefore no police officer anywhere at any time for any reason can ever be a truly good moral human being it is an impossibility according to law it cannot be done it cannot be created you cannot be a cop and be moral simultaneously it is a impossibility according to law the laws of morality do not work like that to permit those two contradictions simultaneously if you believe that can happen you are in cognitive dissonance and you do not understand natural law in its fullness they think you do but you don't have a firm grasp of it philosophically or morally and I'll tell you that because I do have a firm grasp of it philosophically and morally what these people are are psychopaths and order followers who have an agenda to control because they lack internal power in their own lives and don't have any true self respect there are self-loathing people who have deeply seated psychological inadequacies rooted in abandonment issues and traumas who have not done any shadow work any personal spiritual work upon themselves so they want to continue the psychological cycle of trauma and victim the the trauma victim cycle that's all they ever have been that's all they are now that is all they ever will be and that is all they ever can be what they really are our house slaves it doesn't matter what color they are it doesn't matter what a sensible race they come from doesn't matter whether they're white black yellow brown purple blue or fuchsia their house slaves they are the enslavers of other slaves they think that they're doing the enslavement when they're actually enslaved themselves by the master class of dark the cultists who sit behind the ostensible power enthroned in the shadows they're really calling the shots and these house slaves are doing their bidding just like the house slaves of civil war air america controlled the field slaves and there's no bigger piece of trash than a house slave because you do it to your own thinking that because you get thrown an extra blanket an extra piece of corn get tinton instead of living a dog house or even get to live in it out in the field exposed to the elements the master gave you a dog house to sleep in that's what you would sell your own people out for you fucking piece of trash your fucking trash and you always have been you don't deserve any respect because you haven't grown up to earn any respect to earn any respect you need to grow up as a true adult and a true spiritually awakened being you don't just demand respect and then somehow somebody owes it to you respect is earned first of all respect comes from doing internal work respect is generated internally first and when you're radiating it that's when you want to earn it from others you aren't radiating respect what you're radiating is you're either an order follower or a psychopath and what you're ultimately radiating what everybody really knows deep inside whether they could verbalize it or not is you're nothing but a fucking house slave boy that's all you are and that's all you ever have been and I'll say it to you because no one else will apparently order followers also have the brunt of moral culpability because this is how the dark occultists have duped them into actually taking the karmic debt away from the order giver and placing it firmly into the lap and upon the shoulders of the order follower and the order follower to holistically dumb to understand how they've been duped in that regard and how they're gonna have their lives flow much more in a difficult way and ultimately not have any of the true happiness manifest in their lives because they've taken on total immoral behavior at the command of someone else the order follower this slide is called moral culpability the order follower always bears more moral culpability I am NOT saying that the order giver bears no moral culpability I am saying that if we look at the ratio of moral culpability the order follower bears more culpability in here is why the order follower always bears more moral culpability than the order giver because the order follower is the one who actually performed the action and in taking such immoral action they actually brought the resultant harm into physical manifestation the harm could not have come into physical manifestation in the world if the order follower did not take through their own freewill decision to follow the order the resultant the the initiation of harm that they conducted upon others the order follower always does that therefore they always bring the manifested harm into physical manifestation in the 3d World Order following is the pathway to every form of evil and chaos in our world order following is the path to every form of evil and chaos in our world it should never be seen as a virtue by anyone who considers themselves a moral human being this is why all supporters of police are not truly good people you can think you are all you want but if you believe an institution should continue to conduct coercion violence and slavery you condone coercion violence and slavery and therefore you cannot be judged as truly a true moral human being from a standpoint of true objective morality order followers have ultimately been personally responsible for and mope morally culpable for every form of slavery and every single totalitarian regime that has ever existed upon the face of the earth this is why totalitarian regimes are called police states they are not called politician states they are not even called dark occult estates they are not called judge States they are called magistrate states they are called social worker states they recall politician states they are called bailiff States or lawyer states they're called police states for a reason because that is who brings the slavery in the physical manifestation the police the bottom line when it comes to moral culpability is if you actually did it with your actions your behaviors you and you alone are ultimately responsible for the resultant harm that comes in to physical manifestation as a result of your behavior not whoever told you to do it eternal truth of objective moral law nothing will ever make that statement untrue get as offended as you like so now we're going to move into the last part of the deep philosophy of this and then prod I'm probably not going to finish this but then next week I'm going to continue this and then I'm going to read the entirety of confessions of a former bastard cop to try to explain what the actual real-world actions of police and their mentality really are so this last section of the presentation here today is called the absolute sole underlined foundational first principle based truth regarding why all police forces on earth should and must be abolished like slavery must be abolished because that's what police are are the enforcers of slavery and I am NOT taking any political stance on this from a right or left wing persuasion because I don't believe in politics politics is the belief in the shadows on the wall of Plato's cave there's a nice quote from Mark passio from me makers out there politics is the belief in the shadows on the walls of Plato's cave ok so there's not going to be any graphics in this section just text because I really want people to understand this from a foundational philosophical point of view that's how important it is so let's go through these five slides human beings do not emerge from their mothers wombs as immoral beings this is the problem first and foremost is we believe that there is such a thing as human nature other than human programmability let me say this folks human nature is human programmability and nothing more I'm going to say that again because it escapes most people logically and intellectually human nature is human programmability there is nothing beyond the nature of a human being other than a human being is a programmable being let me say that again human nature is human programmability there is nothing beyond the nature of a human being other than a human being is a programmable being human beings do not come into the world good or evil they do not come into a world with knowledge or immediate ignorance what we put into a human being is what comes out of a human being once again people will argue the nature versus nurture argument from mouth to all time and if you don't understand that it's programmability you are fucking wrong you haven't studied it enough you don't know how the fucking psychology works you don't know how the brain structuring works you don't know how the formulation of behavior works because you haven't studied deep occult psychology enough and I have and I know how it works and so do your owners and fucking masters no and that's how they control you and everybody out there saying no more you're wrong there's a nature to human beings out of the womb your owners count on you thinking that and be in that fucking dumb and that's why they own your ass boy and girl and I'm tired of saying it nice you would having people insist that they know when you're fucking wrong you're just fucking wrong human beings do not emerge from their mothers wombs as amoral beings immoral behaviors are learned or influenced by bad parenting wrong teaching the acceptance of unintentional or deliberate misinformation and pre-existing yet accepted amoral cultural conditions and beliefs in essence garbage input in the form of information results invariably and unwaveringly in garbage output in the form of behavior and guess what folks I've just given you one of the occult secrets secret of Secrets I've given you something that the dark occult dark Luciferians of the dark occult hold so tightly to themselves that they don't want what what's in that little paragraph right there getting out to the world and being understood on a mass scale that's foundational principle number one foundational truth number one about why we don't need a control system of policing and government and guess what 99.99999% of the garbage illiterate completely philosophically a lack of understanding public and in total ignorance will refuse to the death what's on this slide they'll refuse it to their fucking ignorant deaths nothing will ever make this statement untrue and people better learn it if you want to fight who we're really up against you better learn the truth of this statement human beings don't emerge from their mother's womb as either moral or immoral beings either way immoral behaviors are learned or influenced by bad parenting wrong teaching the acceptance or whether it's put out there unintentionally or even deliberately of misinformation and pre-existing yet accepted amoral cultural conditions and beliefs the very essence of this statement is that if you put garbage into a human being in the form of the information that they take in you are going to receive in the 3d world as a manifested result in our environment garbage behavior or immoral behavior so then if you look at the solution the solution cannot be to try to control things from the realm of manifestation or the result you have to control you have to influence things from the realm of the cause the causal realm not the realm of the manifested 3d reality that's called putting bandages on the wound instead of actually addressing the psychological issue that forces someone to continue to cut themselves and create scars and then your calling out for bandages bandages that's what the police are they're bandages for a psychologically diseased society that doesn't want to learn where the root causal factor of that psychological illness came from folks this is alchemical gold what I'm giving people in this episode this is the heart of everything that's going on from a psychological standpoint I'm exploding the truths of the occult world onto the dumb ignorant public the profane public and most of them still can't grasp it I'm giving you the knowledge that your owners possess and are holding back from your understanding I as an individual have exploded that knowledge onto the world and I know definitively I've thrown pearls before most swine I'm gonna do it anyway because that fulfills my dharmic destiny and what I came here to do and the rest is your fucking karma not mine the conditions explained in the previous slide are unknown and or unaccepted causal factors for amoral human behavior that means most human beings will never accept what I put there they either don't know it or they don't want to know it or they refuse to know it they will not accept the true causal factors that I've just given you in slide one since most human beings either do not know or refuse to accept the truth regarding human behavior they erroneously believe that the answer to the problem of immoral behavior is to set up a system of control to ostensibly provide quote-unquote protection for human beings such as government police military etc instead of correct moral education for the young if we gave correct moral education to the young and they had the correct information as input their behavior would not be immoral garbage as output but we don't have correct parenting we don't have correct education up in that regard and we refused to do it as a people and that is why those conditions continue the immoral behavior continues slide three of this deep occult philosophy systems of control invariably attract to them those who have the internal desire to control and abuse others because of their own psychological imbalances and inadequacies what I've just spent the last three hours explaining the bulk of the last three hours this inevitably creates a system entirely built upon corruption which is what we have now the very idea of power over others attracts human beings or as I've called them garbage to the garbage of government it attracts human beings with the absolute worst psychological and behavioral qualities which I've also just outlined and explained such systems of control are inherently immoral by inception by definition because they themselves are built upon the false belief that some people may be granted or delegated rights that others do not possess when in fact they are coercion violence and slavery in their actual manifested behaviors and we'll go over this again next week slide for those corrupt human beings eventually believe that they have the right to rule everyone else and they are willing to use coercion and violence to keep their subjects or really if we're not euphemized they're slaves in line because the belief in Authority is so widespread most people actually believe that this class of corrupt and violent human beings have legitimate moral authority to command the behaviors of others most people even believe that this corrupt class of humans should possess a monopoly on the use of physical force and that everyone should abdicate their inherent right and responsibility of self-defense to this corrupt class of human beings called the government and the police we're on the last slide but you know what folks we've really run out of time this edition of what on earth is happening this is too important to rush I'm going to reiterate this very deep occult philosophy in the next episode which will be part two of the psychological state of police and their supporters and we'll be going into a full reading of confessions of a bastard cop next week when we finish this very important occult philosophy you've been watching what on earth is happening ladies and gentlemen government is slavery we'll see you right here next week [Applause] [Music] [Music] [Music] [Applause] [Music]

What On Earth Is Happening Show #228

Topics: *The Psychological State Of Police & Their Supporters Part 2, Mark was interviewed for Magical Egypt III, How To Become The True Media seminar enrollment instructions, Psychological Polarization methodologies, CoVID-19 as a massive Communist takeover of society, Police as Order-followers and Psychopaths, Characteristics of chronic Left-Brain Imbalance, Supporters of Police as Boot-Lickers and Cowards, Characteristics of chronic Reft-Brain Imbalance, the Cult of Politics, Politics is the belief in the shadows on the wall of Plato's Cave, Objective Truth and First Principles regarding Moral Behavior vs. Immoral Behavior, Proper Moral Education as the True Solutions to human problems, the Satanic Death Cult vs. the Rest of the World, "Oppo-sames" in Politics as a Divide-&-Conquer strategy, the False Left-vs-Right political paradigm, Psychological profile of Police reviewed, Police do the bidding of the world-wide Satanic Death Cult, False Spiritual "Awakening" that many people confuse with True Awakening, the Trap of the human Ego, The Inability to say "I Was Wrong," What it means to be a Truly Good Person, There is no such thing as no such thing as a "Good" Cop, Utilitarianism deconstructed as completely Immoral through the lens of First Principles, Soul Trauma, Spiritual Illness, Damaged Heart-based Intelligence, Eternal Truths regarding Police, Police CAN NOT protect ANYONE, Police DO NOT protect ANYONE, Why ALL Police SHOULD and MUST be ABOLISHED, Kabbalah as a method of Proper Reception, Teachings of Kabbalah related to Natural Law, the Causal Factors of human immorality, Human Nature is that humans are programmable beings, Immoral Behavior is learned or influenced by bad parenting/misinformation/cultural belief systems, False Information leads to Immoral Behavior, the Breakdown of the Ego to allow for integration of True Knowledge and to dissolve false belief systems, Moral Education for children, Systems of Control built upon the false belief of "authority" are always Morally Illegitimate, the Personal Responsibility of Self-Defense can NEVER be abdicated to others, Being rules by a criminal gang that others believe has the "right" to rule is ALWAYS far more dangerous than criminal gangs taking over that no one believes has the "right" to rule them, Mark's quote: "Since humans aren't angels, NONE are fit to rule.", Self-proclaimed "Christians who believe in the "authority" of Government are all Fake-Ass "Christians."*

freedom man that's what it's all about [Music] you've got the groove on freedom-fighters books [Music] welcome you are listening to what on earth is happening this show will discuss the topics of human consciousness mind control natural law vehicle and all issues that affect the freedom of the people of Earth what on earth is happening will endeavor to shine light upon the darkness of our world and to offer empowering solutions to the problems we face as humanity approaches it's critical moment of choice and now here is your host Marc Pascoe [Music] welcome one and all you're watching what on earth is happening I'm your host mark passio my website what on earth is happening dot-com ladies and gentlemen government is slavery and here on water on earth is happening we are ending slavery one mind at a time thank you for tuning in today ladies and gentlemen today is Sunday June 28th 2020 this is episode number 228 of what on earth is happening today's show is entitled the psychological state of police and their supporters part two this is building on the information that we covered on last week's program and as always in information covered here all what on earth is happening is cumulative information that means that later shows are built upon prerequisite knowledge that is covered on earlier shows therefore if you are a new viewer to the show as I always recommend you don't want to start listening from somewhere in the later episodes you want to go back to the beginning of the show of the podcast archive and listen from show number one in order at your own pace that is the way you will gain maximum value and full understanding of the information that we cover here on the show so let's jump in for today we're again the show for today is called the psychological state of police and their supporters part two last week we covered a lot of ground on this topic I'm going to review a little bit of it first I do have a few event announcements or just a housekeeping announcements I should say the big news for this week folks is I have been included in the newest and latest magical Egypt series I'm really really really excited and honored to have been included in magical Egypt three part three of the magical Egypt series it is not released yet it is actively being produced I have or been interviewed for magical Egypt three I want to thank Venise for including me in this wonderful project I'm honored to be a part of it for more information on magical egypt which first of all folks if you don't know about it shame on you okay you should know about magical Egypt this is a an absolutely phenomenal series with some of the greatest minds of our time talking about ancient Egypt and the mystery traditions thereof and if you're not already intimately familiar with magical Egypt you should absolutely acquaint yourself with it because it's one of the best docu-series out there okay this was began by John Anthony West and is continued today in the form that it is they recently released a part two series two with all of the videos and ancillary interviews I have started watching part two and it's absolutely great I'm going to be in part three for more information on this fantastic documentary series please visit their website at magical egypt calm I have several quick announcements that I want to go through again for the gifts area of my website this is the last week I'll be doing this I said that I was going to basically do this for one month into the you know modern episodes of the show ever coming back after a long hiatus my newest presentation worldview violence and the real pandemics is now available exclusively on gifts not what on earth is happening calm in the form of a flash drive where you can get the HD mp4 video or in DVD format so you can pick that up at gifts not water on earth is happening calm it will probably remain in gifts for at least another two months after which I will release it for free on YouTube and my other media platforms we are still accepting donations to complete my premiere documentary called mark passio and the science of natural law I want to thank everyone from the bottom of my heart who has donated to this project so far you have made it go better and smoother enabled me to pay a video editor and we're making pretty rapid progress on this we're going to really amp up the production now as a result of the budget as a result of people's generous donations toward what on earth is happening in general as well we are working today with a brand new video camera that is the same quality as the existing camera that we have so you should notice no difference in quality during video switching so thank you to the people who made this happen through your generous donations what on earth is happening is entirely viewer and listener supported we are supported by your voluntary donations and that is how we operate here so thank you to everyone who has made everything possible here at what on earth is happening we could not do it without your support there are five donation tiers toward the documentary effort 100% of donations go directly to production costs all donors will receive a complimentary copy of the completed documentary on both flash drive and DVD you can make donations for this effort at gifts dot what on earth is happening calm we also have new t-shirts being printed right now usually there's a three week turnaround time so I'm assuming they're almost close to being done we'll probably have these in the next week or two please be patient I'm just taking a one step at a time approach with this but the order is in the shirts are actively being produced and we should be receiving a call or an email to go and pick them up in the next couple of weeks so this is one of the new designs called mark pacion the science of natural law I want to show these up close because some people has to see a better rendition of the artwork on this this is the front of the t-shirt this is the logo for the documentary we did we decided to do a two color shirt for this one and this is the back of the shirt design as more Audi increases freedom increases as morality declines freedom declines so that's the actual artwork on the new mark pass you on the science of loss shirt coming soon - what on earth is happening gifts donation gifts also at donation gifts available is the complete mark one great work collection this is all of my publicly available work all on one very small solid-state drive with a nice keychain tag all my publicly released presentations and presentation slides all archived interviews and ancillary videos that I've done from 2009 to the present day the entire water on earth is happening podcast series with all associated images and reading materials that I've talked about and linked on the podcast series my punk rock band the founders are no masters no slaves EP with ancillary materials and this is all packaged on one beautiful and ruggedly built external SanDisk brand 500 gigabytes solid-state drive that has both USB C and USB 3 connections available at gifts not what on earth is happening calm the art drive is still an offer that I am making available and tons and tons of people are taking me up on this folks archives have exploded let me tell you people are scrambling for this information this one terabyte hard drive that you send to me I will fill up with one terabyte of my research material that has led me to the understanding and conclusions that I present here on what on earth is happening weekly it contains 1800 video files over 8,000 digital books in the form of PDF and ePub files and over 20,000 audio files in mp3 mostly mp3 format you can get the details of the arc Drive at what on earth is happening comm / arc and you can fill out the form to receive shipping instructions there I am in the works right now I am working on arc 2.0 so once again as I said last week I have this about 80% done I haven't had much time to complete working on it I am actively working on that to get it completely finished but it's all going to be coming soon and this will be the last you're going to be hearing about the arc and the new arc until the new arc is completed and then I will let you know on the show so we won't be going through a lot of these you know gifts announcements in later shows I said that I would do it for a month so this is week four they were doing it and probably be cutting a lot of this out of the next show however what I do want to spend a little bit of time talking about is the how to become the true media online seminar an intensive 23 week technology skill sharing class slash seminar that I will be hosting via zoom software and I'll be sharing my desktop and tutoring people in real time on all the skill sets necessary to basically become the new media to do what I do here on what on earth is happening this will be taking place Tuesdays from 8 o'clock p.m. to 11 o'clock p.m. Eastern Time eastern US time that's 5 p.m. to 8 p.m. Pacific time starting Tuesday July 7th 2020 and proceeding over the next 23 weeks and concluding the last class will conclude on December 8th 2020 to attend this 23 week seminar will be a 500 23.93 sense personal donation and you can enroll at gifts dot water on earth is happening comm regarding enrollment I want to talk a little bit about this this week first we have probably around maybe 10 slots maybe less left in enrollment so if you haven't gotten in now is the time to do it and that's all I'll say about that because enrollments are gonna fill up this week for sure next is I want to talk about the skill sets but then I want to talk a little bit about the email that you will receive once you enroll because there are three steps that you need to take to complete your registration for the seminar this ensures that you will be ready on day one to jump right into the zoom meeting and be ready to receive the tutoring you know in the very first class we we want people to get maximum value ladies and gentlemen we don't want you to waste any of your resources here we want you to get gain maximum value from this seminar okay so I want to talk about what you will need to do as an enrollee as a student of the seminar to just briefly get ready and we want to encourage people not to wait till the last minute to do that okay so I'm gonna talk about the skill sets I'll be teaching briefly and then I want to show people the email that they'll receive okay and what you need to do as your next steps because I feel like it's very important to do this for me to fulfill my obligation to do everything that show people everything that is necessary to get ready if you are you know a donated enrollee in the class we don't want anybody missing any class sessions and we want you to get all the value for your generous donation okay so these skills that I'll be teaching as part of this seminar are are as follows basic operating system skills and this will these skills will translate across any platform any operating system you happen to be using they will translate across whether you happen to be on a Windows system a Mac system or a Linux system file systems and disk formatting well I'm also going to be covering as part of file systems backup that's that's basic operating system skills as well but I'm going to be teaching you how to backup your data as well file and folder management or in other words the hierarchical file system the HFS workflow and best practices word processing and publishing internet and networking basics how to search the web and the dark web effectively with very good efficiency graphic design basics of graphic design this will be a basic introductory and a little bit of an intermediary skills but these will not be advanced professional like high-end techniques we're gonna be teaching people how to walk before how to crawl before they can walk folks that's the motto here of this first iteration of how to become the true media you gotta crawl before you can walk so we're gonna be teaching very basic skill sets in these areas okay I don't want anybody intimidated thinking I'm gonna be jumping and teaching really advanced stuff okay that being said if you are very advanced this is probably not the course for you this is the course for people who don't know much about these areas of Technology and want to learn so that they can start teaching natural law themselves in a public way that's who this is intended for okay basic graphic design basic print publishing how to build presentations like we do here for the show every week we're how you know how to build a presentation that is like any of my other formal presentations that I've delivered and are available you know on the internet basic audio editing and publishing basic video editing and publishing basic web publishing how to do video conferencing things like Skype zoom things like that basic sharing via cloud services if you are collaborating with others how to share documents over a cloud service again not something that I highly recommend doing things with a lot of mission-critical work but sometimes if you are collaborating with somebody that becomes necessary we're gonna show people the basics basis about the very basics of how to do that and then some instruction regarding hardware and equipment physical equipment so those are the skill sets they're gonna be taught and now what I want to do is step out of this presentation and just show people a document that I put together on that they will be emailed okay so when you enroll you could switch back over you will receive this email there's nothing that is classified or anything that you can nobody can anyone can't see I want to go through this because it's very important to people enroll the the people who have enrolled who actually you know give a donation to attend and then we say yes you're enrolled okay you need to take these next three steps on your own and you don't want to wait you want to do this now okay so the first step you'll receive an email to thank you for enrolling and tells you the dates of the seminar and then it says please complete the following steps immediately to get ready for the seminar step one to attend the weekly classes you will first need to create a free zoom account using the same email address you use to enroll in the seminar at zoom dot us slash signup okay so you have to register in zoom you have to create a free zoom account you do not need anything beyond a basic free zoom account you don't need to do the pro account the basic free account is all you need okay step number two you need to download and install the zoom client for meetings this is a simple a piece of software that allows you to connect to a zoom meeting that's all it does okay you will need to download this from the link that we send you which is Abel you what you're able to click that right there in the blue that says zoom client for meetings and I highly recommend you do this on a desktop or laptop computer I do not recommend doing this on a mobile device such as a tablet or a smartphone you will not have as good of a experience if you do it on the mobile platform I really recommend doing it on a computer on a desktop or laptop that being said if you have no other option to join the class you can do it through a tablet or a smartphone but I really don't recommend that ok people have been asking about minimum requirements for their computer system if you have a relatively modern computer you'll be fine ok you can click into minimum system requirements for the zoom client if you wish to to read those over I wouldn't really sweat it too much if the zoom client opens on your computer you're going to be fine to enter the class ok step 3 very important after creating your free zoom account please register your account for all 23 weekly meetings by clicking the below link so this is a private link that people will receive once they enroll all this does is it ensures that only the people who register are only the people who enroll through gifts are registered in the class so only the enrolled students actually can enter the class so all you will do is click that link there after you set up your your zoom account and your zoom software and then that will enable me to allow you access into the meeting that's all that link does ok and then you will be able to receive a link back that will let you put that on your calendar for a reminder when the classes classes aren't happening and um it will just you know get you actually registered your zoom account will be registered in the seminar so please we have to be able to get in touch with you folks so you know if you enroll don't enroll with an email you never check because we we are sending you things and please your real information in for enrollment you know if you put fake information in on enrollment you're gonna have a hard time receiving potential emails and instructions from us and you know we are fulfilling our obligation to contact you with the necessary next steps to take to enter the class so that's what I'm going through this for so that I have fulfilled my obligation to explain to people this is what is required to enter the actual classes so please don't ignore these emails make sure they're not in your spam folder check for them now that you will have them if you enrolled and do not wait on doing this I want to re-emphasize that greatly don't wait until the last minute to do this because then if you have problems getting that software in we can't help you if you have problems any problems we'll help you through it we'll talk you through it we'll call you okay please if you have problems email true media at what on earth is happening calm the email again if you have any issues in enrollment during any part of the enrollment or any questions about enrollment the email to contact is true media at what on earth is happening dot-com that is in the email if we switch back there it is true media at what on earth is happening come if we switch back over to the slides you can see that there are two places that you can click for that okay I explain more about how the classes will work in this email you can click that email right here if you don't receive your invitation to join and if you have any questions regarding the enrollment or schedule okay so I think that really covers it what I wanted to say about that and I'm explaining this is why we are doing this and taking a moment to go through this information because this fulfills our obligation we are telling you we need to be able to contact you if you have problems contact us okay do not wait for the last minute folks if you have enrolled you've put forward your hard-earned resources to attend this seminar do not wait for the last minute do these three things now do them now don't wait until the suck the twos they have the class it will be a very silly thing to do to wait until the last minute because then we will not have the time to help you get this done finish the three steps that we have asked you to complete to be ready for to taking the class on the very first day okay please I'm imploring people to do that don't wait till the last minute so that's all I have to say about that for now let's um let's jump back over to my slides this is also the last week I'll be telling people about the positions that we want to fill here this will remain on what on earth is happening calm / help we do have lots of people who have responded to this call for help so really big things are in the works I'll hear it what on earth is happening it looks like we're going to be able to keep everything for now free and we will not have to go to any type of a subscription model or paywall it looks like we have in some in-house graphic design help we have certainly some web development help for sure video editing we have some remote help which I'm I'm accepting in lieu of help in person here and it's very good help and we still don't have any tech support in-house so I had to make another rj45 cat6 Ethernet cable today I have a good crimper and my producer gave me some praise about that last week it was pretty funny I'm pretty fast with the making of that type of cable I had to do another one here today but still don't have any in-house tech help I would really really love to have that taken off my shoulders so if anybody's a good tech person and knows their way around desktop systems on the Mac platform and Windows platform and knows our basic you know AV equipment and networking equipment absolutely I need the help okay so there these positions will be listed and taken down once they're definitively filled but you can go - what on earth is happening comm / help and the email links to inquire about you know possibly being part of the water on earth is happening team you could email Lia at what on earth is happening calm alright let's go go back to the slides yeah just an update the corona virus has been mutating yeah sorry folks just kidding just kidding that's what it was all along you know you know just a little bit of humor thrown in there but it's really absolutely true that we are turning into a totally mass psychotic communist society that's what's really taking place in our world today there is mass psychosis taking place and if you haven't figured it out yet that this is a cult the government is a cult that the police are a cult that all is so-called woke movement is a fucking cult you know you don't know what's going on you know you think you know what's going on but you don't you know and this isn't to say that I buy into politics and I'm on the right wing anybody who accuses me of that you're also a dunce you also don't understand the dialectic that you're being played off against you know you don't understand how mind control works you don't understand how deep occult psychology works against the population and you know what folks I see too much of this I see too much of this and people who claim to be awake and you're not awake if this is that this is how you think you're not even close to being awake okay if you're leaning left or right and you're not understand it's all an illusion it's all bullshit it's all there to just play people off against each other so the ruling class can continue to rule you have no clue what's going on in this world at all not even a little bit look folks I've promised myself this week I'm not going to get ultra crazy I you know have really gone off the handle in the last couple of weeks and I realized this I'm angry I'm very angry okay I've gotten some good feedback I've heard people tell me mark you are on fire I love the energy I've had people say you know it's a little much I've had other people say that when everybody gets his man is mark passio the world's gonna change you know that kind of sacred anger drives the change that we want to see in the world if we understand what's really going on and we're angry about how absolutely pathetic what's going on is and how people have fallen for it so that being said I just want to let people know you know this has nothing to do with politics folks this is all about getting past the political psychological polarization and this is what we talked about last week we didn't get into the political side of it we got into the side of how are they creating a society of masters and slaves so I'm going to review a little bit I'm not going to go as in-depth I just want to touch upon some of the points to review a little bit from last week then get into new material but what I do want to say at this point is you know we have to stop falling for all psychological polarization that includes political polarization that includes left versus right wing conservative versus liberal this is all just the divide and conquer strategy psychologically to weaken us mentally and ultimately to conquer us and enslave us and rule us so last week we talked about the psychological polarization methods these are dialectical polarization methods that are employed between the police and their supporters one our left brain namely the police which break down into the order followers and the psychopaths and then their followers break down or their supporters break down into the bootlickers and the cowards all people who want to pass off respond personal responsibility off onto other people in the example of order followers they want to pass off responsibility to decide what is right and what is wrong they don't want that responsibility and they want to pass it off to the order givers and they say we don't write the we don't write the laws we just enforce them you know well guess what that makes you an immoral being or on its face that makes you a moral because you are not actively looking at for yourself and judging for yourself which behaviors are moral because they do not initiate harm against other sentient beings and which behaviors are immoral because they do initiate harm to others Ping's an order follower does not do that they just act upon what they are told to do and that lack of the exercise of conscience and that abdication of their personal responsibility to do so makes them bad people by definition and they don't understand that and they're apologists don't understand that their worldview because of chronic left brain imbalance is myth misanthropic it has a strong belief in the concept of authority which is a false religion a total lack of empathy which makes a class of them a large chunk of them actually psychopaths whether primary or secondary Psychopaths an inborn desire to control others because of their own perceived inadequacy complexes or real inadequacies and then adjust them they try to justify their own violence of their own behavior as a means to an end the other side the right brain imbalanced bootlickers and cowards have a misanthropic worldview just like the police do and that's why they want people controlled they also believe in the religion of authority the false religion of authority they have a total lack of responsibility to engage the self defense principle for themselves they want to advocate that personal responsibility they desire to be kept safe and protected which can never be done by someone else in which the police do not do which we're going to talk about very in-depth on today's show and they also justify violence but this in this case they justify the violence of others as a means to an end they are condoning and supporting the violence of others in this case condoning and supporting the violence of the police and the politicians who command that violence see folks we have to stop seeing any of this a lot of people will think oh because you're against the police this is a leftist approach no it is not it's not a left-wing or right-wing approach folks that's your mental schism that is in the way of seeing truth because of the religious divide the psychological the occult influenced and set in place by dark occult by the dark occult psychological polarization vision that you yourself have fallen prey to do not attribute those qualities and characteristics to me don't tell me I lean left or right it's all a bullshit illusion and I've said it so many times someone could puke at how many times I've said it and I'm tired of being accused of it because your unknown nothing and you want to insist you know where my mindset is that don't fucking tell me where my mindset is that you know nothing of my mindset at all it's the exact other way around I know just about everything there is to know about the people who control your mindset and their methods you don't understand those tactics if you fall into the bullshit divide of politics so don't tell me I don't know what I'm talking about I know exactly what the fuck I'm talking about it's you who lack knowledge it's you who lack understanding and I'm not I'm not some you know person who's going to just sit back and let people tell me what I know you don't know what I know quite frankly and guess what I'm talking to some of the listenership out there some of my actual viewership you're not exempt from this it's mostly the dumbasses that are out there in the public who happened to catch a show or two you know but let me tell you something folks my own viewership is not exempt from this a lot of you are still politically leaning and don't understand please switch back over to the slides then it's all a goddamn cult all of it that's all whatever has been that's all whatever will be politics is a dark occult religious cult that's all politics is and ever has been and if guess what folks if you don't think so you're just wrong that's it you're just wrong I don't need to justify it I don't need to explain it any further then I have you are just incorrect if you don't understand this slide there is no such thing being on one polarization side or another and have having your worldview aligned to truth because if you agree with either side of the political divide you're in a cult you're in a cult belief system okay just because I talk about how sick the left are and how we're moving in the communism people just don't understand the dark ocultist control both sides and then they float both sides out to the public and they see which is more popular and then they run with that which is easier to sell to the public that's all that's happening here that's why we're turning into a communist nation instead of a National Socialist one what do you think they don't all end up at the same place they have very similar methods they all take you to the same place they just start with a little bit different premise and have a slightly different methodologies as a matter of fact most of their methodologies are very similar and not dissimilar and they all take you to the same totalitarian prison you know it doesn't make a difference what flavor the slavery has folks it's still slavery alright so this show this whole podcast series has nothing to do with politics and has nothing to do with siding with Democrats with siding with Republicans this is why when people hear me say I'm anti-communist oh I must be a right winger when people hear me say I'm anti police oh I must be a left-wing or no it's you who doesn't know what the fuck you're talking about okay you're still in mind control you're still under mind control you're still still involved in a cult in a cult now I'm not gonna say it nicely anymore to people okay I'm gonna try to back it up and take it down a notch and just explain it but let me tell you something right now folks you're not gonna tell me what my worldview and understanding is quite frankly you don't fucking know me and you don't know what I know okay and I think I'll leave it at that and try not to keep really being vicious about that but folks I'm tired of hearing it I'm tired of singing it you know I try I try not to play into the drama but I'm gonna state it publicly nobody's gonna tell me what I understand about this and guess what you're not gonna tell me you're right when you're fucking wrong you don't know what the fuck you're talking about if you still side with the left or the right if you don't understand this is about consciousness and it's manipulation and drawing people into cult beliefs none of which are true zero of which are true in point of fact reality you're not gonna tell me that I don't know what I'm talking about in this regard because I absolutely do it is you who are mentally flawed it is you who have not taken enough information into yourself and nuh-nuh-huh done enough work upon yourself internally so you I'm not gonna let let some know-nothing little punk boy or girl who hasn't grown up psychologically or spiritually tell me as a psychological adept that I don't know what I'm talking about and no other adult should and guess what the problem is people don't get up in other people's face enough no it's not we shouldn't be just hope tender enough baby let me give you the little little spoon feed of no I'm not doing that you know why I'm the adult in the room that's why you a child isn't gonna dictate to the adult you got that a child is not gonna dictate to the adult yeah I'm not gonna allow it you're not gonna do that to this one you might get away with it to other people but you ain't doing it to this one all right you don't know what I've gone through you don't know what I've studied you don't know what I know you don't know how obsessively I've studied it to know it and you're just wrong if you think otherwise so let's get it cleared up once and for all dumb fucks out there okay this isn't a political show this is a show about consciousness and the occult and mind control and natural law and what is happening on this planet regarding human freedom versus human slavery and politics has nothing to do with it it's a fucking cult and it always has been and always will be so let's clear that up once and for all okay when people ask me why I'm not gonna wear a mask you're not putting a mask on my fucking face or body it ain't happening you'll face physical repercussions if you try I own my body I'm not your fucking slave the end how about that try to do it and see what happens you won't like the result that's called self ownership and the deep understanding of sovereignty as an individual why I'm not wearing a mask you don't need to you don't need to know anything except I don't join cults or participate in their fucking rituals that's it that time period is long past me ladies and gentlemen that's how I learned what I know quite frankly is that I was in the cult that runs the world I was in the cult that owns everybody in the world or claims that they do and guess what they actually do because of how much control over their own minds people have given them so I learned my lesson a long time ago I don't join cults and I don't participate in their rituals all right weak-minded people still do that and as I said last week politics is the belief in the shadows on the walls of Plato's cave now I want to say somebody made this meme on social media I found it in someone's feed on Facebook I do not know the actual creator of the meme but I asked for someone to make it a few people made different variations this is the one I like the most so I figured I'd feature feature it this week I apologize I do not have the author's name if they want you want to send an email to me who made this you know I'll credit you on the show but this is this is it this is an FIR I said I should make a shard of this right this would make a cool shirt but guess what 99.9% of the human population wouldn't understand it because they're unread pretty much philosophically illiterate fools and they don't even know what Plato's cave means they don't even understand what that is so you this is an allegory that the philosopher Plato was teaching people in ancient Greece he was saying reality is like people who are living in a cave and shadows are being projected on the wall of the cave from a light source and puppet figures that are behind a wall behind them by other people who are like puppet masters and therefore making these projections on the wall and people are sitting there watching the projections this was like an early video camera actually a video projector I should say you know Plato was envisioning the modern video projector actually and working like an overhead projector and he was saying they believe that the shadows are the real things and if you tell them that they're not real and they're just illusions a trick of light and shadow they'll get angry at you and want to kill you for trying to dissuade them from the belief in their illusion as reality you know they don't want to come out of that illusion they want to believe it you know you tell them hey you're in a cave that you've never left and all of this is fake all of this is just designed to keep you there looking at the movie looking at the show you know they'll want to kill you for saying there's an outside hey I could take it through the tunnel to the mouth of the cave and show you the outside world and show you that all of this is illusion and you know what they'll say they won't thank you they'll say I'm gonna kill you now that's how tightly they are totally psychologically intertwined with the illusion the illusion is their identity it's their very identity this is what it means to come out of mind-control ladies and gentlemen this is what it means to realize that politics is an illusion and a cult I'm sick of hearing from people who are involved in the illusion and in are members of the cult brainwashed members of the cult that I'm telling them something that isn't true that they're in a cult you're not going to dictate my worldview in reality I've said this a million times now on since I've come back from hiatus I'm gonna say it a million more you are gonna dictate my worldview you not gonna tell me what I know and guess what you are wrong I'm not gonna dictate your worldview either but yeah I'm not going to acknowledge that you are correct because you are not you are wrong and you are the one who needs to do work to come out of the illusion I have it clearly figured out I have it clearly understood and correctly understood you do not and guess what this is what people have to start saying to people there is an objective truth regarding it there is an objective truth regarding what is more on what is not moral there is an objective truth regarding whether politics is true or or an illusion there is an objective truth regarding whether government is slavery or not there is an objective truth regarding whether police have the right to even morally exist as an institution or not it is not a matter of opinion none of this is my opinion I am presenting objective moral truths here on what on earth is happening I am NOT stating my opinion about any of it I'll tell you when it's my opinion when I like one type of blender more than another to process my food and process make smoothies in the morning that's an opinion if I like one computer platform over another that's an opinion when it comes to what actions are harmful and initiate harm to another sentient being it's not an opinion its objective in not in nature in point of fact natural reality the same is concerned when it comes to the morality of whether police have the right to exist or not whether government has the right to exist or not it's not a matter of opinion this is what solecism tells people is perfectly fine to believe oh it's all a matter of opinion and perception know that solipsistic bullshit and it's a religion and if you believe it you're a member of a cult the whole idea of where this virus came from what its nature is what its infectivity is whether masks help it's not a matter of opinion there's a truth regarding it and most people haven't all asked backwards and don't know anything about what they're talking about and you're not gonna dictate your worldview or tell me that what you consider science is the arbiter of truth because you're missing huge huge puzzle pieces and huge huge swaths of information that you don't have gathered you don't have process and understood and you're certainly not acting upon it is you who are ignorant not me I've done that homework and I know what the truth regarding it is and you do not and you will not dictate my worldview or tell me what I must like to accept that's true you're not the fucking arbiter of truth and neither is the science you worship and guess what you want people want to keep pressing with that it's going to become physical and you'll find out what will happen and I think that's what everybody's attitude should be everybody's attitude should say you're not going to dictate a fucking worldview to me or there will be physical consequences you want to play those games watch what happens and I'm telling you this is where our society is headed folks and it's not going to be pretty and it's because people haven't done their own study and homework regarding true philosophy and they haven't done any internal work upon themselves and most of all one's doing those things they're cowards they're chickenshit cowards and they haven't taught it publicly without fear they just said oh it's great that I know this screw everybody else I'm not teaching it to other people let somebody else do that you're one of the sources of the problem not just the ignorance of other people your cowardice and not teaching it to other people if you feel you have a handle on it not teaching it to others is doing as much damage as the people who believe all the nonsense and all the cult beliefs that are out there you're doing just as much damage to society get his offend that as you like I really couldn't give a damn I'm here not to not offend anybody I'm here to tell you the harsh truth about what's going on in this reality so that it can be solved and once again one of the things I do here is I present the philosophy that needs to be under stood from a perspective of first principles first principles have to come first people have suggested pragmatic approaches to the protection of a society that comes secondary we can talk about all of that that's great thing you should put that out there to other people so you say hey there's other ways of dealing with this pragmatically but you know what you do that second you got to understand the philosophy of why doing it the way we are doing it now is immoral first then you could jump to the pragmatic and say how can we address these issues from a pragmatic 3d perspective and maybe we could do that next week maybe we can do a whole call-in show where we talk about what's a pragmatic approach to solving these issues first of all the main pragmatic approach to solving it is what I talked about last week proper moral education nobody wants to hear that that's the solution forget about implementing all kinds of control measures in your neighborhood first how about trying to teach people proper morality how about setting up natural law seminars in your local area you know in a local community center and teaching people true natural law principles there's a pragmatic approach how many are doing that you know how many are doing that that's how many that that's that's just an exact figure I calculated that for a long time I ran that through a lot of computer simulations and transmutations before I got that result but that's an exact figure right there that's how many people ratio-wise of population are actually teaching people true morality it's a joke it's a joke and our masters are laughing at us with a big fat fucking belly laugh at the joke that we are and nobody wants to hear that they want to say Oh mark you're so negative no I know the exact dynamic that's taking place of how many people really understand the causal factors and it's a piss in a pot okay it's less than that and that's why people say what do you really think happening are we winning or people waking up they're waking up on a very cursory level because of the control do they understand the causal factors yet not a goddamn bit do they understand the solutions not a goddamn bit even the people who say they understand the causal factors when you tell them what the solutions are they don't want to hear that the solutions are taking personal responsibility they don't want to hear that the solutions are educating people morally one on one and on a wide scale in their community and then wide widely on the internet they don't want to do that they want to hear a patchwork solution oh we're going to put this kind of force in place to try to protect our neighborhoods you know no that's not ultimately the solution the solution is proper moral education and you have to get involved in that work now the people out there they don't want to do that because that's your time that's your investment of resources that's your blood sweat and tears now you just want an easy patchwork solution rattled off to you in five seconds you don't want to hear the hard work you're the joke you're the joke not what I'm doing I'm presenting real solutions and have since day one this whole podcast is a solution is the solution if you're too hardheaded in fucking ego-driven to recognize that that's not my fault or problem asshole okay and I'm just gonna say it to you like that you don't know what you're fucking talking about I do all right just like that you want a buddy goes let's buddy goes and let's see who wins okay I won't be dictated to a no nothing like that you want to know what the world really instead of just the cult of politics here's what it really is it's a satanic death cult that's gonna devour everybody and there's only a few people exposing the satanic death cult look I don't know who made this one either but I'll tell you what this is the exact world we're living in this is exactly what it is this is exactly what's taking place this could be the one and only slide show for slide for what on earth is happening necessary ever okay this is the exact true view of the world that is actually occurring all right beautiful slide great graphics really well done absolutely true so I wanted to throw that in there although I also do not know who made this one but that is a phenomenal understanding of our current world whoever made it so let's do some more review of the psychological profile of all police whether they are broken down to the category of order followers or true Psychopaths so here's the order followers on the left yes sir I'll do anything you come in we don't make the laws we just enforce them we're just doing our job we're just following orders we're just the obedient little fucking Nazi we're just an obedient little fucking communists it's all the same thing it's all the same difference op op o sames as David Icke likes to call them you know same difference between the left-wing totalitarianism and right-wing it doesn't make a difference and there's another thing you don't understand that there's really no ultimate difference between where that takes us as a species and as a society you are wrong no the left and right wing are ultimately the same wings of a bird of prey who's reaching down with its talons and scooping up humanity taking it to its nest to devour them and again if you don't understand that you're still under fucking mind-control and I'm not going to sugarcoat it for you go back watch the whole series from from podcast number one and learn all the methods of mind-control because you're probably under many of them particularly your diet you probably don't filter your water you're drinking poison fucking tap water you probably don't eat good food you think you could eat whatever you want and it won't fuck your brain up and you're wrong you're wrong okay it probably has a lot to do with how your toxifying your ability of your system of your central nervous system in your body to take in information and process it properly you're fucking that whole process up boy you're fucking that whole process up girl okay and that's the problem most people start with an unhealthy body that leads to a total totally unhealthy psychological state one of the biggest ways that order followers do this is through the adrenal rush that they live for which totally screws up the brain both brain hemispheres take takes us out of the neocortical brain and all the human functions that that makes possible and routes people into the arc complex of the brain the reptilian brain so here are the characteristics of these two types of police the order followers have an extreme lack of holistic intelligence regardless of their intellect quotient they attempt to abdicate their own personal responsibility to a to discover objective morality and or in other words which actions are moral and which actions are immoral in other words they don't engage conscience that is the definition of what an order follower does they abdicate conscience which is the knowledge of the difference between right and wrong behavior and the exercise of conscience I should say is what they're abdicating because they don't have the knowledge that conscience comprises the difference the objective difference between moral and immoral behavior they want to be told by others what to do by their superiors you know they perceive other as as their superiors and mommy and daddy just tell me what to do my surrogate parents because my actual parents were pieces of garbage trash that didn't raise me properly from a moral perspective or weren't there for me they didn't pay enough attention to me they didn't do the work as parents that they need to do to properly raise me in a moral capacity and therefore my surrogate parents government mommy and daddy regardless of what party it happens to be mommy Democrat Party or mommy you know liberal party is gonna raise me and tell me what I should do or daddy Republican / conservative partier is going to tell me what to do you know you're still a child who never grew up psychologically you're still a child who never grew up mentally emotionally spiritually all of these people are psychological infants and that is what they are attempting to do abdicate responsibility for their own behaviors to perceive superiors they desire to please their so-called superiors as psychological proxy parents they have no connection whatsoever to any true personal power or true personal creativity in their lives which is where a true power comes from they have multiple deep-seated psychological inferiority complexes both real and perceived or imagined they attempt to compensate for their inferiority complexes by controlling others and conducting violence upon others and this is one of the reasons why 40% of male police are known to beat their wives they are known to conduct domestic violence upon their own spouses that's the kind of pieces of work that they are it's the kind of pieces of trash they are you're a real big man trash beating a woman that's less physically powerful you think you're a real big guy because you because you have all these inferiority complexes and you fucking hate yourself and so you want to take it out on a weaker woman your women who you beat or to take out a 9-millimeter hollow-point and clap you out son that's what those women ought to do for you beating them and abusing them every one of them would have the right to do it and and that they they'd be praised as people taking trash out of the world as far as I'm concerned at first of all I think that's what women who are abused raped you know anything like that physically that's what that's how they should answer it that's the right of self-defense that's why people should be trained in the use of firearms and be willing to use them when their rights are being taken away or they're being physically harmed or used no one has the right to do that lease of all pigs out there who are abusing their wives your trash who was raised by trash and now we have the psychopaths on the other side there are really bigger pieces of work total aggressive and callous behavior complete absence of conscience and empathy willing to engage in immoral criminal conduct to intentionally violate the inherent rights of other human beings willing to use intimidation and violence to dominate and control others have a complete absence of any sense of guilt or remorse for the harm their actions caused to others they deny abdicate and rationalize their own immoral behavior in other words they take no personal responsibility for the harm that their actions cause they're largely pathological liars or very skilled Liars very skilled at faking normal human emotions very skilled or adept at manipulating other people and believe that they will never be brought to justice for their immoral and criminal actions we looked last week at the psychological profile of all police supporters and they break down into the two psychological categories of the bootlickers and the cowards we looked at their psychological characteristics here's what they look like you know oh yeah we back the blue no you back the violence and death cult that's what the police are they are the subordinate violence and death cult run by the true priest class dark occult violence and death cult that's who you back let's say it without you familiar with and supporting you back a satanic death cult and yet you know what folks hardly anybody in the world is saying it like that I don't tune in to podcast where they say it like that I don't tune in to video documentaries where they say it like that you only get that type of total removal of euphemisms and it completely plain way here on what on earth is happening very few places if any talk about it like that and then the cowards are the ones who are they're afraid of their own shadows talk about not wanting personal responsibility you know these people wouldn't act if they were actively put being put through a large meat grinder you know they'd be saying oh it's necessary for the protection of our society if I gotta go in the meat grinder feet first so be it you know the bootlickers revel in completely erroneous the completely erroneous religious cult belief that authority is morally legitimate when it is in fact based entirely upon coercion and violence they are possessed by the ego hardened religious cult belief that some people can magically obtain rights that others do not possess they believe in this thing called the delegation of rights that don't exist for the individual we're going to talk about that today they possess a distorted and incorrect sense of justice regarding the punishment of criminals or evil doers they childishly attempt to abdicate their own personal responsibilities to others for self-defense and that can never be done in nature that can only be claimed to be done no one can actually abdicate their own personal responsibility I hear people on social media go oh there's the only thing I disagree with past you own we need police because could we actually oh just act as our own defense yes first of all you can you are just a child who doesn't want to do it secondly there are other pragmatic approaches to utilizing the members of the community as individuals to do it we could talk about those pragmatic approaches that does not absolve you of the personal responsibility of your own self-defense first and foremost so you can look at it this way does a pregnant wife have the responsibility to physically defend her own child yes it is does not fall even alone on the husband it does not fall on anyone outside of herself first and foremost a pregnant wife should even though she may not be able to do that physically against a stronger adversary she should be able to do that with firearms so absolutely that is the first and foremost responsibility of the individual even if you're in such a very precarious situation as having the the task of defending a very small child from physical harm including yourself as a physically structured weaker person from an anatomical point of view you know let's face it women do not have the muscular strength of most men that's just an anatomical fact of the way the female body is structured does that absolve the woman of her personal responsibility to defend herself no it does not first and foremost you would still have to have the responsibility of defending yourself and so when you understand those weaknesses and limitations you go to the equalizer which is the firearm then you could talk with others about strategies as individuals to help with that defense from a pragmatic standpoint but it does not absolve you first and foremost from understanding the self-defense principle from a first principle perspective and actually being equipped properly to defend your own body so we'll talk about that more let's keep on through these as a review so they attempted abdicate their personal responsibility for self defense to others bad premise it's a bad axiomatic premise it's a false axiomatic premise on its face that that can never be done because it cannot in nature you can only claim you're doing it and that makes you an ignorant irresponsible child as a being so all the people out there saying I agree with personal and everything from pollution we're dumb you're an ignorant irresponsible child psychologically you don't know what the truth is regarding it and you haven't studied it deeply enough from a perspective of first principles and you are incorrect you are wrong and you are irresponsible then that's not my opinion that's the fact of the matter boy that's the fact of the matter go period just because you don't understand that doesn't make it untrue you're ignorant and you don't understand it that's not my problem that's your problem it's still true nonetheless and you're still wrong got it get it good the the reason that these people think this shit is because they are not at a spiritually awakened level of consciousness you haven't awakened you're at a false level of awakening you think you're awakened but you're not go back and watch streetwise spirituality go back and watch the natural law seminar go back and watch all the podcasts multiple times if you have to but you're not awake you haven't taken it enough information you think you have but you haven't you think you're awake but you're not you think you need have all you need to know and you've taken it in and understood it and you haven't done that process you only think you've done it but you haven't done it and I'm not going to sugar spoon feed people who know nothing and think they know you're the one who's wrong you're the one who has incomplete knowledge fill the gaps in your knowledge and work on yourself and become spiritually awakened not just awaken from a political slash financial point of view if you think that's all there is and if you think the physical is all there is and you don't understand awakening in consciousness and spiritually you're not a wink you are under a false impression of what awakening is and you're at a false level of being awake and you're not totally awake you're halfway there at best probably a quarter or a tenth of the way away there in what you know you don't haven't done the work of coming completely online you're only halfway there you're in the process of waking up don't confuse the process of waking up with being completely awake you're not so they're not at that spiritually awakened level of consciousness because they still do not understand and realize fully than any and all government is slavery that's part of one of the tenets of true awakening watch my streetwise spirituality seminar all 20 points of what I consider true awakening which are only the 20 most important points there's more than that those are the 20 most important points of what it means to truly be awake as a spiritual being watch it again watch it 10 times if you have to hammer it through your skull you're thick-headed you're an ego you're in ego you're in ego you're in ego you haven't awoken yet you're in ego the ego has you it owns you get fully awakened the ego still has you if you think the police are necessary and have any right to exist the ego still has you if you think government is necessary and has any moral legitimacy to exist the ego still has you the cult still has you you're still under mind control you're not awake you haven't done the necessary work upon yourself you haven't taken in the necessary prerequisite knowledge into yourself filtered it properly understood it properly applied it properly in your life you haven't done any of those things and you think you know you don't know shit scum shits what you know you know balls exactly okay you know nothing I'm not gonna sugarcoat it to you I'm gonna tell you the absolute truth because there's no more time we're out of fucking time if you didn't realize 2020 is tick tock out of time on the big fucking clock you don't know what's going on no more time to say it nicely the cowards let's look at their psychological profile as a review totally self-loathing and self-hating you know no self-respect whatsoever that's what all cowardice is all in action not acting comes from cowardice whether you're not acting on things you need to implement internally or what you need to do in the physical world they have a completely absent or distorted sense of self-worth they're taught to be afraid of everything that they don't understand this is called learned helplessness they're often even physically weak in addition to being mentally emotionally and spiritually weak they don't want the personal responsibility of their own self-defense even though this right and responsibility can never truly be abdicated you can only make the claim that you're advocating that to others but it cannot actually be truly abdicated in the realm of nature they always want someone else to keep them safe and or bail them out or protect them in a dangerous or uncomfortable situation as we're going to talk about here today that actually can not be done they almost always psychologically suffer from parental abandonment issues mommy and daddy wasn't there or didn't give them enough didn't give them enough attention or nurturing in many ways and even if they are knowledgeable from a perspective of pure knowledge they will never act upon that knowledge they will never do the right thing with what they know they will never actually implement wisdom even if they have knowledge and understanding they are failures in the third step of the Trivium process therefore they have not truly mastered themselves you could know everything there is to know and you can understand it with perfect clarity but if you do not put it into the world in right action you have failed spiritually you have not mastered what it means to actually do the great work you cannot be considered a master or an add depth in that regard and I'm not talking about a master from a perspective of owning anybody I'm talking about self mastery and that doesn't mean perfection that means that you have a tremendous skill set under your belt in that regard of knowing what to do with the information you have come to correctly understand that's why it's called wisdom it's doing the right thing with what you have come to understand with all the information that you have amassed and now have as knowledge so that's a brief review now last week I also talked about I'm just going to continue this brief review from last week we also talked about the sheer ridiculousness and certainty of believing that there is any such thing or ever has been any such thing as a quote-unquote good cop once again this does not mean that there is no such thing as a cop who is capable of performing good behaviors nor does it mean they can be cannot be good parents to their children it does not mean that they cannot be a good spouse to their wives or or husbands okay that is not what I'm talking about as good capital G doing good things does not mean you're a good person a person who's a high-level dark occultist can become a member of a charity and ostensibly you know claim I'm a charitable individual look at how much I'm donating out of the billions that I make I donate a couple hundred million to these charities to make it look like I'm a good person but really behind the scenes I'm an evil eugenicist doing a good behavior in the world does not make you a good person what when I'm saying put the slide back up what I'm saying good here wrapped in quotes I'm talking about what does it actually mean to be a truly good being capital G good there is no such thing as capital G good when it comes to police because you're engaged in an institution that on its face from its very foundations means that you are engaging in a moral and criminal behavior whether you think so or not or whether anybody else thinks so or not it will never make that statement untrue the very institution of policing is slavery on its face whether you understand that or not that's subjectively eternally true the end for all times and places nothing anybody says can make that a false statement if you don't accept it as the truth you don't understand and you are wrong that's all comes down to and your ego is in the way of understanding the truth of the matter your ego is in the way of understanding the truth of this matter your ego is in the way of understanding the truth of this matter from a philosophical spiritual and moral standpoint you're taking in of knowledge and information and applying it is incomplete or broken in some form or fashion you haven't done the work correctly or properly and that is not my fault that's not my fault as a teacher because I've taught it perfectly clearly that's your fault and problem your fault and problem you are to blame because your ego is too fucking hardened and you think you're right and you can't say the magic words that every mystery tradition told people were the three biggest magic words you wanted the big you want the big incantation of all time you want the biggest summoning of all time of a different energy that comes upon the beam to make them transform and go through a transformation of the spirit the the biggest incantation / spiritual invocation of all time in any tragical tradition that has ever existed is I was wrong there it is ladies and gentlemen you've you've just been given one of the occult secret of Secrets along with how natural law operates you want to say the biggest thing can't a ssin and biggest invocation of calling down a different form of energy that can ever be called into the body into the mind into the soul get full in love with the phrase I was wrong and you know how many times I've said it four more seconds than I've ever put in the working in what on earth is happening I've said I was wrong that many times okay and guess what folks this is why we live in a satanic culture and society because people cannot admit the simple thing that they have been duped about certain things they have latched on to a false belief system and that they were wrong regarding what they have previously taken in regarding information and it has formed a calcified belief in their psyche and they cannot rid themselves of that absolute malware in the brain this is malware or a virus of the mind and your psychic self defense or your antivirus software is faulty the antivirus software you need to install and run is called I was wrong about this I didn't have the necessary information to process this and come to an accurate conclusion from foundational first principles see people who don't understand this truth can't argue from first principles they try to argue from a pragmatic point of view of utilitarianism while utilitarianism isn't moral principles you could justify anything according to you tell you Tillet aryan principles i need to run this railroad through this neighborhood and these two people their homes are in the way and they aren't gonna sell or move so I'm just gonna bulldoze them with the minute and kill them well that's utilitarian you're gonna get done what you want to get done but does it make it moral utilitarianism has nothing to do with first principles morally that's why they're called moral first principles they have to come before everything else and if you don't understand the statement that there cannot ever be a good cop you do not understand moral first principles from a foundational point of view your thinking is flawed you have to say I was wrong I'll tell you you were wrong but I can't make you accept that you are wrong it is the truth that you are wrong it is not my opinion that you are wrong that is not my opinion or belief it is the fact of the matter that you are wrong according to eternal objectively true first principles that are not beliefs that are laws in nature you however have your ego so calcified and hardened that it is in the way of your reception of first moral principles that is the eternal truth of the matter and I really have never heard anybody explain it like that to my knowledge I'm the only one who explains it like this in the world so let's look at a brief review with some different slides of this true this eternal truth this is not my opinion these are eternal truths that I'm going to put up here the eternal truth regarding the police okay they are not and cannot protect anyone they're not protecting anyone right now that police can not protect anyone police are not there when an act of violence is about to take place no one is closer to your body than you are you are inhabiting your body with your consciousness so you are one with it the people in this room with me right now two other people are sitting in the very room where I am at right now they are incapable of protecting me only I can protect myself even though there's two other people in here with me they might assist in my self-defense but they cannot provide for it because no one is closer to me than me the police cannot protect anybody from a purely 3d utilitarian pragmatic point of view you are the first in your line of defense physically against anything or anyone if you don't understand that you don't even understand the way the laws of physics operate let alone first principles of morality secondly the police don't protect anyone it is not their job description you can look it up the Supreme Court has roundly ruled and decided and there are several precedents even in the Supreme Court of the United States and in almost every other country in the world the police do not have a duty or responsibility to protect anyone they are there to enforce code statutes and code and they do that by showing up once they have a reasonable suspicion or a definitive understanding that law code in any particular jurisdiction has been violated or broken which is not breaking natural law it's breaking the law of man and then they show up after the fact to clean up the mess to then do some form of punishment to the person who broke that statute or code they do not sit there going this person is in danger of possibly having their rights violated let me watch over them and protect them that is not what police do they show up after the fact of violence has been committed and then they try to capture the committer of that violent behavior or the breaking of their code which they are charged to enforce and then they take the person and bring them before some say site type of a judge magistrate or court system after the fact so police right now aren't in the business of providing personal protection for anyone if you believe or say who's going to protect us oh we're doing away with the police how we're going to do any protection where's my vomit puppet when I need it I'm not gonna try them out this week okay but I'll do the same absolutely completely you know brain burnt voice okay who's going to protect me when uh you know the police were abolished let you talk like you have shit growing out your mouth okay this is how dumb you sound this is how dumb people sound and it's sad it really is sad that people think this and in the 21st century this deep into the 21st century that they actually believe please care about them and want to protect them you are a naive silly minded shit-for-brains child you know and I you know again I I just I say that I'm gonna reel it back but in all honesty it's so difficult because of how totally bullheaded people are why what's wrong with you I want to know like that you know what the Rosicrucian question is to ask what they teach people when they see this much of a destroyed soul and mind what eles you what made you this fucking broken as a being why are you so broken what is the trauma that is going on in your mind and heart what is wrong with you do you want Stan you're sick do you understand you have deep-seated psychological and spiritual ailments and in your heart and your very heart and the core of your heart and the core of your soul you're sick you're sick at the core of your soul what ails you brother what ails you sister it's very hard to reel it back and actually try to go there into the actual realm of heart and spirit because of how much damage your way of thinking and your false belief has done in the world you're sick you're ill you're spiritually ill more than anything else you're mentally ill it's a mental illness but at the very core foundation it's sickness of the heart you have a soul sickness you have a spiritual illness because you're heartbroken you you some form of trauma damaged your heart from a soul point of view because that's the seed of the soul is the heart not the mind not the brain and people who go oh this isn't all about the mind it's absolutely about the mind and psychic shielding and self-defense of the mind so you don't fall prey to mind control but ultimately you have to get at the heart that's why even just intellectual intelligence of this is not going to get it done you have to have heart based intelligence that spiritual intelligence so my question to the people who don't get these dynamics is what ails you at the level of the heart at the level of the soul what trauma did you undergo that broke you at the heart level at the spirit level or at the level that forces your false religious belief into a belief that there is no such thing as spirit that the material is all there is this is a soul sickness radical materialism is a soul illness it's an illness of spirit so the question that I have to keep putting out there and make it a mantra on what on earth is happening is what ails you what is going on to traumatize you at a level of soul that maybe will help me realize this is where got to get to and I need to take my attack level down a little bit but guess what folks it's still gonna be there because you're not taking my freedom without physical repercussions and let me tell you something you will encounter the anger of 10,000 legions of macro beings 10,000 legions of Archangels I will fight with you won't encounter a human being you'll encounter a Supra hyper human in the way I will fight for my freedom I'll fight like a thousand other men when the time comes so and so will many others not enough but many of them will will make up for the lack of numbers with the way we will physically fight and trust me you will encounter something you will not even imagine as human the police don't protect anyone because they actually can't you know you have a flawed definition and axiomatic definition from the core level of what protection means you don't even understand the word of what it means to protect police do not prevent anything from happening they don't even deter what might happen everybody still has free will and anybody can act violently at any given time you know there is nothing preventing somebody in this room from picking up one of the firearms that are actively in this room and loaded from killing any of the other individuals in this room for no reason right where I'm sitting nothing prevents that no one is protected from that right now unless they have their own firearm on them and then they'd have to be faster with it so just think about that if anybody in the room where I'm sitting right now me or one of my producer or backup producers sitting here right now wanted to do any form of extreme violence any of us could do it to each other because there's multiple floated firearms in here right so what's preventing that is anything protecting us from that no nothing we are entrusting that no one will do that but that doesn't provide protection the police aren't going to stop that from happening if one of us makes the freewill choice it may be a bad freewill choice to do it because of repercussions that would happen but that's not preventing it from happening nothing prevents violence like that from happening police only show up after the fact why don't people understand this it's a very simple concept it's not that difficult they don't protect anyone they never will protect anyone this institution cannot does not and never will protect anyone ever it's a false axiomatic belief that they do or even can and if you don't understand that I'm sorry that you're just wrong and this is just the eternal truth your mind is somehow either broken and/or calcified in such a way that you are hardened into a cult belief system that's it the police only exist to coerce human beings and their behavior into obedience to the decrees of the occult ruling class that is the job of police it is not to care about protect or provide for your protection in any way or provide any kind of service to you they don't serve they don't protect it's a myth it's a false myth it's a false cult belief they exist to coerce human beings and human behavior into obedience to the to the decrees of the occult ruling class that is their actual function serving and protection is their ostensibly function which is a lie their actual function is they are serving the occult ruling class who considers themselves the gods who writes the law of any given society and that those decrees are to be enforced by a strong law mafia enforcer class known as the police and that is what all policing is anywhere in the world police exist to conduct violence upon human beings who disobey the decrees of the ruling class that is all they are there to do that is all they ever have been there to do that is all they ever will be there to do if you don't understand that that is your problem this is an eternal truth and not a matter of perspective or opinion and never will be this is not opinion these statements on this card on this slide are not opinions they are eternal unwavering truths in nature for all time and places the end nothing you say or do will ever make them untrue and if you think they are you're just wrong and your ego is in the way and you haven't studied it enough from a perspective of first principles and you haven't decalcified your own ego by doing internal shadow work upon yourself enough and if you think anything other than what was laid down on that slide you're still not awake you're in a false level of awakening appearing as Awakening and you don't really know what true awakening is and you're certainly not at that level of consciousness and I'm the one who will tell you since most other people won't tell you that I will and I won't apologize for it next slide I took the time last week to go through some of these but I was going too fast and this section is too important to speed up over so I'm gonna go through it nice and slow this week and we may need a third week to get through the material I want to talk about and cover if so so be it this section is called the absolute foundational first principle based truth regarding why all police forces on earth should and must be abolished not reformed but done away with replace with nothing else you know I'm gonna ask for another piece of art maybe I'll have my graphic artist who has come on board in house make this for me this week or maybe even tomorrow I need a slide of someone with cancer that just had as a post-op sitting in the hospital and just had cancer surgery to remove a big chunk of lung cancer that they had in their lungs and their friends visiting them and says so what kind of cancer did you decide on to replace your lung cancer Jim that's how asinine and stupid someone sounds when they say well we could get rid of the current form of policing that we have but what are we going to reform it with what are we going to replace it with well what do you replace lung cancer with when you cut it out of the body what kind of cancer do you replace lung cancer with when you have surgery to cut lung cancer out of the body because it has spread over the majority of the lungs and only surgery's gonna reverse it you cut that cancer out who do you replace it with how asinine of a question is that what do you replace what kind of cancer do you replace your existing cancer with I mean anybody else and that sounds like a complete fool and they are so when people go well what are you going to replace the police force with once you get rid of it we can't completely abolish it and replace it with nothing so what are you gonna replace it with what kind of cancer you're gonna replace that cancer you're reforming or replacing with that's how dumb you sound just like a cancer that which the police are you don't replace it with anything when you cut it out of an infected body you get rid of it you throw it in the trashcan where it belongs because it's garbage to begin with and you say good riddance to bad rubbish and you don't replace it with anything you know what the answer what you replace it is correct moral and philosophical understanding correct moral and philosophical understanding from an educational point of view so let's look at these there's five of these I should say there's five absolute foundational first principle truths regarding why all police forces must be abolished so in these slides I've changed it slightly to say these are five eternal truths regarding why all police forces should and must be abolished they are not opinions they are not perspectives they are not my perspective they are the total complete absolute unwavering truth in nature that can only ever be understood or someone cannot understand again the philosopher Kierkegaard once said there are only two ways that any member of humanity and a human being is ever fooled they accept that which is not true and they refuse to accept that which is true that's it it's as simple as that folks everything else is ancillary to that all problems in the world are caused by the acceptance of untruths that hardened into calcified belief systems and the refusal to accept truth this is why in the Kabbalistic tradition I've talked about some occult traditions I think we need refreshers on occult traditions at some point in the future as well in the Kabbalistic tradition the true positive Kabbalistic tradition again every occult tradition has its polar opposite there is a light occult tradition and a dark occult tradition the occult is simply knowledge of how the laws of nature and the human psyche function and operate and how we are receiving the experience collectively as humanity as a species that we are receiving as how our behaviors interoperate with those laws so the Kabbalistic tradition has a concept of receiving reception that's what the word cabal Kabbalah actually means in the ancient Hebrew the word Kabbalah means to correctly receive now let me say that again a lot of people don't know this or they have the translation incorrect in the ancient Hebrew the word Kabbalah and as an occult tradition what the Kabbalah does to actually teach is or reception correct reception of natural law it teaches how natural law actually functions and it teaches how you get the ego out of the way through work upon yourself to properly receive the teachings of natural law see just the teachings being out there into the public which they certainly are is not the answer or solution the problem is most people are completely inadequate and ill-equipped to receive these teachings this is why the majority people cannot understand what I have said here or what on earth is happening and or reject these eternal truths that I am speaking it is not a matter of perception or opinion there is one truth regarding this one objective eternal truth for all time and places you either discover it know it and apply it in your life and put it into action and get a good result or you stay ignorant because of your calcified ego your improper reception of those laws of nature and those eternal first principle based truths you don't accept them and therefore you don't align your behavior to them and then you get chaotic results in our shared experience of human life that's how it works folks that's the deepest aspect of the occult world is exploded onto on to you right there in a couple minutes segment and that is exactly what it is how other people go that's not what the occult is you don't know what the fuck you're talking about if you are if you are in something to claim the media cult you are in a very low level of it that has you hoodwinked boy and you don't know what the real occult secret teachings are I just gave them to you in a few minutes whether you understand them or not not my fucking problem whether you apply them or not that's your fucking problem in your karma there's nothing wrong with my teaching there's a problem with your reception let's get it straight and nobody's gonna tell a psychological adult who knows this deeply and with a high level of precision then I don't know what I'm talking about and you as a know-nothing ignorant ego driven person with total reception problems in the way do know you don't know what you're talking about see that's the problem again is that the ad depths of these traditions have let the children run the whole house they let them run the whole house of Earth they've let them run the whole space of Earth and we gotta start refusing to back down and stop giving ground to little psychological infants that are going to destroy the whole fucking world that's what has to happen you know and that's what people unfortunately don't have the courage to do they won't stand up to these violent infants in the world whether they be the dark occultist the order followers the sick twisted cult that they're creating socially you know this mass psychosis of the work woke world you know you ain't woke to a pile of dog shit is what you're woke to you know if you're even using the word work to apply yourself you're not awakened you're not really spiritually awakened you think you have some knowledge under your belt and you've drank very in shallow drafts from the period spring you haven't drank nearly enough knowledge into yourself from that fount of knowledge you have a false level of what you know think you know and nobody's gonna tell me that these ignoramus is no and I don't you don't know what I know what like I've said a million times quite frankly you be you would shit yourself if you knew what I know you if I think I've all put into your head in one shot you'd faint you diarrhea be dripping down your leg and you would go unconscious you wouldn't be able to process it you got to take it in and chunks over a long period of time and most people aren't doing it most people are completely failing and negligent in that regard when it comes to it Apple occasion of the Trivium you're not even doing the first part of the Trivium which is gathering the knowledge to yourself that's the grammar stage and you're not even doing that let alone coming to an accurate understanding and acting rightly upon it those two steps aren't even in your vision let alone actively doing them so let's go through this one step at a time and this makes people see you can't put one slide of this out there you got to put all five so that are taken in context if you're going to put this out there there's five eternal truths regarding why all police forces should and must be abolished point number one eternally true philosophy human beings do not emerge from their mother's wounds as immoral beings anybody out there that thinks human nature is either good or bad doesn't understand the nature of human being as a programmable species the nature of human beings are that we are a programmable species that is our nature our nature is that we do not think any particular way on our own you know from our inception of being born from our conception and birth it is not that we are any kind of angelic being is that know everything or are always good neither one of those things are human nature and the people who think either one of these things are human nature have their head up their ass I'm so sick of hearing world looks human nature no it's not human nature if you have said that anything other than the fact that human beings are a programmable species is human nature you are incorrect about what human nature is and you don't know what human nature actually is the nature of human beings is known is discoverable and is actually known by many people and it is this human beings are a programmable species we can be programmed with good information that will lead to good behavior or we can be programmed with bad information that will lead to bad behavior period that is the nature of human beings immoral behaviors if we're specifically talking about wrongful behaviors meaning behaviors that initiate some form of violence or harm to other sentient beings okay that's what we're talking about they're immoral behaviors are learned or influenced they are not in any way nature of a human being human beings don't come out of the womb doing wonderfully good things and they don't come out of the womb doing devilishly bad things human beings come out of the womb as a being that is capable of receiving information in many different forms their behavior then becomes learned or influenced in other words informed through information and then their behavior will go in a certain direction that is the eternal truth of human nature nothing will ever make that untrue it is not my opinion or perspective it's how it actually works in nature so immoral behaviors are learned or influenced by bad parenting by wrong teaching by the acceptance of this bad parenting this wrong teaching or the acceptance of unintentional or deliberate misinformation being put out into the world and pre-existing accepted amoral cultural conditions so let me slow down on this because it's a lot of words all you know put together as a definition let's go one step at a time okay immoral behaviors aren't not innate they're learned or influenced they're learned or influenced by bad parenting this means our parents teach us incorrect information about how behavior should be and then children pick that up from their parents and then think it's true because they learned it from their parents it is learned or influenced from just simply wrong teaching from other places in the world other than parenting this means teachers teach wrong things that are incorrect or immoral and tell people that's the truth and then they accept it and they run with that behavior the media teaches wrong teaching religions teach wrong teaching so I'm talking about anything that is untrue and leads to immoral behavior because it is untrue and then it is accepted as truth that is always going to lead to immoral behavior as I said last week one of the only things that does matter is whether you are correct or not that is not ego that is truth about how things work in the real world from a true pragmatic point of view this is why if you are correct about what objective morality is it will lead to right or correct behaviors which are moral that's why the word right and correct ultimately mean the same thing that's why we use the same language and it's just in a different way does the word right mean correct or does it mean moral when we say right and right or wrong are we talking about whether someone was correct or not or are we talking about whether their behavior was moral or not it can mean either one that's why we call it right or wrong right behavior is going to be based upon right information or correct information wrong behavior is good or immoral behavior is going to be based upon wrong or M or incorrect information so immoral behavior is also created it's learned or influenced by unintentional or deliberate misinformation so this means other people learn these things and then then they're putting it back out there for other people and they're wrong therefore they're doing an unintentional disservice they're not doing it deliberately it's unintentional but they're incorrect anyway and then they're teaching that which is incorrect or somebody could know what's true and deliberately be putting misinformation out there that is done through the media and the dark occult the media and the dark occult are always putting in from this information or misinformation out there to the public they don't want people to understand the truth and come to a place of knowledge understanding and wisdom they want people accepting completely erroneous beliefs that makes them easier to control that creates more chaos in the world because people's behavior is going to be based upon that misinformation and misunderstanding and then therefore they're going to be able to justify their existence as a control mechanism so the last part of this is that immoral behaviors are learned or influenced by pre-existing yet accepted immoral cultural conditions and beliefs now let me say that again pre-existing mean they're already here when you were born yet accepted pre-existing meaning they were here long before you were here they existed before you were born yet the culture as a whole the people as a whole have accepted these pre-existing beliefs so you've grown up in a culture that was already practicing these cultural conditions and beliefs and accepted them as true erroneously falsely so you're in a culture that comprises a false religion already that was like that before you were born that's what I mean by that part of the sentence so in essence if we put this all together where does immoral behavior come from garbage input in the form of information that we receive as a human being from the time we're born until the time we grow into adults and then moving even through that time period continuously garbage input in the form of information results invariably and unwaveringly as law 100% of the time in garbage output in the form of behavior that is human nature that's the sentence that describes human nature I'm so sick of hearing well people don't understand this so that's just human nature oh people want to do things this way so that's just human nature you sound like a completely just you sound like somebody that got shot in the brain and lived you know okay you sound like you took a hollow-point to the brain and somehow survived but you ain't working on a full stack okay that's what you sound like when people talk about human nature and sound like this you know how much I know you studied about human psychology and studied about deep psychology that they're not gonna teach in Psychological schools you sound like a complete idiot ik moron no nothing fool that has not taken in one bit of information from day one and it's sad it's sad you know the old say saying it's better to be silent and allow people to think that you're a complete idiot than to open your mouth and remove all doubt this is what the people who claim to know what human nature is and say it actually are you've removed all doubt in your total level of imbecilic belief and your total idiocy all doubt is removed you should just keep your mouth closed and stop letting the diarrhea drool from it because you are embarrassing yourself you're embarrassing yourself about how little you know about what the actual can the actual inherent condition of a human being is you know and this is the thing people just err on the side constantly of total um ignoramuses when it comes to human nature this is actual human nature right here in one sentence when it comes to the nature of the human being we are programmable beings therefore garbage input in the form of information results invariably and unwaveringly and garbage output in the form of behavior that is the root level cause of all amoral human behavior it has nothing to do with human nature it does indirectly in the in the discoverable truth that human nature results from information I'm sorry that human behavior results from the causal factor of human behavior of human informational input let me say that again knowing that human nature is that we are programmable and that garbage input in the form of information causes garbage output in the form of behavior helps us to understand that that's all that human nature is human nature is simply that human beings can be programmed with information information aliy that's all it does it helps us to get down to that causal level understanding of why do people behave the way that they behave this is what I talked about on day one everybody wants to look at the symptoms they want to look at the three-d symptoms how did this play out what is this institution doing what is this political party doing you know what does this religion you know what are they doing in the world it's it's irrelevant to the point where you can know we're all dumb and immoral behaviors come from and worldviews come from if you understand the causal factors of what drive behavior the causal factors of what drives behavior is what information got put into the human psyche to create that worldview belief system and ultimately drive that behavior and if you want to solve it you cannot solve it from the realm of effects you cannot solve it from solve it from the realm of manifestation it must be solved from the causal level of belief of mind of what information went in to form the core incorrect erroneous beliefs that we are acting upon as a culture and a species that's the only place the problem can ever be solved from and I'm telling people that that that's the the core cause and therefore knowing that is the core solution but they don't want to hear that because why you know what that involves that says you know what you can't rearrange the deck chairs on the Titanic by rearranging reforming institutions or doing things different in the 3d world what the world that has to change is the inner world the mind has to change the Spirit has to change then the external world changes in the idiots out there who don't know themself and that's what the world idiot means one who does not know themselves from the original Greek it's not just an insult it's an actual understanding that someone else doesn't know the nature of self they don't know human nature okay they're an idiot internally so when you're an idiot and you don't know the self and you don't know the causal factors of what drives human behavior you're going to be looking at all the symptoms and then reaching and grabbing in the dark for solutions the solution is changing the operational software or operating system which is the foundational understanding of how reality functions a worldview if you don't change that internal worldview nothing in the external manifested reality can ever change it's impossible according to the laws of the universe get over it it just doesn't work that way it's the equivalent as I've said many times up holding your hand over a fire and insisting I will not be burnt the flesh will live it will survive I will hold this over here for five hours and it will not burn and I will not result with a charred stump good luck with that but that's what you're doing when it comes to belief systems about government police what what constitutes rights you will never make the things that you believe about that untrue you'll never make them true you'll never make your erroneous beliefs about them true and you'll never make the truths about them untrue all you can do is get your ego out of the way and properly receive the truth regarding these first principles that is what this process is it's the death of ego to make way for proper reception which as I said is what the word kabbalah means and the original Hebrew it means proper reception court how to correctly receive the truth of natural law and part of that is understanding that whereas human behavior come from what drives it truly the dark occult a depths know this they know every aspect of it which is why they can pull the wool over your weak-minded and weak spirited eyes and that's why they can own you and control you that's why there's still your masters and they're forever gonna be your masters until you change what's going on in here it doesn't matter what you attempt to change out there totally and utterly irrelevant the thinking is what has to change first and that's where all the resistance lies that's where all the ego resistance lies because people are so tied up in the mind and in their current level of beliefs that they would rather die than change their thoughts about what they currently believe and they would most certainly rather die than admit that they were wrong and guess what folks I've gone through that process to discover this as truth I thought all the ways that you currently think previously everything that I'm saying about how you think that you must change if you are to see the world change I currently thought all of those things that I talked about drooling from the mouth diarrhea I was one of you I thought every one of those false beliefs I was poisoned with every one of those false beliefs myself and I repented of them through hard self work through sitting in front of a mirror and staring into the mirror looking at the reflection coming back hating it and crying about how bad I hated it until I changed it by an act of my will until I could stand looking into it and say I love that being because I said I was wrong and I changed the way I thought because I was the problem I no longer am contributing to that problem but a lot of you are because you won't go through that dark night of the soul and say that you are wrong I've already done that past tense and trust me I've done it so hard and in-depth and intensely that if most people did it all at once they would have committed suicide already if they did it to the level I did it so it's not something to trifle with there are methodologies to do and we can go over shadow work methodologies but guess what the number one is take a mirror in your home and put a fucking chair in front of it and sit there for hours upon hours looking at yourself and what you currently believe is true and ask yourself is it actually true how what is this done to my life and others what will clinging to this belief continue to do to my own life and to the world at large and when I ask myself those questions I broke down week after week after week doing it that was my shadow work that's true self-respect taking another look at yourself and what you currently believe in think and you know what that's the hardest work there is to do that's harder than even changing somebody else's thoughts you think changing somebody influencing somebody else's thoughts is hard that's even harder that's why so few want to do it and then there's other techniques you can employ you can employ shamanic techniques you can employ techniques with sacred plant medicines you can employ techniques with emotional freedom technique EFT tapping working with meridian lines in the body you know nutrition is a self-improvement technique that's inner a looming physically there's so many ways we can do whole shows on just techniques but you know what the most brutal and effective technique is putting that chair in front of the damn mirror and sitting there with yourself quietly in a room let's see how well you do with that task there's everybody's homework I'll bet you most of you get d-minuses at the very best if not outright FS okay and we need to do better at that that's the real work don't think that the external work isn't important because I've said that the internal work has to come first though and that's what most people I'm taking off in this direction you can go there what you just said that go there fine good luck with all of that I'm going this way you know that's what 99.9999% of human beings will say because that's how much they hate themselves and have deep internal self-loathing issues and no true self respect so let's move on to the next point the conditions explained in the previous slide are unknown and/or unaccepted causal factors for a moral human behavior just as I've said so I'm just reiterating here formally in the philosophy as a statement that I want people to really just look at this text read it and understand it deeply read it many many many times if you have to and understand it that's why I'm putting no other visual distraction this is core philosophy from a first principle perspective that needs to be understood regarding police the conditions that I explained in the previous slide that garbage input in information results in garbage output and behavior okay they are unknown by the vast majority of the public and or they are unaccepted by the vast majority of the public but they are the causal factors for immoral human behavior now again if this is unknown people remain in a level of ignorance if it is unaccepted and it is unaccepted look folks if you just put that first slide in front of somebody if you put the first slide about where does immoral behavior come from and explain this is the real causal factor that we should be calling and attributing the human condition to being programmable I'm going to tell you at least over ninety nine and a half percent of human beings will disagree they refuse to accept it as being true they will not accept it as being true ok so right there we have a problem in reception that people think they're correct about what the causal factors of immoral human behavior are and you know you'll hear you'll hear oh it's just their genetics it's just how they were born they're either born high or low it's just cultural it's just this or that no it's exactly what I explained as bad and formation goes in bad behavior comes out like a computer you put garbage programming into a in the source code the result on the screen you're gonna get is going to be garbage and nonsensical you put great written source code that is correct and has all the correct structure and algorithms in it you're going to get great results when you input information and process it and get output on the screen that's how it works so those causal factors for a moral behavior are either unknown through whatever means that they are unknown people are dissuaded from looking into them they're actually somewhat hidden okay or people just haven't looked into it or they're unaccepted meaning people will here it will somewhat look into it and yet they will reject the truth because of their hardened ego so since most human beings either do not know or refuse to accept the truth regarding human behavior they erroneously believe that the answer to the problem of immoral behavior is to set up a system of control to ostensibly provide protection as we said these systems of control only claim to provide protection but can never actually provide it in nature they set up these systems of control to ostensibly provide protection for human beings such as government police military etc instead of correct moral education for the young this is what is missing from all so-called educational systems which are nothing more than indoctrination systems for the young we have schools trying to teach people historical events mathematics verbal skills language skills all of that but guess what what good is any of that going to do if you don't know the difference between right behavior and wrong behavior if you don't know how know the difference between moral behavior and immoral behavior if you are not teaching correct objective morality to the young you're not teaching them anything worth learning because without that as a foundation anything else you teach them is going to be you for an immoral purpose somewhere down the line this is an inescapably true logical understanding of first principles that can never be logically truly refuted by anyone with sound logical reasoning faculties only people that are deeply ensconced in an entrenched ego will try to refute this and insist that it is wrong no you have the problem with ego in not understanding it you have the problem in spirit and soul through some form of trauma that you cannot work through and get over for correct reception of truth when it comes to moral principles that's your problem not mine I'm speaking the truth see the problem is yes dude they have traumas been done on to us especially when we were young yes absolutely we're traumas that were done to you when you were young your fault absolutely not someone else did that to you and you were harmed you are violated through the initiation and impartation of that trauma whether it be physical verbal you know emotional but guess what regardless of how or who did that to you when you were young it is your responsibility as an adult to work through that traumatic those traumatic incidences incidents in your life and come out the other side a true moral adult that's no one else's responsibility that's actually no one else's problem but yours as an adult you have to own that that is what happened to you it is not who you are it was an experience it is not your identity I think David Icke did a profound interview with a London real recently where he talked about get out of this ego identification this is what I've been realizing week after week here on what on earth is happening ego identification will keep you rooted thinking that you are your experiences you are your job you are your culture you are how much money you make you or what you have in a bank in your bank account has absolutely nothing to do with your true identity in consciousness as a spiritual sovereign being having a human experience in the 3-dimensional world of matter what you go through here in trauma and experience is just that an experience and that is not to say we should not strive for a better experience or one that is devoid of violence and coercion because the the real the 3d world is very real and it matters it's not different than the spiritual world it's one in the same we should not elevate it or or obviate it you know don't elevate the material above the physical and don't think it's insignificant they are one in the same we have to have a balanced worldview in perspective about that again that's also what I've been saying here on what on earth is happening since day one so we need to implement correct moral education for the young and help them through their traumas because that is our responsibility as an adult and it's your responsibility to do that for yourself as an adult if you are not given that proper moral education as a child it's no one else's responsibility but yours and then it becomes our moral responsibility to do that for our young and take them out of these indoctrination camps called public school systems morally educate them properly according to the first principles of natural law the non-aggression principle and the self-defense principle so moving on in the third very important philosophical foundation of the five eternal truths regarding why all police forces should and must be abolished and replaced with nothing all systems of control invariably I have a mistake they're said in variable instead of invariably I'll correct that I apologize systems of control in very attract those who have the internal desire to control and abuse others because of their own psychological imbalances and inadequacies this invariably creates a system entirely built upon corruption the very idea of power over others attracts human beings with the absolute worst psychological and behavioral qualities such systems of control are inherently immoral by inception on their foundation at their roots because they are built upon the false belief that some people may be granted or delegated rights that do not that others do not possess this can never be truly done no one if you don't have a right to do something as an individual no one can give you that right so if you just look at apply the behavior to yourself as the mantra here's the other mantra apply the behavior to yourself as an individual do you have the right as an individual to tax others regardless of hell in true it altruistically you want to spend other people's resources do you have the right as an individual to implement attacks upon any other individual yes or no there is a true answer it's not a matter of opinion and if you're being honest with yourself and you say that you're a non-violent person that wants a voluntary interaction between human beings which is what a moral person once the answer is no you as an individual do not have the right to implement attacks on any other human being let's go into an even more foundational core and fundamental core philosophically do you own the body of another human being can you say that you rightfully own the body of another well the answer to that is no you're not a rightful master over someone else and you cannot legitimately morally make them your slave well what is prohibition in any form or fashion if I tell someone else they may not put a certain type of substance into their body I am making indirectly a claim of ownership on their body and I'm sad and disappointed at how few people in this so-called truth movement don't understand that you're just fucking wrong if you don't understand that your ego is in the way you're incorrect you don't have first principles down correctly no one else can tell anyone else as an individual what substance they may or may not put into their body no matter how harmful it is to their body because it's their body it's their property my body is in someone else's property so if I want to take a hand of psilocybin mushrooms at any given time I'm gonna do it and no one else is going to control that behavior and if you try to control it you're gonna be met with a hollow-point round in the head so try to do it and see what happens boy you're not gonna get very far at least the first one first one ain't gonna get too far you might eventually get me but trust me I'll take a few before I go know it like you know the sun's coming up tomorrow son you don't own my body boy you don't tell me what goes into it boy that's what prohibition is slavery prohibition is slavery taxation is slavery you know that's it if you don't understand it you're wrong you haven't studied it enough you haven't looked at it from a first principles foundational point of view and you're just wrong and your egos in the way of correcting that error so the very idea of power over others in this way attracts the human beings with the worst psychological and behavioral qualities these systems of control are amoral by inception because they're built upon the false belief that some people can be granted or delegated rights that others don't possess you don't have the right as an individual to enact prohibition you don't have the right isn't to an enact taxation you don't have the right as an individual to enact licensure you don't have a right as an individual to violently punish people for doing things that are their rights and or prevent them from doing things that are their rights and or insist that they must do things that are based upon coercion and the threat of violence which is called duress you don't have the right to hold other people in duress you don't have the right to do any of the other things that are based upon coercion violence duress and slavery to another individual or group of people you don't possess those rights you're not a god you're not able to receive those rights because those rights don't exist therefore no other individual and no other group of individuals can ever delegate or grant those rights to any other individual or group of individuals it can never happen in nature you can only falsely believe through a religious cult belief context that you are allowed under moral law to conduct such behaviors you are not that is a false belief you simply do not understand that you are immoral and wrong so any system that is set up to do that is immoral on its philosophical and moral foundations it does not have the right to do these things therefore the continuation of that institution is also immoral this means that on its foundation that institution never had the right to exist from a moral first principles perspective policing and government are euphemisms for slavery and never had a moral foundational right to exist you're wrong if you think they did ever and I'll tell you what a lot of my audience are brain dead in this regard not a lot I'd say some of them are their brain dead in this regard you're still status you don't understand the concept of anarchy of true anarchy which means no rulership it does not mean no rules because natural law is always in effect therefore always moral rules will be regarding behavior whether people believe in those rules accept them or not that is irrelevant you can never grant or delegate a right this to any individual or group that it does not exist for an individual and the rights that we say we can delegate for government or police do not exist for individuals and if you think they do you're wrong you're morally wrong and it's an immoral belief to even believe that you can do that is is impinging upon other others freedoms because you're saying slavery can be justified and condoned and that makes you a supporter of slavery that's an immoral belief on its foundation so let's move on to the next tenant an eternally true truth and principle regarding why police must be abolished at all places because they are an immoral institution on their foundational face so point number four those corrupt human beings from these institutions of control eventually believe that they have the quote-unquote right to rule everyone else and they are willing to use coercion and violence to keep their subjects or slaves if we're really dropping the euphemisms in line because the belief in so-called Authority is so widespread most people actually believe that this class of corrupt and violent human beings have legitimate moral authority to command the behaviors of other people imagine this we still believe culturally as a whole as a species in kingship in the Divine Right of Kings we've just diffused that so-called right to an oligarchical group of individuals calling themselves government and now they are the new kings or gods of society they're the new pharaohs the new Kings the new pharaohs the new gods on earth imagine this is what people who believe in government leasing actually think you're immoral trash you're a moral trash you're immoral trash if you think that that is a legitimate system of belief and legitimately moral you're you're fucked up in the brain you're actually a moral your parents were probably amoral pieces of dirt that hammered this nonsense into your brain and you as a continued immoral piece of dirt because of how much trash taught you trash beliefs turned into a piece of trash all right is that saying it hardcore and in your fucking face enough and I'll say it right to your face in person see me when you have the time all right I'll tell it to you in person because it's true and it's not an attack and if you try to attack me physically you'd see what would happen all right and that's not that's not an act of aggression I'm saying you put your hands on me in aggression I'm gonna defend myself and I know how and trust me and ain't going to be to prove who the better physical contestant is it won't be about a contestant a combat you know contest physically you'll find out what my rights are and I don't care who you are most human beings even believe that this corrupt class of human beings should possess a monopoly on the use of physical force and that everyone else should abdicate their inherent right and responsibility of self-defense to this corrupt class of human beings imagine this you're going to take my right to defend myself away you're gonna take my right to physically defend myself away not without bloodshed motherfucker not without bloodshed motherfucker you'll find out and guess what if it goes down that way in this lifetime so be it it goes down that way in this lifetime and I'll be right back doing the work again in another lifetime or in another place wherever I'm called wherever I'm needed you know that's where I'll go but you know why you're not gonna tell me what my rights of self-defense are you're not the arbiter of truth and you're certainly not God and this is what our European brothers and sisters need to understand you've been hammered shit into your brain since the day you were born over there in king and queen land shit's been hammered into your brain since the day you popped out of your mother's womb and you accept it and swallowed it and this is what I'm talking about that may not be your doing when you were real young but it's your it should be your response is your responsibility to undo the crap that was hammered into your brain regarding self-defense and regarding firearms and I hope you you're doing it now with what's going on with the violence that's going on I really hope some people are understanding that Americans are going to be in a far better position to defend our bodies and our rights and not go into total abject servitude you guys are going to be kissing your own asses you better get real flexible and pucker the fuck up you better get real flexible so your your mouth can touch your anus and you better pucker up boys and girls sons and daughters because you're going to be kissing your own assholes on the way in the cattle car to the concentration camps that's what's going to happen to you in Europe most of you anyway Switzerland might have a little they might have a little harder problem there I think yeah but the rest of Europe you guys better start practicing in the mirror puckering up and liking the taste because I'll tell you what you're gonna have a real hard time with what you allowed and it ain't going down like that here boys and girls it ain't going down like that here and anybody who thinks it is you're gonna find out let's hope it doesn't go that way that's where everything I've been doing is trying to push it to not go that way but guess what if it goes that way you're gonna find out so this is the fourth Tennant okay the corrupt human beings who gravitate to control based into institutions believe they have the right to rule everybody else and they're willing to use coercion and violence to keep their slaves in line unfortunately this belief in authority is so widespread people believe that they have this right and most people even believe they have the right to have a monopoly on the use of force and that the right of self-defense should be taken away from other people and given only to these corrupt individuals this is the most asinine bullheaded way of thinking that anyone can ever accept it's completely a false cult religious belief and that's all it ever will be now fifth and arguably most important which I didn't really have time to get to last week this builds upon and finishes all the other four tenets of why that are eternal truths about why police must be abolished for those with an adequate and clear reasoning capacity this means if your brain isn't hammered shit already okay if you have the ability to truly think clearly and you're not ruled by your emotions of like reasoning of thinking clearly because your emotions are in the way hey you can even make the state mark your anger gets out of control sometimes that's letting your emotions rule you know really it's not it's actually justified anger it's actually rightful indignation and how ignorant and stupid other people are that is affecting the freedom of people who actually do understand freedom and want to be free that anger is coming from a justified place and position and I don't just run with it unnecessarily I let it out cathartic ly and I let it out creatively through putting this work out I let it drive me as a source of fuel knowing what is wrong in the world and then actually doing something to correct it that's called the sacred gift of anger and okay I could hit the gas pedal too hard sometimes on that but guess what I'm still using it correctly non justified anger is getting angry at really dumb shit and other people for doing things that don't matter oh you don't like oh your favorite TV show got preempted this week and I'm mad my sports team didn't win I'm really angry about that you're a little boy and a little girl you're not getting angry for the right reasons it's a psychological infancy mindset so what I'm talking about here is people who have an adequate and clear reasoning capacity in the mind that they're not under such mind control they can follow philosophical reasoning and philosophical progressions meaning they're not reasoning from their emotions they're actually reasoning from first principles and this is part of the problem you can to have a discussion like this today no one will hardly anyone will take it from a first principles perspective you say the first thing they don't like to hear and where do they go name-calling they go into ad hominem attacks because they can't reason from a first principles perspective they can only reason from a my feelings are hurt because you said something I don't agree with and I'm gonna say I don't give a damn whether your feelings are hurt I don't care how offended you are this is the eternal truth and I could philosophically and morally prove it by explaining progressively in a very stepwise progression moral first principles to get you to come to an accurate and logical understanding of why it is so and why this is truth and not conjecture or belief or opinion see part of the problem is these people are SOL abscissa bout why solecism was such a dangerous ideology solid system is Satanism ultimately it is the devil it is our honor satanic mindset belief from a deep level satanic perspective if you think there's no objective truth if you think there's no objective truth regarding morality that is a satanic mindset that means you are saying human beings are the arbiters of truth it's all subjective all opinion based we can make up whatever we want to fuck a make up about what right and wrong are what behaviors or immoral behaviors are and we are the arbiters of that arbitrary decision that's why it's called arbiter to be the arbiter or arbitrator of something means you decided based on your whims based on your preferences based on your beliefs you're not accurately understanding the truth of what is and objectively aligning your perception to that objective externalize truth that exists independently of your own consciousness if you are dead and gone that truth still remains it would did not depend upon what you thought about it or your opinion of it or your likes or preferences that's what it means to be objectively true solid system says everything's an opinion nothing is objectively true well why bother looking into anything if there's no truth but you could believe whatever the hell you want it imagine Allah becomes the way it is who cool what's what's why would you look into anything including science including the physical world if nothing is true and this is what people think is true regarding behavior that there's nothing true regarding it we can just make it all up so for those with adequate adequate clear reasoning capacity the understanding of the four previous points or slides should result in the inescapable logical conclusion that it would always be infinitely more dangerous and destructive to human life and freedom to be ruled and enslaved by a corrupt and psycho class psychopathic class of human beings who almost everyone erroneously believes has the right to do the immoral behaviors that they do on a daily basis then to possibly find ourselves in a situation where violent and destructive gangs of human beings are causing harm and chaos everywhere 100% objectively eternally true statement doesn't matter whether you understand it doesn't matter whether you agree with it let's break down what this means what this statement means is that if you have the let's say the only two possibilities break down in the world too violent and destructive gangs are roaming the streets everywhere in all the world doing harm to others okay is that more preferable to a situation where a controlling class of human beings in slaves everyone tells everybody were essentially gods and the arbiters of truth you must obey our arbitrary decrees as our subjects or slaves which situation is more preferable I'm telling you definitively and factually the scenario where people believe that violent and coercive gangs of people calling themselves the police have the moral right to do the violent and coercive behaviors that they perform on a daily basis is infinitely more dangerous to human life and freedom every single day then roaming gangs of people who don't give a damn about anybody's rights violently doing harm to people every day on the street but nobody believes they have the right to do it see this is where the perception of a right becomes infinitely more dangerous this is where the mind makes the scenario infinitely more dangerous would you believe a mafia gang has the right to rule over you do do we believe gangs of criminals on the street then are not the police would have the right to criminally rule over people when we believe that they have authority and the rights even if they claim this is our right to do this what if the mafia got all together all the mobs of the world banded together in one mass mafia and said we have the right to do all the violence that we do as an institution as a gang would people believe them most people would say you're full of shit and we're going to defend ourselves because you're the Mafia but we don't do that when it comes to the police do we know then all of a sudden we think they have the right to do it because it's based on government and the concept of authority which is a religious cult that's a satanic death cult it's an infinitely more dangerous satanic death cult than all the Mafia's of the world coming together into a Super Mario and claiming the right to rule over others because guess what folks that's exactly what happened that's what government is that's what policing is and people don't understand that that's what it is it's infinitely more dangerous for the police to have that belief of them having the right to do these things because then other people let them rule unchallenged so let me read it again and get the hammer the belief into your thick skull for those with adequate reasoning adequate clear reasoning capacity capability the understanding of the previous four points that we made in this section should result key word there being should you should have the ability to reason out the inescapable logical conclusion that it wouldn't always be infinitely more dangerous and destructive to human life and freedom to be ruled and enslaved by a corrupt and psychopathic class of human beings who almost everyone in the world erroneously believes has the quote-unquote right to do the immoral behaviors that they do on a daily basis then to possibly find ourselves in a situation this definitely wouldn't result by the way this is a possibility if we do away with all policing and guess what I guarantee you if we do find ourselves in this situation I'm going to describe a lot more people would wake up and say you'll have the right to do this and they would wake up to the solution of proper moral education which I'm going to talk about ok they would wake up to self defense and the importance of proper moral education of the young if we found ourselves possibly in the situation where violent and destructive gangs of Hugh beings are causing harm and chaos to people everywhere here's the answer to why this is true at least in the latter situation of gangs of mafia roaming everywhere and doing harm to everybody no one would believe erroneously believed that such people would have the quote-unquote right or quote-unquote authority to conduct such immoral behavior and that the victims of their criminal actions the the and also what would happen is the victims of their criminal actions and behaviors would accept they would come to the acceptance that they themselves would have the right to use self-defense of force to stop these gangs of people from conducting continuing to conduct such harm against them think about it if gangs ran society instead of government and police would anybody believed that the gang has the right to do that violence if drug gangs then drug gangs do rural parts of Mexico think about that the Mafia's of Mexico rule whole parts of the country whole parts of that state are ruled by the drug cartels do people believe that the violent drug cartel mafioso criminals have the right to rule over the people of course they don't think that they have that authority or right we're in an infinitely more chaotic and dangerous situation from a perspective of mind and mentality and belief we're in a cult a cult is ruling the world that has convinced fuckin people that they have the right to rule them what's more dangerous a mafia who's just doing violence to people who nobody thinks has the right to rule them or a fucking satanic death cult that has convinced people over the generations and centuries that they actually have the right to do this violence to them and that they can't challenge them because they're the authorities and they have the right to do this and the other people don't have the right to stop them from doing it imagine no this is correct and if you don't think so you are incorrect you wrong you are immoral for being incorrect and wrong the end and do the internal work to get your head right nobody can do that but you I can float the truth out there for you and it can be perfectly explained and it is it's perfectly explained like no one else will do it like no one else two will sacrifice the time of their life to do it I've perfectly explained it it is you who are an ego it is you who has a block to the reception of these eternal truths work with yourself sit in front of a fucking mirror do some shadow work turn off all other distractions put your phone in airplane mode and sit in front of a mirror for a couple of hours and ask yourself what ails me I've asked it and I've asked it in more of an even you know what's the word when you ask a question you're not not really looking for the answer I've asked it in a rhetorical way you know because I can't actually sit and answer that question for everyone you have to answer it the question is what ails you brother what ails you sister why are you in the situation mentally and spiritually that you are in you are broken if you don't understand these eternally true philosophical and moral principles and you are broken because of internal trauma you are broken because of trauma of the heart of the Spirit ultimately no one can repair that damage but you you must do the shadow work that internal work I can't do it for you so these five five slides I feel with the exception of the couple of little errors I have to correct with grammar or spelling are probably some of the most important philosophical slides that I have ever made in any of my material on what on earth is happening they have to be deeply understood in context if you're gonna share them I highly recommend putting them all together or making one big long JPEG put them together in Photoshop make one big long JPEG that you could then download and read but they really shouldn't be separated from each other they should be in context with this show or last week's show so let's move on and I'll finish up my slides because I want to eventually get to the reading we're probably gonna have to do it next week of confessions of a bastard cop I feel like getting this foundational these foundational moral principles are infinitely more important than you know even spending time to advance the material and do it faster I feel a lot of people still don't understand this so again the question that you have to ask to understand that last slide of philosophy that last paragraph of text is do most people believe that this gang has the right to rule them you know if people see this gang of you know hooded perhaps drug cartel people from Colombia or somewhere in South America coming for them do you believe that this right gang has the right to rule our society most people are going to go you know what those are violent criminal gangs competing for behavior competing for you know uh territory to sell drugs and willing to kill anybody to take that territorial region to create a monopoly on who can sell or buy in that area and they don't really have any right to conduct this violence you know people have the right to conduct transactions when it comes to any substance because it's their body but you don't have the right to sell somebody else you can't operate here and if you do we'll kill you that's criminal thuggery that's what the government does that's what gangs do that's called criminal gang behavior creating monopolies like that so no one else everyone has to go through them look you know in a perfect world everybody would have gotten together with firearms and hunted people like this down to total extinction you don't like that and you think that's messy tough either you morally educate people like this when they're young and they don't become criminal gang members like this or you got to do the messy work of hunting them down hunting them like the animals they've become this is a criminal gang does anybody believe that they have the right to rule others no no one believes that no one was not mentally retarded actually believes that criminal gangs like this have the right to rule them but but if we look at the flip side of this we keep the same exact question on the scoreboard okay do people think that this gang has the right to rule them we don't need to change the question just flip the image almost everybody believes this gang has the right to rule them because they are an aspect of government and they are Authority somebody else gave them the rights that they have we delegate rights to this subclass of people calling them the police they have rights that other people don't have and so yeah they have the right to enact authority and coercion and violence in society no ladies and gentlemen they don't have that right they never have had that right going back to the slide this is all it ever has been this is all it is now this is all it ever will be for all time the end it only ever has been slavery and it has been nothing else and if you are have ever been a supporter of this institution you are a condone ER and a supporter of slavery and you are a moral for having done so or to continue to do so get his fucking offended as you like it'll never make it untrue and I don't care who you are I don't care what capacity you're involved in my life debt is offended as you fucking won it's still true and you're still wrong that's it so I'm going to close this section of the presentation with a comparison of my own moral and philosophical logic with that of one of the founding fathers of America to show you that I do place these men on pedestals when they are wrong I will say that they are wrong so one of the authors of the second amendment James Madison and George Mason okay he said if men were angels and he was a federalist meaning he believed in creating a strong federated government meaning he believed in continuing the concept of authority see this is why people don't understand the Declaration of Independence they said when any government becomes destructive to the aims of human freedom which is under natural law that we have the right to alter or abolish it even though it uses the word alter it still claims we have the right to abolish it I would just say we needed to take that a little bit further and say all government has always been destructive to our natural inherent rights and freedoms therefore people who understand on its foundation it is a inherently immoral institution have always had the right naturally and inherently to abolish it that's how I would have written the Declaration of Independence and it would have said I'm not your slave you don't own me I don't consent you don't rule over me you're not my authority you're not God there is only one Authority anywhere in the multiverse and that is the creator of the universe and if you cannot prove that you are that force you're not Authority of anything so when that force presents itself to me in the flesh or in any other form and I definitively know that it is that force that's what I'll bend the knee and say that's my authority unless someone can prove that you're just a hooligan fucking thug claiming to own other people and that makes you part of the satanic death cult so did the founding fathers understand their actual reality of natural law that we need to deeply understand in its fullness no they didn't they were flawed human beings just like a lot of listeners of this show that don't get it in its fullness I'm trying to push everyone past them in consciousness and help them to understand natural law in its fullness because if you don't understand in its fullness you know what happens what we have now that's what happened following the Declaration of Independence and the Constitution that's why it didn't go far enough in its moral understanding and application and neither did any of these men they were the best we had in consciousness at the time they were the best that we had in consciousness at the time was it the ultimate be-all and end-all in consciousness no should they be put on pedestals and worshipped as gods no you know this is the whole point of this we can move past they allowed us in there at their level of understanding to get to our level of understanding which surpasses theirs it's like somebody boosting someone up with whole you holding their their shoe and and foot and boosting them up to a higher level than they're at and then we can stand on their shoulders it doesn't mean that they were perfect or should be worshipped as such get that straight about how I view these men and women you know I don't place them up on pedestals and never have and if you think that's true you haven't actually listen to what's being said you've interpreted it according to your false understanding of it your erroneous and incomplete understanding of it because you take sound bites and you run with them you don't listen to the fullness of what I've said by watching every episode in its entirety and then you think you understand what I've said and you have an incomplete understanding of it so this is an example through James Madison a flawed moral and philosophical logic he believed that government should be instituted as a societal institution because of this quote because of this reason this is his foundational worldview of why government is necessary he says if men were angels no government would be necessary that means as long as men meaning humanity is not morally perfect we have to institute government to punish these imperfect beings and create a society society that is based on the belief in that authority nothing could be more untrue and dangerous as much as I respect him for trying to create it in a limited capacity it doesn't make a difference you're wrong from a philosophical and moral foundation from an axiomatic perspective anyway does it mean that I don't appreciate that people who were doing the best at their level of consciousness we're doing what they were doing then no you know it doesn't mean that it means I still appreciate their effort because if they didn't make that effort or they weren't willing to die to create that effort we wouldn't even be able to have this discussion today we be ruled by psychopathic kings and queens even more so than we already are and a lot of people don't understand that that's why they shit on the foundations of America instead of understanding what they paved the way for as a potential future and as a promise in the future for the future here's sound moral and philosophical logic coming from me not to put myself up on a pedestal either but my understanding of natural law goes far beyond most of the founding fathers with the possible exception of Thomas Paine possibly even beyond his here's my retort to James Madison's quote if men were angels no government would be necessary I correct that lack of understanding of natural law and moral law and I say since humans aren't angels none are fit to rule read it a million times if you have to since humans aren't angels and they most certainly are not including myself since humans are in angels none are fit to rule to even make the claim that you are the authority of anyone whether you have authority over anyone is such unn mitigated hubris and gall that you think you're the God of creation and eternity to even condone it which is what the supporters of police do to believe that others are gods and they have the right you're a condone er of blasphemy yeah I would say most of those people in this country you claim you're Christian and you are shit Christians you are fake ass shit Christians you don't know the definition of true Christianity the the Christ of your Bible would wipe your ass wipe his ass with your face okay that's what he did he wouldn't take out the switch and beat you like the moneychangers he take a big dump on your face alright because you're fucking immoral trash claiming to be Christian I take high offense to it then other people would dare say that they follow the teachings of Christ of the New Testament and you want to say you're Christians you're pond scum you you use that term Christ in blasphemic terms and I'll make it religious if you want to make it religious all the Christians out there to believe in the authority of the government it's 100% blasphemy its idea its idolatry is what it is in your own religion I don't believe in your religion I believe in the religion called truth which the creator of the universe placed into effect by law and I believe in coming into an understanding of those laws and bringing our behavior into alignment with them that's my religion and that's the only true religion there are is no other true religion you've turned the teachings that are attempting to align behavior with that into a religion put up a whole bunch of nonsense around it in the form in the form of religious trappings and then you want to call yourself Christian see my presentation fake-ass Christians because that's what people who believe in this junk are your Seavers in junk trash religion and its blasphemy against the god of creation and the even concept of Christ in the New Testament it's idolatry and blasphemy and I'll say that right to the people who watch this show or who have ever watched this show calling themselves Christians you're trash you're the Christian you're Christians of nothing you're Christians in name only and you're trash so I'm gonna start because we're gonna have about ten minutes but we have very little time that is the end of the slides and now for this section and you know I did my best to try not to get nuts but I still went nuts because guess what folks I think most people in today's world you're beyond teaching you're beyond understanding you love being garbage you love what you've created in the world which is a prison of probably which we're not going to escape you think you're good people and you're garbage and I'm even talking to some of my viewership and I don't really care whether you yeah if it gets you so offended you turn the fucking show off right now do it I don't care I'm teaching truths that are eternal and I want to talk to the people in ego who still think government is legitimate I still want to Pete talked to all the people and ego who still think the police are a morally legitimate institution you're garbage morally you're not good people you are a condone er of slavery you only believe you're a good person you don't know what it really means to be a good person in your heart and in your mind you think you are and you've bought a false understanding you've bought into a false understanding of what it means to be a truly good person you are not that you are claiming to be that when you're in fact in reality not that no one else will tell you that because they're chickenshit cowards who won't say that to your face so I will with that being said that concludes the slide portion of these teachings and I want to get phantasialand right up in people's face about it now here's what I think I think the problem is not enough people have taught it like this this is why other people think it's just fine for them to continue their beliefs it's not okay if you continue to think that these institutions are morally acceptable and legitimate you are my enslavers and enemies that's where we've come I've taught it enough perfectly for the proper reception and understanding and I will not give false hubris I will not give false humility I'm sorry I will not tell tell - false humility and say oh I had gaps in my teaching method and I didn't do it adequately no fuck you I've done it perfectly the problem is in you and your ego your ego is hardened twenty thousand times harder than mine ever was and I will not be told that I didn't teach it correctly you're the problem you didn't receive it correctly I just drink dropped half of my drink all over and knock down my show clock you're not gonna own me you're not gonna dictate my worldview I'm not your fucking slave so before going into this I'll do it with the time remaining let's switch over to the slides and I'll do this part first and then go back to it if you feel you've received value about these eternal truths that I have taught and it's helping you get out of your thick-headed fucking ego then you can continue to help our efforts here at what on earth is happening to reach and awaken the dead by either getting physical copies of items such as DVDs and flash drives or t-shirts you know keychains buttons stickers etc by going to gifts thought what on earth is happening calm just keep it on the slides for a moment there are you could take me up on the offer of the ark drive which I talked about earlier which is an offer of a one terabyte hard drive that you send to me and I send it back filled with research data that helped me arrive at these eternal truths these unwavering eternal truths in the form of research information in other words you can become as knowledgeable as me with this drive most people will never do it because they think that they can get the soundbite and be enlightened you have to go through a lot of material in mind and work on your heart intelligence first before you're going to be at this level of enlightenment and I am at a level of enlightenment you know this whole ideal never claim you're enlightened no enlightenment comes first it comes from taking in the knowledge of what's really going on and then true enlightenment is what are you going to do with it you're gonna put it out there and teach it in an unapologetic way because it's eternal truth or you go to kowtow and pander and say oh I'll exercise all this false humility and say oh well I really don't know much all I know is the little no no I know quite a bit and it's true what I know is true that's why it constitutes knowledge not opinion so if you want to get the ark it's been an offer it's still there lots of people taking me opponent trying to learn not enough but lots you can go to what on earth is happening / what on earth is happening calm / arc and if you want to make a straight donation to our efforts you can go to what on earth is happening calm / donate 11 methods of donation up there 5 6 crypto currencies paypal patreon the venmo check money order one of the great ways that I want to thank people is by making a technological donation you can click on that button on the donation page and click donate supplies from our Amazon wish lift list this has been a great form of donation if you don't want to do it through monetary means you could actually contribute donation by buying equipment that we require to continue what on earth is happening and have it shipped directly to my studio here in Philadelphia there are a couple of items up there now because some new needs have arisen so we do need a couple of tech items so that would be a wonderful way of people to donate I thank everyone who has donated in any form we really appreciate your efforts and I thank you from the bottom of my heart you have made this work easier for all of us so thank you alright let's step back to confessions of a former bastard cop we're gonna get to the full reading of this next week ok because there isn't enough time but let me go back to the slide with me in the window and let me just tell you what this is going to be so next week I am NOT doing any slides I'm not preparing any slides I've prepared and delivered the slides that I want to give for the duration of these two past shows so all I'm going to put up next week is this slide and then I'm going to switch to I'll just show people just take it down briefly and

I'll show people what the document is going to look like I'll include this with the show for next week just go off either in the window or fullscreen okay I'm going to place this up on the show next week and we're going to go through the whole PDF and I'm gonna read it in its entirety and we're gonna talk about this confession because that's what this is this is a confession yeah let's go back to it in window sorry yep and when you're making a little smaller good we're gonna I'm gonna show this document next week and we're going to go over in detail because you're going to see what the actual mentality of the vast majority of police really are from their own point of view not from me talking about it right from their lips to your ears that's all the time we have for this edition of what on earth is happening ladies and gentlemen remember government is slavery we'll see you right here to continue with part three next week [Music] [Music] [Music] [Applause] [Music]

What On Earth Is Happening Show #229

Topics: *The Psychological State Of Police & Their Supporters Part 3, How To Become the True Media Seminar enrollment update, July 4th as a Day of Mourning for the Ultimate Sacrifice of the American Revolutionaries that has been squandered by modern Americans, Psy-Ops, Exosome Theory vs. Virus Theory, Satanic Epi-Disgenics Culling, Wisdom is Knowledge converted into Right Action, the False Religion of "Authority," ALL cops are Bad People when we gauge their behavior from a place of True Moral Knowledge, ALL government and ALL Policing Is SLAVERY, the False Awakening of "woke," Characteristics of True Awakening, the Hardened Egos of Solipsists and Moral Relativists, Dark Occultists' Satanic mindset and "Mini-Me" Satanism, Mark's exposing of the Techniques of Cults, Isolation, Conformity, Repetition, Physical and Mental Trauma, "Confessions Of A Former Bastard Cop" reading and analysis by Mark Passio, the Endless List of DELIBERATE Violence and Wrong-Doings by Police, the Complicit SILENCE of alleged "good" cops, Police Academies' employment of CULT Techniques, Police ARE a SATANIC CULT, Police continue to engage in Wrong Livelihood because of their own Self-Loathing and complete lack of true Self-Respect, Police members' absence of Conscience, Police Psychopathy, Police Cowardice, Qualified Immunity for MURDERERS on the Police Forces, the Difference between Primary Psychopathy and Secondary Psychopathy, Police are LIARS, Police routinely use TORTURE techniques, Police are THIEVES, Police are RACIST, Police are RAPISTS, Police are DOMESTIC ABUSERS, Personal Participation in Institutionalized Evil makes YOU an Evil Person, Engaging the Trivium in the wrong order, Putting Rhetoric before Grammar and Logic, NAVER talk to on-duty cops, Getting OUT of your Hardened Ego by admitting you were WRONG, the Right To Kill when Rights are being thwarted as High-Level Spiritual Understanding, What it really means to be a Truly MORAL Human Being, Different "Flavors" of Feudalism and Slavery mistaken as "Freedom."*

freedom man that's what it's all about you've got to groove on freedom like the good book says welcome you are listening to what on earth is happening this show will discuss the topics of human consciousness mind control natural law the occult and all issues that affect the freedom of the people of earth what on earth is happening will endeavor to shine light upon the darkness of our world and to offer empowering solutions to the problems we face as humanity approaches it's critical moment of choice and now here is your host mark pascio welcome one and all you're watching what on earth is happening i'm your host mark pacio my website what on earth is happening dot com ladies and gentlemen government is slavery and here on wall on earth is happening we are ending slavery one mind at a time thank you for tuning in everyone today is sunday july 5th 2020. we have a great show lined up for you here today this is episode number 229 of what on earth is happening this episode is entitled the psychological state of police and their supporters part three confessions of a former bastard cop let's switch over to the slides for today i have a couple of quick event announcements before we jump into the material for today i want to thank brett hatton becca godwin and mark messina for artwork provided for this episode this is the episode art for today's show we are still accepting donations to complete the documentary entitled mark pacio in the science of natural law my premier documentary effort there's five donation tiers on gifts.what on earth is happening.com that's called our donation gifts area of the website 100 of all donations go directly to production costs for the documentary all donors receive a free complimentary copy of the completed documentary on flash drive and dvd thank you to everyone who has donated so far you have really advanced this project forward it's looking great we are certainly slated to complete this before the end of the year there are some new items coming for donation gifts namely new t-shirts we're going to have the science of natural law t-shirt release soon i just released the world view violence and the real pandemics presentation up there on flash drive and dvd of course we have the complete pacio one great work collection on a sandisk 500 gigabyte solid state drive it's a very popular item check it out all check all that out at gifts.waltonerthishappening.com i want to talk a little bit about the how to become the true media seminar this is a 23-week technology seminar hosted by zoom by me and i want to thank everyone who has enrolled because um the response has been tremendous now a few quick notes about this seminar for those who are taking it and who may have wanted to take it the seminar available slots of available enrollments were all filled entirely on june 29th that was about five days before we um had planned on finishing enrollment the response was greater than i thought and a lot of people who wanted to take the seminar were unfor unfortunately missed the boat and you know didn't get a chance to enroll because i had to cut enrollments off at a certain point i want to say something about this and i don't want to beat up those who didn't make it into the class i just want to let people know that this is part of what the this class was about um everybody a lot of people ask me can you please reopen enrollments and my answer was no politely i i'm not going to do that okay now that could mean i bring in more money for the cause but that's not even what this was about okay this is about finding the people who will show the initiative to go after something like this and really seize the opportunity so for those who did not make the enrollment because we you know basically filled up the class on june 29th i just want to say that i told everyone this was probably going to fill up so you cannot place this upon me i told everyone in advance multiple times this was probably going to fill up before july 4th when we were going to cut it off many people have emailed us and asked us if they would take a late enrollment and we are not doing that this is sort of to you know really kind of uh you know raise the bar and and say hey this is how you have to be you cannot let opportunities go because they may not be there the next day so for those who miss the enrollment you can enroll next year when i do this i'm thinking about doing this as a six month on six month off thing where i give the seminar every six months and then we take a break for six months and then i open enrollment again approximately six months later that looks like how i'm going to be doing this for at least the next year or two minimum okay so you will have an opportunity to enroll next year in the 2021 class if we're all still here that being said for those who did make the enrollment cut off classes will begin this tuesday july 7th the zoom meeting will begin exactly at 7 30 pm us eastern time this gives you one half hour 30 full minutes to get into the um waiting room i am going to be admitting people from the waiting room of the zoom area into the seminar i'm highly recommending that people do not wait until 8 pm to come into this class i want to say for all enrollees to this seminar do not wait come in at 7 30 if you can get yourself together and mentally prepared okay don't wait until eight o'clock i want to explain something and i'm going to take a couple minutes to go into this a little bit okay because i find it very important this is like showing up to a live event when the speaker has already begun speaking late it's extremely rude to do that okay i don't want i really don't want anybody coming in after 8 pm i'm giving you a half an hour birth to come into the class on time consider that it starts at 7 30. let's just look at it that way okay the meeting starts at 7 30 come in early get a drink ready get your notepad ready get a pen so you could take notes okay we're going to get to that but just show up early so i could admit you in from the waiting room into the seminar don't show up after 8 pm it's rude okay it's a distraction because i i'm there's no producer on duty for this folks i want you i want everybody to know this okay no producer will be on duty for this seminar it's just me sharing my computer screen with you and doing live tutoring that's what the seminar will be me showing you software okay and eventually will will show some hardware things through my camera but i you know showing up after eight o'clock you're forcing me to take a break from what i'm doing and admit you into the class from the waiting room it would be like the equivalent of showing up at someone's home who's doing a private seminar in their home and ringing the doorbell after the seminar has started consider that extremely rude so i'm asking enrollees respectfully not to do that please okay so just show up a little bit before the seminar starts okay the class instruction will begin promptly at exactly eight o'clock p.m eastern u.s time if you're from another country other than the united states or if you're from another time zone please make sure you calculate that correctly u.s eastern time we are in daylight savings time so it's edt eastern daylight time okay calculate that correctly so you can be prompt for the class please be on time or you might miss important information that will not be repeated if you come in late and you miss in announcements that i make at the beginning i will not repeat myself this is going to be the same way all 23 classes so show up on time for all 23 classes do not expect me to repeat announcements that i will give at the beginning of each class later on that will not be done so if you miss it you miss it and that's on you and that will detract from your value of the personal resources that you spent on this seminar and i don't want that to happen to you i want you to gain maximum value i know how hard-earned your resources are and i want you to gain maximum value from what you put into this seminar okay please keep a notepad handy for notes and questions i mean you could do that digitally or you can write it down with pen and paper there will be a function where you can digitally quote unquote raise your hand in the seminar class and you will be able to ask questions i i will take the question as i see hands go up and i will put your microphone live and you can ask questions for those who are going to interact and ask questions i'm not going to put your camera live on the seminar it will be voice only i will turn your voice on this is why i highly recommend headphones headphones are highly recommended for this seminar because if you don't use headphones your mic that is going to be picking up your voice you will get feedback through that microphone through your computer speakers it will loop back and echo or feedback and then that will feed back in everybody else's ears so that is also rude if you intend on asking questions uh you know through your digital audio okay please use headphones it's a respectful thing to do for all other attendees and myself if you have any problems at all okay the most people are completely registered and ready to go if you enrolled and you have any problems registering for the classes getting in to the class through the access link okay please email us now do not wait for the last minute okay email us immediately we will guide you through the process of getting the software on your computer if we have to pers we will personally guide you through it okay so please um you know email truemedia at what on earth is happening.com if you have any problems whatsoever all right i think that covers everything i want to cover regarding the how to become the true media seminar i want to thank all enrollees i'm very excited about this i think it's going to be awesome i think people are going to learn so much okay people are going to be blown away by how much they learn i think okay and i want to thank everyone who enrolled it's really going to help us out here at what on earth is happening and you know i think it's going to be a win-win situation for everyone i want to say something about the new 3d logo which everyone obviously has already seen this is incredible i'm so happy about it okay i want to thank uh justin shepard for making this for us i mean what a phenomenal job i mean this man is ultra talented okay so thank you to justin another artist and developer we are working with phenomenal job thank you for your efforts justin okay so that being said let's jump into the to the material for today's episode before i jump into confessions of a former bastard cop i want to go through a couple of quick slides first of all i want to say that i feel that the 4th of july which some people just quote unquote celebrated should actually be turned into a national day of mourning and if you're offended by that statement get as offended as you like okay because if you think july 4th is anything for modern americans to celebrate quote unquote you are delusional you are a naive delusional brainwashed child if you think july 4th is cause for celebration july 4th in the modern day should be a day of mourning and sad contemplation for the ultimate sacrifices that human beings made to attempt to procure for future generations for themselves and for future generations a small modicum of human freedom and that ultimate sacrifice was completely and utterly squandered by human beings ever since this is the state of freedom and liberty in the united states and actually throughout the world it weeps for humanity july 4th should be a day of national mourning not celebration to anyone who considers themselves awakened and paying any attention to the events that are truly taking place in our world and especially here in america i made this slide a couple years back and i i think you know it uses this old saying that has been out there quite a bit i refined it a little bit and just dressed it up aesthetically our forefathers did not politely protest the british they did not vote them out of office impeach the king march on the capitol or ask permission for their rights they fucking shot them that is what our forefathers here in america did now you can go on and on and on about how yes they procured that modicum of freedom for only a percentage of people and do didn't do that for everyone fully agreed they weren't at the level of consciousness to understand that freedom cannot be held back from anyone that being said they did procure it sufficiently such that at least the people who came after them could go past them in consciousness and even have this conversation and even put a slide like that up on thousands of people screens throughout the world okay so freedom is a stepping stone process should it be understood all at once yeah it should by anyone anyone with common sense this slide should be understood by anyone with common sense but unfortunately people are so brainwashed so indoctrinated though sometimes we have to take it there in a stepwise progression and that's what i've intended to do here on what on earth is happening and regarding that i say every week what on earth is happening is a stepwise progression it is cumulative information if you're if you're a new viewer you shouldn't start here folks okay this is the end of the road you should start at number one and work your way forward go to the podcast tab what on earth is happening dot com slash podcasts work your way from number one go to go to in order okay and work your way from number one through to 229 okay this is built upon all 228 previous episodes all right work yours your way through the material in order at your own pace and then you'll understand fully i see tons and tons of people who to this day have not done that and you do not understand fully because you haven't done that process because you're lazy quite frankly you're a half-wayer and you're a person who executes half measures and that will not get it done in consciousness that's why your consciousness hasn't progressed to where it has to progress to and you've taken lazy half measures if you haven't listened and watched every what on earth is happening episode in its entirety in order okay get as offended about that as you like i couldn't care less i'm explaining to you how to gain maximum value from this podcast series if you don't want to do that it's on you and you won't understand fully at least you will understand half-assed which really you might as well not bother quite frankly let's go back to the slides you know this is the modern day jackass living in america brainwashed indoctrination indoctrinated imbecile who thinks they're somehow aware and helping you know they're like ralph from the simpsons eating his boogers that he picked out of his nose saying i'm helping how can you tell if someone is an indoctrinated idiot in the year 2020 they'll be wearing a germ-infested face diaper while believing that they're heroes who are saving people's lives you know this is what we have indoctrinated jackasses who actually believe they know something of science and they think it's settled science and they think wearing a mask is going to help them or anyone else and it's a crock of bullshit and it's a big psyop now probably two weeks from now i'm going to begin a whole new series on the one on earth it's happening podcast series called psyops it's a series of presentations that i've been wanting to do for a while okay and we're going to cover the coronavirus psi up in detail we're going to cover many other psyops in detail including flat earth including q including the cultural marxist psyop of painting the founders of america as all bad people okay we're going to be getting into all these types of psyops and more all right so we'll be doing that in future episodes but people who think that it is settled science of how quote viruses work this is part of the problem ladies and gentlemen it isn't settled science it's highly contested there are multiple theories of contagion vectors for contagion and the nature of what we are calling viruses and that is not settled science it is highly debated and as a matter of fact there are theories that make far greater common sense than what we have been told by the mass media and by current quote-unquote science which is not settled as many people insist and claim it to be and as you will see we will talk a lot about exosome theory versus virus theory and you will see how the the very idea of an exosome is actually the building seven of the corona the covid 19 psyop okay i'll say that again exosomes are the building seven of the covid 19 psyop and you will understand what i mean by that when we cover this material in a couple weeks on what on earth is happening that being said let's continue with the slides for this week let's jump back in i brought this slide up last week and i think it's so good i just want to reiterate it this week this slide encapsulates the entire state of our reality in one slide there is a satanic death cult that is actually running the world and is coming to devour people it doesn't make a difference what walk of life you're from it doesn't make a difference what color your skin is what your cultural background or religion is what your class is how old you are okay none of that matters all that matters is whether you're awake to it and you understand that this is a dark occult satanic death cult that's what all politics is that's what the mainstream media is and most of all connected with this current series that we're going through here in what on earth is happening that is what the police are a part of all police worldwide are low-level members whether they know it or not you don't have to know it consciously but they are all low-level members of the satanic death cult that ultimately runs the world and is currently culling the world we are in the middle of a satanic dysgenics calling see i don't even call it eugenics anymore okay we shouldn't even refer to what's happening as eugenics eugenics from the greek roots mean good genes or good breeding or good carrying down of genes to future generations that isn't what's happening to humanity we are undergoing a process of epidisgenics meaning that the dysgenics or bad carrying down of genetic material to future generations that is happening is actually being done through mind control that's called epidiscgenics going beyond classical methods of dysgenics through forced sterilization through popular forced physical population reduction no they don't need to do it that that way anymore folks they let the herd call itself dysgenically okay that's what if that's what epidysgenics means what we have to coin the term okay i called it epi eugenics in my unholy feminine presentation but if the truth is told this satanic cult is exercising what i am now calling epidysgenics we need to popularize the term okay and there's a tiny few people who are exposing this satanic epidisgenics death cult that is actively culling humanity tiny tiny few people doing that work in any all you know way that is actually very good that they're actually doing that work in a really effective way a tiny tiny piss in a pot handful of people worldwide scattered to the four winds of the earth okay and that's what that you know dog represents and then the rest of the world are lazy ignorant apathetic cowardly sheep that are just couldn't care less about a damn thing except what's going on in their pathetic miserable selfish lives that that's all that they care about because they're actually lower level members of that satanic death call if the truth be told they're practicing what i call mini me satanism meaning they've been in inculcated and indoctrinated into an even lower level variant of the religion that the big satanic death cult that is running the world operates according to that's really what the rest of the world is it's just a lower level minion level status way way way down on the hierarchy on the totem pole than the higher level satanic death cult you know they have to give other people their mindset and folks i see it every single day every single day on forums and social media i just monitor it i don't get too involved in the drama i just look at it just to be an observer of where human thought where human consciousness is at and it's tragically pathetic tragically pathetic my viewership you're not doing your job i'm sorry i don't care how offended you get you're failing miserably at your job and guess what you don't like me saying that turn the fucking show off i couldn't care less i'm speaking the truth i don't care who it offends i don't care if you're offended i'm gonna tell you when you're doing a good job i'm gonna tell you when you're failing pathetically regarding reaching the masses of people your pathetic failures at what i've been explaining you must be doing for over a decade now it's a pathetic failure the outreach that should be occurring as a result of what has been taught here on what on earth is happening and you my friends that are watching out there are failing at it and i'll keep reiterating that right to your face i don't care about losing viewership i could care less i'm here to speak 100 hardcore truth no matter who it offends and i'm gonna do that week in and week out and i'm one of the only people that'll do that so i don't give a shit about ratings i don't care about money all i care about is what's true and all i care about is whether we're affecting the world for the better and i'm telling you you're not doing your job you think you are and you're failing miserably at it because you're not involved enough that's part of what the seminar is about the how to become the true media seminar you know because people don't know how to do this outreach that's part of it even those who do many of them stay silent because they're cowardly they don't want to rock the boat they don't want to draw attention to themselves a lot of people out there saying that they're doing it you're you're you're cowards in so many other ways and not using your real name you're telling everybody that i'm afraid it's pathetic it's pathetic and cowardly not to use your real name i don't care what you think about a real legal name i could care less you know i could care less about that somebody named me at birth mark pacio that is my actual legal name i was given at birth who gives a shit that it's legal i couldn't care less i i don't acknowledge the state but that is my birth name okay and i put it out there for people i don't care who's watching listening anybody listening all you could do is learn something from me as long as you're not a hard-headed totally rooted in the ego satanist which most people are in their minds okay but i'm telling my hardcore viewership out there you failed at doing your job to a large extent some people have done a great job and some people have done such a great job i'm going to be asking them to come on the one great work network which we are building out it's it's actively going to be being developed we have found developers to do this project and it's going to happen so get ready for it the one great work network is coming i don't have any dates i'm not going to project on that it'll come when it's fully ready but guess what we have the people to put it in place now finally and i'm going to be by personal invite offering people who i do think have done a good job don't take what i've just said as a blanket statement folks some people have done a great job but you know it's a tiny tiny few comparatively by ratio of the total people who say that they know what's going on and say they're awake compared to the people who are actively doing very good work it's a tiny handful of people less than a handful okay so i just wanted to reiterate that slide and talk about that dynamic a little bit last week we ended the show on these couple slides i'm just going to briefly review do most people think see when we're talking about police their supporters policing in general i continue to hear it on social media the staggering staggering ignorance and lack of true being awake so many people i'm gonna do a whole thing we're gonna have a whole series on what on earth is happening called the false awakening the false awakening and its characteristics how about that as a future what on earth is happening topic the false awakening and its characteristics that will be a phenomenal show or series of shows here on what on earth is happening because i hear people who claim that they are awake day in and day out just you know listening out i just observe and see where consciousness is at and i'm telling you it's in the toilet bowl it's in the toilet bowl human consciousness and our viewership who claims that they're awake you're not actively truly engaged in wisdom you have knowledge and understanding many of you but you're not engaged in wisdom wisdom is doing the right thing with what you have come to know and understand and how the how few of you they're doing that once again it's a paltry effort poultry effort look up the word if you don't understand it p-a-l-t-r-y poultry it means it's so few as to be negligible it's embarrassingly few that's what it generally means okay so when i hear people who claim to be awakened saying not all cops are bird hold on step out of the slides cause he's coming out vomit man is coming out haven't brought him out in several weeks here but he's coming out today let's switch over to all the people who insist that there is such a thing as a good cop yeah i'm completely awake i'm a totally awake human being i know what's going on in the world and you know what all the people that say that uh all cops are bad no you're wrong some cops are good people yeah i'm awake and i want to dispel this myth that all cops are bad people no some cops are good people that's what you sound like jackass that's what you sound like jackass and i will not apologize for for what i just did you're not awake and you don't know what you're talking about hold off on going back to the slides hold on let me get it set back up okay you can switch back i'm not going to apologize to anybody because i'm right because i'm right and you're incorrect and i'll say it right to your face in person come see me when you see me in person and i'll say it to your face there's no such thing as a good cop and never has been never will be i've gone through it endlessly endlessly here on what on earth is happening if you do not understand i do not need to reiterate all of that philosophy on every episode no i do not you are the one who is deficient and negligent you are the one if you want to understand it need to go back in my former effort that i have archived on my website what on earth is happening dot com slash podcast and listen to them in order and then you will get the necessary prerequisite philosophy and understand why there cannot be such a thing as a good cop ever and never has been you're lazy and you haven't done that work and i don't need to reiterate it and take up the time to reiterate it on every podcast you go back and listen to it i've already done the work and i've already explained it in detail ad nauseum that means to the point of nausea to the point where it will make you nauseous how much i've reiterated those philosophical first principles in morality in objective morality so if you don't yet understand it it's not a matter of opinion it's objective fact and you're wrong and you need to clear up your erroneous belief system you need to clear it up and get right with the facts with the objective provable facts in nature because you're part of the problem if you still think that so we left off last week's show talking about classical gangs that just want to take territory and tell people that they own them and that they're going to tell them what they can and can't do in whatever territory they rule this is no different than the concept of jurisdiction put in place by politicians and police but do most people think that classical gangs like this violent gangs have the right to rule them no they do not that's why it would always be better for a situation where chaos broke out and gangs like this started claiming that they can rule people that would be better than what we have today let me state that an unequivocal terms it would be better to have a scenario where gangs like this like what you see in this slide claimed that they have the right to rule people because would people accept and believe that notion of an armed criminal thug gang who just wants to do violence to other people would they actually oh just fully mindedly give their belief over to these people and say oh yeah we believe that you have the right to rule us no they wouldn't do that we're in a far more dangerous situation boys and girls far more dangerous far more even chaotic situation than that because we are in a situation where jackasses all throughout the world who are members of a cult belief system a satanic cult belief system actually have come to believe through a total process of brainwashing and indoctrination that's been fed to them since the moment that they were shot out of their mother's womb okay actually believe that this criminal gang has the right to rule them because of a concept called authority because of a religious belief called authority if you have not come to the unequivocal objectively true conclusion that all authority is is a religious cult belief system then you are not awake and if you think this gang has the right to rule you your most or even to exist you're not awake at all not even a little bit child you want to be spoken to with respect exercise self-respect and stop believing in nonsense stop believing in religious cult nonsense what people who believe that police even have a right to exist actually believing is satanic cult religious belief nonsense get as offended as you like it'll never make the statement untrue back to the slides what this condition actually is no matter what how you want to euphemize it it's called slavery it always has been slavery you know it is slavery now and we're still we're enslaved right now it is slavery until this entire concept of policing of authority of government is completely destroyed and abolished from the world it always will be slavery and if you don't understand that you are unconscious you are not a conscious awakened being let's get that straight let's get it straight that's one of the top characteristics of what it actually means to be truly an awakened being i covered all of the characteristics of what it actually really in objective reality means to be awake to be an awakened being in the seminar that i put out publicly entitled streetwise spirituality go back in my archives on the video section of what on earth is happening dot com what on earth is happening dot com slash video videos i believe or just click the videos tab okay what on earth is happening dot com slash videos and watch streetwise spirituality that's the seminar you want to get clear about what it means to be awakened and most people out there you're not awakened even a little bit even some listeners to my show some of you are truly awakened some of you are not just awakened but you're you have wisdom because you're doing the right thing with that status of awakening and that's what it really means to truly be awake you have to be taking action but i'll tell you what most of you are halfway there at best and you know a lot of you aren't taking action and that really truly means you're not all the way there you're not all the way awake to really push it forward into the realm of true awakening you have to take right action so back to the slides this is what i concluded last week on government and policings policing are themselves merely euphemisms for slavery one of the so-called founding fathers of america james madison he put out some flawed moral and philosophical logic okay he said if men were were if men were angels no government would be necessary this is the justification for what is known as minarchism or limited government in other words this person believed in such a thing as limited slavery i credit madison for taking things so far up to a point but then you have to say what it truly is minarchism is minimal slavery is there such a thing as minimal slavery can you be minimally enslaved he didn't understand and wasn't fully philosophically morally and spiritually awakened he was a halfway being he was halfway there i on the other hand am all the way there that you know i'm going to do in in the presentation or presentation series entitled the false awakening okay one of my first title cards one of my first pieces of art i'm going to display a quote and it's going to be the concept in eastern thought in buddhism if you meet the buddha on the road to enlightenment kill him let me say that again if you meet the buddha on the road to enlightenment kill him that means if you you're going to encounter on the path to true enlightenment false awakenings that are considered false buddhas the buddha was considered the awakened one in eastern buddhist philosophy so this statement in buddhism means if you're on the path to awakening but you're not there yet and there is such a thing as getting there as being there yes there is such a thing as a destination the destination is the 20 points that i cover in streetwise spirituality that's what it really means to be awake it's not my opinion it's not subjective if you don't have those 20 things you're not awake if you don't have those 20 characteristics you're not awake so that's the destination you can go even past that okay there are other destinations but that's the destination of what it actually means objectively to be awake but if along that way you're getting there getting there getting there and then suddenly somebody goes oh no this is the end of the path set up tent here you don't need to go any further this is where the people who believe that policing is morally legitimate are this is what what where people are like james madison who was a menarchist and didn't go all the way to true anarchy to true understanding that there can never be moral legitimacy in the rulership of other people that is just the claim of ownership on other people which is slavery that's what all government is claiming that some people have rights that others do not claiming we can delegate rights that the individual does not to other individuals claiming that authority is real and legitimate all of these things are false religious beliefs and those who don't strike them down have encountered a false buddha on the path and haven't killed him okay that's what that means that's why i'm gonna start that lecture series that presentation series with that concept if you meet the buddha on the path to enlightenment kill him okay now i countered james madison's menarche flawed moral and philosophical quote logic with true awakened and sound moral and philosophical logic for anyone with common sense and a true understanding of objective morality my retort to madison in the modern day in my words is this since human beings aren't angels and we certainly agree on that point none are fit to rule all authority is illegitimate for human beings no one is an angel no one is angelic we are all flawed human beings no matter how awakened we are we still have flaws because awakening does not equate to perfection that is number 20 out of 20 okay there's your 2020 in 2020 the 20th point of streetwise spirituality of characteristics of what it means to be truly awakened in awakened is do not equate being awakened with being perfect being an awakened one does not mean you are a perfect one and if you claim to be perfect that's the height of egotism and the height of hubris no one is perfect no one ever has been perfect no one ever will achieve perfection in 3d human form that is for the creator of the universe itself that's what that is that's what that force or consciousness is it is not human beings you claim that you're claiming godhood you're claiming to be god you're claiming to be the creator of the universe that set all the laws of the universe into motion you are not that you are within that you are a part of that but you are not that in its entirety okay right now we are all flawed individual human beings having a human experience we are spiritual beings we are components of the spiritual having a human experience in the 3d to claim perfection in that is the height of hubris there is no such thing as perfection in the 3d or physical domain so human beings most certainly aren't angels and they're not perfect therefore none are fit to rule none are fit for the the position of authority or kingship or rulership it's inherently immoral and inherently morally illegitimate and if you don't understand that it's not a subjective opinion to say i agree or i don't agree if you don't understand that eternal truth you are simply wrong and your ego is in the way of understanding it as i've said very pointedly last week and in previous weeks it is your ego that is in the way of the proper reception of that first principle of morality in natural law it is not because i haven't explained it sufficiently it is because you haven't received it properly let's get that straight where the ego is at the problem in ego is not with me i have understood it changed my thought process accordingly changed my actions accordingly taught it perfectly that's where i can claim i've done something perfect i don't claim to be perfect but have i taught that perfectly i've taught it as close to perfection as it could be done in human form to the point where i've covered every philosophical aspect of it practically hundreds of times so the fault or flaw does not lie with me as a teacher of objective moral philosophy when it comes to the concept of authority and how it is inherently morally illegitimate all authority in government is the problem lies with others their ego is too huge and too calcified into diamond calcified to the hardness of diamond that is in the way of proper reception of natural law first principles therefore they are clinging on to immoral ideas and as such they continue to express and act upon immoral ideas and that is what makes them themselves a bad person yes clinging on to those immoral ideas that government should exist has the moral right to exist and that other people must be coerced to live under it is itself immoral behavior and those who believe in it are immoral beings for having done so and for continuing to condone what if we strip the euphemisms away amounts truly to slavery there is no such thing as being a moral person and saying slavery should continue to exist if you believe that and condone it you are condoning something that is immoral and that makes you an immoral person so that's where we wrapped up last week before i get to the reading of confessions of a former bastard cop i brought up i made this little quick slide which is two people thinking to themselves i wonder what we should replace the police with well if you claim the police should be abolished and i absolutely do make that claim they've always needed to be abolished long before any of the events with george floyd happened okay i always knew that they must be abolished on moral principle grounds okay all statism is slavery and it's immoral police are a part of statism therefore it's an immoral institution on its face from jump street so when this question is asked what should we replace the police with i had my new graphic artist who's doing a fantastic job i made this and i said let's make a retort to this question so my new graphic artist mark made this retort to the question this is how silly and mentally ill people who ask the question well what should we replace the police with this is what you sound like you sound like somebody asking a patient who is in recovery from having lung cancer surgery and having a huge tumor cut out of their lungs saying what kind of cancer would you like to replace your lung cancer with imagine how insane that sounds because that's what all police are they're a cancer they're a blight they're a plague upon society and always have been and always will be they are the enforcers of slavery order followers police military national guard you are the enforcers of human slavery and you always have been and you always will be for as long as you continue to do that job you are low-level members of a satanic death cult you always have been you always will be you are that now if you are active duty police military national guard or any member of government it does not matter whether you understand that or not it is still true objectively eternally it's an eternal principle rooted in absolute truth which yes there is such a thing only ego driven satanically minded people think there are no such things as absolute truths this is called solipsism this is called moral relativism those who believe there is no absolute moral truth about anything you are a moral relativist you are a solipsist and that is one of the hallmark characteristics of the low-level mini me satanism belief system of the big satanic cult again i've explained this before almost ad nauseum about the mindset and beliefs of the high-level satanic cult members of the dark occultists who ultimately run this planet who are the social engineers and mind controllers of the masses of people who own and control the politicians the judges the police the military the media etc they've long since owned bought them out and controlled them since day one they own all the religions you know if they're old they all just funnel into the big religion of dark luciferianism at the very top or apex of the pyramid of power and control they own all the financial institutions and corporations they're the royalty the royal families of ancient europe and beyond that go back into ancient babylon ancient mesopotamia to potamia okay into ancient egypt predating that into into prediluvian ages so the ridiculousness of saying you know what do you want to replace the police with you know i i said i'm going to have this drawn or asked somebody to draw it well here it is by the way i love mark's artwork style i'm gonna be able to have some beautiful very stylistic and unique very um uh what's the word i'm looking for distinctive artistic style added to my presentations from here on out i'm extremely excited about this and he's fast too you know he did this in like you know a couple hours basically so i'm i'm very impressed with it i love the style i'm going to be asking him to do a lot more and you know i guess you know this is like uh you know david david like with his former artist neil hage i i got my own neil hague now you know so i i definitely appreciate the effort and i love the style we're going to be moving forward with a lot more graphics now that i have an in-house graphics person and i could just hey i spit out an idea in my head boom it's on the screen i would love to take a break from teaching moral philosophy so that i could get this good at digitally painting or drawing or sketching i think i have that within me somewhere buried nested way deep down inside you know i'm pretty aesthetic in in what i put together you know i'm a good digital manipulator but not too good with original art if i didn't have to do this i'd love to turn over my life to a creative expression and get good at things like this then then i'd be really dangerous if i could really encapsulate digitally you know as art what i the visions that i see in my mind that i want to bring to life but now this is going to allow me to to do that and so you know i thank all the artists that we're working with now you guys are fantastic thank you for bringing your efforts forward like this okay thank you to the people who have donated to make things like this possible because we're going to move forward with stuff like this my presentations are going to have some awesome art in them going forward okay so let's move on and let's get to the real meat of what we're gonna be talking about here today uh if time allows we will go to calls probably not for this episode we'll see um again this will take as long as it takes if we have to do a whole call-in show on this topic i would love to do that and hear your thoughts on this entire topic maybe we'll do that next week okay so let's move forward with confessions of a former bastard cop and you know what folks i've said it before i think i've restrained myself a little bit this week got you know angry a few times but it's better i'm going to try to stay focused and on point philosophically and i'm going to let this document do the talking i'm going to let it speak for itself there's no real even need to even add any commentary it's right from the horse's mouth so to speak okay so let me switch out in my slides and go to my pdf document give me a moment let's get that up on the screen uh go right ahead you can bring it up great so i've uh put this in um you know dark mode i think it looks pretty decent uh let's let's begin now i'm gonna read this okay for those who may you know find that a little tedious or boarding oh well we're gonna hammer this into people and help people who still think any of the police are doing something necessary or quote-unquote good let's get the idea of what really goes on behind the scenes and i've known this since before i started what on earth is happening years before i started what on earth was happening i've had conversations with people inside police departments years before i ever said a word with what on earth is happening i knew what was going on from an insider's perspective once again before i even start this this will be the last thing that i'm jumping in i'm putting the offer one more time on the table and if the person comes through or if somebody knows who i'm talking about i will not say the person's name on the air it is a male okay it's it's it's a man okay if somebody knows the the gentleman that i knew back in the days of truth freedom prosperity here in philadelphia which was an activist group they held all the end the fed rallies here in philadelphia back in the day okay if you know the person i'm talking about who used to be a police dispatcher he worked as a police dispatcher he told me all of the insider things that went on in the police department during the quote-unquote ron paul revolution you know when they would have the ron paul revolution rallies and the end the fed rallies here in philly when there was a big quote freedom movement it wasn't really a freedom movement it was the my freedom movement hate to say it but that's really what it was okay not too many truly awakened or enlightened beings people who woke up to a certain level of the political uh machinations but you know you bring up spirituality to them they looked at you like you had you know seven medusa snakes growing out at your neck you know they had no understanding of the spiritual component very few of them did a few got there not many okay but this former police dispatcher who quit his job over what he saw and heard would tell me about how police were frothing at the mouth to slaughter animals on no knock raids loved it were psychopathic killers and loved what they did craved it frothing at the mouth like mad dogs craving to go out and kill animals on no knock raids if you have a lot of courage built up in your heart sir you will have the floor on what on earth is happening i'll give you a whole show to lay it out okay you you'll have the floor i'll ask a few questions about what happened and you can explain it all in your own words with no prompting from me if you want that contact us you know send an email to my assistant leah what on earth is happening dot com will book you on the show i'm not going to say that again that's it you know if he wants to do that or if somebody knows who i'm talking about and wants to find the person and bring that to his attention you go right ahead i can't make anybody speak if they don't want to but if you have the courage to do it the floor will be yours for a whole show here we go confessions of a former bastard cop by officer acab which is obviously an acronym i would love if the person put his own name on this it would have shown more courage but this stands for all cops are bastards okay an acronym so that's not his real name that's a pen name i was a police officer for nearly 10 years and i was a bastard we all were this essay has been kicking around in my head for years now and i've never felt confident enough to write it it's a time in my life i'm ashamed of it's a time that i hurt people and through inaction allowed others to be hurt it's a time that i acted as a violent agent of capitalism and white supremacy under the guise of public safety i personally ruined people's lives but in doing so made the public no safer so did the fam the family members and close friends of mine who also bore the badge alongside me but enough is enough the reforms aren't working incrementalism isn't happening unarmed black indigenous and people of color are being killed by cops in the streets and the police are savagely attacking the people protesting these murders american policing is a thick blue tumor strangling the life from our communities and if you don't believe it when the poor and marginalized say it if you don't believe it when you see cops across the country shooting journalists with quote less than lethal bullets and caustic chemicals maybe you'll believe it when you hear it straight from the pig's mouth why am i writing this as someone who went through the training hiring and socialization of a career in law enforcement i wanted to give a firsthand account of why i believe police officers are the way they are not to excuse their behavior but to explain it and to indict the structures that perpetuate it i believe that if everyone understood how we're trained and brought up in the profession it would inform the demands of our communities should be making of a new way of community safety if i tell you how we were made i hope it will empower you to unmake us one of the other reasons i've struggled to write this essay is that i don't want to center the conversation on myself and my big salty boohoo feelings about my bad choices it's a toxic white impulse to see atrocities and think how can i make this about me and again folks i'm going to take a break here from reading it because this person has a lot of quote white guilt complex which is a false psychological complex this is not about race this is about statism this is about the belief in authority this is about the belief that some people have more rights than others this is about the belief that the state and government and police are morally legitimate entities that's what it's about it's not about race it's not even about capitalism or money okay these are false paradigmatic dialectics their divide and conquer strategies it was essentially what a dialectic is okay so i'm just gonna chime in occasionally when i see a flaw in his explanation slash psychological or philosophical framework and correct it a bit now that's his own words and that's what he thinks and you could see he's not all the way there in his understanding but let's go back to it i just wanted to point that out so i hope you'll take me at my word that this account isn't meant to highlight me but rather the hundred thousand of me in every city in the country it's about the structure that made me that i chose to pollute myself with and it's my meager contribution to the cause of radical justice yes all cops are bastards i was a police officer in a major metropolitan area in california with a predominantly poor non-white population with a large proportion of first generation immigrants one night during briefing our watch commander told us that the city council had requested a new zero tolerance policy against murderers drug dealers or child predators he's asking the question against murderers drug dealers or child predators no against homeless people collecting cans from recycling bins that's who the new zero tolerance policy was against homeless people going around collecting aluminum cans from recycling bins that's who his commander in the police force said we have a new zero tolerance policy you know would have been bad enough if it was against drug dealers it wasn't against murder murderers or pedophiles no it was against homeless people collecting cans that other people threw away see the city had some kickback deal with the waste management company where waste management got paid by the government for our expected expected tonnage of recycling when homeless people quote-unquote stole that recycling from the waste management company they were putting that cheaper contract in peril so we were to arrest as many recyclers as we could find even for me this was a stupid policy and i promptly blew sarge off but a few hours later sarge called me over to assist him he was detaining a 70-year-old immigrant who spoke no english who he'd seen picking a coke can out of a trash bin he ordered me to arrest her for stealing trash i said sarge come on she's an old lady he said i don't give a shit hook her up that's an order meaning cuff her and arrest her and i did she cried the entire way to the station and all throughout the booking process i couldn't even comfort her because i didn't speak any english any spanish i didn't speak spanish sorry i felt disgusting but i was ordered to make this arrest and i wasn't willing to lose my job for her does that sound familiar ladies and gentlemen order following this is what all cops are they break down into the order followers and the psychopaths and ultimately they're all order followers a lot of them increasingly even most of them are psychopaths unfortunately in today's world but this is what we talked about on the last several weeks of what on earth is happening order followers and psychopaths make up the police forces this person is acknowledging i was an order follower you could say he had some knowledge of of right and wrong that's called conscience the knowledge of the objective difference between what behaviors are rights and what behaviors are wrong so you can hear in his explanation of his former behaviors he is saying he knows that it was wrong but why did he do it anyway he ignored his conscience or knowledge that is why i can say i can make the claim some order followers have conscience but they don't follow their conscience they follow their orders see that's why they're order followers not followers of conscience you can't do the two things simultaneously because an order follower means you do what you were commanded to do whether it was right or wrong or not doesn't matter you are saying yes sir i will follow that command or order whether it is correct morally or not that's the definition of what it means to follow an order therefore or all order followers or bad people morally on first principles you cannot be simultaneously following an order and following conscience it is an impossibility in nature objectively get that straight get your philosophy about that straight if you don't understand that you're incorrect you have your philosophy mixed up confused incorrect then you build on top of a false axiomatic belief all of your behaviors that follow upon that belief are also going to be flawed and also going to be immoral that is why it is so important to be correct philosophically and morally read the works of richard r wetherill he wrote a book called be right or go wrong this is what he meant by this you cannot get your behaviors straight according to moral natural law if you are not first correct about what behaviors objectively are right behaviors or objectively wrong behaviors so this person knows what he was ordered to do was objectively wrong and he did it anyway why did he do it anyway because he has such low self-esteem and he was so self-loathing at the time he could not exercise conscience so he followed in a moral order instead even though he knew it to be wrong because he's the kind of person who thinks i can't lose my job this is all i know how to do because he has no self-worth no confidence in himself as a human being to go out and get another job that is right livelihood that is a moral job do you understand viewing audience i'll repeat it 70 000 more times if i have to do you understand the underlying moral principles and philosophy regarding that that i've just stepped out of this reading to explain because i'll do it another seventy thousand times if i have to okay so let's go back to the reading and continue with what the order follower did i couldn't even come for her because i didn't speak spanish i felt disgusting but i was ordered to make the arrest and i wasn't willing to lose my job for her no former order follower you weren't willing to lose your job your immoral job to do the right thing which is what following conscience is so i'm going to correct his axiomatic errors from time to time and explain how it really is in nature all right let's continue if you if you're tempted to feel sympathy for me don't i used to happily hassle the homeless under other circumstances i researched obscure penal codes so i could arrest people in homeless and camp encampments for lesser known crimes like remaining too close to railroad property section 369i of the california penal code i used to call it planting warrant seeds since i knew they wouldn't make their court dates and we could arrest them again and again for warrant violations look at what a piece of dirt this person was this is what it means to be a bad person in a piece of dirt whose parents were probably also immoral pieces of fucking trash and didn't raise this person morally and this is what people think are good people this is what you'll hear oh it's just one apple no the concept it's not some bad apples the entire institution is immoral all of them on on their face it's immoral because no one can have rights that others do not possess no one can grant rights that an individual does not possess as an individual get that straight menircus out there your moral philosophy is fundamentally axiomatically flawed and since very very few people will tell you that i'll tell you that right to your face let's continue we used to have informal contests for who could cite or arrest someone for the weirdest law listen to this contest about taking someone's freedom for the weirdest law for the things that don't don't even hurt anybody when people do dui on a bicycle non-regulation number of brooms on your tow truck some stupid code shit like that for me police work was a logic puzzle for arresting people regardless of their actual threat to the community in other words regardless of actual morality as ashamed as i am to admit it it needs to be said stripping people of their freedom felt like a game to me for many years folks he's not alone this is most of them most of them take this attitude and approach i've been told by insiders it's most of them it's not some of them it's most of them i know what you're going to ask did i ever plant drugs did i ever plan a gun on somebody did i ever make a false arrest or file a false report believe it or not the answer is no cheating was no fun i like to get my stats the legitimate way but i knew officers who kept a little baggie of whatever or maybe a pocket knife that was a little too big in their war bag yeah we call our duffel bags war bags did i ever tell anybody about it no i did not did i ever confess my suspicions when cocaine suddenly showed up in a gang member's jacket no i did not in fact let me tell you about an extremely formative experience in my police academy class we had a click of around six trainees who routinely bullied and harassed other students intentionally scuffing another trainee's shoes to get them in trouble during inspection sexually harassing female trainees cracking racist jokes and so on every quarter we were to write anonymous evaluations of our squad mates i wrote scathing accounts of their behavior thinking i was helping keeping bad apples out of law enforcement and believing i would be protected instead the academy staff read my complaints to them out loud and outed me to them and never punished me causing me to get harassed for the rest of my academy class that's how i learned that even police leadership hates rats that's why no one is quote changing things from the inside they can't the structure won't allow it and that's the point of what i'm telling you whether you were my sergeant legally harassing old women me legally harassing our residents my fellow trainees bullying the rest of us or quote the bad apples illegally harassing quote shit bags we were all in it together i knew cops that pulled women over to flirt with them i knew cops who would pepper slay pepper spray sleeping bags so that homeless people would have to throw them away i knew cops that intentionally provoked anger in suspects so they could claim they were assaulted i was particularly good at winding people up verbally until they lashed out so i could fight them nobody spoke up nobody stood out nobody betrayed the code because it's a cult let's call it what it is it's a cult it's not even a secret society folks it's a cult police are a cult they always have been a cult they're a cult now and they always will be a cult stop euphemizing it this is how cults operate and i and people dare dare to say what on earth is happening is some kind of a cult fuck you we are the anti-cult i am teaching all the methodologies of cults and exposing them to the entire world so people fucking quit their fucking cults dumb fuck and i'm not going to apologize for it you're just a dumb fucking can't understand what i do here every fucking week i expose the methodologies and mindset of cults and jerk-offs say this is a cult you don't know what the fuck you're talking about punk bitch i expose the methods of cults to try to destroy all cults back to the reading none of us protected the people from bad cops let me read that one more time no let me read that three more times none of us protected the people or in other words you from bad cops none of us protected the people from bad cops none of us meaning the police protected the people from bad cops that this is what jackasses out there actually believe is being done that the police protect you from anyone most of all themselves you're a jackass no nothing psychological punk bitch child and you won't hear anybody else pretty much in the world tell you that i'll tell you that come up to my face and see me about it because i'm not afraid to say it to somebody as long as it's the truth and once again you're the problem who doesn't get it let me reiterate that three times if you don't get that you're the problem you're the problem you are the problem you have not received moral philosophy properly the flaw is in your mind and in your ego boy the flaw is in your mind and in your ego girl that's where the flaw is not with me not in how i've taught it none of them ever protect people none of them ever protect people from the sick psychopathic twisted fucks in their own ranks get it through your ignorant hard-headed skulls back to the reading this is why all cops are bastards and what he means here is all cops are bad people all cops are immoral people according to the actual objective definition of what it means to be a bad person even your uncle even your cousin even your mom even your brother even your best friend even your spouse even me finally someone has the balls to tell the truth that they're a bad person because even if they wouldn't do the thing themselves they will most they will almost never rat out another offer officer who does the thing much less stop it from happening meaning actually arrest the person who's actually doing immoral behavior namely their own officers bastard101 i could write an entire book of the awful things i've done seen done and heard others bragging about doing but to me the bigger question is how did it get this way while i was a police officer in a city 30 miles from where i lived many of my fellow officers were from the community i treated their neighbors and comm and treated their neighbors just as badly as i did while every cops individual biases come into play it's the profession itself that is toxic and it starts from day one of training now let me read his statement again here while every cop's individual biases do come into play it's the profession itself that is toxic and it starts from day one of training every police academy is different but all of them share certain features taught by old cops run like a paramilitary boot camp strong emphasis on protecting yourself more than anyone else the majority of my time in the academy was spent doing aggressive physical training and watching video after video after video of police officers being murdered on duty ladies and gentlemen i'm stepping out of the reading momentarily ladies and gentlemen go back to the series in the podcast archives where i taught all of the methodologies of cults what are the four methodologies or at least a few of them the first is separate your potential cult members from the rest of society isolation from the rest of society okay what's next total indoctrination okay us versus them mindset and trauma this is these are all the classical indoctrination techniques of cults throughout the centuries this is what police boot camp is this is what police academy is it's cult techniques what are they doing they're isolating them from the rest of culture from the rest of society they are spending the entire day putting them through aggressive physical training to wear them out so that they're not thinking logically and then they're traumatizing them by showing them videos of murders day in and day out over and over again this is a right from a police officer telling you how they do it what he really doesn't understand is that these very techniques are all right out of the playbook of classical cult methodologies throughout the centuries of human history every single cult in all of human history has engaged in the exact same techniques it's called the techniques of cults and i've gone over it tons of times i did whole shows on it on what on earth is happening the shows were techniques of cults go back in the podcast archive and watch it in its entirety as a matter of fact don't just watch that by itself watch the whole damn podcast in order all 229 episodes and only go forward in order and then you will understand those who don't do not understand i guarantee you haven't done that because you're fucking lazy stop making excuses and do it and get your fucking head right back to the reading i want to highlight this nearly everyone coming into law enforcement is bombarded with dash cam footage of police officers being ambushed and killed over and over and over read cult technique that's what you should read there cult technique colorless vhs mortality plays cops screaming for help over their radios their bodies going limp as a pair of tail lights speed away into grainy black a grainy black horizon in my case with commentary from an old racist cop who used to brag about assaulting black panthers to understand why all cops are bastards you need to understand one of the things almost every training officer told me when it came to using force i'd rather be judged by 12 than carried by six meaning i'll take my chances in court rather than risk getting hurt and guess what courts always let them off they never even goes to court which we're going to get to and talk about it's called qualified immunity for police officers see i'll take that attitude when it comes to giving up my rights to police i'll be judged by 12 rather than carried by six you know because that's what these people are potential murderers that's what the police are potential murdering cult members we're able to think that way because police unions are extremely overpowered and because of the generous concept of qualified immunity a legal theory which says a cop generally can't be held personally liable for mistakes they make doing their job in an official capacity no ladies and gentlemen they're flawless gods they're not personally responsible for anything they do that's morally wrong no they're above the rest of humanity as gods entrenched above all the rest of the lester minion subjects and slaves don't you know you're held personally responsible for the littlest fucking thing you do that they say is wrong even though it's if it's not wrong but they can murder people with total immunity and get away with it that's what qualified immunity is and almost every cop in the entire country and actually in the entire world has it going for them qualified immunity in other words you can rape pillage and murder with absolutely no impunity with no physical repercussions coming back your way that's what they are told with impunity you know that's what qualified immunity is licensed to do total wrongdoings theft and murder with comp complete impunity meaning unpunished when you look at the actions of the officers who killed george floyd breona taylor david mcatee mike brown tamir rice philando castile eric garner or freddie gray remember that they like me were trained to recite i'd rather be judged by 12 as a mantra even if mistakes were made the city meaning taxpayers meaning you pays the settlement not the officer that tm is mistakes were made trademark it's not super scripted sorry i missed that in my in my editing of the uh document should the tm should be super scripted minor detail once police training has through repetition indoctrination and violent spectacle promised officers that everyone in the world is out to kill them the next lesson is that your partners are the only people protecting you occasionally this is even true i've had encounters turn on me rapidly to the point that i legitimately thought that i was going to die only to have other officers come and turn the tables one of the most important thought leaders in law enforcement one of one of the most important thought leaders in law enforcement enforcement is colonel david grossman a killologist who wrote an essay called sheep wolves and sheep dogs cops are the sheep dogs bad guys are the wolves and the citizens are the sheep see they're trying to reframe that satanic death cult image that i showed earlier that's why i brought it up again they are trying to refrain that in their favor saying they're the sheepdog who's protecting the human herd and protecting each other no incorrect you are a low-level member of the satanic death cult that is calling and devouring humanity i am one of the sheepdogs who is protecting people by putting the truth out there let's not get it twisted punk don't ascribe false courage to yourself you're a totally non-courageous shit for brains coward i'm the courageous human being shit for brains punk bitch let's get it straight boy me and the people who do this great work are the ones with courage and we're the ones bringing some level of protection through knowledge to the human fucking sheep out there not you punk bitch so they're giving this false interpretation of them as the courageous sheepdogs that are trying to protect humanity by putting the word out there no you're a member of the satanic death cult and you always have been you're just too dumb to know it cops are the sheepdogs bad guys or the wolves and the citizens of the sheep colonel grossman make sure to mention that to a stupid sheep a sheepdog looks more like wolves than sheep and that's why they dislike you no they dislike you because even at a subconscious level they know your immoral pieces of fucking dirt fucking trash boy that's what they know at a subconscious level that's why they don't like you or respect you you're not worthy of respect you don't respect yourself because ultimately you're deep inside your chicken shit coward little boys who never grew up in consciousness you don't have any real courage you're members of a fucking street gang that people believe have authority over them that's all you ever have been your pieces of dirt your low life trash fucking parents never morally raised that's what you are shithead this quote they hate you for protecting them and only i love you only i can protect you tactic is familiar to students of abuse partially true ladies and gentlemen do you know who it's very familiar to people who have studied the techniques of cults that's who it's intimately familiar to this is one of the techniques of cults putting people through abuse physically and psychologically and then telling them you're the savior as the cult leader this is one of the main techniques of cults do me a favor somebody put have somebody on the team put on drive the slides that comprise the techniques of cults i'm going to put them in here on the fly okay ask leah to do it on the fly i want somebody to go back in the podcast archive pull down techniques of cults i want to i haven't put it in my presentation and i want it on the fly put it up on the screen for people to see okay let's see if we can get that done if not hey it's what it is but if we can get that in in drive please direct me to it put it in the show notes area right next to the show notes and i'll get it in my presentation please thank you if you can accomplish that i know it's a on the fly request but let's see so continuing this they hate you for protecting them and only i love you only i can protect you tactic is familiar to students of abuse it's what abusers do to coerce their victims into isolation first technique of all cults pulling them away from friends and family and ensnaring them in the abuser's toxic web law enforcement does this too pitting the officers against civilians they don't understand what you do quote they don't understand what you do they don't respect your sacrifice they just want to get away with crimes you're only safe with us end quote you know this is what the police teach their membership it's a cult indoctrinating their low-level members through trauma and repetition there you go isolation repetition us versus them attitude and trauma that's it conformity and trauma i think the wolves versus sheepdog dynamic is one of the most important elements as to why officers behave the way they do every single second of my training i was told that criminal criminals were not a legitimate part of their community that they were individual bad actors and that their bad actions were solely the result of their inherent criminality let me read that again because this is what i talked about the first thing to understand about why police must be abolished is where does bad human behavior come from this was the first philosophical true eternally true tenet of where bad behavior comes from and the police are teaching people the exact opposite of that eternal truth okay i was told that listen to what he's saying here this is critically important to understand ladies and gentlemen focus in and listen every single second of my training i was told that criminals were not a legitimate part of their community that they were individual bad actors and that their bad actions were solely the result of their inherent criminality go back to last week's show of the five eternal truths why police should and must be abolished point number one is that bad behavior people engaged in bad behaviors do not emerge from their mother's womb that way it's not inherent behavior it's learned behavior it's learned through culture it's learned through bad parenting it is learned through indoctrination bad information goes into the human brain and mind by the garbage that's put in there through all those bad methods of bad parenting bad media bad schooling bad you know information coming in through the media etc what results what is the manifested result on the other side of garbage going in garbage comes out and manifest in our society in the form of bad behavior what do you think the police are exempt from that process of garbage in garbage information goes in garbage information comes out in the form of behavior what police are exempt from that no it's the same exact thing that's why their behaviors are immoral just like criminal behaviors of the average person out there are also immoral they're no different they're just as ignorant they're just as ill-informed they haven't corrected that axiomatically flawed understanding of where behave bad behavior comes from and they insist that they're correct and that it doesn't come from where i just explained their ego is in the way and they think they have it figured out and they haven't figured shit out just like most of my listening audience you haven't gone far enough you're not all the way there you haven't figured it out look i need to do a whole another show where i need to do a barragingly hammering show on what human nature is not what human nature is and what human nature is not that's the next show after the call-in show we're going to delay other shows the next show after the call-in for this topic is what human nature is and is not and the big part about it really is i should just call the show what human nature is not we'll remove all of those things and then we'll come down to an understanding of what it actually is because people still make that this is the other thing i hear in the so-called freedom movement i hear total fuck-tard jackasses spouting let's take take it away from the slide for a moment the vomit man's making another appearance okay let's go hold on let me bring it up and let's go back to let's hear from the average dumb fucking the my freedom movement yeah i know where hume what human nature is you know our human nature it's just people are just mad you know it's just they're inherently either good or bad it doesn't have anything to do with information that they take in through their formative years and then just believe about what culture and media told them and what their shithead parents told them or what their shithead teachers told them or what the shithead media told them no no they just they come out of their mother's womb either good or bad that's just what human nature is it's just human nature to be a certain way that's not the human condition that's just human nature you're a fucking idiot you're a fucking idiot and you don't know what you're talking about you don't know what you're talking about that's how dumb you sound boy you know nothing nothing truly in understanding about how it really works and functions zero that's why you can't do the great work you haven't even gathered the knowledge you're not even at the grammar step of the trivium process you're not even there because you think that the human that human nature equates to the current human condition no people are the way that they are right now because they've been conditioned to be and behave the way they are now it is not their nature you are incorrect little shit no nothing shit for brains person you're incorrect that's not human nature that's the human condition so we're going to do a whole show where i belaboringly and slowly and repetitively fucking hammer it into your fucking dumb skull numbskull because let me tell you something folks and then for the people who say oh you're just talking at the people who refuse to get it no you're wrong it's some of my own fucking listenership you're wrong it's some of the people who are out there at the rhetoric stage trying to tell people they know and they know what the solutions are and they haven't even arrived at the grammar stage properly of the trivia methodology they're out there putting the work out saying that they know what's going on and they don't know a fucking thing about what's going on they're spouting bullshit rhetoric before they've even pieced together the grammar you got your order of operations out of order go look up pemdas and get your order of operation straight ass okay you know you there's an order of operation in mathematics it's called pemdas look it up p-e-m-d-a-s parentheses um what's the second one uh uh yeah parentheses exponents uh then multiplication and um division in order from left to right and then addition and subtraction in order from left to right you know uh uh uh person second grade should understand that the acronym pemdas well guess what dumb fucks out there even in the freedom movement you got your order of operations incorrect get your grammar underneath your ass before you go to the rhetoric stage and then guess what go through the middle step as well which is true logic weed through all the logical inconsistencies and go through and process all that data all that grammar all those building blocks and understand it truly before you start spouting rhetoric most of you haven't done that and you're out of order you know it makes sense when you look at it that way from the perspective of the trivium you're out of order that's why you make no goddamn sense logically you haven't truly developed logic and reason so i'm told very kindly some of my staff has put these images up keep it on me for a second while i grab grab a couple of these images and only take a second and i'm going to show you what the techniques of cults are okay because i feel it's a good refresher and people really should understand this and know it okay so i could do this on the fly here let's bring it right up in a second hold on and just hit the wrong button there one more second let's go full screen with this okay great switch back thank you to my staff very attentive i really appreciate that and guess what folks this is what it makes possible to do on the fly here on what on earth is happening because i have an attentive staff on duty during the show thank you guys it's very appreciated great job okay let's go back to the slides this is what your generosity folks in helping me to achieve this this level of production and production values has made possible okay so look we can just do things like this on the fly now techniques of cults or how to brainwash willing followers who want to give away personal responsibility for their own actions the techniques of cults eternally throughout all of human history have been the same isolation conformity indoctrination through repetition and trauma and i stepped through this previously the mental and emotional trauma that was 4b these aren't in order let me just i'll step out it doesn't matter doesn't matter for a second let me bring them up in order conformity so tech cult nic yeah cult technique number one let me see if i can grab it yeah isolation is first okay cult technique number one isolation physical separation from the rest of the community this is boot camp and or police academy creation of us versus them mentality demonization of incense outsiders or those who don't belong give me a second see if i can get them in order you could yeah you could step out of there just step out of there while i do this take one second yeah can't get them in order just give me one second all right now they're in order okay go back there's always workarounds for people there's always work around for things folks not one way of doing things if one technique doesn't work you got to go on to the next technique we're going to be teaching that in the seminar okay i got them in order correctly now that one's just not big enough there we go okay cult technique number two conformity no individuality tolerated one's old identity must be completely shed uniforms to create sameness and appearance go back yep thank you and sameness in speech and behavior this is the second technique of all cults throughout human history next one indoctrination through repetition rigorous schedules and instructions repetitive behaviors like obstacle courses drills formations marching in step etcetera this is what tires people out puts them in the r complex of the brain so that they can't use the neocortical brain the human brain to logically think and reason and come to accurate conclusions about what they're a part of or what's being done to them repeated phrases chants or songs all cults do that next slide this is technique 4a out of technique 4 which is trauma we have physical trauma and then psychological or mental and emotional trauma so 4a is physical trauma high levels of activity to the point of exhaustion that's what you heard him explain earlier in the document low sleep time and disrupted sleep high carbohydrate and low nutrient diet this fucks your brain up so you can't think and reason properly last part of the technique of cults was uh 4b let me bring it up hold on it was sorry one second four b we can switch to okay mental and emotional trauma verbal and psychological abuse unexpected sudden and shocking scenarios like waking people up to do drills in the middle of the night and a perpetual atmosphere of fear like playing videos of police being killed over and over and over and over again to them that's mental and emotional trauma every technique of cults is in place in military boot camp and in police academies every single one i'm going to step back to the regular slides in a second uh thank you for that staff members i really appreciate you doing that on the fly i think it really hammers the point home when you see it in real time there okay so let's go back to the reading one once police training has through repetition indoctrination and violence spectacle oh we went forward past this sorry we were on the next page okay all right here we go so every single second of my training i was told so we were talking about that they have no understanding of human nature they're constantly sold on the idea that human beings are just bad bad apples out of the womb it that it's bad behavior is inherent they don't understand that human nature is the ability to be programmed the ability to be programmed extremely badly or the ability to be programmed through truth very well if you're programmed badly bad behavior manifests and is the result if you're programmed well good behavior moral behavior is the result or the manifested reality that you get in all of society and that happens on the aggregate scale and that is called the world that then we must all together live in and these dumb ignoramuses don't understand that is what human nature is and they're trying to sell their cult membership on the idea that it's just behaviors are inherent no they are not and i know a lot of the assholes out there even watching you still haven't gotten that hammered through your thick fucking skulls and i'll be the one i really don't give a shit if you're offended by that i'm the one who will tell you that i'll tell you you don't know what the fuck you're talking about and you're wrong and your ego's in the way for and it's blocking correct reception and understanding of what human nature really is versus what the human condition is that is not the nature of humanity because what nature means is it's eternal it cannot be changed let me say that again what nature means is it's just that way it's eternal and it cannot change that is not what people claim human nature is they claim all these things oh people are just greedy that's human nature no that's not an eternal state of humanity that cannot be changed people have been conditioned into being greedy people are just lazy that's human nature no wrong incorrect incorrect that's part of the human condition people who are lazy now can be very industrious if they decide through their will to change their behavior and that is possible to do that may be hard work but it can be done it is not eternally one way that's called a condition that is in place get it through your thick fucking skull that that's how it works because if you explain it to other people that it doesn't work like that you're part of the problem you're undoing the great work by telling people no it this dynamic is incorrect when i talk about what human nature really is no if you don't understand what that is you're part of the problem get your grammar underneath yourself first as a foundation before you start to speak and spout bullshit rhetoric get your understanding under you first before you step to the third stage of the trivium and start putting rhetoric out that you're completely incorrect about you're doing harm you're doing harm i want this played for people out there who have it wrong show them this video make them watch it i know you can't make somebody watch something influence them enough to watch it maybe you'll come out the other side with a little less hardened fucking ego you think you know when you don't and that's the most dangerous thing there is again drink deeply from the period spring or don't drink it all and it's not a kind of bottled spring water ancient greek philosophy about drinking from the fount of knowledge known as the perion spring it means if you're gonna drink a tiny little sip from it you might as well not bother because then you're gonna think you know and you don't know fucking shit that's what it means don't think you're enlightened when you're not because you went half-assed in your knowledge in your knowledge gathering and in your knowledge understanding you didn't go through the two first two most important stages of the trivium before actually doing action the rhetoric stage based on correct understanding that came from the gathering of knowledge of pertinent data if you don't do those first two steps correctly of the trivium process you can never do the third one which is true wisdom the rhetoric stage of the trivium correctly and this is where most people in the so-called truth community are at because they don't have that true scientific truth discovery process under their belts that in other words there are people who think they know and they've done the trivium process either incorrectly or out of order and therefore they don't really know yet they have their mouth open spouting verbal diarrhea all day long so let's continue with the reading let's go back to the slides thank you any concept of systematic trauma generational poverty he's talking about culture here or white supremacist oppression was either never mentioned or simply dismissed right because they don't want their cult members to understand how human behavior is created you don't teach your cult members the trivium you know after all most people don't steal so anyone who does isn't most people right to us anyone committing a crime deserved anything that happened to them because they broke the quote social contract which is another bullshit myth and yet it was never even questioned as to whether the power structure above them was honoring any sort of contract back there is no contract there is no such thing as the social contract you're either a moral being because you've taken incorrect information and therefore your behavior is in alignment with objective morality under natural law or you're an immoral being because you've taken an incorrect information and your behavior is out of alignment with objective morality under natural law that's how it really works understand police officers are part of the state monopoly on violence there is no such thing as a monopoly on violence or a right to ever use violence they're part of a state monopoly on the use of external force upon others which can be moral or immoral that's what they the state wants is a monopoly on the usage of physical force police officers are part of the state monopoly on violence and all police training reinforces this monopoly as a cornerstone of police work a source of honor and pride many cops fantasize about getting to kill someone in the line of duty let me read that again many cops fantasize about getting to kill someone in the line of duty you want to know why folks because many of them are psychopaths and again there is such a thing as an inherent genetic psychopath because their brain is broken at birth through different ways we could talk about that i did whole shows on what primary psychopathy is which is essentially brain physical brain damage that's what primary psychopathy is it's a form of physical brain retardation and or brain damage that's what it is and yes some people do emerge from the womb like that the vast overwhelming majority of psychopaths are created through cultural conditions and environmental conditions traumatic conditions that they have undergone mostly when they were a child that numbs out the emotions and destroys the limbic brain which is responsible for the generation of the peptide chemicals that help us to feel emotions physically in the body through the midbrain or mammalian brain the limbic brain i've talked about this endlessly go back to the former podcast and do your homework there is such a thing as secondary psychopathy where that happens over a period of time people asked for that to be clarified it's been clarified i just did it again there are primary psychopaths it's a form of brain damage there are secondary psychopaths it's also a form of brain damage which can be undone because it got that way through cultural conditions and trauma go back to the shows i did on psychopathy and listen in its entirety continuing let me read it one more time many cops fantasize about getting to kill someone in the line of duty egged on by others that have gotten to do that one of my training officers told me about the time he shot and killed a mentally ill homeless man wielding a big stick he bragged that he quote slept like a baby that night this is the kind of trash that comprises the police forces official official training teaches you how to be violent effectively and when you're and when you're legally allowed to deploy that violence but quote unofficial training teaches you to desire violence to expand the breadth of your violence without getting caught and to erode your own compassion for desperate people so you can justify punitive violence against them in other words unofficially what all the police forces throughout the world are ultimately doing are acting as a breeding grounds for secondary psychopathy they are creating secondary psychopaths whether the person is a born psychopath or not they are active cult breeding grounds for secondary psychological psychopathy breeding grounds for psychopaths to run amok in our society posing as our protectors and defenders that's what police forces are how to be a bastard i have participated in some of these activities personally others are ones i either witnessed personally or heard officers brag about openly very very occasionally i knew an officer who was me to re uh i apologize for that folks i may have inadvertently uh caused the bad connection with my mic i apologize for that i needed something to drink and i clapped my microphone with my with my glass i'm usually pretty good about that um but it happens i oh so he he's saying i have participated in some of these activities personally others are ones i either witnessed personally or heard officers brag about openly very very occasionally i knew an officer who was disciplined or fired for one of these things so here's the list police officers will lie about the law about what's legal or about what they can legally do to you in order to manipulate you into doing what they want and they'll face no repercussions for that lying they're liars they're they're bad people not only because of what they do but because of what they say they're liars they're deliberate liars and get off about the fact that they're deliberate liars trying to manipulate people into either criminalizing themselves or admitting something that has gone wrong against gone against one of their ridiculous code restrictions so they will lie about the law about what is legal or illegal or about what they can legally do to you in order to manipulate you into doing what they want that's one of the hallmark characteristics of a psychopath the willingness to lie to get their way or to manipulate people into giving them their way one we talked about this last week and when we went over all the hallmark characteristics of psychopaths a number of times on the show police officers will lie about feeling afraid for their life to justify the use of force after the fact they'll tell you oh i was fearful for my life now you aren't fearful for for your life you just lied about it to get away with hurting someone else or hurting an animal police officers will lie and tell you they'll file a police report just to get you off their back police officers will lie that your cooperation will look good for you in court or that they will put you put in a good word for you with the d.a untrue the police will never help you look good in court police officers will lie about what they see in here to access private properly to conduct unlawful searches that go against fourth amendment restrictions without any doubt okay they lie to get access to private property they'll lie about what they've seen or what they've allegedly heard they're liars they're liars almost all of them dirty liars police officers will lie and say your friend already ratted you out so you might as well rat them back out this is almost never true police officers will lie and say you're not in trouble in order to get you to exit a location or otherwise make an arrest more convenient for them police officers will lie and say they won't arrest you if you'll just be honest with them so they know what really happened they're liars and they say they can just legally lie with total impunity just doing something that's completely immoral to entrap people and they don't have to be responsible for it it's called being an immoral piece of fucking trash and all of them are that not just some all of them all of them are privy to this all of them know this is going on all them allow it to continue that's why every single one of them is a piece of immoral fucking dirt they are partaking in the evil a good person doesn't partake in evil a good person says i will not participate in evil no matter what you do to me or threaten me with these are evil people who participate in institutionalized evil and that makes them evil people that's the definition of what it means to be a bad person get it straight morally get it straight philosophically get it straight from a first principles based solid groundwork of true moral philosophy which is what we teach here on what on earth is happening police officers will lie about their ability to seize the property of friends and family members to coerce a confession police officers will write obviously bullshit tickets so that they get time and a half overtime fighting them in court police officers will search places and containers you didn't consent to and later claimed they were open or smelled like marijuana they'll make up what they consider groundwork uh you know legitimate grounds for searches and just say you know it was already open when they broke into it or say oh it smelled like you know some illicit substance that they shouldn't even have the right to arrest anybody for in the first place and i'll just say oh i thought i saw a cocaine residue or i thought i smelled you know cannabis so that they can break in someplace they're liars your dirty liars all of you and the ones who just look the other way and protect their cult members your liars and your immoral people and your deeds have been exposed and they're going to continue to be exposed until you're not just shame that of that job but physically forced out of it if it has to come to that because your dirty immoral scum trash liars and your parents fuck you up boy your parents fucked you up girl you had trash for parents and you grew up to be trash and i'll tell it to you just like that to your motherfucking face police officers will threaten a more serious crime they can't prove in order to convince you to confess to the lesser crime that they really want you for this is their dirty liar tactics of this cult police officers will employ zero tolerance on races and ethnicities they dislike because they're dirty rotten racist pieces of trash you know how big racism runs in police forces the majority of police are racist trash in both directions it doesn't matter what cut in any direction it doesn't matter what color there are almost all of them are racist trash i've heard enough from the inside to know that that statement is true the vast overwhelming majority of police are racists you're not just immoral people you're not just liars you're racist too and it's egging on further racism because there are people who would who would dare to claim me doing this to expose this for as many years as i've been fucking exposing trying to say i have some privilege or i'm racist then fucking nerve are you now you're not gonna push your bullshit marxist guilt on me motherfucker you don't know what i've done or what i fucking seen or what i've been through or what i know you're not gonna tell me that quite frankly you don't fucking know what i know i've said it many times and i'll keep saying it and you certainly don't know what i've sacrificed to do and then motherfuckers gonna try to try to tell me i'm somehow racist i told people since day one that's a total indoctrination divide and conquer dialectic tactic to enslave people there's only one race it's called the human race even that is a dialectical identity there's consciousness and morality and that's all there is that's it there's alignment to natural law and consciousness or you are not in alignment to it that's the only divide there is that's the only true divide everything else is an illusion of separation but there is that separation in consciousness and that's one of the biggest things that it means to be awake as you understand there can be no such thing as authority that is a euphemism for coercion slave violence and slavery which is what police continuously enforce police officers will employ zero tolerance on races and ethnicities they dislike and show favor and lenience to members of their own racial group police officers will use intentionally extra painful maneuvers and holds to arrest during an arrest to provoke resistance so they can further assault the suspect he's seen this personally i've seen and heard about it personally some police officers will plant drugs and weapons on you sometimes to teach you a lesson sometimes if they kill you somewhere away from the public view legalized murder some police officers will assault you to intimidate you and threaten to arrest you if you tell anyone a non-trivial number of police officers will steal from your house or vehicle during a search folks first of all i've myself been the victim of two of these techniques okay so i've had police hurt the nerves in my wrist by unlawfully placing me under arrest when i was doing nothing but handing out factual information not solicitation which i was then sent a letter of apology okay saying that they acted inappropriately and i had every right to do what i was doing and refuse to leave the area because they didn't want a lawsuit lawsuit these people should be lucky to live every person who witnessed this should have descended on them physically and tore them limb from limb that's what would happen in a true free society when someone's rights are being usurped torn apart like a grizzly bear and i was handcuffed with zip ties so tight that i didn't really get the true nerve feeling back in my hand for at least six months after the event almost permanent damage done to my right hand by these fucking trash cult members when i did nothing wrong except exercise freedom of speech and the press and we don't think we're at a point where we need to go to war and it's gotten infinitely worse since then you know what that punk bitch cop did took my wallet out of my pants without my permission when i said i do not consent to any searches and stole the money from my wallet you fucking bitch you're a fucking bitch punk you're a fucking lowlife thief punk you're a trash fucking criminal punk bitch when things break down come and see me boy i'll fight you with my bare hands and you'll see what'll happen to you son you're a low-life punk criminal fucking bitch boy you're a common fucking thief at that time i was extremely poor and had hardly any resources to my name the entirety of the money that i had at that point was one twenty dollar bill in my wallet i'm almost embarrassed to say it i'm almost embarrassed to share that with with my listen my viewing audience i was so destitute at the time that that happened trying to educate the people about what the federal reserve is and has done to their resources and and savings okay that they had to work real hard for and that the federal reserve has destituted that through what they call monetary policy i'm printing factual information and handing out factual pamphlets about how people are being stolen from through a hidden tax called inflation and i'm arrested not it wasn't an arrest it was an illegal detainment an illegal detainment okay but if you're stopped that's called being stopped from what you're doing but it's an illegal detainment it's an unlawful illegal detainment that should have never occurred and this scumbag punk bitch tries to cut the blood flow off to my hand so bad that i get nerve damage and then unlawfully takes my wallet which i told him i don't consent to a search because this is unlawful and steals the only bill in my wallet to get my id went in stole from me you're a rotten fucking skank thief boy and your parents fuck you up little fucking boy and you've done nothing to unfuck your mind or your morality and anybody who thinks that this doesn't go on at a totally completely institutional level that is completely espoused you are a low-life naive scumbag yourself who is endorsing theft immorality coercion and slavery and you're just as much of a piece of shit because you watch it happen and you say nothing and you do nothing this goes on every day to completely innocent people who have done nothing wrong if you believe in policing you are a supporter and a condoner of slavery you rotten piece of shit dirt and i'm not mincing words i'll say it even calmly to you you're a rotten piece of fucking dirt your parents fuck you up morally and you haven't done a thing to correct that fucked-upness in your mentality because you don't give a shit about yourself enough to unfuck yourself now there it is with common street lingo boy common street lingo girl i'll tell it to you right to your face like i would some other fucking thug criminal on the street because that's essentially what you are that's real fucking talk you ain't gonna hear that anywhere but right here on what on earth is happening because nobody else has the fucking balls to do it so i'll do it i'll do it for the whole damn totally diseased world let's continue and try to get through this a non-trivial number of police officers commit intimate partner violence and use their status to get away with it in other words they rape and abuse their spouses whether they be wives or husbands a non-trivial number and guess what folks we're learning about this through studies it's over 40 percent i would say that's really just what we're hearing about folks if we're honest with ourselves it's well over half of police officers are violent abusers and rapists of their spouses that's why if you get involved in a relationship with these people knowing what they already behave like honestly part of the blame has to go to you i'm not blaming the victim i'm saying part of the blame goes to the victim because they didn't listen and they got involved with people who are known psychopaths so guess what get as fucking offended about that as you like and say oh you're blaming the victim no i'm blaming the perpetrator first and foremost but i'm saying the victim is actually involved in the perpetuation of it because people still want to go out and forge relationships with police and if you do you deserve what you get quite frankly you deserve what you get because you can't claim ignorance all this information is out there and has been out there for a number of years look at the studies on police spousal abuse a non-trivial number of police officers use their position to entice coerce or force sexual favors from vulnerable people if you take nothing else away from this essay i want you to tattoo this on your brain forever if a police officer is telling you something it is probably a lie designed to gain your compliance because they're all dirty fucking liars they're immoral people they're thug criminals they don't care about what's right they don't care about what morality is they'll tell you that from now they'll tell you that they do from now till the end of time and i'm here telling you this is exactly as it is as you're hearing it straight from the horse's mouth and it's an actual tiny minority that do have a conscience and when they do it develop a conscience they see that this is what the institution props up and they finally give in to their conscience follow it and quit as this person did how many people do you know who have done that a tiny paltry piss in a pot few that's why i say there is no great awakening happening there is a false awakening happening characterized by a ton of false awakening characteristics a real true awakening police would understand that what they have been involved in is a satanic death cult and they would follow their conscience instead of following orders and they would quit their cult is that happening no some people are realizing this is what the police are from a foundational institutional basis and they are starting to shame them because of it because it's getting so bad is that shaming police into quitting their job because they've suddenly come to a an awakening of what real morality is no that's not why some people at least are walking off duty they haven't become any more moral than they were they're just as dirty immoral pieces of dirt bag fucking trash as they ever were just like common three street thugs they are no different they have not reached an awakening or an understanding of true objective morality at all they're walking away because they egotistically feel disrespected by people who are starting to come online to the truth about what their institution is as a fucking death cult and now their little boy their little shit diapered feelings are hurt these people have lost respect for me anybody with a fucking brain never had any respect for you punk ass bitch boy never had one ounce of respect for somebody who never had an ounce of respect for yourself respect is a mirror respect is a mirror you respect yourself others will show respect to you you have no self-respect because you're a dirty and moral order follower you're not following conscience because you don't want to do the hard work of learning what conscience is which is the objective knowledge of the difference between right behavior and wrong behavior under natural law you don't want to do that work you want to stay in your indoctrinated fucking satanic cult mindset and just do what you're told like a little piss in their diaper shit in their diaper no brains shit for brains bitch and to bring an active duty cop right in this room and i'll have that conversation right to your know nothing face boy bring him in i'll bring him right in off the street and say that right to them right to their face on camera you think i'm afraid of you i'm in the right i stand in pure righteousness of natural law and there is no greater protection there is no other protection i definitively know the difference between objective moral right and immoral wrong and i live it through my behavior by a act of my will in the moment every single day and that is the only protection that's the only true ultimate protection then when it comes down to protection in the physical domain then self-defense comes into play and firearms come into play but let me tell you something you want to talk about ultimate cosmic protection you have none of it going for you because you stand in the wrong i have all of it going for me because i stand in the light and in the right that's why i'm not backing down and i'm not afraid of you no fear stand in the right and mighty forces will come to your assistance if everybody had that level of courage we'd be free right now continuing do not talk to cops and never ever believe them do not quote try to be helpful with cops do not assume they are trying to catch someone else instead of you do not assume that what they are doing is quote important or even legal under no circumstances assume any police officer is acting in good faith also and this is important do not talk to cops i just remembered something do not talk to cops checking my notes real quick something just jumped out at me do not fucking talk to cops ever ever say i don't answer questions and if you're and if you are free to leave if so leave if not tell them you want your lawyer and that part of the supreme court they must terminate questioning if they don't file a complaint collect some and so collect some badges for your mantle if i am ever confronted with a cop i do not understand i wish to go on my way that is it i don't i'm not talking to you i don't understand anything you say you are stopping me from going on my way and i wish to go on my way that is it that's it i don't understand anything you say i don't know what you're talking about i don't understand anything you say because it's all in legalese nonsense bullshit that has nothing to do with me as a natural human being i stand in the right i have harmed none that's it and i'm not even going to say that i don't understand you speak a different language you speak satanic cult legalese i speak veritas the language called truth that's it so we have a language disconnect i don't understand anything you say ever have said ever will say and that's all i ever said to those cops who unrightfully unlawfully detained me i just repeated i don't understand anything you say i don't understand anything you say i wish to go my way i don't understand anything you say i said lots of other things too to the crowd but to them i said i don't understand anything you say this is illegal unlawful and immoral and i want to go on my way that's it your behaviors are immoral and i want to go on my way and you know what folks again we're we're going to get into even deeper harder material on this show in future podcasts it's going to go way deeper and darker folks because we're going to get i'm going to get into the right to kill we have to go over things that were talked about in duress dissidence and deadly force and talk about the natural right to kill when your rights are being usurped and this is a very hard concept for most people to understand and it shouldn't be that hard to understand the the ultimate in spiritual awakening is simply the fact that sentient beings have the right to kill those who would thwart their rights as sentient beings let me say that again and let me tell you something folks this is the end goal understanding of every occult esoteric school of thought that has ever existed in the history of humanity it is ultimate awakening ultimate awakening maybe we'll name the show ultimate awakening colon the right to kill every single sentient being that has ever lived has always and will eternally always possess the inherent natural right to kill any other being who would attempt to thwart their rights it is an eternal truth if you don't understand that you are not awake you have not studied natural law and or occult philosophies of the great mystery traditions of consciousness that have existed throughout human history in their fullness in their entirety and at the level that you need to study them to understand what eternal truth of awakening and eternal truth of natural law is and always has been regarding the right to kill notice i did not use the word murder because murder and killing are two different things and ladies and gentlemen the kind of war that's going to involve that type of killing is coming and it is not going to be able to be avoided i have done since day one my total duty my duty and fulfilled my obligation and responsibility to attempt to avert that human eventuality in the physical domain of war and i am telling you we are on the rapid fast track for that to occur let's go back to the essay do the bastards ever help reading the above you may be tempted to ask whether cops ever do anything good and the answer is sure sometimes and this is the difference between doing a good action or deed versus being a good person capital g capital p a good being a moral being let's call being a good person being a moral being capital m capital b a moral being a moral human being capital m capital h capital b do you understand thick headed fucks out there that's what i mean when i say a truly good person a truly moral human being it doesn't mean what you think it means your definition in your rotted brain is different than what i'm explaining the definition of a truly good moral human being is get your drooling fucked-hearted definition that exists in your shit for brain's head out in your liquid shit pool float clock clutch sloshing around up here folks get your internal definition out of the pool of liquid shit sloshing in here okay understand what i mean by the definition of a truly good moral human being because sometimes i really think i'm talking to an entire population of people with you know down syndrome i really do i really do and sad it's sad it's really really sad we are not talking about the ability to perform one or two good tasks in your lifetime or to be seen as good by your little daughter who you you bounce on your knee at night while you're stripping everybody else of their natural rights as human beings during the daytime that's not what we're talking about is being good capital g good capitalize the word good it doesn't mean what you think it is it doesn't mean what you think it means your internal definition is skewed and fucked up you think it means can this person perform any good tasks ever in their lifetime can they be good to their daughter or their wife yeah that's possible and still go and be an immoral piece of trash the rest of the day a good person doesn't engage in immoral activity during the course of a day they make an informed decision based on the knowledge of conscience is this behavior right or is it morally wrong and if it's right they can do it and if it's wrong they don't engage in it that's what it means to be a truly good moral human being so get your definitions right numb skulls you know and you gotta say it this way to some people because you've been saying it for i'm not gonna bang on my desk you've been saying it for 10 goddamn years and then people still come through haven't watched the fucking podcast and say this person could be a good person you're you're literally do you have down syndrome because please turn it off i've been called an ableist because i say so actually you're an insult to people with down syndrome a lot of them can get it folks i could explain this to literally a mentally retarded human being with down syndrome who's unfortunately afflicted with that condition and they'll get it before you in a lot of cases they'll get the philosophy before you will so maybe it's an unfair comparison maybe i should apologize maybe i have been an ableist i've been called an ableist by people because i compare dumb people to people with total mental retardation like down syndrome maybe i've been an ableist you know maybe i have to reevaluate that and maybe it will be easier to teach this to people with down syndrome than to teach it to the people who have such a hard and fucking satanic ego that they're never going to get it they're going to die in that condition they're going to gleefully and gladly die in ignorance not because they're incapable of understanding it from a mental capacity level they have the mental capacity to understand it's just their satanic ego is so fucking hard and they don't want to understand it and they're going to die in that level of willful ignorance truth and morality be damned you won't hear that from anyone else you know i wish there were tons of people on video saying this every day i wish i could say hey let me tag out of here and stand on the apron for a little while you know like like my guilty pleasure of watching pro wrestling since i was a kid you know that's my one dumb guilty distraction so that i don't dwell on this continually and then i'd be a really angry human being as if i'm not already angry enough already because of the sheer willful ignorance but to give the pro wrestling analogy you know i've been in that ring getting beat from pillar to post you know for the large part of the match and finally i see somebody on the apron i can tag out to and get a breather on the apron you know if i saw that with tons and tons of people doing the great work it would be a huge relief and maybe i wouldn't be this bitter maybe just maybe i don't know maybe it would help but guess what you know what everybody says you're doing fine in there mark who needs to tag in fuck you you know you know you've been getting the shit literally beaten out of you you know all this whole match but i'm standing on the apron fresh as a daisy who needs to tag in you know that's what you sound like it's what you sound like you sound like a tag team partner that has left the apron and gone back to the dressing room and said fuck my partner you know that's really a perfect analogy so let's go back to the reading the answer is sure sometimes they could do some things that are good in fact most officers i've worked with thought they were usually helping the helpless and protecting the safety of innocent people this is how you know dumb shit for brains people they are during my tenure in law enforcement i protected women from domestic abusers arrested cold-blooded murderers and child molesters and comforted families who lost children to car accidents and other tragedies i helped connect struggling people in my community with local resources for food shelter and counseling i de-escalated situations that could have turned violent and talked a lot of people down from making the biggest mistake of their lives i worked with plenty of officers who were individually kind bought food for the for homeless residents or otherwise showed care for their community the question is this did i need a gun and sweeping police powers to help the average person on the average night the answer is no when i was doing my best work as a cop i was doing mediocre work as a therapist or a social worker my good ideas were listening to people failed by the system and trying to unite them with any crumbs of resources the structure was currently denying them it's also important to note that well over ninety percent of the calls for service i handled were reactive showing up well after a crime had taken place we talked about this last week folks police officers cannot protect you they do not protect you they will not ever protect you they show up after the fact and then they attempt to go after people who committed some violent acts that's it they do not stop violent acts from occurring and never can don't now and never will never can they do that that's why self-defense is your personal responsibility and in your hands if you don't want it tough shit it's still your personal responsibility we would arrive take a statement collect evidence if any file the report and then on to the next caper most active crimes were stopped that we stopped where someone someone harmless possessing or selling a small amount where someone who is harmless possessing or selling a small amount of drugs very very rarely would we stop something dangerous in progress or stop something from happening entirely that's that's the i mean that is like literally one in a billion i would say it is an extreme rarity when that ever occurs i would say largely just like a satori sudden awakening out of nowhere in a kundalini experience bursting out the top of your head and suddenly you're an awake spiritual being it happens with one in a hundred billion people if that don't count on it it's not the rule it's the unbelievable exception to the rule if you count on it you're a naive person awakening takes self work knowledge and self work very very rarely will we stop something dangerous in progress or stop something from happening entirely the closest we would usually get was seeing someone running away from the scene of a crime but the damage was still done that's it they don't protect anybody consider this my job as a police officer required me to be a marriage counselor a mental health crisis professional a conflict negotiator a social worker a child advocate a traffic safety expert a sexual assault specialist and every once in a while a public safety officer authorized to use force all after only one thousand hours of training at a police academy which is a cult training facility does any person we send to catch a robber also need to be the person we send to do to interview a rape victim or document a fender bender should one profession be expected to do all that important community care with very little training all at the same time to put it this other way to put this another way i may double the salary that most social workers made to do a fraction of what they could do to mitigate the causes of crimes and desperation again the real cause is what you learn when you're young do you learn morality when you're young or do you not learn that from your parents and the rest of society what we're teaching here on what on earth is happening since day one now you're gonna not get that moral education from schools from the media from any government institution and certainly almost in every case not from your fucking parents because they didn't get it from their parents i know i didn't get it from mine hey i love my parents but guess what i didn't get that moral education from them i got it from strangers who cared enough to put the great work out there to other people for other people to learn that's where i got it and that's how i awakened didn't come from my parents or any of my fucking family who most of which are still completely asleep some on the very very brink of awakening but not even halfway there not you know talking out against it it's great that they're starting to wake up but it's they're you're late to the party let's just put it that way you know people had this opportunity you know 13 years ago or 14 years ago while i was doing this to get this instruction directly from me you know and back then they were saying oh where's your tinfoil hat you're crazy you don't know what the fuck you're talking about now not so much now they're saying hey i think mark's been right about this all along late to the party hey i'll welcome you into the party anyway still understand you were late because of ego because of ego because of not being able to say the three big magic words i was wrong certainly not being able to acknowledge to another of your kin i was wrong and you were right most people will never do that they'll die in ignorance before ever doing that continuing armed indoctrinated and dare i say traumatized cops do not make you safer community mutual aid networks who can unite other people with the resources they need to stay fed clothed and housed make you safer i really want to hammer this home every cop in your neighborhood is damaged by their training because they're members of a cult and they received cult indoctrination not training cop in your neighborhood is damaged by their training emboldened by their immunity and they have a gun and the ability to make your to take your life with near impunity this does not make you safer even if you're white i've been telling people this for years on end finally someone with a little bit of courage come coming forward and telling it from an insider's perspective how do you solve a problem like a bastard so what do we do about it even though i'm an expert on bastardism i'm not a public policy expert nor an expert in organizing a post police society so before i give some suggestions let me tell you what probably won't solve the problem of bastard cops increased bias training this will not solve the problem a quarterly or even monthly training session is not capable of covering over years of trauma-based camaraderie in police forces i can tell you from experience we don't take it seriously the proctors let us cheat on whatever tests there are and we all made fun of it later over coffee tougher lawyers won't solve the problem i hope you understood by now cops do not follow the law and will not hold each other accountable to the law tougher laws are all the more reason to circle the wagons and protect your brothers and sisters that's right folks because they're not the thin blue line they're the satanic death cult they're low-level members of the satanic death cult that rules over our entire human society that's all you ever have been thin blue line my ass you're an ego hardened thick-headed low-level rank and file shit for brains boy and girl of a satanic death cult that will throw you under the bus when they're done fucking using you like the fucking tool you are back to the slides more community policing programs will not solve the problem yes there is marginal effect when a few cops get to know the members of their community but look at the protests of 2020. many of the cops pepper spraying journalists were probably the nice school cop a month ago police officers do not protect and serve people they protect and serve the status quo and i would say they protect and serve the one big satanic cult that is running the world they protect and serve the status quo quote polite society and private property using the incremental mechanisms of the status quo will never reform the police because the status quo relies on police violence to exist exactly therefore if you believe it should continue to exist you are a condoner of violence and slavery capitalism requires a permanent underclass to exploit for cheap labor and it requires the cops to bring that under class to heal you're not talking about true capitalism you're talking about crony capitalism here you are talking about ultimately what amounts to statism which all forms of statism are forms of socialism and ultimately international socialism which is communism it could be called fascism it could be called communism the whole left verse is right divide is just a bullshit divide and tank divide and conquer strategy that is all about polarization dialectic we've talked about it ad nauseam here on what on earth is happening okay you know what it all is it's all called feudalism doesn't matter what brand of feudalism what flavor you love do you like chocolate feudalism vanilla feudalism maybe you like the minikis strawberry flavor of feudalism called libertarianism you know the libertarian party if you don't like chocolate and vanilla that big daddy has prepared for you we have the third flavor to com complete the neapolitan triad and you could join the the the libtard paul the libertarian policy i think i had it right the first time okay you know this is what people think is freedom no it's a euphemism for slavery that's it that's all it ever has been doesn't matter which side of slavery you come from the right the left the middle the binaricus it's all slavery stop euphemizing it and it's not capitalism it is crony capitalism which is actually a form of socialism i'm not saying i'm a capitalist i think that's just another form of control as well but what he is lumping it together as is not true capitalism even that form of raw capitalism would eventually form a control system okay it would be a harder one even to get out of mentally that's why all forms of money that aren't don't exist in nature and aren't true inherent value are forms of mind control so don't paint me as a uh you know anarcho-capitalist i'm not i'm a pure anarchist that understands there is only natural law and morality whether you understand it and adhere to it in behavior or not that's what true anarchy is there's no such thing as hyphenated anarchy i'm gonna do a whole show on that maybe a few okay instead of wasting time with minor tweaks i recommend exploring the following ideas no more qualified immunity police officers officers should be personally liable for all decisions they make in the line of duty no more civil asset forfeiture did you know that every year citizens like you lose more cash and property to unaccountable civil asset forfeiture than to all burglaries combined the police can steal your stuff without charging you with a crime and it makes some police departments very rich breaking the power of police unions police unions make it nearly impossible to fire bad cops and incentivize protecting them that's called the thin blue line to protect the power of the union a police union is not a labor union police officers are powerful state agents not exploited workers they are satanic death cult members if we drop the euphemizing require malpractice insurance doctors must pay for insurance in case they botch a surgery so police officers should do the same for botching a police raid or other use of force if human decency won't motivate police to respect human life perhaps hitting their wallet might defund militarize and disarm cops thousands of police departments own assault rifles armored personnel carriers and stuff you've seen in a war zone police officers have grants and huge budget budgets to spend on guns ammo body armor and combat training 99 percent of calls for service require no armed response yet when all you have is a gun every problem feels like target practice cities are not safer when unaccountable bullies have a monopoly on state violence and the equipment to execute that monopoly one final idea consider abolishing the police hooray someone gets it abolish the satanic death cult at a lower level altogether and then these satanic death cult members won't be able to be the rank and file order followers from the satanic death cult order givers then we're making some fucking progress folks i know what you're thinking what we need the police where's the where's vomit man they protect us yeah this is the myth i've been trying to shatter for the last month as someone who did it for nearly a decade i need you to understand that by and large police protection is marginal and incidental it is an illusion created by decades of propaganda cop propaganda designed to fool you into thinking these brave men and women are holding back the barbarians at the gates i alluded to this above the vast majority of calls for service i handled were theft reports burglary reports domestic arguments that hadn't escalated into violence loud parties houseless people loitering which is houselessness you know we need to stop calling it homelessness call what it is they have no house traffic collisions very minor drug possession arguments between neighbors mostly the mundane ups and downs of life in the community with little inherent danger and like i mentioned the vast majority of crimes i responded to even violent ones had already happened my unaccountable license to kill was irrelevant what i mainly provided was an objective third party with the authority to document property damage ask people to chill out or disperse or counsel people not to beat each other up a trained counselor or conflict resolution specialist would be ten times more effective than someone with a gun strapped to his hip wondering if anyone would try to kill him when he showed up there are many models for community safety that can be explored if we get away from the idea that the only way to be safe is to have a man with an m4 rifle prowling your neighborhood ready at a moment's notice to write down your name and birthday after you've been robbed and beaten you might be asking what about armed robbers the gangsters the drug dealers the serial killers and yes in the city i worked i regularly broke up gang parties found gang members carrying guns and hooded hummus and handled homicides i've seen some tragic things from a reformed gangster shot in the head with his brains oozing out to a 15 year old boy taking his last breath in his screaming mother's arms thanks to a gang member's bullet i know the wages of violence this is where we have to have the courage to ask why do people rob why do they join gangs why do they get addicted to drugs or sell them it's not because they are inherently evil i submit to you that these are the results of living in a capitalist system here's where you got it wrong i'm sorry man but you got it wrong there it's not because we live in a quote-unquote capitalist society if you said crony capitalist society you're correct there partially it is because we live in a society that has no true knowledge of objective morality according to natural law it doesn't matter what kind of monetary system you set up there are still people who are totally ignorant fools when it comes to what the actual objective difference between right and wrong actually are if you would have said that you would have gotten a hundred i'm gonna have to deduct like at least 10 to 20 points off your total score unfortunately okay but you're getting human nature isn't what we've been told okay i submit to you that uh these are the results of okay so it says yep why do they get it i submit to you as their results living in a capital system that grinds people down and denies them housing medical care human dignity and i say and a say in their government this is what the satanic death cult does okay you could look at capitalism as just one of you know a crony capitalism is just one of the manifestations and methods of the death cult these are the results of white supremacy pushing people to the margins has nothing to do with race folks it's about statism it's about the belief in authority okay that's what it is it's not about race you could say a lot of these people are racist but it goes in any direction when it comes to race it doesn't have to be white on black black on white you know it could be hispanic on white hispanic on black black hole and hispanic and on down the line of these perceived differences between human beings the one difference we're not looking at learning enough about is whether you're a moral human being or not from a true objective moral perspective when it comes to natural law these are the results of white supremacy pushing people to the margins excluding them disrespecting them and treating their bodies as disposable equally important to remember disabled and mentally ill people are frequently killed by police officers not trained to recognize and react to disabilities or mental health crises some of the people we picture as violent offenders are often people struggling with unrelated mental illness often due to economic hardships very frequently the officers sent out to quote protect the community escalate their this crisis and ultimately wound or kill the person your community was not made safer by police violence a sick member of your community was killed because it was cheaper than treating them are you extremely confident you'll never get sick one day too and that won't happen to you you know are people that confident are they willing to take that risk so we have a couple pages left in this document folks at least a few pages left okay got about four or five pages left unfortunately that is all the time that we're going to have for this edition of what on earth is happening okay i will back it up a tiny bit and maybe re-emphasize some of the things he goes over as potential solutions or that he's saying you know completely dissolve the police okay we'll pick it up from there next week that'll be part four of the psychological state of police and their supporters and then we'll take your calls from the rest for the rest of the show ladies and gentlemen you've been watching what on earth is happening and remember ladies and gentlemen as always government is slavery and so is every single form of policing that has ever upheld the satanic death cult of slavery we'll see you right here next week searching for a reason looking for don't you ever wonder don't you ever you

What On Earth Is Happening Show #230

Topics: *The Psychological State Of Police & Their Supporters Part 4, How To Become The TRUE Media Webinar update, WOEIH partnership with Autonomy Unlimited (from Richard Grove), CoVID-19 is a Mind-Control PsyOp, Police are low-level members of the Satanic Cult that rules the world, Confessions Of A Former Bastard Cop reading continued, Policing is a form of SLAVERY, Crony "Capitalism," the Origin of modern Police was Runaway Slave Patrols during the Civil war Era, "Hegelian" Polarization Dialectics as a Divide-And-Conquer Strategy, the Cult Without A Name, the True Illuminati vs. the Dark Illuminati, the Cult Of The Black Sun, "None Dare Call It Conspiracy" by Gary Allen, "Tragedy And Hope" by Caroll Quigley, "The Anglo-American Establishment" by Caroll Quigley, Police are a VIOLENT GANG that is controlling human society, Voluntarism vs. the Control-based World-View, the necessity of Abolishing the Police, the complete Immorality of Prisons, the Inherent and Natural Right of Self-Defense, the Self-Defense Principle includes the Right to use DEADLY Force if your rights are being usurped, Socialist Healthcare is Theft and Conscription, People of all skin colors are MURDERED by Police every day, Holistic Intelligence vs. Left-Brained Intellect, ALL Contributions to the One Great Work are VALUABLE, Learning the technical skills needed to produce content and media, Waking up asleep family members, the Will to do the Great Work, the Personal Sacrifice which the Great Work requires*

freedom mat that's what it's all about [Music] you've got to groove on freedom my book says [Music] welcome you are listening - what on earth is happening this show will discuss the topics of human consciousness mind control natural law the occult and all issues that affect the freedom of the people of Earth what on earth is happening will endeavor to shine light upon the darkness of our world and to offer empowering solutions to the problems we face as humanity approaches it's critical moment of the choice and now here is your host Marc Pascoe [Music] welcome one at all you're watching what on earth is happening I'm your host mark passio my website what on earth is happening dot-com ladies and gentlemen government is slavery and here on what on earth is happening we are ending slavery one mind at a time welcome everyone to the live show we stream here live every Sunday from 3 to 6 p.m. Eastern Time we simulcast and water earth is happening calm Facebook Vimeo and YouTube today is Sunday June 12th 2020 we have a great show lined up for you here today today is episode 230 of what on earth is happening and our main topic for discussion is part four of the psychological state of police and their supporters we are also going to be taking your calls on this topic right after I finish the material for part four and that will probably be fairly early we don't have too long to go so let's switch over to the slides this is the title card for today's broadcast I have a couple of quick housekeeping announcements and then we'll jump right into the topic we are still accepting donations to help complete the documentary mark passio and the science of natural law you can donate for this at gifts dot what on earth is happening calm please don't send a straight donation for gifts toward the documentary use the gift site ok don't use the donate page for that we have five donation tiers on the gifts area all donations go directly directly to production costs all donors will receive a complimentary copy of the completed documentary on flash drive and DVD thank you to everyone who has donated you're making this project go very smoothly we are going to be finishing this more likely than not by the end of the year it may slip into next year a little bit but not by much but it is looking like it's on target for completion by the end of the year so thank you to everyone who has helped with this huge project and I think everybody's going to be very happy with the completed documentary when we finish it new shirts have arrived at the gifts area of what on earth is happening they came in this week I'm wearing one of the new designs this is the mark passio and the science of natural law t-shirt we have three shirts now available in long sleeve design that is the natural law the one great work and the science of natural law t-shirt I also have my new presentation world view violence still in the gifts area and the complete mark passio one great work collection solid-state drive available at gifts dot what on earth is happening calm briefly I'm gonna step out of the presentation and go over to my web browser because I want to show you guys what some of these new shirts look like they really came out great I'm very happy with them so switch back over and we'll go to the gifts area with this button here you can go with this tab it's gonna just tell you you need a PayPal account or cryptocurrency wallet will say yes that'll take us into gifts let me go back to the home page here I was logged in and we can go here to men's t-shirts or women's t-shirts and you'll see the designs that are available under natural law we've gotten the natural law t-shirts back in this is the new color palette and this is the long sleeve design and you can take a look at the images for the long sleeve shirts they came out really well I think these are going to be a pretty popular item the one great work shirts same color palette and same we have long sleeves available in this design and then this is the new shirt here it's called the science of natural law t-shirt and they are only available in black long sleeve or short sleeve I'll show you the long sleeve design with the artwork from the documentary and on the back it says morality increases freedom increases and as morality declines freedom declines with the water and earth is happening calm website address so that is the new t-shirts available at gifts dot what on earth is happening calm let's go back to my slides alright I want to speak briefly about how to become the new media seminar we started it very successfully last Tuesday attendance was great and we made a couple of quick changes I made a little spelling error here how long let me just fix that okay we made a couple of changes to the seminar this week class number two this Tuesday July 14th the zoom meeting has been converted to a webinar okay so this is going to make things a lot smoother and easier folks yeah we go back to the slide I had another little space hour there we converted it to a webinar there's gonna be less distraction I think it'll help with bandwidth I think it'll also assist with people getting in easy okay there'll be less distraction because you won't have anybody's you know video on your screen it'll just be my video you will still be able to raise your hand to ask a question I'm going to have a couple of co-hosts this week who are going to assist me in bringing people into the room and alerting me when they have a question so I think things we learned a lot from the first class on how to host it a little bit better I sent out a new email there is a new join link so please be attentive of that you can still join with the same meeting ID it is now just a webinar ID but it is the same numbers to get into the class okay so you could still put those numbers when you hit join in zoom you could still put those numbers in to get into the class we are starting the web web anar an additional half hour early to ensure that everyone gets in so you will have a one hour joining window to the class so the webinar will start at 7:00 p.m. Eastern Time there is no excuse to be late please ladies and gentlemen who have very very generously donated to take this seminar please be on time I'm asking you sincerely and nicely it's rude to show up late for other students just show up on time and get maximum value for the class just don't be late if you intend to take the seminar okay I'm asking that respectfully okay please be respectful of me and the other students beyond time you have one hour window to come into the class no one should be joining after 8:00 p.m. okay let's be realistic all right be an adult about this and join the class within the one-hour window don't come late okay and there's a very important reason I I can't repeat things other people who are there on time want to have their time respected I'm not going to repeat things that I talked about early in the class and if I covered it and you say and then you have a question about something that I covered that you don't know that I covered because you were late I'm not going to field questions about that I'll field questions on how things work or clarify things but if I covered something and you aren't there for it I don't I don't want questions asked later about it when you had the opportunity to be on time okay so just be respectful when it comes to that keep a notepad handy for notes and questions headphones are recommended so you don't create echo or feedback if you do ask a question publicly in the class no one has to interact you can passively watch this seminar no problem okay but if someone does have a question you want to interact with me in the class I ask you to wear headphones because that will eliminate feedback into your own speakers or echo if you have any problems joining this seminar you can email true media at what on earth is happening calm and we will do our best to field any questions that you may have that's all about how to become the true media I look forward to the class Tuesday evening we are announcing today that what on earth is happening has entered into a working cooperation with autonomy and we're very proud of this these guys have a lot of integrity and are doing a lot of great work so autonomy is the brainchild of Richard Grove of tragedy and hope calm tragedy and hope communications many people will recognize Richard from being the individual who recorded and edited the natural law seminar this is who helped to bring that seminar to the public I want to say something about our cooperation with autonomy I want to say something about Richard everything that Richard has ever told me that he would do he has fulfilled he is a man of his word autonomy is a teaching group you could look at it as okay it teaches people some of the skill sets that I'm teaching them in how to become the true media all my interactions with autonomy thus far have really worked out for the better the betterment of what on earth is happening they have come to our assistant and assistants in a time of need I consider Richard and the people at autonomy very honorable and trustworthy people and we are in a proud working relationship with them and their make going to make things possible for us there weren't possible previously so thank you to the autonomy team I think other people should check into autonomy and the work that they are doing you can visit their website at get autonomy dot info I want to step out and go to the website and show you guys their site and also show you our tragedy and hope communications if you aren't familiar with that so yeah let's switch over I've made a tab with autonomy this is all get autonomy dot info this is autonomies website you can you know basically look at some introductory videos about what autonomy is and what they do and the services that they provide and you know it's a pretty extensive website that goes into how it works user testimonials you know explaining the different steps that you could take to move further into a relationship with autonomy and again you'll get a lot of valuable skill sets from working with autonomy that's what it's all about it's about teaching people how to do the technological aspect of the great work very similar to what we're doing with how to become the true media this is Richards main website tragedy and hope calm I highly recommend it there's a lot of great information he has done the peace revolution podcast as well it's one of the best podcasts on the Internet as far as I'm concerned and if people are not familiar with Richard Grove and tragedy and hope I think you need to become familiar with them because it's invaluable material that everybody should really already be aware of all right that being said we're very happy to have entered into this partnership with autonomy so we can move back to my slides thank you let's move into some of the material for today's broadcast so I always like to take a jab at all the stuff that's going on regarding the cove in nineteen alleged pandemic but what it really is is a huge SIOP and we're going to be getting into this in future shows okay I generally don't talk about things happening of the day you know the daily events and over follow political events we talk about causal factors in consciousness in the the realm of the mind in philosophy in getting down to what you need to change in your thinking in order to change the results that we all receive in the world at large but you know beginning these last few shows I've just taken a jab at what's going on at the ridiculousness of it of the ridiculousness of the level of belief of the mainstream media that people believe they're telling us the truth about this even though they're lying to us about literally everything else these are the people who told you that smoking cigarettes was healthy in the past you know these are the people that will tell you that taking products with aspartame is perfectly fine for your health these are the people that told us that there were weapons of mass destruction hidden in Iraq that cost a million Iraqi lives you know everybody suddenly forgets that but now suddenly they're telling us the truth about the covert 19 pandemic I mean please you have to be a naive child to believe that okay these are paid Liars they're part of operation Mockingbird which is a CIA integration into the mainstream news media and has been taking place since the 1970s all you got to do is look it up and read about it and most people have never heard about it you know the same way they never heard about project cyclone or Project Paperclip you know some of the biggest covert operations and intelligence history because people are ignorant of world history they're ignorant of modern history and ancient history alike you know so is this about a virus or is this about controlling every damn aspect of your life that they can get their grubby little control-freak paws into this is a control game ladies and gentlemen and it always has been it's nothing new it's just another phase that they've moved into and they've got most of the dumb population buying into it locked stock and barrel hook line and sinker because they're members of a cult religion a religious system of belief that the media and Big Daddy are looking out for our interests and they care about us and our well-being I mean nothing could be further from the truth I would hope with you know every cell in my body that my listening audience understands this already but you know the general public is still dead asleep to this folks and that's our job to wake them up but you know if you think these people are stupid just you know look at some of the thin blue line supporters that then want to you know also use the Gadsden flag in combination with that you know I mean and I have to be on some bad drugs is all I can think you know this meme says if you if you ever feel stupid just remember there are people out there that are so indoctrinated they think freedom means supporting the police you know and that's what this whole series these last four episodes have been explaining that the police are a cancer they always have been a cancer it's nothing new it's not anything new just because the George George Floyd incident happened it's been like this forever since the inception of policing they've always been tyrants they've always been the control arm of the ruling elitists they've never been anything other that they've always been low-level low-level members of the satanic cult that ultimately rules this world their cult members they always have been cult members their supporters have always been supporters of the big cult their supporters have always been the supporters of slavery first of all that's where the police came from they were started by runaway spike forming runaway slave patrols look it up study about it in history that's how American policing began on this continent it formed from groups that were formerly runaway slave patrols during the civil war-era period and people do not know this because they're ill studied and ill read in world history and American history and then they want to try to say that they're gonna call the shots or tell people how it is and you know I said last week I've taken potshots at people like this and called them retarded because that's what they are and then other people are calling me an ableist because of this now and I said hey maybe I am maybe I'm an ableist so let's let's take it further you know this is what people who believe in government are you're a little slow on the uptake you know maybe I have to put a partnership together between the guy from Team America and special ed here you know maybe we should bring them both into some kind of a video one at one point I think they'd be good partners together you know vomit puppet guy from Team America and and edie special head from Crank Yankers right people are incapable of governing themselves so we'll elect people to govern for us yeah you know yeah I mean that's what it really sounds like it sounds like you got hit in the head with a hammer at Birth really it does you know and again I'm not gonna sugarcoat my words I'm not gonna baby spoon feed it to people this is a form of mental retardation it's certainly spiritual retardation anybody that believes government should exist at all or policing should exist at all you literally are spiritually slow on the uptake you're a little bit spiritually retarded because that's all it means it means to be slowed down you're not making the progress that you should make you're slow that's what the word to retard as a verb means to retard means literally to slow a process down and that's what's happening people are just slow on the uptake they don't understand they haven't moved forward in their mental processes and they haven't moved forward in their spirituality you know they think they're awake they think they're woke and they're nothing of the kind they haven't even begun the spiritual awakening process if they still believe in government that's the beginning of understanding that what real true spirituality is is understanding that there is no such thing as Authority and no one has the right to rule anybody if you're not there in spirituality you're not awake you're not spiritually enlightened or awakened not even a little bit so let's get that straight here are some of the other people who are a little slow on the uptake the people who say yeah we should defund or or by even abolish the police but what are we going to replace it with after we abolish it and I've likened that to replacing up a certain type of cancer that you've just removed from the body because it has become so aggressive and deadly that you had to actually cut it out of the body physically through surgery you know saying what should we replace the police with back to the slide please is the exact equivalent of a a hospital patient that has just had an operation a very serious operation for lung cancer and they've had a huge tumor removed from the inside of their lungs and the doctors are over their bed saying what kind of cancer would you like to replace your lung cancer with miss that's what it's like saying that's exactly the level of retardation that we are talking about for people who think yeah we should about with abolish the existing police force but what should we replace it with some other form of policing it's all slavery ladies and gentlemen the problem cannot be solved from the same level of consciousness that created the problem to begin with no problem can be solved at a low level of consciousness you have to come up to a higher level of consciousness to understand that all policing is ever has been and ever will be is a form of slavery that is morally illegitimate and always has been morally illegitimate and if you don't understand that you need to go back and listen to all the previous episodes of what on earth is happening again this show builds upon earlier prerequisite material it's called prerequisite knowledge this is called cumulative knowledge you cannot understand the things that we are going to be talking about here in the later episodes like this episode number 230 unless you understand the prerequisite knowledge that has all been laid out in the earlier episodes it's cumulative it's built upon the earlier information so if you start listening here you're not going to understand what I'm talking about you are going to be largely lost you have to listen from show number one in order without skipping around you start at show one proceed to show two when you're finished with show two proceed to show three do not go from show number three to show number twenty-five go to show number four it's called simple counting in order follow it in order it's there in order for a reason they're not separate shows it's all one show this is piece or parts 230 of the show called what on earth is happening which you can consider one show okay you will not understand show 229 or two thirty were 231 without going through all of the earlier episodes in order so I just try to say that every week some people listen and follow me up on my recommendation and then they'll get back to me when they're like show 7500 low go thank you for telling me to listen in order mark because I wasn't doing that before and I could not hear what you were saying I literally couldn't hear it I couldn't force myself to listen to it my mind would not accept what you are saying until I got all the prerequisite knowledge in the earlier shows I receive emails from people like this all the time that finally listened and did what I recommended and listened in order at your own pace and then you will understand what I'm saying here in these later episodes if you don't do that more likely than not you will not understand it will be like walking in at the end of a class and you're going to be like what the hell is the instructor talking about I have no idea what he talked about to get to this point so I'm gonna continue to reiterate that last week we performed a full reading I attempted to go through the full document but we didn't quite make it of the document by a former police officer called confessions of a former bastard cop so we got about three-quarters through that document last week I'm going to continue a little bit earlier than where we left off and we're going to continue the reading of confessions of a former bastard cop as I did last week I will make this available again with the podcast for this episode so I'm gonna step out of my slides briefly and I'm gonna bring up my PDF document okay we can switch back great and we're gonna pick up from where okay now I'll just give a little bit of a little bit brief review this document is a former police officer who quit his job because he saw all of the corruption violence theft and lying just the outright immoral behavior that went on not in isolated incidents but as a daily reoccurrence in the police force and as something that was routinely covered up swept under the rug not talked about there was a code of silence about it and it was a known issue of evil that just went on completely unhindered and with complete impunity in the police force as a matter of practice not as oh one bad apples just doing this no it was almost all of them and the higher-ups covered it up covered up all the evil doings that the police did on a daily basis he went through a veritable shopping list of all of the crimes committed by the police then later he talked about well what should what does the public usually think that we could should do about it and he talked about why those things don't work then he proposed some of his own solutions which I agreed with some of them and then others I thought he was coming at too much from a false dialectic of capitalism versus socialism approach which is not the answer really ultimately they're both control systems and belief systems and ultimately they are methodologies and mechanisms of the satanic cult that ultimately rules the world they are not either one of them solutions ok then this former cop moved in his document to talking about a final idea of consider the complete abolition of all police departments everywhere and that's where I'm going to pick up the reading of this document from so here we go continuing with and finishing confessions of a former bastard cop now once again these are his words not mine I am reading from his document one final idea consider abolishing the police I know what you're thinking what we need the police they protect as someone who did it for nearly a decade I need you to understand that by and large police protection is marginal and incidental it is an illusion created by decades of cop agonda as he calls it designed to fool you into thinking that these brave men and women are holding back the barbarians at the gates he should have really put that in quotes these brave men and women are holding back the barbarians at the gates that's the illusion folks that's what we've talked about over the last several episodes police do not protect anyone they show up after the fact they are not stopping any violence from occurring they show up to arrest and potentially punish the person who commits violence but they do not protect you from violence and never can they'd have never done that they never can do that the only one that can ever protect you from violence is you by studying martial arts carrying a firearm learning situational awareness engaging in true common sense and personal responsibility period the end for all time no one else can protect you no one can get to your body quicker than you having understood this for the longest time that is why I am trained in martial arts and I carry a firearm in public that's it that's what mitigates my chances for being harmed because I know how to handle myself physically and in addition to that if I'm outnumbers outnumbered and I don't have to go to deadly and I do have to go to deadly force I carry a firearm that's it and that's what everyone should have the capabilities of man-woman and I would say even children should be learning that until they become responsible as an adult that's it even children should be learning martial arts for sure that's called the right the inherent natural right of self-defense which is shared by all human beings all human beings have that inherent right that being said let's go back to the reading I alluded to this above the vast majority of calls for service I handled where theft reports reports domestic arguments that hadn't escalated into violence loud parties houseless people loitering I like his use of the term house listener not homeless people they have no house they need a house okay houseless people loitering traffic collisions very minor drug possession arguments and arguments between neighbors mostly the mundane ups and downs of life in the community with little inherent danger and like I mentioned the vast majority of crimes I responded to even violent ones had already happened my unaccountable license to kill was irrelevant what I mainly provided was a quote unquote objective third party with the authority to document property damage ask people to chill out or disperse or counsel people not to beat each other up a trained counselor or a conflict resolution specialist would be 10 times more effective than someone with a gun strapped to his hip wondering if anyone would try to kill him when he showed up there are many models for a community safety that can be explored if we get away from the idea that the only way to be safe is to have a man with an m4 rifle prowling your neighborhood ready at a moment's notice to write down your name and birthday after you've been robbed and beaten you might be asking what about the armed robbers the gangsters the drug dealers the serial killers and yes in the city I worked I regularly broke up gang parties found gang members carrying guns and handled homicides I've seen some tragic things from a reformed gangster shot in the head with his brains oozing out to a 15 year old boy taking his last breath in his screaming mother's arms thanks to a gang members bullet I know the wages of violence this is where we have to have the courage to ask why do people rob why do they join gangs why do they get addicted to drugs or sell them once again folks stepping out of the reading briefly what have we talked about from day one here all water and earth is happening why is so different than all of the other podcasts out there causal factors root level causal factors in psychology and philosophy garbage goes in in the form of information and then it is believed culturally garbage will come out in the form of behavior and it will make everybody's living experience hell that's a simple equation when it comes to the human condition that is not what human nature is human nature as we are going to talk about extensively probably on the next series of shows that I do is that human beings are programmable through information that is why the controllers of the world have to give people either a limited set of informations and variables to consider or they have to outright hide the information that people do need to know to come to an informed decision and then understand what they should act how they should act what they should do okay if you don't have that prerequisite information in the form of knowledge you are not going to understand what that information means and then you are not going to be able to base your behavior accordingly garbage goes in garbage comes out you could look at it as garbage or incomplete data goes in then garbage behavior is going to come out so if garbage in the form of information goes into the person that is what is going to inform their decision-making and their behavior continuing with the reading this is not because people are inherently evil he understands this and I'm glad to see that he does I submit to you that these are the results of living in a capitalist system and that's where I disagree no ladies and gentlemen it's not the result of living in a capitalist system it is the result of living in a satanic system let's not conflate the two or confuse them we are not even living in a capitalist model at all we are living in onie capitalism which paves the way to socialism and communism ultimately sometimes it paves the way to fascism right now the public has bought socialism hook line and sinker and that is the stepping stone through the crony corporatist environment that we have toward going to complete communism getting people to bite the bait of socialism I've talked about this ad nauseam on what on earth is happening and explain how it works politically I think if you don't understand that again you're very naive or you have an incomplete data set and you don't have the information that you require to come to that concur echt conclusion I would recommend reading the book none dare call it conspiracy by Gary Allen and I would also recommend the book the grand chessboard by carroll quigley and the book tragedy and hope by carroll quigley then you'll understand how it really works from the horse's mouth and very few people have ever read those books so they have an incomplete data set and it's not just those books as hundreds of others sometimes it's right from the white papers of the people conducting the control-freak behavior that are telling you how they did it I've told people many times on my show the Satanists that I work with in the what other people might call covens or secret societies they were called grottoes in the groups that I worked with we're all too happy to tell you we already control things we own the police and the military they're our pets they'll do anything we command them to do like loyal dog servants and this is what they called them out in the open blatantly you know and they were perfectly and completely open about that in private ok yeah this is the book right here check this one out folks if you haven't read it yet if you don't understand what's written in this book you understand very little about what's going on in the 3d world that we are living in today none dare call conspiracy by the former senator Gary Allen ok written in the Year 1977 zero I wasn't born when this book was written and now all the things that were talked about it today are coming true everything's he he doesn't discriminate he's got the hammer and sickle as part of it he's got the dollar as part of it he's got you know the Chinese star as part of it you know he's got the the Communists the symbol that they use in in black lives matter here with the raised fists he's got the UN symbol he's got it all he's got it all it's all part of it they control all of the sides folks it's a dialectic I I've asked people at my own lectures who's read that book you know three hands go up in the room it's pathetic it's unacceptable I've told people it's unacceptable that you think you're informing you haven't read none dare call conspiracy you're not informed you have a halfway understanding in your opinion at best you know and I'm not gonna sugarcoat it anymore I'm gonna tell people when they're ignorant you're if you haven't read that book you're pretty damn ignorant you don't really understand how it works you would have been drawn to that book if you were looking in the right places this is part of the problem people aren't even looking in the right places you know III I say it to people all the time and it could sound as egotistical as you want to hear it I say I really know what's going on in the world and then somebody says yet do you know the work of Mark passio do you know the work of David Icke do you know the work of jordan maxwell do you know the work of Michael - sorry on do you know the work of Gary Allen do you know the work carroll quigley put out there do you know we'll know the work of Manley P hall and everybody goes who the hell are any of those people I don't care how you can test the gold sounds if you haven't come across my work by this point you're not looking in the right places okay if you haven't heard of the work of the men I just mentioned you're not looking in the right places you think you know but you don't really know it's called you've sipped at the period spring not slipped you have sipped you've taken a tiny little sip like this you here's here's the fount of here's the eternal fount of knowledge called the period spring with all the knowledge in this you've gone listen here's what happened yeah I admit I don't I don't know anything I'm the potential candidate or initiate right who's who's trying to learn how the world works and you're going I admit I don't know that much right so here's all the knowledge that could be available and here's what you're doing oh yeah now I know it all now I got it I'm enlightened I know what's going on in the world instead of doing this now maybe you know a thing or two maybe maybe you need ten of these maybe you need a thousand then you'll know a thing or two most people do the first thing they take a tiny little sip and then they think they understand and there's the old saying a little learning is a dangerous thing drink deeply or taste not the perience spring they're shallow drafts one toxic eight to brain but only drinking largely will sober us again that means you're going to be drunk with the illusion of knowledge if you take a little sip and you stop there again in the Eastern tradition this was what was called meeting the Buddha on the road to enlightenment that means that he's a false Buddha and you are at a level of false enlightenment you'll meet the Buddha at the end of the path when you really are enlightened and understand what's really going on and if you haven't come to the total conclusion that the world is operating on a satanic agenda and it is a slavery system then you have not drunk deeply from the period spring you're drunk on the illusion of knowledge and the illusion of being awake this is what the people who are calling themselves woke are the woke movement you know it's an illusion of being awakened true awakening study the twenty points that I put for in an entire seminar called streetwise spirituality streetwise spirituality you know not being wishy-washy or new-agey or woowoo about it no getting it to a deep level of understanding and being street smart about it that's what it means to be really truly awakened look at those twenty points of awakening and then let's talk about what enlightenment is so let's go back to the reading I submit to you that these are the results of living in a capitalist system and that and that grinds that grinds people down and denies them housing medical care human dignity and a say in their government these are the results of white supremacy pushing people to the margins excluding them disrespecting them and treating their bodies as disposable once again we don't have a white supremacist Society we have a satanic elitist society we have an occult AA cracy an occult AA cracy meaning rule by the occult rule by the hidden elite and you know what folks if you don't believe me take it right from their mouth right from their words go watch the interviews that I talked about in demystifying the occult part to Satanism and the dark occult an interview with Anton LaVey former grandson you know I might I don't even know if he is not married to Xena LaVey anymore but Nikolas Shrek was interviewed on cable access by a white supremists by the way who asked him what would the world look like if you as Satanists were in control of it what would you do differently and he said oh no no you quite misunderstand we already are in control we want the world more radically transformed into our vision of what it should be and look like but make no mistake we already are in control of it we are just going to tighten and refine our control of the world that was Nikolas Shrek's answer - Tom Matt sir in that interview that I gave in that presentation go back and watch it again maybe we'll play it you know to show people hey here's how it really works these people are all too comfortable in telling you how they operate from the shadows so he's trying to put this saying it's to blame by capitalism and white supremacy and these are just divide and conquer tactics ladies and gentlemen they're not going to teach you who's really in the realm of true elitist power you want to learn that go read tragedy and hope by carroll quigley then you'll know who's really in power and he says the exact same thing that i say from having been involved in it at a low i was involved in it at a low level carroll quigley was involved in it at a high level and we both say the same exact things it's a complex interconnected network of people who know all of the workings of the human mind human psychology and know how to manipulate it their master manipulators of psychology same exact thing he says I've been saying for years he wrote that book almost over a hundred years ago I think ok and then what does he say about that it is like a cult it is like a religious group a secret society however you want to look at it and it has no name well I said it a million times here on what on earth is happening it is a cult with no name if you think they call themselves the Illuminati you have drunk shallowly from the period spring first of all that word is a ridiculous word to use in relation to these Psychopaths they are not illuminance of anything I'm a member of the Illuminati I'm an illuminated one and when you are enlightened there should be no ego involved and no false hubris involved in saying that you are I am aware of what's taking place in the world truly from a perspective of true and complete knowledge ok and I am not afraid to say that I'm not gonna tell people I don't know anything I know quite a bit and I've put out quite a bit my knowledge okay so Quigley was telling people this is ultimately a secret society he referred to it to give it a name as the anglo-american establishment and he also referred to it as the Society of the elect meaning the Society of the ones who are in control they have elected themselves to those positions of power and influence and they place point men and women in positions of great power and influence in our society so for lack of better terms he himself said I'm going to call them either the anglo-american establishment or the Society of the elect for the purposes of my writings I have called them the occult controllers the occult ruling class the mine controllers ok the social engineers I've called them the dark occult I've called them the darkly illuminated ones or the dark Illuminati I've called them the cult of the black Sun I think that's for me the perfect name for these people because they are dark aluminous using the Sun as symbolism in a lot of their works but it is not the true light it is not Detroit the true light of true spirituality and enlightenment it is the false light of the dark Sun so I like the name the Black Sun order the cult of the Black Sun it doesn't matter what you call them folks their methodologies matter how they go about entrancing people and putting them under their thumb psychologically and ultimately then on their behavior as a result of that that matters a name is just that it's just a label so don't get too hung up on names and understand they use the dialectic of capitalism versus socialism you know black versus white you know Republican versus Democrat they'll use any dialectic that serves their agenda and gets people fighting each other instead of them you know they don't care what dialectics they have people fighting over they're all too happy to provide the distraction of divide and conquer so let's continue I know I'm jumping in here a lot I'm gonna try to just read Straight But when he says something that's blatantly wrong I'm gonna correct it equally important to remember disabled and mentally ill people are frequently killed by the Pope by police officers not trained to recognize and react to disabilities and mental health crises some of the people we picture as quote violent offenders are often people struggling with unrelated mental illness often due to economic hardships very frequently the officer sent to quote protect the community unquote escalate this crisis and ultimately wound or kill the person your community was not made safer by police violence a sick member of your community was killed because it was cheaper than treating them are you extremely confident you'll never get sick one day - exactly the police do this all the time as a matter of course so let's go back to the reading wrestle with this for a minute if all of if all of someone's material needs were met and all the members of their community were fed clothed housed and dignified would they need to join a gang I personally agree with that and there's no reason we cannot do that without the government or police why would they need to risk their lives selling drugs or breaking into buildings if mental health care was free and was not stigmatized how many lives would that saves save again he gets now into socialized healthcare which is basically conscription you cannot demand that someone else treat somebody that's conscription okay so I don't agree with socializing anything because you're basically giving that to the government to control and distribute and then you're conscripted of Taxation and or outright physical conscription I don't believe in graphs or conscription for anyone that's taking choice away from someone if someone wants to operate privately they should have the right to do that you want to join a collective of people voluntarily and then do that work pro bono you do that as free individuals as well when the government gets involved that's when it becomes slavery that's why I don't believe in the government mandating anything they don't have the right to exist let alone mandate anything would there still be a few bad actors in the world sure probably what's my solution for them you're no doubt asking I'll tell you what generational poverty food insecurity house lessness and for-profit medical care are all problems that can be solved in our lifetimes by rejecting the dehumanizing meat grinder of capitalism and white supremacy folks it's not just capitalism or white supremacy it's the way that the ruling elite have structured the entire society and it's not just here it's if that happens in other places where there are different systems in place the elite a cult ruling class once there to be divisions amongst the people in class status that is what keeps people fighting amongst them and not looking at who the real enemy is it would happen in any other form of financial structure okay ultimately yes we need to get away from any form of money because we have to come up to such a level of consciousness that we understand we are all one family until the the world is at that level of consciousness that would not obviate or remove property all rights are ultimately property rights it would still mean that you would own private property and somebody would not just have the right to just barge into your home or steal your computer or take all your books or steal your food it means we would structure the world such that we would care that everyone's basic needs of the human being are met and wouldn't allow a structure of finance and money to dictate who are the haves and then other people must become the have-nots and go without basic necessities but I don't call that capitalism and I don't say that the solution is socialism the solution is consciousness the solution is not the government mandating who needs what and then deciding we're going to provide it in this way through theft which is what taxation is through violence which is what police you know and that's what taxation is it's ultimately done through violence and the threat of violence which is called duress you know it would just say we need to come up to this level of consciousness and the people have to do that and if they don't do it it doesn't get done this is what people are afraid of folks the chaos that might break out if people are left to their own devices well what's worse people being controlled and enslaved or people left to their own devices and there may be some chaotic stuff I've happened I talked about it last week it would always be preferable for even violent gangs to come out and take over society because no one would believe that they have the right to rule them now we have a violent gang running society called the police run by the politicians and ultimately by the dark occult as' but everybody believes they have the right and authority to remove them you think that's not infinitely more dangerous they have gotten people to covertly believe that they are the rulers of society and have the right to do this violence on to other people and people believe this horseshit that's an infinitely more dangerous problem the belief in authority and then monopolizing a gang to do violence calling themselves the police that would be infinitely more dangerous than just having some violent street gangs take over no one would think they have the right to rule and then they'd step up and eventually stop them through defensive force including deadly force which would be their inherent right to do so it's already our inherent right to do so people just haven't recognized that fact you see you know continuing once that's done we can work together we can work on the edge cases together with clear hearts not clouded by a corrupt system again he makes some points about you know good points about abolishing the police but then he off on tangents I'd Trax because he doesn't have enough knowledge if this person understood the world of the occult and what it really does what it really is not what Hollywood wants to make you think that it is what it really is and who's really running things he wouldn't be worried about the dialectic between capitalism and any other form of Finance and he certainly wouldn't be advocating for socialism alright continuing police abolition is closely related to the idea of prison abolition and the entire concept of banishing the the car serial state in other words that which does the incarceration meaning creating a society focused on reconciliation and restorative justice instead of punishment pain and suffering a system that sees people in crisis as humans not monsters people who want to abolish the police typically also want to abolish prisons and get the same quite the same questions get asked what about the bad guys where do we put them I bring this up because abolitionists don't want to simply replace cops with armed social workers or prisons with casual detention centers full of puffy leather couches and Playstations we imagine a world not divided into good guys and bad guys but rather a world world Pete where people's needs are met and those in crisis receive care not to humanization I I agree with this to a large extent the only part I don't agree with is that there should never be punishment for bad behavior and I think the punishment should be immediate where if you get even work yourself into a state of consciousness or a mentality or a psychology where you think you have the right somehow to harm someone else you should be prepared to accept the negative physical consequences from other free beings let me just say that again on equivocal II I believe in the abolition of the police I know it's the only moral position I believe in the abolition of all prisons I've said this from day one on what on earth is happening I think that's the only moral position I don't believe anybody should be kept kept caged okay I don't think those are solutions to people who want to take other people's rights or property away however I do believe in vicious immediate response to violence let me say that again in no unequivocal terms and let me say this if you think this is not a spiritual understanding and a high-level spiritually aware statement you aren't awake you don't understand what inherent rights are and I'm not saying everybody has to take this approach but I'm saying if the approach is taken it would be well within the inherent rights of every human being if someone who costs me on the street and starts whaling on me for no reason I have every right to physically annihilate that person no matter what uniform they're wearing if I if somebody accost me on the street and tries to steal my property I have every right to physically annihilate that that being no matter what uniform they're wearing whether they're in train pleat plain street clothes whether they're in the uniform of the state or whether they're buck naked it would not matter okay people have to understand self-defense and we need to be a society that enshrines self-defense as an inherent natural right and uses it so frequently that when it is used justly somebody goes good for that person they exercise their right against a thug and ultimately it doesn't matter why the thug became the thug I will I agree we should address all of those concerns and we should have help for people like that but if they've moved it from the place of being fucked up in the mind so much that then their behavior as a result in them accosting taking away rights from other people stealing property from other people whatever happens to them happens hardcore cold I look at somebody right in the face and tell them that because they have no right to conduct violence on other people and other people inherently have the right to defend themselves up to an including deadly force I don't play games with people on the street if they accost me I'm not playing games with them just a few months ago right near in my neighborhood a couple of blocks from where I'm sitting two guys got in an argument one guy thought he has the right to punch this other guy in the mouth hits him in the jaw knocks him out falls backwards hits at the back of his skull on the occipital protuberance on the concrete dead dead over some stupid fucking argument okay you willed physical force against me without right I'm gonna take it up to very quickly escalated up to deadly force because you have no right to do so you have no right to put another human being in a position where they can potentially die and I do not know where the violence would stop that's why I'm gonna stop it completely and totally and guess what yes that's your right that is my right and yours it doesn't matter what the government says that's a human right anywhere on earth in any Co that is currently being immorally ruled by any government that's a human right so I guess I just triggered all my European buddies and gals out there right you're all triggered because this right of self-defense has been conditioned out of you like a good little pet right I'm a I'm a violent American because I just stated that that's my right no I understand it and you don't that's the fact of the matter that's the point of fact matter of reality boys and girls okay so if you're not there yet go back in the podcast and listen from number one and maybe you'll get there all right doesn't take anything away from the truth about what I just said said if you're triggered or offended by it get is offended as you like it's still true continuing let's move move forward here here is legendary activist and thinker Angela Davis Angela Y Davis putting it better than I ever could an abolitionist approach that seeks to answer questions such as these would require us to imagine a constellation of alternative strategies and institutions with the ultimate aim of removing the prison from the social and ideological landscapes of our society I couldn't agree more the idea of a prison is inherently immoral and all it teaches people nothing in society it takes the people who are bad actors among us and sequester's us sequester's them from us as everyday society so that we cannot see the consequences of what our own failure to teach morality has caused in our environment that's why I said from day one abolish all prisons and put all those violent people back into the society that that created them and let them deal with them then people will start looking at causal factors in mind and in spirituality why do these people become this way why do we have so many of them why are they willing to act the way that they are willing to act and it's you know whose responsibility it is it's all the people out in the world it's your failure you are responsible for it it's your failure to teach morality to your children and to everybody else you have failed at that task I have done that task I am NOT a failure at that task you who have not done that are a failure at that test and yes there is blame to be laid yes there is such a thing as blame yes there is moral culpability and yes there are people to blame for that failure and most of the people out there even the people who listen to this show or the weekly basis you are the one who failed at that task I don't care about ratings I'm here to hit you hit you with hard truth and that's the hard truth of the matter I don't care if you get offended and shut the show off and never listen to an episode again not my problem I'm fulfilling my daughter like work and that's your karma that you've taken and done nothing with and you will be held accountable in other words we should not be looking for prison like substitutes for the prison such as house arrest safeguarded by electronic surveillance bracelets rather positing D car serration as our overarching strategy we would try to envision a continuum of alternatives to imprisonment or nd militar to imprisonment demilitarization of schools we should have a comma there instead of a - I'll fix that revitalizing the education revival revitalization of education at all levels a health system that provides free physical and mental care to all again that's where I would diverge in that because if it's voluntary fine but you cannot conscripted healthcare you know you cannot tell them yeah and what they how they want to work it is steal from everybody and make the government pay for that those services that's theft that's immoral all socialization of health care is immoral you cannot can script ours and you cannot keep people in the rest through taxation either people get it done voluntarily or it doesn't get done that's the level of consciousness you have to get to if a road if people don't pave the road the road doesn't get paid if food isn't grown food doesn't get grown if we don't teach people morality they grow up into bad people that's it all the failure has to be placed squarely upon the individual and the community for not doing those things if you don't take your trash out of your environment you have a filthy environment if you don't clean your house you got a filthy house if you don't clean your dinner plate you eat off a dirty dinner plate the next night take personal responsibility for what needs to be done and do it don't tell don't say we need to have free this and that not know what you're saying is steal from everybody and or construct doctors let's be honest that's the violence of your talk about enacting it's not a right it's not a right I don't want to make the show about that but they hammer this in this article and I'm gonna point out where things are false or immoral they don't have all the answers they've drunk shallowly from the parry and spring whoever wrote this if you can prove you wrote this get in touch with me I'll help you get mentored into total enlightenment okay and yeah I can make that claim with no false hubris I'll mentor you through my material into getting completely awake so that you understand what rights are this is still written from a perspective of someone that doesn't know the definition of a right and has some solutions correct and then some solutions that they envision would require duress and violence and would not be voluntary so I'm gonna point that out continuing mental health care to all adjust the system based on reparation and reconciliation rather than retribution and vengeance I'm not telling you I have the blueprint for a beautiful new world what I'm telling you is that the system we have right now is broken beyond repair and then it's time to consider new ways of doing community together I fully agree with that statement those new ways need to be negotiated by members of those communities particularly black indigenous disabled houseless citizen and citizens of color historically shoved into the margins of society instead of letting Fox News fill your head with nightmares about Hispanic gangs and the Hispanic community asked the Hispanic community what they need to thrive instead of letting racist politicians scare monger about Pro black demonstrators ask the black community what they need to meet the needs of the most vulnerable if you truly desire safety ask not what your most vulnerable can do for the community ask what the community can do for the most vulnerable a world with fewer bastards is possible if you take a only one thing away from this essay I hope it's this do not talk to cops but if you take only two things away I hope the second one is that it is possible to imagine a different world where unarmed black people indigenous people poor people disabled people and people of color are not routinely gunned down by unaccountable police officers and let me tell you something folks I agree with that but it is not the totality of what's going on with the police this is not about race yes races of non-white people are actually more likely to be harmed or killed in a police interaction but it's not just them white people are killed by police just as violently as black people indigenous people it does not matter this is not a matter of race and never has been this is a matter of the belief in authority let me say that unequivocally again for those who are little slow on the oak tree it's not a matter of race it's a matter of the belief in authority so you go out and ask all those protesters out there protesting the George Floyd incident do you think all government should be abolished or do you think these people actually have the moral right to exist an organized society in the way they organize it I guarantee you every one of them almost bar none with the exception of a tiny percentile maybe one or two percent are going to say oh no we are not suggesting getting rid of all government we want to do it we still want to have government but we want to be the ones with the reins of power of government in our hands we want it to work for our needs right they don't want to abolish government they want to restructure policing and government into something that is akin to what they want in their mindset and I don't care what color you are that makes you a moral that makes you a supporter of duress and slavery doesn't matter what color you are I don't care if white people advocate for that I don't care if black people advocate for that for that I don't care of Asian people I don't care if indigenous Americans I don't care if South Americans any you know Latino people advocate for that it matters not okay it's still immoral it's still an immoral position you are condoning violence and slavery which makes you a bad person if you condone it go all the way to enlightenment don't stop halfway or a quarter of the way understand that government is slavery and always has been slavery they diffuse the authority from a king or ruler or representative of God on earth to oh we're just gonna have an oligarchical ruling class it's just a few people but they're called government may have authority just like the king or the pharaoh had authority in the ancient world it's no new different the new world order is the old world order with different labels that's all it is different euphemized labels we're gonna euphemized this give it a nice little euphemistic label put that euphemism out there for the dumb public to buy into and repeat it over and over and over again and then the public grasp onto it and says oh yeah this is completely different no it's the same shit on a platter they just put a little sprig of parsley next to the big glop of shit that's all that happened folks they dressed it up and you swallowed it alright that's what happened it doesn't have to be this way yes it requires a leap of faith into community models that might feel uncomfortable but I ask you when you see a man dying in the street begging for breath don't you want to help don't you want to leap away from that world when you see a mother or daughter shot to death sleeping in their beds don't you want to leap away from that world when you see a 12 year old boy executed in a public park for the crime of playing with a toy jesus fucking christ how can you really just stand there and think this is normal and to any cops who made it this far down is this really the world you want to live in aren't you tired of the trauma aren't you tired of the soul sickness inherent to the badge let me tell you something they become more soul sick than all the people who are traumatized and victimized by violence out there in society that's why they're largely brain-dead and soul dead these cops that's why you guys are so brain damaged and soul damaged that's why you can't think clearly that's why you're not smart people I don't care what your IQ is you're not holistically intelligent most cops are dumb most cops are dumb people I don't care what you can even do on a math test that doesn't make you truly smart or truly intelligent you're not holistically intelligent you can't envision what true solutions would be from a causal factor perspective that's why you don't have total heuristic big-picture thinking you're locked into the left brain of action only you can't see the solutions you have no imagination that's largely right brain capacity you're not intelligent you're not nearly as intelligent as you think you are you're actually quite dumb and I'll say it right to your face you are not holistically intelligent people regardless of what you can score on an IQ test that is an Intel intellect quotient not an intelligence quotient I have a very high intellect as well I have a 147 intellect quotient that's genius level so what so fucking what well you think that matters but guess what if you came up with something that could truly gauge holistic intelligence I would score just this high because I'm holistically intelligent I'm not just intellectually intelligent and most cops you are absolute complete inept backwards dumb people when it comes to holistic intelligence and get as offended about it as you like it's true it's true no matter what you say and guess what so are most of the people coming up with so-called solutions you're not holistically intelligent because you haven't taken in enough information to change your brain into truly firing in both hemispheres equally to make yourself holistically intelligent and I'm not here to take you by the hand and pander to your delicate sensibilities about it that was the mark passio on show number one that's what I was doing then and I've said it before folks and I'm gonna say it again that guy is gone that was a persona I was acting in the capacity of putting out a nicer persona than my real personality which is very abrasive for the purpose of getting people to listen to go into the deeper episodes now there's no more chewing your baby food before i spoon food it spoon feed it to you it's not happening we're in war this is war now we are at war if you haven't recognized that what's going on around us in our society is war yeah I don't know what to tell you I just don't know what to tell you and if you think that the time is now - baby spoon potential soldiers in an information war you're nuts we are in the trenches being bombarded and have to shoot back at the enemy and put this information out there and I did it I did it that way I baby spoon fed it to people through like a hundred and fifty fucking episodes and I'm not doing it anymore at least that long maybe longer that persona is over alright don't expect it to ever come back if at this point you're that emotionally charged about it you don't belong even listening through these the rest of these however many future episodes there happened to be buck up reel yourself in and understand you're no longer a child that needs to react emotionally you're at war you're a soldier in combat now whether you're ready for it or not take that approach to life in general because that's what life on Earth has become to any cops who made this this far down okay let's see are you tired of the trauma aren't you tired of the soul sickness inherent to the badge aren't you tired of looking the other way when your partners break the law are you really willing to kill the next George Floyd the next Brianna Taylor the next Tamir rice how confident are you that your next use of force will be something you're proud of I'm writing this for you - it's wrong that our training what our training did to us yeah it's called the techniques of cults which I covered last week it's wrong that they harden our hearts to our communities and it's wrong to pretend this as normal no that's what has made you amoral pieces of trash that's why you're a moral trash as police officers it's to even believe that policing should be done makes someone an immoral piece of trash then you can envision that it be done a different way and no it is not different than an individual defending themselves if they only did that when violence occurred I would say hey then they're just acting in the capacity than any other person who had individual has these rights no they are so-called delegated special rights that other people don't have and then they get qualified immunity for doing that violence and duress to the public and they can't be held accountable as individuals once again the reason government and policing cannot exist morally from a moral philosophical framework groundwork perspective is because no individual can be delegated rights that do not exist for any other individual for all other individuals either you have a right by nature and it's the same for everyone and if you do not have a right you cannot grant that behavior and tell someone else you can do that behavior within it is axiomatically flawed to think that you can it is axiomatically meaning from a foundational standpoint when it comes to philip philosophy and morality you cannot delegate a right to anyone else that does not exist for an individual that's an axiomatic flaw meaning meaning you are flawed at your foundation like the Leaning Tower of Pisa and you started building and building and building and now you have a structure that is not really truly structurally sound that's what we've built in the world because we have our axiomatic principles completely out of alignment they're not in harmony with natural law they're not in harmony with true morality and then other people think it's just fine and they think somehow they know a little bit about what's going on in the world when they're actually dunces who haven't looked at the available knowledge and then then they think they know and they're gonna dictate to everybody else back to the reading look I wouldn't have been able to hear any of this for much of my life you reading this now may not you reading this now may not be able to hear this yet either I find the same thing with what on earth is happening people cannot hear this they cannot hear what I say does not matter true nonetheless not because I said so or because it's my opinion no has nothing to do with that there is objective and absolute truth in nature and it is our goal as human beings to gather that knowledge take it into ourselves and bring our perception into alignment with natural truth most people's ego is too big and out of control and therefore they cannot hear it and they cannot bring their behavior there their mental processes and their behavior into alignment with objective truth in nature the problem has absolutely nothing to do with me as I teach it the problem has everything to do with others ego being too inflated and too in the way to receive it that is why they cannot hear much of what I say I've had people say mark my ego was so hard and the lies I'd listen to shows from you and I could not hear them I had to stop experience has had to happen to me in my life other knowledge had to come to me in different ways finally I could go back and listen and then I could hear what you had to say and you were 100% correct and generally the only thing I say to them is yes I know that this is how it works keep going don't stop where you're at so continuing with the reading but do me this one favor just think about it just turn it over in your mind for a couple of minutes yes and me for a minute so do the yes and process for a minute look around you and think about the kind of world you want to live in is it one where an all-powerful stranger with a gun keeps you and your neighbors in line with the fear of death or can you picture a world where as a community we embrace our most vulnerable meet their needs heal their wounds honor their dignity and make them family instead of desperate outsiders yeah exactly that's why policing shouldn't exist at all that's why government shouldn't exist at all you know he stopped short of saying he should that all government should be abolished you know let's see what the person who wrote this thinks about government's existence not just the police's existence okay if you take only three things away from this essay I hope the third is this you and your community don't need bastards to thrive amen amen okay so I agree with about 90% of what this gentleman who wrote this said about it and then there's 10% I think he has to get clear by going deeper into the world of the occult and the real manipulation game that's being played I would bet dollars to donuts ladies and gentlemen that the individual who wrote this essay knows exactly zero about the world of the occult I can tell it in his words he's not an occultist he's not a studier or a student of the occult world he's looking at this purely from a three-dimensional point of view and not from a higher level of moral philosophy he's got a lot of it on in thinked and I very much congratulate him for that okay that's great if people can work it out in their own minds to this level but look at his experience look at what he saw right he had to go through that dark netherworld himself like I had to go through the dark netherworld of the dark occult myself or I may not understand how this world works I may be one of these hard-headed fucks with an out-of-control ego that still doesn't want to understand that the world is run by Psychopaths and sick religionists with a very ancient and secret religion that they adhere to and they believe in fervently most people will reject that idea out of hand say oh you're a tinfoil hat conspiracy theorist no you don't know what I've lived through you don't know what my personal experiences have been I've seen it with my own eyes in person and you aren't there all the people saying well it doesn't work like this you aren't fucking there and I was ok let's get that perfectly straight first and foremost you're not gonna tell me what my life experiences have been and I'm gonna repeat that over and over again because I still have hard-headed egotistical fucks telling me I haven't actually lived the experiences that I've lived fuck you you weren't there or you'd know what I know that's how it really works boy and girl all right you want to play ego games with me and tell me the things that happened in my life didn't happen to me no I don't think I'm not playing that game you ain't playing that game with this one not with this one you weren't trying to Gaslight some other motherfucker go ahead you're not playing that game with this one I know what my experiences have been and what they meant alright so don't tell me where the fuck I've been or what I know about my life experience you want to disagree on a principle tell me why and I'll respect you enough to listen to it but you're not gonna tell me I haven't been around the people I've been around and the things that happened in my life didn't happen that's where I'll get ready to fucking throw down and break natural law okay because that's blatant disrespect to another human beings life experience and you're not doing that to me not after what I've been through not after the trauma that I've been through and it caused me depression for years years when my facedown in a pillow crying into a pillow listen to do metal after what I allowed myself to become and to go through and participate in you don't know what my experiences were boy you're not going to dictate what they are to me so that's the conclusion of the reading of confessions of a former bastard cop with my commentary on top of it that my my statement is congratulations for working it out in your mind to this extent but you still have a way to go and if you want to come on the show I would be willing to interview you even if you want to do that under an assumed name but I would also say you have a lot more to go in your understanding of how the world is structured and who runs these organizations really wasn't your commissioner it wasn't your chief of police when you look back into the deep Carter's of power you're gonna find Satanists they're they're gonna find religionists there and I don't mean religion is from the ostensible cultural push perspective of religion like priests and you know Imams and you know Jewish rabbis okay I'm talking about Satanists you're going to come into the Satanic clergy who's really operating in the deep Carter's of power of the deep state and beyond they have a religion and it's called Satanism and dark luciferianism and if you don't know about it you need to study up and you should start with my demystifying the occult series both of them do you mystifying the occult part 1 and part 2 and then you'll understand some of their mentality some of it so I think that's a great place to go in to calls for the rest of the show so folks as always we take calls through discord okay I only want questions and comment about the last series of what on earth is happening shows of the psychological state of police and their supporters let's keep it to this topic for the purpose of this show okay so if you have questions comments or you need clarification on any topics that were covered in the series called the psychological state of police and their supporters that is what we are going to take questions on questions are through our discord server and you can go to what on earth is happening comm slash discord to get into that server and then you have to click into the call room read the instructions okay and you know you can then join us in the call room on the server alright so I'm gonna go into the call room and I'm gonna unmute my mic my mic is allready unmuted good get my headset on because I do need a headset to monitor what's going on inside the discord server so all right let's go to Corey Corey you are our first caller for today welcome to what on earth is happening hey Mark how's it going not bad yourself not bad man you get me riled up I'm pretty sure you probably get a lot of people riled up here it's it's it's intense world that we live in isn't it it is and we have very calcified people out there that think they're right when they're not correct and they don't want to hear it like that because their ego is in the way and I am here to say it like that to those who may be able to hear it but I'm mostly here not to talk to the total golem who is so rigid in their belief structure even though it's false that they'll take the the the one ring and clasp it to their heart in their dying throes as they fall into the fire of Mount Doom to give our Lord of the Rings analogy that they want that power and control so much and they want their belief they're hard and calcified beliefs so deeply that they will take their legend into their very own doom I'm not really necessarily talking to those people I know many of them may die in that condition I am talking to the people who unlike myself will take the job of trying to talk to the total golem and maybe show them some care help to D traumatize them etc that's not my role that's not my role here on what on earth is happening and it never has been since day one I have always been trying to create other teachers of this work from people who are already part of the way there I and I think it's very ill understood it's not understood by most people you know most people think I'm doing that other work that I am asking them to help do I am trying to teach the potential teachers they can go and do that soft work that's not what I'm here to do I'm here to present hard core indisputable eternal truths of nature whether anyone is ready to hear them or not in the hopes to get some of the potential teachers who are ready to hear them active that's always been my goal and always will be so sorry for that long explanation there but go ahead and continue no it's perfect thank you I mean you're totally right and we live in a left brain dominant Society so maybe you'll get some of the doctors and scientists on board and that's you know more along the lines of thinking where I was because I was in the whole health thing before I found you so I mean having that understanding perhaps of the holistic mentality about healing in Eastern medicine is a part of this greater picture so you came to this you approached this whole field of understanding through health yeah see that was what I think it's great when people do it like that personally I like to hear that because I think part of it is you have to get your brain in a state where you're giving it healthy things giving a healthy nutrition and the things that it needs to even come to a higher level of being able to reason and and study things you know and I didn't have that that was one of my last things and I saw all of the darkness all of the control aspect all of the dark occult things first and I got health last I didn't realize they were using food and water and air as a poisoning methodology it was one of last things that fell into the the puzzle for me if that would have come in first as it did for you I probably could have gotten to this work a lot faster yeah well I mean I guess say you know people like make a big deal out of my age like so what am nineteen like just because I'm this age doesn't mean anything absolutely it's meaningless ages meaningless there could be wise people at 17 years of age and there could be total fools at 95 years of age exactly and and I want you to be honest with me too about all the things that I'm doing because I know that perhaps you came across my work earlier and I don't mind it if you just tell me you write to my face because that's what I'm looking for see I don't have necessarily right now the community who can be upfront with me and tell me what is it that's on their mind what is it that I may be doing that I that could use improvement I'm always looking for improvement I'm a Leo so maybe I'm a little bit more along the lines of left brain dominance since sometimes especially being in that side I'm a Leo and I don't necessarily think it means that but we're very hard on ourselves we and we often demand perfection of others you know and you know sometimes we have to take a step back from that allow ourselves to make mistakes allow others to make mistakes without by crucifying them you know and it's like Leo's our perfectionist almost by you know our inherent qualities to some extent I do place a little bit of you know belief that there is a influence through our Sun sign I don't think it's the be-all and end-all or determines anything we can always work to change you know certain aspects and personality characteristics but I think there's a little bit of influence there and I've seen that in other Leo's as well and that's why we can be hard on ourselves and sometimes we could be difficult to work with around others sometimes so are you the individual who sent me some of the links to your work earlier on with you son of the email yeah Mike here's the answer yeah I got a chance to look at some of that and I think you're doing some good work out there I think anybody doing something that pushes these moral principles forward and helps people to understand them better is doing great work out there any bit toward accomplishing the great work is something that wasn't there previously and adds the effort and helps us inch forward to that goal so I thank you for putting taking the initiative to put anything out there online publicly that in itself takes work take some study and understanding of how the internet works and take some courage to put that out there you know yourself you know speaking to other people like that publicly I mean I will let like I'm doing kind of what you were doing on I mean it stays on end night Sunday sorry I'm doing plenty of writing so I'm not just working on my health book which I think can help tie the health individuals into this fuel so I have a lot of plans like around bringing perhaps the doctors and scientists into this because they already have a deeper understanding of the world and you are very good at penetrating that left brain because you're very hardcore right on the facts to where you can give it in detail to them because that's what they tend to look for and right to the point so I thank you for that and you deserve a thank you for that I do want to mention that you know I look on comets for like YouTube videos all the time I see you know all these people making content and I see the comments right you ever look at them it's like people are saying we need change we need unity and what are they well yeah exactly it's like okay well of course we need change of course we need unity but how about you be the change right that's right you know it's funny I got it flipped around on me one time a stranger who really didn't know that much about me when I started having a conversation with him about some of these things and I was saying all these dark things that are taking place and you know giving a little bit out about what's happening they actually turned to me and said oh you seem to know a lot about that but what are you what are you been what have you been doing about it they didn't even know my name this is how much people just assume that everybody's just like them well if they weren't doing anything I obviously I'm not doing anything either you know and I just smiled and walked away just comically like just chuckling about it like imagine someone who doesn't know who I am right and then said something like that to me you know I want to say another thing too is we shouldn't be afraid to expand past at our boundaries you know we don't want to create an echo chamber here where it's only just sure these beliefs in us just talking to one another I think we have to really seek out there and you know perhaps you know what I'm starting up I think there's one of our last hopes potentially cuz I don't know where this world is going right in just a couple of days they have things so firmly grasp it they're so confident this agenda of theirs that perhaps it doesn't even matter what we do on the market which is what makes us so angry which is what makes us where actually want to do more and so I find myself pushing myself alright gratefully that's definitely a Leo trait for sure but you know don't burn yourself out I've burned myself out a couple times and then how to take a break you know and then other or other traumatic situations have occurred where I've had to step away from this work and then come back to it um you know slow and steady does win this race as long as more people continue to do it we need to add to the force to the effort you know if we're gonna move a big weight you know you got to add to the actual work effort you know but that's not a thing is your work is timeless like it'll always be um you know it'll always be up there it can be copied it can be distributed it could be put on you know distributed network platforms like BitTorrent or library okay and you know it'll be up there you know and it's never going to be dated as you said this is timeless philosophy so it will not be dated um Cori you reminded me you reminded me about one thing I'm going to tell a little anecdote about what the higher level people in the occult think about the police and that will kind of tie in with you know this whole series I'm gonna have some artwork drawn by an artist to really depict really well what this scene looked like but you reminded me about that but before I let you go I want you to be able to tell people where your work is at online and here's what I just have to say about it he's putting his work out there folks he's putting it out there publicly for people to look at and again if he puts out this philosophy out there it is also timeless and it's up there and it does the work on its own of teaching people the informations out there if you talk to someone one-on-one yeah fine that's great wonderful but guess what that conversations gone forever once you walk away from that person the conversations gone if you want a truly archived material that can work 24 hours seven days a week 365 and a quarter days a year you have to put it online you have to formalize it and put it online so this is what Cory has done with some of his aspect of the great work Cory go ahead and tell them where they can find your work yes so you can go to the website WWE 2.1 that's nit a cont but my youtube channel and bright the birtija and bright TR I'm sorry and bit soup there Cory nature is the answer because that's what it stands for and for the record yeah when you meet downtown perhaps just go outside and nature start using more of that right brain to heal yourself in this left brain world that obligates us to take more action and sometimes burn ourselves out like you mentioned right so I think it's really important that we do keep ourselves in check for ourselves is what's gonna change the world we're not pointing the fingers other people we're gonna change ourselves that's right and and in for the record I'm starting a campaign today I'll be releasing a video about how independent media or anybody who's listening to this or anybody who has you know articles videos even concentrators themselves can spread this word and could get this going very in circulation if we have natural law in circulation a lot of this stuff naturally disintegrates this is not a process where you have to take arms to presenting god it's gonna come down to the earth and he's gonna free all the people like okay well that is the solution the solution is understanding objective morality from a deeper God's law aligning our behavior to it that's it you know and people will say I don't give solutions the entire show is the solution ladies and gentlemen you know the self you know the enemy and you know the law that's it and not you'll win it you'll win all your battles unfortunately most people don't know any of that stuff you know finalize real quick it's not about me I want to make that very clear and I make that super clear and I've created a lot more videos since the last time I came on here and I'm willing to talk to people after the show too if they want but because it's just necessary to have this communication so you know what they open up the voice Channel that's what it's all about and then getting more people to actually learn the communication and publishing tools on computers this is where this this is where we propagate this work out to the world you got to do it online okay that's how you get the bulk of your material out there and once people learned that technology they'll be able to do it for themselves that's what I'm teaching with how to become the true media I'm sure you have some you know expertise and understanding in doing that in just the short time that you've been doing this but you can help pass that those skill sets along that's what Richard and tragedy and hope and autonomy is doing that's what this is all about folks it's about learning it it's about teaching it and it's about how to help teach others to teach it how to not only get them to understand it but that have to help them to teach it as well see we have to become teachers who inspire other teachers that's really when you're doing the great work okay Cory thank you so much I really applaud your efforts and that wood is what it is all about ladies and gentlemen okay so let's uh and now again his website is Nita dot one and ITA got one that stands for nature is the answer okay let's go to Gavin Gavin you are live on what on earth is happening welcome yes you are awesome great thank you for taking my call Gavin from Utah by the way just real quick I just like to give like an applause to Korie like holy cow is surprised to hear that it was 19 and I mean and see that on work and just hearing like just seeing and hearing the amount of work ease and just to speak to that briefly folks it's never too young to start and it's never too old to start never too young to start never too old to start all you have to have is the drive and the initiative to do the work that's it you know so we have some people taking the true media seminar that are somewhat older you know fine that's great it's never too old to learn how to do something new there you can teach old dogs new tricks okay don't buy into that old adage never too late to start this okay so go ahead I just wanted to say that and to kind of echo what Corey was saying to about you yourself Marc putting people in this in this sort of Drive mind state to just go full speed ahead and and hearing you and just hearing Cory a moment ago it's like wow the opportunity is endless so I'm definitely gonna start just you know getting in my headspace and just doing what I can with the skill set that I have right you know and that's all anybody can do you have to start where you're at and then you build on your skill sets as you go you even build on your delivery as you go you build on your you know courage as you go you know you build on your comfort level in doing it as you go all of those things I don't have all the knowledge skill sets and you know comfort level and courage that when I first started you know you'll go back and listen to some of the first episodes I don't think I did a bad job but you know I was a little bit less sure of myself I didn't have all the experience under my belt that I do now but I've forged forward it's about keep moving forward don't don't back up keep moving the work forward don't let them have the world you know too many people are just today saying I give up let them have the world that's not there can't be any worse of an approach than that you know fight till the end even if it's going to be our end but don't give up you know that's why I end the show every week with never-say-die sometimes I feel like giving up but I don't I don't actually do it I get discouraged I get annoyed I get aggravated I hear you know some of you know people who I consider total idiots spouting nonsense out of their mouth that they don't know about and it makes me angry or discourages me and it isn't to say just totally ignore those people you got to be you got to put your finger on the pulse of consciousness in the world and you got to say hey if practically everybody I hear is out there on social media saying nonsense this is where the world is at its AG aging process you don't just ignore that you know so many people say oh never look at that just ignore it no you have to understand what your work is to do so you can do it and it means revisiting that and saying hey let me take a look at a forum from time to time and see if anything changed are there more people in there saying we need not only abolish the police but government is immoral it's slavery and we need to abolish it you know then you go on forums and you say hey has anybody gotten it is anybody teaching it is anybody you know have a deep understanding of it and you know what I see when I keep going and revisiting nothing has changed it's it's a tiny little little little little sliver has been moved forward in real understanding oh we got a lot more people that understand hey we're living in a violent world oh there's a problem Oh a lot of people don't have food clothes clothing shelter all what these wars or words of aggression oh the police are out of control what's the difference if you understand the problem if you don't understand the causal factors and you can get to the solution which is natural law if you don't understand that that objective morality of nature of the Creator you didn't understand zero aspect of what is going on on this planet zero so you could look at all of the negative things that are happening and that's just further more detailed descriptions of the prison oh wait this room is my prison oh well let's explore we could explore the lens in these glasses we could explore the rim of this glass and go down with a microscope and explore every detail of the prison does that get me out will that get us out no all that we'll do is refine what you understand about the problem it doesn't mean you understand the solution which lies in understanding the causal factors of the problem and when you tell people the causal factors of the problem rely nowhere in the 3d domain they rely in the causal realm of thought and that you must change what you believe about what is true and stop believing in things that are not true and stop refusing to accept things that are true and those are discoverable see that's why the first thing I started with on one of the earth is happening is the biggest poison pill that you could ever swallow is solecism we can go back to episode number one where I was talking about how dangerous the ideology where religion called solipsistic there is only a piñon and perception and there is no objective truth or facts I mean if you believe that you never go in search of what the truth is about what's happening within yourself or external to yourself and you're sunk from the beginning you know yeah it's a total sabotage from the very beginning so obsessive that's why I called it the biggest lie you know but guess what this is where most people are at today they've been conditioned by the social engineers to say my emotions matter more than facts and if this hurts my feelings then I don't accept it as being true you know you reason like that that's solid sysm that's not reason at all that's a religion it's a belief system that we have to purge from the human mind and you tell people that and they want to do harm to you they you're telling them the solution can never lie in something like solid sysm or the belief in authority and that the mind has to be changed before the external world could change in any way and they'll get angry at you for telling them they have to change the way they think when they're thinking is the actual cause of the problem that we are experiencing and they don't yet understand that you know that's what we have to start teaching people as a group of people who claims that we understand this information and again in order to do that and to get it out there if you're gonna bang your head against the wall forever if you think you're gonna do that one to one as an individual again I've given the example I did that with my mother okay as she's never gonna watch anything unless I force her to okay I got her up to the point where she says you're correct it's a worldwide control system they they want control their control freaks and I don't question that anymore because I've seen it enough with my own eyes right she gets to that point you went into all the details about food drugs different secret societies different think tanks how the world is ultimately controlled she wouldn't know any of those details if I said explain to me the fossa fee of salep says or the ideology of salsa wouldn't be able to do it tell me some of the tenets of Satanism because these are really the rulers of the world and we have to know their mindset otherwise we can't really know the enemy and make any progress against them she won't be able to do that right so the details aren't there but in like 1215 years let's say of constant hammering on one human soul and mind Bombo hammering on it relentlessly non-stop for fifteen years I got one human being through my voice in person in comp in person conversation I moved one human being that far right which is nothing nothing I only did it because she's my mother and I care about her soul that's why I spent the time doing that I wouldn't do that for a stranger that's why I do this I put the work out there publicly when someone finds it they could pass it on to someone else they could watch it or not watch it and you will understand if you take it all in if you don't take it all in you're gonna have a halfway understanding at best or no understanding and guess what I have fulfilled my duty and obligation morally to put the word out there to the world this way through technology that's why all the loving Luddites out there meaning people who are afraid of technology and don't want to use it right you don't understand it's a neutral tool a neutral tool is a book good or evil well the book is a piece of technology what's in the book can be good or evil depending on how it influences other people's minds and behaviors technology is a tool when a computer comes to you it doesn't have any other information and you could put what you wanted and you could distribute that information that's what Communications and publishing technology are the problem is we don't understand the importance of the tools that we have in our hand we have guided nuclear bombs in our hand that we could use in this war and you know what we're doing we're playing you know garbage video games right it's like um what McAfee I forget his full name said at the attic adelphia conference he said in his video he said cryptocurrency is invincibility and a battle rifle that never runs out of ammunition that you can never die and you have a perfect battle rifle that never runs out of ammo that's what really cryptocurrency if you want to truly use it to take down the control system as far as the financial aspects of it are concerned and he said you know how all of you guys are using it like a little toy like a little child's toy you know and I agree and it's the same thing when it comes to technology any technology we have the potential to become powerful teachers of natural law and what's really taking place in our world and you know what most people are doing they're on Facebook playing some stupid game you know or on their phone playing some dunk there slap I'm not gonna call it a phone anymore it's the slab that's the new name for the smart phone do you have your slab handy cuz that's all it is it's not a creative tool that was part of one of the first things I talked about and how they become the true media if you think you're gonna put out any publishing true good publishing to the world on a tablet or smartphone you don't understand the work that's involved those aren't real computers those are slobs okay and that's how I view them so I just wanted to say that regarding technology and if you are thinking about moving forward into this work I commend you for getting that far and understanding that it's about taking action so if you have anything else Gavin um yes first of all just amazing insight that you just brought there one last thing I would just like to say so most of my family our solipsistic Order followers or supporters of order for I'm sorry are hardcore deep deeply rooted solipsism and always bringing in the into conversations perception is reality and well but those aren't my facts those aren't Wow Wow yeah they're all I'm up again they're pretty much gone I mean that would take a lot of hard work upon the psyche and soul to remove that I would assume many of them are atheists I mean de-facto it yes there and so they're so-called Catholics or Christians right but they they've bought the idea that there is no objective truth in nature the universe that is uh that is something that most of the mystery traditions of consciousness throughout all of human history and time it would have referred to as the unteachable they would have not wasted their words on them the only thing I would say is if you can pinpoint a maven a person with influence with the rest of them you might want to try to work on the maven in that group setting because then they might be influencers for the rest of them and help to decalcify their ego because a lot of times people will only listen to the maven and I'm almost certain you're not it when it comes to your family members yeah I would you know bet anything and um you know if you can identify that there is a clear maven of the family you might want to do what I call maven target and target the maven work on them that's why I chose my mother not only was she my mother she was the maven or matriarch of my family okay both the matriarch and maven you know since my grandmother died who people would consider the existing woman influence or female influencer of the family when she passed away that role sort of organically fell to my own mother in my family dynamic that is why I focused so hard on her I already understood how this psychological dynamic worked when it comes to helping wake other people up and I've really focused on her as an individual and now we're seeing the very very very beginnings of the planting of those seeds of it's spouting some growth and possibly influencing some other people in the family we'll see how it goes but guess what if I didn't do that hardcore work in the beginning of planning all those seeds and forcing her to watch certain things it wouldn't been in her mind when all of this stuff with the coronavirus nonsense went on and then she wouldn't be waking up during this process she'd be one of these hard-headed people that is doubling and tripling down so that's how it works you have to pick somebody go to work on them locally and hope that it bears fruit fruit in the future definitely Marc thank you for that yep well I appreciate the information I'll definitely try and focus on the Maven targeting and hopefully you know get involved in the great work so I appreciate your time having me on Gavin you take someone thank you mom absolutely Gavin thank you so much great I'll call great insights I appreciate it let's go to Ivan from Phoenix I've you're live on what on earth is happening welcome and you're here me today yes I can you're in yeah in a while brother fix them good to talk with you yeah yeah same here speaking that it's been a while yeah my condolences and thank you thank you it's still you know it's still affecting me greatly and I'm just powering through it and get getting back to the work so that's how I'm handling it yeah but I appreciate that thank you yeah yeah III think about her and I said some tears that I'm sure because all the times I've seen you pimples and bits you know a bit like Tom and Jerry when I think of you obviously you know she comes to mind so well yeah I'm sure she's proud of you know you've really turned it up quite a few notches right and yeah and this time this is how we need it that's right the baby spoon feeding that's right and even my mind said I mean not my I still work on myself but emotions and actions but my thoughts are there this you know we're at a point like you said World War three we are living in World War three right now it's not you know tanks and guns and main choices the system against humanity that's right right now we have to toughen up in that regard and you know get out of our reactive minds and realize everything we do has to be focused on putting this information out and attacking against the enemy putting their disinformation out so you know that's what the great work is all about doing Ivan you know III basically was going to keep it to you know the police and their supporters and that that mindset but since we've kind of hit upon a little bit of a theme of doing the great work and you come to mind because this ladies and gentlemen is an individual who has very much ramped up his efforts in doing the great work I want you to tell people about the work that you have done because your conference was what I consider one of the most successful ways of doing a conference even though it costs you personally and you know I know you don't maybe like to talk about that and I'm not trying to like you know make you quote any kind of a martyr or anything but I'm trying to explain to people that sacrifice gets involved in this you know Ivan put out so much money of his own to host the truth mine reality conference and did not recoup it but he did it because it was the right thing to do he had the resources to put toward it and he said that's more important than me making a profit you know I mean that's like to me phenomenal I mean that is the heart of what this is about you know so I want you to tell people like you know some of what you did with your podcast with your conference and you know let them know what kind of a trial and ordeal some of that was like because a lot of people don't know what to expect and I'm not trying to make it sound like it's all bad but you know they I want them to know how they have to just put their nose to the grindstone and stop talking about it and just do it and let the chips fall where they may learn from mistakes so if you could speak to that I'd love to hear your thoughts on that well mark you know it never sells that you always seem to like that fire because here I am with everything going on right now you know I honestly admit it feels like I'm going to a slight potential depression almost you know because with the job where I'm at the requirement mandating of the mass or I have to you know stay away from there as much as also it's the constant kind of like you know shit balancing of the thoughts emotions and actions right yeah it's a lot of work especially the way things are going now so I was kind of feeling a little bit you know not so confident it's like man I'm not really doing anything and all that and yet look here you go and the first thing you'd put out that conference and I'm like well shit yeah I did do that didn't is right so but yeah so that was know so much for either I mean in your podcast like okay you take breaks on that and go back to it and there's no problem with that but you're putting out good philosophy in there and it's archived for people to go back to and listen at anytime and download you know that that's what I'm talking about you know you you wouldn't consider yourself like any kind of a high-level computer expert right nope okay you're just an average guy you call your podcast guy next door speaks I love it I love the title that's I consider myself just a guy from South Philly how did I stumble into all of this I someone in all this by getting involved with some of the wrong people that took me into a really really dark place where I saw some of the power behind the scenes that's how it happened for me I'm just some dude from South Philly you know I'm not special I don't have any superpowers right so I work at what I do hard work at it hard I go non-stop some days some days I say I'm burn out I need a rest day that's it and then I rest and I don't work you know but you know it's you got a steadily chip away and make progress and move forward and its gonna take sacrifice sometimes what you're you know you're just an average guy from the southwest I think you were originally from the West Coast you move to the southwest the East Coast move to the southwest you're in Phoenix you know and you decided I'm gonna make a podcast and try to explain what I know what I've come to know about what's going on in the world that's it Ivan just a regular guy he doesn't have any superpowers would you have to do you had to learn how a podcast work works you had to make a decision what platform am I gonna use how am I gonna record it let's learn some recording software takes a little bit of time you got to put expend effort you got to spend some time doing that that you would normally have spent doing other things that's how it works it's a trade-off you spend that time then you get something in return you get some expertise and now you have ability and you have the ability to reach out to many many other people yeah that's right and again yeah like a lot of people start in different areas you know whether it's the vaccine stuff or whether it's the healthcare stuff the diet or 9/11 was a big catalyst for sure we're right now not 9/11 2.0 yeah right now with Toby that's waking up a lot of multi-node I hope you will join the great work but yeah like you said the fire under my butt said that plenty of times on my podcast and I kind of hammered on the action part until actually you finally got it it's not just about what you know or understand it's about taking action upon that knowledge you know so good and if it starts slow with me and well I can say slow with me but it is slow stuff or some or little for some can be big for others guess what that's okay that's okay yeah here see we're trying to build out a new site for the one great work network we're going to build it it's going to happen right it's going slow the pot the documentary was going slow we're making more progress with that now because of funding and a video editor okay so it's it's moving a little bit quicker now what on earth is happening is in full speed right that was really slow at the beginning nothing's gonna be snap your fingers and ultimate fruition nothing works like that okay slow and steady truly does win this race now that doesn't mean I don't want to see more people waking up more rapidly sure I do okay but it means the people who are doing the great work to put that information out there imagine if imagine if 500,000 people 1/2 of 1 million people made the effort you made Ivan just imagine if just a half a million people in all this seven and a half billion people if five if we duplicated you five hundred thousand times how much effort would that amount to a lot a lot yeah okay imagine if we duplicated me five hundred thousand times how much effort would that amount to right this is what I thought we would have a million people doing this work by now I really did I really did and see people like Ivan are doing it people like Cory are doing it people like the gentleman before eat no you haven't Gavin are getting ready to do it okay other people have already started some people are on the fence about starting I say the same thing that I say to everybody who says I'm on the fence about starting what's holding you back there's a fear somewhere there's a fear or a trauma somewhere in your makeup that is holding you back get over it it's not what's happening it happened in the past you can't let that dictate your life you have to do the shadow work to say I'm gonna release that trauma maybe it's a fear of public speaking a lot of people have that one recorded your voice that will help you get over you record it you listen back like an audience member then you know you're gonna find you're actually you do that for a few weeks or even a couple months right let me tell you what you're gonna find this is what I did and I didn't really have a fear of public speaking because I was in bands since I was 15 years old I was used to getting up on the stage and screaming into the microphone you know I was used getting up to you know on the microphone and a hardcore ban or death Mel ban and telling people to go nuts and start a pit and they'd listen you know I'd wound them I'd wind him up into her into a fervor you know I was a really good frontman and I was good at doing that so getting up in front of a group was never a problem for me but if it is right I did not like the sound of my voice and I had to get over that so what I did is I'd record it and then I'd listen back and I'd go you know what I still don't really like the sound of my voice too much but guess what what I just said nobody else the same you know it's like you you're gonna bring a unique delivery in a unique style and you're gonna what you're gonna value that right and you'll get over not like in your voice you'll get over speaking in public it'll happen but you've got to keep doing it you got to practice this is a practice right nothing is ever perfect you keep practicing at it and making it better you know and you know you did that by putting out episodes of guy next door speaks and you did that with deciding I'm gonna host my own conference you went that far and you did it and you brought people there and I'm telling you it was probably the best conference that I was invited to and attended as a speaker thank you well because yeah okay well I'll just run down to everything 2012 20 2007 I woke up to some stuff with Kevin Trudeau work you know I wonder if he's ever getting out of jail but that's something else with his work and then listening to new around 2010-2011 and then the kick in the ass is start a website start a podcast start a meetup group and even there with the meetup group after about a year or two of doing those three things people in the meetup groups other meetup groups that I will attend would ask me oh you know all this stuff anything what are you doing what are you doing about that he talked all this and it's like oh nothing much I started a web website I started a meetup group and I started a podcast what are you doing but that is something that's actually quite a lot you know that's not know exactly yeah exactly yeah and then yeah like like you start following the progression like a podcast website bringing people together I need to bring more people together and then the idea the line being the stars align the universe came together for the conference because the work was so so happy where I'm at that they were just giving money away over time over time over times like okay now seems like a good time where ticket sales won't cover it you know it's something I want to do pay for it other thing I think about that ladies and gentlemen listen to what he's saying he said I know that I'm not gonna be able to cover this right now with what I'm making so he took overtime shifts to fund this event that sacrifice that's dedication that's making it happen you know so I mean that's just fantastic so yeah yeah yeah well again fortunate for me yeah the weight of the world is many people don't have a paying job right now though again it's like a make do what I have with what they're yes right right with the resources that you had at your disposal on what you were capable of doing you've pushed forward and did it and you probably did that at the expense of other things hey Ivan you could have taken that money and went on a beautiful vacation with it you know you could have taken a cruise down to the Caribbean with it relaxed you chose to put the grog out there to guard me about our computer right priorities principles principles are coming first principles right first things first exactly that's it folks that's what the great work is right there that's what it is to do it's called getting involved get involved in the war effort because we are at war you know so Ivan I think I'm not having really even thought mark I don't know if you notice the about a month ago I took up your recommendation suggestions and and truth of the matter about if we're gonna continue doing the work we need to invest we need to actually stop using your cell phones tablets and laptops and get you know professional you know that's right with after all these years all these years about 2007 through two three months ago I've been using the same Windows XP oh my god stop yeah that's pretty good finally yeah finally I went well I had updated to a laptop the laptop was a Windows 7 and then they did the automatic updates of Windows then but it was still a laptop right and now finally a couple of months ago again with the funds coming in I went and had a computer built nice big powerful machine lots of memory lots of glass harddrive space I went ahead and dad would looked at a little bit with my friend Francesco out of Italy we put together two podcasts or one podcast episode breaking down some movie clips and it worked beautifully we resume and screen sharing and all that was like okay yes the technology and the power makes this better everybody right now could have a home studio in their living room in their bedroom that that is how far the technology has come right now I'm in my bedroom this is a home studio in my bedroom of my house okay that's it and look at what we're capable of look at what we're capable of putting together and doing okay so anybody can do it if they place a little bit of time and effort into it take it seriously look into it look into the best practices for doing it study it and then you have to dedicate your time to it you have to take time that you would do for other things and set those things aside and then say this is going to be my time for the war effort because that is what this is and that is where we are at we need more soldiers with boots on the ground waging this war and there is no excuse because all the technology is in our hands we have all the tools that we need to do we have all the knowledge we need to do it and we have the tools that we need to do it you know it's missing the will to do it the will to wage this war that's what we're not there yet with so more people get online like lot like Ivan and just say I'm gonna learn about this I'm gonna figure out how to do it doesn't matter how long it takes folks it's not a rush right yeah we're in the final throes of this battle right now or it could get a lot worse too but when I say it's not a rush I mean don't place deadlines on yourself just steadily learn and move forward you know so you know I'm not placing deadlines on like a new site I'm trying to build I want to built well alright I want it built so that people want to come to the site and use it so it'll be finished when it's finished but I'm working on it we're moving steadily toward it you know that's all it is is keep moving forward don't give up persistence persistence and some patience you do have to have patience with yourself don't beat up on yourself if you don't understand something the first time go back to it until you do understand it and move forward that's it that's what the great work is to do and I've and I thank you for your contribution to the great work well you're welcome but yeah thank you because yeah you you I always say it I listen to so many people and watch so many things you know online like like a lot of the truth-seekers but you're one of the few up there that percentage-wise statistically it's like very high nineties there's like very few things that people like oh I don't know about that right yeah I mean nobody's gonna agree with everybody you know but the goal is that bring your you know perception into alignment with as much truth as possible I never claimed to be perfect you know there are some things that I you know we'll get wrong and then if I am alerted that that's not correct I'll acknowledge it and move forward and change my mindset about it that's the process of having to admit that you're flawed and you can be wrong and nobody has all the answers however when it comes to understanding objective morality there are correct answers out there we can come to know them if we set our mind to it and then we could teach others if we set our mind to that goal so that is ultimately what it's all about and I love to hear the fact that more people who interact with what is happening and call into the show are really turning the corner from just being a passive observer and listener and viewer to actively doing something themselves that's what this has all altima been about since day one is to show people you can do this I am nobody special I just dedicated myself to it my time my effort my patience my persistence until I worked it forward and got it to this point and you could do the same thing you're no different and having though I have no different ultimate capabilities of you as a human being I just worked at it and so can you so Ivan thank you so much it's always a pleasure to hear from you all right that's Ivan from Phoenix all right okay let's uh let's hear from Jonathan Jonathan your live on what on earth is happening welcome to the show mark can you hear me yes I can loud and clear welcome all right well I don't know if anybody here has ever seen my YouTube channel but a good way to start I have a Apple Computer and iMovie is an excellent initial start to just go into novice creating a video platform you can edit your audio spectrum to get your background noise down you can edit your video to make it cleaned up and look a little pretty and that was my initial start I just wanted to tell anybody here who's a little bit worried about starting something is that if you got an Apple Computer iMovie is an excellent initial start to start trying to make something to manifest something to start your great work instead of just patting somebody on the back and saying thanks for your work instead of getting your feet wet in the pond and joining us in this battle sorry I agreed that actually Jonathan I think that iMovie is a very simple video editor that a novice can pretty much put out a pretty polished video with without knowing a more complex tool like Final Cut Pro or Adobe Premiere I think Windows Movie Maker would be like the kind of equivalent or I think they have a program just called video editor now on Windows 10 that would be the equivalent on a Windows based system that on a novice for free can just start experimenting with it look folks if you don't even like you know how you look on camera you don't have to be on camera to do any of this you know you could just put slides up to your voice and talk about them very easy to do in video editor or iMovie you see a little bit of limitations coming forward in that software once you sort of master it you want to do something a little bit more complex then you move up to premiere or Final Cut Pro things like that and there's tons of manuals and online video tutorials things like that you know it's all about a matter of how far do you want to take it how what kind of things do you want to do if you just want to do an audio podcast you don't even need to learn a video editor open up your recording software hey you can record with your little recorder in your phone if you wanted to I'm not saying that that's a great idea you're probably not gonna get great quality that way I would use a semi-decent microphone like a podcasting microphone you know you can get those for like less than a hundred dollars you know and all right just hook it in to your computer and you're off to the races you don't need to be even beyond it then just save video and upload it you know to a I've save audio and uploaded to an audio site or like Jonathan is saying take that audio put it into iMovie put some slides over it or just put one slide over it doesn't matter pick a nice slide make a logo you know mess around in Photoshop or illustrator and make a logo we're just you know pulling an appropriate image down from the web and make that your your image and just let people listen to that through YouTube you know there's tons of ways you can start you don't need to go gung-ho from the very beginning for what I'm doing for the purposes of teaching people with how to become the new media is I'm trying to show them the very very foundational building blocks of computing so they have good practices when they use their computer and they don't mess up their computer and then I'm gonna teach them how to do some of the similar things that we do here for what on earth is happening you know making posters you know advertising posters um for live events how to do presentations how to make motion and presentations how to do very simple videos you know we may show iMovie or Final Cut how to build a simple website or you don't have to be a really super advanced web master you know very simple stuff foundational building blocks of publishing you know that's it so don't be intimidated ladies and gentlemen you got to get your hands in there and get them dirty make mistakes that's the other thing one of the tenants I'm teaching is there's a million ways of doing things stop take your time look don't get overwhelmed okay learn a little bit do a little bit learn a little bit more do a little bit more and don't be afraid to make mistakes these are the foundational tenets of the seminar I'm teaching you know mistakes help you to learn what not to do hey Jonathan if you want to give out I'll let you keep going but if you want to give out your YouTube channel feel free so that people can check out your work as well yes it's Jonathan pecan it's just my name just jail na tha NP ICC oh and II and the reason why I've got motivated to do my youtube channel is it want to say thank mark passio for your work but it initially it's gonna take yourself that's where I start whatever you're doing you might have been an ember to start this this this pile of fire that you had for yourself right and being a former order follower pet for the satanic cult military death called I'm a veteran in Ramadi and I get a lot of fear not a fear but more of a anger that threw me and the thing is is that I just see a lot of cowardice in people now and and I'll be honest with you Markham I'm scared to death to see that the manifestation of this of what I've done to overseas is coming full circle on my own soil and I tell all these guys that are prior military our police are even active-duty that you know you're no good even if you are gonna follow orders you're no good overseas you're better off here because all they're gonna do is have you go somewhere else you're gonna be expendable asset over in a foreign country and if you are gonna you bang it out with us I'd rather you be here on the soil and retake your freakin side then be somewhere else right and the other thing is Mark is how do you how you harness that anger because it it builds up a lot and and for some reason it's a release for me for a lot of my PTSD through the war my answer to that is sometimes not well sometimes quite badly you know it affects me I'm an emotional being you know I'm not a robot I'm as human as anybody else you know and some people around me will can tell you sometimes I don't handle it well but what I do altum Utley is I channel it to my work so you can see the proliferation of my work right that's all driven by the fuel of anger of the injustice that is happening in this world and how they have fooled people you know and

I'm gonna tell an anecdote about that actually again I believe it was a quarry and now you are reminding me of this and now that you reminded me that you were a former order follower I'd like to give a brief anecdote and at some point in the near future I might have artwork that reflects the exact scene I'm describing it to an artist as we speak who is going to be drawing it for me but if you have anything else you know I'll let you go now and then I'll let you go to give this little anecdote about what we're talking about so go ahead sure well if you for future reference if you ever do a presentation on order followers the intima entomology or the wording of the word infantry has the word infant in it so it's literally in your face of what these expendables pets are that's right and in Satanists I work with called the police and military their pets and they give them dog tags that's how they're mocking symbolism works most people don't even understand that that's what they're saying to them is that your our pets and work we've trained you in the boot camp or police academy and we will unleash you when we say and you'll follow our orders and you'll follow our commands to do whatever we tell you to do to other people like a well-trained dog and that's the only name that they ever called people in the dark occult who were police and military they referred to them as as I've said many many many times on what on earth is happening they called them our dogs or our pets nothing else they never even referred to people in uniform as human beings they never even called them humans or individuals they used the term our dogs and our pets every time they refer to the police or military I think the biggest disappointment is the quote firearms community because they seem to be some of the biggest status of order following lover worshippers I think unbelievable what boot lock what bootlickers the people in the alleged patriot movement you're not Patriots your fake-ass Patriots the people think they're Patriots and support the police you are not Patriots you know and that's not a left-leaning statement that's not a right-leaning statement that's not a political statement that's a spiritual statement and that is a consciousness statement that is a statement of someone who is coming from the level of true spirituality higher level consciousness and natural law and if you want to look at what a true patriot is understand what I've said about true patriotism I'm going to give a whole presentation one day called fake-ass Patriots and boy is not going to enflame some of those people just just bring reference to the history of Battle of Kings Mountain where all the other the militia said be your own officer that's right that's how the natives fought they said you fight you fight for your own your own plot it's roaring creaking language you're right that's that I'll be conquered battle Kings Mountain excellent Jonathan thank you so much I think that's giving people something to think about and it's definitely gonna be a for at least a former show I mean a future show on what on earth is happening if not a full formal presentation called fake-ass Patriots that'll be coming right if you need any pictures of someone who has the look of a lost soul in their eyes I have plenty of my own in the military and what what carnage and destruction can do when you allow somebody to tell you what what to do excellent excellent different defend free will and everybody be doing a mirror work be looking at yourself instead of outwardly figure out what's going on that's what trust self-respect is all about and that's what coming out of this cult is all about Jonathan thank you very much very Greg Hall thank you all right this is the kind of calls we get here on what on earth is happening you won't find this in any other program you won't find callers like this anywhere else on the entire internet I can assure you of that Jonathan brought up the point and Cory reminded me of this earlier of what the dark occultists actually think of the military and the police and again this is sort of the brick Jonathan began bridging this he's this calling segment back to talking about the police and the military which we have talked about over the last four shows on what on earth is happening and I'd like to give this little anecdote when I was still a Satanist and I was attending rituals in my tri-state area and a few in Maryland I'm in Philadelphia I consider the the tri-state area is considered in the Delaware Valley hear Pennsylvania New Jersey and Delaware that's what they call the tri-state area New York is a little bit separated and it's further north past New Jersey so they don't consider that our tri-state even though it borders Pennsylvania on the north and they don't much consider Merrill in the tri-state area but you have to understand that a lot of Satanists are from the state of Maryland it's a it's a hotbed Delaware in particulars a big hotbed because the DuPont family lives there and they have set up a lot of communities in the state of Delaware small though it may be it's a huge area for the satanic cult and belief system obviously New York is one of the biggest hotspots in the world I'm not going to talk about that because I didn't really attend many things in New York friends of mine have more experiences dealing with the different aspects of the satanic cult that I talk about in New York but that's not really my much my area of expertise nor is New Jersey that much but I did attend some in Pennsylvania some in New Jersey some in Delaware and some in Maryland when this was vol Purchase knocked and I believe the year was 1997 I could be off by a year or two but it was probably 97 I was at a home that was being used for the purpose of a ball purchase nocked ritual in northern Maryland in a town called Whitehall at it's just a rural community rural place the high a pretty affluent in general and there we attended the ritual it was very I don't want to say completely informal but it was like we're gonna do the working at you know 9:20 p.m. please be downstairs for that you could mingle and talk and you know enjoy refreshments up here the working is done we'll move back up here we'll go into this you know reception area here which is just basically like a den or a living room and they'll be you know food and other additional refreshments and you could stay and talk until about 1:00 a.m. and that was it so they did a what's called a sympathetic working in Satanism there are three types of rituals there are workings for sympathy or alignment with goals there are workings for destruction or those who are thwarting your goals to try to send a negative energy to them and then there are sexual rituals this happened to be a sympathetic working or sympathetic ritual I don't remember exactly what it was for but I remember it being something that they wanted to pass legislation to do in the state of in the county that we were in in Maryland so that's what the ritual was for and how it worked was they could called this a mastermind everybody has to clear all other thoughts from their mind during the whole ritual which involved darkness candle light incense bell sounds some tones possibly singing bowls to create a certain atmosphere ritual elements like swords daggers cloaks etc okay and you can go on and on with the description of things and events and how they conducted the ritual that's not important what's important is the mental state that they demanded of the participants you were to completely remove any other thoughts from your mind except what the working was for and I'll tell you what I it does work I don't get into ritual magic much myself but I've done it outside of this environment to success believe it or not and I can talk about that as a further anecdote but essentially we went downstairs and everybody had to clear their mind of anything but the goal of what they wanted to accomplish meaning we're going to get this legislation passed in this county there will be no opposition to it we'll get our vote through you know the council members will get their vote through or legislature whatever it was and no one will stand in our way and if anyone does stand in our way forces will be brought against them such that they will not be able to accomplish their goals now what what they instructed you to do was to not only keep the goal in mind but to feel as if it was done that's it it's a done deal well you don't even have to think about it we put the intent out totally single-mindedly focused and then we say it's done it's happening it has happened actually is what they would tell you think that this has already occurred unequivocally and then after that don't think about it anymore put it outside your mind don't trouble yourself with it and just know it's going to happen that's it and it worked they got it done again I don't recall the exact thing that it was for because there were many different rituals I attended during the course of going to different satanic grottoes I don't specifically remember what this one was for but it was some piece of legislation as I recall then they said okay the working is adjourned everyone can disperse for to the upstairs you know living room area for refreshments everybody is welcome to stay till 1:00 a.m. and then we'll I asked you to go to your separate ways because the owner of the home only wanted to host the party tell him that our party ritual you know it was part ritual part gathering meeting party whatever you want to call it socializing networking that's what they do before and after usually we come up the steps and go to a reception type you know buffet area and I start talking to a couple of people while I'm picking some food from the buffet onto my plate and one of the individuals is a kind of heavyset guy probably in his mid-50s possibly a little that hard to pinpoint at exactly late mid the late 50s maybe early sixties kind of fad you know definitely heavyset let his weight go dressed in you know simple you know sort of a suit not I wouldn't say ultra expensive you know typical suit with a tie some people came in formal semi formal attire I wouldn't go say there were people there in tuxedos but semi formal some people were suit some people were just dress pants on a jacket some people didn't wear a jacket they just wore a shirt I just wore a plain button-up shirt okay because you know they didn't really care it wasn't there were no dress code for formality it's just you know everybody had a cloak with a hood for the ritual okay at the buffet we're talking this is a heavyset guy suit tie mustache no beard clean-shaven other than a not complete handlebar but like a standard mustache thick mustache he was smoking he was smoking a cigar the host allowed smoking obviously we were all eating and drinking you know we all had like meat on our platter I was not a vegetarian or vegan at this point and you know just drinking and they had some wine they had water I was just drinking water I think he had a glass of wine we had utensils like knives and forks on our plates you know and it was just hors d'oeuvres and you know some meats and cheeses things like that now there was outside placed before the working before the ritual a off-duty police officer who was sort of young I would say he was probably in his early not early but maybe mid 20s okay so he was in his mid-20s and he was asked before we began to guard the house to not take part in the ritual but they said your services would be better since you're a police officer and you're armed here today obviously from Maryland okay to just be our guard outside should anyone you know happen to roll up here and you know who knows want to find out what we're doing or cause any of us you know harm and he said yeah absolutely so he wasn't dressed in a cop uniform but he had you know simple black clothing on long sleeves it might have been a button-up shirt I sort of remember it more as like he had a sweater a black pullover long-sleeve black slacks black shoes looked like you know a cop on duty but without the uniform very traditional looking you know short you know jar cut style hair you know you know Germanic anglo-saxon features or Irish very serious you know very willing to please the the owners of the home he stands in a foyer not a foyer a patio area the place where we were at had hexagonal windows so you could see out to the patio area outside the main entrance the main door there was a driveway and a multi-car garage on the other side of the patio area he's standing there outside and had been since the beginning he didn't come in the whole time he stood out there on guard with a firearm at his side the entire time okay inside I started talking to a couple of people who were higher level Satanists than me in this grotto which is what they called our covens one of them who was this older guy who had you know this look of you know a sort of fatter slovenly type guy I have said before on the show and in other descriptions that he looked like the stepfather of Harry Potter Dursley CAIR members first name with the father Dursley of the Dursley family looked a little bit like that i wouldn't say exactly but a little bit like that okay heavyset a little bit of a double chin that same mustache for sure hair not even his his hair looked kind of like greasy and not unkempt but you know like sort of greasy hair comb comb over you know like that and he's smoking a cigar he's drinking some wine he's eating some meats and cheeses off his plate and he's talking with his mouth full - I recall and like not like you know totally disgustingly but as he's talking he's chewing his food and he starts talking about the cop outside guarding the ritual house and he's like can you believe these dogs and I I'm like I don't even know what he's talking about I'm like what dogs I didn't see any dogs he's like oh no I mean him I'm like what do you mean the guard outside and he's like yes there are dogs I'm like what do you mean and he's like they do whatever we tell them they're just just total loyal animals to us they're our pets you know wouldn't matter how immoral the command we gave them was he'll do it so he was basically telling me we own these people you know he said we own all the police everywhere and at that point I didn't believe him I do now I certainly do now he's like anything we command them to do they'll do they'll sit when we tell them to sit they'll stay when we tell them to stay they'll attack when we tell them to attack they'll kill if we tell them to kill and I'm thinking like this rotten prick I want to kill him right now he's telling me that ultimately the the Satanists of the world have controlled all the police forces of the world I already didn't like police because I didn't really like people who don't think for themselves in order followers but to think that this cult is I didn't really call it a cult then I thought it was just you know people getting together trying to enhance their ability to get things done learn things that other people don't know so they can leverage that knowledge and do things that other people can't and my ego appealed to that that's why I joined up with them and he's telling me no we own all the police there are there are animals there are pets there are dogs you know and they'll do whatever we tell them to do at any time no matter how absolutely ruthless or immoral it is and guess what he wasn't telling a lie he was telling the truth and then he starts laughing at them he starts laughing at the guy outside and it's by extension all police and all military all order followers he's laughing hilariously and saying I can't believe how much they're dared they just don't think for themselves they just let other people totally director actions he's got food in his mouth and he's laughing I thought he was gonna choke he was laughing so hard it sound like this sick belly laugh like wall he's got food still like in his mouth or like going down his throat and he's laughing away like haha I can't believe it they're just so fucking dumb you know they'll do anything we tell him to do you know in this deep belly laugh ha ha I couldn't breathe at one point like like could not breathe he's laughing so hard at the guy doing his bidding outside the door on the other side of the window that he knew couldn't hear that's what they think of you cop that's what they think of you soldier that's what your owners and masters think of you they call you their fucking dogs they're fuckin pets and they're laughing at you so hard they could almost choke on their own laughter and you still give your mind to them you give your behavior to them and you know what you're ultimately given to them you dumb fucks you're giving your soul to them and you may not you may hear that now and go start laughing oh the soul yeah you'll find the fuck out you'll find the fuck out guess what you know the old saying there's no atheists in foxholes it's absolutely true it's absolutely true because when it comes time for you to actually leave this dimension of existence and and meet the Creator and meet the maker meet the force that they put all of the laws of creation into existence you won't be laughing boy you'll say you'll be laughing but guess what while you're dying and you're drawing your last couple breaths you won't be laughing fuckhead everybody laugh still it happens to them let's see you laugh on your deathbed you ain't that hardcore son you ain't that hardcore you think you are but you're not you won't be laughing yeah people talk about seeing people die I've seen people on their deathbed I've watched people die okay I've seen it in my lifetime you will not be laughing while it's happening to you then you'll be thinking what did I do with my life then you'll be thinking how was my behavior then you'll be thinking where am I headed in a few seconds that's what you'll be thinking or will I be headed anywhere at all okay but I guarantee you one way or another you won't be laughing when that eventualities when that definitive eventualities occurs you know you want to mock it now and mock you know creation now and say oh no that's all fairy tale let's see what your attitude is when you're actually drunk pulling your last couple of breaths and then let's see you laugh you know then I'll say oh that's a hardcore son of a bitch and he went to his grave laughing ain't gonna happen trust me you're not that hardcore if you were that hardcore you would really be your own man and you wouldn't be doing the bidding of anybody else let's get that straight you know you're not as as courageous as you think you are you're actually very coward it you have a lot of cowardice you're actually a coward because you do other people's bidding instead of the truth instead of serving the truth and serving the will of creation which is freedom not control so that's what they think of you I'm gonna have this scene drawn from my perspective of seeing of seeing the guy in front of the window laughing at the guy on the other side of the window who can't hear him and calling him our dog our pet you know and he'll reliably show up for the next ritual at the next grotto and protect his owners who look at him as an obedient dog animal right that's what they think of you and you still do it and you think you have self-respect you think you're some man you're not even a man you're a little boy with no self-respect that underwent some trauma we don't want to work on yourself to heal the trauma and so you have parental abandonment issues and this is who these are your new surrogate family this is your new surrogate mommy and daddy and you think you're a man you're a punk-ass bitch little boy son you never grew up you never work through any of the trauma that your parents caused you to their nonsense to them not teach a new morality do them ultimately abandoning you whether physically mentally emotionally or spiritually that's what happened to you son you're a little boy who never grew up and never got past the trauma a fucked up parenting and I'll say it right to your face in person and now you're taking out all your rage and aggression I'll fuck up the rest of the world and all you'll you'll see I'm who I was bullied now all bully other people I was traumatized now I'll traumatize other people in the world you're not in control of it ass you think you're in control but you're the one who's owned and they're your owners fucking laugh at you son all right that's what they're doing whether you know it or not and I don't I don't need to read about that in a book that happened in my life boy and nobody's gonna tell me it didn't that happened in my life I saw from their lips to my ears what they think of you I heard I saw it and hurt him so having said that I'm gonna have that depiction drawn by an artist that we're working with and see if we can bring it up as a slide on a future what on earth is happening let's go to some more calls before we close up the show let's go to Mitch Mitch you are live on what on earth is happening welcome to the show hey Mark can you hear me yes I can loud and clear hey man I really appreciate you taking my call absolutely so I have a well actually this call has been amazing it's actually answered pretty much every question that I had it's kind of funny how that happens but um so my question for you is how long so I've been doing this work for about four years I've been in the absorbent process just reading reading research and then helping like family members and people here and there and when I get to my computer I have like this I have all this knowledge but it's like where do I start you know that's where I'm at right now and I'm taking your course and it's actually came at like the perfect time awesome I'd like to ask you a question if I may about what you think of so far the first class do you do you think you're getting good value out of it do you think that I'm moving too fast or slow just give me your general impression quickly like quickly for the audience just to give a little bit of a you know testimonial to how it's going so far yeah it's going great I I'm gained a lot of knowledge just off that first course and I've applied a lot of knowledge I took a lot of screenshots and I've been cleaning up my desktop and good I'm just kind of like looking at my computer and seeing you know what I have because I'm very technologically illiterate you know I'm not very good with you're not going to be any longer at the completion of this seminar I can I can promise you that you're gonna know a lot more than you knew when you signed up that's all I will absolutely promise that well I appreciate that man I'm uh I'm 100% committed and this is like been a big thing for me personally like I have this knowledge and I have this you know specific voice and this unique you know gift and I'm here for this reason and when I get to my computer I'm like shit you know so your general question was where do you start okay so what are your strengths you you seem to have good communication skills and a decent voice would you want to put out a podcast what do you want are do you have good writing strengths are you an artist of some sort tell me your strengths and then we could kind of give you some formula t'v ideas about where you might want to start yeah so I've been thinking about hot I mean my voice I'm okay writer I'm pretty good but I was thinking podcast videos yeah and just like I said my my issue right now is like I get to my computer and I'm like okay there's so much shit going on in the world I are talking about you're not doing what I want so it sounds like a podcast or a video podcast would be ideal for you it sounds like you aren't too afraid of just putting your voice out there you speak well you communicate well no problem I don't think there'll be any problem there okay and I I try to gauge this and I'll be honest with people if they don't have to good in the way of a voice or communication that maybe you want to write articles you know or maybe you want to take up art or music right but you seem to have good voice good communica munication I think a podcast would be perfect whether it be audio or video that's your choice where to start is a whole different story okay as far as content now you have to decide are you going to focus on one thing or area or you're going to be a generalist and go into the whole thing so then I would say you need to make an outline clearly outlining what you want to show people so almost every one of my presentations or shows starts in a word processing document it starts in a text editor folks a lot of people are very surprised to hear that right and a simple text outline of my ideas is where anything you see pretty much and what on earth is happening begins so that's what I would recommend I would recommend you start in a blank slate in a word processor and you focus and put down your thoughts and you say I would like people to understand this first and foremost or if you have a specific target audience okay you say here's my target this is what I want them to understand here's how I'm going to tell it to them and you write your thoughts out then you can clarify yourself also let me tell you folks I'll just give you a little bit of background information how we do this on what on earth is happening I did this myself in the past and then refine those ideas when Leah came on board as my assistant what she will do is actually use a voice recorder and record what I say I will have literal voice notes taken then she will put those into a document and then we will refine the outline I'll say I this is really what I want to cover this isn't as important will outline the ideas okay in a very pretty formal outline process then I will take those notes and outline and I will start working on the presentation in the slides and I will beef up some sections and some sections I'll trim out she can help me find images or some other friends help me find images sometimes I just bump my mic I apologize for that no problem um the former caller just said he would be willing to help with images I take people's suggestions when it comes to images sometimes if I don't have an image very clearly in mind that fits with a certain part of my presentation I look up images as well or videos put them in the presentation and then I start refining it you know and it eventually becomes what it is so what I would say Mitch is to sit with a word processor and just write out your thoughts or record your thoughts take a voice recorder or record in your phone doesn't have to sound good because that's not going out right and just record into your phone and then copy that to the computer send it to your computer over you know Google Drive or something like that or you know buy via Wi-Fi if you know how to do that and take that document listen back and then take notes on it and say I can outline this this way and say here's a section here's what I want to talk about in this section that'll be the end of that section I go to the next section and then form formally outline your thoughts okay once you do that you're gonna have a much clearer idea and I'm gonna teach everybody how to do this like we're gonna go through all of that process in the class okay we will get to that in four more classes I'm teaching even bait more basic stuff than this right now and just the components of the computer the the file system etc okay how to copy and move files right you don't know how to do that you don't know how to work with the file system you're not gonna know anything about programs okay and we're starting with the very basics then we're going to move up to apps or programs so I'll teach you some work word processing we'll do word processing and editing and I'll show you how to make an outline for your thoughts we'll go into voice recording I'll show you how to do that okay so I'll let you wrap up and because we're running out of time we got about five minutes left in the show does that help you at least get an idea of where your next step would be in that process to outline and refine your thoughts and then choose the media that you're gonna deliver your thoughts through because I oh I have an outline set a basic very outline sitting right here for what I wanted to cover for this show it's only a few lines because you know I did a few slides I've read from the end of confessions of a former bastard cop that I'm going to take calls but I have a basic outline of how I want this show to go to proceed and I do that for every show and sometimes I consult it sometimes I have it pretty firmly in my head so I don't consult my secondary computer too much the secondary laptop has my notes on it okay but this is what I think you would want to do you want to formally outline your thought process refine it so that you know exactly what clearly what you want to talk about and then start actually doing that in whatever form you're gonna do it whether it be in audio form only whether it be in video form whether it be in presentation form or film you know documentary you know things like that or short form film project for YouTube or any other you know video sharing site that's how you would want to proceed so I mean what do you think regarding that basic advice and you know your ability to do it I think you could probably learn how to do that in only a few few classes that would only require a few hours of your time absolutely yeah that helps a lot mark I really appreciate that yeah thanks man no wait you know what it does it helps you to for get the message out there so you're not stumbling over things you you see it and then you put it into some formalized way of presenting it so this is how exactly how I work for my big presentations right I make an outline I say what I want to say in the outline literally write it out then I consult the outline and I start building slides for each one of those points and it takes as long as it takes and it is as long as it needs to be it's as big as it needs to be but that's the that's the procedural steps in your thoughts come first write them down get your ideas clear on paper or on digital paper in this instance then start putting them into a formalized way of presenting you're gonna reach more people like that they're gonna recognize that you took the time to do that instead of just talking off the cuff off-the-cuff right that's not a formalized way of doing it get your thoughts clear people will appreciate it they'll be able to recognize hey you put some work into this you know yeah right and I've been living kind of like so spontaneously that's what I've been doing just kind of like you know letting the energy of the moment dictate where my you know conversations gonna go what topic is gonna be talked about you know I haven't really sat down and organized it and you know really you know contemplated it and thought about it for too long I'm just like oh I'm just gonna talk to this person based off where they're at you know and that's that's true that's good that's good but like to have even like what I got from what you just said was like even if you have a few words you can say oh this topic of you know police that I can talk for an hour but hour hours and hours about that just having that written down somewhere you know where and then and the other thing you mentioned is you know if you're talking to somebody one-on-one they don't have the prerequisite knowledge so you in that instance you might say well you can't really understand the totality of what you need to grasp about this topic until you understand some things over here that we haven't even talked about or discussed yet that's why I did a very painstaking long-form introduction to all the topics you know and went over for weeks if not months because without all that prereq was a ground work nobody's hardly anybody's gonna be able to hear what I'm saying now especially in the you know passionate emotional state that I sometimes say it because of how badly our freedoms are being totally trounced you know so I had to do all of that set up work and that's why I always highly recommend people to start from the beginning what you have to decide for yourself is what works best for you we're going to focus on one area are you going to teach general principles of philosophy and morality you know are you gonna go back cover a lot of ground like from square one are you gonna like focus on just hey health and nutrition might be a Forte that you have you know we're gonna talk about you know how to resolve trauma you know there's so many different areas that you could go into and so many different ways that you could approach it but it all starts with clarity of thought knowing what you want to talk about knowing who your target audience is going to be and then putting the an outline of that on paper and then working from that outline that's how I start everything I do here so Mitch I hope that helps and I really thank you for your your call in - what on earth is happening ladies and gentlemen mark you got it ladies and gentlemen that's just about all the time that we have for this edition of what on earth is happening I thank you for watching ladies and gentlemen remember government is slavery that's not an opinion that's not Sol abscissa that's point of fact reality in nature and it is our great work to teach that to the masses at large that's all for this edition ladies and gentlemen we'll see you right here next week thanks for

What On Earth Is Happening Show #231

freedom man that's what it's all about you've got to groove on freedom like the good book says [Music] welcome you are listening to what on earth is happening this show will discuss the topics of human consciousness mind control natural law the occult and all issues that affect the freedom of the people of earth what on earth is happening will endeavor to shine light upon the darkness of our world and to offer empowering solutions to the problems we face as humanity approaches its critical moment of choice and now here is your host mark pascio [Music] welcome one and all you're watching what on earth is happening i'm your host mark pacio my website what on earth is happening dot com ladies and gentlemen government is slavery and here on what on earth is happening we are ending slavery one mind at a time welcome everyone thank you for tuning in today is sunday july 19th 2020 this is episode number 231 of what on earth is happening and today is an all-call-in show today the topic is your calls for any questions that you may have and any clarification that you want me to explain regarding any topic that has ever been covered on the entire what on earth is happening podcast series so if you have ever had a question that you want to ask me personally today is the day and we will do these call-in shows periodically from time to time i am also introducing a new email address for questions because you know my inbox gets super super crowded and i don't have time to get to all those questions i'm isolating questions now with a new email address if you have questions you can also send us an email to questions what on earth is happening dot com and i will keep this inbox permanently and i will field some of the best questions from there for uh highlighting on future shows so let's jump over to my slides take a look at the artwork for today and i'll go through a few slides before we begin thank you to brett and the graphics team this is show 231 there's the title card a couple of quick announcements we are still accepting donations for my premier documentary film entitled mark pacio and the science of natural law it's coming along great we are really on target with this thanks to your generous donations we have five donation tiers at gifts.what on earth is happening.com all donations go to production costs all donors receive a free copy of the documentary on flash drive and dvd please do not use the regular donation page use gifts to make a donation toward the documentary okay gifts.waternothishappening.com and then you can click on documentary and then you will see the donation tiers there also at gifts we have new t-shirts including the mark pacio in the science of law design science of natural law design and we have new long-sleeve t-shirts and three designs so all t-shirts are back in stock you can get them at gifts.what on earth is happening.com along with my latest presentation that i delivered as part of a teleconference out of madrid spain which is entitled worldview violence and the real pandemics again another popular item that we've been giving in return for a donation is the complete mark pascal one great work collection solid state drive that has all of my publicly available work all on one solid state drive it's been a pretty popular item people are really getting a lot of value out of that so all of that is available at uh ford voluntary donation at gifts.watonearthishappening.com it's a way that you can help fund our efforts here at walden earth is happening i announced last week that we are now proudly working in cooperation with the autonomy unlimited group and um this is the brainchild of richard grove of tragedyanhope.com i've been working with richard for a while he is the gentleman who uh he and his crew recorded and edited and released my natural loss seminar so if you want to check out more about the autonomy group i highly recommend it you could check out getautonomy.info the how to become the true media seminar is ongoing last week was our second class it went really well we had a lot of good discussions and questions uh i've gotten a lot of good positive feedback thus far i trust that i am moving at a pace that is acceptable for uh total beginners novices and intermediate people alike um class number three is going to be this coming tuesday july 21st the webinar is launched at seven o'clock p.m that gives people one full hour to come into the webinar class instruction begins promptly at eight o'clock p.m please be on time or you might miss important information that will not be repeated during the course of the class so people were pretty good about being on time last week let's keep up that good habit i always recommend to keep a notepad handy for taking notes and questions and then again people have seen i stop you know relatively uh at frequent intervals to take questions during uh the class time and then we can also continue with some questions and comments at the end i've been uh basically keeping the seminar the webinar open for at least an additional two hours after a formal class instruction ends at 11 pm headphones are recommended if you want to interact with the class if you don't want to interact at all or ask questions you don't have to use headphones but if you want to interact with the class please make sure you use headphones to eliminate feedback or echo if you have any technical problems or any other issues regarding the how to become the true media seminar if you are an enrolled student please email truemedia waltershappening.com and we will do our very best to field any questions or concerns you have as an enrolled student so once again this is going to be a question show uh cl a a request for clarification anything that i have ever talked about on what on earth is happening is fair game uh you can i i'm gonna ask people please do formulate a question okay or formulate a question regarding a clarification that's my only request for you as someone who is calling in today okay please have your question ready okay it's not a long comment that we're asking for or feedback i really want to field questions so it's a show for you to ask questions of me and then allow me to respond and clarify to the question that's really what we're looking for here today okay as always we take our questions via discord we take our calls via discord so if you want to call into the show via discord you can go to what on earth is happening dot com slash discord i'm also showing that we have that here in the lower third i'm also showing that in my slide if you go back to the slide you can go to uh download discord at discord.com app get the discord app i highly recommend the app not using it over the web okay when you join the server with that link at the bottom what on earth is happening dot com slash discord you will then read when you go into the um server room uh the um the text chat has the instructions for the room please read them thoroughly definitely use headphones okay we don't want feedback coming over the air or echo coming over the air and uh just follow those guidelines on the discord text chat okay discord is a very easy app to use it's come a long way actually it's gotten a lot more robust and i feel user-friendly so once again if you don't want to use that and you just want to email us i'll be monitoring email during the course of the show okay you can email questions or clarification requests too questions at what on earth is happening dot com this is a brand new email that i just set up and uh if you have any questions or clarification requests you can fire them off to that email address and i will perhaps take some email questions as well today all right that being said let me put up a few slides while we're waiting for some people to join the discord server or send some questions off to the questions email okay so you know i've been taking pot shots at all the people that believe in the nonsense of the covid19 psyop okay so you know i'm uh you know putting this one up which is a meme that i came across this week in my uh internet travels it says it's two amish guys talking says i wonder why covet has not affected us and the other amish guy is replying because we don't have tv and i asked the question if nobody paid attention to the lying horror media the lying whore mainstream media of the major networks and the major you know mainstream websites how many people would even be aware that anything different has occurred in society it would be business as usual there would be no higher alarm there would be no higher danger there would be no higher death rates than happen any other year all around us the only difference is that the media is telling you to be panicked and afraid that's the only difference the mind controllers and their little pets called the mainstream media you little whore pets okay just absolutely lying for a paycheck because you had garbage for parents and as a result your pieces of trash garbage you lying whores that's all it is that's all you ever are that's all you are it's all you ever have been and probably all you ever will be in your useless miserable whore lives okay and you're just lying to people for a paycheck and dumb people believe you and that's all this whole thing really is folks you want to really come down to it get as offended as you like it doesn't mean i don't care about other human beings i care about actually the truth and human freedom and what's going on regarding human suffering probably more than just about anybody on this planet okay so don't pin that bullshit guilt on me it won't work on this one because i know what my true emotions are and you don't okay so don't ascribe your nonsense to me and and you're um you know a virtue signaling to me because i know what real virtue is i know what real rights are i know what real morality is and most people don't okay so you know i'm gonna continue pointing out the hypocrisy and the virtue signaling and the nonsense because people believe the bullshit mainstream media all right and it's 2020 and it's too far too late in the game for people to still be accepting the word the the the completely tainted word of the same people that told us there were weapons of mass destruction in iraq okay the same people that told us that iraqis were put taking babies out of incubators to kill them the same people that told us that smoking cigarettes was perfectly healthy the same people that told us that spraying ddt on children's heads was perfectly fine as a disinfectant method and on and on and on the lying and lie the same people that told us that jeffrey epstein killed himself you still believe these horror liars you they're horror paid liars and people still believe them wholesale and just do an experiment go into a population center okay not don't go out into rural america go out into a deep population center a city okay where the bulk of the population is at we're like 85 to 90 percent of the human population in america is at go into a populated region and start asking people if they actually believe what the mainstream media says and if they are trying to tell them the truth do this as a social experiment if you don't believe it from me if you don't accept that it's the truth i've done this i don't need to believe anything because i've done an experiment social experiments with people with my friends we have gone out into populated centers and asked them if they believe the mainstream media and the results that we've gotten are so horrifying that almost every single human being has said yes we believe that the mainstream media is trying to do their best effort possible to bring the truth to the american public they believe that these little naive children in consciousness doesn't matter how old they are doesn't matter whether they're 15 years old or 90 years old it goes up in every age range they believe the media is telling them the truth that's how naive the american public is and you know mo people can make the case oh it's getting a little bit better yeah but not that much folks and certainly not that fast okay so you know this is where we're at you know here's a here's a a facebook post that says there would be no division over mask wearing or social distancing etc if if the official story was true if the official narrative that the media is pumping out there were true everybody would know there was a real threat and they would do they would all do it voluntarily to protect themselves there is an artificially created non-crisis so there is pushback exactly i call it a socially engineered perceived crisis that is my terminology for the covet 19 psyop an artificially induced socially engineered perceived crisis not a real crisis or a real true truly dangerous high death level health threat because if there was people would take the mitigation efforts necessary to protect themselves it's a bullshit story from the mainstream media and it always has been from day one to make people afraid so more freedoms can be taken away secondly the way the contagion is alleged to work is not the way it really works truly scientifically there is an unbelievably huge body of new scientific evidence coming out from cutting edge scientists and scientific institutions who have a vested interest in telling the actual truth that do not care about government grant money funded science or science that is propped up from modern scientific institutions and universities that only focus on government grant money and tenure so their ego is not in the way of new emerging truth okay and i am going to cover some of that talking about what the entire exosome concept of purging of toxins and how that looks similar to what we call a virus the entire model of disease transmission has to be reevaluated in the scientific and medical communities and it is being done that is actively being done you just don't hear about it in the mainstream media because they're paid whore liars and if their masters don't tell them to cover something it's forbidden and it doesn't get talked about that's how it really works whether you understand so or you remain ignorant of how it really works but that's how it really works okay and my world view is not informed by dumb people's uninformed ill red opinions i inform my worldview and my understanding by reading cutting edge scientific articles in true scientific in institutions journals that is how you get information regarding new emerging cutting edge fields of science and i do that because i have a scientific background and i keep abreast of new scientific discoveries most people don't do that so they're dumb ill-informed ill-red human beings that only have a dumb uninformed ill-red opinion of something that the whore-lying media told them to believe that's not me i don't my mind doesn't work like that and if yours does you're unqualified to tell me i have to adjust my world view according to your dumb shit for brains world view and i'm not going to do it and you're not going to intimidate me into doing it you got that good get it and understand it okay so let's continue another great meme going around the most dangerous habits in the world today aren't drug habits they're ideological habits unexamined ways of thinking about reality this is exactly the case people have uninformed opinions and aren't concerned with determining truth through the truth discovery methodology known as the trivium which is the true scientific methodology and the true liberal arts education methodology most people don't give a damn about that they don't know how it works and they certainly aren't employing it they start certainly aren't using it to discover true facts okay they have a completely unexamined way of thinking about reality and that way of thinking about reality is given to them by social engineers and they're paid lying whore pets called the mainstream media and if you don't understand that's how the world works by this point in time you're a naive child and i'm not here not to insult your delicate sensibilities and emotions i'm here to tell you hardcore truth so get as offended about it as you like all right so that's the truth about what's going on in the world the most dangerous habits going on in this society is uninformed ways of thinking that people stay religiously attached to that's why religion is the one and only problem in the world and religion doesn't mean the cultural religions it means ways of thinking that do not serve where we as human beings say we want to go that's what it means there are wrong ways of thinking that are false and untrue that totally block us from our stated objectives and goals as a society like freedom and justice and getting out of ways of being that cause suffering for everyone we're never going to get to those places because those things have prerequisites we'll never get to them until we change our thinking and that informs our behavior and as a result we change our ways of acting and when you tell people that they say screw you we want nothing to do with that because we want to point to the outside world and say oh there's the problem but we don't want to do this and point to ourselves and say we're the problem nobody wants to take on that personal responsibility for themselves they want to point the figure out finger outside of themselves but never right at their own face never look in in the mirror and say the problem lies with me and it's my personal responsibility to change my thinking and therefore change my behavior so moving on here's what we should really be focused on because this is what the whole psyop is geared to take our attention away from it's all geared to take our attention away from the highest level power brokers in our world being pedophiles this was all emerging during 2016 and and and after and boy oh boy did the mainstream media put a kibosh on it at the request of their overlord satanic masters the masters of society said hey we gotta stop all of this emerging information coming out about how we're all pedophiles and this is ultimately our form of money yes ladies and gentlemen the power brokers of the world don't give a damn about paper money they don't give a damn about electronic credits on the screen they don't give a damn about golden precious metals ladies and gentlemen their true money is children for sex and murder make no mistake about it and if you haven't understood that you're also a naive child in your consciousness and this is what it is all about distraction from ladies and gentlemen and ultimately it's about distraction from the understanding of natural law the understanding of the dark occult and how it rules society through mind control and it's a it's also about a distraction from these people are a child trafficking pedophile cult at the highest levels here's a nice cute picture of jeffrey epstein in his house in the middle of the image known pedophile who did not kill himself trafficking children to the elite of the world as a scapegoat so if it ever gets discovered oh here's the low-level punk who who oh we can blame it all on him no he's just the patsy he's just the low-level initiate he's one of the you know uh you know helpers of the true vampires that's all you know he's one of the golems doing their bidding here's james stanley at the left a former uh jp morgan jp morgan a banking group executive next to him on his left your your right is the former treasury secretary secretary of the treasury under the clinton administration larry summers satanist pedophile okay then of course epstein in the middle satanist pedophile then you have gates right next to epstein bill gates mr vaccinate the world you know mr i'm a philanthropist but i'm also a eugenicist who wants to call the human population yeah sure you are bill you're a little punk bitch coward nerd and that's an insult to actual nerds you know you're you're a little punk bitch insecure button dick little boy is what you are how's that okay that you want to take out that you never really experienced any care from people around you any true love and you're a little psychopathic bitch boy that thinks now you're god and you're in the big club guess what guys you guys aren't even really in the big club pictured here you're little low-level fucking puppets who will get thrown under the bus at the first opportunity you little shits you're a little shit nothing who when you do the bidding of your masters you're going to get thrown under the bus as soon as they don't need your little lackey clown asses anymore okay and you're too dumb to know it shithead you're too dumb to know how it really works boy all right i told myself i wasn't going to get real nuts in this episode folks i just came back from a little mini vacation i went down to the jersey shore to try to relax you know with some family and just you know get out in the sun for a little while i'm trying to tone it down i'm trying to get it you know get my emotions on the wrap and not affect my health with my rage because it you know it gets considerable and it can start to affect your health for the negative so i'm trying to contain that a little you know but guess what i you know i get angry how many people still don't understand this next to gates uh is boris uh nikolic who was the bill and gates foundat uh the billmon the gates foundation science advisor okay so it's all a big club you ain't in it you don't understand that these people serve the true elitists of the world and they're they're all involved in child sex trafficking and pedophilia next slide sorry guys i accidentally hit that twice you think the wayfarer scandal is bad wait until people start waking up to what this picture means and you know for people who don't know what the wayfarer scandal was you know that was all about potential child trafficking because it's like you know a company that sells like you know different pieces of technology and they're all basically very affordable until you get to some of their interesting file cabinets that have absolutely no technical reason for being more expensive than other filing cabinets except they're selling some of them for upwards of ten and twenty thousand dollars because it's not a filing cabinet they're selling they're trafficking children through it this is a classical example of how child trafficking works you could find luggage on ebay that you know sells normally for a couple hundred dollars and people are selling it for like thirty thousand dollars because it's not luggage that they're actually selling it's a it's a listing for the trafficking of uh kidnapped children so what this society is it's it's known in the dark occult world is the red shoe society if you look that up they've hidden it very well under the guise of being some type of a charitable organization that is underneath the ronald mcdonald house because they care so much about you know um handicapped children sure they do yeah they care a lot about small children because this is an image of the the satanist in the middle and child trafficker in the middle right on the right hand side in this image of the blonde woman is anthony podesta john podesta's brother john podesta was the campaign advisor of hillary clinton during the 2016 presidential campaign and podesta is his anthony podesta is his brother they're both known pedophile criminals you know satanists you know child traffickers and here's an image from one of his favorite artists okay he has these sick twisted artists we're going to show you some of this imagery you could research it you could type it into google images you could type it into any image search you want to type it into duckduckgo images whatever okay and this is what this is all about this is an image of one of their rituals where they hang a child from his arms in a pool with no water okay the side of a swimming pool with no water in it now what do you think and then below it go back to the slide below it there's the shoes okay well what do you think's coming next and you'll see that his bathing suit is red you could see all kinds of images with little girls sitting with red shoes on the edge of a pool with no water on the on the ledge okay no water in the pool bound in most cases hanging on the on the ledge and then their shoes below them because they're going to gut the child either at the the neck or at the intestines let the blood drain down onto the shoes or perhaps cut the femoral artery in the leg let the child bleed out onto the shoes and then they continue to dye them red leaving the bloodstains in them okay that's the sick twisted rituals of this satanic cult that runs the world this is how the cult operates and they do worse because occasionally they will make these shoes for higher ranking initiates out of human leather they will flay the face of the child by cutting with a scalpel at the hairline of the child and then they will pull the skin down over the face flaying the face and exposing the skull allow the child to die like that and then make shoes from its skin of its face you want to know that's how how bad it goes that's the extent that it goes to ladies and gentlemen and worse and worse than that and if you don't believe it gets worse ask my friend jay parker where it goes who witnessed these rituals personally ask my friend and colleague kathy o'brien what happened who has razor carvings in her own labia from this sick satanic cult from the torment and torture she endured my friend personal friend jay parker has neurological issues because of being hit with cattle prods the electrical shots from cattle prods that cattle the cattle has hit with to push them into their slaughter pens okay so this is nothing compared to where it goes to how sick this cult is back to the image you know these people are proud of it if we could switch back over to the slide please these people are proud of what they're involved in they're laughing about it and some of them know and some don't but i'll tell you what the ones that know are laughing right along with anthony podesta who certainly knows what it's really about and folks we could go on and on with this i'm going to step out of the slides momentarily let's switch over to my web browser okay yeah switch over to the to my web browser okay here's some of the art that comes up as a as a result of just a simple search podesta artwork you know here are some girls you could just look at the image okay again in a pool with no water often you know you'll see the the um uh binding implementation of ropes or chains and then look at them all covering where would be the anus you know little children stripped down and with their hands in that position because what it symbolizes is going to be rape and torture and eventually murder you know this is this is the sick artwork here's anthony podesta in his own home with a uh a sculpture of the murder of one of uh jeffrey dahmer's victims who was depicted like this in the home of jeffrey dahmer headless and in this sick ritualistic position of forming a loop representing this will be endless we will always get away with it and it will be forever that's why he's positioned like this it's a symbolic uroboros meaning it's eternity it will go on and on and on and on and on and we will never be brought to justice okay and then you could just keep going into this artwork you know you get to sick things like this with people dressed up you know as animals you know there's that image i just showed you children in cages on the backs of human beings dressed as goats humans raping children here look at this one this is one of this is one of uh this is from the artist rhea pratt who depicts a lot of this pedophilia and uh child torture and sacrifice and if you read about rhea pratt who's one of the podesta's uh favorite artists she has multiple personality you type rhea pratt art you can go into all of her artwork and it gets sicker and sicker and sicker and sicker okay but the podestas love this you know here's an article um from you know from a magazine the woman who shares a body with 14 different artists because she has did dissociative identity disorder which was formerly called multiple personality disorder okay so you know because she's probably been through this satanic ritual abuse and she constantly depicts children chained up being tortured you'll you'll always see this half image of the child in the same position that represents them being dissociated from the experience it could also represent them being killed and the spirit you know being released from the body but it's largely about dissociation you can keep reading about you know read all about that in an article like that i'll link to it okay um but look at some of her art you know i mean you look at something like this one here okay and it's a child being raped when while being held down by another person but then you see the the there's beings in the image who are halfway in and out of reality and this could also this can be be a depiction artistically of entities that are really controlling the physical beings this could be the entity who's actually controlling this body you know this could be on the other side of the bed the entity that's controlling this person holding the child down okay and you can see this over and over and over again here's them torturing a child often they'll use electronic methods of torture okay but it's some sort of a sexual act stepping on the child and then there's the child's body dissociated and or in the process of dying look at this one children being laid out on tables the dissociated or dead images spirits of the children and then dark beings all around it you know these don't even look like human heads okay and you can go on and on and on and on here's the use of cattle prods often described by you know people like jay parker when they talk about the satanic ritual abuse methods okay and then again of being in the same position as the being doing the torture with the child chained up in probably a pool with no water other children covering their ears why is he covering his ears because he's hearing the electrical discharge of the cattle prod which is extremely loud you ever hear a taser discharged you ever discharge a taser yourself and hear how loud it is well imagine a cattle prod and how loud that discharge is so it's almost deafening especially to a child so they're in a fetal position recognizing traumatized by the torture and with their hands over their ears and then you know you see the electrical discharge of the child who's chained up and you could go on and on and on and on and on you know and this this is their rituals this is what they do ladies and gentlemen you know here's a rape with all these other beings feeding off the energy and the child dissociating and or dying and you could go on and on and on with it and this is what the podestas revere they revere stuff like this okay they have it all hanging in their home you can go all you got to do is type podesta artwork you know and it's not by them it's what they put inside their own homes you know demons hugging little children you know sick stuff sick stuff folks this is what they're into all right that's what we're being distracted from with the covet 19 alleged crisis okay this is what it's all ultimately about folks it's not about anything else it's about because it was coming out publicly this is what the whole fake media narrative came out of this is what the whole russian collusion narrative came out of that this is the cult that runs the world you're not in it and this is their practices it's described by a ton of people it's been described by children it's been described by hollywood insiders that have been the victims of the cult that back to the slides because i'm going to move on now okay and then we're going to go to calls but this is a low-level part of the club this isn't even as high as it goes you think the podestas are as high as it goes they're low-level minions rank-and-file minions who at the first sign of any trouble will be the first people thrown under the bus like their buddy jeffrey epstein you know just to detract attention and make idiots who don't know any better think oh that was just some sick person who formed a child pedophile ring on his own no it goes up to the highest levels of power in society all the way up to the highest levels of government and beyond to the real power structure through the shadow government or deep state and up into the high levels of the dark occult the real mind controllers and social engineers whose names you'll never hear moving on this uh individual angela king is running for in discord we apologize for the delay all right folks what happened was our streaming software seems to have uh crashed out on us i apologize for that it looks like we are back broadcasting again uh you know hey when you start to talk about this stuff folks look at what magically happens hardly ever a problem and now you know our stream goes down in the middle of talking about this it's very coincidental don't you think you know no it's just a coincidence folks you know it's just a technology problem don't worry about it nothing nothing to see there back to the slideshow okay if you can uh please adjust my monitor there full screen thank you um you know uh this uh potential candidate for the house of representatives is saying this isn't about covid 19 or black lives matter this is a major cover-up for pedophilia and human trafficking amen amen hey this woman understands great you know let's try to get the public to understand that and then another piece of social media not from the same person please don't confuse it this did not come from her just a different you know slide i wish people cared more about who's trafficking children and who's wearing a mask amen amen because mask wearing doesn't do anything to really slow the spread of a contagion period certainly it has nothing to do with what what we're calling a virus is which is actually an exosomal process in the body which is about toxin removal contagion does not occur the way you think it occurs you want to keep believing that you're believing in what is essentially what essentially amounts to disproven old science and old scientific theory that's what it amounts to you're not privy to the new shit man as the dude would say okay as the dude said on uh the big lebowski movie you're not privy to the new shit man okay you aren't reading the new science you aren't looking in the new scientific journals you aren't reading all the new articles you're going according to disproven outdated old tired science methods that now are actively being disproven in the s in the real scientific community you know there's another thread that was floating around out there there was about scientism quoting my quote about scientism saying scientism is the belief in science as the only arbiter of truth that you cannot ever obtain truth about anything in the world but accept scientific institutions and people want to hear what they want to hear about that they want to think that that means there's no such thing as science no i firmly understand that there is such a thing as science and scientific truth i am not knocking science folks what i am knocking is scientists that do not pursue the truth scientists that stop halfway up the mountain and say there's nothing more to see here there's nowhere else to go when they don't have the truth in hand because of their tenure and their money and their position and their ego you think scientists aren't human beings selfish human beings selfish egotistical flawed human beings like everybody else if you think that you're a naive fucking child just like them to place your faith in scientific institutions and scientists as if that is the only arbiter of truth in the world you're a naive child and you are a believer in a religion just like lunatics of cultural religions are a believer of religions you're just as fundamentalists as fundamentalists christians jews or muslims are just as fundamentalists it's no different of a religious belief system to believe in science as the only arbiter of truth to believe in scientists and scientific institutions science okay if you have firm true science and scientific methodologies in hand and you've come to an accurate understanding of how the laws of nature work then wonderful fine then say this is the truth and you don't have to be worried about you know putting out dangerous information and or information that if other people graft onto they're just spreading more illiteracy and non-awareness to other people and getting them to graft onto it like it's the the gospel truth and it's not that's what i'm calling scientism and people don't understand the difference between the two there's a difference between science and scientists there's a difference between science and scientific institutions get that through your thick fucking skulls folks there is a difference between those things and but yet people want to hear what they want to hear past yours anti-science you know no i'm firmly for science and firmly against dumb religious belief systems that have nothing to do with truth or knowledge i am for the true scientific methodology of truth discovery through the trivium process or the liberal arts education process or the true scientific method not believing in something because some scientists said it not believing in something because some scientific institutions said it they're driven by money and ego they're driven by tenure and position in society just because they say it doesn't make it the truth you have to research eclectic understanding you have to research eclectic publishing eclectic information and then come to an understanding by using the trivial process and weeding out the logical inconsistencies and understanding what potential theory and or explanation and or hypothesis makes the most sense in common sense and understanding according to real scientific methodologies that's how real science does it not science funded by money that's not pursuing the truth that's funding the biggest paycheck and you don't think that that's how it works you haven't been in science you i i worked in scientific institutions in my life i saw how it worked from the inside most people have never ever been in a science institution you've never walked into one let alone worked in one for years you don't know what the fuck you're talking about if you think that's not how it works okay i worked in scientific institutions at scientific and medical research facilities at major ivy league universities worked inside of them and saw how the process worked from first-hand perspective with my own eyes so you're not gonna tell me how it fucking works because most of you know exactly shit about it and i've been there and i saw it with my eyes and heard about it from their lips to my ears and saw it saw how it's really run and you don't think you think they pursue truth above money you're a naive fucking brainless child is what you are okay i heard them say don't dare look for a cure for this there goes our grant money and we'll all be out of a job and if you ever say the word cure again you'll be looking for a job i'll make sure you'll be looking for a job you'll be out of here so fast your fucking head will spin heard someone say it with my own ears so don't tell me how quote science works and how they're holy and how they're so worried about what the truth really is and they give a fuck about you they give a fuck about lying in their pockets with government grant money so they can put another lexus in the driveway that's what they give a fuck about i don't care whether it's your family member i don't care whether it's your friend you don't know how it really works boy you don't know how it really works girl and i do could have your dumb uninformed ill red opinion i lived it i was involved directly with it and i know how it works for real and you don't i'm not going to listen to someone shithead opinion when i've lived it in my own life and saw it firsthand you're not gonna tell me what i've lived and what i've experienced you know i'm not taking bullshit from people okay that's the thing some dumb fuckers are gonna come and tell me that's not how it works the media told me or i just believe these people you're a dumb fuck boy you don't know how it works because you weren't involved and then other people who are real super low level who have never seen it up at any higher level i worked with department heads at major universities at ivy league universities okay i saw what their fucking sick fucking satanic twisted egotistical egoic selfish fucking psychopathic mindsets were first firsthand every day working with them you don't know how it really works you just think you have an understanding of it and you have a dumb uninformed fucking opinion about it all right here's what's really going on whether you understand it or not this is about distraction this isn't about anybody caring or giving a shit about your health it's about distraction from the one big cult that you ain't in child you ain't in the big cult that runs the world even the people who think you made it to the big cult you're a low ranking shit minion that they could give us shit about and when the first sign of trouble rears its head and the high ranking members are in trouble you're gonna get tossed like a piece of dog shit under the steamroller you dumb fuck that's what's gonna happen to you people who are doing these people's bidding thinking i'm gonna be insulated i'll get a kiss my ass card and then i'll get off scot-free or i'll be the last person fed to the big monster i'll be the last person fed to the big beast no you'll be the first one fed to them so you so they don't know how it was all put together and done behind the scenes they'll feed you to the big beast they'll throw you under the big steamroller first you dumb fuck that's how it'll really work but you keep going and doing their bidding and you'll see what's going to happen it's already started happening take a note from your boy epstein okay that's what will happen to you and some people say oh no they just funneled him off maybe more likely than not they took him into a ritual chamber and cut his fucking throat okay that's more likely what happened so he could never talk they probably gave him the colombian necktie you know to say this what'll happen if anybody and showed it to their other members and said this little happens if you ever talk cut your tongue cut your throat and pull your tongue down through the opening in the throat that they just cut and and let you die bleed out like that okay that's probably what they did to epstein more likely than not and showed it to all of their other membership and said that's what will fucking happen to you if you open your mouth about what who we really are what goes on because you know what and again folks whatever you say about mel gibson it doesn't matter whether you like him you don't like his politics you don't like the things he says it doesn't make a fucking difference he has been trying to tell people the truth about certain aspects of this cult and this agenda for over a decade like myself over 10 years ago everybody thought mel gibson was crazy here's a quote from him over 10 years ago hollywood is an institutionalized pedophile ring it is a den of parasites who feast on the blood of children every studio in hollywood is bought and paid for with the blood of innocent children that's exactly right no matter what you think about this person no matter how you feel about what how good or nice of a person he is it doesn't matter that's a true statement and what they're making from that blood that they let drip out of traumatized children is adrenochrome which is a drug that forces cells into a younger state it's not a total fountain of youth that will keep you young forever but it makes people like marina abramovic who's 73 74 years old or whatever she is look like she's in her early late 30s early 40s you know okay so these people know what they're doing they know how to cover it up they have the media at their disposal they have the financial institutions at their ex at their expo at their disposal and they own the police and military call them their pets their animals their dogs that's how the cult rolls and you ain't in the big cult and all the people who think just because you're being given the marching orders of the big cult you're not insulated from them you're a little dog pet that they have on a leash that at the first sign of them being in trouble like pedogate coming out publicly because of the release of the podesta emails and showing their child trafficking and showing the symbology and code words that they use they will throw you directly under the bus like they did with epstein like they did with maxwell you know let's see how if jaslane maxwell talks or sings like a canary and we'll see what happens it's going to be interesting to see how that plays out more likely than not that woman will never see a jury stand mark my words the woman will never see a witness stand something will occur whether it be a murder whether it be a poisoning whether it be some type of thing that they're going to attribute to a natural cause of death or or say that she got coveted 19 or whether it's a natural disaster something will occur and this woman will never see a witness stand mark my words they the cult will not allow it to happen okay so that being said i'll just go through this and end this so we could just take calls for the rest of the show if you want to pick up a hard copy or t-shirts or anything like that go to gifts.waltonearthishappening.com all my presentations on flash drive and dvd hard copy they're all available for free except my latest one which will be free relatively soon we have men and women's t-shirts flash drives dvds no coasters right now we're working on getting some new coasters made we're going to have some awesome new coasters made really soon it was a popular item but we ran out we're going to have some high quality wood burn coasters coming out real soon new higher quality ones than the ones that we brought forward in the past key chains button stickers like little novelty items okay so check it out all at gifts.waterearthish.com these are donation gifts there's no sales here these are this is not commerce we uh make these hard items hard copy items available for a donation to the wallet earth is happening dot co dot com cause okay that's all it is a donation and then we will send you a free complimentary gift in return for your voluntary donation if you want to make uh if you want to get the arc drive the arc drive is an incredible collection of research data that i am asked and that help me to come to an accurate whole picture understanding see so many people out there have an incomplete picture they don't know how it all fits together folks it's the number one comment i get i wish i had a bigger picture understanding or mark you helped me to develop a bigger picture understanding you put the pieces of the puzzle together for me in my mind i saw a little piece but i couldn't see how it was all connected okay that's what i helped do i'm an aggregator of information i put the information together the arc drive is my offer of all the best research that i am asked over the last 20 years i put all the best stuff on a hard drive you send me a drive i fill it up i send it back to you okay all the details are available at what on earth is happening dot com slash ark okay a hard drive a one terabyte hard drive you can purchase yourself on any technology store for as little as forty five dollars today okay and and and you follow the instructions for this offer and you will get all the research material okay what on earth is happening dot com slash ark get the arc which stands for the amazing repository of knowledge get the whole picture don't stop with a halfway picture of understanding of our current world and our current human condition if you want to make a straight donation to the water on earth is happening cause there's 11 ways of doing that at what on earth is happening dot com slash donate we have paypal patreon venmo five or six different cryptocurrencies i think six cryptocurrencies or you can donate to our amazon wish list in which i post a few technology items that we require to keep things going smoothly here at walton earth is happening and you could take a look at that if you want to make a technology donation many people have done that as opposed to making any type of cash or cryptocurrency donations and i think it's a great way of donating to the cause because you know what it's going toward right up front and you purchase it and then have it shipped to us here at the walton earth is happening headquarters all right so that's all we're going to go to your calls and questions now questions are already pouring in via um email so we may have some of that but i'm going to go to some discord calls first let me get my headset on which is required for me personally to hear the discord callers all right let's go let me switch out of my slides and go to discord uh show me that one more time my producers get my attention okay great all right let's go to discord let's hear from luca from germany luca you are live on what on earth is happening from germany welcome uh luca are you there just on mute your microphone from your end let's give you let's give luca a minute to do that luca you're live on what on earth is happening unmute your mic and go ahead all right lucas seems to be having some technical issues i'm going to skip him we'll come back to you all right let's go to um let's go to um one shoe one shoe you are live on what on earth is happening welcome celebration can you hear me already absolutely loud and clear oh bro so good um man i i called a long time ago and i didn't get i didn't do the discord thing right and you called on me and i was like damn it it happened anyway it's a learning experience like anything else but you were persistent and you made it you got through uh celebration yes thank you so much for for all your everything bro um i i wanted to say a couple things about what you were just speaking sure and then i do have some some clarification questions i would love to get out maybe we could just do them kind of quick absolutely um about the pedophilia thing just a little story to demonstrate how uh how how mind control at least people i know are i i was traveling with a friend playing music lots of long drives and he told me about his brother raping his sister as a child wow and how angry he was and how much he wanted to he didn't know what to do with his brother and so on he had all this fuel and fire about it and the next day the topic of pizzagate come up and he was in complete denial about that as even a possibility of course so so i i and i didn't say anything at the point i was just like wow how could you tell me about your brother and then imagine that these people you have no idea about you have no idea how many children and even adults go missing every year that end up being part of these types of satanic ritual abuse rituals and murder rituals you know i very rarely bring up any other researchers on the air because generally i leave their work to them but um you know i encountered a researcher and actually met him at one point who wrote the books called missing 4-1-1 i can't even recall his name off the top of my head but i brought this up to this researcher who wrote this series of books which is sort of like an endless mystery that goes nowhere that is about like we have no postulation for how this happens we only know that it happens who's a former police officer which ties very nicely into my uh former um you know information regarding the police and their supporters who i brought up satanism to and he had such a convulsive negative reaction that satanism could be involved in any way whatsoever with all of these missing people that go missing from national parks and you know it makes me think he doth protest too much if you take my meaning right the people who are going to have the most vicious convulsive adverse reactions to bringing up that this might be cult activity at high levels then when i when i actually brought up satanism isn't what you necessarily think it is it isn't you know teenagers burning fires and sacrificing animals out in the woods of the national forest it's very orchestrated very organized abduction for the purpose of high level rituals at highest levels of government highest levels of institutions of power throughout the world and a lot of people who you think are on the good team might be in that cult and on the bad side like police military bankers judges politicians etc okay and you know what his he actually actually i'm not talking about figuratively ladies and gentlemen and if anybody could bring up his name i'll say it on the air because i really don't care okay and i'm not trying to quote embarrass anybody i'm telling you we this caller has brought up denial i've never met a better example of denial than an alleged researcher and i say alleged because again he sets up his tent on the side of the mountain before the ascent he says i'm going to make the big journey up to the top of the mountain and in the mountains all the way off in the in the distance and he moves forward moves forward and then when he gets to the foot of the mountain and looks up at it and where it goes he goes set the tent up right here and he goes no further he makes the journey to the foot and then he says yeah i'm not climbing this big bad boy no way okay that's not research you know what that's called it's called fucking ego and thinking you know it all and thinking you have all the information you need and therefore you say this is all off limits and you know what it's called it's called being in a low level satanic mindset and not even understanding that that's the mindset you're in and i don't really have any respect for that mindset but you know i didn't make it confrontational because let me tell you here's what this individual did to me directly in person okay i've brought this up to tons of other people and they were able to have a respectful conversation with me whether they immediately accepted it you don't immediately accept it you don't immediately reject it that's the mark of true intelligence that's the mark of true respect for other people you don't say i'm going to immediately accept this because that's blind belief or you don't say i immediately reject this well this alleged researcher and author okay immediately rejected that out of hand without listening to any piece of evidence to the contrary okay and do you know what he did at his own table at a conference where we met okay he physically turned his back on me at a 180 degree angle facing me like this yeah his name is david paulides by the way his name's david paulides okay i don't really care who knows him whether anybody who knows him is listening okay he struck me as incredibly disingenuous and and not concerned about any moving forward of understanding what may be occurring regarding missing people it seemed like it was all about selling books that give you a nice endless mystery to pursue one after the other after the other and really it postulates nothing and they go nowhere and i've checked out his books okay and it seems like an endless mystery that lots of people love they love the endless mystery that goes nowhere and postulates no real explanation okay but when i brought up satanism that can't possibly be true and how dare you even insinuate than anybody at institutions like the police or military or or politicians are involved in stuff like that you know yeah absolutely rejected it out of hand and let me tell you something folks he was facing me like this and when i said people at high levels could be involved in even police because he took severe egotistical offense to the fact that i insinuated police are involved in satanism as well because he was a former police officer right and still in that mindset of believing that they're the good guys and they're necessary and it's not about slavery okay literally went like this put it on the other camera lit the front-facing camera literally was facing me direct face to face he actually in his space in where he was standing in his face did this physically turned at 180 degrees turned his back and showed me the back of his head and the child's move coward that's he thinks he's a man words caused him to do that i didn't know aggressive action or behavior he wasn't even opening openly willing to listen to my words and folks let me tell you something folks it takes a lot for me to ever mention another researcher on the air to even mention their name i never do that shit okay i never do it i'm doing it here for the first time today because this caller brought up people who are in abject denial of something that is very real and they don't understand it and they've never looked into it and they think they know that's not research that's not the pursuit of truth that's satanic ego that's satanic ego getting in the way of the pursuit of truth and then somebody who thinks they can speak to my life experience once again this is who i'm people like this or who i'm talking at when i say you don't know me you don't know what i've lived through you don't know what my personal experiences have been you don't know what the personal experiences of personal friends of mine have been who i know are not lying who are telling me the truth because it directly corroborates my life experience you haven't been in those places so don't try to tell me that i don't know what i'm talking about and i haven't been in those places and i'm some kind of a fucking liar because i am not and i've lived it and you haven't so that's when i get very highly almost violent toward individuals like that because nobody else is going to tell me what i've lived through you don't know because you aren't there okay so you're not going to tell me that all right that's when i'm going to get nuts okay because no more am i going to tell you the life experiences you have lived through but don't dare try to tell me what mine have been and have not been so i'm gonna calm down and not go that nuts okay so call her please please go ahead i feel your adjustment great work my friend yeah it's it's wild how this uh um a scientific or scientism attitude or or um materialism feeds into this oh i don't believe in spirits or i don't there's no such thing as someone who would uh be hijacked by a spirit and sacrifice a child to them because i'm a scientist right so there's that whole thing that's just out of yeah could you imagine people trying to just ascribe their own moral sensibilities to someone else it's one of the most dangerous propositions you could ever make i've said this many times on the show people think oh they would never do that no you would never do that because you have some moral sensibilities and understanding of morality don't attribute that to potential psychopaths and first of all as somebody who saw all of the very harmful things that people could do to each other as a member of the police force you would think someone would know that from personal experience and background but this is how deep ego goes this is how deep uh the iron of the ego strikes you know none of my colleagues could ever be involved in that that's one of the most incorrect wrong and satanically egotistical things one could ever think it's childish quite frankly it's very childish is actually the attitude that i saw displayed by this alleged researcher and author now he's actually an author he's written books but you know so what you know anybody can write a book and still be in a childish mindset still being in an egotistical mindset still be in a satanic mindset a de facto satanic mindset a satanic mindset by deed doesn't matter whether you consider yourself that again look folks i could show you articles in the church of satan's own literature that was called de facto satanist they used the term where they're talking about this person is a de facto satanist we love how they think they think exactly like us okay they don't know that they're satanists they don't claim to be a satanist but they're they're praising people in articles that they've written called de facto satanists and they praise them and they go this is great that our ideology is infesting other people and getting into their their psychology and mindset pretty soon we'll have them all you know just as a quick thing could you call that something else real quick besides de facto satan and satanist in in action a satanist indeed the word the word de facto d e the word d e in latin means of or from or and then facto is from the verb faciare f-a-c-e-r-e that's the infinitive uh f-a-c-o means i do okay uh f-a-c-t-o i do and then fatchery f-a-c-e-r-e is the infinitive which means to do right so by deed literally by deed or in their deeds they are satanists you know it doesn't matter what you say by mouth you can claim one thing but be another you can claim that you have a you know moral or godly mindset you can claim that you are christian and follow the teachings of christ in in the new testament you can claim that you are a uh ostensible uh jew who follows the teachings of the torah you know however indeed you can act quite differently than that okay so that's why i like the term de facto satanist it means that in your deeds you are satanic in your thinking and in your deeds you are following the precepts and the ways of thinking and behaving that most satanists practice without actually even knowing it and guess what folks that's where most of the world is at most of the world are de facto satanists this religion has been propagated so i thank you for bringing up those points do you have any other uh quick questions yeah i would love in in the in the in the name of qualifying or clarifying some questions uh what i found in looking through your work which i've gone through all of the stuff that you have on your website at least um is that when i hold a question that pops up from one of your shows it it gets answered maybe not always by you but it gets answered at some point or totally true because you're asking the universe to provide that information by the very speaking of it whether in your thoughts or saying it aloud that's how the universe works that's why when you go off the word question is very revealing quest eye on the quest for the truth will turn the eye on we'll turn the central or middle or third eye on it's right in the in the word ask questions pursue truth yeah perfect perfect so i the whole the my question is about when you talked about the true holy trinity thoughts emotions actions um you seem to imply that there was an order to them one came and then the other that's right but i'm not sure if that's true and if that if you do hold that it's true could you elaborate that on a little bit yeah ultimately i put it in the order of thought emotion action t for an acronym okay because thoughts are the essence right but really what drives the quest for the truth is care care comes first right but we have we have to put the truth and principles first in our lives so we have to care enough to go deeply into information and knowledge and learn what's true then the order is truth love freedom we know the truth so we care enough to act the right way and create a society that is based in freedom okay so you can really say it's care truth love freedom you know love would just be the agape form of love is love for truth and love for all you know a love for um you know it's cosmic love it's not even brotherly love it goes beyond that okay it's love for the truth that comes first then it's truth care for our whole human situation and then creating freedom through our actions through our behaviors which is what wisdom truly is okay so it would be like care truth or attaining knowledge understanding okay that's the the love part coming to an understanding of what it means for all and then wisdom is right action okay so it's it's the trivium that has to be underlaid by cosmic care by capital c care or all cosmic i mean or all capital letter care that's the thing that holds the whole seat of life together in the image that i gave of the seven hermetic principles being bound by an outer eighth circle the lost principle as i call it so i you know thank you for your question i hope that explains a little bit i'm gonna go on to some other callers and maybe some emails so one shoe thank you great question and great insights all right uh i'm going to go to an email real quick and then to another caller email i'm not going to give names on the emails i don't know who wants their name because i can't actually speak with them so i've been wanting clarification for a while on this could you please define what harm is it seems like such a subjective thing i'd like to know your non-subjective response to this particular question thank you okay from the formulation of the question i could immediately tell that you have not been through all my podcasts and or even my entire natural law seminar in its entirety you may be a new listener so let me re let me frame the answer to the question with this caveat to begin with you should not be listening to or watching what on earth is happening this late in the game out of order or out of sequence i usually say this at the beginning of every show what on earth is happening as a podcast is cumulative information whose earlier episodes are prerequisite knowledge for this episode meaning you cannot skip around and go out of order for the podcasts in the whole series called what on earth is happening you have to start at podcast number one and then when you are finished podcast number one proceed to listen to podcast number two when you are finished with podcast number two you should proceed to podcast number three not five not twelve not two 201 only listen in and watch in order it's a progression of knowledge it's cumulative knowledge that that the later episodes have prerequisite earlier knowledge that must be understood first before proceeding i've said this so many times that it's ridiculous yet people still insist upon listening out of order and then asking questions that have already been answered and i'm not going to beat up the the writer of the email over it i'm just giving you that information you would already know this had you listened in order or viewed an order it would be very clear to you already okay so you're probably skipping around and going out of order and you have not realized this has been answered probably hundreds of times already okay harm is not subjective it is very objective people insist upon insisting that it is subjective when harmful behaviors are very real and physically definable okay they are very knowable and they are not subjective they are all objective behaviors that we do and there is a reason very clear objective reason that the behaviors spoken about are in fact harmful if you watch my natural law seminar in its entirety i go through this especially if you view you listen to and view my podcast in its entirety i go through this multiple times okay here is the answer this is the clarification and or answer there are seven harmful behaviors that anyone can perform to anyone any other sentient being in the universe there are seven harmful behaviors if you examine each of the behaviors in turn you will understand that they are all forms of one behavior one root form of behavior which we'll get to in a moment okay when you understand what a right is by defining it apophatically meaning you must define a right in negative terms meaning you will come to the understanding of what a right is when you strip away the things that you do not have the right to do so you a right is any action that you are capable of performing that does not initiate harm to another sentient being and this does not mean plants this means sentient beings those who are imbued with animus or spirit or soul capable of moving independently plants are not that they are not truly sentient they display mimicking behaviors or stimulus response mechanisms of sentience but are not themselves sentient independent creatures they are extensions of the one sentient form of life that is the earth itself okay they would be like hairs on a human arm which could be clipped and regrow without killing the organism if you look into rosicrucianism you look into high-level freemasonry you look into high-level kabbalistic tradition you will understand that all of this and forms of life and methods and views of consciousness regarding life in all of the kingdoms of life have been talked about explored explained and you don't have to take any of their word for it it's all a logical progression that is borne out by experimentation and true science methods of true science of occult science okay so stepping away from that for a moment we're talking about what you can do to sentient beings all rights are behaviors that you as a sentient being as a sentient being that is capable of understanding this difference between right behavior and wrong behavior you do not apply natural law to the animal kingdom because they are beings that do not have a developed enough brain to ponder conceptualize and perceive natural law meaning the moral laws of creation and what objective morality actually is therefore animals who will go along with instinctive stimulus response mechanisms and lower order instincts are not bound and held to the same moral law consequence of higher order higher thinking and higher brain function beings such as human beings who have the capacity for the understanding of objective morality that's called true holistic intelligence which is made possible by our higher order functioning brain specifically the part of the brain known as the human complex or human neocortex of our brain i've explained this at infinitum ad nauseum in former shows you can get all of that in the podcast series which is where all the bulk of the accumulation and uh teaching of all of my accumulated research is in the podcast series that's why it says on the home page start the journey to true awakening listen to the podcast in order here click that button and listen in order watch in order don't skip around take your time go at your own pace and you will understand if you do not do that you more likely than not will not understand but that's up to you that's your karma that's your dharma and karma okay if you do that work you'll be fulfilling some karmic debt if you don't do that work you're not doing your dharma and you'll stay as ignorant as you are now okay it's not up to me that's up to you people go oh that's hundreds and hundreds and hundreds of hours of material thousands of hours of material he wants me to go through yeah i do yeah that's the least you can do i probably took tens of thousands of hours to research it and to present very well organized findings in a very meticulous ordered way that is very deliberately chosen in order so that people can re-evaluate their stubborn egotistical satanic world view that's a morally subjective worldview as i can tell so many people are still in which is part of satanism de facto satanism as a matter of fact okay so it isn't relative it's very objective and here are the objective standards of what rights are not see to understand what those actions that you may do that are rights which there's an infinite number of behaviors you may perform that do not initiate harm to other sentient beings you have to know what behaviors constitute objective harm it's not about your feelings getting hurt it's not about you hearing something that makes you uncomfortable that is subjective because all that matters is whether it is true or not doesn't matter how it makes you feel internally your feelings can get hurt but that doesn't mean objective harm is happening to you that's why that's subjective and not objective objective harm means actual physical harm somebody being defrauded of property or rights rights being usurped freedom being taken without just cause meaning it's not justice it's a it is subjective morality that's being enacted upon them here are the objective forms of actual harmful behaviors these are the real seven deadly sins not the bullshit morally relative so-called seven deadly sins of organized religion which are the seven morally relative vices that are not true crimes that are taught in christianity catholicism etc are pride gluttony sloth lust anger jealousy greed those are the bullshit seven deadly sins pride gluttony sloth lost anger jealousy greed all vices all morally objective tell me who is harmed you are not pride if i'm prideful no one else is harmed it's a vice it's not great to be counterproductively selfishly prideful when you don't really when you can't even really back it up that's counterproductive pride okay but that's a vice at best it's not a crime gluttony that's a vice you're doing it to yourself it's not a crime might not be a great thing to participate in or help you engage in good health but you're not doing it to another sentient being another sentient being key phrase in the definition of what a right is okay so i love this question i'm gonna take a little bit of time on it because this is the essence of everything we teach here on what on earth is happening and it needs to be understood pride gluttony sloth laziness okay that is also a vice it's not a crime if you're lazy okay you're doing that that's yes yourself doing it okay so if you're ultimately a lazy individual and you're not motivated it's still a vice now when i say you're lazy about understanding rights that could turn into a form of a crime because you are actually harming other people's ability to maintain their freedom but we can get into that that's a special case instance in general laziness to perform certain behaviors is a vice and is not an actual harmful behavior that you do to others okay pride slutney pride gluttony sloth lust lust it's a vice you know sexual um you know uh greediness sexually and you know being focused on sexual gratification too much that's a vice it's not a crime rape is a crime as we'll get to okay lust is not it's a vice okay pride gluttony sloth lust anger or wrath it's been called different things in different traditions okay it's a vice i often engage in in anger i think my anger is righteous it's righteous indignation because i'm talking about actual crimes that are going unpunished actual ignorance that is taking place in the world not to understand all of the injustices that are taking place around us and destructions of freedom so you could say hey it's a vice yeah maybe it is but guess what it's not a crime against anybody else okay so again morally subjective it's the bullsh it's one of the bullshit seven deadly sins lost anger i have to say i'm in order to remember them pride gluttony sloth lust anger jealousy jealousy or envy okay once again just looking at greedily you know and and uh you know um you know desiringly at what other people have that you don't have in your life it's a it's a vice it's not an actual crime that you do to someone else or their property so that's a vice as well and greed greed is last that means like wanting too much material possessions you know it's a vice it could lead to actual harmful behavior that you do to others but in and of itself just greed is a vice you're not actually taking a behavior that harms others just by taking a greedy mindset it's not i wouldn't say it's good you know subjectively good to be that way and but again that's the difference between saying this is good for you or subjectively good for you versus being an actual moral behavior there's a difference between things that we perceive as being good to make us you know better people and stronger in individuals right versus being things that make us morally better right there's such a thing as being subjectively better versus actual morality being better and more enlightened when it comes to actual moral behaviors so to understand moral behaviors or rights actions which do not cause harm initiate harm to other sentient beings okay i've been really trying to be very good about making the distinguishment about causes versus actual initiation meaning who starts it right because then you'll say oh if you punch somebody who just punched you unrightfully that's the same behavior no it is not it is a different behavior that is a self-defense of behavior which is not a wrongdoing it is a right under self-defense because someone punching you without right would be the total abdication of their right to remain unharmed by taking a wrong behavior which is called assault okay so let's look at what are the seven true deadly sins or the behaviors that actually break natural law morality in the real world in the real physical domain in the 3d reality in which we live they have objectively provable harmful results the seven deadly sins or seven true transgressions against natural moral law are these seven actions murder assault rape theft trespass coercion and willfully lying when it comes to information that is actually required to make informed decisions okay i don't look at little menial white lies like okay a husband doesn't like the dress his wife chose and she loves it and thinks she looks great in it and she goes holds it you know goes out in front of the mirror tries it on you know and walks in front of the mirror her husband's standing in the background she goes honey i love this dress what do you think about it and he goes oh i like it on you sweetheart but he really doesn't okay i'm not talking about one on the last one when we're talking about lying i'm not referring to what people have referred to as little white or venial lies like that there aren't about anything about important decision making i'm talking about lies like the horror prostitute paid and bought for bought and paid for media come out on the nightly news and go masters gonna totally protect you and others from this covet thing which spreads by viral contagion and you got to be very fearful about it we got to take your freedoms away as a result and if you don't let us do that you don't care about anybody you're a selfish person you're a fucking liar about something that's truly important okay that's the kind of lying i'm talking about that is holding back the ability to make in true informed decisions regarding the truth of the matter that needs to be understood by the general population and you're pa being paid and accepting money to lie to the public that's the kind of lies i'm talking about in action number seven in deadly sin number seven there okay so understand there is gradation when it comes to that last one but none of the other ones have any gradations murder the taking without right of life that is not yours to take now follow the progression of the true seven deadly sins which are not vices they are true crimes murder the taking without right of life that does not belong to you to take including animal life including human and animal life that is what murder is defined as the taking without right of life doesn't that does not belong to you to take is called murder you are taking property which does not belong to you number two assault you are taking the well-being of a sentient being that does not belong to you to take you are taking unrightfully assault is defined as the unrightful taking of the well-being or health of a sentient being which does not belong to you to take that is also a form of theft okay you are stealing that well-being from someone by assaulting them initiating physical harmful behavior and therefore taking their health or well-being from them you have no such right to initiate that physical harm rape you are initiating the sexual assault which deprives someone or takes or steals their free will of sexual association with another that is not your free will right to coercively take or steal from someone that is objective harm in the 3d space in nature okay that's rape also a form of theft taking someone else's free will sexual association without the right to do so never have the right to do that okay murder assault rape theft the taking of property physical items property which does not belong to you to take okay nor do you have the right to defraud people of property etcetera which would fall under lying is fraud descent deception okay and and fraud murder assault rape theft physical stealing of property okay simple theft okay murr assault rape theft trespass that is also a form of theft you are taking the security of another being in their own personal living space or lair you have no such right to do that you don't have the right to burst in my house unwelcomed that's called trespass okay you are stealing something when you do that you are stealing my ability to live securely in my own space that i am actively using and which i actively own you are taking property away in that regard you are violating property and its usage so that is a form of theft okay coercion is the next one you have no right to perform coercion upon another person what are you taking or stealing without right when you engage in coercion or duress you are taking someone else's free will away through coercion violence and duress this is what the government and police and military do every single day of their existence okay they are guilty of the seven one of the seven deadly sins of coercion by following orders okay so that's a form of theft taking someone's rights away their freedom away they're taking their right to make free-willed decisions away regarding their rights you don't have that right that's a form of theft you're you're stealing someone's free will and rights as a result of coercion and duress and then finally lying which we already talked about that's the stealing of necessary truth and or the deliberate withholding of necessary truth when someone does not understand it because then in the absence of that truth you have stolen their ability to make informed decisions about things that are truly important namely rights and freedom that's why deliberate willful lying regarding rights and freedom is such a bad quote deadly sin and a transgression against natural law all of these are objective and have nothing to do with subjective opinion all of these are forms of theft there is only one true harm that can be performed by one being to another theft that is it and again we are held responsible for theft as higher order thought-functioning beings who have the holistic capacity for the understanding of the difference between right behavior and wrong behavior that is why human beings are held accountable according to cosmic moral natural law principles and behaviors whereas the animal kingdom that does not have that holistic intelligence is not held to the same moral standards or accountability so animals have nothing to do with what i am referring to and what other philosophers and people who have studied and taught the occult principles of natural law referred to as natural law capital n capital l if other people tell you that natural law has anything to do with the behaviors of the animal kingdom that is lower level uh in their development and think and higher and thought functions than human beings which have a much higher order of thought and understanding capability than animals than the standard animals of the animal kingdom other than humans they are lying to you or they are totally ignorant and do not understand what natural law is okay somebody made a meme i might show it to people one day you know the guy the um um uh spanish guy in uh the the um the movie um uh it's uh princess bride you know great movie very good allegorical movie about truth okay who there's a meme floating around oh you keep using that word but i don't think you know what that word really means right this is a meme that goes around people who are saying that they think they understand what the definition of a word means like a right but they don't really have the definition correct in their own understanding and then they ignorantly spout the definition of a right or a wrong and then somebody mocks them by saying you keep using that word but i don't think you really know what it means right somebody made a meme of me looking like that guy saying you keep using the term natural law but i do not think you know what it means i love it loved it saw it a couple you know like a week ago and i think it's an awesome funny meme okay because it's true most people will not listen to the hundreds of hours i've spoken about natural law and then they come out and that here's who they are give me a minute and then we're going to switch over to my next presentation slide please switch over to the slides yeah natural law means that a lion can take down the gazelle in on the plains of africa and he can eat it up and that's natural law and i you know past you i've never listened to a fucking word the guy says but he's an asshole and he doesn't know what natural law means but i know it means that human beings are just like other animals and we could just do any harmful things that we want to other people just like animals can because because darwinism is true and social darwinism is true and it's all morally subjective there's no real objective right and wrong and i know what i'm talking about but i haven't listened to one second of what pacio's ever said in the podcast yeah you're a fucking moron duns fuck face little boy and girl who thinks you know like that and i'm done being nice about it and i've been done being nice about it for the longest time think about if you've explained it for nearly 15 years your fucking life how you would feel if you get jerk offs like that trying to say that you don't know what you're talking about when you've explained it in unimaginable depth and clarity i'm not your little shit ripping post or or sounding boy that's gonna just sit and take your fucking dumb verbal abuse i'm not gonna get obsessed with it but guess what folks you're not gonna attribute your dumb fucking level of ignorance to me either because i do know what i'm talking about and most of you don't and i'll say it just like that to your face i don't care anymore about really what goes on in this life okay whatever happens to me physically let the fucking chips fall where they may i'm uninterested in the physical domain from a certain level perspective because whatever happens to me i'll be back doing the great work again i've taken that vow i will not leave this plane until all are free every last soul that's the level of per persistence and if you want to call it total insane persistence that i have at my core soul level you don't know who you're dealing with and the controller satanists of the world you certainly don't know who you're dealing with and you certainly don't know the one that got away you don't know the one that got away boys and girls in the big cult you may think you do but trust me you don't know this is one you don't know as well as you think you do let's just say that yeah so let's go to some more callers i think i've explained what objective harm is enough times and in enough places online for people to get it please don't listen out of order and again i'm not going to go nuts on about the question but imagine if you were answering this question for nearly 15 years and you've said it in every conceivable way and form that you could in every media that you could in every interview that you've you could and then people are still asking this is the first question that comes in via email think about how it would make you feel inside your own mind and physiology i want to really hammer that in to people's perception i want you to really do the exercise picture saying the same fucking thing for 15 years and then when you open up questions the first thing that someone asks is could you please go over this again as if you haven't said it enough thousands of fucking times we'll go back to more emails a minute let's go to another caller all right let's go to bob bob you're live on what on earth is happening welcome hey can you hear me yes i can welcome the show thank you very much i can't believe the synchronistic actually you probably won't believe this yourself um the reason why i called this about 15 years ago we um first interacted via a series of emails didn't go on very long you were i think you're on red ice radio or something and yeah i was interviewed on there at least a couple of times yeah and you were talking about what you just talked about now and you've sent out like a challenge to the audience to come up with a form of harm which wasn't ultimately there right i thought about it for a couple of minutes and then i came up with something and i emailed you and i said lying causes harm and it's not theft right i don't know if you remember you emailed me back and you said um lying this theft of truth right and i emailed you back and i said uh lying isn't theft of anything it's not giving false information the truth that exists and that's pretty much this is true this is true so i would say it's stealing of by default or defrauding stealing by deception the ability or not ability of someone else but the the conveyance of necessary information so the you could split hairs about the def the wording of the definition right you you could try to get as ex into the exactitude of language right and this is what is known as semantics and this is what i try to explain we cannot get hung up on semantical arguments we have to understand that certain things are true enough right and this is the idea terence mckenna often put this out he said i have gone back and forth with people to such a level of hair splitting word splitting semantics that the entirety of the moral principle got lost because someone was demanding such exactitude and precision of what we would call imprecise language or conveyance of language so that's why i tell people understand the moral principle don't put out falseness into the world or deception into the world it's that simple because yes while you could say objective absolute truth still exists in nature and that can never be destroyed again i actually use that term myself truth can never be destroyed right but you can dissuade someone from looking into it or you can stop someone from looking into it because they've believed what you've told to them that is not true that is a lie so my my advice is while you could you could say technically if you use this word it it it still means that okay you could look at it from a different perspective and say well this you know puts a an exception to the rule in place when you look at it from the spirit of the law perspective as opposed to trying to get down to legalese exactitude of language and definitions right your you will eventually go into what's called the letter of the law and this is why this is why the mystery traditions wrote very little in the ancient world only in the modern world did they really start conveying this through books and word of printed word and this is why i have been hesitant not hesitant but in all honesty reluctant to finish writing a book for this very reason one word will be pounced upon one word will be pounced upon by individuals right and they'll go into the ripping apart of one physical word whereas a back and forth exchange of ideas through the verbal communication can clarify expound upon expand upon understanding internally okay this is why the ancient mystery traditions preferred the spoken word from mouth to ear this is why i prefer the spoken word through the forms of new media that we have at our disposal from mouth to ear because language through written words even communicated words in language is imprecise then it can be clarified through the spoken word to do it through the written language would require further and further and further written communication which is why the ancients did not think it was as good of an idea as a lot of people think that it is today and i'm not knocking or poopooing books i think they're incredibly important but you cannot get hung up on someone's wording and then think it makes the spirit of the statement untrue you have to try to understand their general meaning which is called the spirit of the law or the spirit of the message i think i've done a tremendous job in communicating the spirit of the understanding of lying as a form of theft and i think people who have an understanding spiritually of what this truly means and how it is a form of harm understand it from that spirit of the law perspective and are not going to semantically nitpick upon the word or the chosen wording of the definition okay it still is a form of harm and it still is a form of theft of necessary conveyance of information yes the truth exists independently of perception but you can always erect roadblocks to it unrightfully which is stealing someone else's path of getting there from them essentially you are you are attempting to cut them off from that path so i'm going to let bob come back on and ask him do you think that that is a sufficient explanation of my understanding of why theft is a wrongdoing is of why lying is a form of theft and wrongdoing well about maybe about three years ago i realized we had gone wrong and i was incorrect but i think we both thought this was this is what i think i think that lying is merely a tool um you use it to elicit a certain action from whoever it is that you're lying to now the intent of the lie may be harmful or it may actually be helpful and the consequence of somebody acting on the life may be harmful or it may be good well this is this is the reason let me respond to that the reason that the controllers only engage in speech they at some level yes they're doing these horrifying satanic rituals but many of them will simply engage in telling people a world view and then saying you go out and do this behavior and i would make i would personally label that as the distinction between satanism and dark luciferianism lying is still an action you have to modulate your vocal cords and move your lips to perm pro produce the mouth noises to do it so is it a behavior it is still a behavior it is not a subjective construct you are doing that with your vocal cords with your lungs with your air capacity and and muscles surrounding your lungs and diaphragm and you are doing that with your lips and tongue you are taking an action when you speak i would say it is probably the thing that you could split the most hairs about regarding lying which is why it is the seventh of the seven deadly sins and murder is the top one i would say you know coercion is another thing because it can be implied it can be duress where you are implying if you do this i will then take action but you never actually do the action you just hold someone in fear of a potential action okay all the other ones start in the physical domain murder assault rape theft trespass then coercion and lying are the last ones which start in the non-physical and proceed to the physical okay so there is a gradation that happens as you go further down the list okay but nonetheless it is action and it does block the reception of truth so the dark luciferians are doing what you described they are the ones who are engaging in just speech the satanists who they control and ultimately inform the world view of are then doing the behavior and their minions under them that's the pecking order then if you really looked at the pecking order and you looked at the highest level dark luciferian mind controllers and social engineers whose names we will probably not discover or realize in our lifetimes okay perhaps but perhaps not more likely than not not understand or know those people's names because they are so well hidden and entrenched and they are covert and operate from covert uh locations and institutions you are going to realize they really don't do many behaviors all they do is put out a world view for other people to latch on to and that is how they attempt to insulate themselves as much as possible from karmic debt from accruing karmic debt it does not mean that they will not because it's still a behavior it's still wrongful behavior it's still a harmful wrong behavior to take but it is the least amount of wrong harmful behavior that can be taken taken by people who want to enact the agenda that they are attempting to enact ultimately who is doing the most harmful behavior of murder assault rape theft trespass and coercion the police and the military who they call their pets and dogs who they call their well-trained animals that is who is ultimately doing the most harmful behavior whereas all these people at the very highest level of this food chain occult pyramid are doing is speaking words that are untrue it is still a form of theft but they get away with the least karmic debt as a result of engaging in that behavior and they know it and they know they're passing on the true brick load the heavy truck full of bricks to the police and the military who get all the karmic debt because they're the ones performing the physically harmful behavior against other sentient beings so yep i think completely crazy about the police and the military yes but um i think it's the belief and the acting on the light which causes the harm not the light so because like i said lying is just a tool i could lie and the consequences could be good and my intention could be put to be good so i don't think lying itself is necessarily a bad thing well how how could you lie about something truly important and bring about something good instead of something bad the whole idea of truth discovery is getting to that which is correct because that which is correct is synonymous with that which is moral anything that is false and wrong is going to lead to behavior which is also false and morally wrong see what i would recommend uh to you bob is please read the works of richard w weatherill you will probably find his way of explaining natural law and going into what you might consider exactly of language enlightening and helpful and then you will understand he really gets into lying in a big way as well in his work okay you cannot separate correctness from true morality either that which is correct will lead you to that which is true so lying will always eventually lead you to that which is false and therefore eventually will lead you down the path of immorality and moral wrongful behavior and immoral wrongful behavior so that is why go deeper into an understanding of how lying especially about anything truly important you don't like your wife's souffle that she just made for you for your birthday because she thought you'd love it and you go that's one of that's a wonderful dish you just made okay you're not giving her accurate information and i'm not trying to excuse that and say it's great go ahead and engage in that don't get my words twisted right but is that the equivalent of lying to someone about something as important as that we're doing this to protect you when we're taking your rights away no a lot more harm is going to result you know is that like lying about who actually performed the covert operation of 911 is that like lying and saying there were weapons of mass destruction in iraq let's send the military in there and kill a million iraqi citizens no it's not the same look at the harm that resulted the physical harm that resulted so i'm going to recommend for you be right or go wrong by richard weatherill i'm going to recommend how to avoid problems and prevent trouble by richard weatherill i'm gonna i'm gonna recommend right is might by richard wetherill read those read those and i guarantee you you will come out with a much higher level understanding of natural law then you are already at this juncture and this will clarify the uh the uh what i call one of the seven deadly sins of willfully lying regarding what is truly important to understand as a truly harmful behavior that's my advice let's go to another caller um actually let's see um let's go to another quick email then i'll switch to a caller uh let's see all right somebody asked once the injections possibly become mandatory what is the best way to resist quote authority figures um first of all the best way to resist it right now is putting the truth out about the non-infectivity you can even quote their own studies in the national institutes of health and that are publicly released on pubmed that there is no asymptomatic transmission it's publicly acknowledged even by their own scientific institutions they tried to infect 455 individuals with sars cove 2 and they could not do it could not accomplish it but you won't hear about that in the nightly news you won't hear about that in the mainstream papers you won't hear about that in the mainstream magazines you won't hear about that on the main street websites no people will just ignore that one oh they're telling you the truth over here but here don't worry about this peer review journal no you know it's a cherry picking operation for their agenda and guess what you have people even in the so-called truth community insisting no they lied to us about iraq they lied to us about 9 11 they lied to us about all of this other shit but this one they care about us and they're telling us the truth fucking naive children who don't know how it works and don't understand how the cult operates because that you know deep down inside you know what those people are they never really got it it's a shame they brought their religion into the truth i'm looking right at a lot of people know who i'm talking about and there's a lot of you there's not one or two there's like thousands of you and i'm pointing right at you and i'm talking right at you at you not even to you at this point i'm talking at you you brought your religion into the truth and it's not welcome and you're gonna suffer as a result not from my hands you're gonna suffer because you went down the path of falseness you went down the path of deception your you got your vision got clouded by fear punk little boy and girl you got punked you got bitched you got played son you got played little girl your ego's in the way you can't admit it to yourself or anybody else but you're punked bitched and played and you're going to suffer as a result until you can admit you were wrong and then maybe you'll you'll go back on the path of truth and continue up the mountaintop but guess what the best way of dealing with this is don't be apologetic to people don't let them control the narrative and don't let them spread false information for others to believe and i don't mean physically don't let them i mean we have to make the truth a resoundingly loud chorus by putting this information out there to all how many people are doing that how many people are doing it unafraid how many people are doing it forcefully not violently but saying it's going out you're not stopping me you're not going to change my worldview by my actual understanding with your worldview with bullshit belief i have knowledge based on accurate understanding of true data that is out there by assembling all the grammar the pieces of knowledge and understanding them and and weeding out the logical inconsistencies and coming to an understanding of how it works and then i'm putting that out there that's a true world view based on knowledge other people listen to bullshit liars on the mainstream media have no understanding have done no actual accurate research themselves and they have a bullshit world view based on ill information ill an ill-red uninformed opinion and a dumb dunce like that is not going to inform my well-informed knowledgeable understanding with their bullshit non-knowledgeable opinion your bullshit opinion based on your feelings is not as good as my hard-won knowledge that is meticulously weeded through with the trivium process so you're not going to tell me i don't know what i know and you have a better understanding based on your bullshit opinion given to you by known liars that you've grafted onto and said well that's good enough for me because i'm a dumb shit for brains idiot you will not tell me i must believe what you currently believe or you will strip my rights as a result of me not capitulating to your worldview and your worldview violence and that's the attitude we need to take with these people not back off not back down the more you back down the more you're going to embolden and embrace in these people and guess what if we can't do it through words it's going to have to be done with physical repercussions in the form of self-defense because you don't own my body and i'm not your fucking slave and you're not gonna put a mask on me you're not gonna put a fucking needle in my arm and if you do you'll be met with incredibly harmful physical resistance through self-defense you want to play that game you're going to win really really impressive silly prizes brought on by yourself and guess what maybe that means i go and i've said it before then i go so be it then i'll sing my warrior song and go to that place wherever it leads but i've lived in righteousness and truth you will not coerce me and you will not own me and you will certainly not bring my behavior into harmful compliance because i know what the truth is and you do not and when it comes time to be ready to go we'll see who's more prepared look me right in the eye see if i'm fucking playing and see if i don't actually know that i'm more prepared than you to go let's look each other right in the eyes and take a moment see who's more prepared see if i'm playing yeah you'll know you'll know when the time comes that's all i'm saying folks and you better get ready psychologically and physically for that eventuality because the boomstick's going to be coming out pretty soon all the boomsticks going to be coming out you think these things are a game you think all these protests you think that's a child's game holding up signs and bull horns you don't know what's coming what's coming when the time comes you you'll see you won't see protests you'll see real opposition and you everybody will know it then you know it won't be people throwing some bricks through windows in some stores in center cities of cities across this country you'll know it when it comes yeah and most people be checking out of this planet on day one little shits you'll be shitting your pants and checking out on the first 24 hours that's what'll happen okay so that's going to be how resistance to authority figures are going to event it's going to eventually go if we don't wise the fuck up and start teaching this and not backing down and i'll tell you what it ain't gonna happen here like it does in other places you boys and girls in other places you're going to be really shitting yourself when that time comes in other countries because guess what it ain't going down that way here in america ain't going down that way here son nah nah you'll see you'll see trust me you'll see you'll see and hear and feel and that's all i'm saying i'm not telling anybody to do anything it's a prediction actually it's not a prediction let me be like paul heyman it's a spoiler it's not a prediction prediction it's not a promise it's a spoiler okay if you know who paul heyman is from ecw and wwe all right all right let's go to another caller let's hear from vinnie eastwood vinnie my friend welcome to what on earth is happening how you doing i don't know if you can actually hear me oh you're coming in loud and clear my friend oh my god i'm on the pacio show i love this uh bro dude this has been absolutely crazy in new zealand here man um i understand that government i understand that government is slavery and what's interesting though is i'm helping out a uh new zealand's first political party right now called the nzpp the new zealand public party and they've come out full on against agenda 21 against agenda 2030 against 5g at forced vaccines the military intervention new zealand has now announced that we're going to have troops clearing the streets they're going to come into your home uh within the next few weeks and force you to shove six inches of swab up your nose and if they find that you're being tested positive for covert and bear in mind they've tested these swabs that haven't been used and they've tested positive for covert they're going to take you out of your home away from your community and they're going to put you into a new facility right these are these covert containment facilities otherwise known as concentration camps now uh it's very interesting that this has happened directly after the emergence of nzpp uh today they have announced that they've signed a deal with another new zealand political party so that they are going to go legit and this sunday there's going to be a huge meeting a huge protest for our rights that kind of thing now my question to you mark is number one are you free 5 pm pacific standard time today to do a show with me for one hour about it and actually give these guys the info on what natural law is why government is slavery all of that kind of thing so that the party leadership can be up to play uh with reality because honestly they're going up against the uh the worst most ruthless psychopaths i've ever seen this country uh um uh be in the clutches of and i don't know if they fully understand the reality of what they're up against or how to steal themselves against it all right so 5 pm pacific is 8 pm my time that's two hours after i go off the air that is usually uh downtime where i am resting recuperating from this show for the three hours that i do it but vinnie i would do this for very few other people since you asked i will make myself available and i will do this absolutely mark there is a reason why i love you and that's why well look you're one of the people doing the great work in the world very effectively vinnie and i respect you as a as a colleague and a peer and a friend so absolutely you have asked this favor of me and i will do it for you yes now speaking of colleagues and peers i just had a very uh unfortunate incident happen i'm not sure if you're familiar with uh james wright the freemason whistle blower i am but he's been getting stalk gang stalked and messed around for like the last decade everybody's been uh kind of uh getting threatened and uh i think it's affected how he's um how he's uh behaving that kind of thing so he may not like it then he'll come out and expose some of the things that you know do occur in the lodge system and uh you know they're probably trying to uh you know give him some grief for that well he had uh he had two books that he uh that he wrote about the uh the filthy rituals of freemasonry and i i i think i forget the name of the other one but uh it's just recently when he introduced me order of the gestures oh sorry oh oh no no i don't think so but this that's not part of the conversation but um i was just thinking to myself how many colleagues do i have that i can actually talk to about this that might actually understand um and i re i sort of drew a blank so let me explain the situation um he was uh he met robert f kennedy very recently uh uh who then was very impressed with his work and and wanted him to go work for him that kind of thing and so uh then james introduced me to him but then there was a little bit of a thing where the assistant would go of and he doesn't have enough uh following he goes in to talk about the illuminati and reptilians and stuff like that maybe we shouldn't go and so james then sends them this incredibly disgusting abusive sexual uh uh innuendo uh email uh to them and uh i was just like dude that is that is wtf you know don't don't do that kind of thing um and told him that he might be he might have his brain a little bit uh wired because of uh how much stalking he's been under that kind of thing um and it's affected his mind like malware so now he's being being sort of antisocial about it um and and i said that out of genuine concern for him um but then what happened was he turned on me and then uh gave me an equally uh nasty sort of uh abusive response and so unfortunately a lot of people a lot of people kind of uh you know don't like my work or my personality because i do get confrontative and uh um you know um somewhat aggressive regarding my stance of these things for the purposes of something like this of course you know i'll tone it down and just explain it from a purely philosophical perspective i generally only get uh this you know expressed this type of emotion cathartically on my own broadcast which is exclusively mine and not affiliated with anyone else so that is why you'll see me take that type of a more um you know angry emotional stance here but when i go on other people's platforms i try to keep it as fact-based and take the emotion out of it as much as possible so you know of course uh you know i will tone it down for the and tailor it to the audience i am delivering it to i'm very capable of that and if anybody has seen all of my uh interviews you will understand yes i do do that and and you know respectful of their platforms because that's their digital space this is mine i and i will do as i will here this is the digital space that is my quote digital property okay this is my show on others uh shows or platforms or meetings i will tone it down and you know take it back several notches so um you know there's no worry about that regarding me vinnie and i think you understand that yeah yeah and the the thing about it is i think so many of us are severely traumatized but particularly by our experiences and sometimes that makes uh trust or even listening to criticism even from friends a very very difficult thing at this time in history sure and that's why i go into potential healing methods for that type of trauma and again i keep reiterating that yes you you are not responsible for the trauma that was conducted upon you as a child but as an adult you are absolutely personal responsible for healing it for fixing it for healing it so that you then don't repeat the cycle and conduct trauma upon others or even continue to be a whipping post for other psychopaths conducting trauma upon others it's our responsibility to learn about ourselves to the extent that we can go through uh the traumatic experiences that we've had confront them and ultimately to heal them okay so you know this is something that i've talked about a lot here on water earth is happening and even give given people some of the methodologies for healing and again you can get some of those in with other researchers you know jay parker talks a lot about eft work and trans personal work and you know um understanding epigenetics you know these are things that i've talked about as well and uh you know it is each individual's responsibility to understand themselves and understand their experiences to the extent that they do that again part of my quote trauma in the modern world is living around so many ignorant people that are so vibrationally low harm they're harming other people's rights through their ignorance by not looking at the truth and ignoring it and refusing to bring it into themselves and accept what is true and the the destruction of human rights and freedom and even simple everyday tasks that we could once do that now we're being told were prevented from engaging in because of lies and disinformation you know and it's very angering it's extremely extraordinarily angering and i i say again we should never capitulate to these lies we have to get up in people's faces about these things you know and again you could even do that respectfully on other people's platforms you know you don't have to go as you can go nuts on your own platforms right that's the difference between property that's their platform this is my platform you do that on on the platform that's yours if you want to ratchet it up a notch and cathartically get some of that anger out okay if i may uh the uh my friends my band actually uh we were having a jam it was the first time uh jamming in a few months because of uh the lockdowns right and um they said to me you know vinnie you laughing at your own jokes on your show is grating on us and and i was just like this this is my band these are my friends i've got to do something about this and so i was just like okay let's reign in the vinnie eastwood a little bit here let's reign them in and uh ever since then i've actually become sort of a professional broadcaster it's it's it's i love it when you laugh at your own jokes vinny that's part of your unique charm so i disagree with your band members but that's okay oh but but still the um i understood uh what they meant by it is like there's a certain amount of laughing at your own jokes like for example if i'm laughing at my own joke and i'm still laughing after about 10 to 20 seconds and you're a live audience and you're waiting for the next bit of information i could understand to go to the extreme i hear you yeah exactly so it's all about uh raining ourselves in because the uh the key to being a moral man or a decent man is not what you will do it's what you will restrain yourself from doing exactly exactly and uh folks for those who may not know vinnie why don't you give out your website and uh vinnie's one of the biggest broadcasters of truth in all of new zealand really the all the southern hemisphere as far as i'm concerned so let people know where they can check out your work vinnie that's great i've got to go to look after my baby uh in the next 60 seconds so this is good you can look for me at the vinnie eastwood show.com that's vinnie with the y because it's the most important question and on youtube there uh what was it youtube.com forward slash c forward slash vinnie eastwood nz and the live links are already ready there uh mark so i will send those to you across skype so you can promote them and the it is already counting down so uh two hours and a half to go till show time mark passio on the video eastwood show i'm calling this episode political reality check because for the last uh month or so this this month i'm helping the new zealand public party bringing in experts from all around the world telling them and their audience and their voting supporters things that they do need to know if they actually want to change this country and we'll do this facts ladies and gentlemen it is about victory or death this time vinnie we will do the great work together and get those individuals informed okay and i'll just uh hit me up after the show and i'll just let me know you know how it's all going to work and you know we'll we'll talk about proceeding and um i thank you for inviting me to be part of that already popped into your skype brother i'll see you then thank you ladies and gentlemen the great vinnie eastwood awesome always great to hear from vinnie eastwood all right let's uh let's go to another email question this is working out pretty well we got a lot oh my god we have a lot of email responses too this is where i want to keep questions and i'll keep doing this week upon week maybe in the you know third hour we could take some you know actual calls and we can take some email questions why do i'm assuming that they mean when they say they worship bell that they mean the satanist or the big cult that runs the world why is that god so important so i've talked about this a bit in older episodes and i've talked about it on my formal presentation called demystifying the occult part ii satanism and the dark occult so the answer to this is bell bill bull bale however you want to put the v the vowel in there the the the the consonant combination of b l okay b l's above right bale bow right the bull which satan has always been depicted as a bull god the black the golden bull of wall street right the dollar bill okay you can get the liberty bell okay all kinds of symbols bells used in in rituals you can go on and on and on and on okay paying bill right paying bills right bill is the other name for this god it doesn't matter what vowel combination you put in the middle b l in ancient languages there really weren't vowels first of all okay it was consonants and the vowels were sort of substituted or implied so you go back to sanskrit ancient hebrew you know these ain't an ancient coptic egyptian there's not really vowels they're consonant sounds and implied vowels so bl the consonants b and l were the sound for the name of their god okay and all it represented was the sun depicted as or symbolized as knowledge knowledge symbolized by the sun i should say okay so bell was a sun god baal was a sun god bill was a sun god just look it up and you could just look this up in any simple you know website type it in god bell god bill right god baal all sun gods solar cult gods it represented knowledge light light and knowledge have been used synonymously the sun has always been a symbol of knowledge this god represents knowledge that they have that they understand and that they wield yet other people don't have it other people don't understand it and other people don't wield it therefore a tremendous power differential comes about as a result of this tremendous knowledge differential this is what is meant by the term knowledge is power no not quite knowledge applied in the world is power and knowledge applied in the world by a group of people who have a whole lot of it used as a weapon against other people who don't have any of it is a power differential in the world that's how they amassed a crude and apply knowledge as power so this is what their god represents don't get hung up on the descriptions or depictions of the god itself it's an idea it's a representation it's a symbol please understand that it has nothing to do with oh this is the god of the bible and so we look at this as the opposite of that and this is the god we've made in this image and we worship it it doesn't work that way it's a symbol what was it in the ancient world it's the dark sun it's not the true light the true light the true sun the true light the truth the star of our solar system is one of the sons of the universe that the real creator of the universe put there that's been referred to as god's son that's where the whole idea of christianity being represented by the son of god came from it's an allegory the same is true in the dark allegory of satanism and dark luciferianism lucifer is the light looks fairy bringer of light to carry the light to to ferry the light it's all an allegory who's going to wield and control that light is it going to be distributed like knowledge should be distributed in an egalitarian way to everyone so that they all understand and then we level the playing field so people can't be manipulated and controlled because they all have that knowledge and understanding and it's common sense or is a small tiny elite group going to own and control the knowledge keep it back from other people keep it occulted hidden or keep it sequestered in some way where other people are saying oh we don't need to look at that that's evil that's the occult it's all all manipulation game and then they wield the knowledge in a dark way for the purposes of deception control manipulation and ultimate rulership how many times have i said this though folks once again i'm not look folks i'm not knocking the people who are right and asking questions that have already been answered but i can tell you haven't been through my material this is the fucking problem this is the problem how many times do i need to say go through all my material and then you'll essentially have the basic understanding that i have you want to get all the details of that understanding then you need to read source material and books get the arc go through that that'll take you multiple lifetimes probably okay you won't go through it all because you're not as 100 percent um obsessive like i am i am obsessive and i don't mean addictive there's a difference between addictive and obsessive i have somewhat of an obsessive personality meaning when i go into something i go into it all the way i'm not a half layer i'm not a dabbler if i go into something i go into it all the way ask my family members what i was like when i was young i had an obsessive streak since the time i was like three years old okay if i'm gonna go into something i'm doing it all the way i was never a half-asser most people are half-assers you want me to look into eight hours of material how about 8 000 hours of material lazy piece of shit i don't care who i offend or turn off you don't want to learn this go fuck yourself it's your karma and it's your fucking burial it's your funeral s okay and i'm not talking to any caller in particular right i'm just putting that out there as a general overarching statement you don't want to know your fucking funeral okay i'm not worried about not offending anybody anymore you got to understand this is going to affect your life your loved one's life your freedom their freedom the end whether you understand that right now or not make the decision to go deep into the knowledge or it's your karma and ultimately it's your fucking funeral all right so once again a lot of these are going to be questions i've already answered many times once again go back to the beginning of the podcast listen to it in fucking order okay and once again people go mark you're turning off your audience you're gonna you know go easy on these people you didn't follow my instructions it's not my orders i'm not ordering you don't have to do anything you don't want to do you don't want to do it it's your fucking funeral but don't do it then stay ignorant but again you're asking me to take of and i'm putting this out there for people to clarify it's not something i haven't clarified in the past it's kind of all repetition at this point you know very few people have asked me to cover anything new or clarifying anything new but then again there is nothing new under the sun right it's probably going to be just clarification and repetition from this point forward because i've largely put out all of the important things people need to understand to become awakened and enlightened they just haven't really gone through it or done that work so you know i'll keep reiterating go back to podcast number one you probably won't have any more questions when you actually listen through in order to 231 or later all right let's go to another caller all right let's go to kaylee kaylee you're live on what on earth is happening welcome to the show hi mark hey how you doing i'm all right considering i'm living in melbourne and it's turning into a police state but okay aren't we all um i just i'd just like to say i actually admire um you're expressing your sacred gift of anger i find it quite inspiring thank you put me off in any way yeah i enjoy it so some people can handle that lightning bolt strike some people have a hard time with it you know again i made a decision a couple of years back that i was not going to put on a persona here on air anymore and i did back in the early days of what on earth is happening i i knew that my personality was like a lightning discharge you know and if it entered people they would not be able to handle it and so i really put on a persona in the early episodes and i said you know i it was it was a mask or a persona of this is mark from what on earth is happening.com and i'm gonna kind of try to take it easy on you so you get it you know and now i i really can't even stomach that i can't do it anymore i literally cannot withhold my true personality which was always like that but i will not withhold it by been put on a social mask for others 231 episodes in i can't do it i won't do it but i thank you for being able to handle it and you know telling me that you know it's okay if i go you know that angry from time to time i'll try to keep it relatively balanced though but thank you yeah no hundred percent it's actually inspired me and i got talking to a guy called brandon in the discord chat room and we decided to collaborate and create some videos and podcasts that are now up on his website called more loads more problems.com and also on bitchute so fantastic give the site again or the youtube channel whatever you want and so it's more lawsmalproblems.com and it's comedy all on youtube and on bitches okay so more laws more problems dot com okay and you can get that on youtube and bitch shoot and then what was the uh you you gave a youtube channel and comedy lol okay so it's actually brandon's website and his a youtube channel but we've collaborated on some things because i felt like i needed to start doing something and he's kindly helping me with that because i'm not really great with technology i did want to take the cause but we've got a time difference in australia so i couldn't do it unfortunately well i'm glad you're getting personally involved in the great work it's good to hear i love hearing that from my callers that's the thing that makes me feel like there's hope that people are actively putting websites together and youtube channels putting this information out there to the public i love hearing examples of that because that's what this is all ultimately about folks is taking right action in an age of deception disinformation lies and the destruction of human freedoms so uh kelly that's a great job i'm very glad to hear that you're doing that with others and again people can team up if you're not technically inclined but you feel like you've got a great way of presenting information you team up with a technical individual and you share the responsibility there's always ways of dealing with it and you know doing it as a team it doesn't have to be super individualistic you know i have a team here thankfully you know over time that i was able to put together i was very alone when i first started doing this it morphed into a team dynamic and you know i'm very thankful for that because i won't be able to do this to the level that i'm doing it without my team so um you know kelly i really appreciate that you've gotten involved in the great work to that extent so um if you have a question you can go ahead and fire it away yeah sure i have a question so it's regarding a you know the mandatory mask wearing which is in england and melbourne at the moment well it's it actually comes in next week on wednesday they're giving us time to go and buy face masks um which i'm not gonna do but um i just wanted to ask do you think it's not only a symbol of submission but would you say it's also a test for the level of consciousness absolutely that's what this is you could call it a shit test folks you know that's all it is it's saying how much shit are you going to put up with as a as a whole society as a culture as a species that's all it is it's all it is because it's not effective look if i thought there was actually a deadly illness that was airborne in any way i wouldn't take chances you know i talk about how important health is how important you know good nutrition and diet is and doing juicing and blending of fruits and vegetables do you think i want to get sick you know this isn't about getting sick this isn't about helping anybody this is a psyop to destroy human freedom and secondly viruses are not what we are being told and they don't work the way we are working okay and you could say you could say all you want then it's all the traditional methods of science the people who are going to take that position or the people who have not actually done the reading and research in the scientific literature and i'll tell you what they've done we can do a whole show on it we could do a series of shows on it okay here's what you you go into the literature and you show them the peer-reviewed studies i'll bring them all up folks i can go over tens of them on the show because there's hundreds of them out okay you go into the literature you bring up the the published uh paper in whatever journal it happens to be and they explain here's what we attempted to do we took a hundred well people and we took ten sick people and we made them all sit right next to touch contact sleep in bed with you know all different methodologies to attempt to have those sick people infect the healthy people and they say say we did this for you know multiple days could not produce transmission of the of the alleged contagion right so they went more extreme and they take mucoid material they allow the sick people to sneeze into trays to spit into trays the cough and the trays right and then they put that tray right in the presence of a well person and hundreds of people we're talking about at all different stages of the disease you know tens of sick people hundreds of well people cannot through mucoid nearness to their mucoid alleged infectious material transmit the disease so they go more extreme they make them you know put put a bubble around their head sneeze into it then put that bubble plastic bubble like an inverted fishbowl with obviously room to breathe it's not an enclosed thing they make them sneeze blow their snot out all over it cough all over it spit on it spit on the inside mucoids running all over dripping down the inside of the inverted fishbowl bubble put that over a healthy person's head hundreds of them can't produce the infection in the healthy person can't transmit it having them breathe in mucoid material right so they go more extreme right having them sit directly in front of a healthy person they breathe all out in a deep way breathe it all out their breath as hard as they can breathe out and the healthy person sits two inches from their mouth and goes and sucks it in sucks in deep into their lungs and holds it their expired breath can infect anybody hundreds of people they do it to no transmission no contagion no infection so they say this isn't this still isn't extreme enough we need to go more extreme we're gonna have them collect all their mucoids all these sick violently ill people collect all their mucoids pull it up into syringes and inject it subcutaneously inject all the mucoid material under the skin of healthy people still can infect them and make it sick and we believe in traditional virus transmission of disease and the traditional models of contagion this is how dumb people are because they've never read any of the science they've never read one page of the hundreds of thousands of pages of this very meticulously researched and experimented new field of virology and immunology they haven't done one second of research don't even know that it exists because the occultists in the mainstream media will never tell you that these fields of science exist and then the dumb population walks around like they know something they know exactly a bag of dog shit is what they know and i'm not going to say it nice to people anymore they don't know shit and they think they know when they have an ill-informed opinion and have never read one piece of medical literature or scientific study from any journals or any scientific institutions that have done tons and tons and tons of experimentations to the contrary of the official narrative or model and then you think you're informed and you are not informed so that's why i get a little bit upset with people who think they know and want to go off on their high moral horse virtue signaling when they have exactly zero knowledge and they only have 100 percent ill-informed ill-read opinion given to them by known liars okay so um i even lost threat of the question uh kaylee so you know i kind of went off on a tangent there uh the original question was is a mandatory mask wearing a test and the answer is it's a shit test okay all it's there for is not to try to explain to people that this is going to make you healthier or prevent the so-called spread of this so-called contagion which is actually a natural exosomal process of the body for toxin removal that's all what we're calling viral diseases most viral diseases are okay but all it is is a test of compliance and obedience that's all it is and it is part of the psyop for the occult controllers to gauge how well has our psyop disinformation and um compliance narrative worked in society how well is our social engineering our socially engineered perceived psyop agenda how good how well is it working and how well is it spreading as the real virus amongst the dumb ill-informed masses of the human population that's all it's a test for and let me tell you something folks they understand that actual numbers as do i as does anyone who is actually paying attention it is the overwhelmingly vast majority of the human population that is buying it i would say 95 or greater of the human population buys it lock stock and barrel hook line and sinker in its entirety with absolute religious fervor absolute religious fervor i would say five percent or less of human beings in the entire world know that something is even amiss or not right or there is a agenda even afoot in any way okay most people don't even know that there's an ulterior agenda happening or a psychological operation happening let alone understand the particulars of it let alone understand the real science okay so that's what i'm going to start to endeavor in future weeks to go deeper into and explain in more detail and guess what you nazis in youtube you nazis on facebook you're not liberals you're not liberals you're not certainly not classical liberals like as am i i'm a classical liberal and i'm a classical conservative i'm not a neo-liberal nazi and communist nor maya neoconservative nazi and communist because that's all you are you're a hybrid totalitarian you're a nazi in some views and policies and you're a communist in other views and policies because you're a totalitarian piece of fucking trash a totalitarian piece of fucking trash i'll say it right on the platform that i broadcast on youtube you're a nazi communist totalitarian piece of fucking trash go ahead and ban me and show them who you are bitch same thing for facebook you'll never stop me from speaking and getting the information out there because i stand in righteousness and truth and i will never back down and that will provide all the protection i ever require in this three-dimensional domain of space-time do your worst okay and i am not afraid fear is not just the mind killer it is the soul killer and that's where most people are at and i will never capitulate to fear it is the force as i said on show number one which shuts consciousness down and prevents it from evolving no fear or if you even have any move forward with right action in spite of it and the universe will come to your assistance most people do not understand that principle and are not acting in that capacity and that's why we're losing because we don't have that level of courage even in the truth community if everyone had my level of courage and this is not an arrogant or egotistical statement as it is simply a true statement if everyone had my level of courage we would already be free there would be no tyranny we would be free now the problem is is we have not worked upon ourselves significantly enough to develop that level of required courage and that's the problem all right so i hope that answers uh kelly's great question about masks thank you kelly let's go to another email let's see um let's see all right my question for you is masks have been mandated in my prominent province in quebec canada i've not worn one who will not wear one in any context i agree and i neither will i people i love and care for are fearful and lack the courage to not comply exactly what i was just talking about very synchronistic then i would come to this email now what do you recommend for these people how can they become brave and bold and not comply to this psyop well once again what is the factor that eventually leads to courage what do they lack psychologically that will lead to true courage they lack true self-respect self-respect truly is the only thing that will ever inspire a person to not comply with evil why don't they have self-respect again this is going low on the totem pole or the tree of evil okay you need to look at my broad my presentation i'm sorry or you can go into my extended form of it which is referred to as cosmic abandonment this all goes down into areas of deep seated psychological trauma brought about by bad parenting these people ultimately had bad parenting and or were abandoned in some form or fashion by their parents it does not mean that they had to be physically abandoned or left alone by their parents they could have been psychologically abandoned emotionally abandoned mentally abandoned not given any good information morally abandoned okay there are many different forms of abandonment so self-respect often comes from abandonment issues psychologically which is very traumatic most people will never look at their abandonment issues from their bad parenting and they will simply have them deeply rooted nested subconsciously and they never bring them to the surface and they go you know what my parents didn't really do a good job raising me morally they never taught me morality my parents didn't do a good job giving me good food so that my brain would work well they bought the shittiest cheapest food they could find that's a form of abusiveness and or trauma right my parents were never really emotionally connectively connected with me they didn't really care about how i felt or what how what i was emotionally going through all they cared about was my physical comfort right i myself went through some of this you you have to recognize it you have to admit it you have to acknowledge it first that there's that problem and that you're traumatized by it then you have to work through it and you don't work through it just by blaming other people because again you can understand why it exists what the that person went through and then you can let go you don't even have to forgive you don't even have to forgive the person that conducted the trauma true forgiveness as i as i have described it spiritually is a two-way street that person has to be sorry and recognize what they did at a conscious level and then they have to apologize for it and then say they'll never do it again and prove that they won't do it again through their behavior then you could slowly trust them and forgive them that's what real forgiveness is real forgiveness doesn't go oh i don't know whether you change or not but you're forgiven that's bullshit new age forgiveness okay real forgiveness means the person's truly sorry and they've made true amends to try to repair the damage that they have done letting go however is different spiritually right so that means the person may not be repentant the person may not even have acknowledged their wrongdoing but you're going to let it go you're good you're going to acknowledge it and say here's what they did i acknowledge what they did i understand the harm it caused and i understand that they did it and i was a child and i was traumatized by it that's called working through your trauma and grief subconsciously and bringing it from the subconscious mind up to the level of the conscious so that you can actually work with that shadow material that is no longer buried this is often what addicts cannot do and why they go deeper in depression and addiction but this is what most of society is wrestling with and cannot bring themselves to do because you have to tell hard truths to yourself and it's fucking painful and it's nasty material that you don't want to drudge up and you don't want to look at and you don't want to confront it's called dealing with the fear that's deep inside your heart and mind and wrestling and struggling with it in black ugly muck and mud you know but if you do that there's spiritual gold on the other side you know because you're dealing with who you really are and you're understanding i'm like this because of this you know this is what led and informed my behavior and why i behave the way i behave why i am a coward and why i am lazy and why i am apathetic and why why i am ignorant and i had to do all these things because i was all that i was trash i was the kind of trash people that i was talking about in the past i had to admit that to myself i had to conquer my ego by admitting that and accepting it and going through the long hard tragic dark night of the soul in which i went deeper into depression deeper into self-loathing but then realize here's the underlying causal factor reasons this is what the shadow work is folks there's no magic button there's no magic pill there's no magic technique you don't do a little bit of meditation sitting in a lotus position and all of a sudden that magically goes the fuck away it doesn't work like that it's hard deep painful mock work that no one wants to do it's getting grimy and dirty in your own muck and sleaze and acknowledging what a total piece of garbage in many ways in different aspects and areas of your psychology and your mental and emotional and spiritual makeup you have become and acknowledging that all of that is there and then you have to start right there that's where you begin you don't deny it and you don't refuse to accept it you accept all of it and take on the full brunt of that personal responsibility deep within the self then you start self work how many people can honestly say they have gone through that process and kept going through it very very very very few okay so that is the unfortunate answer to that question about what will create self-respect leading to self-courage is that level of shadow work best of luck inspiring it that's the real alchemical magic see that's why i put this work out to people and tell them that don't blow smoke up other people's ass and tell them it's going to be easy it is going to be the hardest thing you have ever had to do you will need to sit with yourself and acknowledge the worst parts of you that's the answer you didn't want to hear that one but that's the truth all right let's go to one more caller uh mifala i believe i'm pronouncing that correctly miphala mephila what's up mark hey you're alive welcome yes i can got you i was told i got eight minutes so i wanna talk about the importance of starting at podcast number one yes um so i've stumbled upon your work right after i got out of my new age funk after waking up to a bunch of truths about reality and i found your natural law seminar and i binged that twice okay and i've watched it a few times since then i was like why don't i start a podcast i started the podcast right and um anyone who's listening has not started at podcast one gotta explain how vital that is because you pack so much you break down reality as a whole and no one does no one does as well as you do first of all um thank you i appreciate that yes i appreciate you saying that thank you yes um and you know you've put me onto the great work and i i so what i learned and what i want to emphasize here is uh i'm just going to nail a few things you cute uh things you have wait we have less than three minutes so i'm just giving making you all the time you got it well all right vitriol the importance of vitriol uh the power differential worldview healing uh objective reality courage sovereignty of the mind body and spirit internal monarchy external anarchy natural law leads to god gnosis your beliefs are irrelevant and what your work does and the way you present it in the podcast specifically you start at level one and uh you ease people into the ability to take it to level 100 or infinity it was very meticulously calculated and formulated as a stepwise initiatory progression from someone coming at this with very very little knowledge that is where i began so i appreciate you acknowledging that and uh explaining that to the current viewership or listenership thank you right one quick comment sure i would be a cultural marxist with no knowledge of self on the streets right now with antifa or i would be a new ager meditating and praying in my room ignoring objective reality and not doing great work you know just my friend that is that is powerful that's powerful for me to hear and that that gives me some hope and and makes me feel a little bit good inside so thank you that's really powerful to hear yes yes sir thank you um if you if you want to hear more about my story and how you helped um i am monad of creation on instagram hit me up i i noticed you're on there a lot but i i would love to just let you know you know you've put your mind heart and body into this your soul like your your soul into this great work and this is fun people need to see the the uh the balance so keep vitriol and love you know you can you gotta have both you gotta know how to do both so much thanks to you mark thank you you literally saved so many people from an imbalanced world to you and appreciate you brother thank you brother i really appreciate you saying that and uh continue moving forward with your contribution to the great work great to hear ladies and gentlemen that's all the time that we have on this edition of what on earth is happening so um i want to reiterate um please go back watch all the podcasts in order at your own pace that's where you'll get the maximum benefit incredible callers as always on this question and answer session i think um even the email you know we're going to continue that as a practice here on what on earth is happening and i'll i'll try to cover these in future episodes uh all the uh questions that people have you can fire questions away to questions that what on earth is happening dot com i think there'll probably be thousands of questions that'll pile up in that inbox for sure right remember ladies and gentlemen government is slavery and we'll see you right here next week thank you for watching [Music] [Applause] [Music] is [Music] don't you ever [Applause] [Music] you

What On Earth Is Happening Show #232

Topics: *Questions & Clarifications Call-In Show Part 2, the Importance of starting at WOEIH Podcast #001 and going through ALL of the WOEIH Podcasts IN ORDER, Erroneous understanding of Morality and Anarchy is harming the effort to educate the public because since First Principles are being obfuscated, Endless useless debate on Social Media dilutes and destroys the reception of Knowledge, Teaching Morality and Natural Law is not accomplished effectively via text on Social Media platforms, Formalizing Knowledge through Spoken Word via podcasts, video and live streams with added visuals is a VERY effective method of Teaching Natural Law, Disabling comments on content platforms to keep non-sensical Noise from corrupting the Message, Most people allow their Ego to stand in the way of the Reception of Truth, Publishing original content and archiving it for posterity, What is Dross?, Natural Law, Morality and Anarchy are NOT subjective opinions, If you're not outraged, you're not paying attention, Righteous Anger is a Sacred Gift, Being "soft" and easily frightened or offended is NOT a Virtue, Natural Law has nothing to do with the behavior of animals that are not Human, Mainstream Media is the most dangerous Virus, the Mainstream Media and Big Tech are lying Satanic pedophile-protectors, Satanists view the Police and Military as their Pet Attack Dogs, Satanists OWN the Police and Military, Satanists OWN ALL institutional infrastructures, Self-Loathing is why Order-Followers are Emotional Children, People should STOP COMPLAINING and do the Great Work THEMSELVES if they're not satisfied with how someone ELSE is already DOING IT, Learning useful skills to disseminate and publish information, Dark Occultists are intelligent, skilled, united and driven, while the public is ignorant, unskilled, apathetic and lazy, the concept of an Occult Master-Mind, the soon-to-be-introduced One Great Work Network, Many hands make light work, Those who make peaceful revolution impossible, make violent revolution inevitable, the Hegelian Dialectic of Communism vs. Fascism, Transmission of illness does NOT occur how Mainstream Media and Mainstream Science say it occurs, Humanity has adopted De-Facto Satanism as its main Religion, Mark Passio's official paperwork as clergy of the Church of Satan, Truly Intelligent human beings will learn from the mistake of others and not need to repeat those mistakes for themselves, Questions for Initiates to the Mystery Traditions, the Impossibility for Freedom to exist in a society that embraces Moral Relativism, People who make endless comments on Social Media and YouTube are the DROSS of Humanity, There are no Atheists in foxholes, the untimely passing of Tracy Twyman, Bob from Cincinnati!*

freedom man that's what it's all about [Music] you've got to groove on freedom like the good book says [Music] welcome you are listening to what on earth is happening this show will discuss the topics of human consciousness mind control natural law the occult and all issues that affect the freedom of the people of earth what on earth is happening will endeavor to shine light upon the darkness of our world and to offer empowering solutions to the problems we face as humanity approaches its critical moment of choice and now here is your host mark pascio [Music] welcome one and all you're watching what on earth is happening i'm your host mark pacio my website what on earth is happening dot com ladies and gentlemen government is slavery and here on what on earth is happening we are ending slavery one mind at a time welcome everyone thank you for joining us here today this show is live every sunday from 3 p.m to 6 p.m east coast u.s time today is sunday july 26th 2020. this is episode number 232 of what on earth is happening we broadcast live at waterunearthishappening.com show we simulcast on vimeo youtube and facebook so we have a great show lined up for you here today we were originally going to attempt in the first half an hour or so of the show to have a couple of guests but some technical issues intervened and we are not going to be able to bring them live on the air today we'll try to push our guests back to next week's show should everything go well technically that being said today's show is going to be an all-call-in show as we did last week for most of the show we are going to take your calls through our discord server you can go to what on earth is happening dot com slash show to get the link or slash discord to go right into the discord server discord is a simple video conferencing app that will let you call in for free anywhere in the world into this broadcast so we'll be going to your calls live for questions and clarifications regarding any material that has ever been covered in the entire what on earth is happening podcast series as always i'd like to remind new viewers or listeners that this show is a series of cumulative information what that means is that you cannot listen to later shows in isolation you have to look at it as a course okay just like a a a public school course in a university for example you would not be able to join class number 55 never having heard any of the classes from 1 through 54. okay what on earth is happening works the exact same way this is a course it's an online course look at it like that okay you wouldn't jump into a college course three quarters of the way through the semester and expect to understand the material being discussed this show works the exact same way as a college course okay it is a stepwise progression of information in which the later episodes have pre-requisite knowledge and material that must be absorbed and taken in and fully understood from the earlier episodes so you have to go to the beginning of this entire podcast series and listen in order at your own pace if you're new you don't want to start here that's a completely wrong incorrect approach and i'm going to start saying this every single week no matter how repetitive and laborious it becomes because many new listeners do not do this and then they cannot hear or understand what is actually being said no matter how many times they listen to it they do not have the prerequisite knowledge covered in earlier episodes so please if you're a new viewer go to my website waltonenorthishappening.com click the podcast tab and go to podcast in order with the red link and listen in order at your own pace and then you will understand what we are discussing and talking about in the later episodes you have to listen to them in order okay that being said let's jump over to my slide presentation it's ready okay this is the artwork for today's show again this is episode 232 questions and clarifications call-in show part two we started doing this last week i thought it was a great idea to let viewers ask questions and request clarification on topics because folks let me tell you something people still don't have a firm grasp of the philosophy that i discuss here on what on earth is happening i see it all over in social media and all over the internet a lot of people have very halfway half-assed understanding of these topics these philosophical and moral issues they and many of them think that they know in great hubris they listen a little bit they watch a little bit they've heard a couple of my videos and then they think they they understand it fully and deeply and most people i have to say sadly do not fully and deeply understand this material they many of them think that they do erroneously and what i wanted to have this week but we'll have to push to next week is some people who are active on social media who have seen this very dynamic of many people thinking that they know but they have halfway knowledge and um they want to speak out and hear themselves talk but they do not have a firm moral or philosophical foundation regarding natural law and anarchy and then they are spreading their lack of awareness in a lot of false hubris and pride because they believe they have it fully figured out when they do not and they have not gone deeply enough into the material to understand the truth regarding natural law and the truth regarding anarchy and there is not an opinion regarding these things there is an actual objective truth regarding these matters they are moral matters they are not matters of subjective opinion moral matters have a truth an objective truth regarding them because morality is objective and many people are still stuck in their subjective ill-informed opinions regarding these philosophical and moral matters and yet their ego is in the way and they believe they know and they talk out and then they teach start teaching others when they don't have a firm grasp on first principles and when that happens ultimately they're not doing the movement anything good they're not doing the our movement to try to morally educate human beings any kind of a service whatsoever they are actually doing harm and they're creating obfuscation within the movement they're doing harm to the effort of trying to reach out in any type of a wide scale effort and morally educate the public and you know i have to say that my entire take or opinion on this uh you know and we will get to your calls once again to join us uh just click the call in link on the show page what on earth is happening dot com slash show click the call in i'll go through a little bit of a monologue here before we go to your calls because i want to emphasize some things okay we're also going to take emails and i'll give the uh email address for that as well it's going to be questions what on earth is happening.com that's the new email i set up last week if you want to email questions in the show you can send your questions or request for clarification to questions at what on earth is happening.com but i just want to say a little bit more about this you know i go i occasionally monitor where the pulse of the public is where the where their consciousness is at on social media i don't interact that much okay on social media i usually generally tell people about what i'm doing what my projects are and how to get to things that i am currently doing on social media that's what i use it for i don't sit and argue with people on social media i really think that social media is somewhat of a trap to be quite honest i think it is there to allow a lot of people who have no knowledge whatsoever or a lot of people who have half-assed knowledge to just endlessly debate and argue amongst themselves and this does no teaching it provides no true experience of learning on the part of a potential student most potential students get very quickly frustrated with that because they're not receiving any good quality understanding okay or instruction or advice and what it ends up being is a chorus of noise of ignoramuses and people who have incredibly huge egos that they cannot remove or get out of the way to actually teach well okay and what happens is the message ultimately gets diluted and ultimately lost i think engaging people in any type of a philosophical or moral discussion or argument through text in social media is completely doing a disservice to the entire freedom truth and teaching natural law movement if you even want to call those movements i believe the people engaged in that effort long term are not helping now there are even my guests that i may bring on or probably i'm going to bring on next week may vehemently disagree with that and i personally do not care that is their you know uh take on it i'm giving you my take okay i in other words what we could do is even have a difference of opinion regarding what methods are effective do you know what methods i believe are effective and i think i've shown that they are effective effective methodology in teaching natural law and morality is not going on to a social media platform of any kind that is controlled by someone else and then talking through text first of all tremendous amounts of context get lost through texting okay i don't care how clear you make the language you can always refine language through speaking when you send a message via text it's permanently that way the end okay what i think is effective is formalizing your knowledge through some form of spoken media whether it has video attached to this to the speech or not that means making an audio podcast an audio mp3 doing a live audio stream or making a video podcast where you do a live video stream and then you formalize your teaching you put it out in a well constructed outline of information or you put it out in a well constructed presentation with visuals as we do here constantly on what on earth is happening okay so if you do it that way and then you disable comments now if some people are going to vehemently disagree and say oh that's censorship no it is not it is you putting your information in a formalized way on your platform and then saying i am going to allow this information to stand on its own as is without distraction of a chorus of other voices if people want to go into the knowledge they can watch or listen and if they don't want to spend their time to do that then that's on them i feel that is the most effective method of teaching and learning i think comments are a distraction i have always taken this approach and guess what that's why i'm effective and believe me i am effective okay i'm not as effective as i would like to be because of how much ego and distraction there is online and how much disinformation there is online but when a serious student encounters my work and decides i'm going to put the effort into learning this material and i'm going to take my ego and push it to the side no matter what i hear i'm going to engage the material based on its truthfulness its veracity when a student does that removes their ego then the transformation can occur that's called putting your consciousness in the modality of proper reception and you have to get the idea of what the teacher is says looks like sounds like out of the way that's not his problem or her problem that's your problem that's your ego and you know what too few people do this and too few people teach this that the student's ego is the problem and i don't agree with toning down the message guess what if you want to do that and tone it down that's on you that's fine if you want to do it that way many different people can do it through many different methods okay it's called it's not a one-size-all approach okay there's different strokes for different folks some people will not be able to hear the message from mark pacio because of how abrasive and straightforward i am and guess what i call those people little snowflakes little babies i don't apologize you're just not an emotional adult and you can't handle somebody saying the truth harshly to you that's my personality i don't give a damn whether you can't receive it that way i have no intention of changing my methodology or my personality if you don't like me turn my show the fuck off period the end and i don't give a shit that's your karma and ultimately it's your fucking funeral okay because i'm explaining the truth about what's taking place in this time of slavery that is occurring in our world if you can't hear it like a a man like a grown grown-ass man or a grown-ass woman that is not on me that's your ego that is in the way so you can say whatever you want regarding that in your ego but guess what it's your ego problem it is not my problem as long as i speak the truth and i say what is true anything else is your problem not mine so i'm tired of hearing it and i don't care what your opinion is on it and guess what stop fucking telling me to do it different it's not your fucking business i'll do it how i want this is my platform and my show go tell yourself to do it different you're free to do it your way and show me how it's done and when you're as effective and you've reached as many tens of thousands of people as i have then you have room to talk punk okay so i'm not interested in hearing it anymore from people go do it your way asshole all right so i'll butt back with more ego you want to display ego i'll butt you right back with more ego that's what you'll get my point here overall is ladies and gentlemen you are not really helping the effort of teaching natural law and doing the great work unless you are putting out original content on a platform of your own that content and letting it stand on its own and archiving it it's not a fly-by-night thing you know where you don't archive it in all all in one place that's what real teaching is that's called assembly of course material you archive it for people so that they can go back and watch it at any time and that's what i have done here with what on earth is happening freely unhindered sitting there on a facebook thread and arguing with an idiot does nothing to help this cause that that doesn't change anybody you know what changes someone in their heart and mind and soul when they sit and engage information and they look at it deeply and they go into it in a very deep and profound way and they are then honest with themselves about what they are hearing and then they are honest with themselves about how they think and how they behave and a tiny percentage of people are doing that largely because the formats we are attempting to engage them on are completely ineffective and and people insist upon thinking the way to change hearts and minds is through facebook arguing on facebook it's a child's imbecilic approach quite frankly now that being said if you are going to open up some type of a forum or public space on facebook and you want to allow it to be a free for all you are going to see it quickly degrade because what you are doing is you are opening up the floodgates and you are allowing all the dross to pour in look up the word dross d-r-o-s-s it's the vocabulary word of the day folks it means low-quality material it means stuff that really doesn't belong in there with the high-quality stuff and there is dross in people you engage with a large group of people you are always going to have some quality people that are going to be in the very tiny minority and then you are going to have a large group of people in the in the entirety of the group that are dross okay they are the chaff okay they are the sludge of the group all right and all they're going to do is obfuscate bring ego to the table they're going to just cloud and muddy the waters and if you engage in a public space you will see invariably 95 or greater of the participants are dross they are not quality individuals and then when i advocate for the position that we should not allow the dross to act as the teachers of the group so what this is like is like saying to someone who has no formal understanding of any form of higher level mathematics for example a calculus four level class okay and you allow someone who doesn't even have an accurate understanding of arithmetic operations to go in and start yelling in the middle of the attempt to teach people a calculus level for class in mathematics in higher level mathematics okay imagine what that would do to the potential students if you are teaching a foreign language class and it's advanced foreign language like french level three conversational french and you have someone coming in there that doesn't speak a word of french and going i'm going to just start talking in english and you're suddenly going to know how french sounds and and is constructed and how you can speak to other people in that language and you're going to say that person is just as valid as a native french speaker who speaks it fluently and can teach it no that's incorrect there is a reason that people have different levels of understanding and are more qualified to teach material that has a truth if you just want the group to be flailing away with wild opinions that's one thing and it doesn't matter like oh what kinds of food what kinds of uh you know um uh ethnic cuisine are palatable foods and how do you prepare them well guess what that's an entirely subjective opinion group and you can go and have people fire away thousands or millions of opinion and they'll all conflict and contrast and guess what it all ultimately does not really matter because that's all a matter of taste and subjective opinion but when you have something as important as natural law and the concept of anarchy and you know that these have definitive truths regarding them and are not matters of subjective opinion if you just open the floodgates and allow that quote conversation forum whatever you want to look at it as to be a complete free-for-all with absolutely zero moderation you are not doing the community any kind of a service you are actually harming the educational effort and outreach and guess what i don't really care if anybody agrees with that that's also not an opinion that is actually what it will do that is the truth regarding how that dynamic works and it is not my subjective opinion regarding how that dynamic works that is what will happen to any course material that has an objective truth to it just like mathematics or a foreign language if you don't agree with that you're actually incorrect it's not my opinion there is a truth regarding that it is an objectively true statement not my opinion and for anybody with half a brain in their skull you will understand what i've just said is objectively true it's called common sense and most people don't have it okay so next week if we can get it together technologically okay and i get very upset about things like this and i'm gonna just briefly say i'm going to have a discussion with some people from social media regarding this dynamic because now because we've implemented some moderation in a group i've helped and admin who needed help and when i offered the help he gratefully and thankfully accepted the help it was not an ultimatum to him it was not a takeover it was a it was not a request it was a offer of assistance that was gratefully accepted for anybody who is not in the know regarding what i'm referring to we'll clarify this next week okay because rumors are floating around social media that i'm trying to act as some kind of a sensor of other people's language it has zero to do with that folks that is a lie and a misconstruence of what took place a group administrator who started a group totally lost control of the quality of the content within a group on social media because him and his other administrators did zero to moderate the quality of the content coming into the group it descended into an absolute free-for-all of nonsense ego and completely untrue statements regarding material that does have objective truth and when i saw that and asked if the administrator slash owner of this area of facebook acknowledged that this was indeed a problem he fully and wholeheartedly agreed yes this is a problem yes i see what you see and if you are offering assistance i will gladly take assistance because quite frankly he said he was at the end of his rope regarding what to do to corral this okay and yes it did quote need to be corralled or reeled in because it was so folks it was so out of control i'm going to briefly tell you how out of control it was before we go to your calls here's how out of control it was i was getting up in the morning and just flipping through a little bit of social media i do this occasionally to see where the pulse is i had just woken up i was still halfway groggy i'm laying in bed i'm flipping through my phone a little bit and i'm saying let's see where the consciousness is at okay this is how i gauge where people are at and what my work is to do and what i i need to be able to accurately inform other people that their work is to do regarding the one great work okay so i saw things that were being posted in this one form or area or facebook group okay and it was so outrageously horrific that i literally was physically shaking regarding how poor the content of teaching and communication of the truth of the matter regarding natural law and anarchy were within and among the members of this group it made me that angry and people will go don't let things like this get you that angry well folks let me tell you something if that's everybody's approach why fucking do anything why wake up and do bother to do a thing regarding human freedom being destroyed just let it be destroyed and accept slavery accept your bondage and accept your fucking chains okay if you don't want to exert your will to try to improve the teaching and reception of this truth that is not a matter of opinion then just lay in a corner and rot okay you're not involved your will is not activated your actions are not activated okay and so don't tell me not to get upset my being upset is righteous indignation which drives my right action that's called the sacred gift of anger i am getting angry for a valid reason and purpose it is lighting a fire under my ass to eventually do something about it most people just this false stoicism look hey there there's good forms of stoic emotion where you get down to the thing and you just do it and you say okay this is the time to actually implement it and do it and you don't have to stay angry while you're doing it that's constructive stoicism but there's forms of stoicism that are forms of mind control and that is like never get angry about anything that's new age bullshit we have to ultimately realize that when things are so wildly off base and they're doing harm to the effort they're doing harm to the one great work effort we have to try to set it back on track and sometimes our anger will help to motivate us to do that so i'll have the admin and some other moderators now explain what occurred and they could even tell you honestly how angry i was i don't even care if they say that publicly because i was damned angry i was so angry i had to step away from the discussion and go and calm myself down you know that's how angry i was because there's blatant government trolls and disruptors out there and when we do absolutely nothing and we let them hold sway we let them have total and we let them take the reins you know what's happening to this teaching the quality will go in the toilet bowl it will go straight into the toilet and we cannot let that happen folks it's hard enough to teach this in a quality way to quality students let alone just saying have a free-for-all and say whatever the fuck you want about natural law or anarchy we had people in this place saying well morality is relative teaching the very thing that destroys human freedom people saying humans are the highest power in creation teaching that in this group people saying natural law oh that's how animals behave that's the natural order of the animal kingdom and humans are no different than that why shouldn't we apply animal behavior to human beings that's not natural law there's a truth regarding that people saying we have dominion over the earth and it's creatures animals belong to us to take their lives and use them however we want this stuff like this is being said in a group called natural law and folks i don't own the term it's a philosophical term that describes a set of conditions and laws that exist naturally in the universe in nature that are inherent to creation and work objectively and flawlessly everywhere in creation in the entire 3d manifested universe and beyond so the term doesn't belong to me and that's why i said to the administrator i can't give you an ultimatum you're not using my name or you're not using the my website's name i gave other administrators of facebook groups in the past folks to just be blatantly honest full disclosure i gave them ultimatums if you don't clean up this group take my name off of it and that's my right to do so if you're going to use my private name as an individual for a group and you misrepresent my teachings or allow it to descend in a free-for-all of total misinformation and untruth don't put my name on it put your own fucking name on it and then let let your name turn to shit you're not gonna do that with my name okay my name is essentially my property and essentially what you are doing regarding that is you are besmirching my good name because i do understand this accurately i'm not going to have people out there teach it inaccurately with my name on it and that's why i respectfully ask the administrator i can't give you an ultimatum and tell you what to do with your group but i can make recommendations and i can say do you want help and he gratefully accepted so we'll have more on this next week and you know what i just want to uh you know there was something else i wanted to finish saying regarding it i'm it's slipping my mind but yeah you know if if it doesn't have my name on it i clearly can't give him an ultimatum okay but if it does have my name on it i could tell people take my name off of that group i don't want your bad ideas reflecting on me and then having people think that's what i teach okay so just want to clarify that we're going to try to get about three people as guests on next week if all goes well and you know uh bring them on to help discuss this and explain what really occurred truthfully and objectively without all the conjecture of people who were not privy to the meeting and what actually occurred okay or they have a skewed idea opinion or understanding of what actually occurred okay so we'll clarify that hopefully next week let's get into the well i have a couple of slides before we go to the calls um let's go back to the slides we're still accepting donations for the natural law documentary folks i think next week i'm going to have some pictures of some things that we are we were doing this week i re-recorded my dialogue to make it higher quality in video and audio we have some photo shoots of some of that stuff of doing that the main timeline is in we are going to add and clean up some of the new dialogue and the the whole editing process is going very well we are on we are projected as completely on schedule to have this finished certainly by the end of the year i'm not 100 promising that as a delivery date it could slip into early next year but right now as it stands we are on track and if you want to make a donation help complete this to pay uh for the editing of this a hundred percent of all donations go directly to production costs please do not uh just go to the straight donation page go to gifts dot what on earth is happening dot com and click the documentary donation link okay that is where you can donate for the documentary completion not at the donate page you go to gifts dot water on earth is happening dot com if you make a donation through the gifts website you will receive a free copy of the completed documentary on flash drive and dvd uh for your donation there's five tiers donation tiers at gifts.what on earth is happening.com also we have new t-shirts flash drives dvds um the complete mark pacio one great work collection solid state drive all very popular items at gifts.what on earth is happening.com thank you very much to anyone who has donated to gifts we appreciate that and it helps fund our efforts here at what on earth is happening i've gotten some new camera equipment as a result of your donations we have been able to pay a video editor as a result of these donations i've been able to get a new uh mics uh you know an entirely new camera set up here so this is what funds the effort your generous donation so thank you to anyone who has ever donated to the walden earth is happening cause again i'm going to be continuing to announce that we are working in proud cooperation with autonomy unlimited autonomy is the brainchild of richard grove of tragedyanhope.com you can learn more about the autonomy project at getautonomy.info i am going to be um basically now an affiliate an official affiliate of autonomy we will be getting that affiliate link posted to the what on earth is happening.com website we'll probably have a banner and a sidebar button posted for autonomy this week on the waterearthishhappening.com website uh they're setting us up with that uh official affiliation and we will start promoting that for them uh that is done uh in cooperation in return for the generous uh help that they are providing for the what on earth is happening cause uh through technical assistance so thank you to autonomy you guys uh have a tremendous team that you have put together there i highly recommend uh people check it out and uh thank you for your assistance in the cause for the cause of what on earth is happening it's greatly valued and appreciated and was so very needed so thank you the how to become the true media seminar online seminar uh to teach techno technology and publishing skills uh has been filled for quite some time uh we are we just completed class number three last week we're going to be giving class number four this tuesday july 28th the webinar itself begins at 7 pm to give people one hour of time to enter the webinar and then we officially start class instruction promptly at 8 pm eastern time please be on time you have one hour to join the webinar that's plenty of time to get in or you might miss important information that i will not repeat later please keep a notepad handy to write down your questions because i will go to your questions periodically during the class instruction we then break afterward for two hours after uh the webinar ends at 11 pm officially and then i am always going to allow at least two hour uh post discussion time post post-class discussion time i will let the meeting the webinar run until one am eastern time for anyone who wants to stay in and continue informal discussion and or ask questions to myself or any of the other members of the class please wear headphones if you're going to interact if you're going to remain silent headphones are not necessary but if you are going to uh participate with your voice please do wear headphones because if you do not wear headphones then what happens is uh your your audio echoes back into your microphone and creates a distraction to me and other class students and participants so please wear headphones while in the class if you are going to interact with the class if you have any technical problems whatsoever please email us we are here to assist you to resolve those issues the email address for any technical problems for how to become the true media webinar is true media what on earth is happening.com and we will take that very seriously and get on that and we will help assist you until your problem is resolved this has been very productive so far the class is going great we are going to be continuing with customization of operating systems and getting into hard drive and of different forms of flash drive and optical storage methods and techniques and showing that hardware this week in the class that's what we're up to in the class so i really look forward to this week's class thank you to all the students you guys have been great so far and looking forward to continuing class instruction this week in class number four so that being said the call in link to join us here on water north is happening uh live for this uh all call-in show for questions and clarifications is what on earth is happening dot com slash discord discord meaning uh you know cutting the cord of a telephone line right it doesn't mean um you know chaos and things like that it's a little acronym or not an acronym but like a you know a clever word meaning cut the phone cord you're not going to be charged for this it's all free it's basically open source software and you could basically call anybody anywhere in the world using this no long distance fees it works over the internet it can connect you uh via voice or camera and anybody can set up a server like we did here and that enables a lot of participation capabilities and uh you could set up different roles on the server you know it's got simplicity to it and then the complexity is there if you want to use it so it's very adaptable and versatile software that's why we chose it for what on earth is happening they've improved it greatly since we started using it i've had a lot less problems with it recently the developers are doing a good job moving the development forward so you could download it at discord.com app i believe is the uh the url for that if you want to download the desktop version but if you just want to get into the call-in room there's the link on the screen what on earth is happening dot com slash discord you can email questions uh regarding anything that i've ever talked about here on what on earth is happening or clarification requests to questions at whatonethishappening.com i just set up this email last saturday or sunday and we've already gotten lots of emails so i'm going to be reading more of them on the air and fielding questions in between audio calls so i just want to do a couple of quick slides before we jump in this is me waiting for people to realize that the mainstream media is the most dangerous infectious virus okay we might be waiting until we're skeletons for that one folks you know just sitting and waiting and waiting and waiting and the public consciousness doesn't move a millimeter it doesn't move a nano meter sadly okay people still naively and insanely believe the mainstream media is telling them the truth when they are satanic pedophile protectors that's what you are in the mainstream media you low-life scumbags you are satanic pedophile protectors and you are paid whore liars and guess what your cohorts in big tech and your cohorts in so-called social media your nazi trash censorship lying satanic pedophile protectors and you're going to be held accountable in creation for your crimes against humanity you are criminals against humanity you are criminal traitors against humanity i'm talking to google to apple to twitter to facebook and even to vimeo vimeo took down my last podcast because i talked about exosomes and how viruses are not what we think they are fuck you you dirty rat fucking nazis at vimeo you're trashed human beings your fucking garbage parents were fucking trash and you are a nazi fascist fucking sensor there is a truth regarding it the science is not settled you think you know and your dumb ignoramuses and you don't know and you haven't studied it and you're not privy to the science you listen to garbage fascist trash satanic pedophile protectors in the mainstream media and you think you know and you're dumb fucking ignoramuses who don't know fuck you you dirty nazi pieces of trash how about that ban me from your whole fucking platform i could give a shit you won't stop me you don't know the will you're up against son you won't stop me motherfucker try your worst you try your worst you dirty rat fucking nazis you don't know who you're up against that should be everybody's attitude regarding what's going on in big tech and social media and guess what i can say it like that because i'm in the right i have the truth regarding it and you don't yeah here's here's the dumb idiots in our society saying not now to his wife not now carla cnn is about to tell me what i believe that's what you fucking jerk-offs at vimeo and youtube and google and facebook and apple and twitter this is this is your retarded ass thinking that the television's informing you and your horror media masters are telling you anything resembling truth you're a rotten little punk fucking bitch child and you're ultimately a fascist fucking nazi piece of dirt i'm not going to sugarcoat it to you rotten piece of fucking trash that's what you are you're trash fucking garbage and your parents fuck you up that's the truth of the matter not my opinion on it and folks i was describing this scene my my in-house artist made a beautiful rendition that is highly accurate actually okay i describe this scene of a satanist laughing and as a matter of fact take it off for now because i want to get i'm going to on the fly at his laugh which i neglected to put into the slide because i we had all these technical issues and i was trying to do that earlier and actually neglected to do it folks i make mistakes i don't entirely have my act together all the time either okay so let me go into where i need to go in on my other machine over the network and get this audio file and actually include it so just give me a moment this won't take that long but you know my point here is i described this scene of what occurred at a ritual that i attended in the late 1990s of satanist and i really want to describe what occurred once again before we go to calls i know i'm taking up a lot of call times we'll get to your calls okay so let me um uh get his mp3 file of the left i got it and i'm going to add that in to the slide momentarily this will take one second i described this a couple of weeks ago because what i want people to understand is who the satanists really are that we are up against okay and most people don't know who they are they don't know anything about what they're like or what their networks are like and they have this completely false understanding of satanism and the kind of people who are involved so i want to try to describe that to people okay give me one moment to get the audio correct here in my presentation okay let's see if this plays it immediately or i have to click it it might be correct we're not getting any uh sound right all right so off the click for the sound that's what i wanted thank you thanks for bearing with me doing that folks we had a lot of technical trouble before the show and had to cancel three guests so um you know that's why i neglected to do that uh putting that audio in there i got it corrected on the fly so i was in a a ritual home it was a private dwelling a private home in rural northern maryland in a city called whitehall there were about i'm going to say or guesstimate 35 to 40 people in attendance in the entire house some of them were the owner the actual family in the house some of them many most of them were people who came in from out of the area and they had a large multi-car driveway they had a uh large multi-car garage it was what you might describe described as a rural mcmansion of of a sort i wouldn't say that it was anything approximating extremely large homes out in the hollywood hills like beverly hills stars live in but uh it had some acreage to it um it was fairly isolated not tremendously uh and um the people were certainly uh pretty rich uh low upper class i wouldn't say they were you know super rich elitists at the top of the food chain of the financial structure but they had considerable money and lived in a very nice home there was a area set up with some basic banquet tables and catered food after the actual ritual took place in the basement of the home and this was what is known as on this day a compassion ritual or a sympathetic ritual some grottos describe it differently a sympathy ritual or a compassion ritual what that means is they gather as what they refer to as a mastermind meaning that they all have intent and clarity of focus on one goal as i recall and i don't know i don't remember exactly what the goal or focus of the ritual was but it was to get some type of legislation passed in the local area they had point people in the local government and they wanted to pass legislation and get it voted through in the council where where they had people on that membership border council board okay that's what the ritual was for to direct energy toward that goal to direct intent and focus toward getting that goal accomplished and then they go out into the real world and do it okay so it's not just ritual magic it's ritual magic combined with willpower to actually do it in the 3d domain as well but then put the energetic focus behind it as winds in the sail of that ship so this is what a gathering of satanists looks like from one who has been there with them namely me that is me depicted in the foreground on the left when i was younger okay not too bad of a rendition and this is really what it looked like folks as as closely as my artist could draw it based upon my description this is so far few people have attempted to draw this this is the closest that i have seen anyone come to getting it exactly as it was on the patio outside the door is that gentleman in the back wearing that little headset okay he has a gun on his hip okay or you know on his left there is what is depicted there a holster he had a traditional military slash police style haircut you know that short jar haircut he was definitely germanic or anglo-saxon in his heritage pretty big guy you know pretty muscular standing outside guarding the satanic ritual home and ritual chamber inside after the ritual concluded we came up to this reception area that had outside of it these hexagonal windows that you could see out onto the patio area and then there were all the cars parked out beyond this guard in the driveway area he was guarding the place the whole time and did not participate in the ritual when we came up to the reception area where food was served and discussion was took place for a couple of hours after the ritual concluded this is what the people generally looked like they had taken their robes off they were in three-piece suits most of them i was in a simple pair of black slacks and a black button-down shirt with sleeves wore a baphomet medallion which is a satanic inverted pentagram with the goat inside of the pentagram you can't see that depicted in this drawing because my back is turned for the most part the individual i was talking to looked almost identical to this it's as good of an artistic rendition as i've seen an artist do to what he actually looked like he was saying this is a pretty good paraphrasing if i don't get it exactly correct it's a very accurate to the spirit of what he said paraphrasing look at him out there meaning the guard on the other side of the window who was a maryland cop who was an active duty cop in the on a maryland city police force i do not know which city it was but he was an active duty police officer not in police clothing he was in plain street clothes they were either dark blue or black i'm pretty sure they were black similar to what is depicted there okay and he was off duty at the time a member of the grotto a police officer guarding the other satanists on their request to guard them outside of the home and not participate in the ritual while it was taking place but instead to act in the capacity of a guard or what is known in freemasonry as a tyler okay who the satanist in the foreground who i believe his name was i i i i'm trying to remember but i cannot even recall this guy's name and it bothers me um i'm not going to attempt to do that on the air i'll try to do the best of to my ability to recall it but he was saying and laughing hilariously at this guy guarding the house he said look at him out there guarding us he's one of our dogs one of our pets and i basically said what do you mean and he's like they're our animals they're our dogs our pets we own them all and i'm like who do you mean what are you talking about and he said we own the police and military we own them all all of them throughout the world we could call those shots we conduct their behavior like a trainer of an animal tells the animal what to do and because they're well so well trained and so well indoctrinated into what the master wants that they do it by rote it's at the snap of a finger he said they sit they will sit when we tell them to sit they will attack when we tell them to attack they will kill they kill when we tell them to kill just like the well-trained animals they are this is who your mas what your masters think of you little children in the police and military the order followers out there who are doing the bidding of these people who are sick satanic pedophiles and this is an acclaim this is the truth of the matter they are the owners of all the governments they are the owners of all the religions they are the owners of all the media they are the owners of all the secret societies they are the owners of all the police all the military all the education systems all the publishing houses all the financial institutions all the banks all the central banks all the think tanks you could go on and on and on they're the masters and owners of that entire infrastructure of the world you want to think that that's untrue go ahead and think whatever the fuck you want that'll never make that statement that i just made untrue and it will never make it untrue that they own the police and military and think of them like this from their lips to my ears this isn't a secondhand account i was in the room with them if you don't accept that or believe that fuck you you're not going to tell me what my life experiences were because you asshole weren't there and i was so i want to thank mark my in-house graphic artist for doing a fantastic job in rendering this as closely to accurate as he could based upon my description awesome job man thank you thank you this is a tremendously valuable effort that i have asked for and finally finally someone has come in and started drawing things that i have witnessed or concepts that i want drawn that there is no image that you could search an image for and here's what he sounded like he then did a huge belly laugh after saying this about the very person doing his bidding outside on the patio guarding him here's the belly laugh let's see if this comes through [Music] [Laughter] ah [Laughter] okay i was monitoring that my headphones that is almost identical especially the the last one at the end where he was almost gagging you could hear he couldn't barely even get the air out because he was laughing so hard like when you laugh so hysterically at something that all the breath and wind leaves your lungs that is almost identical in that last part to what he actually sounded like how he was maniacally laughing at this off-duty cop doing his bidding that is what they think of you you rat punks in the military and police you're a tool you're a child you're a naive little child you're an order following child who has mommy and daddy issues you hate yourself deep down inside in your heart you hate yourself deep down inside in your soul your immoral trash who probably had immoral trash as parents and guess what i'm not going to be light on you i'm not going to tell you oh it's no fault of your own it's your fault for not dealing with your trauma or your reasons for self-loathing and self-hatred it's not anybody's fault but your own that you do the biddings of psychopath the bidding of psychopaths like this it's your fault as the saying goes you are not were not responsible for the trauma that was done to you as a child during your childhood but you as an adult are 100 percent responsible for fixing yourself and healing yourself of that trauma as an adult you have not done that and therefore all the moral culpability is upon you and i'm not going to sugarcoat that or tell you that there's an excuse for your continued immoral behavior you are responsible for your continued and moral behavior in doing the bidding of satanists who own and control the organizations at the highest level that you are a willing member of you are in a cult whether you understand that or not that is the eternal objective truth of the matter if you do not accept that your ego is in the way and or you are a naive child who does not have the facts at your disposal i will not tell you oh it's okay if that's not your opinion now let somebody else tell you nicely that if you can't hear the truth from me it doesn't make it untrue it's still true nonetheless and i'm not going to sugarcoat my words or delivery because it's too fucking late in the game for that if someone else wants to do that please stop asking me to change my approach you don't own my behavior go take do do do me a favor take my advice and go do the fucking work yourself i know i'm not interested in your suggestions or opinion and i quite frankly don't give a fuck about them and i don't care whether you think my method is ineffective i'm going to do it how i want because that's my free will decision to do so and you have no right to fucking tell me to do any different and i don't want to fucking hear it anymore do you understand assholes do you understand the words that are coming out of my mouth even my own listenership i don't give a shit what you think about my delivery stop making suggestions to me go out and do the fucking work yourself you're a lazy bag of shit who is doing nothing to help after all the effort that i have put into doing this and then i dare the the fucking unmitigated nerve and gall of people saying do do it different mark fuck you that's going to be my attitude you're an in great and you don't understand what i've gone through you don't know my fucking trauma you don't know my fucking cathartic out outlet i'm not bottling up my anger and getting cancer you want to do that you fucking do that don't tell me i have to do that and i'll show as much or as little emotion as i fucking won you haven't walked the fucking miles i've walked in my shoes quite frankly and guess what if i if you weren't doing the work that i've been doing i'd know your fucking name by now boy or girl i'd know your name by now we're going to have some people that have walked down this path coming onto the show i'm trying to get some pretty heavyweight people who have been involved in satanism okay i'm going to reach out to a former friend who was involved i'm going to reach out to someone who was in hollywood and try to bring them on who saw this firsthand and i'm going to reach out to someone in a very high level bloodline family who has already verbally agreed to come on to the show and you're going to hear it firsthand from him and he will corroborate what i am saying with no prompting on my part he'll tell you how it really works you assholes who think that satanism is a fucking bunch of dumb children in black robes and a a thicketed part of the forest in a clearing sacrificing animals you don't know what the fuck you're talking about and you have a hollywood version of satanism that told you what it is and you naively believe the assholes in hollywood go back to the slide this is what a meeting of real power brokers in satanism in the satanic network looks like that's what it looks like they're not out there in the forest sacrificing animals you dumb fucks okay that's what it really looks like from someone who's been with them i'm just sick of the ignorance folks i can't take it you know i've been doing this for too long and i'm burnt i'm burnt folks i'll say i'll admit it and say it right out there to people i i'm sick i'm i am at the level of total breaking point when it comes to other people's ignorance after this long of putting the truth out and still seeing they are no closer whatsoever to the understanding or reception of what the actual world situation that they are embedded in actually is and most of all their egos so in the way they don't want to learn or know that's why i get upset and angry and guess what all the people who say mark i think you're doing a good job you're not helping actually teach it formalize it formalize it don't go on facebook and try to convince assholes on facebook egoic pricks on facebook that you're gonna change their hearts and minds it doesn't work like that it's a that's a fool's folly game formalize your message learn how to use publishing software write a book make a podcast make a video don't shout into the wilderness of facebook or twitter you are wasting your time you are wasting your energy and it is not helping that truly is ineffective the way i have done my work has been effective the problem is i'm one of the only people doing it that way that's the problem and then all the other people who want to see it done a different way don't do it they tell me to do it their way fuck you i'm not here to do it your way i'm here to do it my way i don't want suggestions on how to do my show i'll do it how i want asshole and i'm telling you i i i'll react how i want to react i'm going to react to hammer the fucking message through to thick-headed fucking people and nobody's going to tell me not to do it that way fuck you so here's the deal get out there and do the great work on your terms don't tell anybody else how to do it could you imagine if i called up somebody like michael tesarion or jordan maxwell or david i like yeah listen michael do me a favor uh all the work you've put out over the years yeah all the voluminous volumes of work regardless of what you think of me right i want you to do it a different way could you imagine the hubris on my part telling someone like michael tessarion to do his work a different way based on all the the the years of blood he's put it and it doesn't even matter what he thinks of me i don't he doesn't even have to respect me for us to actually be peers in the work you can think whatever about me that you want that doesn't change what i think of what somebody has put out into the world and how they have formalized it i call up david ike david listen yeah you know your last interview on london real look i would have said this differently could you imagine what an asshole i would have to be to do something like that listen david yeah uh you know i would have said it a little bit differently than that and you know i don't know about how you're going on you know london real and talking about some of these topics because i might have done it differently than that think about what you sound like but but then make it even worse make it even worse folks okay make it be someone who has done nothing publicly not even me i would be a huge asshole emailing even one of these people who have done voluminous bodies of work on this material to say to them i think you should do it differently imagine that then then take it a thousand times worse the person saying it has no work to show for themselves zero work to show for themselves publicly they're a little quiet fucking church mouse that has never said a fucking thing publicly because they're a coward could you imagine and now put yourself in that position and say you're getting emailed and bombarded yeah guess what you don't fucking matter none of you people actually matter you're not in the fight you're not on the battlefield you're a little whimpering fucking child complaining about something you've done nothing about you're a little whimpering fucking child complaining to others who are generals on the battlefield and you're doing nothing that's all you are you're a whimpering asshole but i'm saying this to my viewing and listening audience imagine if you poured your soul and sacrificed what you wanted to do with your life for this amount of years and this it's 2020 and you've been doing this for 15 fucking years and this is still how people this is still where their mindset is at when you've told them over and over again i don't give a fuck what you think about my work it's not your business to tell me to do it any different do your own work and then go and reach people how you want to reach and then guess what we'll have 10 000 people with 10 000 different approaches and some of them will work for 10 000 different people and we'll be reaching more people but no they don't want to do that you just want to hear the bullshit come out you want to hear liquid diarrhea pour from your fucking gullet and you want to hear your own shit filled mouth talk see i'm talking i've been talking for these several weeks folks to all the people in ego all the people out there and guess what it's a lot of my viewership people will say you're insulting your viewership yes i am yes exactly most of my viewership is doing exactly squat they don't know how to do the great work you don't even know the methodologies you don't know how to use the technology because you know what you spend your time doing yapping at somebody else's work or yapping on social media to a bunch of fucking retards you're not doing the great work you're not helping i want to go back to this slide momentarily and we are going to go to calls it might be half the show but we'll do it okay because i have a lot to get off my chest all right with how i feel every day this is my catharsis so it will take as long as it takes this is one of the only times i start to feel a little bit better by getting it out publicly to the world i'm not going to get cancer internally by not releasing this rage and admittedly you know what folks these days i have a rage problem i can say it and acknowledge it and it's part of me and i accept it but guess what it's justified rage and that's another thing don't tell me how to deal with my emotions i know more about psychology and emotional development than most people on the planet i'll deal with it how i want and work through it how i'm going to work through it i want to say something about this image then we'll go to your calls i want you to imagine all of my years of work i want you to imagine my level of knowledge in both the understanding of how things work in the world and in the human psychology and in the technical space as well in the publishing space in reaching other people's minds in helping to change minds through external influence of other people take all of those qualities of me as an individual right and now amplify them and attribute them to every person in a large gathering i attended satanic rituals where there were upwards of 75 to 100 people in the house imagine 100 of me duplicate and i mean me mark pacio imagine 100 of me duplicated in one room imagine the knowledge the will power the skill sets and the drive all in one spot and having total single-mindedness of focus and drive imagine that level of power i'm one person and look at what i've been able to do with this level of knowledge technical expertise and drive and willpower take that and amplify it by 100 times in one place all gathered in one place with single-mindedness of focus and intent and imagine the kind of damage that that could do societally that is what satanism has going for it that is what this network of psychopaths have going for it and let me tell you something i said this to my video editor this week he asked me what did you think of w what was your mindset when you were involved i said i have never been in a room where i have felt like i was in a gathering of personal peers more so never felt it before never felt it since when i was involved with these satanists who are who own and control the world i felt like i was in a gathering of people who had my level of intelligence my level of skill sets or beyond some of them had far beyond my my skill set level as as knowledgeable and skillful as i am in doing what i do some of them were far beyond my level of skill set and guess what they had just as much focus intent willpower and drive that i than i do except you know what they're all focused on the dark great work not the one true great work of teaching what truth is what natural law is what freedom is and how we should be manifesting it no they're doing the exact opposite they are doing the dark great work of enslaving and ultimately exterminating humanity and people want to know why they are winning this is the reason they are winning this is the reason that the universe is actually allowing them to win the universe has respect for courage and will it has respect for courage and will we don't have it we have a little bunch of quiet fucking church mice saying oh i'm not going to talk i might draw attention to myself you're timid cowards yeah i don't want to put my real name on it if i put my real name on it they're going to know who i am and they're going to try to come after me you're a timid coward you're not doing the great work you think you are and in your hubris you believe that you're a timid coward with no true will or drive these people have a focused intent and willpower that they all use as one mind as one as they call it mastermind the mastermind in satanism is not one human being it's a group of human beings all with the same focus and drive and willpower and skills all doing the same work together to accomplish the same goal i i hope i am hammering in how powerful these people are and then other people these new agers and this total right brain imbalance go off and go you're giving them too much credit mark you're trying to say that they're way more powerful than they actually are no asshole you don't know who they are you weren't there with them you don't know what their skill sets and willpower are you have no idea what you're up against you're a little naive fucking child who wants to believe the world works the way you want it to work the way you believe it works and you're wildly inaccurate son you're wildly inaccurate and your ego is in the way of seeing reality as it actually is that's you that's your reception problem it's not my problem in telling it you unapologetically forcefully and harshly that's not my problem because i speak the truth it's your egoic reception problem boy so i'll meet you ego to ego i'm not gonna talk to you like a little fucking baby sitting in a high chair being spoon-fed because you're not that or actually you are that but guess what you shouldn't be that not at this point in your life and not at this point of what's going on societally in our world i am here to talk to adults who get the message and then we'll do something about it all the rest of you you are dross dross vocabulary word of the day look it up and that's what you are most of you most of my own viewership i don't care if i lose viewership down to nobody i don't care anymore this is not here to just reach out to the everyday average golem imbecile your golem goyim imbeciles most of you i am here to reach out to the quality potential teachers who are going to activate their behavior and do the one great work in whatever way you want to do it and you do it your way and i'm not going to tell you that you can't do it your way just don't tell me i can't do it mine and we'll be out of each other's way and we'll both be doing the great work and then we will reach different kinds of people different strokes for different folks folks understand what that means if i had a whole community of people actually doing the great work we'd be making some headway in progress and folks that's what the one great network is going to be about and just to clear that up a lot of people have a false understanding of what the one great network is going to be it will be a buy invitation only let me just even rephrase that it will be a by my invitation only the one great network will not be open it will be open the content will be open to the public but the publishers or hosts who are invited to join the network will be by my invitation only this is not going to be a public work understand this folks okay maybe i haven't described it effectively enough and guess what we're well into building it now and guess i want to thank my web development team prior publicly okay you guys are doing awesome work you're actively now engaged in the one great work okay and i could tell i want to say it publicly for everybody hearing it out there because you deserve the thanks and gratitude you are taking it very seriously okay i very much appreciate that you guys are knowledgeable and skillful and now you are lending that expertise toward the one great work and i very much appreciate what you guys are doing to help me launch this network thank you thank you i consider you my peers in this effort thank you i have very few okay so i want to say that publicly so people acknowledge we now have a web development team thanks to people who responded to our call for help that's why we don't have to make this whole show uh any kind through on any kind of a pay wall to pay for that our our our asking of assistance finally came through and my i'm sorry so i'm so grateful like my voice is shaking it brings it chokes me up it was so needed i was really drowning okay and to a certain extent i still am emotionally alright so people don't know what i've been through recently and most people have no compassion for it at all and they just want to hound and hound and hound and hound i'm human i'm flawed i'm not perfect i feel things i'm not an emotional stoic robot i will deal with that and work through it i will not ignore it nor will i bury it deep down inside and cause physiological illnesses no one will demand that of me okay so i think it's important to acknowledge when people are really doing great work the setup crew the production crew here thank you guys i would not be able to do this alone all the people who are helping on the documentary thank you so much you guys are doing a great job i know i get cranky when technical problems happen and we have debates and arguments but thank you guys for persistence you are if nothing else my crew is persistent they will battle to get it done i can see their will and their care in that persistence so thank you and i don't even say that enough to them so that being said let me start switching over uh let's uh go back uh to the slides briefly yup if you want to uh pick up any hard copies of my work t-shirts et cetera promotional items go to gifts.oneerthishappening.com we have new t-shirts in men and women's we have flash drives dvds we're going to have new coasters in soon we've been sold out of coasters for a while we're working with somebody to make some high quality wooden coasters in sets it's going to be great when it's finished we're going to be working on that this week we have key chains buttons stickers uh founders items that's my punk band all of that at gifts.oneerthishappening.com you can go to the donut the arc page this is a offer of information this is research material that i have amassed over the years that helped me to come to the understanding and conclusions that informs all of my work you can get the ark through the shipping instructions you can receive them by going to what on earth is happening dot com slash arc or clicking the arc tab on the website and you can fill out the form there to get the shipping instructions also if you want to make a straight donation not a donation to complete the documentary but just the straight donation to the cause we have 11 different um donation methods on the site a ton of cryptocurrencies paypal venmo uh etc uh you can also donate supplies from our wish list okay our wish list is or that button on the right uh there's technology supplies listed there when we require them i want to say thank you to everyone who's been donating and thank you to people especially who have been donating from the wish list folks i've put a few wish list items on there of items we've need needed to continue doing this work everybody has picked up every one i mean that that's humbling it really is like it's incredibly humbling to me that people care about the efforts that we make here to that extent that we have no items listed there right now but occasionally i will post items so if you want to make a donation that you know what it's going to and there needs to be no question on what it will be spent for make a donation a technology donation through there so thank you to people who have done that when i see those items you know sent here and there's nothing left on that site we have what we require to continue this effort it's extraordinarily humbling so thank you from the bottom of my heart alright that's all the slides let's jump out of the presentation software and i'm going to go over to discord all right let me get my headset on so we could start taking calls okay we're all set for questions and clarifications so let's go to if i can find the individual here let's go to leslie from canada you are live on what on earth is happening episode 232 welcome leslie oh thank you very much mark can you hear me absolutely you're coming through loud and clear oh thank goodness i got through i'm so sorry to hear about your loss too i really feel for you there so thank you um you're welcome um i started working on as you were talking about these pig pedophiles they're just unbelievable what they do to children and um i started working on a book in 2015. i watched a lot of michael tacerion and you and uh and uh so i got i was doing the book and then strange things started happening and as you see i lost the courage like i had epstein in there i had the queen in there i did the whole um you know figured out the network that they have across the world and and then i lost as some things started happening and as you see i lost the courage to do it because i got scared because so many people were getting murdered well hey this is what happens people start going down the rabbit hole and realizing what a dark world we actually live in and a lot of them don't have the courage to continue some people it makes them so um you know destroyed emotionally or mentally because they cannot they don't have the internal strength like shields that that need to go up like you know in star trek they put the shields around the ship where the internal component of their being gets hammered so hard by this truth that the shields go down and then they just start taking a beating they they don't have the emotional strength to deal with the reality of our world as it actually is and it's sad and you again i have to also look at it as you go you got to have compassion for people like that because it's traumatic we are talking about accepting that the world is a traumatic world it does trauma to a lot of different people we're all affected by that trauma but then we have to become emotional adults who are going to deal with and go through that trauma i'm dealing with the fact of not only am i dealing with trauma but i'm dealing with totally incompassionate people that want to hammer on you know that i should somehow do something the way they want when they have no say over what goes on here at what on earth is happening this isn't a public uh open source project folks this what on earth is happening belongs to mark pacio okay the information doesn't belong to mark pacio let's clearly make the distinguishment okay clearly make the delineation in understanding what on earth is happening is my outreach effort i own it singularly no one else owns what on earth is happening but me that is my property okay the truth and natural law is owned by no one okay the truth about how creation works how the laws of nature work that is just is okay so i don't own that okay so you can say um you know if somebody is not teaching what is true that's not true because it's objective but no one has the right to tell me how to run what on earth is happening because it's not their property you can even make suggestions you can't make ultimatums but i have already told people i really don't want anybody's suggestion on how to run what on earth is happening i'm unconcerned and uninterested in what you think about what on earth is happening i don't want constructive criticism on my operation quite frankly i am going to do it how i want to do it i am not here to tell you how to do the great work and i don't expect any of you to tell me how to do the great work that's called mutual respect for a peer i would know more call jordan maxwell and go jordan i don't like the way you're talking about this could you imagine my just total gall the gall that it would take and i've put considerable work out but could you imagine the gall of me disrespecting someone like jordan maxwell i don't care what anybody thinks of jordan it doesn't even quite frankly matter what i think of him or he thinks of me it is unmitigated gall and hubris to go to someone who has given up their lives jordan maxwell regardless of what you think of the man has given up his life to bring a lot of this material forward into the public domain for understanding could you imagine if even someone like me who has done a considerable amount of that great work would say jordan i don't like the way you're doing your work do it differently i think it'll be more effective if you do it this way like i say could you imagine what an asshole i would have to be to approach someone like jordan maxwell and do that but that's what i deal with every day and i don't think people see it they don't understand how maddening it is and it's very easy for people who aren't doing this work to say just ignore those people no you don't understand that's part of the mind control they are under they've been taught that that's acceptable perfectly acceptable behavior and that they're not being an asshole for doing that they think they're helping don't tell me how to do my work do your own work you will reach more people it won't be just mark pascio what makes you think you should just leave it to me to do that's what i've asked people from the beginning if you think you have a handle and an understanding on it how about getting up off your lazy cowardly ass and getting up and doing the work for yourself and it's called learning how to do it there are methodologies for doing this the right way it's called learning modern communications technology and modern publishing technology whether you like it or not that is the way you reach people in the modern world it doesn't matter whether you like it or accept it you don't have to that's the way the world is it's called engaging the world on the terms that the world is that's called stop dreaming that's the second part of initiation stop lying to yourself and stop dreaming stop imagining the world is some other way and it is the way you want it to be right now no you know the world is the way it is you have to engage on the terms of the war as it is so i'm sorry leslie continue no i'm sorry for interrupting it that's exactly it because i've i've published 11 books i've done documentaries i've had scholarships for my work i've been funded by the national film board so i know how to do this now my book i had a bunch of links in my book because of course i want to do it and i see that like you say i tell people do you know that the queen stole the 10 children from a camp um residential school uh in kamloops which is the province beside me and they look at me like i'm crazy well leslie don't bother with that you know this world's like they get glazed over right it they don't they really believe that ignorance of all the negativity that is happening in the world equates to bliss they think what the how the world they believe that the world is going to change through this new age process that i'm going to describe they believe that if we ignore all the evil in the world that the evil will magically go away from the world they actually believe that that is how reality works could you imagine that that's the number that the satanic new age movement did upon their minds they're not learning natural law i leslie i have been around the new age community so many hours of my life that it is almost incalculable how long i have spent time around them in their presence i have never heard one single solitary soul in the entirety of what we would refer to as the new age community or surrounded by the new age teachings ever speak the term natural law not even once and someone said to me once who was a new ager at a conference and i said we have to engage the world as it truly is and that means acknowledging the horrid evil that is actually built up all around us and she said i choose not to believe in that reality and i said no you choose not to accept that reality and you think you're going to change the world for the better in pure ignorance of that reality and this individual could not hear those words from me because they're still so deep in ego and believe that they're in a spiritual state of mind and out of that level of ego yes well like i tell them i said you're going to allow children to be raped what kind of people are we if we're going to let our children be raped to murdered and satanically uh uh sacrificed by these pigs and bastards the satanic cult and they just look at me like well you know there's karma leslie and i'm like you i just can't believe that you made me sick you know what they're saying by doing that this is an act these are these are this is commentary but it's excellent clarification commentary because do you know what they're saying by saying let god handle it right they're saying that what we do here doesn't matter that's ultimately what they're saying that's a form of total religiosity that is a form of a wildly inaccurate belief system they are saying that we can let the universe just handle that on the back end right no the world changes as we will for it to change because creation's will is ultimately our will and put into action and if we don't have that will to change the world for the better it does not magically change because the creator doesn't directly get involved the creator has given us the free will to involve ourselves to learn what the truth is and then engage in right action that is up to us and what we do with our free will matters here in the 3d space so it does and now that jeff kriebstein and all those guys are out like i have jimmy savelle in the book too but i did a really good job at linking it but all the links that i had for my you know bibliography and my proof and everything have been deleted from youtube and of course i don't use facebook so now i'm thinking dude you know how good is the book going to be and then with amazon uh they're deleting everything and folks let me just unequivocally say we're almost at the point where it's going to have to become a physical war we're very very closely approaching the point where in america where it can still occur weapons are going to have to be taken out at some point in the near future and i'm going to publicly say i don't give a fuck i don't care at some point we are going to need a new kinetic hot revolution to even give the world the chance to get it right next time around that is coming that time is coming okay it's our last standard that's it i mean once they start censoring information they are going to make the reception of truth impossible you could say let's build new platforms let's make it impossible to censor but guess what then you're marginalizing the information down to a very few people who are going to understand even how to use that type of technology once the internet turns into an entire platform of censorship it will become time to take out the physical weapons and deal with this and guess what i'll say that to a cop i'll say that to a judge i'll say that to an fbi agent i'll say that to the president of the fucking united states the human species is going to have to physically rebel against tyranny that was done to create this country and it will be needed done it will need to be done again to spread the message of freedom to the this country once again this land once again and the people living on it and to the rest of the world and if you don't think that a hot revolution is soon going to be necessary based on what is taking place right now in our world again you're a naive child and you want the world to work the way you want it to work instead of the way it actually works and it doesn't work that way at some point you need to acknowledge if it continues to descend into tyranny we are going to have to physically fight them at some point regardless of how much blood or lives that costs and i think we're going to get them on the pedophilia it's got to be hammered out there these are child rapists they're killing children they're sacrificing children their blood they're drinking their blood like let's get real right now if we don't stick up for our children we don't deserve to be humans we we might as well lose them unless we can't speak for our kids that's right and leslie look at what trump just recently said you know and people are looking to this person and somebody doing something he just gave jazlane maxwell he wished her well it's not a sarcastic wishing of well he actually said he thought she was an uh an okay human being in paraphrasing what was uh you know and wished her well in her ordeal you know i mean imagine this this is the girlfriend of a of a known pedophile it's not just a known pedophile someone running a pedophile ring a worldwide pedophile for the elites of the world for the elites and you know what i wondered is he got muzzled lately like i've never seen him with a mask on he got muzzled i wonder if they got to him behind the scenes or he was always with them or he may have been always with them you know that's why i don't put my faith in anybody in public office and never have this guy did a total 180 he's done nothing about the tyranny of all the governors that are going on in almost every state in the united states this country is in total fascist and communist tyranny and you you could argue those things are somehow different they are the same in their ultimate implementation of total slavery and anybody that still thinks fascism and communism are radically different again you're a naive child that doesn't understand the left wing and the right wing are dialectical wings on the same bird of total ravenous devourment that is what those two wings are left wing and right wing they are on the same huge demonic bird of prey coming to devour everyone they're not radically different and they're gonna both have the boots on our necks i mean the masks people are policing people are they got us policing each other now with these masks and that's satanic too isn't it mark over something they cannot prove they cannot pray that violent alleged viruses are transmissible find me the proof you will not be able to do it as a matter of fact there are tons of peer-reviewed studies and tons of journals that show they have attempted to infect people and i will continue to say it and i'm going to show the science i will show you the science you can go to pubmed articles right now that show that infectivity cannot be transmitted with even this sars cove two virus alleged virus okay i'm not talking allegedly that exists of what its nature is again the alleged nature of viruses are not what the mainstream media and mainstream science say that they are you can censor me from now till the end of time you rat fascists out there but you will never make that statement untrue scientifically you don't it isn't settled science you are wrong you are incorrect and you are morally wrong by censoring your and saying that everybody has to believe your incorrectness you are immoral for doing so you are a sensor and a fascist for having done so because you are incorrect regarding the source material and it is not a matter of who to believe you can determine the truth of that by studying the science and there is tons and tons of scientific evidence to show definitively that viruses do not propagate among human beings the way flawed scientific experimentation has suggested that they propagate in the past there is new and emerging scientific evidence to show we cannot transmit the infectivity of so-called viruses the way we think that they transmit person to person it is the the truth of the matter is it is dictated by terrain theory of toxicity in the environment and it is a it is an exosomal reaction inside of the body you can choose not to believe that but you are incorrect if you choose to believe the opposite of that it is scientifically provable and most people are not privy to the science because they are believing what is published on mainstream media who are lying to people instead of actually doing the trivium work of studying that scientific evidence for oneself and coming to an accurate conclusion regarding the observational data yes and can i ask you about how satanic it is to put put masks on assault it's a slavery muzzle it's a slavery muscle it's a cult mockery it is occult satanic mockery because these people know that this doesn't cause the type of health problem that the mass media has suggested that it does i'm not saying that it's not a problem or will not uh there is no illness and there is absolutely nothing to be concerned about okay what i am saying is it doesn't transmit the what to healthy people the way the media and mainstream science has suggested that it does that is overblown and the numbers are overblown they just recalculated in its public domain knowledge they recalculated the figures in florida and came to a determination that 89 of the figures were overblown regarding even infection i personally know and again all you sensors out there you want to call me a liar to my face come and do it in person to my face i personally know human beings who sent in covid test kits that never touched any part of their anatomy and then they came back positive how does that happen they sent them in blank telling people that they swabbed when they did not and they came back positive for covid19 infection explain that one to me either they're outright lying or the test kit itself was deliberately infected with whatever this thing is and you all you you trash out there in vimeo and youtube and twitter and google and apple and all or wherever else all you other immoral pieces of nazi dirt are at okay you won't look at that evidence cause your parents fucked you up little boys and little girls and your little rat sensor nazis you've been fucked up by wrong information and by your parents and your teachers and your schools and you think you know and you're a rat piece of dirty rotten fucking immoral trash whose parents and other fucking teachers fuck you up and i'll say it like that right to your face come see me in person and i'll say it right to your face because that's the truth and you want to call that an ad hominem attack you go right ahead and call whatever you want it's true nonetheless so leslie thank you so much for your call i thank you mark yeah i wish you the luck i thank you for starting to do the great work through publishing and i wish you the courage to come out openly and speak this information and testify to the truth of what is taking place in our world uh without fear and with courage so thank you so much i think i'll do it on video instead of the book so you've helped me with that so thank you so much excellent you could put a title card you don't have to go on camera put a title card and you know narrate you know or just put it put i've done many videos where i'm not on it i'm not in it like some of my works with tesla i just have the slides going and i talk in the background you know and that largely happened because our video was messed up we didn't get at good video footage but sometimes that happens you don't have to go on video speak with your voice you know what i mean and and just say say what you know to be true that's and maybe do every chapter yeah do every chapter like uh a thing on every chapter i've written and then and then start from there so they're small little bits right it's not the whole book so you don't have to do it all at once look at how long i've distributed my work over many many years so you do what you can and do it courageously leslie thank you so much thank you so much i appreciate it bye-bye all right let's go to someone who's been i think waiting in here the longest um trying to get to people who we haven't heard from and have been waiting in here a long time let's go to uh luca luca you're live on what on earth is happening welcome to the show hey mark can you hear me yes i can loud and clear perfectly no but actually i was trying to call in the last the last time but i had some technical difficulties uh so yeah you couldn't hear me no problem well yeah awesome awesome yeah i'm actually i'm calling in from germany um living near the cologne area and yeah very very very good to be on your show i'm a very i'm an avid student of your work thank you and uh yeah awesome well i was actually my question actually is i mean you said that in america there will actually be a situation where it might very probably come to a physical war i mean i have to say here in germany i think we already will be there definitely because the restrictions here are much tougher than i think in the united states and um i was actually want to ask you like do you have any like practical advice on how to like psychologically and spiritually prepare for this yeah i do it's not going to be something that anybody wants to hear you better go online into some dark websites and look for footage of real war and why and look at what it does of the human anatomy and then you'll you'll start to psychologically harden yourself you know i've watched quite a bit of stuff like that i don't really subject myself much to it anymore because it'll change you but guess what most of us will be seeing things like that in our lifetime sadly and it's all because we failed to teach and apply the principles of natural law as i have tried to help people to understand and help emphasize the importance of teaching since day one on what on earth is happening and i have to say sadly our community has failed at it largely it may not be completely failed permanently or may not be not capable of resurrecting the effort but where it stands right now is our community is an abject failure and i don't care who that offends i do not care who it offends take as much offense as you want take get offended as much as you like okay the bottom line is the call to do the great work and teach natural law has not been heeded in enough numbers so when that call falls upon deaf ears or apathetic ears or cowardly ears and people do not engage in that spiritual battle and effort what invariably will follow is a physical confrontation and or calling every single time by law of the universe in the natural domain it is an inevitable law that can never be changed either you change it in consciousness or horrific physical results manifest for those who don't understand that you you better start to learn it and start to understand how it works in nature and in law in law of creation in law of the universe because i'm telling you this is what we as potential teachers have completely failed at i think i've done a phenomenal job personally i would give myself an a plus plus plus plus plus compared to others if some other people get form an incredible resolve and start doing it even better than me i'll downgrade my a 8 8 triple plus rating okay but guess what you think that's hubert hubris it's not i've done it better than just about any other living human being has done it in modern times as a matter of fact i would go so far to say and it's not bragging and it's not undue hubris that i as an individual have made the term natural law more aware in most people's minds in the world than any other living modern human being i have done that definitely so because i'm sorry sorry for talking about interrupting you because i can definitely confirm it because i mean i'm living on a different continent and i know the term natural law and also know a few people who studied your work and we talked about it and i mean that alone i think that speaks for itself so yeah definitely yeah i mean like i said if if i study other teachers of natural law so you know i don't just hear myself in an echo chamber if people think that or believe that that's not how i study okay i go out and research things deeply i go out and put the work in to gauge our other people teaching this and i look at their work and very few people i would say are doing this in any kind of a way that's effective a lot of people don't have good visual aids some people do and they're very aesthetic and can explain it but i'd say if i really had to put all of the people who are teaching this together and doing it well i could count them on less than 10 less than 10 fingers it's less than 10 human souls worldwide out of seven and a half billion souls worldwide do you think that that's going to be effective and and get the message out to where it needs to go before tragedy results we're already in tragedy as a species you know tragedy has already struck it's just going to get worse and worse and worse and worse and worse and it's going to be more and more and more uncomfortable to be alive that's where we're at as a species and it is because the call for doing the great work has not been heated and it doesn't matter whether i called for it whether somebody else called for it who understands how this dynamic works okay most people aren't doing it that's the sad fact of the matter that cannot be challenged most of the world isn't doing i naively thought by this point there would be well over 1 million teachers worldwide of natural law do you know how naive and simpleton minded and utterly childish that was to think i have to come back on the air after thinking that when i began what on earth is happening that i was going to be able to influence a million people to do this work i have to childishly and naively apologize to myself and everyone else and say i was a complete imbecile for thinking that i'd had i really didn't know how black-hearted humanity was in their mind and in their soul i really didn't understand i had a way overly optimistic view of human beings and where their consciousness was at i didn't know how deep into satanism it had descended i didn't know how deep into black-hearted ignorance and total lack of compassion for others it had descended i didn't know how deeply it had descended into total egotism and satanism but that is where the human mind collectively is at we are satanists as a whole species of people the mass adoption the religion that has been largely mass adopted by the human species is de facto satanism and if you really look up what that term means you can look it up from the church of satan's own writings and other satanic groups say de facto satanism means people who practice the ideology of satanism without even knowing that it is the ideology of satanism that is what a de facto satanist is a satanist in deeds in their behavior that they live and think and behave in satanic mindset and do not even know what satanism really is they have this bullshit hollywood definition of what satanism is they do not know what the actual ideology of satanism is what it practices what it condones and they have their mind ensconced in that ideology and don't even consciously know it and therefore their behaviors are of the satanic ideology yet they don't consciously realize it that's called de facto satanism and it is the biggest worldwide religion yep definitely i mean i have satanists in my own family i sometimes i bring up these topics and i bring it for example to my auntie and she said well i only i don't really care about this i only want to focus on my own life satanism i don't care the suffering that's going on in the world i only give a shit about what happens to me and mine ladies and gentlemen that is the definition of satanism i was a priest in this religion a clergy of this religion which is an officially recognized religion in the united states charter of religious beliefs let me say that again i am still to this day clergy the church of satan never revoked my membership because my membership was actually under a pen name an assumed name mark rokar i am reverend mark rokhar of the church of satan still to this day they can look me up in their official records and excommunicate me if they wish i never wrote to the church of satan and said i mark ro carm no longer in a satanic mindset please officially excommunicate me from the church of satan i just stopped communication with them if they look in their own records they will still see a reverend mark rokar and i will spell it r h o c h a r that is how it is spelled it is not r o or r h o c a here's how it's spelled r h o c c-h-a-r or i don't even i could be even wrong about that i haven't even used it it might not be the h at the end r-h-o-c-a-r maybe i have to look on as a matter of fact do me a favor my producer please i'm gonna do this as a nicety please move that arrangement there go into the wardrobe on the other side of the room i know i'm i'm breaking your balls i know it's a pain in the ass with the setup here leave the camera right there go into the the back of it you might have better luck getting into the other side because that door opens outward okay all right and i'm going to ask you to bring me the black bag with the handles on it not not the faux leather bag it is a cloth black bag with two handles uh that might be connected with a velcro okay you'll see it as you open it it'll be next to the other bag and i have like a hemp bag in there i have a black faux leather bag in there and i have a cloth bag please hand me the cloth bag i'm going right now to show you my membership information of the church of satan publicly on the airwaves into the camera with absolutely zero that's it thank you please hand me that i've never done this on air before but i'm gonna do it right now thank you give me a minute and i'll grab it all right here it is there's part of it i want to keep most of this private because there's other stuff in here so just give me a minute those two and i got the spelling was ch okay hold on let me get that there's that all right so let's put this to fucking rest once and for all for all the naysayers who want to say no are you not in the church of satan you don't know what the fuck you're talking about and i'm going to bring people to corroborate it personally on the air as a guest here take this from me now thank you here it is folks i'm going to show you three things one this is my official membership card from here let's go into there my official membership card from the church of satan i had it laminated back then okay and there you see if you can see the signature mark row car r-h-o-c-h-a-r okay which way would i have to put it to bring it into focus back toward me it's still going to be difficult to see with the lamination let's put it on this one and see if there's any better luck with the clarity okay here it is official church of satan membership card from the 1990s it's not in focus and i signed it at the bottom hold on i'll take a picture of it on my desk right now give me hold on i'll take a picture of it on my desk right i think this is actually worth doing okay while it does cut into the calls this is something i've wanted to be i've wanted to do for a while and we've talked a lot about satanism on this show so let's do this in real time i will show you this hold on i'm going to take a picture right leaning on my table so nobody can say this wasn't done in real time all right there it is on the edge i'm going to send that to my computer give me a moment let's send that by itself guess what i think it's very interesting to do something like this on the airwaves folks and i'll call or you can continue to bring up other things if you want but i'm just going to do this live on the airwaves this way it starts to put this nonsense to rest once and for all okay so you know we were talking about de facto satanists people who haven't actually been involved you know who think that they know what it is and they say i don't care about what you know other people are going through okay i don't care about that this suffering is taking place all over the place you know you see this in your own family is what you're saying taking a picture yes yes my unfortunately i mean my own father i mean i i sometimes i mean basically every weekend when i'm visiting them i i bring up these topics so i'm trying to wake them up and he said well what kind of benefit do you get from this kind of knowledge i mean does it make you i mean does it can you make a living out of it and what kind of benefit do you get from any knowledge what what kind of knowledge is not worth having or pursuing you know i mean totally trivial things you could say oh well that's not really going to give you a benefit this is philosophy of how the world works how the world is being run how we could become free instead of remaining slaves say that to him you're a slave i'm a slave well how this will benefit us is we will actually be able to engage unrestricted in our natural rights and no longer be slaves who hates themselves so much that they say i want to continue to be a slave imagine i don't care whether i'm a slave or if that condition continues think about how much you have to hate yourself and it's really frustrating to see it in your own family i think that's the most trust frustrating thing of it all i mean random people on the street that's um yeah that's also very but then when it's your own family it really cuts to the quick it hurts your heart i know yeah i'm going to show this one on the camera okay so you see it's a physical item in the room it here's anton levay's seal right here it says from the office of anton sander levay be it known on the day march 19th a year 32 mark rokhar has been appointed to the office of priest of the church of satan and is empowered to act in that capacity signed in marker anton sander levay there it is right there i'm holding the fucking document in my hand assholes okay all right this is this is the document okay and when i was younger i got really mad at myself because i spilled some liquid on this and this was my pride and joy back then and there's an actual stain that i put on the document myself accidentally this is the letter that came with the appointment and i'll show you this up close this is on the church of satan letterhead okay it is the next day 20 march 32 a s which is anno satanis the year of satan okay addressed to mark rokar and my former public address okay on their letterhead from their post office box in san francisco california and the letter was written to me dear mark wrote mr rokar and it's signed hail satan blanche barton who is anton lev i understand but i don't live there anymore okay but the whole point is that was my former address this is still on their records and guess what for a lot of people don't know this i'm still official listed clergy of the church of satan publicly i'm telling you that right on the air i never was officially excommunicated from this religious organization so if they look me up in their records they will see mark rokar reverend mark rokar that is me mark pacio satanic fucking assholes okay you let this one get away okay and you want to say but satanism isn't what the church of satan says that it is the church of satan is small fry potatoes in the big satanic hierarchical network it's one little tiny little networked group that they pull they they pull people up and groom them into higher levels of the hierarchy the church of satan is not the totality of satanism this is how they'll answer the question and try to pretend like there's no other form of satanism other than us bullshit okay tons of members of the church of satan were at the rituals that i described not i wouldn't even say tons i would say there were several members that were affiliated with other groups that ritual that i'm talking about was not an official grotto of the church of satan that i described earlier it was a a ritual that had membership of people who were at all different pecking levels of the pecking order of the worldwide satanic hierarchy not just the church of satan so i'm going to put these images directly into the slide show right now i could do this myself mike i got it thank you if you were going to help i but it's it's easy enough for me uh they didn't come through i need to somehow sink here they're not let me see if i could quit this and relaunch it they didn't sync properly but i'm going to bring this up um yeah if call or if you have any other comments or questions go ahead but i'm going to take a moment to fix this and actually get it up on my screen so go ahead sure well i think um we talked about when it will actually escalate into like a hot physical war i think actually this will happen when the vaccine will become mandatory and i mean i don't think that there will be a situation where they will go from door to door if you don't um if you don't get the vaccine they will put you into jail but i think it will be more like that if you don't have if you don't have the vaccine they will you won't be able to move freely you won't be able to travel you might not be able to work um you might not even be able to go to the supermarket who knows and i think this is actually the situation where people really have to rebel because yeah i figured out the problem the technical problem i was having my phone was in airplane mode to silence it during the show i've taken it out i have wireless back and i'm seeing it sync so it'll just only take one more second two of the three synced three of the three have synced it's still in silent mode so that's fine here we go so let me clean this up all right here we go so let's let me go back into my slideshow and i will tack these on to the end of the slideshow this will just take a second don't go live to the computer yet and hey folks i know this could seem somewhat unprofessional doing it this way but guess what it came up and i'm going to do things live this is what this format was for this is what this very format was actually geared toward doing okay so let's make this nice and big and fill up the whole damn screen with it excellent let's duplicate that bring in the other one i have two more to bring in and you'll see these are right on my desk you'll see my computer in the background of them i'll leave a little bit of that center that and do the third one this is the actual appointment and the appointment's going to be second and then i'll show you the letter list i'll show you my membership card the appointment and the letter that came with the appointment of priesthood here we go this is right on my desk i just took these shots and sent them to the computer here we go put it live okay there is my membership card from the church of satan it says anton lev sander levay founder and high priest okay and then typed in mark rokar r-h-o-c-h-a-r it is the name of a demon from the book known as the pistus sophia or the faith wisdom of the gnostic tradition rokhar was a cat demon in one of the torture chambers of hell as described by jesus in the pista sophia who tortured certain types of quote sinners okay it says underneath that citizen of the infernal empire then signature of bearer mark rokar this was uh membership card uh 100 261 which i'm assuming means that that is how many memberships they gave out at that point so you can see it's much larger than that now and that's how i used to sign my name and almost palmer method you know penmanship i no longer really write like that and i had an inverted cross in the bottom of the m because this is obviously you know uh catholic grade school palmer handwriting method which is no longer basically taught almost anywhere but you could clearly see that's what it is okay here's my opportunity yeah go ahead and levy personally personally appointed me as a priest i did not ask for the appointment ladies and gentlemen i did not beg levi to appoint me priest he did it on his own because he realized how good of a representative i was at the time of the satanic ideology and how much i was pushing the satanic ideology publicly at the time he found me and appointed me to priesthood within his organization and that let me make it very clear priest is the lowest rank of any ranking there's a regular member and above that there is priest there are a couple of additional members above that including magister and then high priest magister is an intermediary priest or an administrative priest i was not a magister i certainly wasn't a high priest because there is only one of them in the church of satan and then they have i believe they have something called a council of nine which is like their council of you know uh people who advise the high priest okay but i was nowhere near up in the higher levels of the hierarchy of the church of satan and have never claimed to be okay i was the rank above regular member he made me a priest which empowered me to act in the capacity of grotto leader coven leader okay whatever you want to call local chapter leader i was empowered to do all of the functions that the clergy of this organization is empowered to do and that means i could legally marry people i still can legally marry people if they want to have a satanic wedding i can legally baptize people into the religion known as satanism if i were to be so inclined to do so legally according to the official united states charter of officially recognized religious beliefs and satanism is one of them so they i never wrote to these people to say i no longer agree with your ideology take me off of your your membership ranks so this is probably news to them okay and they've answered all people who's like do you know who mark pacio is no they don't they don't have a mark pacio in there in their rankings in their um uh listings but if they look up mark rokar they sure as damn have him and that's who i am okay i'm no longer mark rokar in my mindset in my spirituality and in my knowledge level you know in how i look at the world i'm a completely different being but mark pacio and mark rokar are the same physical person in life okay so here's my appointment friend it's right on my desk you can see my macbook sitting right here in the background the macbook air on the left and my macbook pro on the right from the office of anton sander levay i'm i'm going to mute up real quick let me switch to discord and and mute hold on one second um uh mike just remind me i got him i got him i i forgot the caller's name all right let me go back to the presentation go ahead all right yeah let's bring that back up okay this is my actual appointment to priesthood that this is a phone photo that i just took on my desk in front of me there's no editing nothing from the office of santan anton sander levay there is his official seal with the if you it might be a little bit difficult to make out at the top if i enhance the contrast let me do that right in real time you'll be able to see it better i'll enhance the contrast go to uh format and then image and let's blow up the sharpness you'll be able to see the pentagram come out let me turn up the shadows and i'll lower the exposure a little and denoise it that's about as good as that's gonna get okay is that okay all right that's about as good as that's gonna show that pentagram up top that's levi's pressed seal at the top of the inverted pentagram with the lightning bolt which represents the kabbalistic thunderstruck tree the lightning bolt that he used he he had this actually made as a necklace for himself when he was alive and it says be it known on this day march 19 32 that counts from the year 1966 as year one so what what would that make it that would make it 97. he appointed me in 97 to a priesthood i was already a satanist before this okay so they could look me up in their registry and i probably joined back in 95 or so maybe 96 he appointed me to priest in 97 and i think he died later that year if i'm not mistaken mark rokhar has been appointed to the office of priest of the church of satan and is empowered to act in that capacity signed in marker by hand anton sander levay that's his actual signature he wrote it on the paper it's not a stamp okay next the letterhead from the church of satan okay with blanche barton's signature mr mark rokhar dear mark rokar dr levay has been favorably impressed with the skill and mastery you have shown in various opportunities to represent the church of satan and satanism in general you have proven yourself to be magically and materially materially adept therefore he felt it was high time you were granted the title of priest in recognition of your dedication knowledge and ability congratulations reverend rokar please keep us abreast of your activities interviews and musical releases which is one of the ways he became aware of my existence because i was in a signed musical band that espoused the satanic ideology a death metal band called in satanity which was signed to unison records in greece we were picked up by a european label that put out a lot of death metal and black metal at the time we were i was in a signed band and we released a full-length album that was released on digipack in of from unison records it was called divine decomposition from insanity and that's how he became aware of me and then i wrote for fanzines which was a big way of uh you know reviewing bands and putting articles out there you know or getting in touch with like-minded people they're called fan magazines fanzines for short it was a big thing in the 80s and 90s okay younger people don't know what that is some older people or middle-aged people i should really should say well no fanzines and probably be very familiar with them from back in the 80s and 90s okay and then it says may the fires of hell continue to strengthen and inspire you hail satan blanche barton anton levay's mistress significant other at the time whenever you want to refer to her as his significant other okay i took these photos on air and posted them live okay nothing was scanned nothing was edited or doctored all right you don't want to believe it fuck you that's the that's my answer to anybody who doesn't want to accept that that's the case okay everybody wants a question and challenge this as if i'm making it up you don't know what the fuck you're talking about because you weren't there okay and you're not going to tell me what my life experiences have been because quite frankly you don't know what the fuck you're talking about all right so that's it that's it so hold on one moment please i want to fix one thing here we're going to go to another caller in one second just having a small problem give me one second all right excellent okay let's go back to uh discord calls and let's go to uh who do i want to take i'm looking uh my producer's trying to tell me who's been in here hanging in here for a long time i don't see them close are they listed in alphabetical order it looks like they are uh let's go to a rail if i'm pronouncing that correctly or hourly uh nine welcome you have to unmute yourself on your end you're unmuted on the server end hourly nine can you hear me all right they're having a technical problem uh let's go to let's go to dan miller dan you're live on what on earth is happening welcome to the show dan you have to unmute yourself on your end please hey mark there you go thank you hey how's it going thanks for all the great work you're doing thank you yeah i'm currently uh writing an outline on the absurdity of positive law over natural law so far i'm planning on writing it with a humorous tone since i believe most people learn better through humor and may appeal to the sitcom been watching masses right do you think humor would be an effective way effective writing style for natural law i think it can be to pull someone into it who might be resistant at first after that initial roping of them i think that it should be approached in a serious fashion i don't think we're going to permanently get people to philosophically and morally understand the deep principles of natural law and objective morality without presenting it in somewhat of a serious way because it's very serious subject matter but to help get them out of their ego resistance i think humor and art and music are great ways of doing that and i recommend that and i do not tell people not to do that it's just that i don't engage in those methodologies currently because i have made my life path uh someone who is going to shake people into doing the great work who are halfway there in their understanding of why it's so important to do so my approach is for those potential students to basically um kick them in the ass and i'm not telling everybody that they must do it my way i am just saying that is my approach and i have no intention of changing my approach so i i've often asked people and maybe they don't hear it not to recommend for me to do a different approach what i recommend is for them to say what is the best approach that they can take so if this is your best approach to take i say wonderful and go for it and do it you don't have to do it like i do okay the if this is what you think is going to be effective in taking the people who cannot handle my energy and i admit most people can't and i don't care i'm not here to reach most people again i think a lot of the resistance that i get in this regard folks is that from the beginning people ascribe a goal to me without actually listening to the words coming out of my mouth repeatedly of what my goal actually is most people have never heard that do not understand i don't have the goal you think i have i have the goal that i know that i have and have always had that goal since long before doing starting what on earth is happening since before 2010 i have had this goal for over 10 years of my life and existence and my work and most people don't know what that is my goal has never been to reach the tiny little babies cowering in the corner and go oh my god oh i'm so nervous and afraid what am i gonna do i don't know how to do anything i have never been trying to reach that dross vocabulary word of the day put it up in big bold letters what is dross look it up i don't care about the dross do does the dross eventually have to be reached with this unfortunately they do i have never made the claim that i am going to be the people who reach the dross what i have claimed that my intent and goal is to do very clearly as a matter of fact multiple times is i want to reach the people with the big boy pants on and the people with the big girl pants on does everyone understand i am looking for people with thick skin who can hear something said harshly to them and say you know what this guy's right even though he's not taking it easy on me what he's saying is true and that's all that matters they're out of the mind control of emotional mind control most people are not i never made the claim what on earth is happening is here to take all of the babies and dross out of their bullshit emotional mind control never made the statement nobody can find it because it was never said my goal has always been to reach potential adult teachers with thick skin and then they will go and apply their methodologies and their unique styles to the to the performance of the great work and then we will have a community of people giving different flavors of this different strokes for different folks and then many many many more people will have a choice of who do they want to take the information from then i will not be the one of the only people unfortunately on this planet teaching this in my style i never had the claim of hubris that every person on this planet would be able to or would receive this knowledge from me you will never hear me say it it's never been said i always wanted more teachers to apply their own style and aesthetics to the performance of the great work and get up off their lazy asses and actually do it i i just hope i'm reaching my own audience i really hope you understand my intentions and goals because i don't think you have largely and i'm not talking about the caller i'm not i'm not saying this to you car i'm just saying this to the audience at large i am not so sure that my audience at large has understood that this is the purpose of what on earth is happening of my work is the long-term goal to get the knowledge out to everyone oh yes of course it is but i never made the claim this is the publisher's clearing house a one-stop shop and you have to get it from me find the place that i've ever said it you will not be able to do it because i've never said it what i did say is i am here to essentially teach the other potential teachers who already are the big boys and big girls with the big girl and big boy pants on okay the big boy and big girl pants on who have thick skin are not going to be easily offended are not going to be easily put off by my style my personality and here's why i think that's a vetting approach i feel that that is a vetting approach v-e-t-t-i-n-g to vet someone means to say do you have the required characteristics as an adult human being with thick skin that's who i'm attempting to reach there are other people i consider dross they're not who i'm looking for i'm looking for a few comparatively ratio-wise percentage-wise ultra-quality and skilled individuals to do the great work with me as peers i am not looking for the dross that goes mark pasia is way too insulting and harsh for me i'm gonna go sit in the corner and weep i really don't need or want those people in this work if they pick it up and celebrately from other people and then they go out and do it that's a wonderful bonus that's an added bonus but that is not who i am reaching out for i am reaching out for the people who already have the toughness inside of their internal makeup to do this with persistence and drive and willpower please all of my listening audience fully understand that that has been my goal since day one and do not ascribe goals to me that you believe that i have erroneously that is your error that is not what i have ever stated that is your error in what you think my goals ever have been so i want to clarify that once and for all and let people play that ch chop that down individually and say this is what mark pacio has always been attempting to do not what you think he's been attempting to do all right so caller please continue and uh my ultimate answer to that first part of the question or your question was absolutely if you want to do it through music through allegory through poetry through artwork that is a wonderful approach in beginning to help loosen people's ego and bring them into some of this long term i think it has to be really truly taught in a serious way morally and philosophically by the teachers that you will event would will eventually do that and we could push those people toward okay so that's my answer to that if you have any other comments or questions regarding that go right ahead great yeah let's change the subject i just wanted your audience to know that this uh july 13th 14th and 18th i had eyewitnesses ufos for the first time and on july 15th i auditorily and visually witnessed someone communicating telepathically with their ancestors in star family so i saw a video clip where you saw some ufos yourself and i don't know something's going on very interesting phenomenon i've been following the phenomenon of non-human intelligence potential interaction with this planet for since i was young uh often have worked with study groups and uh investigation groups in my area i used to work with a investigation group called searap in the past headed up by a friend c-i-r-a-e-p which stood for the council for investigation and research into aerial and earth phenomena by my friend bob yuri robert yuri and bob did a great job heading up searap i don't know if they're still around he moved out of my area but i used to work with that organization i think they were doing pretty good work and were holding great conferences in the area had really great speakers i work with uh mainline mufon which is my friend jennifer stein's group who does excellent work in the ufology field i've worked with mufon of pennsylvania loosely not as a direct member but just helping with some of their organizational goals so i've taken some of the research into this field very seriously in the past and still do the crop circle phenomenon has always been a very very um significant area of interest for me and i've studied that phenomenon in in depth um you know i recommend the works of people like freddie silva who can really give people a good education on the phenomenon you know there's other people that i think have some pretty good work out regarding it if you get the arc you know a lot of this stuff is on there um i do believe that you know human beings have had a a rich history of uh contact with non-human intelligence and i call i don't call it um um intervention theory as some ufologists and uh ancient alien hypothesizers and researchers call it i call it interference theory our evolutionary progress naturally in creation was interfered with by non-human entities and set way off course into areas of horrible beliefs and practices that are untrue and that we still suffer from that we will not pull our minds out of the morass of continuing to religiously believe in this nonsense and these falsities and we suffer as a result what we believe drives our behavior and our behavior drives the manifestation of the results we receive in creation that is how natural law functions and our entire mindset as a species is so messed up badly bad we have so many ways of wrong thinking and when wise people actually say this wrong thinking is what got somebody into trouble other people want to kill them they don't want to listen to them because their ego's in the way egoic people who think satanically and completely erroneously don't want to hear wisdom when it's spoken they want to continue in their egoic satanic mindset it's so hard to come out of that and i think like many other researchers throughout time one of the only things that will ever bring people out of that mindset is to suffer greatly but the problem with that is it often continues the cycle it often continues the cycle of trauma and then the trauma puts us into the r complex and we don't learn all over again we choose not to learn all over again that's why that could be a vicious cycle sometimes pain can wake somebody up out of a trance sometimes it can put them into a deeper one okay there's an old adage a relatively smart human being learns from the mistakes of others let me say that again a relatively smart human being or a relatively intelligent human being will learn from the mistakes that others have made but a truly truly wise human being i'm sorry i got it wrong let me start over a relatively intelligent human being will learn from their own mistakes so a relatively intelligent human being will learn lessons from their own mistakes but a truly wise human being will learn from the mistakes of others they will not have to experientially go down the same path of mistakes that someone else made in the past and re-experience the same suffering so here's here it is the i'll say it even slower and give you an example a relatively intelligent human being will learn from their own mistakes that means i will say i am not going to take someone else's word that they got burned from that fire i am going to have to put my hand in that fire and burn it myself and learn from my own mistake that it's a bad idea to place your hand into a raging fire and then that will make me somewhat intelligent of the consequences i probably won't want to do it again because i'll be badly burned often to the point of blistering or the charring of flesh but i will have learned my lesson negatively through pain and suffering and then i will learn not to do it that way that's called you'll receive some relative intelligence from learning from your own mistakes what not to do but a truly wise human being will look at someone who has already placed their hand into a fire and say do you know what i exp i observed the manifestation of the consequences of doing that of that behavior and then they will make the extrapolation in correlation in correlational thinking and say if i do that i will receive the same result in the 3d manifested reality when i perform that same behavior of putting my my hand into that fire and therefore it's probably a bad idea for me to do it and therefore i will choose to learn by looking at observationally the example of what it produces and then not do it but you know what most people will never tread that path of wisdom they will refuse to accept what happens when people perform such behaviors they will insist like a completely retarded human being and i don't care if you're offended by that term there is such a thing as human retardation it means that someone's brain was damaged in some way such that it does not function as a normally functioning brain is intended to function by whatever means chemical physical birth trauma etc that that damage occurs to the human brain and then it produces a condition called human retardation and there's different manifestations of that but retardation means they are slow to learn they have learning disabilities and it's not an insult to say that someone is mentally retarded there are many people who act as if they are mentally retarded when they are physically not mentally retarded and they have no such condition of human retardation it is not a term of insult it is a condition of illness but we act as if we have that condition of illness because the ego is so strong the out-of-control ego has set up in the soul in the heart and in the mind and says i'm not going anywhere i'm rooting myself deeply into the ground here and you're not going to move me out i'm taking over the house and i'm here to stay and this is where most human beings are at and folks people say they think i'm in this condition wrong wrong and incorrect folks i have gotten out of that condition i'm out of that because i went where the truth led by getting my ego out of the way of the reception of the truth which is what the true method of occult initiation produces it says you will not lie to yourself you will see the situation of the world and attempt to change it from where it is that doesn't mean that i don't think things should that can be changed should be changed that's different it means you start accepting the world where it's at and applying your will where it's at without lying to yourself about where it's at that's the first step of initiation okay so i'm not out of that ego that holds people back from reception of truth that is what all the mystery tradition of con traditions of consciousness and truth discovery helped the initiates to get themselves out of a hardened calcified ego deeply entrenched in the human psyche this is why the questions that were asked of the possible initiate were is their objective truth is there a power higher than human beings can truth be known you know things like that is their objective morality and they had to display a basic understanding that their ego was out of the way then later in the mystery traditions they went to much more important if there's more important questions than that because those things they'll teach you the basics of the mechanics of how things work beyond that you go into deeper areas that go into ethical treatment and understanding how to cause the absolute least amount of harm while you are here and become stewards of our our planet the animal kingdom and each other not owning it but becoming caretakers and stewards of it and for that information and tutelage and mentorship you had to answer the ultimate question of the second degree or in other words being passed into the greater knowledge of the other the higher levels of knowledge and that was how do you know that you are truly suffering and there was only one correct answer and most people cannot answer it and have that answer wrong if they think that they can answer it and they have the wrong answer and this is where people who think we have steward we have ownership of the earth we have ownership of the animals etc so forth we can use them however we see fit we can keep taking resources in any kind of a polluting or destructive way you know and we're not good caretakers of the earth of animals or of each other okay and the answer to that truly sacred question of being passed into the higher degrees of the mystery traditions was i am aware that i suffer if any other being suffers and most people will never even conceptualize the answer of that question never even go near it never even approach that as a correct answer because they're so in satanic ego that all they give a rat shit about is themselves that's it and maybe by extension maybe by extension their significant others or family members most of the time not even them they'll stab them in the back if it comes down to protecting their own ass yep freedom's gotta be the first principle and yeah and morality freedom has to come first and we have to understand freedom can only exist in a society that truly embraces objective morality and objective moral principles tr freedom can never exist in a society that embraces moral relativism and that's where so many people who think they understand natural law have it wrong think that they understand anarchy have it wrong i hear people in these groups saying anarchy means no rules at all just do whatever you want oh well then if you're going to start teaching natural law we can come in and say everything's relative and morality is relative that's fine no that gives a completely asinine backwards wrong incorrect impression of what natural law is to an impressionable potentially serious student and i've seen people in a lot of these groups online that people think that they have a good intention but don't follow it through you know that just let it be a free-for-all i've seen people come in these groups and go i'm out you know i'm not even going to stay here because there's a bunch of asinine people that really don't know what they're talking about i thought it was going to be a serious decision group and clarification group for this material and you have a bunch of moral relativists and fake ass anarchists and fa you know people who are completely giving a false impression of natural law in these groups so i'm out i've seen people come in and leave that could have possibly been a serious student or maybe even a good teacher one day so that's why i say if you even want to do things like that on social media i don't even think it's a good idea from jump street i think people need to learn communication they need to learn publishing modern technological publishing methods and they need to put that out to the public on their own and largely cut off comments if you want to deal with nonsense of comments go ahead you know what i think comments are folks ding ding ding ding ding vocabulary word of the day draws comments are dross from people who are largely total and utter dross i don't want to deal with that nonsense okay if you want to deal with your that nonsense go ahead that's why i turn my comments off quite frankly i think most of the people that feel the need to comment on facebook and feel the need to comment on youtube are dross okay you're not quality human beings okay and you have a totally ineffective method where you would be much better served and the community would be much better served to formula formalize your knowledge and put it out publicly without commentary then it's out there it's public domain people can reach it they can access it they can study it if they want and you don't have a lot of noise coming into the signal the signal to noise ratio will be good not bad as it is when people turn comments on what happens on youtube threads with a thousand comments everybody's in the comments they're not getting the message of what the original video is even fucking talking about almost invariably yeah youtube rewards the comments for the algorithm so the video ranks right here right and guess what at least you can turn comments off on a platform like youtube you can't turn them off on facebook i would suggest put out all your videos on facebook put out your face you know your your facebook live videos put put your presentation slides up there and turn off comments if you could wonderful then but guess what the more comments are allowed the more dross is let in and guess what that's not censorship folks no matter what you say or think that is not censorship that is called moderation in your own space you're not telling people they don't have a space on facebook they can post whatever they want on their wall anybody that doesn't agree with what i'm saying you can go and post your your opinion on your own wall but guess what i'll moderate what's on my wall i'll moderate what's in one of my groups and i will reach out to assist other administrators if i feel the need or want to and if they want the help i will give it to them or i will help assist them in doing that because i've helped other groups to do that and i will assist them in quote cleaning up their group yeah there is such a thing yeah it is effective we did this in a couple of other groups and guess what they're effectively teaching natural law to people it's not a bunch of dross it's a bunch of quality content for the most part there's always going to be you know some things that you know aren't as quality as other things but guess what they've largely been turned effective from being in a play in effective places of total dross where the floodgates are open and a bunch of dross is flooding in okay so this is what we are helping another group to do and hopefully we'll be able to talk about that more in detail at the beginning of next week's show for maybe like a half an hour 45 minutes at the most so call or anything else uh did vimeo explain why they tore down your video the video of what oh yeah yeah yeah because i because i talked about covid19 as not being the way that uh sicknesses and illness really work and there's new scientific information that has come to light there's actually a lot of old experiments in old scientific literature that proved this and they're saying no one is allowed to contradict the official mainstream media and government narrative and that's why i say it's going to be time to go to war soon folks once you say we are stopping your freedom of speech from propagating and you are not allowed to tell people that there is an alternative way of looking at reality it is going to be civil war time soon and i'm telling people you better get physically prepared for battle because it's going to come in your lifetime this is going to happen in our lifetime on the trajectory we are on and guess what i don't give a fuck who hears it in the positions of authority or government it's going to come in our lifetime if you think these riots that happen in inner cities in center cities of major metropolitan cities are anything close to what is going to come down the fucking pike you dumb motherfuckers you haven't seen what's coming these are little fucking imbecilic leftist children most of them that know nothing about the world and have no weaponry you have no idea what's coming when shit really jumps the fuck off i'm trying to prevent and avert that you want to see what's going to happen psychologically go on some bittorrent sites and type in real war footage and watch it download it and watch it and you better get prepared to see that in your lifetime children that's all i have to say because i'm telling you it's coming fast we are on that trajectory and that ain't going to be people holding some bull horns asking for a reform of police okay it's going to be utter urban asymmetric warfare and millions upon millions upon millions of people are going to die horrible deaths now you wanna i'm not calling for that i am just telling you that's inevitable according to law in creation if we don't turn the fucking tables now if we don't turn the tide of the trajectory of where we are heading that is inevitable i'm not calling for it i'm telling you if we don't get this message out to the public regarding objective morality and get their head out from up their satanic asses we are going to go down that path whether anybody wants it to happen or not and i have been trying to avert that eventuality since the first day i started speaking publicly i have not been calling for that i've been trying to avert it but if it comes and it must come so be it if it comes because of human ignorance and there is no other way to give humanity another chance to get this message because of censorship and ignoramus people acting satanically then so be that suffering in the world i will accept it wholeheartedly and gladly and there's a part of me that thinks that it must come because we are not getting because of our failure our failure as as a listening and viewing audience let me make that let me make no unequivocally what i think about that that is look look right at my audience my audience look at me that's your failure it's not my failure it is not my failure not mark pacio's failure again when my time comes i will praise the universe that i was given the opportunity to do this great work i'll sing my exit song and i'll go to my grave perfectly peacefully knowing that i did what i was here to do and i did it well how many can say the same thing when it comes time to exit we'll see who's better prepared and again as the old saying goes there's no atheists in foxholes okay if it comes time violently for you to die let's see how prepared you are in that moment based on what you did that's what's going to matter folks not what you thought not what you said what you actually did with your behavior and actions and that means who did you try to influence publicly to try to help people come out of this mindset so we won't have to go down that path did you do take up your part in that one work in that one great work how many can say that they did that how many can say that they did it truly effectively and well and really reach the hearts and minds of others you know you got people on facebook saying that they're somehow they're equating me saying i want to help another admin reel in the nonsense that people are posting in his group that's equivalent to book burning please don't give a fucking over inflated sense of self importance to me first of all i'm not a sensor doing book burning secondly most of all don't give your own ass an over inflated sense of self-importance you ain't writing books on facebook children all right it's an over-exaggerated sense of ego and if people really had any but if they had any understand if you were really doing the work people who are looking at natural law would know your name okay and you you ask people who's out there teaching natural law i'm going to be one of the first names spoken and it's not bragging and it's not hubris it's the fucking fact of the matter truth because of my effort and will and persistence and knowledge and correctness regarding it that people have an intuitive sensing of and then when they study it on their own they corroborate let's get that straight you know and then other people go oh he's famous and well known yeah i'm famous oh wow all you know tens of thousands of people i have on on my facebook page yeah that makes me famous there are people who have like a billion views on one video that are gamers gamers asshole gamers who's the most the the jackass who's the most popular person on youtube who has the most subscribed videos what's this ass ass s9 moron's name who is he oh pewdiepie oh i'm going to publicly call out pewdiepie as a fucking dumb gamer you know you got the most views on facebook which shows exactly where humanity's head is lodged firmly up their own assholes that they listen to that garbage instead of somebody actually talking about what's really going on in the world and understanding understanding how the dynamic really works okay but that's where humanity is at pewdiepie is the most important fucking youtube celebrities that has the number one fucking podcast on earth i have a couple tens a couple tens of thousands of subscribers yeah yeah i'm real popular and famous i went to the jersey shore and walked from one end of the island that i was on to the other not one single human soul recognized me out in broad daylight out at night no matter what time walking the whole beach with the whole ocean of the island back that one end of the other now one person says hey marcasio zero i'm real famous you don't know what famous means or what draws people to famous people it's it's called dross i'm not dross so i don't draw dross okay that's why people are drawn to draws like pewdiepie you know who have no value to really offer the world babbling fucking imbeciles listen to jerk offs like that but that's the most popular podcaster yeah and i'm famous you know go look at his view count compared to mine or his subscriber view compared to mine and then say i'm i'm famous most people can't even hear or understand what the fuck i'm saying because they're so fucking dumb you know it just it just shows me repeatedly how far up people's ass their heads are that they think things like this let's move on to another caller bob from cincinnati man have i not heard from you in forever too long welcome my friend mark can you hear me loud and clear it's great to hear your voice oh my god what a sweet treat mark i'm so sorry about barb's passing thank you bob it's been it's been very difficult but you put a smile on my face by calling in today oh i've been trying to get in for for two shows now mark these assholes have completely taken over society in the minds of people with this coven i mean covid19 it's sickening it's sickening it's unbelievable bob was i correct about where the human mind was to my my viewing audience my listening audience or did i exaggerate you know mark we we out here have our heads so far up our asses we would kiss the boots of these fascists that are getting ready to go door to door don't wait for them to go door to door ladies and gentlemen do not accept this tyranny it is outrageous mark yeah we've got to wake up we've got to pull together mark there was a researcher by the name of tracy twyman and she's her work was her work was phenomenal and we do not know the the actual circumstances by which she passed away i think her family requested that that be kept private so uh you know there's a lot of speculation about it she wrote some great works about occultism that had very very good information in it i believe i have a couple of her uh some of her material on the arc drive and i think tracy was a big loss to the truth community and the community that is trying to explain how occultism operates and it's a very sad thing my heart goes out to her family because i think she did great work her last book was a book of quote fiction unquote called genuflect g-e-n-e-f-e g-e-n-u-f-l-e-c-t i had to look it up geneflect means to go down on one knee in subservience and um the occultists these dark occultists will force their victims to go down on one knee before they are executed muzzled and down on a knee you know it's all occult mockery folks this is how these so-called rulers and masters these self-appointed rulers and masters of the world ritualistically mock people publicly and they get off on the fact that the public cannot see it yes mark i i also so i want people to look for it the book genuflect by tracy twyman she outlines the dark pedophile currency that runs this world that we live in that mark is right on that effect it is the currency it is the fuel that drives this we must end it once and for all ladies and gentlemen and the pedophile currency and also ladies and gentlemen i want you to look into the work of dr carla turner k-a-r-l-a turner she spoke of mk ultra she got into aliens and ufos but she's in the end she found that it was mk ultra mind control mark i appreciate your voice god bless you i hope to see you physically soon bob thank you so much it was a pleasure to hear from you again thank you for uh helping uh educate people and reach them ladies and gentlemen that's all the time we have for this edition of what on earth is happening thank you for listening thank you for watching remember folks government is slavery we'll see you right here next week [Music] don't you ever wonder [Music] don't you ever [Applause] [Music] you

What On Earth Is Happening Show #233

Topics: *Social Media Group Outreach & Questions & Clarifications Call-In Show Part 3, Government Agent Trolling on Facebook, Explanation of the origins of the name Rhochar, Mark's assumed identity as an ordained priest of the Church of Satan, Absurdity of mask-wearing in the CoVID-19 Scamdemic, Feebleness of the Fake-Ass Patriots, So-called "Settled" "Science," People still can't understand that Government has no right to exist AT ALL, Mark's planned guests demonstrate the lack of technical competency and the need to become competent if you really want to reach people publicly online, Social Media is NOT a good way to reach people with the message of Natural Law online, Vomit Man Troll explains "Natural Law," Trolls who obfuscate Animal and Plant life when discussing Veganism, Man does NOT have dominion over Animals, Animals possess Rights, We are in a Great Spiritual War, Computer literacy IS modern Literacy, Mark to be interviewed on "Dark To Light" this week, Vetting process to allow people to post and comment on in Social Media Groups about anarchy and Natural Law, Getting rid of UNTRUE and DELIBERATE disinformation about Natural Law and Anarchy is NOT censorship, Vimeo and other Big Tech companies censoring content like the dirty rotten NAZI TRASH they are, Social Media is a DROSS DUMP, Will Power and Intellect among Dark Occultists, Methods to try to to keep centered and balanced, Plant-based Diet, Juicing, Supplementation, Meditation, Concentration, Contemplation, the Elimination of all Anger means that a part of your SOUL has been DESTROYED, the Critical Moment Of Choice spoken about in the WOEIH intro is happening RIGHT NOW, NEVER speak to on-duty cops, There is NO EXCUSE that YOU are not sending the message out RIGHT NOW, Ritual Magic and Directed Thought Experiments, the Satanic Agenda of Androgyny, Removing the distinction between the sexes to kill human uniqueness, the Occult significance of 2020 related to humanity's ability to SEE, Werner Heisenberg's quote: “The first gulp from the glass of natural sciences will turn you into an atheist, but at the bottom of the glass God is waiting for you.", Psychedelics as a tool but not a Panacea, Don't follow Gurus or anyone else but use your own Discernment, Nice is not necessarily Good, One Great Work Network will highlight content creators who are doing the Great Work effectively, Dark Occultists own and control Police, Military and Politics, Police and Military are the "dogs" of Satanists, Satanists don't actually "worship" any deities but try to embody Adversarial Archetypal Energy, "The" Satan as Adversary or Opposer of Order, Incompetence invariably leads to Impotence, Acquiring Life-Skills leads to personal Autonomy, Get Autonomy or be an Automaton, Military entrainment and entrancement, the Importance of listen to ALL episodes of what On Earth Is Happening IN ORDER, Do your own Work and stop complaining about how others who ARE doing it are doing it, Understanding True Objective Morality from the perspectives of the Ancient Mystery Traditions, Free Energy can NEVER manifest as long as Government exists, a Cataclysm destroyed*

Earth's Eternal Spring in our past, Cataclysm brought the Lack and Survival Mindset to humanity, Human beings don't belong in the extreme climate regions of Earth, Human being do NOT need to eat animal flesh, Vomit Man gives his "expert" opinion on going vegan "Cold Turkey."

freedom man that's what it's all about [Music] you've got to groove on freedom like the good book says [Music] ah welcome you are listening to what on earth is happening this show will discuss the topics of human consciousness mind control natural law the occult and all issues that affect the freedom of the people of earth what on earth is happening will endeavor to shine light upon the darkness of our world and to offer empowering solutions to the problems we face as humanity approaches its critical moment of choice and now here is your host mark pascio [Music] welcome one and all you're watching what on earth is happening i'm your host mark pascio my website what on earth is happening dot com ladies and gentlemen government is slavery and here on what on earth is happening we are ending slavery one mind at a time thank you for tuning in today ladies and gentlemen this is episode number 233 of what on earth is happening today is sunday august 2nd 2020. we have a great show lined up for you here today i'm going to be bringing a few special guests on to talk about social media outreach and to clear the air on some accusations that have actually been leveled against me about acting as a sensor we're going to be talking about what we did here at what on earth is happening to help a social media group essentially limit trolling and complete inaccuracies and disinformation within a facebook group so we're gonna have some people who are instrumental in helping to put out good quality information in that group uh coming up in a few moments um let's switch over to my presentation i want to show the artwork for today's show and talk about what else we're going to be getting into on the show today so uh this is the art for today's show social media group outreach and we're also going to continue with questions and clarifications so this will be a call-in show in the second and third hours we'll have the first hour will be dedicated to my guest then we'll be taking your call-ins and questions in the second and third hour of the broadcast you can still donate to help complete my first ever full-length documentary film called mark pacio in the science of natural law up on gifts.what on earth is happening.com my gifts section of my website there are five donation tiers to donate all donations will go directly to production costs mainly right now paying a video editor and that will also be the actual pressing of the documentary dvds and flash drives all donors will receive one free complimentary copy of the completed documentary on flash drive and dvd so you can make the donations for the documentary at gifts.waternearthishappening.com please use the gift site for documentary donations or the documentary free copy will not be shift will not be shipped to you unless you use gifts so don't use the regular donation page for that regular donations uh the page for just a donate is just that it's a regular donation to the cause if you want to receive the free documentary on flash drive and dvd please use the gift site for that purpose what on earth is happening donation gifts has some new items available namely new t-shirts men and women's we have my new flash drive world view violence and the real pandemics there i'll probably be releasing that for free within probably about two weeks or so and then um you know maybe three weeks something like that and then uh we have the complete mark pascal one great work collection solid state drive which has been a very popular item all that and more available at gifts.what on earth is happening dot com uh this is the last week that i'll be announcing that we are working uh proudly in cooperation with autonomy i will however be showing people that i have permanent links put up on the wall on earth as happening dot com website i want to show people those links today so autonomy is the brainchild of richard grove of tragedyandhope.com many people will know richard as he was the filmographer and video editor of my natural law seminar richard has always done great work in his own right i highly recommend people checking out his work at tragedyandhope.com and checking out autonomy at get autonomy dot info it's a great teaching and learning group that teaches people skills and life skills in general on how to really do what we do as independent uh media creators so that's uh autonomy i want to step out for a moment out of the presentation and go to my website uh you could switch back over yep so uh at what on earth is happening.com uh on the top i have placed an autonomy banner because they we are now an official affiliate of autonomy the autonomy unlimited group okay so if you click here it will take you to uh an explanation of what autonomy makes available as far as their learning course so it'll take a moment to come up it's still connecting looks like there might be a connection issue happening here could be just a caching issue just give it a moment well we'll let that load in the background i should have had it loaded up then down here in my in my small banner section uh there's this book that you can check out called 19 skills for success not taught in school from autonomy i'll click that one as well there's the main autonomy page that i just clicked previously we just got it up you can watch videos about what the autonomy course is about and go as far as you would like regarding autonomy again i would liken it uh there's the 19 skills book again this page will take you right right to that section okay where you could download a copy and check it out again autonomy is kind of like what i'm doing with the how to become the true media webinar it is going to give you technological skill sets and not just that just general life skill sets about communication publishing etc you know and how to drive you know your goals forward in whatever enterprise you're setting out to accomplish so check it out it's getautonomy.info click the banners on the waternearthishappening.com website where now what on earth is happening is now an official affiliate of autonomy unlimited so very happy that that partnership is now in place and i wish autonomy all the success and i thank them for their help that they are giving us uh technologically with what on earth is happening so that's autonomy let's continue with the slide presentation the how to become the true media webinar is going in full force full steam ahead class number five will be this tuesday august 4th thank you to all the students who have been attending i trust that you are really getting something out of this seminar and uh people have sent some very positive feedback my way the webinar starts every week at 7 pm eastern time us and class instruction begins promptly at 8pm so that gives all students one hour to get into the webinar please be on time or you might miss important information that will not be repeated keep a notepad handy for notes and questions again i stopped periodically to take questions during the webinar and uh i recommend headphones especially if you are going to ask a question in the class headphones will avoid feedback and echo if you have any technological problems at all getting into the class or really any problems at all regarding how to become the true media please email us at true media what on earth is happening dot com so looking forward to this week's class on tuesday evening for this particular show we are doing call-in in the second and third hour you can call under the show via discord at whatonearthishappening.com discord you could also use what on earth is happening dot com slash show and click the calling link either one of those links will take you right into the discord server i recommend the discord app not using your web browser to connect i also recommend a headphone headphones or a you know earbud set uh to avoid feedback and echo okay so if you want to call into the show today today we're taking calls in the second and third hour also if you want to email your questions you could send questions or clarification requests to questions at waternearthishappening.com once again the email for questions or clarification requests questions what on earth is happening.com i'll be doing quite a few email questions today last week i cleared the air once and for all publicly presented photos that i took in real time and i included the photos with the zip file for the podcast episode so anybody who wants to doubt this can check the exif information the exif information in the photos and see that they were taken when i said that they were taken and then i uploaded them uh to my computer and posted them in real time last week on the show this is the original photo i had zoomed in last week on the slide this was the zoomed in version as you can see uh so i'm just showing these are the actual original photos embedded in my slide presentations i took them on a galaxy note 10 plus uh in wide format mode okay so that's the full data and this is the zoomed in image that i presented as a slide last week i included the original photos to clear the air that yes i was actually appointed priest to the church of satan uh i hope this resolves this nonsense that somehow i'm not telling the truth about this or that i was not appointed priest in the church of satan once and for all as i've said an innumerable amount of times i used an assumed name meaning a fake name not my legal name which is mark pacio i used the assumed name for people who don't know what that means i've actually gotten questions asking me what when you say assumed name what does that mean people actually don't know what that means sadly okay it means that i used a fake name in the church of satan mark rokhar which is a demon from the book called the pistus sophia in the gnostic tradition which is the faith wisdom of the gnostics if you read the the pista sophia there was a description by the jesus character in the pistus sophia talking to mary magdalene giving his description of what hell and the torments of hell look like and he described one of the demons of hell with the name rokhar as being a punisher of sinners in hell i took my name in satanism when i was involved as rokar and again folks for new listeners and viewers i just want to say again that there's prerequisite material for this broadcast this is a series if you are coming in new as a listener or viewer you don't want to start here okay it's cumulative information you should start at podcast number one on the archives of my website in the podcast section click podcasts in order okay and you should listen in order at your own pace and not skip around okay i'm gonna say this every week all right so this is the zoomed in version of this uh slide that was my appointment from anton levay himself the final picture i took was a letter that accompanied my appointment from anton levay's former life partner blanche barton this is the zoomed in version that i posted as a slide okay so that'll be in the slides again this week i've been putting some little jabs at the whole coronavirus nonsense uh in my beginnings of my shows here's a nice one that i found this week jeffrey epstein's friend said that i have to wear a mask there's ralph from the simpsons with his mask on you know this is how ridiculous all the jackasses that believe the media and believe the people behind the media that are satanists that are dark occultists you know actually listening to what they say thinking that they care about them your little retarded children you're slow people your slow children is what you are okay and i'm not saying it nice to anybody anymore and i'm just gonna just let it fly that's it you know get as offended as you like if you believe in all of this nonsense you're a fucking retard and that's it that's all there is to say to you you're a naive child who doesn't know how the world really works and you think you do and you're fucking wrong you're wrong and you're dumb that's really the answer get as fucking offended about it as you like assholes okay that's how we're gonna play it from here on out from here on out and you know maybe i have been being too hard on people who wear masks look folks i know i can get a little upset i can get a little mad from time time just a little right i can't do this with a straight face okay there's the answer before you judge people who wear masks walk a mile in their shoes where'd you get them at you get them at the clown shoe warehouse the big red floppy clown shoes is that where you got them you you went to the wholesale outlet for clown shoes you know what you don't wear clown shoes you are clown shoes okay that's all i have to say about these fucking morons out there all right because honestly then it gets serious because this is what it's really coming to you know however all the so-called patriots you fucking cowards okay who won't say anything against the police you won't say anything against government no but they'll be the people coming to jab a needle in your arm trust it know it know it like you know your own name fucking moron republicans because that's what you are fucking moron republicans just like the fucking moron democrats that you mock you're both fucking morons all of you okay so drawing the line oh yeah i'm going to draw the line no mass that's where i draw the line and while the globalists the so-called illuminati the illuminati of the bottom of a fucking garbage waist bin okay are handing them a mask then they put the mask on and now they have a needle coming at them saying no mandatory vaccine that's where i draw the line yeah but then wait until your job tells you you can't work here anymore then how fast are you fucking cowards gonna be lining up for the shot fucking cowards because that's what you are you know anybody tries to put a needle in me you're going to be facing the front end of a shotgun or an ak boy that's what's gonna happen son you ain't putting anything in my body i own my body and i'm not your fucking slave and then then they'll say oh a biometric ship that's where i draw the line and then when they say you can't work and you can't buy food without it then they'll be lining up for the fema camp train because you're fake ass patriots and your fucking cowards that's what you are boy i won't even be labored anymore i've basically said what i need to say to you cowards you know why they don't spray children with ddt spray them in the fucking head with ddt anymore like they used to oh because someone's questioned settled science this whole thing about settled science you have your fucking heads up your ass and you're doing harm as a result it was settled science that cigarettes were perfectly healthy for people to just smoke down you know and doctors were recommending smoke camels they're better for your lungs filterless you know while the the papers have all kinds of caustic chemicals and the fertilizers they grow grow tobacco with have all kinds of caustic chemicals i'm not talking about just all natural organic tobacco and natural hemp papers no i'm talking about like philip morris mass manufactured cigarettes with loaded with toxins no but they knew that they were causing lung cancer and all kinds of cancer just like they knew ddt was a caustic chemical agent causing all kinds of health problems but they sprayed it on children's fucking heads you know and it was settled science we know what we're doing every nurse said we know what we're doing it's harmless every doctor said we know what we're doing you're fucking liars and you're a moral fucking trash because you don't know what settled science is you believe in scientism is what you believe in you believe in the illusion of science you don't know what science is or how it's really conducted you believe in government grant funded science which is corrupt it's corrupt as the fucking day is long naive asshole child all right that's what it is totally corrupt and people are on the fucking take just like cops are on the take when it comes to drug dealers and mafia criminals they're just criminals taking money that's all fucking pigs out there are and that's all people in the medical industry and people in the scientific community are they're low-life fucking scumbag pigs who worry about way more about money and keeping the lexus in the garage than they do about helping human beings and if you think it's otherwise you're the naive fucking imbecile and you're the problem we're not i'm done telling people nicely i'm gonna say it exactly how i think from my real personality and i don't give a shit what you think anymore we're done with that the old persona of mark pacio is gone forever and now you get my real personality on the air because folks it's bullshit that you can't be mad and enlightened at the same time there's the guy from 300 king leonidas who waged the battle the unwinnable battle of thermopylae that's what the movie 300 was about he's raging against the persian liaison coming to tell him to bow down kicks him into the fucking pit as he should have he should have done worse to him okay but you know you can be like a warrior like that and you could be as enlightened as the buddha or the christ and these are allegories about being awake to the world and still saying you're not coming for my freedom not without your fucking head coming off your shoulders boy so find out what's gonna happen when you come for my rights and freedom you will son you will and that's all i have to say about that and trust me folks i'm tame when it comes to some people in america how they feel about that i'm tame by comparison because i've been doing this work of trying to educate people as to the immorality of government and how government is slavery its coercion its violence and its immoral behavior under natural law it's spiritual immoral behavior under the spiritual laws of creation and i've talked about that so endlessly ad nauseum on what on earth is happening if you still don't understand the government is violence and is wrong behavior and it is immoral and it is slavery then you have a lot to learn and you should go back and listen to the podcast in order and get your fucking head out from up your ass because if you think government has any right to exist you are just wrong you're wrong as in being incorrect and you're immoral wrong for supporting slavery you are an immoral bad person and that's not virtue signaling that's talking about what the objective moral truth regarding what government is and if you don't know that by now you're way behind the curve and you need to catch the fuck up so that's all the slides i have how's that for uh two minutes of hate huh for what should be hated called immoral fucking people and government slavery you know i'm done putting it nice folks you might not ever get that back on this show because i i'm talking to the immoral illiterates out there who can't get the message who still don't understand if you got the message by now and you don't want to hear it good turn it the fuck off all right if you want hard copies of my items gifts.what on earth is happening.com if you want to get the ark what on earth is happening dot com slash ark if you want to make a donation what on earth is happening dot com slash donate do or don't okay whatever you want to do okay i'm really fucking pretty much done with people all right let's step out for a moment let me calm down for a second let me unmute sorry this is in which one yeah yeah folks i tell myself every week i'm gonna try to calm down and then i lose it on the air because of how stupid people are especially if you were living in this shit show of a city let me tell you something philadelphia where the declaration of independence was written and signed is a total shithole of ignoramus fucktarded people i'll walk right out on my block and scream it out loud i practically am because i know everybody can hear me out this fucking window right next to me okay what a bag of shit the people of philadelphia are i mean you guys are bags of fucking dirt bags of fucking dirt and that's my hometown i'm talking about your immoral fucking trash who will roll over and take it in the ass your losers losers your little fucking baby cowards let me put my headphones on to go to my guests folks we're losing big we're losing big really big and if people think that this is getting any better you guys got your head up your ass you know all right all my guests please turn your video on unmute yourselves all right destree's not in the room can my producer help him get in there i'm going to bring on three guests um from their their friends on facebook uh destree will and scott we're trying to connect to them we had this working i asked them not to turn off their video because we would probably lose it and now we have good tell me on the air just say it scott please turn off your video toggle it turn it off then back on please and let's get destree back in the room this is why i asked everybody to please not leave in video to just stay in the room it's not that hard part of this part of the problem folks is this is why we need technological skills and better equipment otherwise it's not worth doing right it's really not worth doing so i may have to just talk to will because the other guys can't seem to get their act together and just get their video and audio and keep it on it's not that hard folks okay everybody should be competent at this in the year 2020 i'm sorry i have to say it and this is the problem when it comes to facebook keep it on me keep the camera on me okay we might we might just have to fucking postpone it again okay and i'll lose my shit right on the air i don't care i'm so tired of it i'm so fucking tired of it folks this is why you need to take my webinar okay this is the reason everybody is generally incompetent and think that all you need to do is go up and type some shit in facebook we can't we are a society that doesn't know how technology works to such an extent people don't have fucking basic fucking computer setups with a camera and a microphone this is not hard this is basic communication in the 20th in the 21st century that's what this is that's what it is once again we're probably just going to have to abandon because my guests cannot get their act together enough to actually come on my show when they're invited and i'm trying to help ex help them get the message out regarding what we're doing with a facebook group but we can't get the fucking act together this is where we're at this shit i'm glad this is happening i'm glad it's happening let's run with this because what this shows us get this the fuck off of me okay cutting out of discord leave leave discord don't go back to it that's abandoned we're taking calls for the rest of the show okay yeah i cut discord off entirely okay i have i have to relaunch it now because we i got to take calls through it hold on all right do you roll them d roll them please just do that for me d-roll the guests temporarily okay so that i'm the only one with any access in the calling room all right i'm gonna go to an email how about that okay because we're off to a very bad start here okay so let's go to questions d-roll everybody and cut their video please just do it take your time do it all right all right are they d-rolled i want you to de-roll them as guests thank you okay just do that all right let's go to some email questions because this will do this will actually do a better job here's the thing folks i actually invited people on the show to try to put out their message about what their group is about what the goal of it is and to try to clarify why i made an effort to help them to clear up disinformation and blatant government trolling in their groups and there's not even enough technological literacy to bring them on to my show okay this is where we're at as a society this is where we're at as a society and we think we're going to reach the fucking world we think we as a people are going to reach the fucking world with the message of natural law it's delusion delusion that cannot be done without technological competency and and then people wonder why i get angry i understand the fucking dynamic and how it works and most people out there do not and yet they think we're gonna just march our souls on the facebook and yeah we're gonna just get the message out there you know i'm sorry i don't even give a fuck if people i wanna talk to are getting offended it's delusion you have to be competent with technology otherwise why bother why bother folks i'm just going to get harder and harder and harder on you guys on my viewership because you're fucking up you're the fuck ups you're the fuck-ups you're the fuck-ups okay you're the failures the world would be changed if you actually helped but you're incompetent you're fucking incompetent and lazy and you don't fucking try to learn i'm not going to calm down people need to fucking hear this and hammer it into your fucking brain you're incompetent people that's why we're losing what is it going to take to get you to understand you need to learn modern communications technologies and you need to power the fuck through it until you know it you're not going to reach anybody talking to your asshole fucking family members these people kind of people don't fucking matter you got to get your voice out there publicly i i can't i really can't take it anymore folks i i may have to go on hiatus for my health i may have to just go on hiatus to calm the fuck down and get my health together because i can't take the stress of this and honestly i really don't want to i think this is the correct visceral reaction and anybody who's paying attention should be this angry at what's going on in the world to our rights and our freedom folks if you don't understand why i'm angry just shut the fucking show off how about that if you don't get it and you don't grasp the reason why i am as angry as i am shut this fucking broadcast the fuck off i don't want you or need you let's go to some questions because we have to abandon guests for the second time in a row because they can't get their shit together as a matter of fact forget this forget the idea we're not doing it okay so we won't be doing that ever let everybody think what the fuck they want as a matter of fact how about this i'll just explain it because i'll be able to explain it better anyway okay so here's what happened all right deshri started a facebook group months ago it very quickly got out of his hands because he doesn't understand how to manage a facebook group this is part of the problem part of the problem is people should be technologically competent and i understand the enthusiasm for trying to do something right this is what we're like we're like okay mark's telling me to go do something and so we do something that we think we know how to do or we do what we can from the place where we're at okay but ultimately when it comes to social media that's a different dynamic let me say this again folks social media is a slightly it's not even slightly it's a very different dynamic than starting your own website start your own website learn how to do it if you don't know how to do it ask somebody to teach you who knows how to do it or pay somebody to start it for you and be your webmaster that's it it's called you gotta suck some fucking money into it it's called sacrifice you may not have to be able to buy as many fucking frozen pizzas for your fucking freezer as you did last week or last month and take some of that fucking money and put it into a website you know how many thousands of dollars do i fucking put into this operation out of god knows the fuck why i don't know why it's doing exactly fucking nothing man i'm telling you all these years all these years you guys have stood fucking still and been a passive fucking observer when i told you the whole time from the beginning of the fucking show it was about action passive observers i'm going to continue telling you what happened starts a facebook group it's completely out of control and look folks this isn't about telling people what they can and can't say all right you know what this is about blatant government paid trolls in the group trying to put so complete disinformation as to what natural law and anarchy are so destree doesn't know how to deal with this they're overrunning the group so i emailed him and i said it looks like you got a bet i saw it and i saw how bad it was and i was getting very angry at people really doing harm to the effort of trying to get the message out there about what natural law actually is and what anarchy actually is and the moral implications and the moral principles that underlay them so i called deshri and asked him do you see what i'm seeing about how badly this group is totally overtaken and you got low quality individuals in it you have low quality individuals who think they understand natural law and anarchy and do not you have people in your group saying natural law means the law of the jungle oh we're just a higher order being than animals so there's no animal rights and we can do whatever we want with them hold on a minute wait i think wait folks hold on i'm stepping out of here and i think we do have a guest we have a guest we have a special guest we're going to go to our special guest regarding what a lot of people think natural law is on facebook here's our special expert guest yeah well you know natural law means that human beings are a higher order of creature than animal and so therefore we can just do whatever we want to animals we can slaughter them we can eat them animals don't have any rights yeah that's what natural law means fucking retard my guest is a fucking retard okay this is what the people who are posting in this group look and sound like yes they look like this yes i've actually witnessed them i actually installed some spyware they didn't realize i know how to do that i installed some spyware in their computer turned on their camera and this is what they look like actually they actually look like this okay so there that's actual i actually lied this is actual camera footage that i captured from their webcam in the background with spyware that i installed okay and that's what they actually look like all right yeah folks i gotta do stuff like this to even stay sane anymore okay so you know this is uh this is what people are saying in these groups for real to be serious now they're saying natural law means the law of the jungle it means the the natural order that darwin spoke about right survival of the fittest when i have specifically said thousands of times that that has exactly zero to do with what natural law is thousands of times and it has nothing to do with me there is a truth regarding what natural law is and it is not that it is not anything to do with the quote natural order survival of the fittest human beings being having dominion over the animal kingdom natural law is objective eternal non-man-made conditions that govern the consequences of beings who have the capacity to understand objective morality that's what it is and that's what it always has been that is why animals are not bound to natural law as human beings are bound to it when a lion goes down takes down a giraffe in in in africa and a pride of lion eats the giraffe they are by nature carnivorous animals and they do not are not held accountable for moral by moral law natural law in the same way a hunter just going and shooting a giraffe because he feels like taking it as a trophy is held accountable under natural law is murdering a baby in a satanic ritual and chopping it up in little pieces is somebody not going to be held accountable to natural law or is that is that going to be the same as you know uh going out and uh killing a a uh uh a a piece a cattle you know a a cow you know on a ranch of course there's going to be even a higher order consequence for the murder of a child both of them still are violations of natural law because you took a life that does not belong to you to take it's theft theft of life and don't give me the plant bullshit we've been over that a million times plants are connected to the earth they are not animate they are not animals and yes that is a different life order structure in the hierarchy of life that's why it is not breaking natural law to take plant life and consume it it grows in the earth for us and regrows in the earth it's an extension of the earth i would say it's less harmful to even take the fruits of flowering plants than uproot the plant itself but don't give me the bullshit that plants are the same as animals any more than plants are the same as humans anymore that humans are the same as animals or animals are the same as plants it's a bullshit argument it's a non-sequitur one having nothing to do with the other and i've already recommended if you don't understand that you need to go deeper into occult knowledge read deep level free masonic knowledge deep level rosicrucian knowledge deep level kabbalistic knowledge and many other traditions all of which talked about the non-sameness the non-identity of plants animals and human beings it's all in their literature and they're correct in most cases about it and i'm correct about it and most people are not correct about it so anyway what these people are going in is advocate saying oh veganism that's that that has nothing to do with natural law no you're fucking wrong it does have to do with natural law i'm just not telling everybody to go vegan cold turkey and be a militant vegan veganism has a lot to do with natural law because it's about has a lot to do with the taking of animate life and ceasing and desisting in that behavior that you do not have a right to engage in because that life is not your fucking property then you have people in there going there's no such thing as objective morality bullshit moral relativists so again i was going to give people independently their own opportunity to say what they thought about what's going on in the group on air but they can't get their technological act together so i'm sorry if that offends people or it embarrasses them but it happens to be the case so that idea is being abandoned and any guests who can't get their fucking act together to be on this show will be cancelled that's it we'll just say sorry you can't get it together on to the next guest and i rarely have guests because of shit like this okay but that's how it's gonna work on what on earth is happening you get your fucking act together with your technology or you don't come on this show and it's not that hard it's not that hard folks it's not that hard people have shit computers and shit internet connections because honestly you don't care enough to fucking actually pull your money get your fucking money together i don't care if you have to scrounge and scrape don't eat for a fucking month take water and juice for a fucking month and don't buy any fucking solid food if you have to how about that sacrifice to get the fucking technology you need it's as important as owning a gun in today's day and age get your fucking technology skills under your belt or you're not helping you're not helping you think you're helping but you're not helping and folks i know i'm going hard on people i'm going hard on people who want to help because you're look folks i'm sorry it's gotta be said to you just plainly and straightly you're not doing good enough it's not good enough your effort is not good enough your effort is not good enough nobody else out there is telling you that you know why they're all afraid of you they're all afraid oh my god he might get offended and stop subscribing to my channel get as offended as you like and shut it the fuck off how about that i'll say that every fucking week i don't care about viewership i don't care about ratings all i care about is what's true and what's going to advance the great work that's it and you know what you could call that fanaticism if you want you could call that i i go beyond that i'll call it jihad i'll go so far as to call it jihad because that's where we're at that's what this is and no it's not islamic jihad it's not any other kind of bullshit religious jihad but this is a holy war that's what it is we're in a fucking spiritual holy war and if you haven't realized that that's where we're at and it's about the the soul it is about the soul the mind the body and the soul if you haven't figured that out yet you're not paying attention so you know what all you other little shit pussies on youtube they're worried about your youtube numbers and whether you have youtube subscribers and you're taking your fucking blood money from youtube monetizing your channel you're so worried about offending your audience because your patreon might go down for the month turn it the fuck off unsubscribe don't fucking give me a fucking dime i don't give a fuck i'm here to tell the harsh truth you think i give a fuck about money with what's going on in this world if you donate fine if you don't i don't give a fuck if you subscribe on patreon fine if you don't i don't give a fuck i care about what's true and what's right and that's all that matters and i care about advancing human freedom in the face of dirty fucking nazis and communist trash roaming our streets you got dirty fucking nazis and communist fucking trash roaming the streets of all the cities of america and people are worried about and people we have people who say i want to tell the truth about what's going on in the world and tell the truth about natural law and they can't get their sound and image in a fucking computing device in the year 2020 take the fucking course next time i offer it how about that look i'm not going to go easy on people folks i don't care if you're trying to help help don't try to help this is what everybody does they they they think that they're doing something good on their own terms and most of the time it's a paltry shitty effort where they're actually creating more drama than they are actually getting the word out folks i i really i may have to take a couple weeks off i mean i may need to take at least next week off i don't know i'm not doing well if you can't tell and no fuck faces it has nothing to do with my diet come and see me and i'll show you how strong is a fucking bull i am you think it has to do with my diet it has to do with your shithead fucking meat diet that's putting all the fucking hormones in your fucking brain and nervous system that's why you can't think fucking straight to get your fucking act together and fucking tell the truth publicly you know then you want to say it's about my veganism go fuck yourself rat fucks folks if you can't tell i'm at a point where i'm ready to go to war i don't know i don't know what to tell you you guys have myopic vision you i'm talking to my viewership i will burn this show to the fucking ground i don't care i'll insult everybody till no one watches because if you think i give a fuck about money or viewership you don't know what i've been talking about since day one get involved be competent and do it learn the skills you need to learn learning how to use a fucking computer in the year 2020 is like knowing how to read and write 100 fucking years ago get your fucking act together sit down and learn take the fucking time to learn there's no excuse anymore i take my fucking time to do this shit and take time out of my fucking day to bring people on the air and they can't even get their act together to be a guest you're an invited guest it's disrespectful honestly it's disrespectful look anybody who i'm inviting to be a guest on my show you will do a discord test with us on saturday or you will not be on the show and you will have your technological act to fuck together or you're not coming on what on earth is happening that's how it's going to fly and speaking of which i just want to let people know i forgot to put it in my slides because i'm losing my shit over all of this i will be on laura eisenhower's show which is called dark to light uh she co-hosts with david rodriguez who is a former professional boxer and they do a show they co-host a show called dark to light which specifically kind of focuses on people who you know are exposing the darkness and trying to transmute human consciousness and their shows very good i've been watching it david ike was on last week uh very good uh broadcast good production values uh good topics and guests they have graciously invited me to be on the show and i will will myself to hold my shit together on their broadcast because it's their platform i'm losing it on my own broadcast folks because it this broadcast belongs to me this is my area of the internet if you don't want to watch it shut it the fuck off okay but i will hold myself together respectfully because it is their platform and that has been the approach i have taken if people don't want to bring me on because of what they see here on what on earth is happening that's their decision you don't have to bring me on okay but if you want to bring me on i give you my word respectfully as your guest i won't do this on your show okay i'll tone it down for the people who are seeing me for the first time but guess what this is show 233 of what on earth is happening and i'm not toning it down here in my lair this is my lair i'll do what i want here and like i said i'll burn this fucking place to the ground if i want digitally i'll burn it to the ground folks i don't know if you can't understand my frustration you're not paying attention you're a halfway half-asser that's what you are if you don't understand you say i don't understand why i'm like so angry you're right you don't understand that you could stop at the first two fucking words the first three words i don't understand yes full stop you don't need anything after that you don't you don't understand you don't understand anything you're one of the people who thinks they understand you have your head up your ass and you don't understand what's going on in this world you don't know how this fucking world really works if you did you would understand why someone like myself gets this angry but because you're know nothings and your half-assers you don't you say i don't understand how's he so angry what could possibly make a man that's angry that's what you sound like little boy little girl half-asser know nothing you don't understand full stop full period after the word understand stop right there then you'll be correctly describing yourself all right let me go back and try to finish this story i called destree i reached out i said you got bad trolls in your group man i mean you have government paid disinfo cointel pro agents just ravening frothing at the mouth just to open pouncing in that group and just going fucking nuts and he said you're absolutely right mark you are saying it exactly as it is i have thought this for months and i'm beside myself i don't know what to do because i don't really know how to administrate this properly i don't know what to do about it and i'm beside myself about it so right there i was happy to hear that this individual recognized that what i was saying was the case he didn't fight me on it he was actually glad that i reached out to him because he said if you have any suggestions as to what to do i would like to hear them and i said absolutely we helped reel in and clean up a couple of other facebook groups and yes that's what it is it's called reeling people in and cleaning it up and i've asked people to do it i've asked people to do it with groups with my name on it or the what on earth is happening name or acronym w o e i h if it said mark pacio what on earth is happening or w o e i h i gave members of those groups direct ultimatums i'll be totally forthcoming and honest folks and it's still not censorship if you think it's censorship you have your head up your ass you have people put your name your legal name on a group and then start saying all kinds of fucking things that you completely utterly disagree with that have nothing to do with your philosophy and saying that it's your philosophy okay yeah i'm sorry my producer is just telling me i didn't even give the date this is how back and forth i am today okay i'm gonna be on laura eisenhower and david rodriguez show dark to light um this wednesday evening at i believe it is 9 to 11 pm east coast time they broadcast live on youtube and facebook uh if you are uh you know check out laura eisenhower's facebook you she usually will post a notice about when they're going live and it also streams live there and then i believe there is a dark to light you youtube channel or you could look up laura eisenhower on youtube i apologize i should have had this information ready in handy i did not do it in my slides so i apologize for that but i wanted to make sure i get the word out to people i'll post it on my own social media as well so do check out laura eisenhower and david rodriguez dark to light okay so destree said yes i see the problem you're exactly correct we have trolls and dis info agents in the group i don't know what to do about it do you i said yes actually i do because i dealt with this problem with groups with my name on it or my website name on it and i reached out to those people and we worked out a method of cleaning it up we did this through asking introductory questions to get into the group group moderation meaning that administrators would have to approve the post to make sure it has to do with the content of the group and folks this is because there's a goal for the group if you want to have a facebook free-for-all group be my guest and go for it i'm not telling anybody not to not to go exercise your free speech on facebook on your own wall or make a group that you're the admin of and make it a free for all but if you're gonna have a goal of we're going to try to teach the truth about something that has a truth about it like natural law and anarchy then you should set some basic guidelines and rules for the group and yes there's nothing immoral about doing that it's saying if you start if i start i started my webinar right okay so my webinar is about how to become the true media so i'm talking about technological methods of really working with technology the right way do you think we're not working with technology in a serious way folks we're broadcasting simultaneously on five platforms right now we're live on by the way fuck you vimeo by the way vimeo listen to me you dirty fucking nazi scumbags fuck you you're gonna have to look your children in the eyes all you dirty nazi fucking pieces of trash at vimeo and youtube and google and facebook and twitter all you dirty nazi fucking rat trash your nazi and communist trash okay and you're gonna have to look your fucking children in the eye when they're enslaved totally enslaved in the future they're gonna ask you you rat fucked you rat nazi trash what were you doing while the world was being enslaved and you're gonna say i was actually helping to enslave it by taking down people's fucking posts on their own platforms you're not doing moderation you're lying to fucking people you're real real sensors big tech are the real sensors not what we're trying to put out a group destroys trying to put out a group to teach people natural law and keep it in focus to put to take articles down post down that are saying natural law is about we have dominion over the animal kingdom natural law is about oh well survival the most ruthless yeah flat earth posts etc all of it you know totally off topic shit shit posting there's a name for it folks there's a name for it it's called shit posting okay you got the trolls flood and the gates you got total fucking little babies coming in and shit posting okay first of all this is why i just think it's generally a bad idea and it creates nothing but more work i don't think it's i honestly don't think facebook is the platform for spreading the truth i think you should learn how to make your own websites and you should speak your truth on audio video and articles and take comments to fuck off because comments are noise added to the signal let other people go and say what they want on their own platforms i am i am a fan of the strategy of atomizing people not bringing them all together in one place on so on on the web everybody have your own area look i wish i could turn my facebook comments off and twitter comments off if i could i turned them all off and all my page would be is a blog that i i could tell people who are friends with me here's what i'm doing and here's what other people who i think are doing valuable work or doing and that's it i would turn off all commenting if i were in control of that on facebook but in their infinite wisdom they say you're not allowed to do that because they want the infighting social media is not bringing about people together it's about adding noise to the signal and creating infighting this is why i don't make a lot of posts there this is why i focus on my work what i'm doing and again you could call this this is still part of the show social media outreach whether it be individual or group outreach in all honesty you're not really helping and i don't care who is one of my friends that does it this way i don't give a fuck get as offended as you like you don't have other technological skills so you fall back into the shit this is the quagmire this is the fucking dross it's the shit area it's the ghetto it's the ghetto okay that's what it is and get us fucking offended about it as you like facebook is a trash area of the internet it's trash all the dross vermin and immoral fucking scumbags gather on facebook and twitter most of the trash human beings of the world are in these social media outlets you're not going to really reach many people there you have to have your own platform i don't know how many times i've said this it's called get put the fucking phone and tablet down get on a computer and start learning how to use real technology on a computer they took the computer out of people's hands and put into their consciousness all you need is this fucking slab the fucking bullshit phone slab that you can't get any real work done or the tablet where you can't get any real work done they're not creative computing devices it's shitwear it's shit hardware for consumption typing into facebook is not going to accomplish the great work i'm sorry that that's the truth of the matter you ask anybody were you converted via facebook put your own videos up on youtube i don't even care if you use that as your video sharing platform mirror them on uh bit shoot mirror them on library but if you think you're converting hearts and minds on facebook you guys are lost lost in your head facebook is a quagmire shit post storm that's all it is to pit people against each other and lose the message in the total fucking trash that gets thrown around like the vomit out of the vomit puppet's mouth whoever made the fucking vomit puppet compilation brilliant work i pissed myself watching it okay if people don't know what that means type vomit puppet compilation into youtube and you'll get it okay somebody strung together all the segments i did with the vomit puppet from american uh what is it team america anyway we had a meeting that other people were not privy to about agreeing to do this so i said we're going to have another meeting where i'm going to bring some people in that will help you and that was scott and will who have done a very good job moderating and admitting in other groups that had my name on it i gave destree no ultimatum i said if you want our help we'll give it to you but i did say if you continue to just let it run totally unchecked i'll have to publicly state that i distance myself from anything in this group and that they are posting a lot of disinformation i would have to do that publicly with so i'll continue to do that if i find another group that's posting blatant disinformation about anarchy about morality about natural law i'll go public here and on my own social media and say i disavow anything in these groups because folks let's put it this way of course i didn't invent natural law natural law or inherent laws of the universe but guess what folks i'm not ashamed to say and i am not i'm not i will not engage in false humility and it is not hubris for me to say i am the person in the modern world who has brought natural law to public prominence more so than any other teacher in the world that happens to be true happens to be true manley p hall did a very great amount of work regarding that i think um which richard wetherill did a tremendous amount of work regarding that but i don't think anybody has done it to the extent that i have in the modern world in the modern day let's say the 21st century certainly no one more so than me and uh but look you want to say that's a statement of hubris or ego i don't give a fuck that happens to be the truth and it's not an egotistical statement i'm saying that simply as a matter of fact a matter of course when you ask people who they learned about what natural law is from invariably the words mark pasio are going to leave their mouth next there will be some others with some exceptions but guess what in the modern day you're going to hear the words you're going to hear the name mark pacio come out of their mouth when you ask people who do they learn about natural law from and no we don't need another term okay we don't you could call it moral law you can call it spiritual law it's also natural law we don't need another term we need people to understand what the word natural and the word law means okay we don't need another term for anarchy okay voluntarily voluntarism voluntarism consensualism it's been called a million different things it's called anarchy the actual definition is very clear to any dictionary that is going to tell the truth not lie about it it's not a state of disorder or lawlessness it means no rulers no masters therefore it means the state of freedom and allowing someone's rights to be exercised unrestrained however having a total free-for-all in a facebook group is not a representation of anarchy that is a representation of chaos and total lawlessness it means that there is no decorum in the group it means you are saying post whatever you want no matter how untrue it is with no moderation this is the problem with social media it allows for that to a large extent and then when most people see it they go all of these fucking idiots i'm not going to be the person to try to get involved and correct all of this nonsense i know because i've seen it folks and guess what that's largely been my take i'm too busy i'm too busy preparing shows trying to do you know presentations and live shows and work on creating a network of other people who are actually reaching out and teaching people that's what i'm working on that's why i haven't had a lot of original presentations and i'm doing calls because i'm working in the background to try to do several different things that people don't see on the air and i'm extremely busy every day with this work the one great work network is coming soon folks and we are gonna blow you away with it you're not even gonna believe what we're going to have in store and it's going to be free okay let's put it that way we're not even we're going to have i'm going to tell people a little bit about how this model is going to work we're going to have a subscription but it's just a voluntary subscription we're gonna do it in an anarchic fashion if you want to subscribe we'll have a subscribe button you'll be able to subscribe if you don't you can still get all the content how about that model how many people are doing anything like that okay so the one great work network is coming be patient it's going to be here i'm going to say certainly before the end of the year all right so we had a meeting with destree scott and will the guests that i wanted to have and look i i don't even want to group i'm not going to even group will in will basically ha you had your act together okay i'll say that about will not to even put the other people on on blast or try to embarrass them but like we as a people as a society folks we have to start learning how communications technology works people this is embarrassing this is do you you ever wonder why we're having our asses kicked why so many fucking people are brainless zombies and we're getting our asses kicked this is why this is the reason we can't even get our technological act together enough to say i'll i'll be have my act together and i'll be able to go live with my voice and video on a show on an internet broadcast could you imagine it's not good enough folks it's not good enough man i don't even want to be this hard folks if you think i want to do this and this is the other thing you think i want to do this shit at all i haven't wanted to do this since i started i haven't wanted to do this shit since i started doing it i'm bitter i'm a bitter man in case you can't tell i want my life to live in freedom for myself quite frankly that's what i want for all of you i'm very very bitter that this work is just smashed upon my shoulders and then other people go oh mark i'm so glad you're doing this fuck you you're the problem yeah more coffee is just what i need damn this is good coffee yeah yeah will scott and others helped us to very nicely reorganize some of the other facebook groups out there talking about these topics and i thank them for it and they did it in a way that was very well done and acceptable okay they weren't super heavy-handed just saying oh you're banned your band your band no they gave people multiple chances to prove that they were not a troll a disinformation agent or just a shit stirrer and a shit poster they gave them a chance to you know stay in the group but mute them so this way they can't post but they can watch and learn this is the approach we were going to take in this other group i'm not even going to put any names of groups out there folks you you could stumble across them you stumble across them okay i'm not going to promote anything because quite frankly in in a way i don't even believe in facebook promotion in groups i uh you have my own social media i very rarely talk about if you hit it you go on my page i have a little social media section hit it or don't i honestly i think social media is shit it's shit pure shit okay i don't know how much more plain i could be about you know where face what facebook is fucktarded people who don't know technology they all gather in the shit area in the big fucking bin of fucking dog shit and i i should apologize to all the canines out there i just don't even have a better word actually there is a better word it's called dross it's the draw stump okay that's a great word it sounds just as shitty as it sounds it is the dross dump maybe we ought to do a show welcome to the dross dump you know because that's what it is that's what facebook is that's what twitter is okay it's the dross dump all right and that's who's there that's who's there people who don't know how to create their own media on the internet get your fucking own domain post your own content on your own domain if you don't know how to do that you should by now know how to do that everybody there is no excuse for not being able to get a domain point it to a wordpress or a fucking blogger site no excuse it's free get a free wordpress site get a free google blogger site use their technology against them it takes five fucking minutes go buy domain anywhere any fuck any fucking registrar in the world type in web registrars go buy a domain for 15 fucking dollars a year and point it point the name servers to google blogger or to fucking wordpress how hard is that they give you the instructions you can read about it in 10 fucking minutes it takes 10 fucking minutes the other thing i got to start showing people to do on the air is really how to search the internet effectively because that's the other thing you guys don't know how to even search the internet let alone publish on it we're so ass backwards this movement is so disorganized and non-knowledgeable and folks i said it last week when i was with the satanist they were competent driven people and that's why they're beating you they're beating me too because you're on my team i have a team of inepts i have a team of incapatanos you're inept incompetence and your efforts aren't good enough your efforts aren't good enough you're inept you're non-knowledgeable you're ignorant and you're incompetent almost all of you this is why i generously started how to become the true media to to to mentor to mentor people because that's what i realized people are so incompetent they need mentoring they really need to be taken by the hand and guided step by step on how to do anything they have no life skills and folks look you know what yeah i mean autonomy is a lot more calm you know there's there's researchers out there like derek bros and you know max egan you know they're they're more very they're they're chill and calm about it they they have you know they're not as at their at their end of their rope when it comes to fucking being angry and just just completely bitter i'm this bitter for having given up this much of my life to people who i feel are beneath me and that's how i feel i'm not gonna lie i'll be honest i feel like you're beneath me you know who i never felt like they were beneath me the satanists that i worked with who own and control the world i never for a moment looked down at them and felt that they were beneath me never i looked up to them i learned from them they were like my mentors in evil i felt like if i had a question i could ask i can't ask hardly anybody a fucking question when i have a problem i can't solve something or figure out i got nobody to go to because i'm at the top of the food chain of knowledge in my sphere of influence and you know how sad and lonely that is pathetically sad and horribly lonely and you you guys don't know what it feels like because when you have a problem you ask somebody and they know how to fucking fix it if they have any common sense then everybody starts taking advantage of you like like you're their personal fucking valet when it comes to fixing everything because they're incompetent thank you josh good smoothie i'm telling you i got it i got to take it slow take it easy i'm i'm really i'm gonna hurt my physiology and i know it i know it and i still fall into the pattern of really going nuts and guess what it's very justified still it doesn't mean that it's not going to harm my personal health which i don't want it to because i'm telling you folks i really i i have i'm at my wit's end with dealing with human beings and their stupidity i'm at my wit's end i i cannot toughen myself up anymore to deal with it it affects me you know i'm gonna on the one great work network i'm gonna have a camera on me all day one day i'm gonna show you an entirety of one of my really busy days you're going to see what i do all day long sometimes until 2 a.m in the fucking morning or beyond non-stop work there's no hours in this job there's no days off no hours and no days off it's constant now you guys have structured hours at your slave jobs and then you know want to say oh i can't i don't have time to do it no that's the fucking problem that you have to painfully smash through and sacrifice there is no easy answer to that the answer is yeah you have to just sacrifice and do without i don't understand why you can't understand that so we met with destree and gave him a lot of pointers and folks i was this angry in the meeting i'll be honest with you i'll be honest with you i was angrier i was so mad i was screaming at the top of my lungs because of all the things i had just read in the group in the morning that just set me off on a foul fucking mood the whole day realizing that these trolls these paid trolls which is what they are and that's what you fucking are your paid fucking trolls the people out in these groups you think i don't know who you are i worked with your fucking bosses you little fucking punk children i worked with your fucking bosses they told me all about how their operations work they paid trolls to go on and fucking light these fucking areas up light old forums up irc channels fucking you know well usenet groups back in the day and now private public forums and fucking facebook channels and facebook groups and twitter they're paid to go on there and lie and stir up shit and add noise to the signal you don't think it works like that you're a naive fucking punk bitch child and you're fucking played and you're clowned and you're wearing the big red floppy fucking clown shoes so we said we can help you moderate that and clean up the group easily we've done it with other groups this isn't censorship assholes anybody that thinks it is you've you it's because you take no personal responsibility for putting out any quality you take no personal responsibility for put out putting out anything with any quality that actually teaches somebody you think a free for all is the method and you're wrong you're incorrect a free-for-all is not the method that teaches people if i start opening up my webinar i open it up at 7 00 pm and at 8 pm i give class instruction should i just let everybody talk all over each other who don't know what they're fucking talking about oh wait a minute i think this is the way that you point a domain with a name server and then they they open up photoshop and they take a brush and they scribbled across this canvas in photoshop and closed the window and hit don't save and they say your domain just got pointed for any technological people that know what i mean imagine if that's what was happening right i i likened it to if i was a french language instructor and and and somebody stands up in the middle of the class and goes starts speaking fluent german and then pushes me out of the way away from away from the desk or the podium and go and starts t teaching german and saying this is the french language class should i just say well go right ahead it's a free-for-all do whatever the fuck you want right that's going to get it done right that's going to get my goal done of teaching them french that's going to get my goal done in the webinar of teaching people technology and publishing yeah here's how you build the web page i open up a word document type a bunch of gibberish into it and hit save and save it on the desktop and i built a web page no you scribbled a bunch of gibberish in a word document and saved it on your desktop you didn't publish a web page okay there's a truth about these matters there's a truth about how the french language is structured there's a truth about how to publish to the internet there's a truth about anarchy there's a truth about natural law and if the goal is the communication of that truth a free-for-all will not accomplish the communication of that truth you have to have competency in the group and folks this should be common sense i shouldn't even have to do a show explaining this you know i should be teaching you know esoteric occultism on this show instead of teaching people that if you have a free-for-all you're not going to accomplish any goals yeah hell let's build a bridge over a river we're going to have people who have no engineering skills can't calculate any stress forces don't know anything about materials or material science yeah we'll just have them built with a bunch of bricks slap a bunch of bricks on top of each other and you'll have a perfectly stable fucking bridge yeah but stopping people from doing that and actually building it the right way would be tyranny and censorship get the fuck out of here you fucking silly fucking children you're silly little children and you don't matter that's the real answer you don't fucking matter you think you matter and you don't matter yeah it's if they're dross dross again vocabulary word from last week detritus debris unwanted material things that water things down the chaff not the wheat okay trash they're getting it gets in the way it's all material that gets in the way that's all dross is oh folks i just wanna like to say i've never even finished fuck vimeo you nazi sensors okay you might as well extend that fuck you to facebook twitter youtube everybody google apple let's not leave anybody out okay we're now broadcasting live on the twitch platform that's how fast i'll drop somebody's ass and stop paying them okay you're not going to censor me and still get my money fuck face all right you're dropped like a bad fucking habit all right and yet we have the service still broadcasting until around october so we'll keep doing it and then we'll be off that platform and i'll just use the free services but you know imagine i'm paying them like fifteen hundred dollars a fucking year and they're going to censor me fuck you guys you're not going to get any of my money or the money people donate to for this freedom of speech broadcast so we're going on twitch from now on which seems to be doing very well and you know we'll be able to do a lot of great stuff with this platform it's largely a gaming platform but people use it for talk shows and podcasts as well so that's what i'm going to use it for we'll go into every avenue when bitshoot starts doing live streaming we'll go there we will have every means of backup and every means of publishing available unto us you will not stop me you will not stop me you're up against the will you don't understand boy it's driven by something beyond any of us and that is the truth that is morality that is freedom that is natural law and that is the creator of the universe and you are not that and neither am i and that is what is driving my word and you will not stop it you you won't stop it if you destroy my body the dust and ash you still won't stop it because i will immoralize my words by putting them on the net for all to hear and this is the problem with other people they are too chicken shit lazy and cowardly to learn how to do that and guess what you guys are the problem because the longer you keep waiting and waiting to speak the more this evil is going to take this planet into places you can't even imagine we're losing and we're losing big time and the time for this incompetency to stop is now get competent and get publishing so let's go to all right that's all i want to say we gave assistance to destree to reel in the problems he was having on this group there is no censorship it's called if people are publishing nonsense and shit posting and totally contradicting natural law and anarchy their posts are going to be either not allowed up or taken down because the group has a goal it isn't censorship it means go on your fucking area and spread this information but you're not going to do it here just like i'm not going to you think i'm going to open up war on earth is happening as a free public platform for fucking nonsense fucking shit spewing idiots to spew their fucking dross all over my page and then say your opinion is just as valid of my learned experience in life and all my years of hard-won knowledge no it's not quite frankly it's not just as valuable quite frankly it's bullshit and there's a lot of bullshit on a lot of facebook pages that say they have anything to do with anarchy and natural law and if it's within my power i'm not going to just let them shit all over all of my work that i sacrifice my fucking life to do not without a challenge you'll be challenged trust me you'll be challenged you want to say that censorship go the fuck ahead and say it i don't really give off fuck what you say and you get you got a further problem with that see me in person and then talk about how weak my my veganism makes me you'll see you want people want to death threat me you'll fall man dude i'm i i don't take kindly to fucking you know shit talking all i have to say is just fucking try it we'll both meet the creator that day and we'll see who's more prepared that's all i have to say we'll go together cause nobody's gonna fucking attack me with impunity physically big shit talkers want to talk shit behind the keyboard try something in person you won't be happy with the fucking result and that's i'm not shit talking again that's not a fucking promise that's not a guarantee it's a spoiler it's what will occur because i know my rights and i'll defend them to the death so we're helping reel in this group and there is no censorship it's called group moderation to try to stay on point with the goals of the group that's what it is and nobody's going to tell me that it's anything other than that because that's exactly what it is and if you think it's otherwise i don't even give a fuck about your bullshit opinion you don't know what's going on you don't know what transpired you don't know what went on and you don't know what the goal of the fucking group was from the group administrator who asked for my help so fuck you all of you who think otherwise i just told the truth of the matter on the air and actually spent too much fucking time doing it let's see what uh things i need to repeat on the air today mark i hope you're well i wanted to ask what are your spiritual practices to keep center and balance well apparently not much ladies and gentlemen because you can see how very well balanced and centered i am these days you know the answer is i try to eat right get as much decent exercise as i can when i can which i don't even do enough of these days i eat i keep my diet pretty tight i try to eat fruits vegetables juice smoothies you know things like that um i supplement with a lot of supplements i mean i can't i couldn't even go through my supplement list you will you'll be amazed at the supplementation i should take a picture i have a you know three supplement shelves in my kitchen i should just take a picture of my supplements and that's only some of them okay um i do a little bit of meditation daily not much and i do concentration and contemplation i focus deeply in like a laser beam on my work and i contemplate and daydream when i take a break and at night that those are my practices they're very real world and very grounded i don't do a lot of psychedelic work although maybe i should you know go into a new psychedelic experience at some point but i use that rarely but i will i do do some of that and um you know uh it's very very practical real world grounded application but guess what folks i'm not a machine i'm not a motionless i'm not a robot other people's low consciousness does affect me because it affects my rights it affects the rights of people i care about i care about truth and freedom and when they're being destroyed and demolished because of moral relativism and fucking people buying into nonsense brainwashing it affects me and it should affect you people who can't get angry there you have something broken in your soul if you can't get angry and you say nobody should get angry and there's no purpose or there's no reason for anger you're broken there's something wrong with you you have something wrong in your soul a part of your soul has been cut out of you you should be getting angry at what's going on it's the proper response it is not the proper response to be totally cold disconnected never get angry be even killed all the time that means your soul is broken you're broken at a soul level because you can't really care enough for anything to anger you if you're broken in the heart that's where care comes from you'll never get angry enough you'll never care enough to get angry and then you'll certainly never care enough to actually act and this is where most of you guys are actually at you my viewing listening audience you you yes you yes you i'm not just talking to the fucking ignor ignorati out there you are the problem so honestly to the this person asking this question i think that's much less important than taking action that's my real answer my real answer is worry less right now about staying totally centered and even keeled right get angry get active and wage war on the enemy the liars and deceivers and disinfo agents of our world the mainstream media the satanists the dark luciferians they're winning they're winning do you get it do you get it they are winning we are losing truth is losing freedom is losing because you're not doing anything and most people are more worried about how don't i get angry or stay balanced spiritually don't worry about that now we're at war the time for all of that is honestly behind us now is the time to get fucking angry and do something you should have worried about that a long time ago when you had that was a a a thing that you could to have the the time and energy to focus on we're way beyond this point way beyond it if you can't tell we're in the last fucking moments and this is the critical moment of choice that my intro talks about this is it we're in it it's not coming anymore it's here this is it do you get it put your voice out there for others there's not enough of us teaching this i'm going to take a bunch of emails the essay you read from the former cop answered a lot of questions from me regarding order followers great he ended the essay by giving good advice never talk to cops my question is if we're never supposed to talk to cops how are we supposed to reply to them if they start talking to us and the answer is don't unless it's a private conversation if they're in a uniform and they're on duty stay completely silent is the answer that's what he is actually saying physically stay silent literally literally don't make any mouth tones literally don't move your lips keep your lips closed and don't make a sound literally that's what the person in that essay meant like this don't speak literally okay it doesn't mean don't ever talk to off-duty police officers to try to get them out of their cult you know that's the time we need to be talking to these people when they're not on duty when they're not in the cult actively you know and tell them how immoral they are and how immoral their institution that they belong to as a gang member is so please understand what you know focus in here folks this isn't hard stuff to get to understand that's what is meant all right a lot of people just don't hear what's being said or they can't extrapolate unless you you have to go into such like putrid detail it's such a chore in language because people don't have thinking skills developed that they can't get the basics of what you're saying without you going into unimaginable detail try to get the spirit of the message is my ultimate answer folks we gotta grow up and emotionally mature and mentally mature i never had to explain myself to such an extent when i was with these satanists they understood what you meant you didn't need they would often just stop you i get i get what you're saying they don't need they didn't need further explanation and refinement of language and clarity this is how brain broken most of us are we're broken at a thinking level that we really cannot think and extrapolate meaning we need somebody to clarify and clarify that's part of what this whole show is about these past few shows i might do a few more shows of just clarifying what i mean because people after 230 fucking episodes still can't understand the words that are coming out of my mouth and you know what it's easy for you fucks to say don't get angry about it mark you haven't been doing what i'm doing and that's the fucking problem that you haven't been doing it like i said i'll do my show my way you do your fucking work your fucking way i'll do what i want here on what on earth is happening and if i want to burn it to the fucking ground i'll burn it to the fucking ground tired of being lectured at told on my broadcast when i've been doing this fucking work for the amount of years i've been doing it for being told how to do it fuck you fuck you you my viewership i'll tell you that fucking don't send another fucking dime don't go to the fucking store shut the fucking broadcast off unsubscribe from youtube don't subscribe from patreon fuck you all how's that for burning it to the ground we're a shit show we're a shit show that's what it is that's what the freedom movement is that's what the anarchy movement is that's what the effort to teach natural law laws it's a big fucking shit show and the satanists are winning and basically have won because you guys didn't do your fucking job you had 15 fucking years to get this together and you blew it you blew it and there's no time left and it's probably a hopeless cause i'll continue to do the great work i'm doing because i'm doing it fucking awesomely awesomely okay the effort i've made here is nothing beyond miraculous and there's no excuse if i could do that why anybody couldn't do it you could do it in a slightly less advanced way but you could do it and you could get to this point probably in a few years at this rate with how technology is going down in price and it's getting easier to learn and use in the last episode you said you have done ritual magic to some success and could talk about that okay i'll talk about it me and my friend fernando who worked with truth freedom prosperity he was actually the creator no i'm sorry not truth freedom prosperity we worked with truthfully and prosperity but he was the creator of philadelphia survive and thrive a survivalist skillshare group that was on meetup.com years ago i was kind of like you know his helper with the group i particularly helped with the digital aspects of it anything computer related posted files to the file section of the meetup group etc we had a mutual friend who was also a satanist who actually corroborates my message and what i was involved in years ago uh maybe i'll uh link to that that um and let people hear um fernando was on my broadcast you can go back in my archives and uh hear about water purification he's in that business or at least was i don't know if he still is we had a mutual friend named jerry who was a satanist at the time that i was involved in the church of satan he was not an active member of the church of satan although he supported levain satanism and he was very deep into satanism in general the whole ideology luciferianism satanism et cetera i fell out of touch with jerry for personal reasons and did not know what became of him me and fernando realized that we were mutual friends when i brought him up one day i did not know that fernando knew him we decided that we would try to figure out what happened to jerry but we didn't know how who would we get in touch with we don't know any of his friends he had moved um you know i believe he used to uh live in south philadelphia not too far from me to my knowledge he no longer lives there which we you know could have asked a couple of friends if they knew where he went anybody who knew him but we really had no way of getting in touch with him or figuring out what happened to him so we said have we ever tried to use a thought experiment as fernando called it to try to bring about a result i called this ritual magic we turned off all technology in the room including the lights turned our cell phones off turned all digital devices off sat there for a half an hour totally unilaterally focused on we are going to find out what happened to our mutual friend jerry and i we don't know how it's going to happen but it's going to happen we are going to sit there focused on with pure intent it will occur it will occur period we don't know how the universe is going to provide this we have no idea how it's going to occur but it will occur i think we should try to do that because i think honestly nothing but a miracle is going to take us out of this slavery that we are in maybe we should do a thought experiment people will wake up we don't know how it's going to happen but they will wake up they will start to question government they still will start to question mainstream media we sat there for only one half an hour with the two of us no one else in the room that's it 30 minutes exactly after the 30 minutes expired we stopped talking about it entirely and moved on to different topics turn the lights back up turn the digital devices back on and put no other interaction out about it just focused the intent and said it will occur and we trust the universe we'll make it happen the end gave no further energy to it after that point three weeks later i got an email about former satanists who are now doing something different with their lives after realizing satanism is actually a very dangerous ideological pathway to go down and it is the ideology of the rulers of the world there was a link in which jerry was not mentioned in this email at all okay there was a link to go to a blog site that was talking about different people who had formerly been involved in satanism and the person was listening to my show and thought i might find this article of interest did not know anything about jerry or fernando or our thought experiment or ritual magic whatever you want to call it i click the link that says read about former satanists you know what they're doing now blog site comes up i start reading about all these different satanists and i keep scrolling and then all of a sudden there's an article about my friend jerry three weeks later after this thought experiment he had gotten involved in christian ministry you know he went down the path of religion which i you know what i understand that happens with people that get so frightened in satanism and believe me they realized what they were involved in he he'll tell you exactly what it is you listen to his interviews now he's done many many interviews about it i might want to try to have him on the show i don't know if he'll interact with me speak with me i don't know if what his feelings are toward me now you know we'll see but i'd like to invite him on the show catch up a little bit maybe talk about what got him out you know i'll tell him what got me out i i know that jerry nell um you know kind of preaches christianity and uh he sees it through the christian perspective or the christian lens okay i'm not gonna you know be attacking or bitter about that plenty of people see it through that lens you know i consider myself friends with fritz springmeier who sees it through that lens you know there are many people who go down the religious pathway when it comes to this because they do realize satanists control this planet so um you know that's an example of a piece of ritual magic that was successful so i do know that it does work if you want to call it that but there are ways of directing energy and that's what these satanists know and they're doing this they call it the mastermind experiment the mastermind operation whatever you want to call it okay it means you're putting mental focus toward one direction they add the action component and then say we're going to make it happen in addition to that focused intent and energetic component then they add their physical will to it and that's why they're winning they do that they care about getting it done and then they get it done we on the other hand we can't even agree on what morality is or what a right is you know or that other others lives don't belong to us to take and we're still thinking plants and animals are the same thing i could put a newborn baby image on this side and a picture of a seedling plant on this side it's the same thing you know chopping that baby's head off and grinding its body up in a meat grinder would be the same thing as plucking that little seedling out of the ground fucking retards people i mean people you're so i mean most people out in the world are such fucking retards man it's embarrassing that i'm the same fucking species as most of these people but guess what i never felt that way for a moment when i was in satanism never for a moment not one moment not one millisecond i felt these people are as as intelligent as driven as strong in willpower and understanding as i am if not beyond and many of them were beyond my capabilities and that's why they're beating us to a merciless fucking pope and you guys want to whimper about passion so angry your fucking children all of you almost all of you your children who are doing nothing and you're worried about how harsh the sound of my voice comes down on your delicate little fucking baby ears instead of that satanists are taking your lives away you're not worried about that you're worried about what i sound like for telling you that you fucking imbeciles so that's what i say let's burn it all the fucking ground let me just totally fucking irritate agitate and fucking you know instigate and insult my own audience because what are you doing anyway you're miserable fucking failures almost all of you almost all of you with the exception of like a fucking handful you're miserable fucking failure no nothings who have done nothing to stop the advance of tyranny on earth when that's all i have implored you and begged you to do practically since day one your miserable fucking failures and i don't care if you never watch a fucking thing i do ever again let's get that clear do you understand government is now talking about leaving out the gender from our id cards here in the netherlands or in our passports is that mind control and what will it mean to us i think androgyny has always been one of the goals of satanism because the less individuation a society has the less the idea of individuality remains prevalent in the minds of people and they want to wipe out all individuality and make people as same and as non-individual as possible that is why they have to water down the genders and bring in androgyny so absolutely that's a form of mind control that is epigenetics or what i call epidiscgenics and no folks it's not transgender hatred i have transgender friends has nothing to do with that androgyny is removing the distinction between the sexes to the the degree that they are able and that makes everybody same non-uniqueness not all conformity and this i showed people the documents in the white hall church of satan which is one of the groups that pushes the androgyny method they have different methods that they push out there and throw things against the wall and see what sticks and it does seem like androgyny is one of the things that they want to float out there to the public and see how many people bite and believe me man they're putting it out there with hormones that's another thing hormones gender bender chemicals of all kinds in the food water and air so yes that is one of their methodologies could you explain why the year 2020 is so important to dark occultists are there any connections to the planet parade or the way other planets are aligned i guess it means the movement of the planets i'm not too really big into astrology personally i've always said it's my weakest occult science however 2020 has to do with vision right human vision if it's perfect is 2020. they are hitting this year really hard because they don't want our vision coming forward and us to be able to see and that's what this is about this whole year is about vision are we seeing more clearly are we seeing more blurred most people are seeing far more blurred than they ever have even people who they thought they had it figured out and understood your vision is blurred you're not seeing clearly you didn't go deeply enough to drink of the waters of the purine spring you had a half a gulp and you put it down and you said that's all that's enough for me no it wasn't enough for you your vision is very blurry you know the guy who came up with the heisenberg uncertainty principle hi the scientist heisenberg said the first gulp from the glass of science will leave you an atheist but at the bottom of the glass god is waiting for you you know think about it heisenberg who's considered the father of modern quantum mechanics said the first gulp from the glass of the natural sciences will make you an atheist but at the bottom of the glass god is waiting for you because he started to understand how deep real science goes and it connects in with what we have called the occult which is the real understanding of the natural sciences and natural law that's why they can hold back how virus a virus really works from the public and it's not really what we are calling or thinking of as a virus that is why they can hold back the understanding of the physics on 9 11 from the average dumb fucking idiot in the public because they don't know how science really works most people do not know the scientific methodology and couldn't tell you one part of it there are worshipers at the altar of scientism so 2020 is all about vision 2020 is perfect vision that's what the occultists want and they want clouded vision for everyone else and they're getting it they're getting it so that's the real occult significance it's about vision the word occult comes from the latin oculus meaning i vision oh koltari means to hide to cover the eyes so as to hide so not to be able to see to keep it secret from our vision it's all about the occult let's move on next email and folks if you're going to email i'd appreciate just getting right to a question or ask clarification immediately some of these are really long trying to get to the question big rise in psychedelic research and you know research chemicals okay it's become popular with people especially those in the new age and neopagan movements uh somebody one of his friends said he believed by taking psychedelics the world could be healed and folks you know just as as a matter of court as a thing things that i've talked about and repeated time and time again here on modern earth is happening psychedelics are tools and and not anything else they are not panaceas or cure-alls okay they are not panaceas they are not cure-alls for everything that ails human beings they will help us see it a little bit higher of a level perspective then they will drop us right back down to where we were and say now extrapolate and pull that information down into the level that you need to work with it at on the ground floor okay so you can't use these things as a crutch or as a party mechanism all right this is something that you need the proper set and setting meaning the proper physical set and the proper the proper mindset first of all and then the proper physical setting sorry about my mic you know the proper physical setting in your environment so that you can go inward and this can show you what it what it needs to show you you want to use them as party escapism you know fly by night bullshit usage you're going to get bit and burnt i've seen it happen i've seen people treat psychedelics really flaunting you know i've seen people you know mix things that they definitely shouldn't be mixing that is a disrespect to the actual consciousness of what they're actually communing with some of these things don't like to be mixed with other things they consider that disrespectful i say they because it's a consciousness at some level it's a plant consciousness a planet consciousness you're communing with part of the consciousness of earth that's what these psychedelics come from they grow from the earth they are part of the spirit of the earth most people will never understand it and they'll use them wrong you know but hey that's their learning journey they they won't listen to the voice of of wisdom who's trying to explain their tools and they can help but if you treat them with respect they'll treat you with respect if you treat them with disrespect you're going to get clocked clocked okay and i've seen it but you know when people think it's some kind of a joke it's not a joke you know they've clocked me in the past and then when i learned the lesson that i needed to learn and they treated me almost like an equal you know or like somebody that they had some respect for let's say they could be very harsh teachers tried to get some friends into natural law they went off on their own started to get in these big time self-help gurus you know he talks about jordan peterson agenda 21 etc there's a lot of people who have halfway knowledge and understanding there's a lot of bullshit new agers who teach bullshit spirituality this is where discernment is called for and a lot of people who are looking for answers think they're just going to find them externally and they're going to find them in the form of a person folks i'm not to be put up on a pedestal and i say it over and over and over and over again that being said i'm not going to tell you that i don't know something when i know it factually and i'm correct that doesn't mean i know everything there's a whole lot of stuff i don't know and if i don't know i'll just tell you i know nothing about that like you know people ask me about planetary alignments and influences um i'm not the person to ask about that i don't know a whole lot about it you'd have to consult with somebody that considers themselves someone who has worked a lot with the astro uh astrology and astro theology i know astro theology i know but astrology plain and simple i have not worked with much not very deeply anyway i just had in my chart read yesterday actually again and immediately i'm not even gonna you know give any personal details but immediate person goes clearly right off the bat you're put here to be a spiritual teacher and i told him nothing but my date of birth what time i was born in the city i was born in that's it you were put here to be a spiritual teacher imagine that instantly so you know there's some level of understanding of this and the people certainly have clear understanding of it i gave my chart to another individual woman in the past said your communication skills are your strong point your you are here to communicate with a lot of people in the world didn't know you know didn't really know what i did so how's that happen when you give people three pieces of information or for your name your place of birth your date of birth and your time of birth that's it four pieces of info and then they come back telling you things that are 100 percent true about you you know and hey you could say they look you up i was in person with this person they didn't go on their phone or on a laptop and look anybody up they didn't have an earpiece in you know i was in person with this woman when she did this chart reading yesterday i was on the phone with a person who read my chart but anyway my point is i tell you if i don't know you know you ask me a question i don't know my answer's gonna be i don't fucking know i'm not gonna make something up just to pretend like i know well when i know i'm gonna tell you i know and this is the case and it's true i'm not gonna and what if it's my opinion and it's not something that has objective knowledge about it i'll tell you this is my opinion so the answer is emailer who emailed these questions discernment is required and don't look to external gurus certainly don't look to the new age movement a lot of them are bullshitters and tell people what they want to hear have you ever heard anybody in the new age movement say to their own viewership things that i've said in this broadcast at the risk of alienating everybody that will listen to them why they care about how many people are listening to them how many supporters they have how much money they make and how much they're liked i don't care about any of those things i don't care if you hate me i'm still gonna tell the truth no matter how ugly and harsh it is even to you i'm gonna say what's true even if that keeps has me here talking to myself i'm still gonna say what's true instead of what's popular do you get it i'm not blowing multi-colored rainbow smoke up your asshole just because i want you to like me and send me money i don't give a fuck whether you like me or hate me i'm gonna say what's true and what advances human freedom and destroys tyranny and slavery next question so again be very wary of people who talk in soft tones and say oh i want you to like me you know so i'm gonna i'm never gonna offend anybody there's a meme going around i'm gonna bring it on next week's show it says people are so obsessed with speaking positively that they have lost all care about speaking what's true they don't care at all about speaking what's true all they cares about making it sound positive it could be total bullshit flowery bullshit but i'm gonna say it all positive and nice even if it's not that doesn't really do any good or use or help to the world because it sounds nice and people like me for saying it but i won't tell them anything that's controversial or that offends them even if it is true and they need to know it and they need to hear it the fuck out of here with people like that throw them in the dross dump okay there's the new tagline in the drost dump you go next question i'm taking a lot of email questions on the show today what is the truth when it comes to property and ownership versus legal copyright law once again i've talked about this on the show in a numeral innumerable amount of times property is legitimate it is the rightful ownership of something you didn't steal it from someone else you have uh you are in possession of it you are the rightful user of it you are using it and you are responsible for it that's why this laptop is mine i rightfully possess it my information is in it i control what information is in it and i am responsible for its upkeep and maintenance same thing with anything that is my property especially the body now when it comes to putting things out publicly okay i think that copyright law is nonsense when you're making something public if you don't want people to share it don't make it public if you put it out publicly then it's there for other people to give to who they want as far as i'm concerned i don't believe in uh intellectual property that being said i also think it's very asshole-ish if someone makes money on something that someone else created with no effort or additional value of their own now that being said if you take software that somebody else created and put online and it's free sort open source software and you add value to it and put it back out and you want money for it i think you should be allowed to sell it and i think you are i you are allowed to sell that that is a right okay this is what the free software community does you know um there's this guy who's the big advocate of uh free software um richard stallman thank you richard stallman but the guy doesn't understand the ownership of the body he he's still somebody who believes in government how could you advocate it's like vegans who think animals should be free but we should have government you understand animal body rights but you don't understand human body rights i'd love to bring stallman on and ask him why he's not an anarchist you know i mean this guy should know better i love his attitude about free software it's great i don't all use all free software i use it when i can quite frankly i think a lot of free software sucks balls how about that right on the air i think a lot of free software development is belongs ladies and gentlemen say it all together with me in the dross dump okay that's where most free software belongs there's some great free software out there but you know a lot of the developers give a lot of the other developers a bad name okay just because something is free doesn't mean it's good that's why i use a lot of proprietary software because it's actually good whereas the free software sucks balls and belongs in the drost dump so stallman my man i am all with you i'm for the development of free open source software i love it i love the free software movement i would consider myself an advocate of it even a champion of it however the developers out there you need to stop talking your game and act your game most of you suck quite frankly you blow you blow hardcore at what you do you suck at it okay that's the sad fact of the matter guys sad fucking fact of the matter get as offended as you like it's still a true statement and everybody out there in the free software community this will go and travel to you're all nodding your head going yeah yeah i know we know we know yeah because you do know you just want to talk your shit game but when it comes to actually delivering that's why all the big tech companies got you beat because they pay people that's the impetus that is the actual motivational factor is getting that paycheck because that's all anybody gives off fuck about in this world not doing something right not doing it competently not doing it with drive and desire no you want to be paid that's it so most of the people who don't want payment for that largely suck at what you do you don't have enough help in what you do the big fucking teams and big boys who are paying them get it fucking done and that's why people buy their shit and that's why most people ain't using your shit because it's shit i want the free software community to do better i don't talk about it enough or much the other thing is all you guys gotta learn fucking what real anarchy and natural law is you're all half of your fucking left brain fucking eggheaded fucking left brain fucking atheists who don't give a fuck about morality and you want to talk about how software should be free but somehow human beings should be fucking enslaved you guys got your head up your fucking assholes almost all of you not a blanket statement not every one of you but i'd say 99 of you got your heads up your ass you don't know anything about how the world really works you think you do you're still little fucking children voters that don't know how this fucking world works shitheads eggheads you know i'm not telling you nice anymore go back to podcast number one and listen from number one fuck face all right i'm done i'm done you know like i said my health is because of the stress and anger is not in not going to be in good shape i may have to start doing the show every other week because quite frankly it's just been an anger fest i don't even want that i need to do something to take myself down a couple notches but the the the pure stupidity and ignorance is so overwhelming to me i can barely take it anymore i can't take it anymore and folks i'm telling you right now i ain't going down quietly i'm going out like a man and i will not go quietly into the night and try to send somebody for me that's all i have to say try it make me a martyr motherfucker make me a martyr and take me out of this fucking hell hole that way and watch what happens then go for it go for it go for fucking broke because you won't shut me up i'll be back and there'll be more with me and you'll be martyring me so go for it i welcome it so free and open software community you largely suck at what you do although you have a good idea you have a horrible implementation and you're lazy developers and most of you are bad developers quite frankly there's a few that aren't dross there's a few who have their act together and you guys are heavyweights and you're fucking you walk the fucking talk and you know how much of a percentage it is it's a little fucking sliver sitting on top of the rest of the people who are in the draw stump okay most of you got to get your act together just like this community does and the other thing is get your head out of your left brain prison and understand the government is slavery yeah vegans who understand animal rights don't understand human rights free software champions that understand animal that understands software rights and don't understand human rights you guys are a fucking joke a fucking joke how do we the new media the emerging natural law teachers create a cohesive network to support and network together to help new initiates stay on the correct path in a dangerous time well this is what the one great network yeah is this the idea behind the one great network good question is there something someone like myself can help spearhead or facilitate i mean i'll do you one better if you put out really great work i'll invite you onto the network you know and i may you know i i think i've seen some of this person's work not going to say his name right now i think i may have seen some of this person's work and you know maybe we could have you write some articles on the network or something you know look again i want to tell people what the one great network is it is my network to try to highlight the people who are doing the one great work in this world who i think are doing a good job i am sending them a personal invite this is a by invitation only network okay the public will not be posting folks okay do you understand we will not be having a public forum or a public debate or public posting their draws i am opening the network by invitation only to people in the world who i feel are doing the one great work well to highlight and expand their work to my audience that's it that's what the one great work network is we are going to start out with probably at least about 10 hosts who are going to be people like myself who do this type of work and tell the truth in a public way and have put their work out publicly i've already mentioned some of the people who are going to be on the one great work network you know max egan jay parker derek bros um lennon honor we have to make sure these people are still all in okay because i put i floated this idea out to them about two two or three years ago and the network couldn't manifest because i didn't have the help i needed until i raged enough about it and got some fucking help you know i had to practically lose my shit on the air several times begging people for some fucking help for our own freedom this is why the satanists are laughing at us folks they're laughing because they know that's the kind of monumental herculean effort it even took to get some fucking people to help and it shouldn't be like that we should have mountains of people willing to fucking try to combat tyranny and enslavement but we don't so the answer to this person who is emailing is when i see someone doing the great work well i'm going to get in touch with them i'm going to come and find them they won't even have to come to me i will come to them and invite them on to the network by invitation by my personal invitation only is the only way anyone gets on the one great work network let me say that again so everyone clearly understands you don't need to submit anything to me if you are doing the great work well i will find you i will come and invite you onto the network when your work has impressed me that's the answer and this is what i think people can go and make their own networks like this if they want you know not only do the great work yourself come out with your own networks you know to a certain extent this is kind of what autonomy is like except they do it with mentoring teaching technology and life skills and business skills and let me tell you something folks they conduct themselves professionally and they know their stuff so you know what this is going to do is help these people who are doing this work get more resources become more known get more resources i want i'm going to invite benny wills onto the network you know there's many other people i haven't even talked about the whole list and again these are just potentials people have to still be on board and say yes i'm going to contribute content when the network is up and running but we're developing it on the back end and it's going really well yeah i mean that you know that's the whole point is uh just what should you be doing to get your work highlighted is the question you know in other words put the great work out there and if it's good i'm gonna notice it and come and other people are gonna notice it send me your way a lot of people send me recommendations every week and go like this person's doing good stuff okay so we're gonna have original article writers we're gonna have people that do audio podcasts we're gonna p p people that do documentaries we're gonna have people that do comedy we're gonna have people that do artwork who do weekly video uh podcasts you know we're going to open up our streaming to them okay we're going to have a one great work 24-hour streaming channel that we're going to try to have content running all the time on folks when you see it in operation when we get all of our technological act together and get this out there right you're gonna be very impressed okay so you know it's uh it's all about putting that info out there and your work will get noticed let's go to another one i've watched your videos about order followers and the occult can you specify about the dark occultists to control the military behind the scenes and the politicians and how they work i talked about this last week on the show and the week before that how many terrorists do they actually kill when they go to war these people do die war people really die in war folks it's not a theater or stage they want death they want destabilization of countries they want poverty which is what all what war creates okay so they're playing both sides in most cases in war these people control the politicians they control the banks that often fund both sides and they control the media that fuels the flames of war okay that's what this establishment the secret societies these think tanks whatever you want to call them they own all the different infrastructures that drive war namely the military namely the media the politicians these people are the puppets of the occultists who are really calling the shots and they work through the intelligence agencies and they work through the think tanks and advisory councils like the council on foreign relations the council for national policy the bilderberg group the trilateral commission the royal institute for international affairs chatham house wellington house cetera and so forth you know the roads roundtable groups et cetera you can go on and on things that the media will never talk about and keep out of public light and that the average fucking imbecile thinks this is just conspiracy theory so this is all debunked all these people have no power you don't know what the fuck you're talking about little boy you don't know how the fucking world works son at all at all you're a child in a fantasy think dreaming thinking that the world works the way you want it to work just because you're uncomfortable with it working the way it really does you're a little fucking child and you're stuck in the dreaming stage that's why dreaming is the second part of initiation stop lying to yourself and stop dreaming you're lying to yourself about what you know and about how the world works and you're dreaming you want the world to be some fucking magical way that it is not and you want to tell yourself to lie that it is that way you're a little fucking dreaming child of course i'm not talking to the email or i'm talking about people who think like that okay but the emailer the answer is go back to my show last week i talked about when i was actually in the room in the ritual chamber in the ritual house the ritual chamber was their basement okay when i was there with these satanists talking about how they own and control the police and the military calling them their pets their dogs their animals they give them dog tags to wear laughing at them all right let me find another one here in one of the wikileaks emails it was revealed that hillary clinton and her elk worship minerva which is a greek goddess here's the email sent me a link who else do they worship besides minerva and hell i don't really think these people worship so much as they embody negative entities and spirits um there are researchers who would disagree in the level of satanism i was involved in these people did not quote worship anything this is a big misnomer i think they commune with entities and they revere entities in certain ways but moreover they embody them they actually take on their energy and spirit that's not worship that's like saying i know that this dark force exists and i'm going to try to use it to my benefit and advantage that is really how they operate and as far as the level of satanism i saw is concerned okay so i never heard these per these people say we worship this you know and say we worship lucifer we worship satan most of them don't even consider these things entities physical or non-corporeal or anything like that they consider them archetypal and again you know i recommend listening to some of the uh you know interviews that my former friend jerry talks about even from a christian perspective he says that most satanists do not worship he corroborates what i say about it at his level of involvement he said that they more take it on as an energy and embody it and it's an archetype he actually uses that term and i agree fully i fully agree so that's my take on that there are many who would say that they embody the babylonian spirit of moloch uh molech actually is the name of the god the moloch was the ritual conducted for molech and then um again i talk about the god bill bale bell doesn't matter the vow in the middle of it satan is often depicted as a bull you know with bulls horns okay and hooves sometimes as a goat again these are archetypal images that represent forms of consciousness this is a hard swallow for some people because they've been taught such in the christian tradition that these are actual entities it's like a babyfied way of seeing it they don't see it like that folks i'm trying to explain to people i was with these people they don't see it like that they know that it's archetypal energy and they're using it to their advantage that being said there's an old hebrew concept hashatan the satan you know people don't understand there was a definite article in front of the word satan in hebrew it wasn't just satan it's hashitan okay it means the satan it's the force that is the adversarial force in nature that counteracts natural law it's involution not evolution it's the involutionary or entropic force it is not the ordering force it's the disintegrating or chaotic force that is what these people worship they know that they can manage that they can never control and manage the true ordering force of of syntropy which is the true evolutionary force in creation no one can control and manage that that's the force of the creator of the universe the involutionary force is the the grindstone you know the whetstone that sharpens the blade that just keeps grinding away in the reverse direction that's entropy that's chaos there's that's easy to manage i just do fucking nothing or just get in somebody's ear and turn them into a fucking idiot so that they they can't order anything they can't bring order to anything that's why we're incompetent in this movement this is what has happened to us we can't create any order we don't know how people are not mentored in this movement they're incompetent and that makes them impotent incompetence leads to impotence there's the lesson for today incompetence invariably creates impotence meaning if you are not competent in your ability you have no power get competency that's what gives you actual autonomy as an individual and that's what gives you power in the world an influence in the world most people are dumb bags of fucking shit that don't want to learn or don't think they have to learn this technology you do this is the publishing media for the modern world get the fuck over it and get on it it's too late to be in denial of this now we need to be actively moving on this so the answer is folks they don't really worship anything they see these forces as archetypal forces and they embody them and then they act on them okay and understand that satan isn't even something they see as an entity in most cases hashatan in hebrew is the old hebrew word for the adversary the opposer what do you think they're talking about then it's an entity that actually wars against god as an entity like two puppets in the sky i mean give me a fucking break that's a child's view of the fucking world it's the force that creates chaos and disorder in our society they embody that because they know if they can keep people in that fucking dumb mindset they can control them and keep creating chaos and dependency so nobody has actual independence or autonomy no they're not they don't have autonomy but they become somebody else's automatons robots what are your thoughts on marching and standing at attention like in the military someone who's an empath told me that they can sense the magic in these things and said that they block energy she said they were designed by the freemasons and some occultists to sum up energy is this true absolutely i'm not going to say it's just freemasons okay but military and police marching in formation is absolutely about entrainment look up the concept of in occultism of entrainment it's entrancement okay it's putting people under a spell of energy lockstepping them conforming we act as one we walk as one we march as one we we yell out as one these are all the techniques of cults again i talked about this on a recent show folks i've answered all these questions a number of times again this is review and a lot of people i can tell you've never listened to my podcast i don't mean this one episode this is episode 233 have you listened to all 233 episodes the answer is no or you won't even have this question because i've answered it this is what i'm saying folks i've covered it you haven't done your homework folks what it took me 20 fucking years of my life longer than that to learn what i know solid 20 years i've condensed it down into a couple hundred hours you don't think that you could do your due diligence and have a little modicum of respect for the 20 years of hell i went through to bring this information to you in a condensed form then i have people go where are you cooked commercials well you cut i cut the commercials out why don't you cut the oh talking about the events because that's the great work jackass that's the great work jackass that's your first name and last name jack s mr s first name jack that's the great work what people are doing in the world i want to highlight that over and over and over and i'm going to if you don't want to fucking weed through that to get to the material so fucking what tough fucking balls son no more baby feeding it to you or even being nice to you then shut it the fuck off and it's your fucking funeral asshole that's your answer if you don't want to weed through my commercials about i even dig the nicety of taking out the fucking networks commercials if you don't want to read through my fucking commercials about events that i hosted or other people helping me do the great work hosted tough fucking balls son little girl i mean this is the level of fucking baby-fied shit i hear on a daily basis that your owners are fucking laughing at you they are laughing hilariously in your fucking face all up in your face laughing at you because they know what a fucking child you are and that you're never gonna beat them with that mindset you you'll never beat these people you'll never beat them i'm just telling you that you have zero chance against these people and you underestimate their fucking power you underestimate their power over the mind you underestimate their knowledge their drive and their willpower and your little fucking children who they are pissing their pants laughing at because they know how fucking babified you are that you are so so non-tough non-resilient i need to fucking commercials to be taken out of the podcast though do you know what you sound like you see i mean and then people want to go you're you're complaining about this and that yeah i am i'm complaining about the actual one great work not being done that has validity i've done this work and put it out there for free and you still got jackasses complaining it's not good enough fuck you do your own work asshole how much do i have to insult people for you to stop fucking writing to me i don't care about what you think of my work i'm not interested in you emailing me telling me to do it different fuck you do you get it look here's what i do and i'm serious i don't really i i'm gonna keep saying it on the air as long as people keep refusing here's what's gonna happen as soon as i see it i got a block list i copy the email boom in the block list save done you can never reach me on any emails i have ever again you're blacklisted that's simple and i do it and that person was blacklisted you're done okay you get one chance to act like an adult with me now and then you're blacklisted and no communication your email will never see me it will be deleted on the server end you will send it you'll write your big long fucking blathering shit spew and then you'll send that email and you will have wasted your fucking time numbnuts wasted your fucking time and that's guess what that's what belongs happening to you waste your fucking time not mine could you clarify primary psychopathy as it relates to being born in a blank state i know you've mentioned that humans are essentially born in a blank state and they're programmed to become one way or another morally however could primary psychopaths or sociopaths be born that way such that they are actually born from evil or a negative dimension or something like that i've seen sociopaths that this defy the very meaning of being a moral human such as the psychopaths you just mentioned like the podestas etc it is hard to wrap your mind around it when you never thought that kind of evil could exist within the human makeup well it very most certainly does but i have a little bit of a different take that it just comes from some evil dimension no folks psychopathy even what we call primary psychopathy is brain damage and there are two things that largely cause it in primary psychopaths so here's the thing when we were discussing primary psychopathy i said that there's a few things that cause it and there are what do people think they think things like this they think oh they're just evil satan got them they're incarnate souls from an evil dimension no it doesn't work like that okay there's a scientific answer in the very real world some people go just god made them like that to test other people right no god's not a sadist god doesn't do that he doesn't just fucking play games with us our emotions our lives god gives us free will the creator of the universe gifted us with the greatest gift create whatever you want i won't get involved that's called free will ladies and gentlemen we all have it okay and you know we're building with that free will a prison for ourselves we could have built anything we could have built the wonderful paradisical realm where people treat each other well everybody's needs are met and we have a great learning experience to grow and move on to other places but you know we built a prison with all that freedom and all that free will we said you know what we're going to do we're going to become afraid of our own fucking shadow go inside our own bullshit and then build a prison as a result that's the folly of the imbeciles called the human species we're gonna let the least of us run the whole fucking place as tyrants playing god and we're gonna build a shit show prison and that's what the world has become you should be very proud of yourself assholes that's what you built so folks it's not they're not coming in from an evil dimension god isn't doing it to torture us these are bullshit ideas okay let me tell you how primary psychopathy happens it happens in two basic ways it happens as a result of some type of fucked up expression in the human genome which was put there by something other than human beings that's one way it happens and i've talked about that as interference theory in the human evolutionary progression go back in the podcast and listen to all that work okay and the other way it happens is birth brain trauma trauma to the midbrain at birth the midbrain or limbic system or mammalian brain makes possible the full range of human emotions because the glands in the midbrain like the thymus the hypo the thalamus the hypothalamus the pituitary gland the pineal gland etc and other glands in the midbrain generate the neuropeptides which are chemicals within the brain that connect into receptor sites in the brain that enable us and make it possible for us to physically feel the repercussions of our behavior that we perform unto others in the world in our physiology and anatomy that is why we actually feel in the body when we have an emotional response when something happens to someone else and when we do things to other people this is called the normal emotional response in a normal human being when it's not damaged or broken when there is brain damage physical brain damage to the midbrain those functions of the midbrain the mammalian brain or limbic system the mammal complex of the brain do not function at all or the function is limited or broken in some fashion therefore these people don't experience a true range or a full range of human emotions and this is called psychopathy secondary psychopathy results when through trauma during life post birth a person whether as a child or as an adult goes through trauma that the the chemical reactions in the brain from the trauma eventually damage that part of the brain the mammalian brain or the l uh the the limbic brain the limbic complex of the brain so that's called a secondary psychopath because it happens due to experiences and traumas post birth in life the primary psychopath had that done to their brain at birth as a result of birth trauma possibly a very narrow birth canal and the head was compressed and that part of the brain was damaged or it is a genetic condition turned on by something environmental in the human genome possibly at birth that was created in the genome because of the inaccurate genetic manipulation done at the chemical level instead of at the atomic level by beings that interfered in the natural progression of human development on earth and once again that is my cosmic abandonment series of work go back and view it and listen to it not just the video all the podcasts on the topic plus there's so much on that on the ark you barely get through it in a human human lifetime but most people won't do that work they want they want the sound bite they want the sound bite give it to me in 30 seconds mark it doesn't work that way learning about how this world works doesn't work in a 30 second sound bite you got to do hard work and sacrifice a part of your life that you would rather spend doing other things to learn and there's no shortcut never any shortcuts please folks try to be more brief and get right to the question okay it's my understanding that the work is more powerful when combined efforts of multiple people just what i said that's how they work through a mastermind okay i would like to ask if you have sought interviewer audience with some of the other juggernauts he mentions david ike jordan maxwell joseph p farrell catherine austin fitz james corbett i have not interviewed david ike i briefly uh kind of uh was in his presence at anarchopoco uh when i went down there a couple years ago i decided not to disturb david because he looked like he was at the very end of his day and i know how i feel when i'm like that and having a million people come up to me so i decided to respect his privacy and not bother him but i was only in in the room with david ike i've never actually spoken with him in person privately um jordan maxwell uh i have had on my show i plan on having him on again soon uh joseph p farrell i've spoken with him and i kind of think he's sort of an asshole be to be quite frank i think he's a little full of himself and full of ego because he's an author i invited him to come to free your mind too and his his response to me is why would i want to take part in that conference and like no respect for my work like just very arrogant like that and i'll just say it publicly i i said something about uh what's 411 guy's name david whatever david not important um you know so you know i love joseph p farrell's work but i'll probably not work with him because of how he how arrogantly he came off to me with all the fucking work i've done you know that doesn't inspire mutual respect for me so you got a lot of people still an ego i mean could you imagine if david ike said mark i want to come on your show and i go why would i want to bring you on my show david yeah could you imagine you know i don't even care what michael tessarion thinks about me personally i understand he doesn't like me very much so what you don't have to like me i can respect you as a person doing the work if he asked me to come on my show of course i would allow him to for the work he's done you know no you don't need to like me you know i've been on a show with james corbett um i'm trying to think who had that shot i think it was date was it david knight vin eastwood vinnie eastwood had me on with james corbett uh and then uh catherine austin fitz now i've never spoken with her personally but i think our work is great the list is long and exhausted but there are many genuine teachers out there the dark occultists succeed because at the end of the day they have that one drive and purpose while it sometimes feels like we all die in our own foxholes beautifully said we all die in our own foxholes while they're all on the same page absolutely couldn't have said it any better great way of wording it are you open to building bridges with other researchers well absolutely that's what the whole gr one great work network is about you know so if somebody like you know david ike said i want to have content on the one great network on the one great work network of course i would include him jordan maxwell of course i would include him you know any great researchers you know there has to be some basic mutual respect you know and understand why we're doing this you know but once that's out of the way i would love to have many people like that on the network you know so i don't my ego is out of the way in this folks you gotta understand as long as it advances the war effort i don't care if i'm in that foxhole with even people i don't like personally as long as we're going to advance the cause together you know you think all these satanists like each other folks this is what again i'm going to po i am actually going to post the links of my former friend who's talking about this from a christian perspective but he talks about it a lot of these satanists don't like themselves but guess what they can work together you know he knows how it works to a large extent there are some things i wouldn't agree with but to a large extent he is saying pretty much the things i'm saying you know so i'll highlight his work and i'll link from this podcast and you could check it out for yourself um so that's my take on that of course you know so i think that was a good question and an actual good way to put it so i've taken all emails this week next week all calls no emails how about that we'll do it like that i agree with eating solely plant-based for moral reasons however i'm concerned about the burning of the earth's blood meaning oil to bring plant-based foods and fruits to where i live well you know what you know until we get people understanding morality i wouldn't expect anti-gravity propulsion anytime soon uh emailer okay the question coming in from email look we can't do that much about cars right now you know you're gonna walk everything everywhere it needs to be taken i mean let's be somewhat pragmatic and realistic okay unless you're gonna go and invent the flying car and not get killed which if you did successfully you'd get killed and they'd take it from you they're not going to let anything like that out it's not going to be allowed as long as these people are in control tesla type technology free energy technology do not expect it to ever come out to the public as long as government exists as long as let me say this again and i want to say this to everybody in the tesla science foundation all of you better listen okay you can ignore it ignore it at your own peril it's true nonetheless everybody in all the tesla movements throughout the world especially the tesla science foundation you will never succeed tesla's vision will never happen i wanna i want everybody to really deeply hone in focusing on what i'm about to say tesla's vision and tesla's technology will never happen on this planet for as long as government exists it can not manifest it is an impossibility a according to the laws of creation the laws of god forbid the manifestation of tesla technology and free energy technology while government exists cannot occur that doesn't mean that it doesn't exist it means that the public or slaves can never actually have it at their disposal while government exists eternal law of god and that is true not because i said it i understand that from an extremely high level occult position of knowledge that comes down from the highest levels of cabala tarot freemasonry rosicrucianism and every ancient commission philosophy ancient alchemy and every other occult tradition from the dawn of time and all of the initiates who taught those traditions of morality from the dawn of human time and it is eternally true according to the laws of the creator that no free energy technology will ever be manifested and had by the people the slaves of planet earth for as long as government exists on this planet 99.99 of you do not understand that eternal truth and law and that is why you fail get as offended as you like i don't care whether you like me or not as a result it's still eternally true in creation and a lot of you guys have a lot to learn about how it really works and honestly again i'm done saying it nicely i'm cutting everybody off everybody's getting cut off unless they understand the principles of morality that all the occult traditions have been teaching throughout time rosicrucianism tarot kabbalah freemasonry and on and on the egyptian tradition the egyptian mystery schools the greek mystery schools falling on deaf ears people saying they're members of these groups in name only but not understanding the esoteric underlying moral truth government is slavery it always has been and it always will be tesla's vision is dead i said it tesla's vision is dead and will never come to life until government is ended until human slavery on planet earth is ended don't hope for it don't hold your breath for it you will not succeed in making it happen until government has ended first everybody who thinks it can happen any other way you're as childish as the little people in the vegan movement who don't understand human rights and freedom and the ending of government you're as childish as the little boys and girls in the um uh what was the other movement i was talking about earlier about this uh the free software movement that they think oh we're gonna have free software it's gonna be everywhere and you don't understand human slavery the free energy movement is just as childish and i'm not gonna i'm not helping anymore i'm not helping it anymore i don't care i don't care who it is from where they're at until they understand the end of government and the end of human slavery i will not put my effort into the free energy movement anymore as far as i'm concerned i'm done with that all of my eggs are in one basket of ending the human slavery called government the end i will not take part in any of those efforts that's it so you know i'm not doing any ancillary work i'm focused here intently on my work and getting the truth of the message of natural law and the laws of creation and the ending of the state the ending of government slavery out to the public and i'm not going to be taken off that mission for any ancillary purposes especially from movements that the bulk of their movement does not understand the truth and it's trying to put the cart before the horse and it will never work that way till the end of time and i don't care if anybody like doesn't like me as a result then don't like me so this person continues and said i'm concerned with the burning of the earth's blood to bring plant-based foods and fruit to where i live well you know what you better start teaching morality individual writing this email because the longer you wait on teaching the great work the longer people are going to stay on fossil based alleged fossil fuels and taking the earth's blood which is what that is and as they say i live in a climate where foods where such foods is not a climate where such foods grow plentifully and again then people say in such case does it not stand the reason that evil is still being done by burning earth's blood to keep me alive uh yes that is part of natural law and people who say oh what about all the people who live in the non-temperate zones and they can't grow food and i retort with why do you imagine erroneously that human beings belong in all the non-temperate zones on earth first of all why do you think that the way that the earth is is the way it always has been what you think we've always had seasons you've never even thought about it a cataclysm threw the earth at a 23.5 degree angle in the ancient past and created what we call the seasons and the season of life and season of death the planting season and the hoarding season call it whatever you want it's the survival mechanism of earth or the the thing that threw people in the survival mechanism threw them into the r complex as a species threw them into that survival mode that scarcity based mindset we were once a planet whose rotation whose axial rotation was at a zero degree angle with respect to its orbit around our star yeah that's a mouthful but just go research it we were once a planet that had an axial rotation angle of zero degrees with respect to the plane of orbit of around our star which means we had eternal spring you could plant and and harvest at any place on the earth other than the extreme poles we're running out of time few minutes left it was it wasn't always like this when the cataclysm happened a lot of people wanted to try to adapt and stay in the places where they once were and managed to survive which then became extreme harsh climates what makes you think human beings belong in the arctic circles what makes you think human beings even belong anywhere above 30 degrees above or below the equatorial regions they don't is the answer but nobody wants to hear that they want to hear i'm still fine i'm still a moral person because i eat me because i'm you know way up in the in the non-tempered zones well maybe human beings don't belong in those zones while we're in this angle with respect to our star maybe we should be from from 30 north to 30 south where you could essentially grow food and that's it i mean i don't know why that's so hard to understand no and i'm not advocating for eugenics for the other assholes that will think that no i'm just saying once a cataclysm like that happened it should have pushed people toward the temperate zones but it really didn't they stayed where they were and decided they're going to eat animals the survival mechanism drove them to a meat-eating way of life see this is the thing nobody looks at the underlying reasons you know you just want to hear what you want to hear right i'm not talking even about the email i'm talking about the general public you just want to talk about the things that you currently understand but you don't want to go back in ancient history and look at what may have been the way things were then and they're different now and again we started the show a few seconds later so there might be a little bit longer before the card drops down i'm going to keep going real quick so in such a case okay so you know this is what this is a big vegan anti-vegan argument oh food doesn't fruits and vegetables don't grow with these out at these uh latitudes on the earth why should these people be vegan nobody on earth needs meat that doesn't mean you should do it again quickly again most of the reason people fail at transitioning to a vegan diet is they don't transition to a vegan diet they're dumb hard-headed dunces who want to do it all in one shot cold turkey well guess what you're going to do harm to your body and that's why people go oh veganism hurt me and i asked how long did you transition for did you transition for about at least a year maybe two years no i stopped eating meat all in one day well you're a fucking idiot that's the answer here's my guest next week folks we're gonna go to my guest from for next week he is an expert on transitioning to a vegan diet by going cold turkey listen you don't need to go cold you don't need to transition over a year or two to a vegan diet you just stop fucking eating meat all in one shot one second you go on every meet again right now and oh my god i got sick i'm from puking my fucking balls up now i'm so fucking sick i just went vegan on one second i decided to go vegan and it doesn't work that's why all the vegans can you know that's why they're all sick you know because they just suddenly went went vegan like me because i'm a fucking idiot yeah that's my guess next week folks he really knows what he's talking about can't you tell that's all the time we have for this episode of what on earth is happening how about trying to get out there and do the actual great work so this world is in such a fucking hell hole huh we'll see you next [Music] [Applause] [Music] week don't never have to worry don't you ever don't ever [Applause] [Music] you

What On Earth Is Happening Show #234

Topics: *Technology Fascism & Questions & Clarifications Part 4, Technical know-how free yourself from online censorship, "MY Freedom Movement" folks don't care if it doesn't affect them which is why the world is falling deeper into bondage and slavery, Apple privacy and property infringement and obstruction of the free-flow of information, Luddites, Fools who follow Anarcho-hyphenated ideologies don't get it, Apple's 2007 introduction of iOS policy by which applications can only be downloaded through the Apple App Store constitutes a software monopoly and racketeering policy, Stop telling others what operating system to use because it's NOT YOUR choice to make but THEIRS, Criminality of Apple forcing people to use THEIR OWN PROPERTY as Apple deems acceptable, Big Tech engaged in deliberate censorship of information which contradicts that mainstream media narrative, Benefits of Downie software by Charlie Monroe, Apple's criminal censoring of Downie 4, Apple is NOT doing this for "safety" but to censor the ability of people to download from YouTube and re-distribute information, Mark reads from Downie developer Charlie Monroe's blog regarding what Apple did, Demo of Downie 4, "Freedom" movement can't get its act together to fund BitChute streaming which is NEEDED to get away from YouTube's censorship, LBRY demo, How to ad-hoc codesign a macOS application, Circumvention of internet censorship, Unblockit.win, Search engines do not index 95% of internet content which is why that content is called the Dark Web, Concen.org BitTorrent tracker, BitTorrent files and Magnet links, BitTorrent demo with Transmission BitTorrent software, Subscribing to the upcoming WOEIH Newsletter, Libgen.is for finding important books online, Libgen.is demo.*

freedom man that's what it's all about you've got to groove on freedom like the good book says welcome you are listening to what on earth is happening this show will discuss the topics of human consciousness mind control natural law the occult and all issues that affect the freedom of the people of earth what on earth is happening will endeavor to shine light upon the darkness of our world and to offer empowering solutions to the problems we face as humanity approaches its critical moment of choice and now here is your host mark pascio welcome one and all you're watching what on earth is happening i'm your host mark pacio my website what on earth is happening dot com ladies and gentlemen government is slavery and here on what on earth is happening we are ending slavery one mind at a time welcome and thank you for joining us everyone today is sunday august 9th 2020 this is episode number 234 of what on earth is happening as always i remind everyone what on earth is happening is a series of podcasts and it is cumulative knowledge meaning that episodes covered in later episodes information covered in later episodes have pre-requisite knowledge and information that must be understood from earlier episodes this means do not watch or listen to the episodes out of order if you are a new viewer or listener to the podcast you should go back on my website what on earth is happening dot com and go to the podcast section and click the podcast link that says listen in order from show number one and you should listen from show number one without skipping around in order at your own pace and then an entirely new world view will open up to you if you go through all of those podcasts and all the information in them in order so please if you're new this is not where you want to start okay you will not be able to hear often what i am saying i get people emailing me almost every week saying mark i tried to listen to your newer episodes and i could not hear what you were saying i could hear the words but i could not understand you i could not hear you and i could not deal with your energy and that is because they did not go through the podcast in order so that's the importance of listening in order from show number one okay i'm gonna say that every single week okay so let's jump over to my slide presentation we have a great show lined up for you here today we have a new character we're introducing today this is tim dolph cookler of apple of crapple okay and we're going to talk about his technology fascism that was actually started in the days of steve jobs going to talk about what apple has been doing with technology these days it's utterly deplorable but i i think it's very important for people to understand and i'm going to spend the whole first part of the show on this then we're going to go to your questions any questions our fair game we're going to take your questions on discord and email this is questions and clarifications in the second part of the show part 4 of that ongoing series of questions and clarifications on anything that i have covered here on what on earth is happening thus far a couple of housekeeping duties before we get started you could donate to help complete my first ever documentary film called mark pacio and the science of natural law we will hopefully be releasing this by the end of the year there are five donation tiers at my gifts area of my website 100 percent of all donations go directly to production costs all donors will receive one free cop complimentary copy of the completed documentary on both flash drive and dvd you can make this donation if you choose at gifts dot what on earth is happening dot com please anyone who wants to make a donation for the documentary do not use the donation page use gifts.waternearthishappening.com and go to the documentary section of gifts also a gifts new t-shirts new flash drives and dvds and of course the complete marc pacio one great work collection with all of my publicly available works in one solid state drive we're continuing our partnership with autonomy i want to just briefly again show people uh autonomy is the brainchild of richard grove of tragedyanhope.com richard is known for many things including his great website and podcast series uh but he now runs autonomy which is a a teaching class sort of like a mentoring um course that you can take to learn technological and life skills and business skills and you can visit their website at getautonomy.info people will recognize richard grove as the individual who recorded and edited my natural law seminar series uh he got that out there to the public so uh richard is definitely a trustworthy individual and i'm glad to be partnering with autonomy for some technological help i want to step out of the slide show briefly and go to my web browser and just show you briefly where you can view the um the click through banners i just recently became an official affiliate of autonomy there's a banner at the top of the home page you can click that to uh get the information about autonomy's courses that they offer and then down here on the left hand side there's a side banner where you can get their book called 19 essential skills for success and i'll read about what autonomy has to offer through that uh pdf document so that is our partnership with autonomy and it's going very well all right let's step back out of there back to the slideshow all right we can jump back into the slides how to become the true media uh this is an old slide it should say class number six is going to be uh this tuesday um august uh what will be 11th so let me just correct that uh we were teaching um hard drive formatting copying data um partitioning uh basic uh things like that for for storage both internal and external uh i got into um uh installation of software on different operating systems this past week we're gonna wrap that up uh talk also a little bit about file mapping we were talking about that a lot this week file extensions we'll go a little bit more into that and then i'm going to start teaching basics of internet uh basics of web browsing uh basics of downloading things like that so we'll get into internet setup some basic networking things nothing advanced in that regard but we're going to get into basic uh internet web browsing you know how to configure your browser basic downloading so we're going you know at a nice pace at a slow pace for beginners and uh people who are a little bit intermediate i give them a little bit more advanced things to chew on during the course but i think it's serving the purpose for people of every skill set level the webinar each week starts at 7 pm thank you for being on time class instruction starts promptly at exactly 8 pm eastern time that gives people one hour to get into the class uh i just remind people please be on time or you'll miss important information that will not be repeated keep a notepad handy for notes and questions we got to take many questions last week hopefully we'll continue taking more questions this week i'll probably stay in after last week i wasn't able to but um this week i'll probably stay in after the class and take even more questions we recommend headphones for people that want to interact with the class so it doesn't feed back or echo and if you have any problems technological or otherwise you could email truemedia what on earth is happening.com and we will do our best to assist you for this show it's going to be a call in and email show for questions and clarifications in the second part call into the show via discord from anywhere in the world for free what on earth is happening dot com slash discord i do recommend the discord app as opposed to using your web browser or the although you could do either one but i recommend the app you can get that at discord dot com slash app email any questions or clarification requests regarding anything that i have covered on the entire what on earth is happening series thus far two questions at whatonearthishappening.com we have a ton of questions building up in there and folks i'm just going to take them in order you know so you may not hear your question answered for weeks on the show but you know i'll go to them you know occasionally and we're just going to go in order as they came in you know first come first serve type thing all right the email for that is questions at whatonearthishappening.com great questions have been coming in actually let's start with the the material that i want to cover here today and this is what i want to try to do folks and i have i'm going to make a resolve i'm going to attempt to do this as calmly as possible all right i want to help people to understand what has happened in the technological sphere in the software space since about 2007 when the first iphone was introduced by the former ceo of apple steve jobs who is now deceased but when he was alive in his you know some of his last days he uh introduced the iphone and ios which is the operating system that runs on apple's mobile platforms it used to run on the ipad now they have modified that and given it some additional capabilities it is now called on the ipad ipad os but it is still referred to as ios on the iphone and a lot of these features have crept into mac os now as people know i do use mac os for most of my work you're watching my slides on a keynote presentation we are actually using compositing software i have two mac laptops on my desk right here we use compositing software that runs on the mac known as memo live to do the show it is similar to obs open broadcasting system software on uh that is available on uh mac windows and linux that's cross platform and open source but we use something with a little more horsepower known as memo live and um you know what i want to try to help people to understand is what has happened recently in software on particularly apple's operating systems now people will go well why should i care about that and this is the problem with the whole community folks this is the problem with the whole so-called freedom movement ladies and gentlemen is most people don't give a damn about what happens to the freedom of other people oh if i don't use mac os who gives a damn whether there's tyranny taking place on it right oh if that's happening in another state well that affects those people who gives a damn about them that's not happening to me right here and now you live in another country and there's not an extreme lockdown happening and it's not affecting your lives like it is the people here in the united states are even worse the people of australia and england you know oh who gives a damn that doesn't affect me that's why we're going deeper into slavery ladies and gentlemen because the care principle is being incinerated in people's minds and hearts and people don't care about the freedom of all not just themselves see we don't again as i've said infinite amount of times here on water what on earth is happening we do not have a freedom movement we have a my freedom movement a self-centered selfish oriented freedom movement that says as long as i have my individual freedom i don't give a damn about the freedom of anybody else i don't care about what's happening in that state that country on that platform that i don't use you know and this is why the whole damn world is going deeper and deeper into bondage and slavery that's the very reason ladies and gentlemen because you don't care about the freedom of all so i want people to understand what's been going on in apple's space regarding software and their platforms that they have absolutely no right to do and this is what i want my listener and viewer base to deeply understand because most of you have your head up your ass and you don't understand it from a perspective of natural law and you think they have some sort of a right as a private company to do the things that they are doing and they do not you're wrong you're incorrect you have it completely backwards and wrong when it comes to their rights under natural law you're not correct about it you're wrong and i'm going to explain to you how you're wrong so let's start looking at this because this has everything to do people are like what does what does uh software have to do with human freedom everything folks if you don't understand this is about the free flow of information and how people are trying to choke it how they are trying to stifle the free flow of information and that is straight out of the soviet union handbook that is straight out of mussolini's handbook that is straight out of adolf hitler's handbook that is straight out of communist china's handbook if you don't understand that i don't know what to tell you you're totally spiritually dead and asleep you're not awake you're asleep and if you don't care you don't get it you don't get what's going on around you or even why it's important so i want to try to very clearly explain this to people so that they get what's happening why it's happening and why it's of utmost importance if you care about human freedom to speak to publish information to share information to receive information from others that's what this whole thing is about folks that's why they've been able to control the world to the extent that they've controlled it because they've choked the free flow of information and i'm going to explain you how they're doing it because most of you are technological retarded you're technologically retarded you know nothing about computers you know nothing about technology and you don't even understand the importance of it your luddites most of you are luddites i'm talking to my viewership get as offended as you like look up the term luddite vocabulary word of the day for some of the dross out there luddite l-u-d-i-t-e look it up understand what it means okay it means somebody who is afraid of technology doesn't want to move forward with technology folks anarcho-primitivism is a bunch of nonsense bullshit okay all of the hyphenated anarchies are all of them everyone there's no such thing as hyphenated anarchy okay and if you don't understand with the direction technology is headed deeper and deeper into fascism and communist methodologies you don't know what's going on and you're a luddite and you're you're not going to ultimately help the situation get any better if you stay a technological luddite this is why i offer the true media seminar it's why i get upset about things like this because people don't even know what's happening or why it's important and you need to understand it you need to understand it so look up luddite and it has two d's i'm being informed l-u-d-d-i-t-e okay i spelled it wrong there's the correction l-u-d-d-i-t-e luddite okay look it up in connection with dross because those who are luddites are by definition dross okay d-r-o-s-s there's your vocabulary words of the day okay so let's get into what apple has done in the software space since 2007 and why it's criminal criminal and if you don't understand it's criminal you're wrong if you think it's not criminal you're wrong you are wrong i don't care what argument you throw at it you don't have enough information you don't know yourself deeply enough about what's going on and you don't understand the moral principles that make it criminal and immoral behavior and you yourself are wrong as a result so let's clarify these things so that you can understand them and understand why it's criminal and wrong back in 2007 i was working as a technician in the school of medicine information services at the university of pennsylvania an ivy league university i was one of i was the head of several of their laboratory departments in the biomedical research facility the brb building on the campus of upenn university of pennsylvania i worked in the brb building this was called the biomedical research building so i worked in biomedical technical laboratories as their main troubleshooter for several different departments the departments i served included cardiology hematology oncology and others among others i was still working there when this keynote happened which i believe was at mac world 2007 i'm not positive it could have been at worldwide developers conference but i think it was at the mac world keynote uh you know i stand corrected if i'm not correct about that but this is when steve jobs first introduced the iphone and ios now let me try to explain what happened on this day what was announced in addition to announcing the iphone as a cell york computing platform for apple's cell phone known as the iphone which was touch based interface and you know had small you know applications that they released for it that worked with the touch interface apple introduced their own app store where you could buy apps for the iphone similar to the android app store which is now called the google play store this was simply called the apple app store now why was this so important or different apple publicly announced that day in 2007 that the only method for installing any application on the entire ios platform would be through the apple app store and that applications would not be allowed to be installed any other through any other method other than a download through their store so they announced publicly that there would be a private monopolization of applications on an entire computing platform this has never been done before right there i immediately went into alert panic mode practically and i said this is going to be horrifically abused when steve jobs announced this publicly and said there will be no method of side loading apps you will have to come to us we will essentially without saying it with these words this is what he said we will be the gatekeepers of software on the entire platform you will not be able to go to a third-party developer to buy any software that runs on this platform from a third party okay now people who immediately go oh ios belongs to apple they could do whatever they want because they're a private company no you're wrong that's untrue they can put whatever they want in their curated store which i'm going to explain later but they are not this is called criminal racketeering this is conspiracy to create a monopoly all of these things are criminal behavior okay you are saying we are the gatekeepers of something that is public and then is bought and used by people in private hands how dare apple say i may not put something on something that i own once i buy it imagine this and this is what assholes accepted as the new normal and you're probably one of them viewer that is watching now or you're probably so ignorant you don't even know that this happened you just use whatever somebody puts in your hand where's my slab where's my black slab at that's all you know how to use because you're a luddite you know hand me my black slab and let me tap away with my thumbs i mean technological luddite retard that's what 99 of human beings are and that's why you're getting your ass beat to living shit that's the reason that's why you're getting your ass beat to living shit by the satanists and the globalists because you have no means of defense you have no means of spreading the word you don't know how to do it you don't know what you're doing you're flailing away in the fucking dark people and you're not making an effort to get educated when it comes to publishing technology which is the only way we're going to get the word out and mass so let's go back to what apple did okay they basically said you have to come through our app store to install anything on this platform and we will control every app that we want to allow on this platform if it does anything we do not like we will not allow it for inclusion in the app store and there will be no alternative see if apple said that about their platform about the app store and said we're going to give you an alternative you could tick a box in a setting somewhere and say allow this phone to side load apps from elsewhere fine i'd have no problem with it okay as you can do on android platform or as you could do on windows but apple was now saying we're taking a total lockdown approach all apps will come through us and you as a user who buys the item that we sell will not be able to download from any third-party source other than us we will are the 100 percent controller of software on an entire computing platform when i heard this that day live when jobs gave this keynote i worked in the brb building at penn all of the regular staff worked at a building adjacent to u-pen hospital which is not a big long walk but it's literally a walk of probably a block or two okay from the building that i worked in when i heard that apple created this software model for ios i stopped my job i had it on in a window on one of my computers in my office while i was working on somebody else's computer in my office and i was watching the keynote doing work i got up stopped my work and got up from my desk walked down nine nine i was on the ninth floor of the building i walked down the stairs went out of the building left the building walked on the street to the other building where the other guys uh in the somis school of medicine information services department were at in their building walked up their steps went into their office in the main area where most of the other p i i had a job at uh in the somas department that was a little bit um more uh carried a little bit more responsibility than other troubleshooters than than other people on the tech staff so i had my own office in another building i went to the main office where they had desks all set up like somewhat like cubicles in one huge room where all the other troubleshooters sat and i walked into that room and started voicing my concerns about what i had just heard in this keynote two other highly technical specialists these were tech people tech troubleshooters that know a lot about operating systems and software as i do and i went in there and i said do you hear what he just did you hear what he just said in the keynote address he said apple's creating this walled garden which they already have had a walled garden pretty much especially when it comes to hardware and you know i i care a lot less about that than i do about control of software and i said they're extending this really deeply into the software space by acting as a gatekeeper of every app that's going to be on the store i said first of all do you know what this is going to mean they can censor any app that they don't like its feature set if they don't like any feature set of an app they could say we're not carrying it in the app store and then you can't put that feature on your iphone and these people are like saying to me mark why are you so worried why are you so paranoid about this the iphone is going to be great this is going to be the next big thing this is going to be great for apple on the mac platform i'm like can you not understand the implications of this for freedom and folks that's why i in my life i got one ios device just to become somewhat proficient in the platform for troubleshooting purposes and i never used that first of all i never bought an iphone never will buy or use an iphone because of this software model i use android for my phone and i like windows on a tablet device to run full windows 10 on a tablet that's what i prefer i've said that before on a desktop computer i do prefer mac os and there are reasons for that and i'm showing you how platform agnostic i am okay for the purposes of the one great network i may even install a variant of linux maybe something like mint or ubuntu or uh you know i don't know a driscoll or trisco or something like that i i'm still considering it and just installing obs for that you know so i am completely platform agnostic but folks i want to talk about that don't tell me what platform i should be using or should not be using that's not your business it's not your business and it's not your choice do you understand that because i'm gonna get really really pissy and agitated if people tell me what i need to do with my own fucking business it's none of your fucking business what i use i'll use what i fucking want to use do you understand don't tell me what to use anymore then i'll tell you what to use asshole get that through your thick fucking skulls people it's your choice what system you use the first of all it's a shit array of choices quite frankly computer computing is in the shitter all right all of it all of it don't tell me i need to limit my choices out of the three or four that are available fuck face all right and folks i get angry because you're most of you are fucking retards you don't even understand this this simplistic nature that there's only a few choices of operating systems and we should care more about ourselves to say let me get back more into a corner from a choice of three or four to one no we need to stop these fascists in their tracks and make them like what was just done this week i'm going to actually tell a good story in a moment about what happened on the apple platform we should make them backtrack they don't have any right to do what they're doing stop telling me to run like a little fucking coward that you are i'm not a coward like you are don't tell me i need to run away like you you little fucking fairy pussy you want to make it personal i'll make it real fucking personal don't tell me what platform i need to use i'll use what i want it's my fucking choice this is why i can't stand dumb motherfuckers i have my patience is run out and it's because you don't give a shit about yourself enough you have self-loathing and you'll run away like a little fucking fairy we've got to stop backing down and running away and confront this first of all understand it and understand what has occurred so that you can confront it in knowledge and understanding let me go back to the explanation further of what happened okay so first of all i get up go to the other building try to tell other tech guys why i'm concerned about this and they don't even understand that's how stupid they were most of them a couple of them got it but most of them were like you're worried for nothing apple's not going to do anything that's what they sounded like like they were choking on dog shit apples like little dory think brad with this power vomiting dog shit out of their gullet you know that's how big a fucking retards most of them were no apple's not going to technofascist like this like this clown jobs was and like the bigger hitlerian clown cookler is no they're not going to do anything controlling with it why would you think that they're only trying to ban entire populations from their platforms because they don't like their political views you know they don't like the truth that they're telling now they're trying to ban youtube downloading software like they just did with charlie monroe's software which we're gonna get to but let's look at what apple really did here okay so this is the whole issue the app store okay and again apple can curate in the app store all they want but here's what they did they made it so you can't get any software into your device through any other method unless you do what's called jailbreaking the device which voids your warranty on the device and is very difficult and technologically challenging for most people to do it's not for the average end user and apple has made it very difficult to jailbreak recent versions of ios if not impossible so don't say jailbreaking is the solution no apple recanting these fascist fucking policies is the real solution that is criminal racketeering and monopoly they're criminals they're globalist criminals in bed with the communist chinese and don't tell me that isn't true or happening because you're fucking wrong that's exactly what it is you don't have enough information to understand the situation if you don't understand that that's your lack of information and understanding not mine and i'm done trying to make any excuses for people you're just fucking dumb and wrong and that's not an ad hominem attack it's the truth you're too dumb to understand what the fuck's going on and you're wrong because you don't understand it from a moral perspective either it's your understanding problem not mine i'm correct and right you're dumb and wrong so here's what apple did with the app store that makes it a monopolistic practice and an immoral one first of all as gatekeepers they are telling developers they must go through them and therefore no developer who writes an app for the ios platform or ipad os platform now can sell their app to the public unrestricted and unrestrained as they used to be able to do on the mac os and as developers can still do on windows and linux they need apple's approval on this whole computing platform could you imagine this could you imagine if microsoft or the developers of linux said to people you have to get our permission before you write a program and release it to the public to run on their computer could you imagine and people don't even understand that this happened most of you out there don't even understand this has occurred since for 13 years it's been this way on this platform for 13 years folks and you still don't understand it and you don't understand why it's wrong they take 30 percent on forcing people to first of all i thought developers were going to rebel against this practice for sure i said developers are going to say fuck apple i'm not writing anything for this platform unless they recant this policy but no no they wrote it they wrote it i they wrote the apps and sold them in the store and let apple take their monopolistic absolute this is this is criminal racketeering is what it is it look go look that up of what it is it's racketeering the developer cannot sell their app to the public anymore they have to go through apple and give apple a 30 extortion cut as a monopoly or they can't get their app to run on ios there are no no applications are able to run on the ios platform without apple's express approval in other words there is no side loading on the platform this means that you could take an application that is packaged and distributed online from a third-party developer and download it from that developer's website and install it on your device folks if you are so dense in the fucking skull that you still think this is about what apple can do with their property and you don't understand that this is reaching into your property and other people's property you are fucking retarded you are a fucking retard stop saying that it is about what apple can do with their property it's not fuck face retard it's not you don't understand because you're dumb learn what's really going on apple has the right to control what's in the app store because the app store is their property and their space on the internet i'm not arguing that point by making it impossible to sideload an app apple is saying what you as a fucking person who bought a device and an owner of that piece of property when you spent your money on it can do with the device post buying it which means they are dictating what you can do with your property understand the distinction dumb fuck and folks i look i keep saying that i keep saying it and i can't do it i cannot do it i can't stay calm because i know how dumb you people are and i'm talking even to my own listening audience even to my own viewing audience i don't care get offended and shut the fucking show off i don't care anymore because you're so fucking dumb that i get from even you people you're dumb as a bag of fucking shit you can't understand the distinction between curating in a store that they do own and have property rights to versus saying what you are allowed to install don't you get it no most of you don't because when your mouth opens liquid shit pours out by controlling which apps are permitted in the app store apple alone can control the entirety of the feature set available on the ios platform and if you can't understand how dangerous that is once again you're just a fucking mental midget retard if you can't understand the danger of having that level of monopolistic power on an entire computing platform that they are trying to bring that model into mac now and when they do that windows will probably follow suit and don't tell me i need to go run to some shit where called linux cause 99 of it is shitwear as i've talked about look i'm gonna keep attacking the foss community the free and open source software community you know why you guys suck at what you do 99 of you guys blow at what you do and i'm gonna keep hammering on it attacking it because you're all just motivated like everybody else by profit and that's why your organizations suck dick okay and i'll just say it just like that to you you suck at what you do 99 percent of you do there's a a few gems in that community but they're few and far between and it's like picking through a pile of shit to find a nugget of gold get as offended as you want eggheads that's the truth anybody paying attention knows that's the truth about false free open source software all right i don't give a fuck who gets offended by that get as offended as you like it's still true nonetheless so don't tell me i gotta be backed into a fucking corner to use your garbage software most of it is garbage some of it's very good but few and far between in that whole community write really good software compared to windows and mac platforms so don't tell me i need to limit my options even more than they're already limited they're already too limited tell me i have to run away i'm not i'm not a bullshit coward like you i'm not running away i'm going to tell people why this is wrong so they can understand what's been going on and raised their voice to make it change you don't have enough will to make it change because most you are dumb fucks who don't even understand what's going on all right if you don't understand these three bullet points and how dangerous all this is i don't know what to tell you uh you're a jackass a jackass all right and for all you equal cranial retards called the uh anarcho-capitalist community oh cooperation to do whatever the hell they want that's what you asshole sound like you want corporate fascism that's what you guys want you think unrestrained illegal now i don't even care about illegal immoral practices unrestrained criminal i i'm strike illegal i didn't even mean to say it was a a mistake of of the tongue okay a slip of the tongue i meant criminal not a legal criminal there's a difference true criminal practices that's what you guys want to run rampant this is criminal racketeering and monopolization and yes that is criminal that's trying to push out competitors so that you can just have a total dominant advantage over everybody just because you say you can because apple knows that they would have competitors in the whole software field if they allowed side loading of apps it's called having a weak position that you can't even defend your apple your little nazi cowards with such a weak position you got to say we're going to maintain a monopoly over the software available on our platform because probably people would write better software than you do assholes look and i'll tell you i'm gonna go so far let me get as extreme as this right here if you agree with apple get the fuck off anything related to what on earth is happening if you think apple aren't criminals and what they're doing isn't immoral i don't want you as even an associate a person who claims understand my work get the fuck off my social media unfriend me now or i will block you if i find out you agree with apple and that's the other thing companies either act as a utility platform in which case they cannot censor or they act as a publisher in which case they can curate what on earth is happening is a private publishing platform that's why only i have say over what goes on that website it's not a public area i'm not making it available under the public if i did and then started censoring then that would be censorship and don't tell me a private facebook group that has a stated intended purpose isn't a publishing platform that's the difference between understanding what's your own property and what isn't it's a private publishing platform with a specific goal in mind you want to have a free-for-all platform with no rules then if you start taking down things that's called censorship you say you want to have a freedom of speech platform available to people to put their own content on and be their own publishers on their own private space that's what youtube is supposed to be twitter facebook and they're all engaged in criminal practices of censorship and then you want to say okay they are private publishing platforms that can curate well then they can't have the protection that they have about liability that government's currently giving them you can't have it both ways and most people don't understand that i'm a private publisher i can control what content goes on my publishing platform can you tell a book publisher what books to publish or not no so apple has the right to publish on their own app store the apps that they want do they have a right to monopolize i don't believe that they do that's criminal to say oh you must come through us that's called criminal racketeering and monopolization that's an actual crime against competition on an entire something as important as a publishing platform which is a computing platform that can create and distribute information no one company should have that power or you are a corporate fascist and no i'm not a socialist or a leftist i'm not a marxist either but if you want to tell me any company should have that kind of fascist power in their hands i think you are an immoral criminal yourself for even advocating it you are aiding and abetting immoral criminal behavior if you agree with apple on their policies and if you don't understand it i don't you're you're dross to me i don't i don't need you i don't want you i want people gathering who understand and agree with what i'm saying do you understand idiots out there i don't want your association i want the strong intelligent willful people that are going to move forward and let the rest fall to the wayside because when those people step forward and activate they'll do incredible things and the dross will always do nothing because that's all you are and that's all you ever will be and we don't need you so understand these bullet points and how dangerous this is to any platform imagine if microsoft was doing something like this and saying to developers and they're starting to implement some of it but imagine if they were saying you must come through us to write a piece of software and distribute it on windows imagine this i mean like i was saying as an example imagine if they went to intuit and said well quicken and quickbooks can't run on the platform anymore just because we say so we don't like the feature set so we're banning it from the platform you got to come to us now how many businesses use software like that that they would be affecting that bought it from the third-party developer could you imagine and this is essentially what apple does every day since 2007 on this whole platform oh you could say don't use it i agree don't use ios i agree with that until apple reverts away from this criminal racketeering monopoly policy but there's more to the story that you need to understand so see on android it the whole situation is different because all you got to do is go into the security settings in android and tick this one box right here you tick this box right here under unknown sources you just turn that on allow installation of apps from sources other than the play store why can't apple just build a setting like that into ios they don't want to why because they know that they are going to participate with the coming censorship this was planned and that's what they've been doing wholeheartedly censoring people hard because they're fuck communists and rat fuck hitlerian type fascist nazis doesn't matter what uniform you have on doesn't matter whether you call yourself left wing or right wing of the same bird of vicious devouring bird of prey coming for everyone's freedom it's all the same when it comes down to what it's going to result in in the end which is called human slavery all you got to do folks is hit unknown sources on android one little check box okay so fine people if people are paranoid and you want to google to check everything like you like a little mommy bird taking things in their beacons are regurgitating it into your garlic you could use just the uh the play store apps if you're that like much of a shit little baby shit diaper baby go ahead you know everybody's like oh this is for your own safety it's so malware it's for malware so malware doesn't get into your computer i don't want malware in my phone so i don't want to take any chances little shit in your diaper baby for the adults among us on a mobile device we'll just tech tick that box and be done with it and then download whatever we want and then it's our responsibility which is how it always should be anyway it's my property i'm responsible for the safe keeping of it i'm responsible for the maintenance of it we went over that odd infinitum what makes something your property lawful acquisition under natural law you are the keeper of it the maintainer of it and you're responsible for it the end that's it you get to determine its usage that's the other point so apple is saying that iphone or ipad isn't your property because you don't get to determine its use we do we get to determine the feature set on the whole platform and the by extension they are saying it's not your property and that's criminal that's saying we own it you don't you're not allowed to own property that's called serfdom that's called slavery that's called serfdom that's feudalism folks feudalism and that's what fascism and communism are forms of feudalism so get it right once and for all time for the late for the slow-minded retards among you let me read it real slow while apple has the right to curate what they allow on their store which is their property now i'm not debating that fuck face okay the monopolization of apps on the entire ios computing platform equates to telling someone else what they can and cannot do with their own property refusal to allow an owner of their own device to run any program of their choosing let me correct this because folks i'm so angry when i even do this that i'm making mistakes and if you don't understand why i'm angry you're an asleep spiritually retarded soul that doesn't grasp what's going on on this plane of existence the monopolization of apps on the entire ios computing platform and now ipad os computing platform equates to telling someone else what they can or cannot do with their own property refusal to allow an owner of their own device to run any program of their choosing on a computing platform is criminal overreach into someone else's property by a platform developer it isn't their property to do that with do you understand slow retarded fuck ass i don't i i just don't i can't even believe human stupidity and how anybody could not understand this this late in the game and argue on apple's be behalf people don't know their rights you don't know right from wrong that's the problem because you're just as much fucking trash as they are 99 of you so we're going to get to some new developments of how apple is now trying to extend this overreach into the mac platform which they've already been doing folks i don't care what else you call it but i'm going to call what it really is technological fascism that's exactly what it is get as fucking offended about it as you like that's exactly what it is and all you retard and calms out there and then i'm sorry and caps out there that advocate for technological fascism you're destroyers of freedom and you're just as dumb fucks as the and com communists you you're just retarded in a different way you got a different brand and flavor of shit in between your ears that's all it is a lot of you don't understand natural law you don't know what's right from wrong because your rat trash parents never taught you right from wrong now here's our new poster boy tim dolph cookler you rat trash nazi scumbag this is what you are cook you're the modern equivalent you're you're the digital hitler that's what you are you rat fuck yeah kyle cookler that's what all the the people in the cult of apple are folks i use ios for a couple of re uh not ios i use the mac platform mac os for a couple of reasons i use that i started using it when gill emilio was the ceo of apple or joe emilio however you pronounce it okay when jill emilio was the ceo let me tell you something that guy morally ran a business you could say whatever else you want about the guy he was a moral ceo for anybody that paid attention back when apple and apple in its floundering days before that rat fuck jobs came to the company and headed it directly into the fascist direction if you think jobs was bad cook is infinitely worse infinitely worse and he's in bed with the child the chinese communists right in bed with them working to institute all their censorship policies and bring them here to the united states and if you don't think that you're a dumb motherfucker a dumb motherfucker put him in stalin's outfit it wouldn't matter it's the same thing put him in mal's outfit it wouldn't matter it's the same thing it's the same end result he's a totalitarian control freak and cook you're a totalitarian control freak because your rat fucking parents fuck you up boy and i'll tell it to you just like that you have self-loathing issues you hate yourself punk you hate yourself punk you don't know what freedom is and you don't care because you hate yourself and your parents raise you to be a self-loathing punk little bitch and because nobody told it like that to your communist ass face i'll say it like that to your face punk bitch you're a self-loathing little mini hitler you're a piece of trash and your parents were trash your rat fucking parents were trash cookler this is the direction apple's headed they are infinitely worse than microsoft at this point infinitely worse than mike they make microsoft look like angels they make bill gates look like an angel of god by comparison that's how bad at what apple's doing is because they're not just trying to stick a poison in your arm they're trying to control what you're allowed to say you can flip a coin over what's worse as a matter of fact microsoft's not doing that gates and the gates foundation is doing that he's no longer the ceo or even on the board of microsoft in the technology sphere cook is way worse than microsoft at this point apple's way worse than microsoft and the answer is not to run away like a little fraidy pants coward little boys and girls who advocate for that position you know what movie you need to go watch go watch the kite runner all right because it'll teach you a psychological lesson that you can never run away from a bully the bully will follow you wherever you go everybody advocating you know you don't like to wait you don't like the way apple does do what they do go run away you clown your clown shoes you're not even a clown you're the sweaty stinky fucking shoes that a clown fucking wears your clown shoes okay that's what you are your big red floppy sweaty smelly fucking clown shoes that's what you are people who advocate to run away and let the bully run rampant run run go to another platform i don't care who you are how you are connected to me get as fucking offended about it as you like this is the direction it's headed so i want to let people know the new nazi direction that we're going even on the mac because this whole fascist attitude has now come to the mac and here's what has occurred all right there is a small independent software company that has been writing something called downey i've shown it here on what on earth is happening and i'm going to download it install it and show it here again today i'm going to actually the rest of the show is going to be on software okay it's going to be on how to circumvent a lot of this censorship because this is what apple doesn't want to allow either in cahoots with google see everybody thinks oh google's their competitor right they write android and apple writes ios no they're not their real competitor it's all a pro wrestling show folks for those people who know me personally you know i'm a pro wrestling fan people think that's silly and stupid that's my you know guilty pleasure that's my downtime release of stress you know my dad used to take me to pro wrestling matches when i was young we watched it together you know i go to the matches and it's a holdover from my youth i still you know engage in some guilty pleasure of watching pro wrestling it's called kayfabe it's it's form of method acting where you put yourself you know in the position of people opposing each other and pretend to really hate each other and do each other harm this is what politicians do it's cafe acting they're all on the same team apple and google are ultimately on the same team behind the scenes they're sitting back drinking beers after the pro wrestling match is over you know the outcomes are all staged they do a lot of very real risks and their bodies take very real abuse you know so it's not all quote fake things that they do to each other are real but the outcomes are all staged you know they do it so as not to seriously maim or hurt each other and it takes a lot of practice and skill you know and that's the artistry in it that i can appreciate you know just the suspense of disbelief the suspense of reality temporarily and you know it's some mindless entertainment for some fun they don't really seriously try to maim or hurt each other and after the matches are over they all go out together and you know have a good time well that's what google and apple are acting like behind the scenes you know they pretend to be violent competitors then behind the scenes they're shaking hands and partnering with each other to censor everybody so google owns youtube youtube is the biggest video sharing platform on earth when people post or live stream to youtube that's how they know they'll reach the maximum number of people and that's why they stay on the platform downey is a little piece of software that you can install on the mac os there are equivalents of it on windows and linux but it is mac only downey is mac only you could install things like media human youtube downloader you can install things like youtube dash dl on linux okay there are many other things that accomplish this same task to be able to download videos from a website i've talked about downey before on what on earth is happening because i personally own it i have purchased it from the developer and folks that's even a rare thing when i go out and say yeah this developer really deserves compensation and i i have talked about downey and how good it is at what it does it works for just about every website not just youtube if you want to grab a video from any website where a video is embedded downey will get the job done on the mac platform again on windows i've used a lot of them and i recommend one called media human youtube downloader which i don't think is nearly as good as downey down a media human youtube downloader also exists on the mac as well so um it's a good cross-platform alternative but i use in my daily everyday workflow i use downey charlie monroe is the developer i think he's an excellent developer and i'm going to say why i bought it it's because if i think a piece of software works better than other pieces of software of its ilk i will buy it i do that rarely because quite honestly i think most modern software is shit just quite frankly and honestly i think most developers don't really put a lot of artistry into their software quite frankly i think a lot of you guys think you're doing a good job and you suck at what you do charlie monroe on the other hand is one of the rare gems and i'll publicly come out and say i i'm not i receive no compensation or kickback i'm not advertising i'm just telling you i use it personally okay and i'm telling you why i think he's a good developer i think he puts care into his software he adds features that are requested by any by the his users he updates the feature set he fixes the bugs and here's why he's really good that most people don't do his software is mo takes advantage of multi-threaded multi-threading excellently and most developers don't know how to do that and that's why their software is slow sluggish shitwear and that's why downey is ultra fast and it's the best at what it does the end you you want to show me a piece of software that does what it does better i challenge you to do it this is best in class as far as i am concerned and that's why i use it every day do you know how many videos i have pulled down from the internet with this piece of software from every conceivable website all right and that's why i paid for it because i think the developer deserves compensation in an instance like this because he's an artist that what he does he he takes pride in his art as people should where and most people don't they rush things out and it's shitwear and they think oh well i made a piece of software give me money for it most people's software is shitwear this guy knows what he's doing and takes pride in his art so that's why i think he deserves compensation so i want to tell you what happened with his software because first of all most people don't know second of all the only reason it is still even functioning is because people made a ruckus about what happened and there was a huge outcry in the developer community this week as there should be and and well done that's all i have to say to the development community to the software community to to the mac community well done you guys made apple recant their position and back down and let me tell you something apple and cook you're rotten fucking liars you're rotten fucking liars you're liars about why you took this software down saying it was an accident in your automation processes you're right fucking trash lying scumbags nobody believes you including i guarantee you i don't know him personally but i guarantee you char charlie monroe does not believe you that this was an accident you're rat trash fucking liars all right and that means you cook lure cookler you hitlerian piece of trash you're a lion bag of trash cook so i'm gonna step out of the uh presentation and go to my web browser because i want to tell you what happened first of all let's even stay in there keep that up here's what happened with downey downey is a third-party piece of software that is available in the app store but it is also available on uh the developers website it might not even be in the app store it might just be on the website apple has instituted something called digital code signing where you can tell basically the mac os that you are a trusted developer that has a code signing certificate from apple now all this means is that your software is basically approved to run on the mac platform and that it's not malware if you if the developer chooses not to do this on the mac somebody has to tell they have to disable what's called gatekeeper on the mac and that's actually the name of the software apple built into their platform called gatekeeper you have to disable that which i'm going to show people how to do today folks we're going to get a little technical here on what on earth is happening and this is even an advanced thing okay but i'm going to show you how to actually disable gatekeeper on your computer i'm going to show you downey i'm going to show you library as an alternative uploading platform for videos because this is all about censorship this is all about what big tech wants to allow you to say and to publish all right this is part of the ongoing war that we are in for freedom of speech which is ultimately a spiritual war so i own downey i bought it directly from charlie monroe on his website i paid via paypal i got the activation code and installed the software so i own it from i've bought it it's my property that i run from a third-party developer nobody has the right to tell me i can't run that app on my computer which is my property stop telling me apple's allowed to disable software on my own computer it's my property i will run what i choose on my property i am the one who decides what goes on my machine not you cochler and not you other asshole and caps who think that this isn't criminal behavior saying an apple has that right no they don't you're wrong you guys need to understand what property means fuck faces you think you do and you don't cause your dumb bags of fucking shit for brain fucks i'm sick and tired of hearing your ass holish argument that apple has some right to do this because they're a private company yeah well ig farben was a private company and they did they have every right to do what they did in the third reich all the companies that run communist china are privately owned companies too they have every right to do what they're doing in the communist regime your assholes you got your head up your ass get your head out from up your ass asshole i bought downey it's my it was my i'm allowed to run that software on my property yes i am nobody has that is going to tell me apple can control what i run on my own system got to get some nutrition in me too because i i do these shows and and put all this together and we do all this setup and i forget to even eat and get good nutrition into me thank you thanks to josh for the smoothie again josh is our camera and lighting guy does a great job makes a mean smoothie i probably have it all over my mustache now anyway so i bought this software because i think it's best in class all right i wake up one day this week and i am greeted with a message when i try to open downy and download a a video that i needed and i wanted to put on the arc drive and downey's the the the a warning comes up saying this software is malware and can damage your computer you should move it to the trash i was using it at 11 p.m the following that the previous day 11 pm the previous day i was downloading youtube videos with this piece of software and then the very next morning it throws up a dialogue saying this is malware you should move it to the trash now let me explain what happened apple and google who are in cahoots with each other must have decided we're we're sick of having this piece of software around that's been around for a lot of years now that easily allows people to grab youtube videos off of youtube download them easily and fast store them on their own computer and redistribute them when youtube bans them so that they could be easily redistributed to any other platform or website google and apple don't want that functionality on any computer they want to make that impossible if they can because they want chinese and communist and fascist style censorship they are globalists that are trying to bring about worldwide human slavery and they don't want the free flow of information especially in an election year obviously that's all nonsense bullshit but they want to try to control the outcome and nudge it into an even more fascist and communist direction they don't want the free flow of information regarding covet 19. they don't want it they want a sensor any alternative narrative so they don't want people being able to download things like the press conference about coven 19 and all the doctors who are saying there's a lot of alternative information about treatment they want to take that down from youtube and they want it gone forever and they don't want anybody to be able to re-upload it to other channels they don't want anybody to be able to re-upload it to other platforms they want it censored and gone from the internet one star their algorithms targeted for censorship downey is a a piece in the puzzle that makes it possible to grab information from one platform and redistribute it to multiple other platforms and that's why apple and google are not interested in downey's existence they want it gone ultimately and tr mark my words folks this won't be the last you hear of problems about this app and any other apps that do the same thing they want the feature of being able to grab a video before it is censored removed from all platforms and you don't understand that that's what it's about you're a naive fucking child who does not understand what's going on in this world so what happened is all at once one moment apple revoked their signing certificate from this developer this effectively immediately put him out of business because the developers signed signing certificate their certificate of authority from apple makes all of their apps run on the platform it checks it against an internal security database on mac os so what apple has the power to do allegedly to keep people safe from malware but it's make no mistake about it it's for reasons of censorship hitlerian style himmler style gobbles style censorship yes it is for that purpose they have the ability to flick a switch and immediately across the world make a program not be able to launch on every single back computer in the world that power should not exist i don't give a shit if you're paranoid about malware then get some fucking balls and responsibility and understand how to protect your computer against malware by not being a fucking idiot not handing that kind of level of power into apple's hands the fascist communist trash that they are and saying it's for your safety like a good little fucking nazi that's what the nazis said too all the measures hitler and himmler were putting in place are for your safety all the powers of the gestapo or for your safety all the powers of the shutstoffel is for your safety you rat fucking nazis your nazi trash everybody who agrees with apple are nazi trash nobody will say it that way but i'll say it that way they revoked charlie monroe's signing certificates and put him out of business for a couple days and then want to say we made a mistake it was an automated process that flagged all your stuff as malware yes sure it was you lying sack a nazi shit cookler you're a lying sack of nazi shit cookler so let's step out and have charlie monroe explain it himself i'm going to go to his blog and he'll explain it so let me step out of my presentation and go to my web browser all right so let's go back to the computer okay this is charlie monroe dot net software dot charlie monroe dot net is the website so it's software dot c h a r l i e m o n r o e dot net software dot charlie monroe dot net okay this is the developers website he makes some great apps i i personally use downy and i have used permute in the past the other software here i don't know too much about but i can tell you from personal experience these two pieces of software are excellent permute is similar to handbrake it's a video re-encoding software transcoding it does what it does very well but downey i consider is best in class so if you click down here it will take you to that page that i just took a screenshot of and you could download it from here now i already have downloaded and installed it because i own a license for it but you can try it there there's a free trial and again this is mac only on windows i recommend media human youtube downloader on linux at the command line you could easily install youtube dash dl and you're kind of off to the races with those two pieces of software on other platforms for the purpose of this i'm simply talking about the mac platform again which is my platform of choice and that's my right and no it's not just uh go use something else because fascism is creeping in this is the same thing as saying stick your tail between your legs your ball as coward and go run to another country because fascism is taking over america no i will not i'm going to stand and fight i will not run with my fucking tail tucked between my legs like a little pussy fucking dog you do that coward don't tell me i must do that so let's read from his blog i've clicked blog i'll do i'll do it live here and i'm clicking this one right here that says a day without business let's read from charles monroe's blog charlie monroe's blog a day without business on august 4th 2020 i woke up to a slightly different world and this is charlie monroe's words folks i had lost my business as it seemed a full inbox of reports of my apps not launching cr or crashing on launch and after not too long i found out that when i sign into my apple developer account i can no longer see that i would be enrolled into apple's developer program oh contraire it shows a button for me to enroll which i tried clicking but only got a message that i can't do that after more investigation i found out let me make this a little bigger much better okay after more investigation i found out that the distribution certificates were revoked evidently by apple as no one else has access to them and i was sound asleep when all this happened each mac os app these days need to be needs to be code signed using an apple issued certificate so that the app will flawlessly work on all computers meaning all mac computers when apple revokes the certificate it is generally a remove kill switch for the apps i got really frightened all of a sudden no user was able to use my apps anymore and this means all of his apps not just downey though interestingly i was able to connect my app to my app store account and my apps were there and working anyway there is to my knowledge no hotline for developers that you can call as it was 7 00 a.m all times are c-e-t central apples i i guess i don't know is that central uh european time so i'm not really sure but i think that's what it is apple's contact form only showed the option to send them an email so i did at 9am with my teeth grinding i went for the phone option where you leave a number and they call you back they didn't of course not this was done with no warning folks they never sent charlie an email they never called him nothing and when he tried to get in touch with them no response at this point you no longer know whether you have a business or not should i quickly go and apply for another job or should i try to find another company and distribute the apps under it what should i do the most damaging thing to me is the message shown to the user let me even blow this up further so people can see it sorry there it is this is what i was getting on my own computer folks downey4 app will damage your computer you should move it to the trash this file was downloaded on an unknown date report malware to apple to protect other users with the checkbox checked this is the message mac os shows to all users who try to launch my app that it will damage their computer with a check box to re report malware enabled the average user immediately goes nuts the average user has no idea what happened as soon as this happened folks i immediately knew apple had revoked the signing certificate for censorship reasons because of downey not because of any of his other software the issue here was downey being able to download from google's youtube platform so that you could take videos that google deems sensor censored and redistribute them make no mistake about it that's the reason as soon as i got that message on the morning of august 4th i immediately knew what and then you know what i did i ad hoc code signed that shit and it reopened for me but good luck one and a half a million people know how to do that all right because i'm a tech head and i i know how to do that so i just ad hoc code signed it you know boom with the developer tools and it reopened and then i'm back in business using it almost every user probably just panicked and put it in the trash because they don't know what the ad hoc code signing even means let alone how to do it all right so back to this blog i fully understand that the entire idea here is that apple can remotely kill malware and to keep the user on the safe side but can't they differentiate between individual cases can't they add revocation reason and in case they just revoked the developer's certificate for non-malware reasons show something along the lines of this app needs an update from the developer please contact the developer why not i really find the above borderlining on slander charlie you're absolutely right and as a matter of fact it's beyond slander this is criminal racketeering this is criminal conspiracy this is criminal criminal monopoly and it is slander absolutely continuing with charlie monroe's blog post on top of it i lived in fear of what's coming next imagine coming to work and all your stuff's in a box on your desk no one tell you telling you why but tells you to hang around and hope this is really hard emotionally and very stressful fortunately possibly thanks to the traction the story got and that's exactly it charlie that's exactly it this story got a lot of traction in the apple community in the developer community in the mac os community absolutely i posted it all over my social media folks i very rarely post technology stories i very rarely post anything on my social media other things other than things i myself am doing but occasionally i think something is so important when it comes to freedom of speech i i will post it and this is one of those times okay and you know occasionally i will post things that other people doing the great work are doing because i think it's so important what their project is that i'll post some things that other people are doing mostly i use my social media to alert others as to what i'm doing to further the great work and that's all my social media is generally used for in this case i used my facebook and twitter accounts to make people aware of this ongoing situation and let me tell you something a lot of people shared this news in the whole software community and good on you guys for doing it good job good job this is called spreading the word and making people avoid aware of what's happening when rat fascist trash nazis are doing their rat fascist trash nazi business because that's exactly what was going on and we got them to back down this is actually a success story all right so continuing with charlie monroe's blog fortunately thanks to the traction the story got and all the support from everyone i got for which i am infinitely grateful after almost 24 hours after 10 pm i got my account reinstated and i'm going to read his original writing because this is very true then apple finally did contact him with a bunch of bullshit lies bullshit lies you're a fucking liar cookler you're a fucking liar cookler without a word i got my account reinstated without a word from apple no hey sorry an intern tripped over a wire and unplugged a server or something similar nothing no apology which i now want printed on tim cook's ass with phil schiller kissing it beautiful well said mr monroe well said okay the lackey as i like to call him you know fill the chill sugar you lackey little lap dog you you had your tongue so far up steve jobs ass that tim cook can taste the flavor all right nothing has changed there about phil schiller you lackey you're a lacky little lap dog chiller you're the goblins to to jobs and cooks hitler that's all you are boy little punk ass bitch boy and charlie i think you should uncomment that personally and leave it there i won printed on i want an apology printed on tim cook to ask with phil schiller kiss and get beautiful words beautiful words my friend there was no offer to compensate me for the lost income or the lost time as i will now need to recompile resign and redistribute everything nothing nada then he crossed that out and edited it that apple has called and apologized for the complications yeah after the whole software community made a big ruckus outcry about the hilarion policies of cookler and and crapple the issue was caused by my account being erroneously flagged by automated processes hold on put this up there we need dr evil and a quote under saying automated processes automated processes yeah sure you lying sack of nazi shit cookler lion sack of nazi trash tim dolph cookler you're the new you're the new uh comic piece of trash character on this show although it's really very serious but you deserve to be mocked like the little loveless nazi you are you trash fuck you're a you're a rat communist nazi trash fuck cook and that's the thing folks you know what i people bring this to my attention and it is correct you're just you're unloved you're self-hating unloved worthy to be mocked scumbags that's it you're worthy of mockery derision and laughter but the thing is unfortunately because you've gotten so many people to go along with your bullshit you unloved fuck that nobody could really love you you control freak fuck that you do need to be taken seriously for the amount of damage to freedom that you could do to other to other people but really you deserve derision mockery ridicule and laughter because you you are incapable of being loved because you're such a piece of trash and that's why you do the control freak shit that you do because you're a loveless and unloved and unloving piece of dirt and so was your fucking family and your fucking parents because they raised you to be that piece of fucking trash or better said they didn't raise you and that's why you became that piece of fucking trash you nazi fuck you know i'm gonna say it's super hardcore because nobody else will so i will don't believe them they're lying sacks of shit they're lying sacks of nazi dog shit automated processes get the fuck out of here flagged by automated processes as malicious and was put on hold yeah okay yeah his apps had worked for 10 fucking years without one flagging one complaint the guy's a great developer all of his apps have always worked fine now all of a sudden apple's automated processes flags them as potential malware get the fuck out of here anybody who believes that shit you're a dumb naive fucking child with a bunch of liquid shit between your ears apple ban this deliberately because it can download from youtube enabling people to circumvent censorship and post shit that apple and youtube don't want online onto other platforms and that's the real reason apple took it down and they couldn't get away with it because so many people called them on their nazi fucking behavior that's what really happened and nobody's gonna convince me otherwise you think it's not that you're a dumb fuck so then he goes on to apologize he's got to recompile that's hard work doing all that recompiling and redistributing everything so that's what really happened folks i want to clear the air about what really happened there you want to read about it yourself go to charlie monroe software check out downey i i get no kickback from that i just think he's a good developer and i bought and uses software then apple dared to disable software i purchased and am running on my machine could you believe these nazi fascist fucks i don't believe you cuckler you're a fucking liar anybody with a brain in between their ears instead of a pool of liquid shit between their ears shouldn't believe you either cookler all right let me actually go back because i want to download downey in real time and show you this all right all right so step out for one second and just let me get my desktop together because we're going to do some things in we're going to get some lessons in software right now all right so you just good all right good you can go back in okay just wanted to make sure okay you could download this as a trial right here okay i already have it installed but i'm just going to show you how it works okay so you hit this it'll download my internet connections very fast and already finished i'm going to hit that little magnifying glass and just show you that one more time because i know i did it fast hit the hit the downloader download icon okay it says that it downloaded already it's complete you hit hit this little magnifying glass right here that'll take you right to the download all right so then you can see it went out to the desktop here's the software this is called a dmg on the mac it's one of the two most popular software distribution mediums file format dmg stands for disk image it's a virtual disk like plugging a thumb drive into your computer when you double click this it mounts a virtual disk into the file system okay so i'm going to double click it and you'll see it's saying opening it's mounting into the file system then it shows you this window at the top here you see it's a little disk icon i'll show you where that actually mounts if i go to my main computer level here which is the equivalent of windows this pc in the windows file explorer right right here shows me all the drives that are mounted so i have a network drive mounted i have my internal hard drive and here's downey this is a virtual disk you know double clicking it does the equivalent of plugging a little flash drive into the computer even though it there is no physical disk so hence it's called a disk image or a virtual disk all right now it says you could install it by just if you actually look here this is a representation of what's in this folder okay it's just two different views all right you could drag it right to the applications folder like that and see you get that plus and if you drop it there it'll actually copy it into the application folder so then i can launch it from the application folder which i have in my doc there's downey right there okay i already have it installed i have a folder called third-party software so i'm actually going to take it out of there i'm just going to hit open in finder i'm going to remove downey from that directory okay so i just want to show you how you get it installed on the mac after that's done you can eject the disk image and you can even toss the uh disk image if you want which i'll do so i just wanted to briefly show you that's a very quick software installation uh i already had it installed here in my third-party app so i'm going to just open up downe4 okay this is downy it's a very simple interface okay and um you know you could peruse the menus you know there's different functions in the menus as with any other piece of software you know you could look at the preferences okay you know general preferences um you know all kinds of set settings appearance do you want it in dark mode or light mode etc where do you want it to download what do you what do you want to do with the history items you want to install the browser extensions okay we can go endlessly through all of that but you set it up how you like and then you know you could just leave it there you don't even have to have it open right okay i could even quit it right i put the browser extension in and that's right here um it's right over here see this icon i'm pointing to here up in the right hand side this is the downey browser extension okay so it works in conjunction with the browser you don't even need to use the browser extension it's just a nicety i'll show you how to use it with and without the browser extension okay let's say you go to what on earth is happening and you're looking through my videos here's a good example let's say you wanted to download the natural law documentary trailer right okay so you're watching this and you're like oh cool trailer i want to download this right so there's a few ways you could do it you could use downey right on this page because it's embedded but i like to just go right to the video so you can click this white link at the top that'll actually take you it'll open up the youtube page okay so i just write i right clicked and i chose open in a new tab right and then there's my youtube page with the with the natural law video i don't even have to hit play here okay as long as this page is open is up right all i got to do is now copy this url i could right click here and hit copy right so i'm in the title bar you go to the title bar right and just right click select all what's in the title bar right click and choose copy all right now i'm going to go to downey all right so let me launch downey and now i just go to edit and hit paste that's it it sends that into downey and watch it go and done that's it that fast you blinked you missed it in my downloads folder is the file downloaded directly from youtube okay that's it i could show you i could double click this it'll open my movie player i generally use something called movies and you know you could hear the sound the video is playing universal laws yeah you get the idea i now have the file locally on my own computer if i wanted to upload this to any other platform i could do it right now as a matter of fact i could even show you how to do that okay so because i want to show you circumvention procedures first internet censorship okay so now i'm gonna just trash that and we'll do it again so i'm going to delete this right i'll empty the trash that file is no longer on my computer i'll leave down the open i'm going to go back into my web browser and now all i'm going to do is hit this button here which is the browser extension what this does is it takes that url and automatically sends it to downey in the background right so i'm gonna hit this and now i'm going to go into downey you could see it's already there without even pasting it it did that automatically for me and that fast it's it's downloaded yet again okay do you see the power of this first of all first of all folks most of you can't download youtube videos that quick and efficiently you don't know how to do it and that's why you can't archive data from the internet and you're not acting as redistributors of data because your technological luddites and or know nothings you don't know what you're doing when it comes to computing and that's why we're getting our asses kicked all right i'm not going to apologize or be nice about it to you it's not oh we're all good enough how we are that's new age bullshit you need a lot of improvement and a lot more knowledge you're not good enough if you were good enough the world would be for a freer place than it is today most people are ignorant bags of shit and that's why the world's not fucking changing for the better and they need to hear that and act on it alright so this is downey and how to use it it's very simple folks everybody should already understand this and if you're on windows just grab media human youtube downloader and it basically does the same thing not as nicely and certainly not as fast i'll tell you that that it generally gets the job done but guess what this thing is fucking fast boy and it makes my job as an archivist simple by comparison i use this every single day in my workflow every single day and charlie thank you for writing software this good you know what you're doing man you know what you're doing unlike some developers most developers are junk you know what you're doing i'm not a developer folks okay so you could say oh you can complain about all the software but you can code yourself guess what folks i know what good work is and i know what bad work is and that's good work what i just showed you that's good software and guess what i'll gladly pay for it even though it's proprietary working on a proprietary system because guess what it's better than anything else out there prove me fucking wrong assholes who say use this use that you've never seen anything work that fast and if you tell me you're a fucking liar because i've used it all i've used it all and there ain't nothing out there that good all right and that's why i use mac os i want an efficient effective easy workflow and that's what does it for me you don't have any right to tell me to use anything else i'll use what i fucking want that works with my workflow the end i understand open source i understand free software i'm an advocate of it myself the problem is most of it is shit and that's why people don't want to use it get together get your heads out from up your ass all you fucking free and open software advocates and developers because most of you suck fucking balls most of you some of you are good most of you suck at what you do do better work and more people will want to use your shit and accept it because that's the truth you little fucking babies that want to cry and complain why is it 90 million years night software because your software fucking sucks boy little boy write good software and people will want to fucking use it most of it sucks that's not a blanket statement some of it's very good but let me tell you something show me something that'll grab videos that fast from any website you can't do it i know you can't do it because i've tried and i've used every platform the other shit that's out there sucks at it this is the best in class folks people say why do i get mad because i know what i'm doing and most people don't i understand what's going on and most people don't and then they want to cry and complain to me that they know when they don't most people are no-nothing bags of dumb fucking shit who don't know anything about the first fucking thing going on in the world and then they want to whine and complain to me like they do all right so that's downey next i'd like to show you library all right so we're done with downey for now i'm done with this youtube video even done with my website for now so i have a library account i'm actually going to log into it in a moment hopefully i remember my password but we'll get to that anyway this is the main library web page it's lbry.com this is blockchain based software that is specifically designed to taking back control of your content from youtube and they have here and amazon library largely has their act together they do need to improve their desktop software however it's a good start compared to a lot of other places okay bit shoot i think is also pretty well done the guys at bit shoot i wish you well what you're doing i think you're generally doing a good job you need uh some better uploading tools you need certainly need live streaming and folks i i you know i'm probably going to go donate to bitshoot for their live streaming project i think you guys should too we need a good live stream censorship proof platform for live streaming and bitshoot will be it i think libraries starts in you know working with their cdn providers and let's start getting uh live streaming done on there i'll i'll put the word out here let me do this folks okay if you guys start doing that i'll put the word out on my show because i care about content freedom all right let me go to bitch shoot bit shoot live streaming because there is a project for this and i want to show it to people we're going to do a lot of real time stuff today if things take a little bit or they don't go quite right so be it okay this is bit shoot dot com slash funding live stream all i did is type into a search engine bit shoot live streaming okay so it's bit shoot dot com slash funding slash live stream all one word okay so look at this terrible paltry effort on the part of bit shoots users first of all bit shoot has to make this put this on the front page a big banner right at the top on the front page huge in everybody's face huge right at the top of bitshoot.com and everybody's face you need a big banner there otherwise people aren't even going to know you're trying to do this all right bitshoot is trying to put together a crowdfunded live streaming service to compete with youtube's live stream we need this this community needs this bad really really really really fucking bad we need it bad folks i'm gonna donate i haven't donated yet but i'm going to actually probably later today if not definitely tomorrow okay so look at what they're trying to raise they're trying to raise a hundred and seventy six thousand dollars they need about two hundred thousand dollars to do this and that's nothing that's not i would expect that they needed a couple million to do this that's very low figure look at what they've gotten oh my god they've gotten a whopping twenty five hundred see this is where this community is a big bag of dog shit this is where it's a big bag of dog shit okay and this is the problem my users should be going there donating at least a couple hundred dollars to this project i might send them a nice chunk of money for this project these guys should be getting a couple million to do this they're asking for less than 200 000 to get this done and they'll do it you have no idea how important it is and how much the human population needs this where we're at and they've gotten a measly 2 2 586.23 so far that is utter trash that this is how much people are helping for a project like this and then people wonder why are they winning why are the globalists and and dirty nazis and trash commies winning this is why they're winning we don't put our money or effort where our mouth is folks i had to threaten to burn what on earth is happening to the ground to get the help that i have today that's what it took to just threaten us just stop and do nothing this is how lazy and and just just not wanting to put any willpower behind anything most people are especially in the freedom movement in the my freedom movement it's so sad it's so depressing it's so angering and maddening and then we wonder why we're getting our asses kicked you only need to look at something like this and you shouldn't be wondering every one of my listeners should be contributing to a project like this if you haven't already so we need things like that so i wanted to say these guys are helping avoid censorship and this will help avoid censorship via the live stream okay look at how many people donated 16 people do i look please let me blow that up real big all right look can you see that guys is that visible 16 people you think that's good enough you think that's a good enough effort to beat chinese-backed funded globalists in their efforts this is why they're beating the living shit out of us most people are just technology technology luddites and no nothings and that's why they're winning you want to know why the dark occult and the globalists and the chai comes and the dirty rat trash nazis throughout the world are winning that's why they're winning because you're sitting on your ass not learning a fucking thing and not helping anybody who is doing something and then why is my passion so angry i can't understand why this guy's angry fucking retarded fuck all right next i want to show you library all right so i don't have library installed on this computer we're going to do it in real time so lbry.com folks start understanding what it is and using it i'm gonna download it for mac os you can use it in your browser i don't recommend that i recommend the app all right sorry i got something on my trackpad let me get this off of here all right download from mac os boom there it is done as you can see i have an extremely fast internet connection i needed to host the show you know that's the other thing i go to people's houses they got such trash internet connections like you won't even put your money into that for yourself you know and then you think you're gonna do something you got trash internet connections you have trash for devices you only know how to go on facebook and spat some fucking garbage on facebook and nobody's listening you don't know how to make your own platform or content and you think you're actually gonna get something done using a phone on a garbage internet connection yeah yeah you'll get something done you'll get your ass done with your middle finger in it i just can't believe this is where we're at in 2020 folks it's hard for me to accept it's unfathomable the level of ignorance that still abounds not only about morality and natural law but in the technological space and people haven't made the connection yet that you have to understand technology in order to publish the truth to the world about morality and natural law the fact that you don't understand it makes you complicit you're complicit in your ignorance with the censorship measures with the totalitarian measures you said fuck it i'm gonna allow that to happen unchallenged i'm not gonna get involved in that battle let them do whatever they want let them take the world let them censor everything you're complicit and that makes you and more on that makes you involved in the crime if you're not doing something to solve it yes it does that's you standing there watching something someone be unrightfully murdered and doing not a damn thing because you're a coward you're a no-nothing and a coward all right back to a lesson in software because believe me you all the idiots out there need it you know what folks i i really have lost my patience as a teacher it's because people have not listened and really understood what i've said from day one you're largely most of you are failures i've said it last week and i'm going to keep saying it again i don't give a fuck who turns off my show i don't care about popularity i don't care about ratings i don't care about money most of you are failures most of you are failures and your ignorance and your failure and will makes you complicit in the evil happening in this world and i'm not going to sugarcoat it you're going to get more of a serpent tongue from me the truth has a fiery acid tongue and you will hear it you will hear it you're going to hear it here you might not hear it anywhere else but you'll hear it here so back to the browser i downloaded library it happened probably so quickly like i said if you blink you miss it because most people this download will go for like 10 minutes or more because they have shit internet connections because they don't care about actual publishing so they buy the lowest possible denominator and your internet works like shit on your computer or whatever you probably don't even have a computer you probably have some fucking tablet or phone my slab where's my slab i seem to have misplaced my slab oh don't worry folks we have more we have more comedy gems coming on what on earth is happening we're going to have some surprises coming next week in the week after that probably at least probably as early as next week that's all i'm going to say about that but we have some comedy gems coming to what on earth is happening so i downloaded it here's the software you know showing that it's completed download you can hit the little magnifying glass in firefox which i'm using there there's the library disk image i'm going to double click it it mounts mounting into the file system opens up a window to install it you could just drag this to applications i will drag it to my third-party applications because i have that set up all right it's going to install there it is right click open it can eject the dmg saying are you sure you want to open it yes i'm going to down trash the dmg sorry okay all right welcome the library can this app send information about your usage no do you agree to terms of service yes go this is library i hate light interfaces i'm immediately going to turn that to the dark interface that's what it looks like in dark interface i'm going to sign in with this little icon right here sign in take it away from uh yeah while i sign in thank you give me a moment while i sign in folks leave it away from the computer i have to uh grab an email in order to uh in order to um be able to do this so just give me one second they have a two-factor authentication on that requires email so just one second and then i'll i'll be in the library and show you how it works a lot of companies do this nowadays they have a two-factor authentication they'll send you an email and you're not allowed to sign in until you actually click on that email verification link to prove that it is your account so just give me one second okay i got the email i'm going to click the link in one second i'm doing this from my phone it's logging me in okay there we go i'm logged in you could switch back to my browser thank you my team does an awesome job here and i really appreciate their efforts so you know you guys make it go so much smoother here's the can you imagine folks let me tell you how stupid people are when it comes to technology when i wanted to start this show okay i had dumbfox writing to me going mark oh what do you need a producer in the room for why don't you just run the software on your own computer that's what you guys look and sound like that's how dumb you are could you imagine if i'm running all the production software changing camera modes imagine this what news anchor sits at their desk and and tells you the story and is sitting there going hold on folks let me switch camera angles could you imagine how what dumb bags of shit are out there and i say this not people go don't give them power folks these people are everywhere around us i'm trying to get you to understand how dumb the world is you don't understand how dumb the average fuck-tarted person is could you imagine someone knowing so little about how anything works that they say mark you don't need a producer in the room what did somebody got to come there for have him just you click the button this is how dumb you are my producer is acting as the live camera switcher in in the other software that's running on another computer in this room do you understand dumb fuck i would not be able to do that while i'm trying to deliver my slides my presentation read emails etc what news anchor do you see sitting at their desk running this camera switching software fuck dumb fuck you're so fucking stupid and people don't understand you don't get why i get upset that this is how fucking stupid people are and they don't know anything on how to publish a fucking thing anywhere except that i log onto facebook and clack away at the keys and then it's not even on keys they're in the fucking phone there's what you know how to do oh my slab here's my slab let me clack away on the slab that's what you know how to do you dumb fucks you're dumb fucks and you want to wonder why the globalist satanic dark occultists are murdering us it's because you're dumb fucks that don't know how to publish the truth dumb fuck that's why boy you got you got you're gonna get three hours hate today instead of two minutes back to library i'm logged in now i have a library account okay so you know i could click here hit channels that's my channel is at mark pacio all one word i click that this will show me my channel like a youtube channel here's the videos i've posted so far all right let's post the uh natural law a documentary trailer why not right so what it's gonna break the monotony of just posting podcast episodes all right so go write uh sorry not that one i would go right here see where i'm at here the upload button right publish a file or create a channel i'm gonna hit publish this is very simple folks there's no reason why anybody shouldn't be be learning it and using it it's not that complicated matter of fact let me just put this in full screen all right i'll hit publish choose a file hit choose a file i'll hit my downloads folder where i just downloaded that natural law documentary trailer all right so i can copy this um i'll just type it in natural law i'll say mark pacio and the science of natural law documentary trailer number one that's it you could put a description or not i will simply copy that to my clipboard and paste it there enter a thumbnail or take a snapshot from your video i'll take a snapshot from the video this will take a second there that'll work let me do that again i didn't pause it and just not put it in play mode let's upload that one that'll come out nice and clear there we go all right now here we can tag it so i'll tag it with um natural law freedom occult anarchy let me take out anarchy and just put morality okay very simple the channel i have made a channel so i'm going to use my own channel to post uh here you can make a different url i'm just going to leave it like that you could change the deposit in library coin i'm just going to leave it at the default that's advanced i'm not going to get into that okay i want the content to be free okay you can look at additional options the language or the license type i'll just leave those and hit publish and i'm going to hit view my publishers upload will continue in the background please do not shut down immediately all right it's pending on library i'll hit view publishers it's going to confirm on the blockchain and that's basically it it'll confirm and then it'll be available to play that will not be an immediate process but it will be relatively quick folks that's how easy library is to use if you're not using it you want youtube to take over the world okay you want google to just censor everybody and take over the world it's not that hard folks it's not that hard i'm just going to show you you could even go on library and you can embed from library okay so let me just quickly show you how that works right so if you upload something to library it's viewable in a web browser right so if i go to lbry.tv that is that is the actual library platform lbry is where you get the com is where you get the software okay so you get the software from dot com but the content is available on library.tv okay so we're on library.tv now okay i'll sign in take it away until i sign in i have to sign into this browser i'll have to confirm another email just give that a moment and then i'll be in on the browser as well take a second for the email to arrive so i'm going to show you that you could even use this as a content delivery network platform or cdn the library uses a cdn and you could embed in your own website upon uploading to library and not have to rely on youtube i will be using this and not relying on youtube anymore over time alright the email just came in i'm going to sign in all right it'll take a second for it to establish the connection in the browser it just did it you can go back to the browser great okay so i'm gonna look at uh i'm going to look at uh my channel okay and there you see that my video has finished publishing it's possible that it is still processing no there it is it's playing okay yep no no not yet yeah i i will get to that because we're gonna my producers reminding me i haven't showed people uh the workarounds that i wanted to show them regarding how to get their go around censorship efforts the second section of today's show is going to be on that okay so i just want to show you um you know you could uh you know play the video okay are there any universal laws in effect you get the idea but watch this okay i can sorry human behavior i could right click here and i could choose view video here is the magic of library folks most people don't know how to do this okay and you could you can embed i mean i guess there's a share here and that'll just get show you the link but let me just show you this okay is this the embed yeah that's the embed they'll let you embed with iframe like that okay so you can embed right from there okay so i'll show you how i did that once again you can hit share here these little tag icon right there hit that and it'll give you the embed tag that's the whole embed tag right there you can let me just expand that you can copy this and then you could paste that into your web page to embed there's an even better way i think to embed you could right click and choose view video that'll show you the mp4 video by itself and this is a little advanced okay but i think it's worth showing people see this url here you can go to the end of it and just tack on dot mp4 so look at right here where i'm at right i tacked on dot mp4 up there at the end of the url hit return that'll take you to the same video right but now this whole url you can copy and you could embed that in a traditional html5 video embed tag in any site you want to embed it in okay for those who understand that again that's a little bit techy and advanced but that's how you can use library use their own cdn see this is pulling from cdn libraryplayer.exe up here in the address bar and that's a permalink that is a permalink and you could embed directly with html5 without iframes that way that's a excellent method okay hopefully that will not change the guys at library don't change that that's awesome you are doing a good thing with that leave it like that please okay it's very well implemented it's helping you're helping keep helping keep it like that okay you're doing good you're doing well all right so that's library folks learn it use it okay let's help them to get streaming if you guys build a streaming platform i'll help promote it okay because i understand what you're doing and why and it's good bit shoot same thing okay we need to get more people helping you guys get the streaming platforms up and running you're off to a good start though all right this is what helping really is in the effort to get the word out folks it's getting up off your ass and doing something let me tell you something these guys are doing something all right so that's library that's all i want to talk about there all right let's go back to the computer and i want to show you a couple other things i'm going to quit out of library now i want to show you what to do if you can't run an app and this is pretty advanced okay the first thing you got to do is you got to get gatekeeper turned off okay so let me show you what gatekeeper on the mac is this won't apply to windows people or linux people and guess what i'm going to take the time to explain it because i think apple has been the biggest rat fascist trash on the whole computing sphere of influence and that's why i'm going to take the time to tell people how to do this here's how you turn gatekeeper off on the mac here's where it is it's in system preferences how did i get to that apple menu system preferences conversely you can go into the main applications folder with the go menu like that and scroll down and open system preferences okay that's simple all right get system preferences open you go into security and privacy now in here under general there will be usually only two settings here allow apps downloaded from the app store or apple store app store and identified developers you see mine has a third option anywhere i have enabled that through the command line or terminal of macos okay most people don't even have that option anymore because apple is trying to bring the same hitlerian fascism to the mac that they have already implemented on ios and ipad os and we need to fight against it because it's immoral and it's all about censoring feature sets that they don't want on your computer and that is criminal racketeering and monopolization and apple needs to be forced down from those policies forced by an act of our will because they don't have the right all you trash to think apple has this right you're fucking trash and you don't know morality would have sided with the dirty corporations like ig farbin that helped the nazis you're no different you're just corporate scum instead of communist scum that's all you are and that's what fascism is oh it's all socialism folks it's just the difference between national and international and if you don't none there call unders conspiracy by gary allen which if you haven't read yet you know you got liquid shit between your ears all right none dare call it conspiracy by gary allen if you haven't read that book as a primer for what's going on in the world it's no wonder you're a no-nothing piece of dirt so here's how you disable gatekeeper first of all you have to enable the root account all right so let me open the terminal and again this is tech world here so i'm going to get techie on you let me make the terminal a little bit bigger the the text a little bit bigger let me run this because i do want to update the terminal can you uh take it away so i could it's not going to show my password anyway but yeah thank you all right let me clear and then you could put it back on so i'm at i'm at the shell for my in my account uh mac os is built on top of unix i just want to make the um i want to make the default text a little bit bigger so it's easier to see just give me a second and i'll do that let's make it nice and big so it's easy to see and reopen all right let's open a new terminal window okay you can go back to it thank you okay great all right so it's a little bit easier to see okay so to enable the root account at all on a mac you have to type s-u-d-o space p-a-s-s-w-d space root this will enable the root account my root account is it'll ask you for your password then it will ask you to set a root password okay so i've already done this okay my root account is enabled but that's the command to do it sudo password s-u-d-o space p-a-s-s-w-d space r-o-o-t then hit return it will ask you to authenticate your account password you have to put your own password in then it will say what do you want the root password to be you'll have to type a root password and then it will ask you to confirm so you'll put your own password authentication in first for your own account then you will set a new password for the root user account once you have root access then you will be able to disable um gatekeeper as a matter of fact you can do it without doing that that's actually an additional step you could use the sudo command to do this and then it will it will disable gatekeeper with your own password i don't think you even need to enable the root account but if you want to enable it you could do that okay so uh that here is the password to turn gate the not the password but the command to turn gatekeeper off i'll actually post this in a document with the podcast okay the command that turn gatekeeper office sudo space spctl space dash dash master dash disable okay so i'm going to copy that to the clipboard i'm going to paste it in and i'm going to hit return it'll ask for your your account password you could type that in that's okay it won't show it in the terminal okay and you could see it took the command the next thing is to prevent gatekeeper from rearming you type this one in it's long i'm not going to read it i will post it with the podcast okay copy that paste it hit return you'll already be authenticated and it's done you will now be able to run third-party software from anywhere on a mac if apple removes the ability to do that at any future point i have to consider them a completely locked down platform and then truly consider moving to windows or linux because uh it's only because these commands still run that i can run software that i want to run on my own property not apple's property on my own property to all the and cap ass holes that think apple's doing this with their property no they're doing this with other people's property asshole and you guys need to understand that so next i'm going to show you at the command line how to force code sign an app so let's say an app was not apple decided in their infinite wisdom to revoke a signing certificate okay you're going to take this command how to force code sign an app right and this is here the the path to the app all right so let's say downey stopped working all right you could force code sign it so i'm going to show you downey actually i'm going to move downy to my desktop here's downey 4. let's say it was on my desktop let's say i double clicked it it didn't launch because its code signing certificate was revoked first of all you need to download and install apple's command line development tools or you will not be able to do this because the code sign program is part of apple's command line development tools all right so to get them you have to go to developer.apple.com and download from their tools uh let's see where it is you gotta sign into your account uh take me out so i could sign in let me know when you can switch out there we go okay and i'll sign in here give me one second i'll let you know when i'm signed in there's two-factor authentication it's verifying it all right you could switch back in okay so this is apple's uh software for developers you're going to have to hit this link more right there and then in this list you want the command line tools for the non-beta version of xcode i don't recommend using the beta version so you're going to look down here right here is the most recent non-beta command line tools for xcode 11.5 i've already downloaded and installed those so i'm not going to do that again okay but um that's what you would have to download and it's a package installer you'll run the package and then you'll have the command line tools for xcode okay once you do that then you can enter into the terminal the command that i was previously showing people i'm going to go back you can code sign force code sign an app so this is the base command right here pseudo code sign minus f minus s dash dash dash deep right so i'm going to copy that to my clipboard right right click copy then i'm going to paste that in the terminal now i'm going to put the cursor at the end and i'm going to put a space and then i'm going to drag the app from wherever it's at right onto the terminal and it puts the path that's it and then i hit return all right it's going to deep code sign the app and that's what you would do hit the return key to view the license agreement you have not agreed to xcode okay i i would have to actually agree to the license agreement for xcode so that's one of the reasons that uh you know it's a little bit longer of a procedure you have to um hit the return key to view the license agreement okay let's see what happens okay software license agreement i have to go to the end of this and then agree to it okay by typing agree yeah okay it agreed and then it for it code signed it okay so that's it the app was ad hoc that's called ad hoc code signing and folks this is pretty technical but for the viewers out there who understand what i just did okay you can circumvent apple censorship policies like that on apps that they don't want running on your property imagine this apple's now reaching into my computer and telling me what i can run you fucking rat nazis you are nazi trash who had horror fucking mother nazis for trash parents and a rat fucking nazi father that's what you are cookler and everybody thinks you're such a great guy oh cause you you put the iphone an ipad and you talk in a nice awful voice you're a piece of nazi trash cooker so you won't stop me nazi you won't stop me communist you're not going to tell me what i can do with my own property in my own body you're not going to tell me what i can put out what information i could put out once they fully come and take the first amendment the second amendment is getting broken out and used know it like you know your own fucking name it should already be done it should already be being done that's all i have to say now admittedly most people are not going to know how to do anything like that all right but there it is you'll have that i'll put that in a document a simple text document i will put it in and you will be able to understand how to turn gatekeeper off and how to ad hoc code sign you will need the apple command line development tools so this is part of you know a show on getting around internet censorship and the censorship of the nazi trash at apple because that's what you are you would have been good little nazi trash in nazi germany during the third reich you would have been excellent nazis and all the people supporting what they're doing you would have been great nazis you rat fucking trash with rat fucking trash for parents let's go back i want to show people another excellent resource this is called unblock it and they do something that's very smart to keep the sensors from being able to track their um hosting providers they change their domain pretty much every month or two which is a great idea so they used to be on unblock it dot one o n e now they're on unblock it dot win so unblock it for the win okay unblock it is a site that tracks all of the deep web websites so everything on here is deep web which means it is unindexed by the major search engines how a search engine works is it goes out it sends a little web app out on the internet that does what's called spidering okay it spiders a website and it basically indexes some of the content namely the major text on a web page and then it indexes that in a big database which is the search engine and then it has algorithms to search through that data and bring back web pages that are clickable results most people should understand that that's how in general you know without going into a really technical explanation how a search engine works well all a search engine needs to do to basically block a website from being reached from them from their web page in other words all google would need to do to prevent people from ever reaching a website through google is to put into their search engine program algorithm the code of their of their search engine app do not index this top level domain the spider should just not visit it therefore none of the text will be captured and nobody can search it and that's it the end and then you don't even know it exists dumb fuck right that's all all the dumb fucks who don't know that there's more to the internet than what google shows us as a matter of fact do you know how much of the internet conservatively google shows us about seven percent and some people say it's less than that it's five or three percent the dark web actually constitutes between 93 and 97 of all content available on the internet let me say that again folks because this is how dumb people are that they don't even know this the dark web meaning unindexed content that search engines do not index accounts for and comprises between 93 and 97 of all content available on the internet think about that for one moment and that's true that is those are true statistics look it up and understand what that means that means that you are prevented from being given search results for a pro over 90 percent on average 95 of all the available data on the internet and you wonder why people aren't enlightened you wonder why they're not getting it they don't know how to get it because all they know how to do is grab muslab let me grab my slab and thumb some garbage into it like the dumb fuck that i am and then google's gonna show me what's out there facebook's gonna show me what's out there i'm gonna have some nice comedic things for you guys that i'm talking about you luddite dumbfucks out there that that you rely on muslab why don't you just strap it to your fucking head or better yet strap it over your fucking mouth as a mask so we don't have to hear the fucking liquid sewage that pours out of your gullet so for those of you who aren't muslab users there's such a site called unblockit.win that you can go to and you can get 95 of the content that no other search engine will show you it is available you will need to understand how to use bittorrent for most of this which is the big section at the top torrent sites not going to go into them individually there's not enough time for that streaming sites for people who want to post content like movies films tv shows even documentaries if you're into sports you know and not paying attention to what's really going in the world knock yourself the fuck out direct download sites which can contain books software etc music downloading and the most important you know there's adult content down below for people that want to click into there i won't do that but this is one of the more important aspects the book downloads okay yeah uh yeah of course you know blocking ads you know my producer's pointing out you could download you block origin which i use that gets most uh advertisement off out of your browser okay you can white list sites blacklist sites you could block individual content individual sections of sites if you want but from unblock it i learned about libgen i was very late to the game with this okay and there's some other good book sites but let me i'm going to show you libgen because it's incredible as a matter of fact before i do that i want to mention first of all you know you could download things from pirate bay lime torrents you know whatever you know you can go to uh tons of torrent sites here okay uh torrance magnet dl you know there's mirror sites for kick ass etc okay and you can knock yourself out to your heart's content garbage is a pretty good one as well okay but i want to show you my favorite bittorrent website all right so let me show you bittorrent again we went over this as well all right so i like the the bittorrent client known as transmission so if you type transmission bittorrent that's t-r-a-n-s-m-i-s-s ion transmission like a car transmission bittorrent b-i-t-t-o-r-r-e-n-t very simple just type that in okay and you could get what i think is the best bittorrent client on any platform which is transmission so you can click the download page for transmission there are other great clients out there like deluge you know there's the official bittorrent client you know there's views some of them are better than others i like transmission on both mac and windows but um you know some people you know will like different uh bittorrent clients all you got to look at bittorrent as folks is a very very simple downloading app that's it it downloads apps from other links sorry it's an app that downloads content from other links those links are called torrent links or magnet links okay torrents are actually little files that contain pointers to the these downloads that you want to get which is essentially forbidden content that other websites won't index or let you share okay and what you are doing is you are using what's called a dht a distributed hash table now that's getting technical again so don't worry about the jargon all this means is a way of getting to content that someone else is sharing in a pretty technologically complex way what's coming and is already really here is dht search engines so we don't even need trackers or or sites that host torrents or magnet links okay but i'm going to show you my favorite transmission client program and my favorite transmission tracker which is consent.org okay so all you would have to do is click here download uh let's go back to the web browser download transmission okay it'll give you transmission for your platform you install it all right i've already installed transmission so i'm going to open it this is what it looks like it's a very very very simple interface okay it's just a downloader that's all it is all right now i'm going to take you to my favorite bittorrent webs related website which is consent.org so that's c-o-n-c-e-n dot o-r-g con sen.org when you get there this is basically what the site looks like okay and you are going to want to click right here you don't even have to make an account you can if you want if you want to upload you do have to make an account but that's more complex you just want to download hit torrence right here t-o-r-r-e-n-t-s torrents this is going to show you the list of available torrents on consent okay so i haven't downloaded this one this is a new escape the matrix with david ike one of my favorite researchers okay who i have tremendous respect and admiration for for his deep research and courage i am going to you can download it as a torrent right there which will give you the little pointer file i like to use the magnet link the magnet link to me is even more advanced than the torrent that's this little magnet okay the magnet can never really be censored torrents are files that you have to download and insert them into your torrent client a magnet is a link that is associated with the torrent client you can post the text of the link anywhere for example if i wanted to share this anywhere on the internet folks i could right click on this magnet if i right click on that magnet and i choose copy link location right there i have just copied the torrent link the magnet link i'm sorry i that it's the reason bittorrent is uncensorable because of magnet links is this it requires no server technology magnets once they are anywhere on the internet they are essentially immoral immortal the magnet protocol not immoral immortal okay they can last and live forever as long as people are sharing them or what's called seeding them okay so let me paste this into a text editor to show you what this link looks like this is essentially what is known as a dht or a distributed hash table value that's all it is i want to make this plain text and make it bigger so people can see what this is all right it spans four five lines okay but essentially that's one link so this whole thing is one link all right so if you send that to anybody in the world and in any way they can get that episode of david ike's season 1 episode 11 of escape the matrix okay that link right there that's the magnet link all right so if i email that if i post it in a forum if i i send it you know in a compressed file in a text file or i send an attachment a text file doesn't matter any way you you could you could text that on your slab to anybody you want okay and then they will be able to download it as long as they have a bittorrent client all right so i could copy and paste that into my bittorrent client all right so if i copied that and then went right here and just pasted it'll start to download all right i want to do it the traditional way which is just click on the magnet link that will send the data right to transmission it will do what's called um demagnetize it means it's getting all of the data that it needs for the download to begin and then it will begin downloading from whatever peers are available meaning other people that have the file and you'll see it'll take a moment but that'll pick up steam and then it will download and i will be able to open that while we're doing that i will do a couple of other things the first is my producer just informed me that i did not mention we are going to be sending out a new what on earth is happening newsletter uh this month so if you want to get on the mailing list for the newsletter which we're going to send out in a couple days go to what on earth is happening dot com slash newsletter i'll type that in manually uh sorry it's not newsletter it's mailing list i think it's mailing dash list let me just find out i'm sorry it is mailing dash list what on earth is happening dot com slash mailing dash list conversely you can simply click the icon let me go back to the home page you could also click the icon it's a little way down the page here right above social media it says what on earth is happening mailing list you can click that and that'll take you to that page but that's the url what on earth is happening dot com slash mailing list also folks i made my entire site secure socket layer i really should have done that a long long time ago i only made certain pages with form data ssl most websites are just going full ssl uh that just means better uh client to server security measures uh so that you know you're interacting with my website and it's not a counterfeit site and your data isn't being intercepted on route my whole website is now ssl secured so you know should have done it a long time ago but finally got around to doing that on the entirety of the site instead of just certain pages just wanted to mention that but if you want to get on the one on earth that's happening mailing list you know we're going to be sending out a new newsletter this week so that's the site to go to if you want to do that very simple you just put your first name last name and email address um if people put fake data in here i will find your ip and ban you from the whole website forever just so you know i don't play fucking games i'll find your ip and you'll be banned forever the end that'll be you'll graduate from hacienda university it'll be hacienda u for you all right that's how that'll work uh so back to uh transmission you could see it's downloading while that's doing that i want to show you one of the greatest resources on the internet which is libgen so everybody should know unblock it dot win spread it everywhere okay unblock it dot win they will not censor us we will continue to create this will get bigger and bigger and bigger and bigger and more sites like this will come up the more they try to censor internet content you will win nazis you will win communists you're not going to censor the truth you can try all you want a thousand technologies will rise and we will continue to put the word out that being said here's one of the greatest areas of the internet that i have ever discovered and use every day from learning about it on unblock it when i learned about that this is libgen library genesis the site is libgen.is okay there's many mirrors for this you could find just about any book that you want to look for okay you want to download jeremy locks the end of all evil type jeremy locke end of all evil hit search not did not come up could it be it's not mirrored here oh i spelled it wrong it's l-o-c-k-e there it is there it is in pdf and e-pub format okay so be be careful with your spelling you pretty much do have to be precise all right but you name the book it's there all right they don't want you to know about this because you start reading the right books you're going to awaken and they don't want you to know about it all right so let's say i want it in the pub format i'm going to click this link please go back to the web browser i'm going to click this link right here right that will show me where this book is available as an epub which is an electronic publication meaning flowing text not static text okay i like to click this link right here libgen.lc which is their basically their cdn where they host their content by the way let me just show you this again this section called mirrors you can read all the metadata about the book over here but this section right here is mirrors that means places that it's available for download that's these links across the bottom okay and you can see it's available in other protocols torrent direct connect e donkey nutella you know old old school file sharing protocols torrent file right there and other mirrors okay actual direct download sites i like to use libgen.lc you can use whatever you want okay i find this one very efficient hit this get link the epub will transfer to your computer that's how fast it finished you hit this magnifying glass here's the book i can right click choose open that'll open in books i could also go to open with open it in other content we're running out of time here's jeremy locks the end of all evil i'll make that full screen just to show you it is the full book uh something's wrong with this one yeah there it goes the the the first couple things were a bad flowing um table of contents but the whole book is here okay so you can read that like that you want to download none there call call conspiracy by gary allen let me minimize this and go back to libgen none dare call it conspiracy gary allen here it is going to show people the uh epub version i'll download it from libgen.lc we're rapidly running out of time we're going to get cut off by the outro in a moment there i downloaded the book show it in the finder see if i can get it open before we're cut off there it is folks this is how you circumvent internet censorship go back to it real quick i want to just show you the david like book the david like video is almost finished okay there's the whole none nundar call conspiracy let's see if i can get this if this finishes ah now we got cut off well it's going to finish in a couple seconds folks but there you have it that's all the time we have for this edition of water earth is happening i hope you learned something really powerful on today's episode because folks i hit you with some internet gold on this episode if you understand what i just showed you we'll see you right here next week and remember government is slavery you

What On Earth Is Happening Show #235

Topics: *Questions & Clarifications Part 4 For Real This Time, Request to be respectful of purposes for email links given over the air, Big Tech and it's continuing Fascist policies, Proper emotional responses in an age of Deception and Tyranny, Not feeling angry at the injustices taking place in our world means YOU are Spiritually BROKEN, Mask-wearing CLOWNS are all around us, Low-level Satanic front-groups like the Church of Satan are recruiting-grounds for psychopaths to be groomed into higher tiers of the global hierarchical network of Dark Occultism, the so-called "Freedom Movement" doesn't worry the Satanists who rule our world at all, Dark Occultists see the "Freedom Movement" as CLOWNS, Introducing BOBO Da Clown and his musical accompaniment, BOBO is the CLOWN GOD the People of Earth deserve, Our whole world has "Jumped The Shark," Private publishing is completely different than offering services as a Public Utility Platform, Saying "If you don't like Apple's criminal behavior then switch to Linux" is identical to people saying "If you don't like how things are being done in America then leave," Agape (Love of Truth) is how one develops True Authenticity, Importance of the correct order of Truth-Love-Freedom, Secret Societies and Fraternal Orders, the One Great Work is not for other people but for the Love of Truth and the Love of what is Right, the Scamdemic is filled with Satanic symbolism, Why is Sweden not under lockdown?, Australians got Clown-Shoed into giving up their guns, Satanists are winning because the average person refuses to understand how basic co-creation through Moral Behavior actually works, Richard Wetherill's writings on Natural Law and Morality, the Biblical allegory of choosing Barabus over Christ, the Self-Defense Principle is still not fully understood by most people, Violations of one human being's Rights are violations of ALL human beings' Rights, ALL People should and must exercise Personal Responsibility for their own Self Defense and NOT leave it to ANYONE else, least of all totally corrupt institutions, NOT doing that is the very Reason why we are in Bondage.*

freedom man that's what it's all about you've got to groove on freedom like the good book says [Music] welcome you are listening to what on earth is happening this show will discuss the topics of human consciousness mind control natural law the occult and all issues that affect the freedom of the people of earth what on earth is happening will endeavor to shine light upon the darkness of our world and to offer empowering solutions to the problems we face as humanity approaches it's critical moment of choice and now here is your host mark pascal [Music] welcome one and all you're watching what on earth is happening i'm your host mark pascio my website what on earth is happening dot com ladies and gentlemen government is slavery and here on what on earth is happening we are ending slavery one mind at a time thank you for tuning in everyone this is episode number 235 of what on earth is happening today is sunday august 16th 2020 we have a great show lined up for you here today you guys are going to be making the bulk of the content for this show this is question and clarification show number four for real this time we didn't get to questions and clarifications last week because i sort of went off on a rant about apple and the tyrannical practices in the software community that they are enacting and that people have no idea what they're actually doing and uh are often even picking up for tyrants you know and saying that uh this corporate tyrant should be allowed to just run rampant all over people's rights it's uh it's deplorable and it's inexcusable in today's digital information age that people would not understand what is actually going on in that realm but there you have it we're we're a totally ignorant society you know so let's go over to the slides i have a few housekeeping tasks to take care of again this is questions and clarifications part four we're going to do series of these question and clarification shows from time to time on what on earth is happening i do want to get into some deeper elements of the occult world in future episodes i may be actually doing some teaching sessions on things like rosicrucianism thelema things like that uh things that i haven't i feel covered as in depth maybe some uh segments on theosophy etc i want to do um whole segments on psyops and you know looking at how to pick apart a psyop operation specifically the ones that talk about hitler being a good human being that was trying to do wonderful things for the world the founding fathers being treacherously evil people who just wanted to help the crown take over the world um the flat earth psyop you know the q psiop etc you know that so many people have bought into all of this nonsense that gives the truth community a totally bad name so these are things that i'll be pursuing on future editions of what on earth is happening quick housekeeping duties uh you can still donate to help complete the documentary called mark pacio and the science of natural law we are still on course to release this hopefully by the end of the year there's five donation tiers at gifts.what on earth is happening dot com one hundred percent of all donations go directly to production costs all donors receive a complimentary copy of the completed documentary on flash drive and dvd that is what the shipping cost is for ladies and gentlemen many people uh do not quite understand that uh if you're going to donate for to receive the free documentary once it is complete again you will not be getting that immediately you will be getting that after we complete it that's what the donation is for to help us to complete it some people didn't quite understand that and are expecting the documentary immediately the documentary is incomplete folks the donation is to help us finish it to pay the video editing cost to finish the documentary after it is complete you will be the first to receive it on flash drive and dvd and that is what the shipping cost is for that is all you are uh you're you're paying a shipping cost in addition to the donation okay so you can make that donation if you want to be on the very early list of people to receive this documentary once it is complete gifts.what on earth is happening.com please don't donate for it at the regular donation page if you want to receive the documentary after it is complete by making a donation here go to use the donation link at gifts.what on earth is happening.com also at gifts we have new t-shirt uh both short sleeve and long sleeve up there for mark pacio and the science of natural law we have new flash drives this flash drive i'm going to make public this week actually though um world view violence on the real pandemics is coming out of the store exclusively and it's going to go live on youtube this week and then of course the complete mark pacio one great work collection on a 500 gigabyte solid state drive it's everything that i've ever released publicly on one drive it's a very popular item on gifts.what on earth is happening.com thank you for all who have donated there what on earth is happening continues our proud cooperation with autonomy you can check out autonomy's website at get autonomy dot info also please click the banners on the waternearthishappening.com website at the top of the home page to check out autonomy unlimited and their course that they offer and then on the side uh near the social media links you can click the button for autonomy and that will take you to their book called 19 essential skills for success not taught in school so please uh check out and support our partner autonomy unlimited uh the brainchild of richard grove from tragedyandhope.com the how to become the true media is going strong i think we had a very great class last week this week is class number seven out of 23. uh that's going to be this tuesday august 18th the webinar begins at 7 pm to allow people one hour to come into the class class instruction starts promptly at 8 pm eastern time please be on time or you might miss important information that will not be repeated keep a notepad handy for notes and questions and headphones are recommended if you want to interact with the class namely to ask questions so that no feedback or echo happens if you have any technical problems or any other problems with the true media seminar please email truemedia at whatonearthishappening.com i want to say something else very briefly about emails if i give an email out on this show ladies and gentlemen please respect what we are asking you to use it for okay we get emails that are adding a lot of signal to the noise okay um if i say that we're trying to get help at what on earth is happening and for help you should email my assistant leah if you're qualified don't send liam notes for me it's rude it's not what we're asking for and you make her job harder plus i'm not fielding emails that way you're not going to reach me that way okay the end those emails are going in the trash do you understand i don't want to be mean about it folks but if i asked you to send relay emails to my assistant instead of people who actually want to help what on earth the water on earth is happening effort then i would tell you to do that don't take it upon yourself to clog up my assistant's email address with your hopes that she's going to forward stuff to me because it's not going to happen i'll get i'll let people get a hold of me who i want to get a hold of me do you understand okay if you don't honor that request and you want to be a dick about it then your email goes into a block list at the server end and we never see your communications you could write to your heart's content it will never even be seen all right and again i don't want to have to be that asshole but i will all right that's how it'll work so if i asked you to use an email for a particular purpose and you don't use it for that purpose your email is going in a block list that's it we're not taking any crap about it if we ask you to use an email for a particular purpose stick to that purpose or your email will be banned on our servers all right that's all i have to say about that okay the other thing is people have been putting leah's email uh in the you know we've been advertising a volunteer section on the website and people have been reposting this to mainstream job boards like linkedin don't do that we didn't ask you to do that we asked you to find people by word of mouth not by posting where people internationally are going to be thinking that this is a paying job we're asking for in-house volunteers for the enormity of work that we have done here we don't want people from linkedin coming in from china and south korea and wherever else asking us oh we'll do this work for you for this much money you know first of all it clogs in our boxes you're not making it any easier for us to get help you're making it harder i don't understand why people don't understand things like that it's like you think you're helping but you're not you're not helping so don't do that don't post our email addresses on big public mainstream media mainstream job boards it doesn't help it adds noise to the signal it's dross okay and we're looking for the wheat and to separate that from the chaff and the dross and you doing that doesn't help us it makes our job harder and you should know that you shouldn't be naive enough not to know that okay people should know that in today's day and age you shouldn't be that dumb and naive i'm very happy about this technologically this is a big announcement actually okay i told everyone i was on library and i've been using a channel just mark passio okay i made a new channel called w-o-e-i-h for what on earth is happening very short uh url library dot tv slash w-o-e-i-h okay we are in the process of uploading every single piece of what on earth is happening content see folks let me tell you the difference about how i do things okay we're getting off of youtube entirely that doesn't mean i won't be posting to youtube but my entire website will be youtube censorship free we will not be depending on youtube for a damn thing because fuck you you nazi sensor scum that's what you are you trash your nazi censoring scum trash who came from nazi censoring scum parents this your parents instilled this trash garbage in you they're as much of nazi trash as you are people who work at youtube your nazi scum trash so are all the people at facebook so are all the people at twitter who work there you're nazi trash that's what you are and that's what your fucking parents were trash all right and you know what for the people just to as an aside the people that say i get too angry you don't understand where the anger is coming from because you're spiritually broken that's what's wrong with you there's no problem with me folks i'm perfectly fine this is the proper emotional reaction when dirty rotten nazis and communists are censoring the truth that anger is a perfectly valid reaction it's the proper state of mind to be in you're broken if you can't feel it there's something wrong in your heart mind and soul you're fucked up not me i'm working perfectly fine that's the proper emotional response you're the one who's fucked up and broken alright so if you don't like the anger shut the fucking show off i don't want you you're the fucking dross that's not who i'm looking for i'm looking for people with willpower who understand why i'm angry and they're just as angry as i am if you're not that you're one you don't understand you might think you understand but you don't have enough information you're a little fucking naive child who thinks you know and you don't know son you think you know and there's a difference between thinking you know and actually knowing so don't tell me about i have anger issues no i have the proper emotionally emotional response to what's taking place in this fucked up world you're broken boy you're broken little girl not me let's get that clear all right so moving on library.tv we're uploading all of the content from day one and you know what folks i have it all i download everything i've ever done no matter who has it okay so this way nothing can be censored we're in the process already of moving content over the library and you can see in the news section and on certain videos already they've been moved to library we're going to continue that day day in day out week in week out we'll do it as we have time okay and everything will be converted over to library cdn this way there's no more censorship it's not even possible okay and guess what if somebody else's channel gets taken down and you can see that has happened other people's channels have gotten taken down i have all that content backed up locally you you won't stop me nazi trash you won't stop me you won't stop this one okay and the people who don't understand my anger you're worthless and i don't need you we don't need you the true freedom movement doesn't need you boy it doesn't need you little chump girl doesn't need you punk we're going to move forward with our willpower and true knowledge and we're going to leave you the dross in the background where you belong because you're worthless you're worthless and you're no-nothing people your people who think you know and you know exactly fucking balls squat is what you know okay if you want to call in today's show to ask questions or request clarifications you can call in via discord we're going to do most of the show via discord and then we will take some questions via email the discord link what on earth is happening dot com slash discord to join i highly recommend the discord app with a set of usb head a usb headset with you know uh over-the-ear ear ear buds earphones and a microphone okay that's the best way to do it all right it's it's folks it's twenty dollars okay anybody interacting anywhere on the internet should have one of these look look at it this was third the this set oh my god it was a little more expensive this was a whopping thirty dollars whoa whopping thirty dollars right people don't wanna even invest a little bit of money in their setups to get a you set a usb headset with it with them uh you know earphones and a microphone built in you plug it into the usb port and you're done and it's pretty high quality and it works very well send your questions for the show to questions on earth is happening dot com that's questions dot what on earth is happening dot com all right i will probably not be going over too many email questions today but i may let's see how it goes i'm going to definitely be getting to discord calls momentarily have a couple more things to go through let's uh bust on the mask wearers and the idiots who believe the coronavirus psyop bullshit okay let's bust on them for a little while i think that's good use of our time and let's make it really comic today because i'm gonna start taking things in a very uh sarcastic comic direction to try to alleviate some of the anger that is continually blowing up in me all right so corporations are destroying our country says the non-player character wearing a fucking mask and then the person who sees things clearly says yet you trust the corporate media and corporate medicine and then jackass non-player character on the left there gets angry because he's seeing his own internal contradictions what a fucking clown he actually is what a fucking imbecile okay and i'm talking to all the fucking people who bought this psyop and her mask wearers and are buying into all the fear-mongering and fear porn of the mainstream media you're fucking clowns you're fucking clowns all of you all of you you're no-nothing clowns you don't know how you don't even understand the mainstream media are paid intelligence agents dark occultists liars you know you don't even understand operation mockingbird you know you don't understand how all the deep state intelligence agencies work to get you believing lies and psyops you know your imbecilic clowns imbecilic clowns that's all you've ever really been who think you know and you don't know shit about what's going on in this world not shit it's just as easy to buy a scientist as it is to buy a politician amen you think mainstream science doesn't take payoffs here you know who the assholes are who think this dumb shit that scientists can't be bought off people who have never worked in scientific institutions that's who you are you think you know about what goes on in scientific institutions and you've never worked inside one folks not only have i been behind the corridors of power of government banking military police every mainstream institution on the face of the earth i've seen behind the corridors of power of ostensible power i've worked in a scientific institution how many people can say that they've done that i've worked in a university i've worked in an ivy league university's medicine college that's what i worked in i worked at the university of pennsylvania's school of medicine in their information services department fixing computers in their laboratories i got a very first hand look at what went on and folks let me tell you something i had access to all of their documents on all of their computers in all of the laboratories including the laboratory heads i saw everything they do and when i'm telling you it's as crooked as the day is long and it's all funded by junk money by blood money coming in from the government to fund junk science to continue to put out the prop propaganda and the narratives that they want the mate the public believing that the mainstream media keeps shitting out to the public shitting in their mouth and they keep regurgitating so don't tell me scientists are some noble entities that can't be bought you want to know the ones who are really speaking out and don't care they don't care if they get censored they're the ones who are more likely to be telling the truth they don't care if they lose their tenure they don't care if they lose their job they're not about it for the money they're actually trying to tell the public the truth that's who i'll be more apt to listen to and investigate their claims so don't tell me unless you've worked behind the scenes which mo 99.999 percent of you haven't okay you talk out your ass because you think you know how it works and you don't know how it works you just say you think you know how it works you don't know shit boy the mask is just a fashion statement for those who find obedience fashionable exactly exactly let's give this person a standing ovation okay because that's exactly correct that's what this is about obedience which isn't a virtue let alone a fashion statement okay it's it's certainly not a fashion statement but most of all it's no virtue and that's what these people are obedient willful slaves your obedient willful slaves and the ones of you who should know better based on the information you have been exposed to you're even a worse situation than the dumb ignorant scum out there who don't even want to look at the information you're in a worse situation because you should know better trash most of you are going to feel so foolish and childish and you should already the problem is you should be embarrassed and ashamed of yourself for not feeling like a foolish fuck already you know who have bought into this shit because coronavirus is just this slo-mo 911 that's all it is you know be in fear hate your neighbors implement the trace act don't question the government accept all new surveillance measures fauci is god you know trade your freedom for safety this is the new normal trust everybody on the mainstream media and let's fight the invisible enemy that can will probably never be able to be conquered just like the so-called fucking terrorists who did 911. you know you're the same jackasses who believe the media narrative about 911. fucking retards is what you are okay as a matter of fact you're not just retards let me tell you what you really are you know what all the people who buy into this fucking nonsense and psyop you know what you really are you guys are clowns okay your clowns but you know even more than clowns you're religious you are a religious cult member you're a religious cult member okay and clowns all right and people need to start calling you what you are cult members you are in a cult you are in a cult a cult and the cult is the cult of believing in the government and the mainstream media that's your cult and they should be called the cult of the branch covidiens because that's what they are remain terrified question nothing stay home naive people they're a cult who have formed a cult-like following they're not occult like following they are occult people who have formed a cult for the media and will do virtually anything they say regarding coronavirus you know what the media really needs to tell you to do is to expose the world expose to the world who you really are here's what the media should tell you to dress up like they should tell you to dress up like a fucking clown okay and people who have listened to this show in the past know what this is and what it represents and i'm gonna briefly explain what this image represents for those who don't know as everybody should know by now i was i was a former satanist i worked with what you might call dark secret societies or dark dark occult orders okay dark occult orders these are people who are behind the ostensible institutions and the ostensible power structure that people think exists in the world and they have no idea who really runs things and who really runs things behind the scenes are satanists and dark occultists who know everything there is to know about the human psyche and know how to manipulate people they're ancient psychologists ancient evil psychologists that know exactly how to manipulate people i recommend watching the new film shadowgate that milly weaver came out with a disgrace that millie weaver has been kidnapped by government agents kidnapped against her will by government agents for making a film exposing what goes on in the intelligence agencies and of course the cult of the left and the cult of the believers in the mainstream media narrative and the government because they want that cult power on their side they don't want to destroy it they want to direct it your evil low-life scumbag authoritarian violence supporters your slavery supporters is what you people are all you people going out and voting at all your slavery supporters if you don't understand what true anarchy is by now you are a supporter you're a willful supporter of human slavery because that's all government ever has been it's a euphemism you can call it kingship you can call it pharaonic rule you can call it anything you want to call it it's called slavery you could call it feudalism as a form of government but it doesn't make a difference how you euphemize it it's human slavery it's authority vested in either one person or vested in an oligarchical few it doesn't matter how you look at it or euphemize it i call it what it really is and it's slavery now i was associated through satanism with some of the people who are actually the ruling class of the world the dark occult ruling class and i stayed in communication with some of them not many of them but with some of them even after i left some of these dark occult organizations that i had been either directly a member of or peripherally involved with some of those organizations are the church of satan the order of the evil eye the temple of set although i was not an official member of that organization and other groups the white hall church of satan etc okay i had affiliations with a lot of those groups and i was a priest in one of them namely the church of satan i showed my membership information on a show a few shows back okay and posted that in the podcast archive i kept emailing throughout very infrequently over the years one of the members of one of those organizations and i'll just name i'm not going to tell people who it was but i'll name the organization it was the order of the evil eye i would email person in that who i knew was connected up to higher levels of the occult hierarchical network because they had come to some rituals in my tri-state area where some of these people who were much higher level in the satanic hierarchy attended and so i asked this person during the whole ron paul revolution era back in 2007 and 2008 when ron paul was running for president bringing in a lot of people at his campaign for liver for liberty speeches on his campaign trail i emailed this satanist who is still actively involved in satanism and the wider uh worldwide hierarchical network not just in these little front organizations that i have mentioned and if people think that they're the organizations that i'm talking about that run the world you have no idea what you're talking about jackass and you don't understand how the power structure works these are front organizations that interface with the public they're small time okay i'm not talk i'm not saying the church of satan and the the white hall church of satan in pennsylvania or the order of the evil eye or um uh you know the temple of set run the world if you hear that in what i'm saying you're not listening you're hearing what you want to hear and that's what most people do they hear what they want to hear not what's being said i said they're small front interface organizations that interface with the public at a very low level that are small fries small potatoes it connects up in the much higher hierarchical levels of the worldwide network that is the real power structure that runs the world this is what you don't understand you think you you think you're hearing me say the church of satan runs the world no asshole never said that i said it's a front organization to vet people with psychopathic tendencies and groom them up into this the satanic network but you don't hear that you hear what your fucking dumb ass brain wants you to hear i don't know how many thousands of times i've had to clarify that for fucked hearts that insist i'm saying something else and i've never said that that's what you've erroneously heard because your brain doesn't work right because you're one of the fucking clowns these satanists talk about you have no ability to think critically and hear what's actually being said your mind switches into i hear what i want to hear mode because you don't know how to think and i'm talking to a lot of my listening audience a lot of my viewing audience and then there are people who say oh there's just a few of those people no you're wrong it's the majority it's the majority even of my viewership because if you heard what i was saying you'd be doing something about it you wouldn't be sitting back complaining about how anybody else does a thing you'd be doing something i wouldn't have to ask for more people doing this this because more people would be doing it more people would be exposing the evil of the world not talking shit on other people who are doing it you don't hear me talking shit on people who are doing it i talk shit on people who aren't doing it that's the difference between me and you so this satanist i asked him in an email back in 2007 2008 i don't exactly recall was around late 2007 i believe okay maybe early 2008 i said what does the higher-ups what do the higher-ups in the higher level of the satanic worldwide hierarchy who are really running things think of the whole liberty movement the freedom movement whatever you want to call it you know and this person did not answer me with words he sent back an attachment in email of this clown now in my former podcast i gave you the image with as it really came with a white background i had my graphics people mask it out to put it in a night put lay it up against a nice black background for the purpose of this show so this is a slightly modified version but the actual original jpeg image had a white background just letting people know okay and then i showed this image publicly and told people that this is what they think of you this is what they think of you the people who are actually in the so-called freedom movement they're not worried about you folks they have never been worried about you you think they're worried about people like me exposing them they're not worried about you they look at you as exactly what you are you're a fucking clown to them you're a clown to them and you know what i agree i said this before i totally agree with the satanists i agree with the people who are running the world this is what you guys are and guess what i don't care i'm going to offend my own viewing audience i don't give a fuck like i said i'll burn this whole operation to the ground if i want to folks i'll burn the whole fucking show and the whole fucking operation of the ground if that's what i wish to do i don't care about you tuning in i don't care about you as my viewership i don't care about money that comes into this organization i don't care anymore i'm going to say what's true and i don't give a fuck who it offends so if you're offended get as fucking offended about it as you like it's true nonetheless except for the handful of people out there who are doing the great work who aren't clowns i'm not a fucking clown and there's a handful of people who aren't fucking clowns the rest of you this is apropos and it fits the situation and it's exactly true you're if you're not involved this is what you are and the satanists think this of you and they're right they're correct they are correct all right and this is what all the people who buy into the mainstream narrative this is what all the people who buy into the psyop this is what you are your clowns and now folks this is going to be a repeating character on water put it back this is going to be a repeating character on what on earth is happening because me and my buddy jay parker okay who does uh two shows on the uh revolution broadcasting network you should check out his shows weekly in uh revolution broadcasting studio b i'm actually going to be on his show coming up in the very near future i don't have an exact date but uh you know i'll let everybody know okay jay officially christened this clown bobo ladies and gentlemen meet bobo the clown bobo the clown this is the representation of all the people in the freedom movement you know who this is this is all the jackass moral relativists out there this is you jackass moral relativist yeah this is bobo the clown that's who you are wait a minute bobo says where's my slab where's my slab oh bobo the clown bobo the clown says uh you know morality is not objective it's relative bobo the clown says it you know what we have for you folks we have some props for bobo for you guys the whole representation of the freedom movement ladies and gentlemen bobo the clown here we go we got some props for you hold on i got some surprises there's some surprises today at one what on earth is happening okay let's transcend some of the anger and go into some really dark humor okay i got a secret box here oh what do we need what is bobo what does bobo the clown need hold on we have uh something for bobo for all the bobos out there we got something for you look at this here you go this is what you sound like that's for bobo the clowns out there all the bobos out there this is what you sound like when you speak that's it that's it there's your fucking side whistle bobo's that's what you sound like every time your mouth opens let me hit it again yep that's you that's what you sound like there's your slide whistle every good clown needs one okay every good bobo out there needs a high quality slide whistle maybe i'll make this a an item on gifts.what on earth is happening.com who knows okay maybe we'll do that you know wait a minute clowns need clowns need music right they need music don't they okay you need music so here's some music for you right we need some good circus music don't don't we right so can you still hear me over that it's good the volume's still good good good because i want to play the music in the background for all the fucking bobos out there okay all right this is see the whole thing is you know what jay said to me one day he said this phrase i'm going to try to make it popular and try to remember it i'm paraphrasing he said [Music] a world full of people that are as ignorant and clownish as we have out there in the world could only have a clown for a god so you know what bobo is he's not just the archetypal representation of all the idiots out there he's their god bobo is the god of this world like they call satan the lord of this world well here's bobo god of this world bobo is the top god he's way above satan you know he's way above lucifer this is the god of the universe for all the fucking clowns out there bobo is your god ladies and gentlemen this is the god of all creation for all the fucking clowns out there okay and he's got he's got his slide whistle he's got the music what else does a good clown need any good clown any good i thought i was not i thought i was going to be able to do this without totally breaking up all right but every good every good clown needs here we go they need a clown horn every good clown needs a clown horn yeah every good clown needs a good clown horn let me go back i'll take the uh yeah all right all right here we go here's your clown horn bobos right that's what you sound like here's a combination of what you sound like you start like this you start just like this and you end like this you got it that's what you sound like okay you're not doing the great work you're clowning up the joint you're clowning up the joint as a matter of fact what's that smell oh god there's like a distinct smell in the room and i think it's from all the bobos out there that think they're doing the great work but are just just clowning themselves up and after a long hard day of work i think i know what that that that smell is in in the office here in the studio here what on earth is happening i think i can identify that and yeah folks here it is coming out of my prop box this is what every good clown needs at the end of a hard day i know they get a little bit sweated up so you know somebody must have left them here you know they must have left them outside the door but every clown needs a good pair of clown shoes okay you need a good pair of clown shoes ladies and gentlemen here at what on earth is happening we endorse floparoo brand clown shoes ladies and gentlemen flopperoos the best clown shoes in the world the only clown shoes you bobos will ever need flaparoo brand clown shoes get them while they're hot this might be another hot item at the gifts store at what on earth is happening.com okay you need your nice big set of red and yellow polka dot floppies flopperoo brand clown shoes okay number one brand clown shoe on earth get em while they're hot get em before they go what on earth is happening endorses flopperoos all right this is the joke this is the joke that the entirety of the freedom movement is and actually really always has been you guys should be laughed at ridiculously ridiculously alright and i i'm gonna try to make it the joke that it is okay instead of getting as angry let me just try to just rip on you infinitely worse than i ever have because guess what folks this is what your owners think of you for real being totally serious and they're correct they are correct because they know that your lazy pieces of dirt that have largely done nothing and that's sad that's not a joke that's actually not funny it's very fucking sad that's why we're in the situation that we're in because you guys have left it up to other people when i've repeatedly told you i don't got this none of us got this there are no white hats q doesn't got this it's a bullshit psyop if you still believe it you're a little fucking grade school child okay we don't got this in case you can't tell the world's going down the toilet faster than anybody could have ever predicted including myself it is up to you to get involved and get on the battlefield and you know how many of you are doing that a piss-poor amount and for that i gotta say the dark occultists are right you're not just clowns ladies and gentlemen your clown shoes get get the image on there here's what you are your clown shoes okay your big floppy reeky sweaty fucking clown shoes all right and you could say yo yeah it's funny but really it's a tragedy it's really a tragedy okay so you know i had some fun i couldn't quite keep a straight face yeah my producer's giving me a great thing it's one size fits all folks just like the the mindset that that most of the people out there are in it's a one size fits all shoe for a one size fits all mind okay so yeah great great point so here here's here's the thing folks the only thing that gets us out of this whole comedy this bad comedy show and like i said me and jay were joking around on the phone last night jay parker he said this is like a bad uh comic show that has gone far too long and is no longer funny like in its 10th season i said yeah you know what it's called jay there's a tv term for that it's called it has jumped the shark the whole world has jumped the fucking shark from happy days when fonzie jumps over the shark on you know being towed by a tow boat uh you know a speedboat okay the whole world has jumped the shark folks and that's because we waited too long to do something people waited too long to get involved you want to sit there and listen to what other people say instead of you saying something don't worry about what other people are doing stop telling other people who are actively involved to do what they're doing differently you do something and get involved so that's all i wanted to say regarding all the clowns out there now i want to wrap up the show from last week with a couple of quick notes okay first of all let's go back to the slides last week we talked about tim dolph cookler and crapple okay heil cookla okay uh being the digital nazis of the 21st century what i didn't finish with were a couple of slides and i want to show people how this really works okay um if you first of all last week's show was about the censorship of downey from the uh apple platform not just in the app store as i said but on the whole mac platform then apple because of all the negative press apologizes now apple's in a new battle with epic games because they've banned fortnite from the app store because they don't want to allow epic to do any interactions direct to the public this is what this is about folks it's about a monopoly on a whole computing platform and no the monopoly issue people still don't understand what's being said because your brains are fucking broken okay the monopoly is not about that you can go to a different platform it doesn't mean if you don't like how apple does it on ios you can go use android or microsoft that's not the monopoly the monopoly is no developer can make an application for the ios platform and sell it through anybody except apple apple are the gatekeepers of all apps on a platform that is monopoly power you don't understand what monopoly power means it means you have no competitors in a sphere of influence and you control the entirety of a feature set the reason i don't say that google has as much of a monopoly on android is because with the tick of a setting box you can sideload applications from third-party developers that then can create entire feature sets for a platform of software do you understand the words that are coming out of my mouth or are you that dumb and i know what the answer is folks i know most people can't follow a fucking word i say you're that dumb and if you disagree there's an answer and there's a an actual description of what you are you're just fucking morally wrong you're wrong this is the correct moral position and you're wrong you're factually wrong and most of all and more importantly you're morally wrong no no one should have that fucking monopoly power and if you think they do you're an immoral piece of fucking garbage you're just morally wrong you're morally in the wrong and you're factually wrong so apple has another legal battle on their hands now with epic games and i hope epic drags them through the shit and and helps draw attention to this i would been trying to draw attention to this privately this whole scenario of fascism in the digital computing space for over 13 years of my life all the jackasses out there who side with apple get the fuck off my social media platforms you're not my friend in real life and you're not my digital friend unfriend me fuck face i've a i've told you to do it already if you agree with apple in any of this get the fuck off my social media you're taking up a slot that i could give to somebody who understands instead of you you fucked hard so i wanted to finish a couple of slides and visually show people how this censorship actually works okay google does not want people posting to youtube anything that can go viral on the platform okay they don't want that they don't want people downloading from youtube which is why they probably pressured apple to ban the downey program because it's the best youtube downloader in the world okay i i'm not endorsing it as a product i'm saying what i that i personally use it and it's the best in its class okay i'm not getting any kickback from the developer of downey monetarily i'm just telling you what i use because it's the best in class software of its kind that's why they banned it they don't want it to be easy to grab something from youtube because then it makes it that much easier to repost it to other publishing content platforms like bit shoot or library or elsewhere okay so this is one of the things that they censored a press conference from doctors who were talking about hydroxychloroquine as being a alternative treatment and possible cure for covet 19. so i'm going to step out of the presentation okay so cut back to me and i'm going to go to my web browser in a second and then you could bring it back over all right bring it back over all right i'm going to type in youtube actually here's what i'm going to do that's okay leave it there i'm going to copy yeah leave it on the computer i'm going to copy this headline okay so i copied this from my presentation all right and i'm going to actually put that into my web browser so i'm going to say put that in there and search on youtube this is going to conduct a youtube query okay now you'll see it comes up okay now yesterday that wasn't even coming up 617 views because it just went up let me pause it okay and let me look at look at the length 43 seconds that's not the press conference this is something about it okay so you'll notice i'll go back to that search there is nothing there right now this one 14 minutes that's not the whole thing and it says band that's somebody talking about it as you can see i'll go to it this is just someone talking about the ban do you understand you cannot actually reach that information it's banned everywhere okay if you see little clips of it it's somebody talking about the press conference not showing the data that these doctors showed so you can keep scrolling and scrolling but you are not going to find that press conference anybody who posted see one minute and 18 second clip one minute and 40 second clip okay you are here's a two minute clip 10 minute clip but you're not going to find that whole press conference okay so let me now search on library so here's a library search right there 27 minutes and 54 seconds you can actually watch the actual press conference and the press conference was even longer than this but you're going to get a big bulk of it and probably here's one 45 minutes 40 seconds do you see how do you see how censorship works folks this is how censorship actually works okay this is the entirety of the conference 45 minutes and 40 seconds okay without the very brief introduction it was a little longer than that this is my point folks you cannot rely on youtube as a publishing platform anymore because they censor like the dirty rat fascist nazi trash that they are okay and if you continue to rely on these fucking nazi dirt bags you are going to be treated like the clown that you are okay they're gonna say these people are clowns let's treat them like clowns friend first of all i don't believe in just accepting that i think youtube needs to be forcibly made to back down from that position forcibly because they don't have the right those human beings are presuming that they have this right when they do not and no fuck face asshole trash scumbag corporatist fascist trash and ca and caps out there no you're wrong too they can't do whatever they want just because they're a private platform assholes they're censoring freedom of speech on a platform that says is in claiming to enshrine it if they're private publishers then they can do that then don't pretend you're giving a publishing platform to anyone else okay that's not private publishing what they are doing now by censoring is private publishing and then all of their little um you know niceties that they get from government and you know whatever you want to call it uh kickbacks should be taken away from them any of those subsidies and they are getting a lot of them the whole point is private publishers can take down what they want from their platform this is a public utility you are making a public utility available unto people for their own freedom of speech that is the stated mission statement of something like youtube and don't say that it isn't because yes it is all right so all you so-called anarchist and comes out and caps sorry i get i get them confused because they're equally as dumb bags as shit okay i'm not on the left or the right i'm not in the and command cap i'm a purest anarchist that knows that anarchy can only come about when people live in accordance with natural law the end for all fucking time that's the eternal truth of the matter okay and you don't hear the and caps or comes ever talking about natural law because they're they both have their head up their ass so far they're never going to get it out this is how censorship works ladies and gentlemen if you don't already understand it that's why i highly encourage people to move over to the library platform library.com to get the app library tv to start publishing your content content once you have a login and password okay make your channels here upload your content here it's blockchain based it's got a great cdn backbone behind it and it will never be censored you know i don't know why people are relying on youtube to the extent that they are in this far into the digital information age but here's the problem people don't understand the technology that's part of the problem all right so that being said the last thing that i want to say about last week's show switch back over to the slides please is all the people who say oh if you don't like the way this person does it go over to another platform if you don't like how apple does things then just don't use mac os just go over linux you know it's the same exact thing as all the people who say oh if you don't like america if you don't like how we do things here in america love it or leave it that's what you sound like you fucking bobo boom boom the clowns out there your shoes are wreaking the clown shoes you're wearing they're wreaking up the jerk man you know take your stink out of here cause you reek of clown shoes as a matter of fact you don't just reek of clown shoes you are clown shoes the people who say this oh if you don't like the way up with those things just use linux if you don't like how american those things just leave it where's my slab i gotta post my if you don't like how apple does things just use linux to muslab your fucking clown shoes and that's all you've ever been you know no i'm not gonna move because i'm right [Music] i'm not going anywhere and i'm not moving because i'm in the moral right you're in the moral wrong you're gonna move not me you stick your tail between your legs coward that's not the way i roll punk i'm in the moral right they're in the moral wrong i'm gonna move them so let's get serious for a moment all right back to the slides this quote by gustav labon the masses have never thirsted after truth they turn aside from evidence that is not to their taste preferring to deify error if ever seduce them whoever can supply them with illusions is easily their master whoever attempts to destroy their illusions is always their victim yeah well that may have been the case but you know what i'm not your victim not without consequence once again you may get me but not without consequence know that like you know your own name boy you're not gonna get this one without consequence and you can interpret that however you like i'm sure you can come up with something imaginative back to the slides last uh one this is as best of a definition of authenticity as i i have ever seen put in an internet meme authenticity noun what happens when your love of truth becomes more important to you than what others think of you and ladies and gentlemen there is no better definition of agape than i have ever seen than this simple definition authenticity the genuine human being that's going to display their anger their righteous indignation and does not care what others think of them you think i care what you think of me little child you're a little fucking child all the people that say what is mark so angry why smoke so angry that's what you sound like clown you know so let's let's just make totally ridiculous humor about what a fucking jackass clown you are because your whore fucking mother didn't raise you to be an authentic being you want to get personal let's make it personal fucked hard all right your rotten horse skank of a fucking mother didn't raise you right boy that's what happened you want to make it personal let's make it fucking personal i'll get real personal with you all right i'm the real article i'm the real thing i'm a real man this is what a real man sounds like when human rights are being destroyed you're a little fucking pussy boy child let's get it straight you're the fake i'm the real thing you're a coward i have courage you can't become angry because you're so broken you're broken at the soul level this is what righteousness sounds like in the year 2020. there is no problem with me you're the problem little boy you're the problem and all the women out there who want to say they can't hear anger your mother and your father did a fucking job on you too little girl and you then all you want to do is try to seduce other men and get them to your siren call just to lay down in a time when they should be standing up and speaking any so-called man that follows that piece of trash you deserve what happens to you you deserve what happens to you spiritually and you deserve what's going to happen to you physically burn this definition into your brain authenticity is what happens when your love of truth agape becomes more important to you than what others think of you and if you can't tell i don't give a fuck about what others think of me and i really haven't ever i gave a modicum of a fuck when i first started what on earth is happening to try to get people just to listen people go it's hard to even hear mark today then guess what fuckhead turn the fucking show off we don't need you all right you're the dross i'm looking for the spiritual gold out there with a set of balls you're not that so away you go go stick your head in a fucking hole and stay there anybody who can really hear the truth you're going to hear the truth in every word i just said and you're going to understand where the anger comes from and i'll mix it in there with some ridiculous humor too all right but what i'm saying is true nonetheless and nothing you say or do will ever make it untrue all right that that ends the section on the apple fascism i wanted to get those two last slides in there and those couple of slides about what a genuine human being is because we've lost sight of that all right so gifts.waterthishappening.com for hard items of my flash drives dvds there's t-shirts up there keychains button stickers we're going to get some new nice coasters in soon probably have some other items coming soon gifts.waternearthishappening.com folks if you want to get the ark waternearthishappening.com or just click the arc tab or button on the website one terabyte of information all my research information arc 2 is coming soon it's going to be a 2 terabyte drive folks i'm i mean literally i'm a hair away from finishing that i said that there was only a little bit of space left there's like probably about eight gigabytes left that i have to fill which is nothing okay so r2 is coming literally very very very soon if you want to make a straight donation 11 ways to do that all kinds of uh donation methods paypal uh patreon you know six different cryptocurrencies personal check personal money order or you can donate on the uh amazon wish list i think there's only one item up there now but uh occasionally from time to time i'll put technological items that we require to keep going here at water on earth is happening and if you want to donate that way you can click that button on the right which i think is a great way to donate to the effort because you know what you're getting us you know there's no monetary exchange it's an exchange of a physical item that will be put to use here all right that's being said let's get to your questions your comments your requests for clarification we're going to of course take your calls on discord let me jump into the discord calling room and let me get my headset on for that purpose all right ladies and gentlemen questions at what on earth is happening dot com what on earth is happening dot com slash discord please follow the uh simple rules in the um welcome area okay so let's go to your calls let's hear from uh let's see let's go to how about if i take things in alphabetical order today i haven't really ever really done that so let's take things in alphabetical order let's go to a hundredth monkey hundreth monkey you're live on what on earth is happening welcome to the show can you hear me yes i can loud and clear awesome so i don't know first off i just like to say i love your style um thank you because that's exactly how i think i'm from the same area as you from lancaster right i know it's like dealing with these people and it's just i wish i could unload like that well you know go on uh you know bitch shoot or library or youtube even and just you know do it or just record yourself first i always tell people if you're questioning getting started putting your voice out there just record yourself you know through your computer you know do do a little uh do a little piece of a podcast and play it back and try to do better the next time refine it a little when you get a little bit comfortable then go live that's all it takes man yeah i want to do with the people in real life like they need to hear it guess what if you have them by the shoulders i agree we got to do that in in 3d reality as well but you reach more people who are little on the fence and maybe are you know a very um fertile ground for planting seeds when you do it digital you might reach way more people than you ever would in person that's why i say do it in the digital space but either way works i did have a couple questions yeah go right ahead i don't think you covered them forgive me if you did but um one of the things i noticed with like these society members is they like to use hand signals to communicate sometimes i catch them doing it yeah sometimes out of the corner of my eye yeah it's it's it's traditional in certain secret society networks um satanic orders generally do not do that i've never had or been privy to any secret hand gestures or hand shakes free masonic orders generally do tend to do that some rosicrucian orders may have that i don't know maybe some thalemic orders do that you know um order oto order temple orientis may have that i'm not really a member of any of those types of groups i've attended some theosophical meetings i've attended some meetings of you know oto affiliate orders um but um never really became members of anything like that in freemasonry they'll often uh press a knuckle depending on which degree or they'll grip the wrist instead of the hand uh do a deeper shake you know a wrist grip instead of a hand grip uh and there's many you can look them up you know you can go online and look up uh free masonic grips or handshakes and it is true that some of these um you know lodges do use them uh but uh i wouldn't i personally wouldn't really so uh concern myself uh with that aspect of it because it's really the mindset that is more important but uh what did you witness if you don't mind me asking right well the times that i've noticed it is like they've been doing it behind my back so i know that they're doing it but i don't actually get to see what exactly they're doing makes sense yeah um they could very well be members of the same fraternal order or potentially a cult order uh and you know what wouldn't surprise me a bit if more people like that are out there than we would ever suspect you know there's more there's a lot more membership in in this way of thinking and being inculcated into these orders than anybody would suspect again when i went into some of the rituals back in the uh you know late 90s there were people i never would have expected attending satanic ritual meetings there were people who were involved in politics there were people who were bankers there were military personnel at them there were doctors lawyers engineers school teachers athletes i'm telling you literally you name the area of human endeavor and high-level position people not like just you know i'm talking like not a teller at a bank like a bank manager at the satanist ritual okay at the satanic ritual home attending as part of the grotto all right i'm talking like administrators of hospitals showing up you know not like a nurse although there were those level people as well you know they're from all over when jay parker first said there's 40 million dark occultists that run the show i thought he was crazy i no longer think that i no longer think those numbers are super exaggerated or inflated that sounds about right sounds about right so yeah i've noticed they're not everyone but they're like everywhere right especially in this area and you brought up the oto which is interesting because i read an article and i think this happened in the late 90s but the one up the oto lodge in philadelphia philadelphia are you referring to lodge because i have attended the leesis in philly and it seemed like that they were a pretty decent group of people who were you know kind of on a quest for personal knowledge i wouldn't say that they had high level knowledge of what's really going on and how it all feeds up in through the occult networks but uh go ahead continue yeah well listen to this it's you know you can look this up it was like back in the late 90s the one up in philadelphia they got raided by the police and they found a uh like a 10 year old boy that they had in a cough coffin they had them outside in a coffin for like i think like two well then i want to say i do not believe that this was the leases i was just talking about a oto lodge that i attended it was kind of in the northern liberties section of the city i'm not i don't in any way want to say i say i'm saying that that's affiliated with this it could be some rogue oto organization that uh you know had gotten involved in some crazy activity like that but uh you know it doesn't it wouldn't surprise me that any occult order or joining group goes rogue that's why it's not really a good idea to join you know anything that has you know membership joining dues all of this stuff that could easily turn into a cult at any given time you know that's why what on earth is happening it's not an organization you know this isn't even an organization you know this is a show that i do weekly that's what on earth is happening is it's the name of my website and it's the name of a show that i do weekly and that's all it ever has been okay the whole point here folks is don't join anything be an individual be an individual stop joining groups groups can easily turn into cults groups lose their morality far far easier than an individual will lose their morality okay that's the whole problem is that people want to join groups and clubs there ain't no group or club here folks i'm trying to give you the techniques of cults so that you open up your mind make yourself aware of their techniques okay that they use on other people and stop allowing yourself to be susceptible to those mind control techniques of cults that why would anybody who wants to have a cult tell you all the techniques that cult leaders use to get people to join cults and keep them there i'm trying to explain to you don't ever do that don't ever make your mind so weak that you join a cult that's what i did in the past until i strengthened my mind to come all the way up out of that and then learn all of their techniques i not only came up out of it i went 180 degrees in the opposite direction and became a person who is so anti-cult that i can teach other people how to make themselves cult-proof that's what the whole goal of what on earth is happening is not to have followers i don't want anybody as a follower that creeps me the hell out followers you know i want individuals i want people to be their own individuals that come to accurate conclusions come to accurate conclusions and then do your own work don't tell other people what they should be doing am i on here i'm telling you you should be doing something other than nothing that's about all i do here on what on earth is happening i don't go and say you know what i heard that david the other week and i think he could be doing this so much better who gives a shit what i think david likes doing something you know i'm talking to all the people out there who are sitting back watching other people complaining nitpicking and they're not doing a fucking thing themselves that's what i'm talking about that's who i'm attacking you know the only thing i'm saying for people to do is to stop doing nothing and that's what most people are continuing to do exactly nothing so 100th monkey anything else for us yeah i mean i just going off what you said like i studied law and i started bringing lawsuits against the police and the government and uh it turned out bad for me with qualified immunity that's going to be very difficult because these people are shielded against immoral behavior i i understand qualified immunity and i've beaten it i've even beaten judicial immunity which is absolute immunity except when a judge is acting in an administrative capacity and um i was going after some judges with that little loophole there and you said it got you in some trouble how did that manifest uh i started getting threats and uh right yeah cause that's what these people want to do even if you attempt to beat them at their own silly games right you know then they want to actually do violence to people because they have no argument all they are are a group of thugs they're violent thugs that's all government is that's all government ever has been it's violent thugs who think that they're god and want to tell you if you don't go along with their way it's going to be violence done unto you that's all these clowns have ever been that's all they are now that's all they ever will be until the day humanity stands up and says we're not taking your fucking bullshit thuggery anymore and we're going to do anything that is required to stop you and again you can go as nuts as you want with your imagination folks you know about what that's going to entail yep yeah that's why i stopped because like i i try to do the right thing and and and do stuff for the movement in real life but um i'm not going to die for people out here that don't even understand what i'm doing let alone appreciate it i look at it like i'm certainly not going to die for them but i'll die for the truth i'll die for the truths truth and i'll die for what's right see this is thank you 100th monkey great points that you brought up i want to add a little bit of an addendum to some of that you know folks you got to stop saying that this is for everybody's got to stop saying and believing that any of this is for other people okay none of this is for other people okay none of it oh what are you pointing to the bulbs in the way yeah my clown clown horns in the way in the corner folks uh you got to stop saying that it's for other people this isn't for other people we have to make this about the love of truth this is why truth comes first in the trinity truth love freedom why does it come first let me explain the ordering of truth love freedom again okay the reason it's truth love freedom in the whole you know saying that i've put togeth together regarding what's going to really set humanity free truth is always there it's what is that's it that's all it is it's first it's first principles they're always there they can never go away love has to be the love of truth it's not the love just of people of individuals even or even of self it's the love of truth it's that order truth is existing self-existing objective and inherent to creation in the universe then love of truth agape has to come second that's what drives everything that we do with our will with our actions that's why that's inborn inside the heart that comes second truth is self-existing what drives you to recognize that and recognize what's right is care that's love of truth agape truth love then freedom will express as a result of knowing that and behaving like that in the world that's why it's the third part of the the trivium the holy trivium process truth love freedom in that order you can't take them out of order any more than you could take the trivium out of order that's the higher level trivium truth is the grammar love is the logic as contradictory as that sounds that's exactly what it is because without love of truth you can never really help to understand what it means and then freedom is the rhetoric stage the action truth love freedom never take those things out of order you know so let's move on to another caller let's hear from ar ar you're live on what on earth is happening questions and clarifications welcome to the show i'm on you you hear me yes i can loud and clear too loud oh it's okay no you're perfect okay nice uh i want to talk about um the cause and the symptoms okay and uh excuse my english because i'm no worries take your time ar you still there you are breaking up a little just repeat that last part please and uh and one of us i see a lot of symptoms that people um are you're having uh difficulties with your internet connection it looks like i will come back to ar i apologize for that um looks like you just weren't on a reliable internet connection let's go to aaron aaron you are live on what on earth is happening welcome hey mark can you hear me yes we can well i just want to uh let you know first of all um i definitely agree with what 100th monkey says i love the style and i think that this is the style that uh we'll need especially now with how fast things are going down the gutter yeah we'll see you know i i could really only stay true to myself and to be honest this is my real personality you know uh there's a lot of anger underneath because of how bad the situation of the world is but i can also get really silly as far as my whole you know comic mindset my sense of humor uh so you what you're seeing is actually really me so well i wanted to share with you an experience i had and uh i was curious if you've seen the same thing or anything similar sure go ahead um yeah we know this this whole covid thing is full of psyops full of uh dark occult rituals and after listening to your show for years and seeing all the um the symbology that you've shown like with freemasonry and some of the phrases they use seeing a lot of things that wouldn't have seen before and most people aren't seeing but um in a whole foods that i went to a few weeks ago um i heard a phrase used that was uh that you told us about in a show about freemasonry the phrase on the square on the square yes yeah so you know how in grocery stores now they have like those squares and those x's on the floor where you're supposed to stand while you wait the checkout yeah they had um these blue squares on the floor in front of each checkout aisle the lady standing there kind of managing it she kept saying to everybody guys please get on the square if you're not on the square stand on the square right i mean i don't know if that necessarily translates to uh that person being in any way affiliated but um there are certainly probably elements of this that could be being conducted uh to be the way that they actually come out in real life by occult groups and even people very influential in occult organizations it wouldn't surprise me i think in that instance it probably just is you know their policy and their floor is set like that you know so yeah i was thinking about that like chances are she has no clue what that means but i was thinking about it would be interesting that a uh a phrase like that would make it from high level freemasonry all the way down to a local whole foods um then i was thinking about a whole foods now is owned by amazon right jeff bezos is one of those guys who's been to epstein island so who knows but yeah i'm seeing all kinds of diops and symbolisms and even uh like the phrase social distancing the first time i saw that um like it kind of hit me in my gut before i even had a chance to think about what it meant or what they were trying to tell us it meant like of course they want us to think it means oh stay six feet apart for your safety when i saw the words practice social distancing in big red letters i knew right away they just they're trying to reinforce separation they want us isolated and that's one of the first cult techniques that you talk about is isolation there you have it right there they don't want people coming together and getting connected it's an oxymoron in terms to begin with if you're being social you're not distancing they don't want people coming together specifically in pubs restaurants bars things like that because that's where people discuss ideas that's where people you know check with each other about what they think and what's going on and they don't they can't have that in this because the the contradictions would manifest themselves and the official narrative would fall apart much quicker that's why they can't have that so great points yeah thank you mark you got it absolutely um and you know i wouldn't surprise me if a lot of this is being conducted as ritualistic mockery you know again that's what pete these people actually think of you folks what i told you really happened that is a an individual who is a satanist who is connected with higher level satanists who are in high higher level positions of power in the world and that is what they think of the people of the world that's what they think of the people who say that they're trying to do something okay imagine what they think of the average retard imagine what they think of the average total mentally inept human being that knows nothing of what is going on in the world this is what they think of the effort on the part of the people who say they know what's going on they think that you're that big of a clown and i'd have look i'm not talking about necessarily my own viewing audience especially the people who call in the callers tend to be pretty good i think everybody needs to get more active but i don't necessarily disagree with the satan satanist contention that that's that's our side that's our team folks okay i i i wouldn't say it's any different that's the team's archetype that's our side our team's archetype and again i don't even like to say that i'm part of that because you know it's like it's a loose conglomeration of individuals that are scattered to the four winds of the earth but uh could i really disagree with them no i'm so i'm sorry i really couldn't ladies and gentlemen bobo declown is on what on earth is happening welcome to the show hello mark hey bobo how you doing great uh thanks for doing what you do uh i'm a long time listener first time been on the air um calling from sault ste marie ontario canada okay so we we share a border so i'm literally less than a mile away from city hall in sault ste marie michigan okay and i'm actually right by our masonic hall which is kitty corner from our courthouse which is on king and queen street so there's a bunch of masonic symbols of course and i've actually been inside the masonic hall because every 12 years they host an open house they don't have an average tour that you can go in and take at any time like one week it's every 12 years oh wow see here in philadelphia the grand lodge of pennsylvania that sits right next to the city hall here in philadelphia and center city is open to the public on the weekends they do tours i might even be i don't even know if it's every day it's definitely on the weekends and uh the members of the public can go through a pretty extensive tour of the entire temple wow and it's worth doing it's very worth doing so ours actually has the eastern star and the masons in the same building yes and as i said once every 12 years one day on i believe it's a saturday uh might be a sunday though i think it's a saturday um anyone is welcome to go and you're welcome to go into every room except for a couple rooms on the third floor right but they will take you to the third floor okay and i talked to them and i told them to take care right and then they sent me a recruitment letter in the match interesting so you know maybe they took your little uh cryptic message to them that maybe you knew a little bit and you were interested you know so again it's a it's a it's a you know crap shoot it's a dice roll uh of what quality of people are going to be involved in any masonic organization some of them are decent people who do understand the philosophical allegory that underlies the free masonic symbolism and you know know that that's about true morality and true right and wrong and some people don't some of them don't and they use it as a networking tool to just get what they want selfishly in the world and uh some of the people who join masonic lodges have absolutely no idea what freemasonry is and don't care and some try to do a good job in conveying the real underlying esoteric message of freemasonry to the initiates of the order i would say that the latter is few and far between though i would say that it is largely degenerated into a networking tool which is not what it is intended to be that's what some people insist and think and believe that it's intended to be but that's not what it's intended to be it is intended to teach morality to people true objective morality to people so that they stopped taking part in objectively immoral actions and deeds and works in the world but all you got to do is ask yourself what is freemasonry produced in the world to understand how it's largely being used and that's why i say just you know be careful getting involved with any group do what you want of course but um so i would i would take a cautious approach yes sorry i'm sorry for talking over you a little delay um i found you through manly p hall who was also a canadian so i've seen all your work i'm a big fan i want to say thank you and i want to get a couple of quick takes from you on the couple's sure go ahead so um i'm not sure if you know this but canada had a mass shooting back in april during the other story i heard a minor amount about it not a whole lot but so that was in um nova scotia guy went on a big killing spree and they decided to ban almost all rifles and shotguns in canada taking effect now and everything will be confiscated within less than two years from now well that's going to put canadians in a position like uh you know uh australians are in right now and you know what if you guys let it happen i hate to say it but you're asked you're asking for it and you know it's like i think i personally think that anywhere where guns are banned should already be an open rebellion period that's that's my take as soon as a government ban guns they are announcing they are have evil intention toward the citizenry and i think that calls for an open physical revoke revolt in any area of the world that bans guns personally and that should be not only every american's approach to it that should be every human being's approach to physical firearms i have the exact same view of it so uh just today trump's brother died i heard about this yes it was actually yesterday he passed away uh you know at his home apparently he had health problems going on for months the families being very private about the actual cause of death and what he had keeping that pretty private and close to the chest because i think you know they don't want to appear you know this whole idea of oh if you tell people how you were sick that's a sign of weakness it's utterly ridiculous but um you know they're choosing to just totally remain private about you know what what he actually died from more likely than not it was some form of cancer or other debilitating disease that was progressive and he died fairly rapidly i think the onset of illness was probably several months ago and uh he just succumbed to it uh you know yesterday and i was just wondering if you're possibly thinking that might be used to set up a situation where biden lives through the election and then dies before any possible presidency could happen or dies before an election and because this whole mail-in ballot voting whether people not knowing who it's going to be on election night if uh they might claim it's one party on election and they're going to try to massively rig this uh to their outcome i've said before that they i don't i don't really feel that they intend on allowing trump to take a second term because of the uh interference at some levels that he has conducted that's why you know once the intelligence agencies installed him because of the type of polarization that they knew he would provide publicly uh between political affiliations they intended to uninstall him rather quickly and then put someone else there in his place efforts to do that have largely failed and uh i don't think that they even intend to allow him to take a second term i think that they will go so far as the stage of military coup if they have to um but or an assassination possibly they're i don't think that they're going to let this person take a second term that being said i also don't think that he's really effective in communicating ideals of freedom and really embodying ideals of freedom or really doing anything to really hurt these people who are really in control in the deep state uh and certainly not in the occult behind the deep state so um i don't think the person's enlightened enough i don't think he's knowledgeable enough i think he's very egotistical and thinks that he knows when in fact he doesn't have all the ego about it you want man when you do know but when you don't know don't try to say that you've you know absorbed all that knowledge and you have it within you and that you're going to go out there and be superman you know because quite frankly trump's the farthest thing from that you know he's the farthest thing from it and all the people who are putting their faith in him you're going to be roundly and sorely disappointed by the result you're going to get you know no don't put faith in one individual okay have i ever told anybody to put any faith in me to change the world i've told you i can't do it i've told you i'm incapable of doing that and i don't have that power over and over and over and over and over again i've begged for help because maybe if there was ten thousand of people at my level of knowledge and commitment worldwide doing it like this maybe we'd be putting a dent in the mindset of humanity maybe i mean and i mean a little den there isn't even a micron deep scratch in the surface of humanity's ego because there's still really only one mark pacio there's a few people doing really really good work but i'm telling you man like i said i could count them on one hand and we need a million if we had one million people doing the great work at my level which admittedly i say it's not even if i had more help i could probably do it at an even big way bigger and better level than i have i'm my own worst critic i don't need anybody telling me to do anything differently because i'm my own worst critic folks ask anybody okay i'm harder on myself than i am on anybody else but the whole point is i thought by this point there'd be a million people doing this way better than me and then i i look and i i have this conversation with people on my staff all the time i say i look at i look at all the work that's out there and i'm like holy shit i may be the person who's offering the the the truest analysis of the situation and the best solutions that anyone has ever provided and that is ultra horrifying to me do you understand how ultra horrifying it is that i may be the person who has the best analysis and solutions to this problem when there should be a million people all talking about this analysis and these solutions in the mind and how to change the human mind and heart and then change human behavior and have it dead on on point right on point and be teaching that out there publicly in a big way there should be at least one million souls at this point in the year 2020 doing that better than mark pacio ever could so that people go who the hell is mark pacio there's these hundred people that i know doing this type of work i don't even know the guy you're talking about that's what i want to happen and it isn't happening and i i think about that i'm horrified by that i'm like if look if this is the best you got we're in big trouble we are in ultra ultra big fucking trouble folks if what's sitting in the ass that's sitting in this chair is the best one you got doing this work we're in big fucking trouble as a species real big trouble okay so yeah uh one last question yeah sure thank you very much for what you do uh i will definitely keep calling in i've said watched every show uh i agree with 99.99 of everything you say uh just one last take uh julene maxwell that went in the news and write out the news yes you think happened with that uh repeat the question one more time uh julene maxwell she got caught yes it was everywhere in the news for one day right and now gone and you don't see anything over no pictures nothing right yeah okay they'll they will never cover it you'll never see it covered okay they intend to stage a coup make that the whole thing and never have any attention toward that here's the thing and uh bobo to clown thank you for the call great points that you've brought up ladies and gentlemen let me explain about this cult they're not going to draw attention to their own crimes period they are not going to the people have to do that there was a march in hollywood a few days back about you know pedophilia especially in hollywood but not just there throughout the world you know called save the children and you know the whole point is here folks grassroots efforts are going to get the word out spreading the documentary conspiracy of silence are going to get the word out spreading the the book the franklin cover-up is going to get the word out okay well you know what's not going to help what's not going to help is the mainstream media if you're expecting them to cover this and talk about it you're going to wait forever you'll be a skeleton rotting in the in the dust turning the dust and blowing away in the breeze these people are not going to expose their own crimes because the media is the cult this is what people still have failed to come to the accurate understanding of all the people say i believe what the media is telling us about coronavirus you don't still understand yet they are the satanic cult ladies and gentlemen that's the cult that's their members like mia brzezinski you know the daughter of zabis new brzezinski that says telling people what to think is our job you know the the trash from her trash father zabi's new berzinski you know this is who the cult is comprised of this is the cult anderson cooper cia agent cult member this is the cult all the people on all of the nightly news these are the cult members they're low-level satanists they are paid media propagandist whores that are involved at a low level or just on the take and just accept they're the kind of trash that just takes money to lie to people and you could call that a rank and file member of the cult we've got to stop calling these people professional journalists they're cult members that's what these people are and you know what who else are cult members the people who believe them the people who believe them are also members of the cult that's the congregation of the cult they're not members they're the congregation you know and that's what they are clown shoes as you see there in the background they're clown shoes ladies and gentlemen it's just amazing that people still yet do not understand this ladies and gentlemen we heard from bobo let's hear from bobolina bobolina you are live on what on earth is happening welcome what do you have for us thank you can you hear me yes i can great uh i have two questions for you tonight you got it the first one is what is your take i am from sweden what is your take about that we don't have any lockdowns here yeah i mean it's great because it was a control that's a scientific control for the entire dynamic you know and again i don't think that there's not an illness i don't think the illness is what they insist that it is you know i think that this is uh some type of an attack on the immune system through a toxin for sure however i don't subscribe to the virus theory as it exists in mainstream science i think i've read enough scientific papers and literature that is peer reviewed in peer-reviewed science journals to come to the informed educated conclusion that viruses don't work the way that we are told that they work by mainstream publications and mainstream science i don't really care what anybody thinks of that conclusion you can believe whatever the hell you want but i say that my conclusion is informed because i do stay abreast of scientific literature whereas most people don't you know so um you know i think it's at least a good control uh based on taking one type of action versus taking another in response to this illness and uh i think that it shows very clearly you know you guys aren't having any uh worse effect than anywhere else as a matter of fact it's better than in a lot of other areas of the world that have taken aggressive draconian containment measures which all that's going to do all those aggressive measures are going to do anyway with mask wearing is compromise the immune system further because people are breathing in contaminants they're breathing in contaminants that get lodged in the mess they're breathing in contaminants that they breathe out that's part of the expulsion the toxic expulsion system of the human immune system is the breathing out of the air of the lungs you know it's the gut it's the stomach lining you know it's the skin you know and it's the lungs that's that's a big portion of your immune system right there sweat is a big part of it excretions are a big part of it breathing out expiration is a big part of it you breathe re-breathe those toxins that you're supposed to breathe out and get them away from you that's called the exportation of entropy entropy is the are those toxins in the system the expiration is part of the immune system response of exportation of those toxins of that entropy if you prevent that or if you recycle that entropic toxin you're going to get sick that's how it's common sense folks that that's how it works and people be like no i insist that's not how it works that's untrue that's doing danger no you're doing danger you by actually advocating the re-respiration of toxic exploration you're endangering people not me okay and and again the people who insist and say you can't say that or will censor you you're violent trash that's what you are you are conducting what is known as worldview violence attempting to take and censor other people's rights because they don't support the narrative that you support okay and again i don't do that as a private publisher that's different i am privately publishing my results i'm allowed to do that and keep it to what i want published because uh what on earth is happening is private publishing a public forum cannot do that because that's an abridgement of freedom of speech and making people make their own informed decisions if people can't understand the distinction between those things they're just dumb they just are just unintelligent people that cannot distinguish between those two dynamics they think that they're the same and they are not the same so going back to your question i think it's great that sweden did that because it provides a scientific control uh with a true scientific methodology trivium-based based methodology to look at a control system that did not do the aggressive mitigation and uh social distancing and mask wearing draconian mask wearing measures that other imbecilic societies did not saying sweden is an imbecilic in many many many other ways because it is you know as is all governments all cultures okay but the whole point is at least they took the right side on this issue and let the chips fall where they may and let people build uh whatever immunity their immune system is going to build build to this toxin i'll call it what it is a toxin instead of a virus okay is there a toxin yes there is what is going to help with that building of the immune system yes food and breathing open air and getting sunlight getting vitamin d3 getting vitamin c you know uh and doing exercise and being out in open air and sunlight and working on your immune system through proper nutrition there's the old saying if proper nutrition is present um medicine isn't necessary and if proper nutrition isn't present medicine won't help won't help much okay i'm paraphrasing but just think about it if you you build the right foods let your medicine be your food and your food be your medicine if you're putting the right nutrition into the body the immune system response will be strong and you won't need mitigation efforts of uh so-called medicine and if you're not doing that it really doesn't make a difference what drugs quote-unquote you put into your system through quote medication it's not going to help much if you don't have proper nutrition you're going to be continuously sabotaging the immune system and the immune response so caller i hope that gives you an idea of you know what i feel on that and answers your question um yeah i was just i'm just i just feel a bit suspicious about that sweden is the only country with with no lockdown and i'm thinking like do you think they're gonna roll out like the second wave from here or is it because there's like a lot of elite connections going to scandinavia and sweden if they do do that it will probably be caving it will be their the local government there caving to eu restrictions and eu so-called guidelines or mandates but i think they genuinely made this decision independently and i don't really think it was a popular one from a globalist perspective so um but again i think you could also look at it as they have to give you a part of the truth and make the people make their own determination because that's karma that's how karma works they're telling you constantly what they're going to do they're giving you alternative information the people can say we're not going to have this and we're not going to deal with this lunacy and yet they don't because it's the people who are the ultimate clowns the people are the ones who are clowned out okay and everybody wants to get upset with mark for saying that bobolina thank you so much for the call and comments great great uh perspectives there but folks everybody wants to say i'm problematic and i oh he's so dark and negative because he says oh it's it's the people it's not the and everybody's like oh it's it's the elitists it's not the people stop blaming the people the people are who is doing this folks blame the elite not the people are you nuts folks i'm just saying they're the orchestrators and they're the manipulators do you know who has to make the choice about how to behave in the world the average person that's who ultimately controls your freedom folks the average person out there in the street think about how dumb your average neighbor is how painfully stupid the average person who walks past you on the street on a daily basis is they're dumb as a bag of hammers dumb as a sack of hammers okay and a lot less useful okay you could do a lot of good things with those hammers okay these people aren't even as useful and they're about as intelligent as the raw materials that it take to make those hammers okay this is about how intelligent your average person is that's about how intelligent they are real intelligent folks i'm not getting the sound i want on this hold on there we go average person on the street what do you think about you know what's going on with the coronavirus and how it's like just uh all about control measures and we should we should really be building our immune systems through proper nutrition that's about what it sounds like to me out there you know it sounds like that to me you know and and then people get upset with me you know they get upset with me instead of getting upset with who you should get upset about the average dumb person all around you all around you surrounding you at every turn and guess what folks that's who's restricting your freedom the average dumb fuck the average dumb human being it isn't the people at the top the whole idea the whole saying oh the fish rots from the head bullshit the fish doesn't rot from the head it rots from the body okay the fish rots from the body not the head the whole idea of the fish rots from the head meaning society's all rotten because the top level of society is all rotten bullshit you don't know what you're talking about dumb fuck the the fish doesn't rot from the head it rots systemically from the entirety of the fish body okay from every cell from the cellular level that's where it rots from okay what people who say that dumb phrase the fish rots from the head they're apologists for all the dumb motherfuckers all around them who are ultimately controlling your life through their ignorance their ignorance is what binds your freedom and you don't want to do the hard work of educating them let's call it how it really is you won't hear that said from anyone else in the world folks you won't hear it said like that from anybody else any other researcher any other internet personality anywhere on earth i'll tell you the the rotten truth of the matter no matter how unpopular it is because i don't give a fuck about you liking me i'm not here for you to like me i'm here to tell the hardcore truth of the matter okay and the hardcore rotten truth of the matter is the average person is the problem not the elitists who run the world they're a symptom they're an extension of the average person they are mirroring of the average person they are an externalization of what's inside the average person and that's all they are and that's all they ever have been okay and if you don't understand that you know nothing about what's being discussed here on what on earth is happening from the very fucking beginning go back and listen to the podcast in order without skipping around and then you will understand and i'll tell you what folks that's why people want to sit and listen to episodes in the high 200s you know episodes in the 220s 230s etc and they want to go what's wrong with mark what's wrong what's wrong with mark i don't understand i don't care why he's too angry you talk like you got a bag of shit in your mouth dumb fuck okay i've already told everybody go back and listen to the whole podcast series in order or you have no idea what i'm talking about and yes it does have to be done and all the people who say oh you don't think we can understand you if you don't listen to the whole thing no you can't dumb fuck you can't you might think you do but you don't okay that's how it really is not because i'm saying it because that's the fact of the matter objective truth of how it is unless you go back and listen to that prerequisite material which i'm not going to repeat every single podcast okay i can't fit a thousand hours of material into three hours dumbfuck who knows nothing about math okay you gotta go back on your own and listen to those thousands of hours of podcasts all right you're not going to understand by just watching one show the one show doesn't stand on its own it's backed by prerequisite knowledge and i guess i have to say that every week i should say it at the beginning of every show and belabor it like that it needs to be belabored because people are stupid a lot of folks people say oh you're saying that to your viewing audience no a lot of my viewing audience is that stupid i'll say it right to it a lot of you guys haven't gone and listened to the whole fucking thing in order and that's the problem that's the problem that's why a lot of people don't understand what i'm saying or why i'm angry you have incomplete information and you think you know you don't know shit even if you've listened to them all you probably really still don't know shit you got to go do your own deep research that's what the ark is for you tell me you've taken in a bulk of what's on the ark then i'll say you've done some deep research like i have anarcho anarcho hellbilly you're live on what on earth is happening what do you have for us hello hey here mate yes we can yeah the last caller gave me some hope because i'm also from sweden sweden and australia are really uh kind of getting active with what's going on in in the country sweden as a result of you know a lot of socialist measures but then not being on lockdown and seeing the contradiction there and australia because of being on the most aggressive lockdown in the world i'll tell you the aussies man are you guys in big trouble i mean the australians they're all coming for the ark they're all coming for all the information now through gifts right gifts is exploding from the aussies because now all of a sudden you want to listen don't you now all of a sudden oh you want to know why don't we have firearms why do we give up our firearms oh now what's happening enjoy it enjoy what you got hopefully it'll get even worse hopefully it gets even worse in places in europe until more people wake the fuck up and stop worrying about whether firearms are legal in your country and do what's necessary that's what your population especially your men are going to have to make the decision because you've been listening to too many dumb fuck people who believe in government and media and this is what it's gotten you folks you know and here's what you sound like to me that's what you guys sound like to me now you know all the people who want to balk and say we don't need firearms oh america they're just gun toting idiots yeah well who's the slide whistle blowing chump now you know i'm just mocking you by doing it but that ain't us here in the united states folks we're heavily armed and when it comes time the government's gonna know what we're willing to do you guys you're gonna go you're gonna put your thumb up your ass and go in a cattle car and that ain't gonna happen here and guess what folks you want to see how violent it'll get watch watch how violent it'll get america will show the rest of the world you are not going to put us in chains as easily as you think you are motherfuckers watch but go ahead continue you know as bad as sweden is in other areas yeah yeah i just want to say that i'm armed the what i'm armed i i have weapons yeah and as well everyone should it's a human right this isn't a united states right it's not an american right it's not a constitutional right it's a human natural right anybody that still doesn't understand that is completely asleep because they don't understand the self-defense principle you know and again when we get to talking about the lama folks we're going to read liberals and you got to understand you know that's why if anybody uh watched strange angel i thought it was one of the best period pieces ever on television from the 1940s okay strange angel it was on um i think it was hbo okay i might be wrong it might have been some other network but uh it was about um you know the rise to prominence of the person from jpl jet propulsion laboratories which is jack parsons who wasn't a cultist and a friend of elron hubbard who communicated with uh aleister crowley who you know sort of began the philosophy of fellaima as it is now known and called uh we we should go into them a big time on this show uh i i think that uh that television show was cancelled because not because it wasn't popular because it was it was a big underground popular series okay it was pot it was cancelled because it was the first time publicly on television on public television that the document lieber oz was ever read publicly to the people of the world okay and the the occultists that run the world the the powers that be said we cannot have anybody looking into this and understanding this you know because then they're going to really understand oh we're not slaves oh rights exist to stop people who are thwarting other people from the exercise of their rights we can't have that on public television you know forget it even cable you know we gotta snuff that out as quick as possible i highly recommend people check out you know the first two seasons called uh strange angel you know it should have went into multiple seasons and it ended just when parsons meets um uh hubbard you know and building up the next season and then they cancel it right then and there in a cliffhanger you know because they don't want people understanding truthfully principles you know because the self-defense principle is deeply enshrined in the thalemic philosophy and we're going to talk about it here on what on earth is happening and get into it deeply on future episodes so i'll call her out anything else you'd like to bring up or any questions that you have i have a question about the the 5d people the fifth dimension okay people who are i have come across and i really don't know what to think so so you're asking if i think that higher dimensional entities are actually influencing events in the world are real are influencing events would that be a fair summation do they more about this these people say that the fifth i mentioned is coming oh like that there's an ascension to another dimension coming yeah i don't i don't necessarily buy into that whole a new age woo-woo you know this whole thing that this is about like physical ascension to another place there's not going to be any bifurcation where the good people go one place and the bad people stay here folks this is the whole it's just a new age take on the christian rapture concept is all that it is okay don't hold out your hopes for stuff like that you know what it is it's a stand down tactic it's a stand down tactic to get people to stand down from taking real world action based on real world knowledge this is what q is about this is what the new age movement is about this is with the fake law of attraction of oh don't think about that bad stuff it'll manifest if you think about it no you're just a dumb ignorant person who doesn't know what's going on in the world okay you have to think about it you have to consider it you have to understand it deeply you have to know what led to the current condition if you're going to ever change the current condition you don't know the causal factors that led to it that's not the law of attraction that's called being a dumb ignorant new age fuck okay and i won't i'll say it nicer in other places but here i'm going to just say it how it is you've been had you've been here this is what has happened to you you've been clown shoed there's the new verb for what you've been what's been done you've not only been clowned you've been clown shoed now it's a verb folks okay might be the first person that ever ever said it like that you've been clown shoed okay and it just it the the whole the space that you're holding as they say in the new age movement holding the space it reeks a clown shoes man it really reeks a clown shoes okay so let's get out of this notion that the blue avians are coming for us it's a cia psyop folks the q and the white hats are coming to save us it's a cia psyop folks that there's fifth dimensional entities coming to save us it's a cia psyops folks it's all bullshit all to get you to do nothing but sit there and hope and pray see that's all it's about folks it's about sitting there hoping and praying that something other than yourself will come to your rescue and guess what that does to you it makes you a lazy do-nothing piece of shit that's what it does to the people who subscribe to that only action based in truth and true care will ever get us out of this mess i don't give a fuck what you think how that offends you what religious affiliation you belong to that that offends your bullshit religion that's what you have you don't have truth you don't have true care you have bullshit religion bullshit religion is what you have i'm not talking to any of the callers here today i'm talking to people out there in woo-woo land okay you've been clown shoot punks and punk-ets you've been clown chewed all right embrace your clown shoeing because that's what has happened you know and you know i i gotta make a joke out of it and you otherwise i'd sit here and fucking cry all show i won't even explode with rage if i really showed you how i think i sit here with my head down on this desk and weep incessantly that's what's really going on inside of me because of how dumb people are and what they're willing to buy what they're willing to buy into thank you i need it too i really need it too a good healthy fruit-based smoothie excellent give me a second because i'm just going for this right now yeah thank you i need this i won't even get the straw out of here because i just want to gulp it oh yeah our smoothie's awesome just think of clown shoes not so much i gotta make it the farthest that it is folks because that's what it is can you get one of you guys hand me a tissue please uh there's some right here in that table thank you if you can reach it behind the camera if not don't worry about it right here if it's possible to get to it without moving anything all right great thanks okay so see this is the thing folks it it's a combination of rage and disgust thank you rage disgust and really the word is contempt that's what i really have for people out there and guess what people will say oh you shouldn't have that if you're really truly spiritual guess what i don't give a fuck about your definition of spirituality okay i don't really give a fuck what you think of it okay once again i'm not here to be liked i'm not here to be popular i don't care what people think about me i know what the truth is and that's what i serve i don't serve people i serve the truth that's what my love is for my love is not for people my love is for the truth my love is for what is right my love is for true morality true objective morals harm none do what you will anybody else try to stop you from doing what is your right to do that's not their right they're in the wrong and this is the world that we live in people that think other people have the right to do things they have no right to do and people that think that they have the right to stop other people from doing things that is their right let me say that again we live in a world where people believe that certain other people calling themselves government have the right to do things that they do not have the right to do so they support immoral violent behavior of government and enshrine it as a right when it is not and then they also support those very violent peoples quote right which isn't a right to stop people from doing things that is actually the right of those other people that they're stopping from doing those actions and that's not a right on the people who are stopping them from doing it who are thwarting other people's rights that's not one of their rights to do that so we live in a world that's completely inverted satanically inverted and upside down people believe certain other people have rights that they don't and they believe that people who do have the right to do things that other people should come and stop them from doing those things that are actual rights that is called satanism i don't care what name you want to euphemize it there's two things that it really is and they both begin with s it's satanism and it's slavery and both of them are immoral and no one even has the right to immorally do them or even immorally condone them if you are condoners of those things you yourself are immoral and wrong and have no right to condone it and the people who even a lot of the people who even listen to this show still don't understand that today and in all honesty that really makes you a piece of fucking garbage really that's what it is and i have to try to even lighten it and just totally scathingly make fun of it because of how sad and immoral it is otherwise i'll just be screaming all day so let's interject some you know scathing humor into it to tell people what they really are which is a bunch of fucking clowns all right let's go to uh sybil d you're live on what on earth is happening welcome hey man hello hey hear me yes um i just want to start off by saying i appreciate you putting out real shit and standing behind what you say always thank you thank you i appreciate that um sorry for interrupting the show i apologize if because i don't really have any questions i just want to say minutes ago i was on this call and i left because he just made me realize i really didn't have the balls to speak in public when i thought i had them so thank you i just wanted to say thank you for making me realize that and thank you for getting me um helping me get rid of my ego i appreciate that if i could give somebody a little bit of a kick in the rear end to get them motivated and doing something then i've done my job you know and that's what what on earth is happening has largely been about folks you know what i mean even the whole public teaching work that i've done i think i could even do better by private mentoring and i think i'm going to start down into the not so distant future doing private mentoring to try to really build one-on-one skill sets and knowledge with individuals that i think could really become powerhouses in this whole endeavor i think if i don't even try to maybe create a couple of you know younger individuals help influence a couple of younger individuals to really do this work at a high level like i feel like if i die and leave this world i haven't really done my job by that's instead of having a child and doing that it's like replacing yourself by conveying a deep portion of your knowledge and skill sets into another person then i'll really have done my job of duplicating myself and i think i can i could somewhat influence that by teaching at a distance like i have been but i think i really have to reevaluate some things and get maybe even take some time off in the future to get into deep private mentoring like maybe even take off a year and say over the course of this year i'm gonna private mentor five people that i choose you know and i mean go heavyweight in person here in my home of private mentoring people in a very very deep way almost every day you know that that is one of the things that i may do coming up i've really been giving it a lot of serious consideration because i think that's the thing that is is lacking in most uh areas of human endeavor is mentoring you know and uh i'd say even trying to target maybe uh people who might be potential mavens of their community and or family and mentor them so we'll see it's just an idea i'm kicking around in my head at this point let's go to censor nothing you're live on what on earth is happening welcome to the show hey mark can you hear me yes i can mark pleasure to talk to you man hey i've been listening to you for over a year now and i just want to say you've helped me so much with the compilation of information very consistent easy to tell that there's no loopholes or missing information you've got it all and uh i preach to you uh to everyone i know about you okay i appreciate that thank you got terence mckenna a bit but uh on steroids you know uh definitely i'll take that as a compliment thank you uh that's sweet goa i just wanted to ask you today about emotional authenticity which is something i believe uh you have in spades and it's one of the things that everyone in this movement can use to their advantage because when you know the truth you can't uh lie about it uh people attempt to lie at times you know politicians trying to pass off bullshit and you can see them in the eyes and it's pretty yeah absolutely and you can see it in their eyes because there's no actual they're not convinced there's no authenticity they're telling a lie that's right now maybe high degrees perhaps a psychopath or sociopaths can mimic emotions with maybe more convincing stuff to all those fucking sheep and they can get by with it right but uh in terms of uh you know the truth if you actually are telling something that you believe it's not necessarily true what you believe but for example religious zealots or something they can say things and they can think it's they can believe it right at their core you can tell they believe it right absolutely but the the it doesn't necessarily mean the material is true so one thing i just want to uh encourage all our fellow listeners here as well as just tell you mark thank you so much for your emotional authenticity it's something that since the moment i uh saw your work it just it's so obvious that you're you believe and you know what you're saying it's correct you're not trying to convince anyone you're not on the fence yourself there's conviction and that's one of the strongest things i think we can use to our advantage in this movement i totally agree i think that's a great point um and i think that a lot of people are stuck in a doubting stage and again the way that i would personally love to remove all doubt i've said it a million times i'd love to be able to just temporarily kidnap that person take them to a ritual satanic ritual chamber house throw them down in the basement or in whatever dungeon the rituals being conducted in and let them see what the world really is let them see the power brokers that attend let them see what they do let them see their mindset and then all doubt would be removed but i don't have the power to do that unfortunately you know so there's this satanic doubt that creeps into every area of their minds of their behavior of their actions they they're just stuck in this doubting mode and they can't really come to say that they really know you know and i can't make someone know it i can only put out information point to what they have to look at and then if they do their due diligence they'll come to know it but if people don't put that work in you'll be stuck in that satanic level of doubt forever for the rest of your life and that's the worst place to be as far as i'm concerned knowing a little and saying well i don't know that wish you what look even in religion that's talked about okay even in the whole religious communities it said in the new testament uh you know god looks at the uh the the cold and the hot as being okay they're authentic right meaning the cold they're the true psychopaths they're authentic they're just doing what they are they're just behaving as they are and then the hot that's the true spiritually fire awake lit people and they're doing what they are you know they're they're putting out in the world what they know and there's no doubt there's no doubt there but the the lukewarm are the 95 percent in between and you know what they're doing they're scratching their head and i don't really know too much about that and oh well i'm a little wishy-washy on that and it's like that's the worst place to be and you know what there's a there's a movie that i love they live with roddy piper who i very thankfully got to meet in person before he passed away and uh i kind of kicked him in the ass and said you know they live really isn't uh it's not really a fiction it's an allegory you know and um i said why don't you go out there and start telling people that you're really charismatic i actually said that when i got to meet him here in person in philadelphia at the trocadero and i said go out and you know they'll take it from you like they don't really like me that much some people can hear what i'm saying and they can you know i i don't burn them too too hard they can take hold of that electrical circuit and not get burnt too bad but most people they can't hear it from me you know i i gave him my card i said check it out i said you know but but you you're an entirely different story you have charisma people already love you you're like one of the most loved professional wrestlers of all time you get out there and start saying this they'll take it from you you know and he said you know what i just might start doing that i have some connections with obviously sean stone and you know sean was friends with alex jones a couple of months later a few months later actually he shows up on the alex jones show doing an interview and then several months after that he ended up dead you know they don't want big celebrities like that going out and speaking the truth yeah the the and the people who think that that's coincidence you know there goes the uh the slide whistle you know uh but um my point is and they live there's a uh there's a conversation between the main character played by roddy piper named nada and then his uh friend who is the black gentleman that he gets in the big famous fist fight with in the alley to try to get the sunglasses on him uh being an allegory of trying to help him see the truth and uh before that altercation in the alley they're talking in the uh you know construction site and um piper is telling him his world view and the other guy i can't quite remember his name but he basically says hey i'm always walking the white line i try not to bother anybody so nobody bothers me meaning he doesn't get involved in all of that right he just lives his life he just tries to make a paycheck that's it okay and you'll hear this over and over i'm too busy just living my life trying to make ends meet bullshit you're lazy you don't want to get involved you want to stay safe it's cowardice that's what he was he's just a coward okay apathetic right doesn't care doesn't want to know too cowardly to get involved right and what does piper say to him and this is about the whole idea of the wishy-washy the lukewarm it's the worst place to be karmically he says pipe the piper character nada says to him the white line is the worst place to drive brilliant line you know that's where you're going to get clipped from both sides okay you're going to get into an accident from both sides if you drive in the middle of the road you gotta choose a side and know definitively that you've chosen the right side and remove all doubt take all doubt away okay so you know continue if you want to i mean i was just my take on all of that but continue if you have any other questions or anything i want to just firstly commend you there with some authenticity your anger is appreciated and you it's very difficult to mimic true emotions so this is why it's excellent to see you see all these you know you know singular toned speeches by liars and there's no emotion there's words they can use fancy fucking like whatever but you can cut right through so mark let me give you my story quickly the other thing is real quick before you go to that is a lot of people cannot display genuine anger they are they have it was has so been suppressed so been buried inside of them that i don't think they've ever had any kind of even a verbal explosion of anger let alone a physical one they've never actually gotten that angry and i say that that is soul sickness that is illness if you cannot get angry about the injustices that are going on in the world today and how rights are being human rights are being destroyed there is something utterly and completely broken inside your soul and people i don't think people hear me truly when i say that i mean that the soul the spirit itself is broken you know and people have to really look into that statement and hear what i'm really saying when i say it's broken okay so go ahead it's as if it's as if a facet of the the soul any emotion you remove the ability to feel sore happiness if it were something such a such a huge emotion like that and the other chemicals that come along with it in the body if you were lacking that it would be very easy to say if someone couldn't feel happiness they were an incomplete or broken human being and this only shows that the destruction of care ceremonies that's right are obviously working that's right as they want to follow the fucking carrot on the string all that bullshit so mark 27 in 2017 uh i just have a small uh pretty interesting encounter sure that took place myself in the uh city of aquitos peru um which is located on the amazon river i had traveled to that uh place to uh with the iowa scaros with the sacred plant medicine ayahuasca for my own uh self-help and work and i have returned uh for many years now to uh continue that work as it has been very effective i've found for myself and everyone i've witnessed as well take part in the ceremonies there excuse me so this man i ended up talking to uh outside of a restaurant in the sun for a couple of hours the conversation uh began with him talking to me about uh world uh passports actually and how he'd renounced his social insurance number and gone down that route to leave england and he then continued to tell me uh about a virus that would be unleashed in 2020 by the name corona virus he told me about the uh jamaica numerical uh values of the word corona and the six letters uh encompassing it and he basically told me a lot of the stuff that's been unfolding sure which is pretty yeah pretty wild there's definitely people who know about these plans before they're rolled out i mean you know you could just uh even infer it yourself uh intuit it yourself by just taking little hints that they drop out there into society you know yeah yeah and and to be honest i was uh i was not nearly as uh well-read with some of the allah and other themes that he was talking to me about right i had seen the tree of life and the tree of death and understood some of those themes which he was talking to me a lot about but this guy this guy also associated um all the virus symptoms with correlating to the effects of 5g and i know you've got uh upcoming work that you're going to be doing so i don't want to go uh sure exasperate you know well those are those are really great points to bring up and i will be covering some of that in future episodes but there are now scientific papers published in peer-reviewed scientific literature that talk about the direct correlation between 5g frequency fields and the manifestation of certain types of coronavirus in the human body is that possible absolutely absolutely it's scientifically proven to be possible you know again i recommend people check out the invisible rainbow by arthur ferstenberg which is uh you know book written i believe in the early parts of the 2000 or maybe 2010s but anyway that book uh talks a lot about affecting human health with frequency fields and electricity so uh and you know people like tesla knew this people of course like royal raymond rife certainly knew this um you know you could look into a lot of pioneering researchers work on that uh check out arthur firstenberg's work on it and uh you could read modern literature that is talking about the very same things through 5g intensity frequency fields so you know all that literature is out there if people want to look at it the people that don't want to look at it want to remain closed-minded and uh not aware of what is even possible so let's do some rapid fire uh question and answer now so folks when i bring you on you know very briefly uh you know you can say hi but go right to your question or your clarification request we want to get a bunch more in before the end of the show all right let's go to um uh clee you're live on what on earth is happening welcome clee however that is pronounced unmute yourself and you're live there you go all right hi hey thanks for having me on um i i've listened to the entire podcast series over the course of six six or seven months a couple of years ago i really appreciate it and thank you i'd like to get into a long thing about the near kundalini like experience ahead during that process but my question is a bit more pressing too okay uh so it's just based on the truth of what you've uh illustrated through your podcast series my question is this if cause and effect is in operation as it is and uh we're in this realm where there's these demon worshipping psychopaths running the world and what you've called our society being basically a huge satanic ritual yes uh you know nearly every aspect of our life is part of this ritual right um if we existed in some form before we entered this life in these bodies my concern is what cause led to this effect and my bigger question is why i guess my question is how could we have ended up in this place great question and is this place then hell uh we're turning it into hell i i would not say that it is forever a hell but can it become a hell absolutely okay so um the no better definition of hell exists than something that is eternal that can never be changed that isn't eternally bad that can never be changed okay where freedom doesn't exist because the no better definition of evil exists than the destruction of freedom which is the definition of evil that jeremy locke put out there in the end of all evil okay so um how i would answer this question is one this is not hell this is a place of infinite potentiality where we can manifest anything we want we have manifested hell the re the cause that led to that effect is bad thought forms entrenched in the human soul bad thought wrong thought manifests wrong conditions immoral thoughts leading to immoral conditions exactly my my producer is uh very adeptly displaying that it's been a uh mindset of clowns actually okay that's really what it is okay and then what here's what people have done we have accepted the thoughts of the least wise among us we have accepted the thoughts of all the clowns among us that just want to see the world burn okay and again they aren't like that coming in i don't believe in this notion that oh just psychopaths are waiting in in another dimension and they just all come here you know all these bad souls just arrive here no they're made here they are created here through th wrong thoughts that and those wrong thoughts lead to wrong actions i really recommend people still please read the works of richard weatherill read he will help people to understand how everything that happens in the world that manifests things that we say we don't want is a result of wrong thinking wrong thinking incorrect thinking if you accept a an axiomatic premise that is incorrect and then you base your behaviors on an incorrect premise your thinking is rooted in a completely wrong way of thinking and doing something you are going to manifest chaotic results and you are going to manifest things that are not only incorrect but are morally wrong that which is correct as being true is going to lead to what is morally correct morally true okay and is going to lead to order and freedom if we accept things that are incorrect and take that into the mind and continue to base our actions upon that which is incorrect we are always going to manifest disorder chaos and slavery in the world and no you can't make anyone believe that it is an impossibility to get anyone to accept that they have to come to that understanding by deeply deeply deeply considering and thinking about and breaking down and analyzing how those dynamics work in the very real world of nature okay and that is how natural law brings to us the consequences of what we put out into the world through our behavior which is ultimately based on our thoughts that's why i've said one of my quotes is be responsible for everything you create by being responsible for everything that you think this is how we co-create our shared reality on earth it doesn't have to be hell that's the sickening saddening part of the whole thing uh to to the caller the sickening and saddening part of the entire dynamic is the world doesn't have to be this fucked up it could very easily be a wonderful great magical place for us to live and explore our infinite potential but we are building a prison of hell instead we've been given free will to create something wonderful and magical and free and of infinite potential and instead we said you know what we're going to take those lego blocks of creation or we're going to build a nice prison wall all around ourselves and then we're going to live in that prison how foolish how dumb does a population have to be to think that wrongly to create that immorally here's how dumb that's about how dumb you gotta be there's the iq and folks i calculated it with a very specific iq test and there was the result that's the result of the iq test that that's humanity's iq right there right there right you can't argue with math you know that's it folks yeah yeah oh i don't this must be a size 666 you know and that's what humanity's wearing folks they're wearing the 666 because that's their number you know but you can't you can't tell anybody that they know better they're wiser they know how it works and they're just shit drooling dumbasses actually they're just fucking clown shoes that's all they are that's what really what dante meant to write wasn't the divine comedy he meant to say you're all fucking clown shoes that's what dante really meant to write instead of the divine comedy his actual uh first draft was called you're all just fucking clown shoes okay because that's what this place is it's a big fucking laughing joke it's not really a joke it's very serious but for anybody who really knows what's going on you you you gotta just look at all these people around you as just they're shit clowns that's it they're walking shit clowns they're shit golems you know that's it bags of fucking shit that aren't even really alive that's why the dark occultists call them the dead how could i argue with it it's so true and then people go oh you still think like a satanist no i just recognize that even psychopaths can speak the truth that's all something can come out of a psychopath's mouth and still be true see that's the thing here's the thing folks most of you are still lying to yourself that's why you're not really awake that's why you're not initiated that's why you're not enlightened you're still lying to yourself you have a false understanding of what enlightenment is enlightenment is not flowery bullshit seeing the world through rose-colored glasses and then blaming everything on the super elitist instead of the average dumb fuck the average dumb fuck is what created this situation by continuing to propagate bad thinking and breeding new bad thinkers by teaching it to their dumb fucking children that they shout out and i'm not saying let's go into eugenics and call the world i'm saying if if we're going to say we're really enlightened and we have the truth in hand the answer is you got to become a public teacher because there's a bunch of fucking dumb children running around controlling you controlling everything and saying we're as the stupid fucking teenager we're going to set up the and take over the house we're going to set up and take over the house from the wise parent and if we let them do that we deserve whatever they do to us these are the dumbest most unwise people who have ever lived all around us and we're gonna just kick back and go let's let them take the whole fucking world and let the world be run by total fucking clowns think about how immoral that would be to do and this is where people go oh the world's taken i'm not gonna do a fucking thing i'm not gonna do anything you're immoral that's an immoral position to take by not getting involved you're complicit in the evil that has taken the world and you're going to help it become a worse hell through your inaction i don't know how much more hammering and beating on the head i got to do to get people to understand how this works and this isn't directed at any of the callers i'm directing this out there to the dumb fucks that still don't understand you know and it's a lot of my viewership you have incomplete understanding you think you know and you don't know let's go to uh court theo i don't know if i'm pronouncing that right but anyway courts feel you're live on what on earth is happening let's go you have to unmute yourself you're unmuted at the server end short spo all right there you go there you go welcome yeah hi uh it's cevio i just changed my front name steve how you doing get in the blog how's it going not bad uh yeah um they're golgothans for the most part yeah it's it's uh people who would have been cheering on christ being nailed to the cross and again i'm not an exoteric christian folks i don't believe in religion it's a story it's an allegory about a good person being killed while they let uh an evil murderer go free and roam the earth that's the whole idea in the new testament of you know them asking on passover uh what prisoner do you want us to set free and and it says in the biblical allegory with one voice the people cried out barabbas there was no doubt or question who they wanted they wanted jesus dead they wanted the good man dead and they won the evil man roaming free and doing his evil on the earth they wanted a rapist and murderer to be set free and they wanted a good man who would harm nobody but challenged established wrong thinking to be put to death and then they cheered on the police of the day the roman centurions while they killed an innocent moral human being and nothing has changed zero has changed the same people of that day who wore the big red uh floppy clown shoes and their toga uh would have been saying the same thing had they been alive today and the people alive today are saying the same things and advocating for the same violence and the same immoral behavior that they would have been advocating for if they had been alive two thousand years ago nothing has changed in consciousness so yeah good go ahead yeah i i'm just uh currently i've been uh focusing on a lot of these outed uh disgraced uh hollywood personas and other personas that we know about that are complete cult members and just just just like looking at them studying like every move they're doing i've been getting into like um like studying their microaggressions and their tells and stuff there's this guy um out on uh youtube and he does great uh uh behavioral analysis and now that we know so much about them um now we could really really decode a lot of their tells and what what really is going on sure i mean this pedophilia in hollywood has been going on for decades folks decades you know and people on the inside have been trying to tell people you know watch the documentary an open secret you know watch the documentary the two quarries you know you can go on and on and on yeah the new one out of shadows out of shadow yep exactly yeah it's incredible yeah i'm gonna try to get the the stunt man mike smith on the show at some point if i can i'm gonna at least put the word out that i would like him to come onto the show and tell his story you know because he saw this satanism and pedophilia from the inside so i want to bring people on like that i i really hope one day um maybe jamie deluxe could uh could look your way sure i would have him on for a segment no no question i'm not sure he's he's been exposed to your work fully yet but um uh i've seen some of his work on this aspect of what's going on and it's pretty good so he he barb introduced me to and barb really liked him yes absolutely yeah yeah i would i would have no problem bringing someone like that on they've seemed to have done their homework so yeah certainly okay do you have anything else any other questions um no just uh just that that was all i had to share thank you thank you so much absolutely and great point brought up without a doubt that people are looking more into the pedophilic aspects of this you know the whole jeffrey epstein scandal has made people wake up to some of that people having more time on their hands to study some of this during the lockdown have woken up that has woken up a lot of people to this and again uh there were big marches in hollywood i don't want to say huge but hundreds of people you know about um the pedophilia that is going on within hollywood and really throughout the world you know and again like i said we can't wait on the mainstream media you could tell by looking at some of those marches on hollywood that um it's very grassroots no fancy signs you know like soros funded operations you know very grassroots effort okay and i'm not saying protesting is the answer either it was more like an informational outreach okay you know forget protesting and asking your masters to do anything they ain't going to do nothing they want you right where they got you but educational outreach is fine i'm all for that you know help your fellow uh you know human being understand what's going on all around them you know bring documentaries you know bring an open secret bring uh the unfinished documentary conspiracy of silence you know bring out of shadows etc you know this is what people have to see and understand is going on and you gotta look at shadowgate how they compromise people you know blackmailing compromise that's what this is all about that's how they get people voting in the globalist agenda that's how they get career politicians on their hook that's what it's all about folks and people don't want to learn and look at how it really works but because they prefer that the world not be the way it is see that's the that's the second part of you know the initiation method stop dreaming stop imagining to the world to be some other way than it actually is it goes hand in hand with stop lying to yourself stop lying to yourself and stop dreaming imagining the world is some other way because you would prefer to live in that world instead of accepting the world as it is and then changing it from there that doesn't mean you accept that it should stay that way it means that you have a clear and accurate understanding of how it actually is and then you work from that point to change it that's just like the first dictum of initiation which is stop lying to yourself you have to accept yourself from where you're at and you start changing yourself from where you understand yourself to be you don't jump ahead there's no shortcuts okay and to briefly go back to what not this past caller the one before him was talking about authentic the authentic personality you know i look back and i i look at my early work and i'm like man was i wearing a mask man was i not being genuine to myself because i wanted people to listen and i i knew how brainwashed people are folks this is the thing folks you gotta actually in the early going try to speak to the brainwashed if i came out this hard hitting all my earliest shows nobody would be able to hear it but that doesn't make what i would be saying untrue see that's the thing this is what you got to know about how emotional brainwashing and mind control work the people who say i don't want to listen to that because of how it was delivered you're the brainwashed you're the brainwashed you're the brain washed you are the one who has the problem just because you don't like how someone delivers truth doesn't mean that the statements they made were untrue i can listen to someone saying something that is true and still hear it the delivery does not matter the veracity is what matters if you accept that delivery matters over veracity you've fallen prey to a mind control technique called emotional mind control and you are the problem you have the problem i think this is one of the things that should be taught endlessly barrage people with that first say do you think that the truth must be put in a pleasing tone for it to be true do you really believe that ask people around you do you think that the truth must be explained in a pleasing tone of voice for it to be true yes or no be honest put that out there to people and say be honest with yourself fuckhead do you really think that is that what you really think that the tone of voice someone uses changes that whether what they're saying is true or not so i could say the federal reserve is basically one huge scheme to rip off the savings of the people of the united states and i could say in a totally angry confrontative voice hey dumb fuck the federal reserve is devaluing your savings and they're robbing you they're robbing the value of your earnings of your labor like that and then another person could go the federal reserve is a government-appointed body that is there to protect the purchasing power of the currency of the united states and they're doing what is in your best interest is that going to make the first statement untrue and the second statement true you really believe that this is the problem folks that's called mind control and i'm trying to do this to shake you the fuck out of it shake you out of it because if you believe that just the tone of voice dictates whether something is true or not let's get a good one in there i gotta get just the right squeeze in there but that's what you sound like and this is what you look like that's what you look like and here's what you sound like i'll get it exactly right there you go great that's it so you gotta get your head out of that level of thinking that just because someone is angry when they say something doesn't mean what they're saying is true and there's a reason for that deep anger if it's righteous let's go to chris chris you're live on what on earth is happening right to comment our question hey mark thanks for taking my call you got it um and thank you for your service to truth thank you that you're coming from a veteran i had uh something i wanted to read to you from uh uh it's something i wrote it's about natural law okay natural law is the only law that can rightfully exist it enforces itself and as actors we can live with it or go against it at our own peril to live with it we develop codes of conduct to live by principles that are in keeping with those natural laws and with respect of the individual there are natural law of rights these rights cannot be taken away by another sentient being but they can be violated justice is when such a violation is made as right as possible under the circumstances and that's it excellent i think it sums it up very succinctly you know and if more people just put things out there like that people would come to an understanding relatively quickly that government is slavery and has no right to exist you know because here's the thing what i can't even fathom is how do all the christians out there actually believe that they're serving god if they believe that government authority is is righteous and is legitimate morally legitimate they can't see the violence inherent in government they can't see that it's commands of compliance it's not punishing of the guilty that's such bullshit often government punish the punishes the innocent and lets the guilty roam free you know and people still can't see this that that's what what you just read is what god's law is about screw man's law man's law could be as corrupt as the day is long they can be as corrupt as a human being can become corrupt why would we put our faith in that why would we put any trust in that instead of understanding what the real laws of creation are as far as objective morality is concerned why do people think you can't determine and understand that you can't come to an accurate determination of that of course you can that's what the objectiveness the objective reality of natural law and morality is all about they are objective truths they are not opinions they are not whims likes preferences or opinions that can change over time they are immortal principles eternal principles that can never be taken out of effect in the universe you know and this is what we have to try to convey you know this has nothing to do with what some person wrote down natural law is not written uh by a human hand natural law is written in creation it's written in in the universe itself it is written in the human heart and people cannot grasp that for some crazy reason they they cannot grasp that that is what it is and until we understand that's what it is we're going deeper and deeper and deeper into horror and bondage and and folks i blame a lot of people in the anarchist movement a lot of people in the freedom movement because a lot of them are moral relativists you ask a lot of the people in the freedom movement do you think morality is objective or subjective and a lot of them will go oh it's totally subjective human beings make up their own standards of morality and it can be different for every person you you that is so prevalent in the alleged freedom community that what you are going to have is the the freedom to decide whether you go into a left-wing prison or a right-wing prison that's about it you know and you're probably not even going to be able to decide that so caller i think that's really great and uh you know i think that that is what more people really should be out there doing is just publishing simple things like that make it an internet meme put it out as a little pdf document record it as a short youtube video put it on library there's a million things that we could do you know let's go to call it call it you're live on what on earth is happening welcome right to comment or question please uh unmute yourself you're unmuted from our end call it jared you're live on what on earth is happening hey can you hear me yes perfectly thank you i have a question about uh natural law sure and courtney so um if uh if the self-defense principle isn't used when somebody uh aggresses upon uh something that you own and it then takes it um if you don't use the self-defense principle and consent whether coerced or or through um deceit let that person take it is that in fact giving it away making it not theft i know this is a stupid this sounds like a stupid question it should be self-evident meaning if you decide that you are not going to take any retribution upon anyone for take thieving from you that is within that's within someone's rights you cannot take action on a thief okay however is it recognized as theft to the law if you let somebody take it absolutely absolutely that they still broke natural law okay so um if someone else witnessed that i would say they still have the right to treat that person as a thief and all that entails you know if you say i would ask that you not hold them accountable for that because they took from me i would say you can ask someone else to do that but i wouldn't say that you can stop them from taking action on them i'm i'm a little bit more hardcore on thieves when it comes to that you know so can you not make it theft no but is it your right not to pursue any repercussion upon that individual for the theft that they conducted in the physical world it is your right not to do anything but can you tell other people that they can't take action against that person i don't think you can force them to stand down on action if they witness the theft and want to do something to that person quite honestly and guess what i i i in a society ruled by natural law i would treat theft brutally brutally you know and that doesn't mean in the current conditions that we're talking about with you know children taking a piece of bread to survive okay you could you could look at the actual situation but guess what you know what i would treat brutally people going door-to-door and taking somebody else's hard-won stuff that's on their step because amazon left it there you know i would treat that barbarically just to be honest that's what i would do i would treat it barbarically you know uh you know god help somebody if i catch them stealing something from me they're gonna be really they're gonna have a problem on their hands okay they're not going to have to worry about the police that's all i'm saying you know so that's the whole thing is yeah you can say i forgive them and i'm going to let it go and i'm not going to do nothing and that's your right but i wouldn't say even that person can say oh hey the person across the street witnessed the entire thing don't they i'm going to say you i can stop you from doing anything to that person i don't think you can under true natural law you know because that behavior is actionable it's actionable they took one of your rights you know that's theft they're taking your right to your labor and that's really a claim see people who conduct theft on other people it's like saying you're my slave you did the labor to acquire that and now i'm just taking it so i'm taking your labor and that's a claim on your body people got to learn how to keep their fucking hands off of other people's possessions learn what you own and what you don't learn and don't touch other fucking people's stuff or they have a right to be brutally barbaric to you if you violate that right you know i don't really care what people think of that i'm saying what the truth is in that situation you know in the in the past i would have taken it a much lighter-hearted approach about it and tried to explain it much more diplomatically but i don't care anymore you know i'm just going to come out and say it as it is you know so the first part of your question yes the person would have the right to say i don't consider that theft but the second part is if it was witnessed by someone else and somebody else knew that they're dealing with a thief now the person who was stolen from can ask another person not to do anything to them but they can't make them do that as far as i'm concerned because they actually violated a right and whether they violated their rights or someone else's a violation of someone else's rights is a violation of everyone's rights no i was really just asking if consent somehow negates the theft no it doesn't negate the theft but it is your right to say i am not considering it that therefore i'm going to quote let it go you're not even forgiving the person because forgiveness would have to work both ways they would have to be very seriously sorry for doing that but you know i i just think you know maybe you give thieves a couple of chances and then after that it's on you know i mean like literally i you know if a person can't rehabilitate themselves out of the behavior of theft you gotta say to them give them i almost believe in giving people one chance to rehabilitate you tell them one time this is your last first warning and your last warning and then that's being excessively nice that's being excessively ethical as far as i'm concerned you know i'm telling you i'll tell people ralph tell a fucking cop and judge right out in the open i find anybody stealing my property they're gonna be hurt i don't give a fuck what you do you know you're not gonna take from me and i'm gonna lay down like some little bullshit pussy you know so i think that's how people should treat thieves and we shouldn't need cops just go get them that's it and that goes with mafias that goes with fucking violent drug cartels you want to solve drugs do it peaceful you want to be violent about it people could should come hunt you they should come and hunt you you know it goes the same for people who think they're god and think they're fucking gods of the earth and they own other motherfuckers and they're they're there are masters and where they're slaves you know i think it should have been put down a long time ago it should have been put down a long time ago um my producer is trying to get my attention is he too low he's low yeah uh raises volume all right go ahead um so um i was gonna say though don't you think that um we shouldn't we shouldn't resort to punitive violence it wouldn't be violence unless unless well i mean if he's not uh if it's not to stop an action from happening and it's punitive not necessarily because then that means if anybody can get away with it nobody can do anything to them if they can't be stopped if they can't be caught in the act and no no actionable behavior can be done to them and it wouldn't be violence it would be i'm just self-defense see the whole thing is the only violent behavior is in initiation you can only start violent behavior if a violent behavior is responded to it's not violence it's self-defense this is part of what people still don't understand about the principle of self-defense the principle of self-defense is not initiation the only time violence takes place is when someone starts it hey mark so if somebody killed somebody and then they escaped yes their behavior is still actionable that behavior and a bounty hunter chases them down and uh takes them out you know he initiates violence no he does not incorrect that is an incorrect understanding of natural law the person would still be able to go after that individual and conduct harm to them that would still be self-defense because the person has no right to do that and act as a predator on another person if they killed the other person in the wrong that which is called murder if they were defending themselves exercising self-defense against violence then no one should go after that person so if it is determined that that person conducted murder yes somebody can go and get them so that's natural law you know and i don't think any institution needs to do that the people need to do it once you create institutions that will do something that the people are too cowardly to do you have government again nobody but the people themselves have the right to protect their rights you can't just say only this institution has the right to do that anyone has the right to do that and that's a that's a hard core world that i want to see come about how many people are truly ready for that responsibility 99.99 of people will say they're not ready for that responsibility and that's all the time that's why the world is still in bondage folks that's the very reason we're still in bondage that's all the time we have for this edition of what on earth is happening ladies and gentlemen remember government is slavery we'll see you right here next [Music] week [Music] wow [Music] don't you ever don't ever [Applause] [Music] you

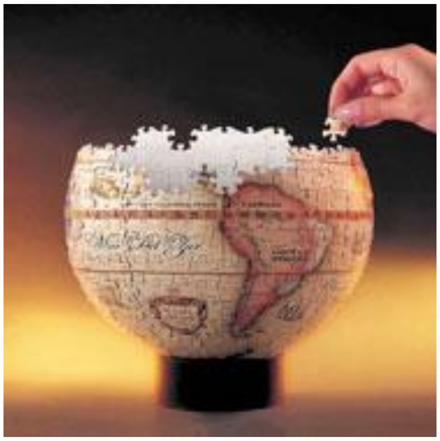
What On Earth Is Happening Show #236

Topics: *Questions & Clarifications Part 5, ARK 2.0 is finally here, WOEIH is transitioning its material off YouTube and onto LBRY, People in the Truth Movement should de-monetize their YouTube channels and stop taking YouTube's BLOOD MONEY, Most humans don't want to rock the boat and so they will never tell others around them that they are immoral people, the Unloved and Loveless pathetic excuses for human beings who work for Big Tech and the Mainstream Media, Human Beings are enslaving themselves by complying, Freemasonic lodges are largely corrupted and no longer in tune with the teachings of true esoteric Freemasonry, Transitioning properly to Plant-Based Nutrition, Every human being can eat a plant-based diet, When injections become mandatory WAR must begin, Kingship Rulership Government are all euphemisms for SLAVERY, Courage grows out of high-level Knowledge, the Q-Anon Psyop, Trump is not a savior, Turn the other cheek does NOT mean "Do not resist" but instead to keep giving the Truth to those who need to receive it, Are super right-brain people who have fallen for Religious programming dead or redeemable?, Morgellons disease is possibly a nano-tech bio-weapon, If you get offended at being told you're not doing enough, just put your name through a search engine and look at how much work you've released publicly, Go back and listen through all the WOEIH episodes from Episode 1, Intrinsic Value and what it REALLY IS, Humanity is entering a period of abject Slavery, Review of the Triune Brain Complexes, People are not truly receiving the message to get involved and take action, Mark probably taking a hiatus from live broadcasting, Those who complain or nitpick should ask: "What the fuck have YOU done?"*

freedom man that's what it's all about [Music] you've got to groove on freedom like the good book says [Music] welcome you are listening to what on earth is happening this show will discuss the topics of human consciousness mind control natural law the occult and all issues that affect the freedom of the people of earth what on earth is happening will endeavor to shine light upon the darkness of our world and to offer empowering solutions to the problems we face as humanity approaches its critical moment of choice and now here is your host mark pascal [Music] welcome one and all you're watching what on earth is happening i'm your host mark pascio my website what on earth is happening dot com ladies and gentlemen government is slavery and here on what on earth is happening we are ending slavery one mind at a time thank you for tuning in this week ladies and gentlemen this is episode number 236 of what on earth is happening today is sunday august 23rd 2020. we have a great show lined up for you here today we're going to be continuing our ongoing questions and clarification series this is questions and clarifications and call-ins show number five part five in a continuing series of asking me anything that you want to know or anything that uh you need clarification on regarding anything that i have covered as part of the what on earth is happening broadcast series thus far so let's switch over to my slide presentation i have a couple of housekeeping duties to take care of thank you there's the uh artwork for today's show as always what on earth is happening is a cumulative broadcast that means that if you're new to this broadcast if you are a new viewer or listener you should not start here you should go back to my podcast page on my website what on earth is happening dot com click the podcast tab and you should click the red link that says start with podcast number one and you should listen to the show in order from episode number one at your own pace if you start with this broadcast you're pretty much not really getting all of the necessary prerequisite information that is covered in earlier episodes so please if you're a new viewer go back to podcast number one and start in order you will get the maximum value that way and it will really establish a full understanding with all kinds of ancillary information to back up what i am saying in these broadcasts so i'm very happy to announce as my first housekeeping duty today that ark 2.0 is finished and ready so the ark is called the amazing repository of knowledge it is a offer of information that i make available and have made available for many years here as part of what on earth is happening the ark is a drive whether it be a hard drive or a solid state drive that consists of the bulk of my best research material and data that i have downloaded from the internet since i started looking into these matters so it is my own personal archive of research hence it's called the arc and arc stands for amazing repository of knowledge the first arc drive was a one terabyte drive offer one terabyte of information this new arc drive replaces the old arc drive offer so i am no longer offering the one terabyte arc i have updated the instructions on how to go about making a request for the ark on the ark tab of my website i'm going to be showing you that in a moment but this is the ad that my graphics people made for arc 2.0 this is the new arc offer arc 2.0 the amazing repository of knowledge get the whole picture so in other words don't just get a partial picture of what's going on in the world get the entirety of the picture this is such a problem in the whole so-called truth community the so-called freedom community you have half-assers out there you have halfway people in halfway understanding and that's not going to get the job done you need to go all the way in your understanding all the way in your knowledge you can't half-ass it okay so the arc 2.0 drive consists of over 26 000 audio files over nine thousand five hundred digital books in pdf and epub format and over three thousand four hundred video files this is all from my own personal archive of research and data gathered into a huge digital library and copied onto the two terabyte drive that you provide and again that drive can be a hard drive or it can be a solid state drive depending on what you purchase and send to me for the copy you can get more information on arc 2.0 at what on earth is happening dot com slash arc so i'm going to go to my web browser right now i want to show you the arc page on what on earth is happening.com so here's my website this is the home page if you click the arc tab or if you click this uh the arc tab is right here i'm circling it i'm highlighting it okay this is it right here right in between podcast and bio that's the arc tab okay also if you scroll down to this little button graphic here on the side menu it says get the ark get the whole picture you can click that as well all right i'll click the arc tab that's going to take you to a description of what the arc is so it says you ship me a two terabyte hard drive i'll fill it with information and ship it back to you it's that easy it really is that easy folks there are some instructions because i want you to follow my shipping method and i'm pretty meticulous about the shipping it still is quite simple okay you just have to take your time pay attention and read the instructions you can get the instructions by filling this form out on the what on earth is happening slash arc page okay and then hit request arc shipping instructions that will then take you to a page where you can download a pdf with the new shipping instructions okay so that's the arc drive offer arc 2.0 folks if you thought arc one was an amazing repository of knowledge wait until you see arc 2.0 i mean it blows my mind and that's kind of hard to do in today's day and age but this drive is amazing in what is on it i think you know to myself when compiling this information onto a hard drive the unbelievable amount of data that exists in the world to corroborate and support the information that we have been disseminating on what on earth is happening for the past 14 years going on 14 years 13 years going all 14 okay and it's just unbelievable to me that the world is still as asleep as it is that is is still as spiritually deadened as it is that people still buy all the psyops that they buy into which we'll talk a little bit about today this information should be commonplace at this point and not only should it be commonplace people should be taking action on it and redistributing it and you know making this information commonplace knowledge all over the world by putting it out publicly and most people just aren't do that they're stuck in a place of inaction most of the viewers of this show and i'm talking right to you you are stuck in a place of inaction the vast majority of you you have not understood what what on earth is happening has been trying to tell you since day one since day one on this broadcast i've been trying to tell you it's all about what you do it's all about action this can help you to get to a place of knowing what's taking place a whole lot better but ultimately you could know everything and be completely ineffective in helping to change it because if you're not willing to take action all the knowledge that you take in is meaningless what the arc offer is for is helping people with half-assed knowledge that is not complete in their understanding or the information that they have is skewed they think they know and they know skewed data and skewed information and what that's going to do is make them ineffective in the long term in helping people to really wake up to what real spirituality is and what natural law is arc 2.0 will help to get you there then you have to activate your will and your courage put it into action as wisdom of doing the right thing with what you know and only you can do that folks i'm talking to most of my viewers out there you know and i'm going to keep hammering that on you because most of you have done nothing you know and then people want to say oh you're beating us up pretty bad mark and how angry and nasty you've been over the last many weeks yeah that's right i have and it's going to continue because i don't really see you guys doing much i see you guys talking shit talking a big game and you're not doing hardly a damn thing because you want the world to change on its own or you think this is some magical automated process and it's not this is a process that we self-direct it's driven by our own will and by our own behavior and if you don't take action it doesn't happen magically on its own that's some new age bullshit that you've been sold and you've bought this isn't an automatic process of evolution that is directed by nature wrong incorrect nature wants it to go that way the will of the creator wants it to go that way but it doesn't happen automatically at this point it's directed by our will and our behavior and if we don't take action it's not going to happen and that's the problem is most people have been convinced by psyops and by religion and by new age bullshit that this is an automatic process and it's just it's it's in the bag no it's not in the bag mark pacio doesn't got this okay you have to join the battle you have to join the spiritual war and take action all right and the ark can help you get the knowledge that you need to get on that battlefield so if you're interested in the arc drive offer what on earth is happening dot com slash 2.0 the amazing repository of knowledge two terabytes of the best research data that i have ever downloaded from the internet since i've been on it that is my offer to you ladies and gentlemen when you see what it is your head will spin your jaw will drop you will scarcely imagine that first of all this much data even is out there let alone that it's out there for you to take in offline you don't need an internet connection it'll all be right there on any computer that you attach it to all right that's my offer to you if you want to take me up on it what on earth is dot com slash ark a r k next we are still working on completing the mark pacio and the science of natural law documentary we're on track to deliver this by the end of the year you could donate to help complete the documentary at gifts.what on earth is happening.com there are five donation tiers 100 of all donations go directly to production costs namely paying a video editor right now plus then pressing the documentary all donors will receive a complimentary copy of the completed documentary on flash drive and dvd that is if you make the donation at gifts dot what on earth is happening.com if you're going to donate to this effort do not use the donation page of what on earth is happening that is just for straight donations to the what on earth is happening cause for the documentary please use gifts dot water on earth is happening dot com and you will see the documentary link on gifts thank you all right also a gifts new t-shirts flash drives the complete mark pacio one great work collection solid state drive and much more we have released world view violence and the real pandemics which was the latest uh documentary on flash drive and dvd in gifts we have released that publicly now on uh youtube and other channels okay so again i only put my latest one latest um presentation uh on the gifts area for a couple of months and then we release it for free so right now everything i've ever done is released for free including world view violence and the real pandemics we are actively working on folks uh uploading everything to library for more censorship proof um platform and i'm going to be taking down links to youtube uh i don't even care about views and hits on youtube folks not only do i not monetize my youtube channel folks i don't even care about views i could give a shit about youtube okay i think youtube are nazi censoring trash and i am taking down all my youtube links on my own website and i'm re-linking to library only fuck youtube fuck you guys fuck google your dirty rotten nazi trash and that's all you ever were and your families are dirty rotten nazi trash especially your mothers your mothers are trash who never taught you any morality you scumbag fucking nazis how about that for not monetizing a channel do whatever you're gonna do i'm saying the truth hardcore in your face and if you don't like it turn the fucking show off that's how it's going to be from here on out i'm not worried about views i don't care about who stops watching i'll get as nasty as i want to get on this broadcast because it's mine and for all you who don't understand that that's all part of real spirituality you're fucked up your soul broke and not me okay i'm saying it the way it really is no matter who it offends get as offended as you like boys and girls okay that goes for my longtime listenership as well as anybody who wants to try viewing it from here without watching the whole podcast series i don't give a shit what you think of this broadcast all right and actually i really never have okay it's your karma and it's going to be your funeral if you don't listen up and pay attention to what i've been saying for the last 12 fucking years 13 fucking years all right so that's how it is and that's how it's going to be said from here on out on what on earth is happening what on earth is happening is still proudly working in cooperation with autonomy we have two banners on the website that you can check out autonomy autonomy is the brainchild of richard grove of tragedyandhope.com you can visit their website at getautonomy.info or click the banners on the waternearthishappening.com website how to become the true media webinar is going very strong we had a very informative class last week on how to search the internet and the dark web we're going to be continuing those topics we're going to be talking about email setup and usage uh and we'll go deeper into uh you know some web browser technologies like web browser extensions and how to customize some of those uh this is going to be class number eight out of 23 this tuesday august 25th the webinar starts at 7 pm to allow 1 hour for students to enter the class class instruction starts at 8 pm us eastern time please be on time or you might miss important information that will not be repeated keep a notepad handy for notes and questions we take questions periodically during the webinar headphones are recommended if you want to interact with the class to avoid echo or feedback if you have any technological problems or any problems at all with the how to become the true media seminar please email truemedia what on earth is happening.com thank you to all attendees i think the webinar is going really great so far and it's going to be picking up in uh really kind of uh complexity it's going to be picking up in uh engaging with media we are you know covering now internet basics so we're going to get a little bit into networking as well probably the following week and uh you know take it from there and then getting into creating media so we're laying a lot of the groundwork and then gonna be getting into some more uh sophisticated stuff as uh you know the the webinar uh continues so thank you to all attendees as i said last week we are moving all of our content to the what on earth is happening library channel available at library.tv slash w o e i h for uh acronym for what on earth is happening l b r y dot t v slash w o e i h very simple url we are going to be continuing uploading to that to this channel this coming week uh adding many more uh videos from earlier days of what on earth is happening we'll be working in reverse chronological order that's how we're going to be kind of approaching it and um you know eventually all the content on what on earth is happening will be youtube free all the so-called truth movement people should take example okay get off this demonic platform let it rot let it rot and push people onto library which is not censored okay that's it that's what people have to do they have to take a proactive approach and stop caring about your view count and stop caring most of all about your bullshit monetization of taking youtube nazi blood money okay youtube are dirty rotten nazi low-life scum that are pedophile protectors you are pedophile protectors you rotten nazi scumbag fucking trash that's what you are okay and you want to take down people's channels and censor people who blow the whistle on the worldwide pedophile rings that are the governments of the world that are the politicians that are the law makers that are the dark occultists that run the whole damn show and you youtube you you people who work for youtube you are dirty rotten lying scumbag nazi pedophile protecting trash and that's what you've always been and your whore mother made you that way boy your whore mother made you that way girl that's the truth of the matter you have no upbringing you weren't raised by your nazi trash parents scum and i'll tell you that right to your fucking face because i have the balls too and hardly anybody else does trash so all the people out there in so-called freedom movement so-called truth movement and your freedom movement and truth movement of the bottom of a trash can is what most of you are because you're cowards and you don't want to lose the profit that you get from youtube that's what you're mostly worried about not telling the truth about racking up money from youtube advertising that's nazi fucking blood money let that ch let that whole fucking platform rot into dust rot into the garbage trash that it is stop monetizing your channel stop taking their fucking money put your material up for free and put it on library now how many will do that now because you'll see who really cares about profit like i said i don't give a fuck who listens to this it's still the truth nonetheless it always has been and it always will be i don't give a fuck who i offend i don't care who shuts it the fuck off i don't give a fuck about my view counts i don't i don't monetize my youtube channel and never have that's real hardcore shit most of you are phony fucking posers that's what you are worried about monetizing your channel and taking youtube's ad money you fucking clowns you know what you are hold on you're not clowns once again your clown shoes here on what on earth is happening we fully endorse floparoo brand clown shoes floparoo brand clown shoes nothing's floppier nothing's clownier and all the people out there in the so-called truth community all the people out there in the so-called freedom community this is not what you wear this is what you are that's the slogan you don't just wear these you are them your fucking clown shoes okay that's what you are there you go and we really i should just call it an entirely different things thing folks you know we really need to call it we need to call it back to the uh back to the slides please because i have something for everyone okay we really need to call the whole uh you know truth movement and the whole so-called freedom movement i have a new name for you guys okay here's what the name is for you guys it's the bobo universe you guys are the bobo universe here we go i'm getting pretty good at that ain't i yep getting good at it you know boy i'm gonna practice this slide whistle until i'm a slide whistle master okay and it shouldn't take too long okay because guess what this is the entire truth telling movement this is the entire so-called freedom movement you're a bunch of bobos okay and only a movement like this could have a pla you can only have a clown for a god there's the god of this world yeah it is it really is this is the bobo the clown show that's what it is and again folks the clown ain't me because i've been telling the truth from the beginning the clown is all the people that refuse to accept the truth and all the people who refuse to take action based on the truth that's what it is folks that's what it really is and what it really always has been okay and it's a shame it's a shame that i have to almost make a mockery of it not to just completely go nuts on it continually okay because it really is sad actually it's it's it's really more way more sad and depressing that it is funny but honestly i have to try to make a clown shoe mockery of it because you guys have been clown shoed and you don't even know how clown shoot you are okay that's really what it comes down to okay i made a verb out of it okay as of last week your clown shoot okay and the truth movement has always been clown shoot it's never been a truth movement it's a my truth movement it's never been a freedom movement it's a my freedom movement the bunch the whole bunch of the people who say that they're for the truth and for freedom are clown shoes and that's why they use and depend only on youtube look i have a youtube channel but guess what folks once this censorship comes in if you want to continue to just rely on youtube and depend on it you're nuts you're not you're not only clown shoot you're crazy okay i'm making the move off of that platform and putting all my content elsewhere i'll still upload it upload to it as an ancillary platform for the imbeciles that still want to use it but anybody going to youtube thinking that you're going to get accurate information you are going to get state sponsored information and this is the thing who who what family members are telling the people who work at youtube that your nazi co and communist trash scum no they won't have that discussion you know this is what i was talking about on the how to become the true media seminar you know the hour before most people won't talk to their family members and tell them that their bags of dumb immoral shit they won't tell them that because they don't want to rock the boat you'd rather keep peace in your family rather than tell somebody that they're immoral and that makes largely the person who stays silent a bad person that's what it makes them how many people have ever tried getting up in the face of a family member and saying because you support government you're a bad person that makes you a bad person that makes you a person who supports violence and slavery how many people have ever done it hardly any how many people have ever gotten up and said if you support the censorship that's going on on all these media platforms it makes you a bad human being if you work for youtube right now if you work for twitter if you work for any of these other big tech companies like google or apple you're a bad human being it makes you a bad human being to do that job it's wrong livelihood these companies shouldn't even be running because nobody should be there attending to them they should already have quit their fucking jobs but no they'll take all that blood money they'll take all that pedophile protecting money your trash pedophile protectors you scumbag fucking nazi trash you and your fucking family members are nazi trash and you always have been and yeah you want to say they're communist trash sure they're communist trash too it really makes no difference if you understand they both stem from the same occult traditions okay and again you know i need to be working on presentations really instead of even doing shows like this folks because i need to work on telling people what the real common roots of the right and left are the far left and the far right share common roots they're all connected to the same bird of prey you know doesn't make a difference whether it's totalitarian nazism it doesn't make a difference whether it's totalitarian communism it's all totalitarianism trash is what it is it's all the same trash people all the same trash mentality trash ideology trash behavior and that's all you're a part of you scumbag nazis at youtube we don't need you losers you're fucking scumbag unloved unlovable unloving losers you're fucking losers you fucking losers that's what you are loser you no one loves you loser that's what you are you're an unloved fucking loser pachai at google you fucking unloved unlovable unloving loser that's what you are it doesn't matter how much money is in your bank account you fucking loser you're a fucking immoral trash scumbag fucking loser little boy you're not a fucking man you're a little fucking unloved boy who has no love in his life you're a piece of fucking dirt your trash your nazi fucking scum that's all anybody who works for you are because you're a censoring fucking nazi you dirt bag i don't give a fuck what you do you won't stop me scum do you understand that that's coming from a real man who's free i may be living under the conditions of slavery but i'm free you don't own me fuck head boy that's what that's the anger every american should be displaying at this point with what's going on in this life and then people want to say the problems with me because i'm angry now the problems with you you broken soul that can't become angry you're a broken soul that's what you are a broken soul and i'm not going to take it easy on you it's going to get more and more hardcore you want to get depressed about it get fucking depressed about it okay yeah it still means you're inactive you're doing nothing you know get depressed about it all you want i'm depressed too i'm so up here doing something and i'm saying i'm talking the real shit unlike what you're doing which is nothing or you're complaining you're wasting your energy complaining about what somebody else is done is doing instead of what you're not doing scumbags that's what you are all the people who want to complain about anybody's work oh what did jordan maxwell do last week i don't like what he did you're doing nothing you piece of fucking dirt you have no room or right to talk you're flapping your gums and liquid shit comes out that's all it is you know here you go go back go back to the slides yeah we're going to do this every week there you go oh i don't like what this researcher did i was looking on my slab and i saw this researcher and what he was saying and uh you know i don't agree and therefore i think that uh he should do something different but i if you look my name up though you know there's nothing up there there's absolutely nothing on any search engine with my name on it because i sit on my ass on my living room sofa uh with my slab up my ass and i don't do anything occasionally i pull my slab out from up my ass and i swipe around i put do some love swipes on my slab and then i complain about what other researchers do yeah that's going to change the world you dumb bag of shit that's what people are that's what people are really that's what the whole world is that's the world folks you know instead of people getting on different media platforms and doing something themselves that's what they're doing is complaining about other people what and not ever acknowledging what they're not doing they're keyboard warriors their muslab warriors you know flip flopping around on the slab on the black slab but never actually doing any real work of their own you look up their name you know they give you some bullshit you know clown shoes critic so-called criticism it isn't even criticism it's nonsense okay and they waste their energy to do that right they could be writing a blog they could be making a video they could be making a podcast but no they want to waste our energy flapping their fucking shit for brains out on the keyboard okay and then saying you should do it this way you should stop doing this you're you know instead of pointing a finger at themselves and asking the question what the fuck have you done put your own name into a search engine you little fucking child put your own name into a search engine you lowlife loser fucking child and then see what comes back you know what comes back here's what comes back note the search engine returns to you it doesn't return any text it doesn't return any graphics no pictures no photos no videos here's what the search engine returns when you put your name into it you hear that that's that's when you google your own name or your duckduckgo your own name here's what it says that's it that's what you get back from any search engine you put your own name into you get a big fucking clown horn for the bobo that you are that's it you know and folks people go oh your show's a lot of ranting and a lot less information yeah you're right i'm not going to put as much effort into talking to bobos until you start getting active and putting the information out there why should i bust my ass huh i'll reply with as much ego as you guys do mark i don't like what you're saying i don't like your show i don't like your attitude on this that the other thing you're not doing a fucking thing you fucking loser i'll just keep coming on the air calling you a fucking loser because that's what you are all the people who have done nothing you're a fucking loser loser shut the fucking show off and go do something okay you've done nothing nothing the vast majority of you have done nothing your watchers your passive watchers that's all you are passive listeners and passive watchers and you've done absolutely nothing to advance the effort of helping people to develop an understanding of natural law because if you had the world wouldn't be like this the world would not be the way that it is if you did your work you're the fucking trash losers not me i've done an unimaginable amount of work since day one you want to hear me in my comment times go back and listen to the podcast and order fuckhead okay don't tell me what i need to do i've done more than what i've ever needed to do loser and you've done nothing and the proof is put your own name in a fucking search engine you fucking loser that's it and this is what you get back [Music] that's what you get back okay because you're a fucking clown you're a fucking bobo and you've done nothing with your life except complain about what people who are doing something have done because you're a do nothing you're a low-life fucking do nothing and i'm talking to a lot of my viewers out there okay you think i'm not real you think i care about like i said i'll burn this whole fucking thing to the ground week after week and i'll get less and less views week after week and i don't give a fuck because it's still true and that's all i care about is what's true and i'm going to speak it do you hear me i'm gonna speak it nobody else will do that you will never ever hear any living human soul do what i just did to their own viewership you'll never hear one other soul on earth do it because they don't have the balls to do it because to worry about view counts and monetization that's all they're worried about and all i'm worried about here is getting people up off their lazy fucking asses and getting them engaged in the battle for truth that's it that's what this show is about and that's why i'm leaving not leaving the youtube platform i'll still post things there but it's going to be an ancillary platform like brady on or something like that you know it's it's i'm not gonna be relying on it for my own website okay i will post things yeah and my my producers getting my attention he's like this is part of the overall solution stop depending on people who are actively on the other side of the war to help your effort it's useless they're not here to help you they're here to stop you we need to use other solutions that are already created and engage in them library is a big part of that back to the slides next week on the show my special guest is going to be nathan reynolds nathan reynolds is a former satanist of the reynolds bloodline he wrote a book called snatch from the flames which is available online in print and audiobook edition and i'm going to be interviewing him about his involvement in a satanic bloodline connected family the reynolds family of reynolds rap fame yes the the family that created reynolds wrap the you know uh aluminum foil and again again there are other products like you know you know uh plastic for plastic wrap etc the whole reynolds line of products he is from that family and they are a satanic bloodline fritz springmeyer has mentioned the reynolds family in a lot of his work and we're going to have a member of this bloodline satanic family on the show next week to talk about his experiences in the dark occult i would like to bring more former satanists on the show to start corroborating what i've been saying for the past 13 years i'm going to have jay parker on the show again soon i'm actually going to be on his show very soon we talked about it about a week ago i'm going to get in touch with him and find out when we're going to do that um i'm actually going to be interviewed uh this monday as well by crow777 i'll be on the crow 777 uh live stream on um monday so that'll be coming up this week next sunday nathan reynolds right here on what on earth is happening should be a very interesting interview looking forward to it all right for the duration of the show i'm going to be answering email questions and taking your calls via discord in the second part so if you want to join in and call into the show the link is what on earth is happening dot com slash discord you could use the discord program i highly recommend the program instead of doing it in a web browser okay that you could get the discord app at discord.com or it might be even be discordapp.com something like that but anyway just type in discord app and you'll go to the download page and get it and uh it's easy to install and use okay the link to join us what on earth is happening dot com slash discord if you want to email your questions instead we'll be continuing to take your questions in the order that they were received send your question to questions at whatonearthishappening.com that's questions what on earth is happening.com i'm going to be doing some rapid fire answers to some email questions let's look at a couple of quick memes lysandre spooner who wrote the constitution of no authority said the principle that the majority have a right to rule the minority practically resolves all government into a mere contest between two bodies of men as to which of them shall be masters and which of them slaves a contest that however bloody can in the nature of things never be finally closed so long as man refuses to be a slave that's right he's he told the ruling class in his day i'm not your fucking slave and i'm telling the ruling class in my day i'm not your fucking slave and i'll be willing to die or kill to prove it you hear that you know we got to get into the thalamic tradition on what on earth is happening we got to recover rosicrucianism we have to recover uh things like freemasonry and kabbalah and the tarot well really i want to get more deeply into rosicrucianism and i want to get deeply into theosophy and i want to get deeply into thema those three traditions we've covered some of the other ones in some depth but i really have to talk about more about theosophy rosicrucianism and thalema on this show especially the leima okay and you know really talk about how valema more than any other occult tradition incorporates the right of self-defense the principle of self-defense okay and yeah and this says it right here however bloody in the nature of things will never be closed as long as there's anybody who says i'm not your slave amen to that but what do we have today we have a a culture that largely is capitulating to slavery i don't know who needs to hear this but it wasn't the government that destroyed your quote freedoms it was you complying with tyranny absolutely and this goes out to all the dumb fucking mask wearers out there you fucking bobos you know the me to the mask wearers here's what you sound like when you walk down the street there you go that's the auric field that literally pours off of you as you walk down the street bobos okay you're just you're given a master class in the bobo universe that's all i can say you know and you're complying with tyranny you're willful slaves willful slaves the best way that i could even put it great meme that i found on social media society is splitting into people who are driven by fear who want to be ruled over and people who are driven by love and want to be free all you imbeciles out there who say i'm not speaking out of love you're it's just what you are you're a bobo imbecile no this is what the voice of love sounds like folks you want to say i spout hate no i spout intolerance to ignorance and that's love that's based in true love you know love isn't what you think it is it's not some romantic pukey soft you know nonsense okay that's hollywood definition of love that you've bought into about what love is love is hardcore love is in your face love is saying no you will not continue to act immorally and i will stay silent about it i'll give you the tough love i'll give you the real shit that's what love is and sometimes love comes in the form of saying i love you at a soul level but you can't physically stay here anymore that's what the american revolution was the american revolution was taking people out of life but guess what it was love it was done in love how many people would dare to say the american revolution was an act of hatred and violence no you're incorrect no you don't understand spirituality no the problem lies in your inaccurate understanding the american revolution was an act of love it was an act of truth and love and you don't understand that bobo that's your lack of understanding because you think love is some soft bullshit that will let itself get taken by evil no that's not what love is love is standing firmly in truth and defending it that's what love is okay it's saying what is accurate what is real what is true what is moral and saying you're not going to destroy that even if it means if it comes down to that we have to physically do battle you don't want to change at a soul level at a spiritual level then maybe it does have to come down to physical battle and that time is coming that time is coming so that's all the slides i have i'm going to go to questions and clarifications now if you want to buy hard copies not buy but donate four hard copies of my items such as flash drives dvds t-shirts um key chains buttons stickers we're gonna have some new coasters in soon we're trying to get an order put in uh but we've been finding it difficult uh i really want to get this order put in because i really want to have some cool drink coasters on the site uh the last ones that we did were cork based we're going to have some nice burnt wood ones uh next and i think they're going to be good really nice uh you know aesthetically uh well done items but anyway uh all of these donation gifts can be found at gifts.what on earth is happening.com and folks let me just go back to that please um if you're visiting gifts we have a thing that you can read there about how the cart works how it's not your traditional shopping cart because we don't use commerce here at what on earth is happening we only accept personal donations so there is no uh commerce account you know we don't have a merchant account here okay you won't be engaging in commerce or buying anything you make a donation and then we give you a gift in return for your personal donation to our cause that's it so read the red link click here and read first before using this gift site we ask you nicely on this site do not abandon the cart if you're going to put items in the cart you could fill it to your hearts content put items in put them out just don't hit checkout to you until you're absolutely ready to donate and don't leave it donate when you hit check out please just do it that way we are asking you to do it that way if you hit the checkout button donate immediately don't wait don't do it later that day don't do it the next day donate when you hit the checkout button or don't hit the checkout button it's not that hard folks this isn't your regular shopping cart we don't have a merchant account i'm asking you please to use the cart as we intend it to be used that's all it's different than any other page you've ever gone to gifts is not a shopping cart gifts is not a merchant connected website it's not an online store it's a place where you can make a donation to the water on earth is happening cause and then we will send you the gifts that you choose that's it in return for your donation to our effort that's what gifts is okay so please understand how it works before using it and then please respectfully respect what we ask and just hit the checkout button only when you're ready to make a donation it's not that hard the new arc offer is available at what on earth is happening dot com slash arc off to make a new graphic because it is now a two terabyte drive i'll make a new screen capture okay we talked about that earlier and if you want to make a straight donation to what on earth is happening what on earth is happening.com donate 11 ways to make a donation cryptocurrency paypal patreon our amazon wishlist for technology and more okay what on earth is happening.com donate all right that's all of the slides i'm going to jump out of here you can go back to me and let's start with some questions i'll go to discord in a little bit here we go okay after real so i'm not going to tell peop i'm not going to give names for anonymity okay i'll i'll say names on the discord channel but for email purposes i won't so here's an email from a viewer after realizing the bigger picture with some help from you i put together the darkness in my own family and it's all based in freemasonry to this person my mother had me at 14 to get emancipated by the courts and escape her pedophile father a freemason who had and continues to molest 13 kids then last year i learned that my stepdad's father is the 32nd degree freemason from the same lodge then when we look at government we find freemasons and secret societies behind them all if the love of money is the root of all evil and money means one eye wouldn't it just be wise and proper move for us to abandon the dollar as well as the government and band together and extinguish all secret societies with ties to the public okay so my answer to that is well of course i think going away from money is a good thing and transitioning to that through barter systems and cryptocurrency and precious metals is one way of doing it slowly over time and reducing your dependence on fiat currency and the federal reserve system we talked about that here on what on earth is happening and yes i do stand against secret societies i think secret societies are a problem i think they allow um people to do criminal activity in secret and perpetuate criminal activity so i'm not a fan of the lodge system of freemasonry and secret societies in general but to say that for all the freemasonry is the problem is not accurate and again folks i just want to say based on almost all the questions that we've gotten so far i can tell almost i'm going to say the vast majority of the viewership of what on earth is happening in the vast majority of people who ask questions or request clarification for any topic okay have not listened to every single podcast and that's part of the problem and you have people who are just in total hubris total hubris saying what do i need to listen to all this guy's material i can understand what he's saying no you can't you think you can but you can't that's your ego talking you don't know what i've covered and what on earth is happening if you haven't listened to all of the material you think you might you think you do but you don't ego tripping person your ego tripping okay you don't know what i've covered here and let me tell you something the vast amount of information i have covered here is absolutely nothing compared to what i've taken in what i know what i've studied what's on the ark and let alone what's in my personal archive here in this building okay you don't know you don't know okay you think you know and it's hubris on your part to even say that you presume that you know it all right you don't know i can tell when somebody hasn't been through the material i can tell right away look if you're a high level teacher of something and then someone starts spouting something and it's something you've talked about almost endlessly or or if you have that knowledge so much of the knowledge and you hear where they're going with something you can almost immediately gauge where their knowledge base is at it's not that hard if a calculus teacher starts hearing someone spell utter bullshit oh what differential equations are actually about is about the pressure in a water-based system it has nothing to do with actual calculations in that higher level mathematics it's like pre you're gauging pressure in a system where there's an enclosed space and you're pumping water into it and yeah that's what differential equations that's what they are you know no that's not what they are it's something altogether different oh yeah differential equations are you know how do you cut wire and not get electrocuted what protection equipment do you have to have i just looked that up on my slab and my slab told me that that's what differential equations are no that's not what it is and a mathematician will immediately tell you you're wrong and immediately be able to tell you don't know what the fuck you're talking about this is what i encounter all day every day i've deeply studied all of these things and i can immediately tell when somebody has half-assed knowledge especially because i've covered it here or what on earth is happening so many fucking times you can puke and look i'm not saying this to try to like beat somebody up you're me you're getting it wrong i'm trying to explain to you how much people ignore the suggestion of going back to number one and listening in order it's not that fucking hard to do and then you'll get it all then you'll have no gaps in your knowledge you'll understand and you won't have to write questions that have been answered already you'll you will not have to actually generally waste your time and energy and i'm not saying it's a waste of time i asked for questions and clarifications what i'm saying is 99 of these questions are things we've already covered it's things that have already been answered if you would go back and do the work you would get the answer but you don't want to do the work and secondly i'm going to say it nastily i'm going to say it brutally i'm done talking i'm done telling people i want to excuse their ignorance for not knowing already if you understood what freemasonry was at this point you wouldn't have this world view now you wouldn't think it's all about freemasonry it's not all about freemasonry it's all about dark occultism and dark freemasonry okay dark masonry as i have called it is a part of dark occultism which i've explained at so many fucking times i can't count we've talked about how every tradition has a good side and a bad side a dark side and a light side freemasonry is no different there is positive freemasonry that allegorically and symbolically explains morality to people and natural law and if people understood real freemasonry they would understand everything there is to know about freedom and natural law and morality absolutely that's how powerful and positive of a tradition freemasonry actually is in its undiluted esoteric state yes that's true if you don't think so you're wrong it's not a matter of opinion it's a matter of fact it's objectively true what i just said it's also objectively true that the lodge system has perverted the esoteric teachings of ancient freemasonry over the ages and it absolutely is a perverted and corrupted system which is why i don't take part in it and why i don't suggest that anybody else take part in it there's a lot of bags of trash in the free masonic lodges today there are some good people left in it but they're fewer and farther between and most of the people who take part in the free masonic lodge system today are immoral trash the vast majority of you guys you're immoral trash you're not teaching freemasonry you're scumbags perverting true freemasonry for money that's what most of you are not all of you it's not a blanket statement i'll tell you when i'm making a blanket statement that's not a blanket statement but it's largely true it's overwhelmingly as a matter of fact the case okay but there are still some good people left in the free masonic lodge systems but there's not many they're fewer and farther between scattered to the winds of the earth okay most of you guys are there to network you're perverting the lodge system you're looking for business partnerships you don't give a fuck about what's right or wrong you don't know what's right and wrong first of all that's why you're stuck at the lower degrees and you've never really moved up to any of the illuminated degrees of freemasonry because you don't know what it really is and you think you do and you're wrong about what it is you're completely incorrect because if most of you figured it out you'd have nothing to do with anything government related you would understand government is slavery and you wouldn't condone it or accept it freemasonry has always tried to be telling people that there's such a thing as objective morality and man cannot make laws that law is made by the creator of the universe or god or the grand architect of the universe okay and most freemasons do not understand that and think that man can still be a law creator still be the lawmaker usurping the place of the grand architect no your fake ass freemasons your freemasons in name only and you don't know what the fuck you're talking about little boys that's what you are okay and i've i i've said it nicely before but nice saying things to other people mark pacio is long gone because nice saying things to people mark pacio hasn't been listened to you've just closed your fucking ears you put your fingers in your ears and go i'm not gonna listen to that because i think i know better because it's coming from a guy saying it real nice well then i'm going to call you a dumb bag of shit i'm putting my fingers in my ears because i don't want to hear another fucking word you have to say ignoramus that's how it's going to work with me me trust me you want to come at me with more ego i'll come back at you with the most ego you've ever seen two can play at that game thank you really need it too appreciate that here's the other thing i'm gonna keep hammering and harping on this all you fucking imbeciles out there still saying i don't know what i'm talking about because i eat a vegan diet i eat a plant-based diet no you don't know what the fuck you're talking about ego driven scumbag fuck face you're wrong other beings lives don't belong to you fuckhead that's all it comes down to and you're wrong we can get all the nutrients that we need from a plant-based diet there's plenty of people who are living proof of it and who are way stronger than they've ever been before eating meat you want to find out find out find out you'll come at me and you'll find out how strong i am eating a plant-based diet okay you'll find out i'll hit you with some ego like that trust me you don't understand who the king of ego is i'll show you the fucking king of ego in the physical domain that's still a fucking person who's spiritually enlightened because i'll take out all those tools but they won't rule me i'll take them out when i have to and use them that's the difference about being a complete person versus being a half-assed person who's either all logical left brain or all woo-woo right brain no my ego is still here it's not destroyed or it's not killed it's here and i'll engage in it when i have to when i need to when i want to and i can put that tool down and be selfless if i need to it's called being complete and having all of it not just some of it i can use laser like focused logic and i can use heuristic whole picture thinking because both sides of my brain are active and in use unlike most dumb asses out there and no you're wrong and i'm not going to make it the big issue here but you are wrong all the people who say it's just fine to go and kill other animals and say i could just use them as i see fit you're wrong and no it doesn't mean that you get weak when you eat a vegan diet you get weak when you do it wrong you get weak when you do it all at once when you transition away from anything all at once you're going to upset a balance that's already existing pre-existing balance in your body who said go vegan overnight i never said it go back in my archives you'll never find it because i never said it dumbass that doesn't mean that it's moral to consume flesh you're wrong it isn't and it isn't about health everyone can eat a plant-based diet if they transition to one let me say that again every human being can eat a plant-only based diet if they transition to one if you want to go cold turkey and try to do that you're going to fail miserably you have to transition over a long period of time to a plant-based diet if you're already a carnivore if you're already engaged in carnism you will not be able to transition to a plant-based diet successfully cold turkey it doesn't work like that for the people who have done that you're extraordinarily lucky and you're the extraordinary exception to the rule it's not the rule that it works like that okay so all of you guys as i heard could be done overnight no you're just as equally bags of fucking retardation no it can't for 99.9999 of human beings if you go cold turkey to veganism from from carnism you will fail and you will harm your body see that's why what on earth is happening goes deep into the knowledge and takes a common sense approach unlike all these people who are way in the left brain or way into the right brain either you're all into meat belongs to me because we have dominion over the earth and i can do whatever i want or uh you can go vegan cold turkey and everybody can do that it's all nonsense and bullshit whether it comes from one side of the brain or the other you're still spouting out the same liquid diarrhea out of your your shit hole that you speak from okay so look folks again look the reason i'm so harsh on people is that you all should know better by this point you all should know better by this point at some point a teacher has to say what the fuck have you been looking at what have you been doing with your time you're deplorable it's it's unacceptable what good is a teacher telling people oh it's okay it doesn't matter how long it takes you know it does matter it matters you're not doing well you're failing miserably that's what a real teacher should tell a fucked hard student you're failing miserably at your understanding and you're gonna flunk the fucking class and when you flunk the fucking class the whole world's going into the shitter and that's your responsibility to do something about it get better at your studies that's what a responsible teacher has to fucking say to a fucking ignoramus student sometimes i'm not the problem i'm the real deal if anything you guys who have stayed silent are the problem you're the problem and you should feel ashamed of yourself and you should get the fuck up off your lazy ass and change it by an act of your will there's no easy answer it's hard fucking work started and you're waiting to hear some magic on how to do it there is no magic it's nose to the grindstone hard blood sweat and tears motherfucker anybody telling you otherwise is trying to blow smoke up your ass don't do that other people don't blow smoke up people's ass and tell them it's easy it's hard fucking work but it means get to work anyway accept it get the fuck over and get to work see i say it's going to be rapid fire and i go off on tangents once injections become mandatory what's the best way to resist authority figures with semi-automatic battle rifles that's the best way the best way is to do it now by getting involved in the great work and teaching people morality so it doesn't come to that but guess what once it does come to that the answer is the question was once injections become mandatory what is the best way to resist authority figures with semi-automatic battle rifles is the answer so you better stock up and you better get enough ammunition and arm the fuck up that's the answer whether anybody wants a like the answer to that question or not that's the truth and in america we ain't going to have a problem you want to bring it to that that's what's going to fucking happen and that's not a threat it's a guarantee definitively of a future timeline that you're gonna create that's what it is i'm not threatening anybody i'm telling you what's gonna happen definitively that you yourself will create that eventuality all the police out there listen up all the politicians out there listen up you're going to create that eventuality among the population okay you guys better understand that because it's going to affect you and your family members and i'd suggest you consider your survival so the person who asked this question once again once injections become mandatory what is the best way to resist so-called authority figures and the answer is with weapons of warfare that's it that should be and always should remain in the hands of the population for just such eventualities that is what the second amendment is in place for in the united states but is it it is not a constitutional right it is a natural right self-defense with firearms is a natural inherent right of self-defense in the self-defense principle under natural law under the laws of the creator of the universe no man ever made that and no man or woman can ever take it away that is a natural inherent right and the answer is when that situation manifests itself that is what is going to need to be done i would say we're already in the situation where we should have already physically rebelled we're already in that situation where physical rebellion not only should have already been put on the table and considered but it should have been exercised already we're actually late to the party folks and then we're going to be talking about this a lot more on what on earth is happening and once again the only question you need to ask yourself are you little fucking fairy pussies who say oh how dare can anybody say that all you need to do is ask yourself would you even be able to have a free conversation with another human being if it wasn't for the revolutionaries of america and guess what that goes for all the other countries in the world who are as free to the extent that they are free which they're not really but i said to the extent that you have any freedoms remaining you can largely thank the ancestors of this country you can largely thank the ancestors of america because we even put that idea out there for the world to consider that people should be free to lead their own lives and not be the subjects of some psychopathic king ask people this question this is a great aside to this question what do you do when injections become mandatory who has a right to put anything in your body i asked this did any of the kings of the ancient world have the right to do what they did did they ever have a right to rule their subjects ever ever did they have a right to make kingly decrees and force people to do it by an act of their will and say if you don't do it we're gonna send i'm gonna send my military squad against you the king's henchmen kingship and rulership has never been moral it's always been based in violence and coercion it's always been a euphemism for slavery kingship rulership pharaonic dynasties it's all slavery that's all it ever has been government is the same thing you're just taking the power that was once invested in one individual as the supreme authority and you're divesting it into an oligarchical few and calling them government it's the same thing government is a euphemism for slavery it's a euphemism for violence coercion and slavery and that's all it ever has been kings never had the right to rule neither does government government has never had the right to make laws and make people obey them or put them under the duress which is threat of violence of doing something harmful and violent to them their property or their freedom the right never existed and it doesn't exist in any individual and therefore it can never be transferred to another individual it can never be granted it can never be delegated and you guys still don't understand that this late in the game how can anybody command what you do with your body wearing a mask injecting something into your body telling you what food you can or can't eat telling you what medicine you can or can't take it's your body you own it it's your property because you're not a fucking slave nobody can tell you what you must or must not do with your body unless you're actively harming another then they have a right because you forfeited your right to remain unharmed that's called the right of self-defense if you're not breaking the self-defense principle then you have the right to be left alone and have nothing coerced or forced upon you and you have a right to engage in rights which are actions that do not cause harm to another sentient being you have a right to engage in them without being stopped i don't understand why this is so difficult to understand go back and watch the natural law seminar folks why do they worship bell it's an ancient name for the sun it's an ancient solar cult all it is is a representation of the life force that gives energy to the earth so that plants grow so that we can eat okay and we maintain life that's why they quote worship it it's a symbol of this sustenance of life through the sun and once again watch the presentation i did on this called demystifying the occult part two satanism in the dark occult where i talk about bell bell bill bull i don't understand why this is so difficult i talked about it here on what on earth is happening many times and i've talked about it in a formal presentation again every question i get is something i've already covered so what i'm trying to get out to you guys out there listen to me listen to what i'm fucking saying because apparently you need to clean the shit out of your ears and learn how to listen go back to podcast one and listen in order it's all there do you understand do you understand the words that are leaving my lips can you comprehend the english language or you that fucking dumb go back into the podcast on the website click show number one listen in order listen to the whole thing in its entirety look at the images and then research the links that are associated with the podcast then go to number two after you're finished with number one and listen to number two and do the same process then when you're finished with number two go to number three can you fucking count can you fucking count one two three four five six like a fucking nursery school child i mean i have to be this insulting and hard and harsh because people just won't do it listen to what i'm saying all you people who are asking questions i've already answered almost every question what you are proving to me and to all of my viewership you are proving my point people have not listened from podcast number one that's the problem that's the url on the screen what on earth is happening dot com slash podcast in order with dashes between the words that's it that's all you have to do it's just so hard to believe the people are this dumb i need to do harm to my body by putting good plant-based nutrition in it because that's what fucking morons say you're doing yeah doing harm to the body by eating the most nutrient dense foods that you could put in the body fruits and vegetables you know in a semi-liquefied state or in a totally liquid state uh-huh and then eat sensibly you know a sensible meal consisting of you know some raw foods and some good fruits and vegetables at other times yeah yeah doing harm people are as dumb as fucking nails man and then say oh you're getting good nutrition from animal flesh no the only nutrition you're even getting from that is the plants that the animals ate that's all you're getting okay i've been consuming your work for weeks i will dedicate a large portion of my life teaching natural law in a formal fashion great my question for you is masks have been mandated in my province i live in quebec canada i have not warned one will not wear one in any context people i love and care for are fearful and lack the courage to not comply what do you recommend for these people how do they be brave bold and not comply to this psyop well once again how can you instill courage in another being there is no way to instill courage in another being they have to instill it in themselves i think people like that may never stand up they may go willingly into cattle cars you know that's the problem some people are only going to ever stand up once that eventuality is presenting itself you develop courage through knowledge and understanding what you're really up against again that's why people say what would you want to do want to be able to do i'd want to be able to take somebody and put them in a room with all the satanists who run the world then you'll know what the world is and you develop the courage practically immediately to stand up because you would never want the world turned over this evil if you knew it you guys don't know it you think you know it but you don't because if you did know it you'd be active you'd say it doesn't matter what i have to do to get the knowledge to become active i'm gonna do what's necessary to get that knowledge and then i'm gonna become active that's what you would say to yourself if you knew who really ran the world but most of you don't you have this vague hazy idea of what it really is and you don't know i definitively know which is why my will and courage levels are so high because there's no way i could not fight against that force against that mindset against that worldview against that mentality if you knew what the dark occult was and what they are doing and what they plan on doing there is no way you'd be making excuses you'd be on the battlefield already that's the answer the answer is they have to fully understand what's really taking place on earth and how far away are they from that they're probably dumb bags of shit they're a million light years away from that right i'm probably absolutely correct so what is the answer the answer is they got to get that knowledge in their head first and foremost or they'll never be able to develop that courage courage is a byproduct of knowledge real courage not bullshit fake courage oh i've been so courageous i could jump out of an airplane or i could climb a cliff with no no uh you know uh safety equipment no you're just fucking they're trying to you know prove whose ego is bigger you know or whose penis is bigger no that's not real courage that's it's all ego driven shit okay real courage is standing up for truth in a time of total deceit deception mind control and tyranny that's real courage real courage are what the revolutionaries revolutionaries of america did when they knew if they failed they could be hung by the crown and many of them lost their lives anyway because they cared about freedom and their fellow human beings and they cared about the world and i'll tell you what freedom of the whole world's going away folks if we don't win this battle if we don't win this spiritual battle the freedom of the whole world is going away the whole world not just america so once again my answer to this is what do i recommend that you do you recommend educating them because once again they're probably uneducated dumb fucks and then what's the answer who needs to educate than the people who already know what's going on if you consider yourself one of those people you better get to work that's the answer no one wants to hear that there's no magic pill to take there's no courage pill okay courage is a byproduct of knowledge of truth to develop it you have to know what's going on for real yeah not the answer most people want to hear same question this next person basically asking the same thing what if your life becomes even more of a living hell you're on the verge of losing everything but none of your mainstream media watching family you know won't want to hear it you know and they're gonna they're gonna take the vaccines you know what then they're the enemy they are the enemy at that point let me harm my body somewhere hold on damn that's good yeah a lot of harm i'm doing to my body on this broadcast folks i mean fresh fruit smoothie jesus christ i mean i mean i might as well just put my neck in a guillotine now the harm i'm doing to my body this is how dumb people are man i mean so fucking painfully dumb it's just if stupidity were only painful to the person who's as stupid as they are instead of as painful as it is to people like me who really do know what's going on it would be a beautiful place to live because i mean you'd have people in horrifying abject torturous pain everywhere you know if stupidity were painful to the fucking stupid i you know i can only wish maybe we'll have some kind of a epigenetic transmutation and stupidity will become painful to the person who wields it yeah he says i'm angry more than anything and disturb the people really are this stupid welcome to welcome to the club welcome to what on earth is happening you know that's it and once again whose fault is it is it the fault of the media and satanists well yeah it's partially their fault for pumping lies out constantly but these people are watching it and it's our fault for not breaking that signal because most of us are not doing the great work of teaching natural law and truth let's keep going forward why is nobody telling trump worshipers who see trump as their savior and q is their prophet how wrong they are believe me i've been doing that you know i this whole cue thing is a total psyop probably cia invented if not psyops you know a division of the army if not have a stock institute you know take your pick or you know work all three working together it's a stand down operation say oh they got this they have it in hand no cue don't got it no one person don't have it like trump trump is impotent as a matter of fact he's basically stood down against all this tyranny and is complying with it accepting the whole world view you know trump is a big lie you know i i watched cautiously to see if he would do anything that's real like a statesman nothing he hasn't gone after the federal reserve he hasn't stopped geo engineering he hasn't stopped anything regarding 5g or other harmful technologies if anything he's supported all that shit you know he's um you know supported gmo food which is all you want to talk about what's harmful gmo food okay you know he's he's for the all of the big pharma industries all the big food industry you know meat everything polluting sources of energy he talks big on bringing out clean sources of energy but not really so much doing it you know and uh look what he's done with guns you know he's actually been totally anti-gun and anti-gun parts you know passing laws that are totally unconstitutional and against people's natural rights and he's totally bought into this whole bullshit psyop with covet and endorsed the whole world view of the mainstream doctors in medicine that's it the only thing trump has done well is said that the mainstream media are phonies and fake news at least he's done that and that's about all i can give him credit for doing the dude doesn't know enough he's not enlightened enough sorry you know it's just the way that it is if you put some if you actually had a statesman in that position just taking it to try to educate people okay maybe it would do a little bit of of good not that i would even support or condone that because i don't support the office of president because i don't support government period we're voting for anybody the whole point is to put your faith in this person or to put your faith in this q movement i mean you got to be so extraordinarily naive it's just laughable okay well again here's what i really think of trump and cuellar yeah let's give them a good one you know you guys are your clown shoot you know your clown shoot it's a stand down operation folks it's all it is and that's all it ever has been it's to get all the people out there who might have actually done something saying q's got this and that's all it ever has been and again it's it's religion it's religious religious people want to believe a savior is coming to get them out of their own mess that they created and that they allowed to continue you created this mess you allowed the public to remain this ignorant by not teaching them right you created this mess you propagated and continued this mess you moved out of major cities because you don't want to tell the fucking lib fucktards that they're wrong and confront them you moved out of cities because you don't want to educate the young you moved out of cities because you don't want to do the great work you're you're runners you're cowardly runners again go watch the movie the kite runner the tyrants are going to follow you wherever you go you're runners all you people who love i'm leaving the city because other cities all full of people that oh oh they're liberal and i don't want to live around all these fucking idiots i'm gonna go run you're the problem you don't want to stay and morally educate the young that's why the world's in the fucking retarded condition it's in because you're a coward and you're lazy and you don't want to take action you're you're selfish and you just want to live your life for yourself you don't want to engage in service to truth for don't even look at it as service to others it's service to truth you don't want to engage in service to truth you want to engage in service to self self because you're a selfish piece of shit that's the truth of the matter on most people on the right most people on the left your heart's all tangled up in the wrong place and your emotions are a big clog of shit mess and you you think you reason with your feels which can't it can't be done and then you want you want to be some bleeding heart for every single cause even no matter how untrue it is you guys have your heads up your ass in a completely different way because you have no logic and reason and the right has some logic and reason but it has really no real heart no care for truth to put the truth out there because they care too much about them fucking selves and their own fucking selfish lies to actually get involved not all of them not a blanket statement but a damn lot of them let's move on i lost my place yeah i'm trying to get back to it some reason my page keeps scrolling up i'm trying to just keep it in place okay here we go is it possible for a soul to ascend like jesus to a higher plane like the earth that is filled with things of a higher consciousness again more religion more let's run away let's get out you know let's not stay here and confront the problem by an act of our will and courage run away that's what we need we need the uh we need the scene in uh monty python's holy grail you know when when the rabbit you know gets sicked on them and they go run away that's what we need we need to play that you know all thinking they're going to the fifth dimension right it's the ascension folks don't you know it's all just another bullshit version of the christian rapture it's all it is the bifurcation the rapture all the good people are going to one place all the bad people are going to another no wrong there's the very real physical world you're in it what you do here matters and if you're not confronting evil and if you're not confronting ignorance you're not engaged in the spiritual war the end that's it hardcore truth nobody wants to say it just like that stop pussy footing around stop waiting for something that's never going to happen no savior in the government's coming to rescue you no aliens are coming to rescue us no ascension is happening to to bifurcate humanity into two distinct groups where one will ascend to an eden-like plane and the others will stay here and this will degenerate into hell reality doesn't work like that folks we're all in this together it's all one one world we're all in it and what's gonna happen is gonna happen to everybody nobody wants to accept that because that's the harsh fucking reality when you realize how many dumb ignorant motherfuckers you're all around you're you're surrounded by yeah i assure you i am attempting to bring forth heaven on earth in my intentions and actions and have been awake for an embarrassing amount of time you are noticed by your deeds okay well then put that into action and stop waiting for ascension next question again i haven't even read these folks i'm just taking them as they come i want to ask about whether or not a point of view is solipsistic or not okay i was brought up in the christian tradition and eventually was exposed to a lot of new age garbage i'm curious about a belief in the christian idea found in matt matthew 3 15 or turning the other cheek once again folks i've covered it extensively here on what on earth is happening the concept of turning the other cheek biblically in the new testament i've interpreted it a little differently not taking it literally in other words i'm not a pacifist but after studying the verse i get a sense that the author wasn't talking about physical violence such as so much as they were talking about reacting to evil i disagree on both contentions i'll give you my take in a moment essentially the way i see it is that if god is to be interpreted as what is and truth the devil or evil is rooted in a lie or what is not if one resists evil they would be acknowledging the lie to be true by action if that makes any sense am i trying too hard to make sense of that or what uh yeah yeah you are you're making you're trying way too hard to make sense of it and you're going off off course is it dangerous to think that way yeah it's dangerous to think that way yes it is okay if i'm wrong i'd really like to know you're wrong that's not what it means okay it doesn't mean don't resist against tyranny and evil because you think that that's just what's not it's very real it exists in the world and it's very real and it's all around us okay turn the other cheek means if you try to give the truth to people and they slap it out of your hands and if they're people you care about knowing the truth and they're suffering as a result of not knowing it you keep picking up the gift that they slapped out of your hand and you keep trying to give it back to them to help them to accept it from you okay and again it took me you know almost 20 years of my life to get my own mother to hear what i'm saying finally as a result of all the lockdown shit sees it it took that for them to basically take almost all of society away from her and almost all human action away from her for her to finally say i see what you've been saying all these years mark i don't know i can't believe you didn't go insane telling people this and not having them understand because i finally see it and that was only because i kept turning the other cheek how many knock-down drag-out battles did we have screaming in each other's faces screaming in each other's faces get the fuck out of my house i wish i wouldn't have had you i i think of what you could could have become instead of what you are this is what i heard from my own mother now she's saying i'm proud of what you do it's i can't believe people couldn't see this before i can't believe i couldn't see it before and you know what i don't gloat i don't take pride in it it's great she's not all the way awake obviously it doesn't know you know everything that i understand about the this stuff but she's not battling me at all because she could finally see the tyranny in the control and guess what that's a victory that's a victory you know but look at what it took for one person to turn the other cheek that many times and all the time she slapped that gift of truth right out of my hand as i was offering it i got went on the ground picked it up and kept bringing it back and putting it up right up in her face and say you take this you take this take it from my hand and acknowledge what it is 20 years of work yeah how many people have ever done anything like that not a one not a fucking one comparatively figuratively this is why people's family members are still asleep they don't hardcore in their face say this means so much to me either you grasp what is going on and you acknowledge the truth that is all around you or i'm gonna disassociate with you as a family member that's how much it means how many have ever said that to another family member how many people have started a confrontation at a a holiday dinner over it a relative handful maybe some but guess what folks a paltry few comparative to the whole population because we don't want to rock the boat we're cowards people don't want to say no this means whether you're a good person or not to acknowledge this that's what it means to acknowledge that the human race is in slavery the government is slavery that what's going on with this whole coven 19 shit is slavery it's coercion it's violence it's slavery and for people not to understand that philosophically you're a bad person that's not virtue signaling that's objective truth okay so understand that's what turning the other cheek means next question my mother suffers from what you would call right brain imbalance communication with her is near impossible every subject we discussed evolves into jesus this and jesus that there is almost zero intellectual capability speaking philosophically with her as an impossibility explaining jesus as an anarchist fighting the religion of his time goes nowhere well some people's brains are devastated that's what you have to understand you know and sometimes the brain damage is so irreversible that there you may never make headline headway with someone like that she's decided to help a local politician run for office she studies in an echo chamber listening to a handful of mainstream christian speakers that person's probably spiritually dead and you gotta let him go more likely than not unless you want to take the chance of physically cutting her off from that by an act of your will and force because you care about the person to the extent that you know that they're putting poison into their mind once again that could end up being physically dangerous because if they call the police you know you don't know what that's what's going to happen i i actually said this to my own mother i i told you i'll admit publicly i brought i brought videos over i said we're watching them right now this is what i'm putting on your television and you could resist it but you'll have to physically call the police to throw me out of here because you won't be able to do it with your physical strength and i said if you call the police you'll watch your son die in front of you now that's hard fucking core but that's what i did because i care enough about her soul you know so you know if you're willing to go to that extreme that's up to you i can't tell you to do that but that's what i did in the past and i hear you i hear exactly what you're saying please share your knowledge of morgellons disease oh wait i missed one what would you do if you were enslaved in court mind free but physically enslaved what would mark say to the masters and masters dogs oh i'd give them an earful but at this point don't even expect me to be taken there you know because i know i've done no wrong i have done no harm i harm none that's it i i stand in the righteousness of natural law and harm none that's it so anybody that tries to fucking kidnap me is going to be treated like a kidnapper that's all i have to say because i have done no wrong doings i do not initiate harm against my fellow sentient beings human and animal unlike the police the military judges politicians you are all initiators of harm and violence you don't stand in righteousness and you don't have the protection of natural law you can cut go and do whatever you're gonna do and guess what you'll stand accountable for it like we all will and i'll say that right to your ignorant selfish immoral face because you're more people that your whore mother raised like a piece of dirt all of you every last one of you you're you're ignorant people who think you're good people and you're not you're bad people who your trash parents didn't teach morality to okay and guess what neither did my family my family didn't teach me morality either but i learned it through an act of my will i learned it by seeing the harm and evil you losers do you're losers your loveless losers is what you are you do the things that you do because you're little chicken shit cowardly punk little bitches they're all worried about what might happen if this isn't controlled a lot like a man or a woman thinks like that like a person standing in the courageousness of natural law and righteousness thinks what i'm worried about what's gonna happen we gotta set up all these institutions of control no good people don't think like that they say the bad people better worry about what's gonna happen when they try to do something to me you know and that's what you've become you're not a good person you're a bad person you don't understand objective morality and you think you do and you're wrong you've bought a lie and you're acting on the lie and that makes you a bad person all of you every single one of you all you are doing is either thwarting people from engaging rights that they have or you are exercising rights that you don't let me say that again every person in any government institution the only two things that you do is you are thwarting the rights that other people do have or you yourself are engaging in behavior that you have no right to take and you think you're good those are the two very definitions of bad people that's the definition of what it means to be a bad person engaging in behaviors you have no right to take and stopping other people from engaging in rights that are theirs to perform that's the definition of a bad person and your head is so clogged with fucking brainwashing and shit and wrong wrong ideological ideas that you believe you're the good person and someone like me is the bad person you have a completely inverted you have it completely satanically inverted because what you are is a satanist whether you know it or not and you're fucking doing the bidding of dark occultists way higher up the food chain than you you work for the satanists i've had this conversation with people in my own family people in my own family work for government work for cps and they don't understand they're helping satanists the fucking children in cps are sometimes directed to fucking satanic groups and pedophiles and not all of them but guess what a portion of them go there who do you think is running these organizations please share next question please share your knowledge about morgellons disease current schools of thought it is caused by the bacteria responsible for lyme disease or caused by the new world order black ops chemtrails in accordance with clifford carnicom research third hypothesis in accordance with the centers for disease control more jealous is a psychiatric disorder patients should be drugged with antipsychotic pharmaceutical medication three throw in the trash dump where it belongs throw it in the dross dump where it belongs part three in accordance with centers for disease control it's a psychiatric disorder no way it's absolutely real i know someone who had it is it caused by a bacteria responsible for lyme disease i would say no i would say this is some type of technology actually possibly some type of nanotech so i do believe it is some type of black op or bio weapon and i would recommend people go to clifford carnicom research at carnicominstitute.org because i think he's done a lot of good work with geoengineering and um morgellons his site has become more about morgellons than uh previously it was more about geoengineering but um i think people really should research morgellons and treat it with a natural um natural uh remedies and i i won't go into that that's not the purpose of this show today but uh you know at some point we could probably talk about that or if you want to get in touch with me i could probably put you in touch with my friend who cured it with natural herbs with a homeopathic solution i was embarrassed okay next question i was embarrassed to ask this question and consider myself bollocked uh for those who don't know that's an english expression for you know bollocks is basically bullshit meaning they considered themselves fooled or bullshitted i should have asked a much more specific question okay what is the question i have watched nearly all your episodes but all of them once and should have known better i was think i don't know what they're referring to they're talking about a former question i guess hello from france how to stop the satanic cult q anon movement which is a satanic operation why are there so many people who believe in it well once again people want to believe in the savior complex see that takes all the responsibility off the self and what are you going to do and it gets that person who doesn't want responsibility like a little brainwashed child asking the question what's q anon gonna do i'm i watch and wait right watching and waiting you've even heard them say this you know kicking back watching and waiting but it doesn't say what they're doing right it just says they're waiting to see what q's gonna do next that's the whole psyop folks the whole psyop is to say oh let me log in and see what q had to say instead of saying let me log in and make a new post on my website on my website right no you're going and watching it's like another form of television except it's it's internet television you're passively watching what someone else is doing instead of taking part in the battle yourself and again most people don't know how to do it that's why i had my artist draw a rendering of people in a battlefield with like you know they're in a trench and you see people coming at them over the trench line and they all they're all they all have their weapons drawn their rifles drawn and then there's two soldiers in the trench and one of them's handing them a battle rifle and the other soldier is going back like this like whoa i don't know how to use that well that's an allegory in an image about what what the situation we're in right now i'm telling you to shoot at the enemy and people are going i don't know how i don't know how to do any of this stuff because you never learn computing you never learn the modern publishing technology the modern publishing platform to get the word out to the masses and that's why we're getting our asses kicked and that's why so many people easily fell for the q anon movement because they don't know how to publish information themselves because they're passive observers and they kick back they don't create content themselves their whole slogan is watching and waiting and all they do is watch what other people are going to do or are already doing it's a stand down operation next question i'm trying to put a bedroom i'm trying to put together a bedroom music project mostly rock and metal but i suck at writing lyrics i was wondering if i could use your words or commentary from your presentations as lyrics yeah sure go ahead once again folks the stuff on water on earth is happening i'm not interested in profiting from okay i'm not saying you should go and pretend that it's all your material but if you want to put it in your own video presentations or you know comment it comment on it sample it go right ahead it's all out there open source i want people to share it one thing you said that i loved in your tesla presentation was if if you worship money expect to live in chains forever of course there again there's only really two masters that you could have in this world you could either serve truth which is serving the true god of creation or you could serve mammon which is money and that's it and that's why i'll take the risk of offending my viewing audience because i'm not about money i don't care if i have zero listeners zero viewers it doesn't matter to me i'm not about view counts and i'm not about my youtube uh what what uh you know monetization i don't care next question please talk more about the actual reptilians as in the movie they live a rival v the final battle and so on about these people in a concrete way not a figurative one well that's not really a question and if you want to talk about that you go ahead and make a youtube channel or a library channel or wherever you want go make a video on bit shoot write a book about it i'm going to do what i want to do here on what on earth is happening i mean you know anybody can is free to make suggestions but it's like you know i've already talked about that in um cosmic abandonment i went into it in cosmic abandonment you know so i've given my talk i've done my cosmic abandonment presentation and i've done an extended version on we had a major computer crash on the computer that streams the show and um we are back up and running uh it looks like we're streaming pretty much everywhere we need to be so um hey isn't it odd that the only time i've ever had any computer attacks and crashes like that or when i'm talking about things having to do with human origins it's just a funny thing but uh we were talking about you know somebody that wants to talk about reptilians and the uh you know non-human entities that may have interacted with human beings in the ancient past or potentially even still be among us and you know if you want to make a thing about that go right ahead i've done a lot of work about it actually i'm not you know talking about it as in depth as someone like david ike has but i've given my take on it and uh i don't i don't know whether i'll be really revisiting that topic too much maybe we could do some readings from uh some of the source material at some point like uh you know book of enoch you know the eddas the upanishads etcetera there's so many and go on and on but again if that's one of your areas of you know um interest then by all means get involved and do something on it if you feel like you have some knowledge about it if not then go out and make it you know your research target you know this is what you have to do folks all right let's see okay i understand and respect your commitment and passion that some thin skinned people take offense or abrasive i must put it to you you sometimes seem to speak a little harshly toward people who are fully committed to this stuff in thought word indeed well i don't i don't necessarily think that's the case because quite frankly if somebody was so involved in this effort i would know who you are i would know your name and i know that can sound like that's hubris but folks you have no idea how much stuff i take in and listen to and watch and you know go on to people's pages and if if there was somebody out there who's doing a considerable amount of work and making a dent in this i'd know you by now okay and i don't really think it's the case that uh i'm i'm being too harsh on people look if there's people out there who have put out a tremendous amount of work i'm not referring to you real simple there's no reason to take offense the only people who would take offense are the people who in their own mind know that they've done very little or nothing so why would anybody so let me give an example um let's say uh brandon martin or nate capp you know or uh jonna esp or um larkin rose or um derek bros or max egan people have done a tremendous amount of work in their own rights okay why would they have to take offense to anything i've said they don't because they've done their own work the only people who will find what i've said quote offensive are people who have done little or nothing by definition objectively how is that not true if i type somebody's name into a search engine as a matter of fact here let's see if we could do it let me do it i'll i won't i'm not gonna publicly embarrass the person but let me put their own name into a search engine nine whopping results did it in real time big nine whoa slow down there man you know what i'm saying don't overwork yourself you know let me put my name in same search engine a hundred and forty two thousand pages returned with my name in double quotes okay versus nine right that's all i have to say this is this is who we're talking about folks this is who i'm talking about so if you're not the person that i'm talking about no need to take offense if you are you're probably automatically already offended okay so let's hear the other things that this person addresses here we go they're fully committed to this stuff and thought word indeed but through no feelings or shortcomings of their own are not able to do the great work at the speed and volume that you are gifted with i'm not gifted with speed and volume that's called hard work and sacrificing other things that i want to do in my time see i don't think people understand this folks i don't think people still do i think they still don't understand this if you sit and watch me make a presentation i don't fly through it it takes an enormous amount of time i am sitting at a desk when i would rather be out with friends having fun i am sitting at a desk breaking my balls doing hard work when i would rather be out watching a movie i have sacrificed my time to do this it isn't in some inherent gift that i have yeah be it due to your strength and discipline your inborn gifts or your life situation none of which i have in any kind of greatness i wasn't born into any kind of uh situation life situation that you speak of i wasn't born rich i wasn't born in a wealthy family i struggled with money my whole life okay i had to scrap scrounge and scrape to get even the most basic of computers in the past okay i have no inborn gifts folks i have willpower that i worked to develop i worked to develop it for somebody who claims to have had a hard path i ask that you consider a divorced father with four children under the age of 10 and two jobs you put yourself in that position position you know okay so then maybe you can't you can't get involved that's the whole point people put themselves the whole idea here folks is stop blaming anybody else you created that circumstance in your life and secondly yeah you can still do it you can still do it do it after you put your children to bed and work for four hours at night and get less sleep okay and then have to just power through the day a little tired in the morning you know that's what it's called it's called breaking your fucking ass to get involved that's what war is the problem is the bottom line problem with all the folks is people are just soft that's it let me just say it a little better they're soft okay for the new yorkers out there and that just you just ask somebody who really knows what that word is said like that and it's probably one of the worst things another person could ever say about you're soft all right that's it and he says sometimes i think you're talking to me when you're saying if you haven't read or done this you aren't committed that's bullshit bro wrong i am talking about people like this and you're wrong and it's not bullshit it's called do it no matter what your situation is and stop complaining about it okay you haven't done this anywhere near what i've done with the situations that i've had to deal with and i'll take breaks sometimes and then that's what you could do okay i gotta focus on my children i gotta take a break it's called get involved and do it nine versus 142 000 wrapped in double quotes okay that's all i have to say and i don't give a fuck get as offended as you want i am talking about people like this you know you give me a fucking attitude how about if i put your fucking name on the air let's make it really egotistical okay and then you'll be a laughing clown fucking stock when you do fucking actually start okay look don't give me fucking shit i'm out here on the front lines doing this motherfucker then don't fucking do it and it's your fucking funeral and you know who else's funeral it is it's your fucking children's funeral fuck face that's whose funeral it is you don't love your fucking children you want to make it personal let's make it fucking personal don't write to me and make something personal because i'll make it fucking personal it's your children's funeral motherfucker that's whose funeral it is so don't do it how about that let your fucking children's future and fucking freedom and lives go down the fucking drain you don't love your fucking children giving me shit about fucking time and then giving me shit you haven't seen what i've done fuckhead i ain't taking your shit go give somebody else shit i've done this at a higher level than anybody else on this fucking shit ball planet for somebody else to say that the problem lies with me get go fuck yourself then shut the fucking show off and do nothing and let your children go into bondage fuckhead you want to make it personal and make it real fucking personal people who ain't doing shit you're letting evil take this world you're letting people take this you're letting evil take this world for your fucking children when people are forced into wars or forced to serve do they still take on the karma yes they do there's always a choice you have the choice to not do it and take whatever consequences there are for not doing it and not just take those consequences defend yourself from anybody coming to try to conscript you if we turned our weapons on the conscriptors instead of each other then maybe we'd be making progress yes people in warfare still take on the karma of doing what they do yes unless it's an absolutely righteous war and they're on the right side and the only righteous war is one for freedom and the right side is the oppre the people who are actually having their freedom oppressed not the ones doing the oppression a warning from yugoslavia don't follow what we did this is a video so i can't really show it well i can but i have to put it over on this machine yeah he says it's about practical suggestions on how to deal with terrorist organizations like blm antifa etc in america yeah again the best way of dealing with them is not having the rotten communist and trash nazis in our school system raise our children and put ideas into our children's heads some school teacher in philadelphia just came out with an article saying we shouldn't have parents watch our instruction when we instruct children via zoom yeah because they know that they're communist trash that are infecting their children's minds with poison and they don't want parents listening in on it folks you know i in a way i just have half a mind just to just stop doing this you know to just say fuck this break all this shit down close it the fuck up because i there's the world isn't being helped by this the world is not being helped by what we do here a few individuals understand and that's not good enough i see the nonsense that is posted online every fucking day i look at the nonsense outside my door this is utter shit work that has done largely nothing because of how dumb human beings are and how lazy they are and you should be ashamed and you should be depressed we are beaten beaten past tense there's really no coming back from where the world is folks it's going to degenerate into war that's what's coming and you better get ready so many human lives are going to be lost as a result of what the ignorance of human beings and what we're doing you have no idea you you're gonna shit your pants when you see it start happening and you're not gonna be prepared for it in a way i just want to say just shut the fucking show off shut it down it's it's botched already and has to be fucking patched because the fucking computer fucking crashed i don't even feel like talking to the assholes out there anymore quite frankly doing this work has turned into nothing but bitterness and hatred for me that's the honest truth because where i'm dealing with a losing a team of losers you guys are a team of losers not not here in person i know you guys work hard i'm talking about just generally out there the the whole fucking truth telling community is a team of fucking losers and you're not worth my time you're not worth my effort you're really not i'm not i'm quitting discord no more calls no calls fuck fuck them i'll read some more email questions till the fucking card comes down have the highest regard for your teachings and you've really helped me train certain elements of my logic and reinforce my mindset as from a child i don't i don't even really understand the sentence structure of first principles and objective truth so he's saying that his former mindset was one of a child and i've helped to help him you know not reinforce but reinvent his mindset to one of first principles and objective truth great you have also touched upon many subjects which i would not have otherwise looked into or seen the significance of in relationship to the whole so thank you there are so many people within the western population that are order followers or slaves of government and propaganda that it undoubtedly must give them comfort and they must enjoy being slaves which is all very sad yeah tell me about it from the older generation who watch too much mainstream tv to those who are perpetually on welfare enjoying the benefits of free housing and money for no work which is called taking other people's stolen money that is stolen at the point of weaponry to patriots who stand by the flag and cheer for war and conquest in foreign lands or socialists who crave big government and believe the cure to all problems is yet more centralization of power amen that's exactly what the world is that's what all these pieces of trash think like they're all trash every person you just mentioned that mentions a piece of fucking dirt a piece of fucking shit the list goes on and on the common theme about these people is that they are for one of a better word reasonably comfortable or happy if not occasionally minorly disgruntled and just like any person or animal who is comfortable they will go out of their way to maintain or defend their current reasonable livable situation particularly if the alternative to this is no government which means no safety net or free handouts and would therefore require them to adopt a greater degree of personal action and responsibility to survive or even thrive 100 percent true see this person gets it that's that's exactly it nobody's responsible for what you're doing for your health for your inaction other than you that's it and that's what people want to murder someone for saying although it's eternally true in nature no one is responsible for you something very alien to these people and something which could potentially bring disaster upon their lives which would be taking away government yeah that's right that's right that's why i say don't even we shouldn't transition to it that is what should all go at once it's a matter of changing perspectives and thinking it that somebody has authority versus it's all been bullshit and there's never been any legitimate authority that's it and then everything we've built with this machine called government could go away at once and yeah that might hurt people so be it it's it's not us taking it down that would hurt them it's them putting themselves in that situation if you go and hang yourself over a cliff with a shitty fucking net and then the fucking neck breaks it's your fucking problem you put yourself in that situation no one else did don't tell me i'm gonna harm somebody by doing that they harm themselves by accepting something that isn't true this is compounded by an and i'm not talking about this person i'm talking about the general person who thinks that way that oh take it pulling government out pulling the rug out from people that would harm a lot of people no they put themselves in the position of harm to themselves that's not me doing that i didn't create that system okay that is based on violence it's like saying oh my god if you take away the fucking loot that the robber just told you're gonna fucking take food out of his family's mouth oh fucking well he doesn't deserve it he never owned it legitimately think about that well you take money away from this fucking person who stole it from somebody else then his family's not going to be able to eat yeah that's right it's theft it's stealing from other people it's what you dumb fuck still haven't understood this is compounded by an ever-growing number of usually younger people within these groups who are effectively useless at just about everything and are incapable of undertaking the most basic of technical tasks a fact which they possibly are dimly aware of absolutely let me tell you something the millennials are the biggest bags of shit that have ever lived as a generation you guys are just fuck tarted trash you know at least your children who see how fucked up your minds and and behaviors are are a little better than you generation z let's see how generation alpha the next generation after z is when generation z starts having children but the millennials you guys are hopeless bags of shit for for a millennial to be any use to society or anybody who thinks clearly about anything it's utterly amazing i don't know how you survive the onslaught of fucking vaccine brain damage that the rest your fucking generation have you got more vaccines than any other humans in history that's why your brains are so fucking toasted my question is how could we have any chance of a great awakening within the population at large while there's plenty of food and circuses to go around to keep everyone reasonably physically comfortable and entertained i ask the same question that's why i think nature has to intervene we need a cataclysm and the only problem with that is it will cause enormous suffering and and harm to animals and they don't deserve it that's the that's the thing that i think has to happen and the only reason i don't want it to happen is because i don't want to see animal life suffer but we need a cataclysm to destroy this system human beings don't have the will to do it that's why i don't see cataclysmic events in nature as bad things let there be tidal waves tsunamis earthquakes hurricanes fucking anything that destroys people are too comfortable and they need to be taken out of their comfort by an act of nature let's see some fucking real asteroid impacts not bullshit imagined ones from like you know hundreds of feet or hun you know hundreds of even meter wide rocks that'll do some real fucking damage that's what we really need and the only thing that pains me to say it is the animal life that would suffer would be unimaginable but human life needs to suffer like that to change our minds we're not going we don't have the will to change it we don't have the will to change our own minds folks i'm going to make what on earth is happening more and more and more uncomfortable and painful to watch every week because you shouldn't be watching this you should be doing something is the plan to awaken or further educate all those who are searching and ready to receive the work already and have these initiates ready and prepared to distribute the work more widely when the situation changes to one where people at large may be more receptive of an alternative to the current top-down government system no it's not waiting for that it's doing it now on a grassroots level that's the answer the plan isn't to wait until we have a lot of people ready to do that the plan is to every individual who knows what's going on activate and get on the fucking battlefield and do it pretty good commentary and questions in that one folks i'm i'm just in a pissier and pissier and pissier mood all the time i'm tired i'm tired i'm tired of hearing and seeing the fucking ignorance i turn on any social media i turn on any blog any channel and it's just endless ignorance of people who don't know what's going on and even the people who have it halfway then they open their mouth and they expose their ignorance and then people go oh it's they're just at the beginning of the journey they're just starting it's happening it's just slow no this should have been happening for 20 fucking years there's no excuse for p being at the level of dumb ignorant bags of shit that people are at ten years would be sufficient to take this information in and yeah i'm hard on the people who are just waking up now you should have been awake ten five five ten years ago minimum if you're that hardheaded that it took you until now for something like this to happen there's a there's something wrong with you and i don't have confidence that you're going to be able to just get it this late in the game and get on the battlefield and actually do something with that knowledge sorry if i'm real uh don't have a lot of confidence and hope you know but i'm i don't really have a lot of confidence about it uh let's go uh we'll end it manually longer than that um let's say like four minutes after i think we were down for at least four minutes yeah folks it's it's it's not good it's not good because to tell you the truth with without what with everything that i know and everything that i have done i honestly don't want to sit here and make any more in-depth stuff for people i don't think you deserve it quite frankly you know that's why i'm doing question shows while i'm teaching people actually how to do make media themselves i don't really think you deserve it quite frankly there's nothing new anyway and all these questions that i'm answering i've already answered you're not really you're going to hear me say anything new that's why you might as well turn it off and get to work yourself and once again i don't care i will beat my ratings into dust i'll do it i don't care about youtube ratings i'm trying to show you something in the mind and get you motivated to actually get up off your lazy fucking ass you know if all these years of fucking making videos and audio and presentations i haven't done what the fuck's gonna do it that's why quite frankly unless i see a shit ton more fucking people accurately teaching natural law i mean don't really expect anything better than what i'm gonna give you now on what on earth is happening so shut it the fuck off that's what you're gonna get when you come here you're gonna get screamed at to shut this the fuck off and go do something yourself you dumb fuck you lazy fuck i'd like to ask you a few questions about a video you were talking about ancient aliens could you please list your podcast shows you further discuss this topic no i won't list them go to the fucking podcast page and do a finding page learn how to do a finding page in your fucking browser you don't know how to use a web browser enough to do a finding page and type in uh cosmic abandonment then you're hopeless learn fucking some minimum shit about technology people this is what i'm gonna do i'm just gonna blow up on people for what they don't already know because you're ignorant it's all been here it's all been available unto you and you've ignored it just so aggravated put the put the put it back on my fucking computer watch watch okay if i want to search the word terabyte on this page okay all you have to do hit the magnifying glass start typing terabyte terabyte there's the word highlighted in green you could do that on the podcast page no i'm not going to tell you what they are go to the fucking podcast page hit podcasts okay search for the word cosmic here's the search cosmic cosmic there it is cosmic judgment find the next one mike macro cosmic find the next one okay this is microcosmic and macrocosmic here's cosmic abandonment okay it's mentioned in this presentation all right if you want to go back more you can go back further all right eight matches on that page go down to the next page search for the word cosmic there you go cosmic abandonment with all the slides there you go how hard is that you don't know how to use a piece of software that's your problem don't worry about alien backdrop to humanity don't worry about human origins figure out how to use your web browser first so you can actually do research right how about figuring that the fuck out first i'm just going to be mean to people maybe if i just be mean and tell you what a dumb bag of fucking shit you are maybe you'll feel bad enough about your fucking self to get motivated to fucking learn something folks i might just stop this i really might you know i might just get the fuck off the air because i'm done i'm done i might just give the how to become the true media seminar and drop the fucking show and then just be done with it i'm very seriously contemplating stopping the water on earth as happening show because i i can't stand human beings anymore and i'm finished trying to teach the unteachable because that's what most of you people are you're the unteachable you haven't learned a fucking thing the world hasn't gotten any better it's gotten infinitely worse because you failed miserably at your fucking task and i don't really want to sit here screaming at fucking people there's no i don't want to make new presentations it's over do you get it an addendum to this person's question in show 231 you said the petri dish should be wiped clean what do you mean i mean the extermination of the human species that's what i mean like a big fucking comet slamming into this earth and cracking its core and being done with the evil that's here that's what i mean by wiping out the experiment that is humanity that was an experiment from non-human entities it's garbage that's what it is it's garbage it's always been garbage from day one and that's it it's always been there's no starting matter here there's no prima materia first matter that you can transmute into gold there's so little of it it's not worth doing the effort it's not worth making the effort it can't be done because you can't shine shit you can't shine shit all you could do is smear it all over the fucking place and that's what this planet is i listen to fucking imbeciles say oh humanity's so good we're so good the humanity is a big bag of fucking garbage all you got to look at is what we've made the world into and then you know what's inside most human beings most human beings don't give a fuck about truth all they care about is money they're garbage they always have been they'll do these fucking jobs of control for money because they're fucking immoral garbage fucking people having faith in humanity the fuck reason has anybody ever had to have faith in this shit race it's a mongrel shit race what do you recommend are the essential items to purchase and stock up on on your case on the k in the case there is no awakening in other words a hunger games society emerges again and he's talking about should they invest in gold and metal and you know it's like no that's not intrinsic value i've talked about this endlessly on the show again another thing i've covered of what real intrinsic value is and means i don't know how many times i've gone into it but it's been a lot not just a few times again all it shows me is every question nobody has listened you haven't been through the material i've answered the question you won't take my advice and go through the material intrinsic value is air water food shelter clothing guns ammunition and real what you would call medicine and or you know herbal supplements things like that that's it it's what you your body requires to survive what you can shelter yourself from the elements from and what you can protect and defend yourself and the things that you have rightfully acquired with that's it that's intrinsic value you think gold has intrinsic value when the shit hits the fan you're going to be able to eat that gold good luck what are you going to do wipe your ass with it wipe your ass with some of your gold coins you're not going to eat it you'll be looking for the intrinsic value intrinsic value air that you breathe water that you drink food that you eat supplements and medicine what you can clothe yourself shelter yourself and defend yourself with that's intrinsic value if you don't understand that i've i don't know what to tell you okay you you've bought an incorrect definition of what intrinsic means and you'll still have the good old and caps out there go no gold's intrinsically valuable oh wait a second wait do we have a guest no i don't think we do no i'm not bringing it back up i don't even feel like going through it yeah i closed my presentation already yeah yeah the end caps get the slide whistle folks here you go here's the and caps well gold and silver have intrinsic value because you know when everything hits the fan i'm gonna eat those coins yup that's what you sound like dumbass yeah you don't even know what the word intrinsic means you know out of nature but keep still thinking that you're awake and you know what's going on fucking retards i've been listening to you since your podcast with jay parker not quite the beginning i do want to ask about william cooper and john todd cooper was murdered because he called 911 among other things john todd was ultimately framed for telling the truth as well about spell binding to music and such my question is at this point in time do parents classify this truth with the younger generation i people can't even really make sentences that make sense folks i don't know what that means i have done the great work but my kids one of which is 13 is not believing what i am telling her probably because she's being brainwashed by the indoctrination system called public school and she probably has communist professors that are teaching her leftist trash and or outright nazi fascist trash in the public school system that's why it's important to homeschool and not allow these poisonous satanists to infect and poison the minds of our children i was awake at an early age especially since my father was a world war two combat vet and told me many truths as i grew older just asking for a little advice for the younger kids which all this chaos is truly going to affect in the future you're damn right you're damn right your your daughter's going to grow up an abject slave that's what's that's what's coming down the pike that's what's going to happen your daughter's going to grow up as a slave overt slave it ain't even going to be covert slavery so get on the battlefield and do something about it start homeschooling your kid your child home school get them out of the government indoctrination camp most people go no i can't do that you know i have all these other responsibilities here's the thing if you don't take the responsibility to truly get the mind of your children out of the shitter you don't love them all right more and more i'm gonna harp on parents even though i'm not one yeah i have the right to harp on parents even though i'm not one you damn well better believe it that's right i don't have to have a fucking child to know the right thing to do to to bring a child's mind into harmony with the truth so don't tell me i need to shit out a fucking child like you all of other motherfuckers do to know what needs to be done to get their minds right you're not going to tell that to me you're the ones continuing to fuck up your children's minds by putting them in the indoctrination camp communist indoctrination camp i'm not doing that you are so i can say not having a child the answer is buck the fuck up and homeschool your child that's the answer that nobody wants to hear because you want your time for yourself well guess what you might not be able to have your time for your fucking self nobody wants to hear you have to sacrifice what's your part of your life you need to willfully sacrifice parts of your life you don't want to hear that that's how truth works when you bury yourself deep in a situation like this to get it back into harmony with it you got to take things away that you want for yourself and i've done that without having children for other motherfuckers children and motherfuckers who have shit kids out of their fucking cunts haven't done that you want it to get nasty and you want it to get fucking personal i'll make it real nasty and personal motherfuckers this might be the last what on earth is happening broadcast i have to seriously sit back and consider really and i've said this before but i really fucking mean it you may be listening to the last what on earth is happening broadcast because i'm done your child's going to grow up a slave they're going to live as a slave and they're going to get the shit raped the fuck out of them by government and militarians and police because they're going into abject slavery not just covert slavery that's what's going to happen to your daughter when she gets older because you're doing very little to nothing and so is everybody else you're kicking back watching shit instead of trying to affect people in the world what are the satanic hot spots you mentioned in your alex jones interview because you mentioned some states but what places specifically you named rose valley in pennsylvania what other places specifically well i haven't been to every satanic hot spot in the united states but i can tell you philadelphia certainly is one okay rose valley pennsylvania certainly is one art in delaware is one new york city is a huge one and a lot of the surrounding suburbs whitehall maryland was one that i've been involved with whitehall pennsylvania is one that i've been involved with they seem to like the word whitehall okay i'm not saying every place in the whole country named whitehall is satanic but that was my experience okay and uh san francisco is loaded with satanists loaded with them you know los angeles loaded with satanists you know california in general i would also say connecticut is a big satanic hotbed because it's a place where there's tons of mind control centers like yale university you know there's uh massachusetts loaded with satanists the boston area that's a hotbed because of a harvard university you know um connecticut with all of its financial institutions absolutely loaded with satanists so those are some of the places specifically in the united states london is an entire satanic center for the world rome is an entire satanic center for the world large portions of china are satanically controlled asian satanists are hugely active you know this goes deep into the far east india is another huge place for satanists in the world the country of india with their caste system it's one of the most satanic things you'll ever find on a future show would it be possible for you to link or cite some of the literature regarding important scientific findings well there may not be a future show but you know last week i did link some of that um on the podcast section switch over to the computer i posted the book the invisible rainbow by arthur ferstenberg you know you could look up some of those studies i posted it in epub and pdf and i'll just show you a lot of people don't even take advantage of this stuff i don't even know why bother you know as a matter of fact i i'm going to announce yeah i'm taking another hiatus from the show all right so i i maybe i'll maybe i'll continue with the interview of um nathan reynolds next week maybe that'll be the last one and then i'll take a long hiatus from doing the show maybe until after the um seminar is complete and then i'll decide whether i want to the after the how to become the true media seminar i'll make a decision whether i want to continue i told people that this was new incarnation of the show was going to be for about five years but in all honesty i don't think human beings today deserve it after what has happened with kovid i think i'm just going to bow out of this and let what happens happen and i'll do the great work on my own time and i'm done with you fucking retards you know because really you don't deserve any new stuff you don't deserve any uh presentations you don't deserve any of it i want to just talk from from my heart and what i really think about you guys and i'm talking to my own viewing audience and i don't give a fuck what you think i think most of you are lazy trash turn the show the fuck off fuck you okay i think most of you don't take advantage of what i fucking put up you don't learn most of you have not gotten the arc drive and i don't give a fuck whether you do or not that's on you it's all your karma but i think i have to it's very personal to me this is is personal all of it's personal it's all personal those who don't see it that way are wrong this is all personal because what you're basically saying is my freedom should be flushed down the toilet with yours parents out there who aren't taking it fucking personal you don't love your children if you were if you did love your children you'd be taking it real fucking personal that other people are flushing their freedom down the toilet but you don't give a fuck about anybody but yourself you don't care about your fucking children so for my health i think i'm going to step away from all this i might do one show next week i might not even do it i might just tell nathan i've stopped the show and i'm sorry but we'll pick it up another time but i'm leaning more and more toward this being my last show i'm gonna have to do some serious soul-searching and think about it in my downtime this week go back to the slot go back to the fucking computer here at the end of the podcast i put other links so you can research stuff you know so you know when i did the the show about the blog from charlie monroe with his software you can click that and then it downloads right to your machine there's his blog you know a day without business see i do nice things so that people can research it and they don't even take advantage of it most of them don't even know it's there because you're muslim muslim it's like the only two words you guys can fucking say phone fucking users muslim muslim most lab that's what you guys sound like never made a fucking thing in your whole fucking life on a computer but your fucking love fondling your fucking slab so see last week yeah with uh last week's show 235 you know you can go here click invisible rainbow it downloads the epub that fast boom click it open it there's the book you know but most you guys won't read it you'll just continue to believe the bullshit that you want to believe you know so i don't know whether i have any more energy to invest in my own audience quite frankly i think i gotta step away from for a while folks you know because i've already been alienating my listenership and good good perfect don't fucking watch don't go on the youtube channel don't do anything you know this isn't about watching me because you're fucking yappers and you're gonna get fucking clown shoed okay that's all it is that's all you guys are all you know how to do is talk you don't know how to do a fucking thing because you have no skills you know how to talk about doing something but you don't know how to do anything because you're fucking low life trash yappers with no skills you're low life trash yappers with no skills and i'm done giving you of my energy okay fuck you all okay that's how it's gonna be when i see more people putting out quality fucking work i'm d i'm done maybe i'll come back and chime in on some of it but you all can go fuck yourselves how's that for wanting ratings and fucking view counts and fucking you know sales in my store don't buy anything burn the whole fucking thing down motherfuckers you'll see what i think of you for real i'll show you what i really think of all you i tell you i had respect for me but i don't i would would tell you if you were doing something and you were helping to change the fucking world but 99.99 of you ain't doing shit you're low-life trash and you haven't haven't ever heard it from anybody you're fucking ignorant no nothing low lifes it's your fault what happened your fault for not getting involved in the battle not teaching people morality we had a chance to turn this world around you didn't do it you blew it you blew it by sitting and watching and yapping and not actually taking action and you're still sitting there yapping you look at what i've done the endless hours i put into this i have a right to be this angry you don't even know what i've done you don't even know what i've sacrificed and then you want to give me shit go fuck yourself i watched the movie called the mandela effect the story goes that cern secretly made the hadron collider to open up a portal of some sort yeah again i don't really buy into this whole changing of timeline stuff you know who's changing the timeline we are by our own inaction we're changing the timeline to negative eventualities by our own inaction by not morally educating our young by leaving places that we say oh this is so fucked up i don't want to be around these people and then we run away like little cowardly pussies instead of staying and fighting the hard battle and morally educating people that's why the world is the way that it is people emptying out of cities and into suburbs because you're low life fucking cowardly fucking lazy fucking trash you don't give a fuck about what's true you don't care about who's morally educated all you give a fuck about is yourself and your own fucking comfort you lowlife you're a fucking lowlife yeah folks in case you tell i'm done doing this i don't want to do this anymore and and you guys made it like that you guys made it like that not me yeah give me it yeah i'm gonna drink a beer on the air because i need one cause i'm tired of talking to fucking trash that's doing nothing except standing by watching the world burn might as well what the fuck do i have to say that i haven't already said yep well here's the burning at all of the ground including what on earth is happening it will not be insulated all right next question have you noticed the irony that the r complex corresponds to the god the father our thoughts originator thought is responsible for motor functions fight or flight instinctual behaviors let yet the neo cortex corresponds with god the sun our actions manifestation although it is responsible for higher order thought functions well you know you could look at father as the oldest part of the brain the r complex the reptile complex and then the neocortex is the sun because it is you know it's really the um uh you know motor response mechanism the you know stimulus response mechanism is the r complex and then you're you know then the mid part of the brain or the mammal the mammalian complex or the limbic brain is responsible for our emotions and then when you put that those two together ultimately you have higher order thought functions okay not when you put them together but when they work properly you develop higher order thought functions of the neocortex when both brain hemispheres are in balance okay that's how basic brain functionality works basic neuro science and neurochemistry will if you study that will help you to understand that the neocortex will if it's working in balance will allow the um limbic system and our complex to also work properly meaning you will have the right emotional responses and you will do the right behaviors okay and you also have self-defense in place in addition to understanding heart-based intelligence of the non-aggression principle i've inferred my own speculat speculative conclusion on why this is order ordo abkeo the will of god no shortcuts but it would be it would be very much appreciated hearing your take on what the universe is implying with this association which may seem backwards at first glance again it's not necessarily backwards god the father the the father aspect of the of the um our complex only means that it was their first like the god of creation it has always been okay it just means it's the oldest part of the triune brain complex the second oldest part or the right in the middle is the midbrain or limbic system and then the newest part of the brain is the neocortex and that's why it's the sun so you have the r complex masculine father figure that is stimulus response protection defense mechanism etc fight or flight and then you have the feminine limbic system which is responsible for our emotions how are what we feel based on what we do to others which is a you know internal uh aspect of the human being namely their emotions that's the feminine then both of those together will give rise to the neocortex or the new part of the brain it's new it's the newest evolutionarily and it's the son of the father and mother so i think the triune complex holds fairly true fairly well if people want to look more into that then go back to my earliest podcast where i talked about it in depth yeah we're running out of time we got about four to five more minutes about four more minutes let's keep it rolling so when i pace this show back together uh you know um it'll total three hours don't know why i should even bother i've been watching your videos i'm very interested in what you're saying but i just can't do it anymore i tried but i can't listen to a guy screaming and calling everyone brainless fuckheads for two hours well guess what shut it the fuck off shut it the fuck off motherfucker you're one of the people i'm talking about what have you done here's the thing instead of writing to me and worrying about what i'm doing ask yourself what the fuck have i done now let's put the name in let's put it in here we go i'm going to give you the numbers let's put it into the search engine so this person's name which is actually a slightly more common name which i won't give i i put it into a search engine a whopping 90 results you know there you go and not doing anything there's nothing as far as you know websites you know there's a facebook profile nothing as far as you know videos anything like that okay so once again the question that you need to be asking yourself my man is what the fuck have you done okay you don't want to listen to me scream saying that everybody else hasn't even compared all together with what i've done then shut the fucking show off and go do something here's the thing folks you know what you'll get your wish asshole because i'll probably just stop doing this because you know what nobody else is doing a fucking thing so why should i i've already put all the information out there that i need to put out there and i've done it in a phenomenal way that people can research and learn what's going on in this fucking world and you know what they've done they've done this that's what they've done that's what they've done now give me another minute okay i haven't he says instead of holding me an idiot inform me i have you haven't listened i told you to go back in the podcast week after week after week most people won't do it you can get the ark and you can inform yourself no i'm not here to inform you i'm here to put the information out there so that you can inform yourself only you can inform you i can't inform you i can't make information go into you okay i could put the information out there publicly and i have past tense that's why i'm so angry i've taken my life to put the information out there and you know what people have done with it they've squandered it they haven't taken action based on it and the world is in the fucked up mess that it's in because most people have just completely ignored it that's what and you don't understand that and you think you do and you write a big fucking thing complaining about how i'm angry about that i've done this for the last fucking 15 years of my fucking life what the fuck have you done there's the question everybody needs to ask that i'm gonna leave you guys with okay this might be the last what on earth is happening ever and honestly it probably is going to be i'm probably not coming on next week with nathan reynolds you know if i if i decide to do that just out of respect i may just do it but this is probably the last what on earth is happening okay and what you all you motherfuckers need to do is is ask yourself what the fuck have i done that's the question you need to ask yourself what the fuck have you done most of you can't answer that question because you've done nothing okay when you have done something there's no need to get offended so there just like that this person's all got his panties all bunched up up his ass crack but the reason he does is he hasn't done fucking shit that's the answer that's the answer okay and again i'm talking to all the people who have gone through all the fucking podcasts and have done nothing if you haven't gone through the podcast go back i'm not talking to you you shouldn't be listening now this is for all the people who all this information is out there and none of them are fucking putting it out there for other people you're not fucking propagating the knowledge so that's the question people need to ask what have you done that's what i'm going to leave this episode and it may very well be the last episode of what on earth is happening what have you done that's the question don't worry about mark pacio mark pacio is going to be just fine based on what i've done worry about what the fuck you've done [Music] [Music] [Music] yeah yeah

Get The A.R.K. (Amazing Repository of Knowledge)

Get The WHOLE Picture.



You ship me a 1 TB Hard Drive. I fill it with information and ship it back to you. It's that easy. Then you'll have at your fingertips ALL the information you need to understand what is happening in our world, ALL IN ONE PLACE! No need to endlessly search the Internet or deal with the issue of increasing censhorship of forbidden knowledge. How much would THAT be worth to you?

I have been online since the days before the World Wide Web became popular. Since that time, I began collecting, studying and archiving information about our world and the events that have been occurring in it. I never left it to chance that information I came across during my search would always be available online. So, whenever I found something that I thought was worthwhile, I downloaded it and backed it up offline. As you can imagine, this much data archiving would result in an enormous amount of material. Quite frankly, it would be hard for me even to describe the amount of information I have pulled from this repository of knowledge and experience that we call the Internet.

Years ago, a friend asked me if I could place the best material that I had collected onto a hard drive for him, so that he could browse it and study it according to his interests, and at his pace and leisure. I said yes, and began the task of collecting the best data that I had gathered into a huge digital library, and copied it onto the 1 TB hard drive that my friend provided. I then thought, why not share this information by making it available to anyone who wants it?

This is the A.R.K. offer. A terabyte of digital information in the form of video, audio, and books. You only need to supply a 1 TB external hard drive, available today for as little as $50. You ship the drive to me, and I will ship it back to you, filled with valuable and empowering information on just about every significant topic you can imagine.

The A.R.K. drive consists of over 1,800 video files, almost 8,000 digital books, and over 20,000 audio files. These files will always be available to you for offline browsing, playback and study, with no internet connection required to access any of the data on the drive. You may then "pass it along" by sharing any or all of this information with anyone you wish.

In this unique time in human history, this is my unique offer to you. To take me up on this great opportunity to preserve and proliferate human knowledge and wisdom, you can fill out the form below to receive detailed shipping instructions.

Thank You!

Mark Passio

The A.R.K Drive & Mark Passio’s Great Work Compilation

Hello, everyone!

So, I have just managed to upload the whole **A.R.K DRIVE** and **Mark Passio’s Great Work Compilation** (Seminars/Axillaries for now; Podcasts later) to my OneDrive account; that I made and paid to get this up, specifically.

It took over 4 weeks and counting for my PC to be constantly ON (with slight breaks in-between), just to upload this lol; at a dire upload rate of 2-6mbps >_<;)

Here’s the link to the: **‘Mark Passio’s Great Work Compilation’**:
https://1drv.ms/u/s!AvzsKbv968WggeQqeggvq4EeqmFqEg?e=VYEFRY

This is a compilation of Mark Passio's work.

The files inside entail **ALL** his **SEMINAR PRESENTATIONAL** videos and slides to this date that he has released to the public. There is also a lot of interviews that he has done over the years in the format of audio/video, that I have downloaded from YouTube.

*Does not contain **ANY** of his full Podcast/Show series, except for little snippets. This will be on a separate link.

*Does not contain **ANY** ArkDrive information other than Mark Passio's work. This will be on a separate link.

*Could not get my hands on the: 'The Dark Side Of Tesla's Technology Seminar Presentation Slides'. If anyone has it, send me the download and I’ll upload it!

Thanks!

Here is the link to the: ‘**A.R.K DRIVE’**:
https://1drv.ms/f/s!AvzsKbv968WgaEtU9hlXH01zOFg

As you can see there are 3 Main Folders; Audio, Book and Video. The Audio and Video Folder, respectively have sub-folders; containing a certain numeral to an alphabetical limit-folder. This was done to make it easier to load, download and navigate the contents of the A.R.K DRIVE.

There is a download limit of 100GB per en masse. So, log down where and when you started/finished; rinse and repeat.

Please use the '**SORT**' / '**VISUAL**' tab at the top right of the screen to navigate the A.R.K Drive easier.

I will/have started to re-upload the other work(s) of Mark Passio that I have brought/compiled and will be sharing links to these once they have been uploaded.

I will do my best that **ALL THE CONTENT** I am uploading, will be **UPLOADED**. But please keep in mind that there will be discrepancies that I will do my best to sort out/log them down; so people can find/contribute towards it if they have them available.

I cannot say how well or long the content that is on the **ONE DRIVE** will remain. So do not trust that it will be there **FOREVER**. Hesitate not.

Please **DOWNLOAD**, **BACKUP**, **REUPLOAD**, **STORE** and **SHARE FAR** and **WIDE** as **POSSIBLE**!

Disclaimer: This isn't to take any monetary funds away from Mark Passio's livelihood and expenditures that would inhibit him to continue doing the Great Work.

In fact, one might argue that this will alleviate the time, energy and costs for Mark and his team; that goes towards buying the physical entities, the process of conversing the data onto physical entities and shipping distribution.

This project is to make the transmission of his content and the eclectic array Knowledge pertained on the A.R.K DRIVE and Mark Passio Great Work Compilation; more widely available, accessible, easier and cheaper for ANY individual(s) with an Internet Connection can acquire.

***Please support Mark Passio first and foremost and his team to carry on the Great Work by donating via:
